Total Peace Establishment	34,318	368,079	76,544

## III. NAVY

Estimates (expenditure), 1912, 2,989,884*l*, 1911 2,860,717*l*, 1910, 2,781,580*l*

The Austro Hungarian navy is mainly a coast defensive force, maintained in a state of high efficiency, and including a flotilla of monitors for the Danube. It is administered by the Naval Department of the Ministry of War. The new ships are to replace others growing obsolete, and the programme provides for a fleet of 12 armouredads between 20,000 and 30,000 tons, 5 second-class cruisers (4,000 to 7,000 tons), 6 third class cruisers (1,500 to 2,500 tons), 19 torpedo boat destroyers, and 83 various torpedo boats, exclusive of the Danube flotillas. The headquarters of the fleet are at Pola, and there are other establishments upon the Dalmatian coast. The Austro-Hungarian fleet is thus constituted —

	1911	Effective end of		1914
		1912	1913	
Dreadnoughts	—	1	2	4

			Coal (excl. lignite)	10,978	25,057

For the common customs territory the values are fixed annually by a permanent commission, comprising officials and representatives of agriculture, agriculture, trade and industry. In general, net values are taken for imports and gross values for exports, and they

must be determined at the crossing of the frontier. The commission has to fix them according to the countries of origin or of destination, and only employ averages exceptionally. Quantities are declared, but the administration may, and in the case of imports always does, check the declarations. The weight declared is either net or gross, according to the tariff regulations. The recorded country of origin is that of production, and the country of destination is that where the goods are to be consumed. When the prime origin and ultimate destination are unknown, the most distant points of transit are recorded. Trade by countries —

Country	Imports from (1910)	Imports from (1911)	Exports to (1910)	Exports to (1911)

<sup>1</sup> And British possessions in the Mediterranean

The value of gold, silver, and bullion imported and exported was in 1910, imports 43,101,000, exports, 80,930,000 crowns in 1911, imports, 41,413,000 exports, 132,915,000 crowns.

The following table shows the commercial intercourse between the United Kingdom and the Dual Monarchy for 5 years —

—	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports from Austria Hungary into United Kingdom	6,799,286	7,758,478	8,985,597	7,511,866	6,911,943
Exports from United Kingdom into Austria Hungary	4,620,440	4,814,907	5,386,750	4,001,033	4,679,268

### Money and Credit

The only State bank is the Austro Hungarian, formerly the National Bank (Nemzeti bank). The bank, during the continuance of its privilege, has the exclusive right to issue bank notes. The charter of the bank, which expired at the end of 1910, has been renewed and extended to the year 1917. Of the sum total of bank notes in circulation, at least two-fifths must be covered by the supply of metal, silver or gold, coined or in bullion. When the amount of notes in circulation exceeds the amount necessary to cover them by 500

million crowns, the Bank pays a tax to the State of 5 per cent. The State, under certain conditions, takes a portion of the clear profits of the bank. From these profits, first 4 per cent. on the share capital is paid to the shareholders, of the remainder 10 per cent. is transferred to the reserve fund, and 2 per cent. to the pension fund. The remainder is divided into two portions: one falls to the two States, from the other the dividend to the shareholders may be made up to 6 per cent. Of whatever still remains of the latter portion, (so long as it does not exceed 7 per cent.) one third falls to the shareholders and two-thirds to the two States. Each of them participates in these benefits each year in the proportion of the tax paid within its territory on the taxable business of the Bank.

Statistics of the Austro-Hungarian Bank in thousands of crowns —

	Liabilities					Assets				
	Capital	Reserve Fund	Note Circulation	Mortgages	Total including others	Cash	Discounted Bills, &c.	State Loan	Loans on real property	Total including others
1900	310,000	20,197	188,041	298,524	3,022,638	1,718,019	687,784	60,000	299,984	3,022,638
1910	310,000	22,581	875,938	298,053	3,225,166	1,609,168	889,088	60,000	298,547	3,225,166
1911	310,000	26,503	840,861	291,340	3,470,007	1,635,701	1,141,339	60,000	297,308	3,470,007
1912	310,000	28,408	823,151	297,203	3,423,168	1,507,575	1,341,107	60,000	298,455	3,423,168

The closed accounts of the Bank for 1912 showed a net profit of 40 079 629 kronen (1,669,934 l.)

### Money, Weights, and Measures

In Austria by law of August 2, 1892, and in Hungary by Law XVII of 1902, the monetary system of Austria-Hungary was reformed on a gold basis, though the standard coin the crown (krone, korona), is not coined in gold.

The new coins with English equivalents are—

Gold —

The hundred-crown piece (gross weight 33.8753887 grammes 0.900 fine, and fine weight 30.4878048 grams) = 4l 3s 4d (law of August 11 1907).

The twenty-crown piece (weighing 6.775067 grammes 900 fine and thus containing 6.09756 grammes of fine gold) = 16s 8d

The ten-crown piece = 8s 4d

The single ducat = 11 crowns 29 heller (fillér) = 9s 4½d

Silver —

Five-crown pieces = 500 heller

Two-crown pieces (weighing 10 grammes) = 200 heller

The single crown (weighing 5 grammes 835 fine, and thus containing 4.175 grammes of fine silver) = 100 heller = half a guilder (forint) of the old coinage = 10d

Nickel —

The twenty heller (20-fillér) piece = 10 kranzer (krajczár) of the old coinage = 2d.

The ten heller (10-fillér) piece = 5 kranzer (krajczár) of the old coinage = 1d

Bronze —

The two heller (2-fillér) piece = 1 kranzer (krajczár) = ½d

The single heller (fillér) piece = ½ kranzer (krajczár) = ¼d

Silver crown-pieces are accepted to any amount at Government offices, but in general circulation they are legal tender only up to 50 crowns. The notes of the State Bank are legal tender.

The metrical system of weights and measures is now legal and obligatory in Austria-Hungary. The old weights and measures were —

The <i>Centner</i> ( <i>mássa</i> )	= 100 <i>Pfund</i> = 56.06 kg	= 128½ lbs. avoirdupois.
„ <i>Emser</i> ( <i>abó</i> )	= 56.59 litre	= 12.49 wine gallons
„ <i>Joch</i> ( <i>kold</i> )	= 5,754.84 square metre	= 1.43 acre
„ <i>Metzen</i> ( <i>méro</i> )	= 61.49 litre	= 1.7 imperial bushel.

(The *Klafter* (ol) of wood = 6.82 cubic metre = 240 cubic feet.)

„ <i>Mile</i> ( <i>morföld</i> ) = } 24 000 Austrian feet }	= 7,585.8 metres	= { 8,897 yards, or about 4 miles.
--	------------------	------------------------------------

## AUSTRIA

### Constitution and Government.

#### I CENTRAL GOVERNMENT

The political representation is twofold—(1) for all the Austrian provinces (*Reichsrath*) (2) for each separate province (*Landtag*).

The *Reichsrath* or Parliament consists of an Upper and a Lower House. The Upper House (*Herrenhaus*) is formed 1st, of the princes of the Imperial family who are of age 15 in number in 1911, 2nd, of a number of nobles—81 in the present *Reichsrath*—possessing large landed property, in whose families by nomination of the Emperor the dignity is hereditary, 3rd archbishops 10 in number, and bishops, 7 in number, who are of princely title inherent to their episcopal seat, and 4th, of any other life members nominated by the Emperor, on account of being distinguished in art or science, or who have rendered signal services to Church or State—159 in 1911. (Under law of January 26, 1907, the number of these members must not exceed 170, nor be less than 150.)

Under the Electoral Law of January 26, 1907, the Lower House (*Abgeordnethaus*) is elected on the basis of universal, equal, and direct suffrage. Entitled to vote for a deputy are all Austrian male citizens over 24 years of age who have resided for at least a year in their place of election. The electoral districts are in most provinces composed, as far as possible, of uniform nationality, and are divided from each other, according to their character, as urban (industrial) or rural. In general there is only one deputy to be elected for one electoral district, but in 36 districts of Galicia, two for each. In these 36 districts the principle of the single vote is followed, inasmuch as each qualified elector has only the right to one vote, though two deputies are to be chosen. The candidate who receives more than half the number of votes recorded is regarded as the first deputy, and the one who receives more than a fourth of the votes, as the second. For the deputies of these electoral districts, there are elected, at the same time, substitutes who, in case of failure of the deputy's mandate, enter the House, so that for one of these districts a new election is held only when the mandates of both deputies fail. By this system the national minorities in those parts of Galicia which have a mixed Polish Ruthenian population have their representation assured. In Moravia, the population entitled to vote is divided, as in elections for the provincial *Landtag* according to nationality, so that German and Bohemian electors choose their deputies separately. In Lower Austria, Upper Austria, Salzburg, Carniola, Moravia, Silesia, Vorarlberg and Bukovina, under provincial laws each elector is obliged to appear at the election for a member of the *Reichsrath*, and present his electoral ticket, the penalty for neglect of this obligation being a fine of from one to fifty kronen.

The total number of members is distributed as follows: Lower Austria 66, or 1 for every 56,185 subjects of the State, Upper Austria 32, or 1 for 38,773; Salzburg 7, or 1 for 30,677; Styria 80, or 1 for 48,189; Carinthia 10, or 1 for 39,820; Carniola 12 or 1 for 73,338; Trieste 5, or 1 for 45,902; Görz and Gradisca 8, or 1 for 43,454; Istria 6, or 1 for 67,261; Tyrol 25, or 1 for 37,865; Vorarlberg 4, or 1 for 36,352; Bohemia 180, or 1 for 52,074; Moravia 49, or 1 for 53,516; Silesia 15, or 1 for 50,443; Galicia 106, or 1 for 75,714; Bukovina 14, or 1 for 57,150; Dalmatia 11 or 1 for 58,697. Total 516, or 1 for 55,872. The duration of the Lower House of the Reichsrath is for the term of six years. Members of the Lower House receive 20 crowns (16s. 8d.) for each day's attendance, with an indemnity for travelling expenses. In case of dissolution new elections must take place within six months. The Emperor nominates the president and vice president of the Upper House of the Reichsrath, while those of the Lower House are elected by the members. It is incumbent upon the head of the State to assemble the Reichsrath annually. All constitutional matters concerning rights, duties and interests that are common to all provinces of Austria Proper must be regulated by the Reichsrath. To give validity to bills passed by the Reichsrath, the consent of both Chambers is required, as well as the sanction of the head of the State. The members of both the Upper and the Lower House have the right to propose new laws on subjects within the competence of the Reichsrath.

Lower House (June, 1911) German Nationalists, 100; Christian Socialists (German), 73; German Social Democrats, 49; United Bohemian Club, 84; Bohemian Social Democrats, 25; Poles, 70; Polish Social Democrats, 9; Ukraine Union, 28; Croatian-Slavonian Club, 27; Dalmatians, 7; Union Latins, 21; Independents, 23.

The Ministry for Austria Proper is as follows, November, 1911 —

Premier — Count *Karl Stürgkh*

Minister of the Interior — Dr. *Karl Baron Heindl*

„ of Finance — *Wenzel von Zulecki*

„ of Commerce — Dr. *Rudolf Schuster von Bonin*

„ of Justice — Dr. *Viktor von Hochenburger*

„ of Instruction — Dr. *Max von Hussarek*

„ of Railways — Dr. *Edenke Baron Forstler*

„ of Agriculture — *Franz Zenker*

„ of National Defence — General *Friedrich von Georgi*

„ of Labour — *Ottokar Trnka*

Minister without Portfolio — *Ladislav von Dlugosz*

The Ministers are responsible for acts committed in the discharge of their official functions.

## II. PROVINCIAL GOVERNMENT

The Provincial Diets are competent to legislate in all matters not expressly reserved for the Reichsrath. They have control over local representative bodies, and the regulation of local affairs affecting taxation, the cultivation of the soil, educational, ecclesiastical, and charitable institutions and public works. In Tyrol and Vorarlberg they have the regulation of the defence of the province, and consent to the employment of the local militia (*Landeschützen*) in another province of the Monarchy. Each Provincial Diet consists of one assembly, composed (1) of the archbishop and bishops of the Catholic and Orthodox Greek Churches, (2) the rectors of Universities (in Galicia, also the Rector of the technical High School of Lemberg and the President

of the Academy of Sciences of Cracow (Krakau)], (8) the representatives of great estates, elected by all landowners paying land taxes of not less than 100, 200, 400, or 800 crowns, according to the provinces in which their estates are situated, (4) the representatives of towns, elected by those citizens who possess municipal rights or pay a certain amount of direct taxation, (5) the representatives of boards of commerce and industry, chosen by the respective members, (6) representatives of the rural communes, elected by all inhabitants who pay a small amount of direct taxation. The election is in Tyrol, Silesia, Galicia, and Dalmatia indirectly (by deputies called Wahlmänner), in other lands directly. In Lower Austria, Upper Austria, Salzburg, Styria, Carinthia, Carniola, Trieste and district, Gorz and Gradiska, Istria, Vorarlberg, Moravia, and Bukowina, there is, besides a general electoral class in which every qualified male subject of the State over 24 years of age who has been domiciled for the required time has a vote. Where a general electoral class exists, persons authorised to vote in the other electoral classes are authorised to vote also in the general electoral classes. This is not the case with respect to votes for the Landtag, in Styria, Vorarlberg, and in the cities of Vienna and Trieste. In Moravia, under the arrangement made by the Provincial Diet, November 27 1905, the proportional system was introduced for the electoral classes of the great landowners and the chambers of commerce and industry. The other electoral classes (towns, country parishes and general electoral classes) are divided into constituencies according to nationality. German and Bohemian electoral districts being formed, so that German and Bohemian voters choose their representatives separately.

The strength of the seventeen separate Diets is shown in the following table —

	No of Members		No of Members
Lower Austria	127	Tyrol	68
Upper Austria	69	Vorarlberg	26
Salzburg	89	Bohemia	242
Steiermark (Styria)	87	Moravia	151
Carinthia	43	Silesia	31
Carniola	50	Galicia	161
Trieste and district	80	Bukowina	63
Gorz and Gradiska	30	Dalmatia	43
Istria	47		

The deputies to the Provincial Diets are elected for six years. The Diets are summoned annually.

The Provincial Council (Landessusschuss) is an executive body composed of the president of the Diet (called Landmarschall in Lower Austria and Galicia, Oberlandmarschall in Bohemia, Landtagspräsident in Dalmatia, Landeshauptmann in the other lands, nominated by the Emperor) and other members elected.

### III. LOCAL GOVERNMENT

Each commune has a council to deliberate and decide, and a committee to administer all its affairs. The members of the council are elected for three (in Galicia for six) years. All who have a vote are eligible if of age. In the towns with special statutes a corporation takes the place of the communal committee.

District representative bodies are, in Styria (Steiermark), Bohemia, and Galicia, interposed between the communal bodies and Provincial Diets. They deliberate and decide on all affairs affecting the interests of the district

(Bezirk) They consist of the representatives (1) of great estates, (2) of the most highly taxed industries and trades, (3) of the towns and markets, (4) of the rural communes (Landgemeinden). Members are elected for three years, in Galicia for six. A committee of this body (called the Bezirksausschuss, administers the current affairs of the district.

### Area and Population

#### I. PROGRESS AND PRESENT CONDITION

The following is the civil population of Austria at the last 4 censuses —

—	Population	Absolute increase	Yearly increase per cent.
1880	21,981,821	1,764,290	0.76
1890	23,707,908	1,726,086	0.76
1900	25,921,671	2,213,765	0.90
1910	28,324,940	2,403,269	0.98

Statistics of the provinces of Austria —

Zukow	72,173	Tarnów	36,731	Trient	30,049

## Religion

The leading principle is religious liberty, and the independence of the Church as regards the State, saving the rights of the sovereign arising from ecclesiastical dignity.

The Minister for Ecclesiastical Affairs will grant legal recognition to any religious bodies if their doctrine worships constitution, and designation contain nothing illegal or immoral (Statute of May 20 1874).

The Catholic Church has 7 Latin archbishoprics, 1 Greek Ruthenian, and 1 Armenian archbishopric, 23 Latin and 2 Greek Ruthenian bishoprics. The Greek Oriental or Orthodox Church has 1 archbishopric and 2 bishoprics. Protestants have 6 superintendents of the Augsburg confession, 8 of the Helvetican, and 1 of the mixed. The following figures relate to 1910 —

## Priests, secular —

Roman Catholic Church	18,755 <sup>1</sup>	Members of orders <sup>2</sup> —	
Greek Catholic Church	2,783	Male	10,908
Greek Oriental Church	565	Female	26,554
		Protestant clergy	866
		Jewish congregations	562

<sup>1</sup> Including Armenian Catholics. <sup>2</sup> Including Greek Catholics and Oriental Catholics.

## Population according to religion, 1910 —

	In 1 000 s	per cent. of pop		In 1 000 s	Per cent. of pop
Roman Catholics	22,530	78.8	Evangelical	589	2.1
Greek Catholics	3,417	12.0	Other Christian sects	7	0.0
Armenian Catholics	2	0.0	Jews	1,814	4.6
Old Catholics	21	0.1	Others	25	0.1
Greek Oriental	666	2.3			
Armenian Oriental	1	0.0	Total	28,572	100.0

## Instruction.

The educational organisation of Austria comprises —

- (1) elementary schools, (2) Gymnasias and Realschulen, (3) Universities and colleges, (4) Technical high schools (5) Mining high schools, (6) Veterinary high schools, and (7) Schools for special subjects

The progress of elementary education in Austria between the census of 1880 and that of 1900 is shown in the following statement —

Population	Austria		
	1880	1890	1900
Read and write	10,930,099	18,258,452	16,067,972
Read only	1,345,781	1,031,624	778,782
Neither read nor write	9,858,364	9,605,337	9,309,964
	22,144,244	23,895,419	26,156,708

Attendance is compulsory from 6 to 14 in Austria generally in Krain, Istria, Galicia, and Dalmatia; 6 to 12 in Bukovina, 13. Of these schools there are two grades.

In the elementary schools the subjects taught are religion, reading, writing, language (Unterrichts Sprache), arithmetic with elementary geometry, some branches of natural history and physics, geography, history, drawing, singing, gymnastics, to girls domestic duties. The cost of erecting and maintaining elementary and burgh schools, and the payment of the teaching staff falls ultimately on the communes or the land. In only a few special cases are elementary schools supported by the State.

Latest statistics of elementary schools —

Year	Elementary Schools	Teachers	Pupils	Children of School Age	Training Colleges
1908 <sup>1</sup>	23,985 <sup>2</sup>	102,937	4,377,913	4,618,097	181
1909 <sup>1</sup>	23,450 <sup>2</sup>	105,370	4,464,238	4,744,621	183
1910 <sup>1</sup>	23,847 <sup>2</sup>	108,006	4,520,136	4,818,870	142

<sup>1</sup> End of the calendar year

<sup>2</sup> Including 1,208 private schools

<sup>3</sup> Including 1,174 private schools.

<sup>4</sup> Including 1,245 private schools

In 9,120 of the elementary schools (1910) the language used was German, in 5,984 Czech (mainly in Bohemia, Moravia, and Silesia), and in

7,553 other Slav dialects, 787 Italian 173 Rumanian, 5 Magyar, and 4 in other languages and in 274 more than one language

The Gymnasien and Realschulen are schools whose practical purpose consists especially in the preparation they supply for the universities and technical and other high schools. The curriculum of the former extends over eight years, of the latter, over seven. They are so far as they are public, maintained by the State, by separate provinces by the larger communes, or (in the case of confessional schools) by ecclesiastical foundations, &c. eventually with a subvention from the State. Private middle schools of a semi official kind are included in the following table these are under the same regulations as public schools —

	Gymnasien			Realschulen		
	No	Teachers	Pupils <sup>1</sup>	No	Teachers	Pupils <sup>1</sup>
1910-1911	298 <sup>1</sup>	—	100 652 <sup>1</sup>	147	—	48 922
1911-1912	316 <sup>1</sup>	—	105 002	149	—	49 065
1912-1913	43 <sup>1</sup>	—	108 838	146	—	49 151

<sup>1</sup> Including 13 gymnasia for girls having 6 pupils in 1910-11 20 with 2,84 pupils in 1911-12 and 5 with 4 9<sup>1</sup> in 1912-13

In 140 Gymnasien (1912-13) the language used was German, in 68 Bohemian, in 93 Polish in 5 Italian in 10 Ruthenian, in 1 Slovenish, in 6 Serbo-Croatian, and in 17 two languages were used. There were also 68 Lyceums (secondary schools for girls) with 11 151 pupils.

There are eight universities maintained by the State. The number of teachers and of students in winter 1912-13 —

Universities	Teachers	Students	Universities	Teachers	Students
Vienna, German	666	10,225	Cracow Polish	195	8 647
Prague (German)	226	2,058	Lemberg	186	5 567
Prague (Bohemian)	249	4 406	Innsbruck German	139	1 367
Graz, German	199	2,147	Czernowitz,	61	1 189

The total, 30 591 students shows an increase on the summer of 1912, which was 26,552. Of the total 2,624 or 8.5 per cent. were women students.

There are (1909-1910) 49 theological colleges—viz 43 Roman Catholic 2 Greek Catholic, 1 Armenian Catholic, 1 Greek Oriental, 1 Protestant and 1 Jewish, with a total of 1,941 students.

Government technical high schools teachers and pupils in winter 1912-13 —

	Teachers	Students		Teachers	Students
Vienna	183	3 157	Brünn { German	102	840
Graz	54	758	{ Bohemian	73	548
Prague { German	86	884	Lemberg	98	1,725
{ Bohemian	151	2,736	Vienna agr high school	86	1,149

At Vienna there is also (1909-10) an Export Academy with 80 teachers and 358 students at Vienna and Lemberg are Veterinary high schools with 74 teachers and 606 students at Leoben and Pribram montanist high schools with 57 teachers and 511 students. There are also Academies of Art in Vienna (22 teachers, 254 students), in Prague (14 teachers, 111 students), and in Krakau (11 teachers, 151 students). Besides these there are an Academy of Music and Dramatic Art (formerly the 'Conservatorium') with 79 teachers and 865 students, and a Consular Academy in Vienna (38 teachers, 42 students).

There are (1909-10) besides 5,721 special technical institutes, training in mining, agriculture, industries of all kinds, art, music, commerce &c with 381,702 students.

### Justice and Crime

In Austria the ordinary judicial authorities are —

(1) The Supreme Court of Justice and Court of Cassation (Oberste Gerichts- und Kassationshof) in Vienna. (2) The 9 higher provincial courts (Oberlandesgerichte). (3) The 71 provincial and district courts (Landes- und Kreisgerichte) and, in connection with these, the jury courts (Geschworenengerichte). (4) The 962 county courts (Bezirksgerichte).

There exist also special courts for commercial (3 courts, and 3 county courts) for industry (20 courts), shipping, revenue, military, and other matters.

In case of conflict between different authorities the Court of the Empire (Reichsgericht) in Vienna has power to decide. Private persons can in certain cases appeal against the decisions of magistrates to the High Court for Administrative Affairs.

Convictions	1907	1908	1909	1910
Of crimes	32,936	37,831	37,139	30,716
Of less serious offences	9,528	8,177	9,152	5,781
Of misdemeanours	519,419	556,991	552,692	539,471
Number of prisoners in penal establishments (Strafanstalten) at end of year				
Males	7,214	7,184	7,303	7,287
Females	829	748	761	693

### Pauperism

The right to poor relief is defined by an imperial statute, but the regulations for the apportionment of the cost are made by the separate provinces. The funds first available are the public funds for the support of the poor (Localarmenfonde and Armeninstatute the latter existing now only in Styria, Vorarlberg, Moravia, and Tyrol), derived from endowments, voluntary contributions, the poor's third of the property left by intestate secular priests, and certain percentages on the proceeds of voluntary sales. In some provinces the poor's funds are augmented from other sources, e.g. theatre money (Spectakelgelder), hunting licences, dog certificates, and in some large towns percentages on legacies over a fixed amount. When, in any given case, these funds are exhausted, the commune of origin (Heimatgemeinde) must make provision. Those who are wholly or partially unfit for work may be provided for in such manner as the commune judges proper. Besides poor houses and money relief, there exists in many provinces the practice

of assigning the poor—in respect of board and lodging—to each of the resident householders in fixed succession (*Kinlegesystem*)

In some provinces unions (*Verbande*) have been formed by statute to undertake certain burdens as to poor relief. In Lower Austria the care of the poor is incumbent partly on the communes and partly on the District Unions (*Bezirksarmenverbände*). By the erection of houses for forwarding vagrants to their proper communes (*Schubstationen*), a great step was taken towards the suppression of begging and vagrancy.

### Finance

Expenditure and revenue (24 crowns = £1) in 1,000 crowns —

	1906	1907	1908	1909	1910	1911

Total	2,916 685 268 (121 528,5624)	3,137,302,646 (130 716,7704)

<sup>1</sup> Estimate of the Finance Law

The general debt amounted on December 31, 1911, to 5,179,073 910 crowns on June 30, 1912 it had fallen to 5 167,835 630 crowns

The special debt of Austria on December 31, 1911, consisted of consolidated debt, 6,711 294 745 crowns floating, 350,333,563 crowns, total, 7,061,628,313 crowns The charge for interest of the general and special debts was in 1911, 484,220,289 crowns, of which 209,293,047 crowns was for the general State debt, and 274,937,242 crowns for the special State debt

## Production and Industry

### I AGRICULTURE AND FORESTRY

The cultivation of the soil furnishes employment to nearly half the population The proportion of productive land is greatest in Dalmatia, Silesia, Moravia, Bukowina, Bohemia, and Galicia, least in Salzburg and Tyrol

An enumeration made on June 3, 1902 showed that there were at that date 2,856,849 holdings of land, of which 2,133,506 were for agriculture, 713 832 for agriculture and forestry, and 9,461 for forestry only Of the agricultural holdings 19,746 were vineyards, 3 445 were gardens 112,067 (of 175,070 hectares) were under sugar beet and 27 767 (of 20,020 hectares) under hops Of the holdings 2 054,035 were owned by the occupier, 631,042 were partly owned and partly rented 151,649 were rented and 19 623 were held in shares, or for service, or otherwise

Size of holdings	Number of holdings of total area shown in cols 1 & 4	Number of holdings of productive area shown in cols 1 & 4	Size of holdings	Number of holdings of total area shown in cols 1 & 4	Number of holdings of productive area shown in cols 1 & 4

<sup>1</sup> Kilogrammes

In 1912 165 911 187 metric centners of coal were produced and 264 870 049 of brown coal

### III SEA FISHERIES

Years	No of Boats		Value caught in crowns		No. of Fishers	
	Summer	Winter	Summer	Winter	Summer	Winter
1908-1909	5 204	4 543	6 263 894	2 508 006	1 432	1 224
1909-1910	5 893	4 763	6 026 019	3 275 105	17 049	16 892
1910-1911	5 758	5 324	5 642 720	3,218 227	13 488	16 004

### IV MANUFACTURES

The following statistics of manufacturing industries are for 1902 —

Nature of Industries &c.	Undertakings with separate establishments				Home Industries
	Principal	Subsidiary	Personnel	Home-power	Workers
Productive industries	639 800	22 815	2 869 467	1 558,582	468,564
Trade and Transport	870 801	29 110	716,299	229,385	—

Total dependent on these industries over 7 millions.

There are 1,183 breweries, producing in the year 1911-12 22,636,057 hectolitres of beer. In 1909-10 there were 45,384 distilleries which produced 1,571,009 hectolitres of alcohol. In 1909-10 there were 191 sugar factories with 72,206 work people, and in 1910 30 tobacco factories with 39,757 work people, output 397,718 metric centners of raw tobacco.

### Shipping and Navigation

Commercial marine of Austria, January 1 —

	Vessels 1910	Tonnage 1910	Crews. 1910	Vessels 1911	Tonnage 1911	Crews 1911
Sea-going vessels	181	353,727	4,800	186	364,553	4,965
Coasting vessels	1,597	33,665	4,535	1,608	35,811	4,811
Fishing vessels &c	13,695	26,906	32,706	14,435	27,966	34,032
Total	15,473	414,298	42,041	16,229	428,330	43,808

Of the total (1911) 382 of 390,487 tons were steamers, and 15,847 of 47,343 tons were sailing vessels.

The progress of navigation is shown as follows for Austria alone —

Year	Entered		Cleared	
	No	Tonnage	No	Tonnage
1906	146,500	19,085,182	146,417	14,070,226
1909	162,112	23,104,634	161,995	13,115,886
1910	166,778	24,493,021	166,061	14,798,240

Of the vessels entered and cleared, an average of 89 per cent and 91 per cent of the tonnage were Austrian, Italy coming next, and Greece third. At Trieste in 1911 12,434 vessels of 4,285,106 tons entered, and 12,405 vessels of 4,245,962 tons cleared. Of the former, 83 of 255,026 tons, and of the latter, 84 of 262,807 tons were British.

### Internal Communications

In 1909 the total length of navigable rivers and canals in Austria was for rafts only 2,405 miles, for vessels and rafts, 1,648 miles, of which 824 miles were navigable for steamers.

The river traffic during five years was as follows —

Year	Danube Steam Navigation Company				Vereinigte Elbeschiffahrts Gesellschaften Aktien gesellschaft		
	Number of		Passen- gers (including military)	Goods and Luggage shipped in metric- centners	Number of		Goods carried in metric- centners
	Steam boats	Tow boats			Steam boats	Tow boats	
1907	141	816	2,024,387	22,175,540	101	352	28,776,168
1908	155	837	2,191,423	20,086,640	167	1,105	39,547,618
1909	136	831	2,238,004	22,249,070	160	1,065	43,574,638
1910	136	856	2,143,686	22,623,300	163	1,066	43,516,064
1911	136	868	2,389,603	24,823,080	169	1,008	31,337,321

The following are railway statistics of Austria in 1911: State lines, 8,050 miles, companies lines worked by the State 8,585 miles, companies lines worked by companies, 2,406 miles total including short lines, 20,568 miles

The following table shows the traffic on the Austrian railways —

	1908	1909	1910	1911
Passengers (in 1 000 s)	228,265	241 956	227 800	276,649
Goods carried (in 1,000 tons)	155,102	152,186	132 560	135 777
Receipts (in 1,000 l.)	36 879	38,089	38 708	—
Working expenses (1 000 l.)	27,067	30,989	31 437	—

There were, in 1911, 9,612 post offices. Work of the Post Office —

	1910 Number	1911 Number
Letters and post cards	1 510,014 400	1 594 112,930
Samples and printed packets	287,078 780	314 842,480
Newspapers	285,933,700	308 855,939
Ordinary packets	71 665 270	79,545,370
Money packets	4,436 230	4,693 590
Money orders (paid in)	86 116,527	37,008 663
	Crowns	Crowns
Receipts (posts and telegraphs)	179,197 504	189,909 538
Expenses	176,545,712	184,033 680

In 1911 there were 7 039 telegraph offices 47 076 km of telegraph line and 237 847 km of wire, number of messages 22 968,225 In 1911 there were in Austria 937 urban telephone systems with 411,729 km of wire and inter urban circuits with 13,537 km of hue and 59,170 km of wire 820,650,240 conversations were held

### Money and Credit

## HUNGARY

## Constitution and Government

## I CENTRAL AND PROVINCIAL GOVERNMENT

The Constitution of the eastern part of the monarchy, or the kingdom of Hungary including Hungary Proper and Croatia Slavonia dates from the occupation of the country by the Magyars about 891. The first king, Saint Stephen, was crowned in 1000. The first charter or constitutional code is the 'Bulla Aurea' of King Andrew II, granted in 1222, which defined the form of government as an aristocratic monarchy. The Hungarian Constitution has been repeatedly suspended and partially disregarded until at the end of the armed struggle of 1849 it was deemed to be forfeited by the nation. This decree was repealed in 1860, and the present sovereign, on June 8 1867 swore to maintain the Constitution, and was crowned King of Hungary.

The Hungarian Parliament (Országgyűlés) has legislative authority for Hungary and for Croatia and Slavonia in matters which concern these provinces in common with Hungary Proper. It consists of an Upper House (Felsőház) and a Lower House (Kisvárosi-ház).

The House of Magnates, reformed by an Act passed in 1885, now includes the archdukes who have attained their majority (18 years), those Hungarian princes (counts and barons—if of age (24 years) and paying at least 6,000 crowns a year land tax—whose families possess the right of hereditary peer age (designated by Act of 1885 or having received it since by a special Act), 98 archbishops, bishops, and other dignitaries of the Roman Catholic and Greek Churches, 12 ecclesiastical and lay representatives of the Protestant Confessions, life peers appointed by the Crown not exceeding 50 in number, life peers elected, once for all, by the Upper House, 17 members *ex officio* being State dignitaries (*barons* *reçu*) and high judges, and lastly, 3 delegates of Croatia Slavonia, and the Governor of Hungary. In the session of 1911-12 the number of archdukes was 1, and there were 229 hereditary peers holding the property qualification and 60 life peers appointed by the Crown or chosen by the House of Magnates.

The Lower House or House of Representatives is elected by the vote of all male citizens, of 24 years of age, who pay a small direct tax on house property or land, or on an income varying with occupation, but in all cases low. Certain large classes—professional, scientific, learned, and others—are entitled to vote without other qualifications. There were in 1911 89,329. The number of the electorate was in 1911 in Hungary Proper, 1,197,726 or 24.9 per cent of the total civil male population over 20 years. New elections must take place every five years. By the electoral law now in force, the House of Representatives consists of 453 members, of whom 413 are deputies of Hungarian towns and districts, and 40 delegates of Croatia and Slavonia.

Members of the Lower House receive 4,800 crowns (2007 £) a year with an allowance of 1,600 crowns (667 £s) for house rent.

The Parliament is summoned annually by the King at Budapest. The language of the Parliament is Hungarian, but the representatives of Croatia and Slavonia may speak their own language.

Lower House (June 1910).—"National party of work, 255, Independents (in their two sections—Kossuthites, 58, and Justites, 38), 91, other parties (Social Democrats, Christian Socialists, Farmers), 67.

## SUMMARY

The executive power of the kingdom is in a responsible ministry, consisting of a presidency and nine departments, namely —

The Presidency of the Council. — *József Ladislas Lukács*, Privy Councillor, born October 24, 1850, appointed April 23, 1912.

1. The Ministry of Finance — *János Telecsy*, Privy Councillor, born September 16, 1868, appointed April 23, 1912.

2. The Ministry of National Defence (Honvédelem) — *Samuel Hazai*, Privy Councillor, born 1851, appointed January 17, 1910.

3. The Ministry near the King's person (*ad latus*) — The Premier

4. The Ministry of the Interior — *Dr. Ladislas Lukács*, Privy Councillor, appointed April 23, 1912.

5. The Ministry of Education and of Public Worship — *Count John Zichy*, Privy Councillor, born May 30, 1868, appointed March 1, 1910.

6. The Ministry of Justice. — *Dr. de Bologh*, Privy Councillor, appointed January 4, 1913.

7. The Ministry of Industry and Commerce — *Ladislas Beothy*, born June 4, 1866, appointed October 18, 1911.

8. The Ministry of Agriculture — *Count Adalbert Serényi*, Privy Councillor, born June 16, 1866, appointed January 17, 1910.

9. The Minister for Croatia and Slavonia. — *Géza Jossipovich*, Privy Councillor, appointed April 23, 1912.

The provinces of Croatia and Slavonia have autonomy for home affairs, public instruction, and justice.

The Croatian-Slavonian Provincial Diet meeting annually at Zagreb (*Agram*), consists of 90 members, elected for five years, representing 31 town districts and 69 rural districts, and of personal voters (not more than half). The electors must have a low property qualification, be of certain professions, or pay a small tax. Personal voters are certain ecclesiastical and political dignitaries, and the members of certain noble families (*Magnates*) possessing the right by inheritance or by royal nomination. They must pay at least 2,000 crowns of land tax.

At the head of the autonomous provincial government, which has three departments (Interior, Public Instruction and Worship, and Justice), is the Ban, who is responsible to the Provincial Diet and to the Hungarian Prime Minister.

Ban. — *Edward Cury*, Privy Councillor, appointed January 19, 1912.

## II LOCAL GOVERNMENT

In Hungary a distinction is observed between communes which are large or small, or may be townships with regular magistrates, and municipalities, which are regarded as communes of a higher order. The communal electors' right is possessed by every male inhabitant over twenty years of age who for five years has paid the State tax. The representative body is composed half of members elected for six years, and half of persons who pay the highest taxes. The *gyemelek* consists of members appointed, in the towns for six years, in the rural communes for three years, with officials appointed for life. The *gyemelek* municipalities invested with similar rights are independent municipalities. Each has its council constituted similarly to the representative body of the commune, and the members are elected also for six years. All members of the *gyemelek* are qualified to vote. In Budapest

Hungarian (Magyar)	3,742,801	10,800,875	Swedish	439,447	472,567
Germans	2,125,181	2,077,425	Croatian	1,023,184	1,622,168

Day labourers	293 698	246,897	640 095
Living on their revenues or pensions	203,228	221 021	524,249
Other and unknown occupations	885 224	41,410	496,794
Domestic servants			
Total	8 830 096	10 427 564	19 257,660

The population in 1900 consisted of males, supporting 6 162,198, supported, 2,667 781, females, supporting, 2,667,781, supported 7,004,627. The town population of Hungary in 1890 numbered 2,821,648, in 1900 3,431,641, and in 1910, 3,959,239.

## II MOVEMENT OF POPULATION

Births, deaths and marriages —

Year	Total births (including still-births)	Stillborn	Illegitimate births (including still-births)	Marriages	Deaths (including still-births)	Surplus of Births over Deaths
1907	723,290	14,795	73,696	201,431	525,394	223,292
1908	721,120	14,804	76,225	196 644	521,866	229,760
1909	722,224	14,809	82,562	178,825	543,787	240,667
1910	723,290	14,807	76,408	179,857	506,225	253,710
1911	723,290	14,808	76,408	190,472	507,642	253,711

The percentage of stillbirths of total births in Hungary is 2.07 in 1911. The rate of illegitimacy is 10.6 per cent. of the whole.

Emigration statistics to the United States —

Year	Through German ports (Hamburg, Bremen, Wisluga)	Through other European ports	Total	Year	Through German ports (Hamburg, Bremen, Wisluga)	Through other European ports	Total

Religion.

There is perfect equality among all legally recognised religions. These are:—The Roman and Greek Catholic, the Evangelical (Anglican and Lutheran), the Unitarian, the Greek Oriental, the Gregorian Armenian, the Baptist (since 1905) and the Jewish. Each has the independent administration of its own affairs.

The following figures relate to 1911 —

Priests secular (not including bishops, canons, vicars, provosts, &c.)	6,733	Members of orders —	
Roman Catholic (through)	2,806	Roman	Male
Greek Catholic Church	2,831	Catholic	Female
Greek Oriental Church		Greek Catholic (male)	
		Greek Oriental (male)	
		Protestant clergy	
		Jewish clergy	

The following table gives the division of the total population according to religion on the basis of the census of 1910 —

### Instruction

Public education in Hungary comprises the following grades — (1) Infant schools, (2) elementary schools and repetition courses, (3) middle or secondary schools, gymnasia and realschools (in Croatia and Slavonia, realgymnasia), (4) preparatory and training institutions for infant school teachers and male and female teachers, (5) academies (high schools) of law, (6) institutions for religious education, (7) universities, (8) polytechnicum (technical high school). The schools for special subjects, such as agricultural, industrial commercial, mining, and military schools, are for the greater part administered by the competent ministries, while the philanthropic and artistic schools are placed under the authority of the Ministry of Public Instruction.

The progress of elementary education in Hungary in two intercensal periods is shown in the following statement —

Civil Population	1890	1900	1910
Read and write	7,326,372	9,483,980	11,774,687
Read only	557,854	507,034	—
Neither read nor write	9 465,172	9 131 376	—
Total	17 349,398	19,122 340	—

<sup>1</sup> Civil and military population

<sup>2</sup> Not yet available.

School attendance is compulsory for children of six to twelve years, and repetition courses for children of twelve to fifteen years, the industrial law of 1884 requires special courses for apprentices, and by the law of 1891 children from three to six years of age may be sent to infant schools, unless otherwise provided for.

Every parish or commune is bound to maintain an infant school. There were in 1911 altogether 2,817 infant schools with 247 344 infants, and 10 training colleges for nurses.

Primary education is of three grades — (1) Elementary schools connected with a repetition school, (2) high primary schools for boys and girls separately, with, respectively, a three and two years' course for commercial or industrial education, and closely associated with the sixth class of the elementary school, (3) the so-called 'burgher schools' (Polgári iskolák) for boys and girls separately, with, respectively, a six and a four years' course, and connected with the fourth class of the elementary school. There are also high schools for girls mostly supported by the State.

Every parish or commune is bound to have a school if the number of children of school age is thirty. For the support of the elementary schools every commune can levy an additional tax of 5 per cent. on the direct State taxes. There were in 1910-1911, 19,339 primary schools with 47,487 teachers, and 2,938,091 pupils. The number of the children of school age was 3 545,014, number of training colleges 96, with 1 291 teachers and 10,271 pupils. There were besides 200 'humanistic schools, and 48 person schools with a total attendance of 68,873.

In the gymnasia and realschools (in Croatia and Slavonia, the realgymnasia) the curriculum extends over eight years. They are maintained by the State, by the larger communes, or (in the case of the denominational schools) by ecclesiastical foundations, with sometimes a subvention from the State. There were in 1910-1911, 187 gymnasia, with 3,882 teachers and 63,544 pupils, 42 real schools, with 1,020 teachers and 14,072 pupils.

There are five universities maintained by the State, each comprising

four faculties, viz, theology, law, medicine, philosophy (the university of Zagrab is without the faculty of medicine) the university of Budapest, with 422 professors, &c, and 6 858 students, the University of Kolozsvár (Klausenburg), with 189 professors and 2,107 students, the University of Zagrab (Agram), with 91 professors and 1,197 students in 1911, and the Universities of Pozsony (Prestburg) and Debreczen—the last two having been founded in 1012. There are also 49 theological colleges, viz, 29 Catholic, 5 Greek Catholic, 4 Greek Oriental, 10 Protestant, and 1 Jewish, with a total of 330 professors and 2,153 students, and 10 law schools with 122 professors and 1,380 students. The technical high school (poly technicum) in Budapest has 160 professors and 1,678 students. There were in 1911 64 institutes for agriculture, 678 for industries of all kinds, 187 for commerce, 54 for art and music, 6 for mining, 15 for military training, with 143,290 students and 9 210 teachers. There were of the 673 industrial school 590 for apprentices, with 4,378 teachers and 101 999 pupils, of the 187 commercial schools 99 for apprentices, with 522 teachers and 6,743 pupils. The number of pupils at elementary schools was 2 159,696, at middle schools 577 324, at high city schools (polgari iskolak), 91,709. Of the school children (in proper Hungary) 1,424 821 were Magyar (Hungarian). Of the 13 126 elementary schools, 13,094 were Magyar, 463 German, 422 Slovaks, 2 301 Rumanian, 1,769 Croatian and Serb other languages, 77. The number of teachers in elementary schools was 86,058.

In 1911, 2 019 periodicals of various kinds were published in Hungary, 411 being political papers. Of the whole 1,493 were in Hungarian, 80 27 per cent in Hungary proper, 71 in Hungarian with another language, 153 in German, the rest being in Slavish, Croatian, Serbian, Rumanian, French, Italian, &c.

### Justice and Crime

In Hungary the ordinary judicial authorities are —

The Royal Supreme Court (kir kuria) in Budapest and the Supreme Court of Justice (Table of Septuaginta) in Zagrab (Agram), of the highest instance in all civil and criminal matters. 12 Royal Tables (kialyi tablak) of second instance. As courts of first instance, 76 county courts (tovenysekek) with collegiate judgeships, 458 district courts (járásbíróak) with single judges, 15 jury courts, (sajtóbíróak) for press offences, besides an army special court.

There are 11 penal establishments in Hungary for males and 1 for females.

There have been convicted in Hungary proper for offences falling under the competence of the county courts and of the district courts 129,794 persons in 1908, 121 601 in 1909, 122 994 in 1910 and 125 465 in 1911, for offences within the competence of the administrative authorities, 625 948 in 1908, 682 118 in 1909, and 693,017 in 1910. In Croatia Slavonia the number of the convicted at the county courts was 2 893 in 1908, 4,096 in 1909, 3 969 in 1910 and 3,223 in 1911, at the district courts 30,906 in 1908, 32,081 in 1909, 29,613 in 1910, and 30,368 in 1911.

### Pauperism

In Hungary poor relief is attached to the Ministry of the Interior, but in the main is left to communal administration. In the smaller communes orphans and the indigent are cared for by official guardians and overseers while in the larger there are poor houses, the funds being mostly derived from fines and taxes. The number of asylums for paupers and orphans is about 300. The Church and charitable societies also render assistance, and several millions of crowns are annually bestowed in legacies and gifts towards benevolent purposes.

# Production and Industry

## L—AGRICULTURE AND FORESTRY

The cultivation of the soil is the chief industry of Hungary, since (if we include the forests) it furnishes employment to 68.4 per cent. of the population. According to the census of 1900, 12,977,419 persons are supported by agriculture properly so called, 11,864 persons by dairy work, sheep breeding, and poultry, 43,954 persons by market gardening and horticulture, 182,899 by forestry, the chase, and charcoal burning, and 9,447 by other agricultural occupations.

The total area of all the holdings in 1911 was 32,496,701 hectares (81,241,752 acres), and the different branches of culture were distributed as follows—

Branch of culture (1911)	Hectares	Percentage of area
Arable land	18,971,948	42.99
Gardens	430,327	1.32
Meadows	3,170,020	9.76
Pastures	3,963,430	12.17
Vineyards	316,091	0.97

<sup>4</sup> Produce in arable land only.

<sup>5</sup> 1,000 Hectolitres

<sup>6</sup> Hectolitres.

In Hungary there were (in 1912) 1 980 000 horses 968 mules, 15 986 asses, 6,036,945 cattle, 7,108,054 sheep, 7,709,801 pigs, 313,849 goats, and 607,986 beehives. The export of horses cattle, and sheep far exceeds the imports.

In silk culture 96,971 families were engaged in 1911, compared with 1,059 in 1879. The produce of cocoons (1911) was 1,878 metric tons, the value being 180,779.

In Hungary proper the inhabitants of 13,223 communes were engaged (1911) in rearing bees which produced 2,900 metric tons of honey, and 182 metric tons of wax, of the value of 116,661.

There are 64 agricultural institutions in Hungary with (1911) 2,408 pupils. The administration of the forests belonging to the State is in the hands of the Ministry of Agriculture. The total area under forest was in Hungary (1911) 8,982 669 hectares, of which 2,358,181 hectares are under oak 4 691,745 hectares under beech, and 1 932,943 hectares under pine.

The forests are mostly situated in the Carpathians and between the rivers Drava and Save. In 1911 the Hungarian exports of timber and chief forest products amounted to 993 251 metric tons, valued at 3 434,000, and the imports to 734,807 metric tons, valued at 1,765 000.

## II—MINING

In Hungary were employed in mining and smelting works (1911) 79,575 men, 1,310 women, and 4 451 children total 79,336 persons. In salt works 2 328 men 1 woman and 293 children total 2 622 persons.

## III—MANUFACTURES

In Hungary (including Croatia and Slavonia) in 1900, there were employed in the various industries (domestic and ambulant industries included) 1,127,730, or 12.8 per cent of the earning population. Of these the most numerous were those working in clothing, 281,320, in food stuffs, 143,783, in iron and metals, 128,205, in building, 125,070, in wood and bone, 95,823, in personal services (hotels, inns, &c.), 95,558, in machinery, 72,428, in earthenware and glass, 44,867, in textile industries, 34,156, in leather and skins, 16,596, in polygraphical industries, 17,159, in chemical products, 14,494, in paper, 7,727. Domestic and popular industries gave occupation to 43,081, ambulant industry to 6,823 persons. Including families and domestic servants the total number of those dependent on the industries was 2,604,982; or 13.5 per cent of the population.

In 1910-11 there were 83 breweries which brewed 59,542,842 gallons of

beer, 62,411 distilleries, which produced 25,439,323 gallons of alcohol, 23 active sugar factories employing 19,334 workpeople, and yielding 347,445 metric tons of sugar. The number of tobacco manufactories (tobacco manufacturing being a State monopoly) was (in 1911) 22, occupying 20,341 workpeople and producing 602 million cigars and 2,564 million cigarettes. The number of mills (including Croatia and Slavonia) was (1906) 20,726 of which 2,040 were steam mills, 183 mills driven by steam and water, 16,590 water mills, 562 motor mills, 700 wind mills, and 651 tread mills.

### Commerce

The special commerce of Hungary for five years was as follows (in thousands of pounds sterling) —

	1907	1908	1909	1910	1911
Imports	68,844	64,984	75,308	77,184	86,755
Exports	67,418	66,019	70,842	71,531	76,270

Chief imports and exports (in thousands of crowns) —

Imports	1910	1911	Exports	1910	1911
Cottons	194,534	203,467	Flour (of corn)	914,827	253,938
Woolless	116,616	102,028	Wheat	81,049	115,404
Leather prepared	68,710	78,043	Oxen	122,456	108,068
Coal	4,078	54,050	Swine	97,456	50,884
Semi-woollen goods	29,847	33,000	Maize	5,821	7,188
Cotton yarn	30,217	28,489	Barley	49,110	73,822
Leather shoes and boots	26,193	30,808	Rye	47,692	82,182
Rice in husk	28,242	24,980	Eggs	3,162	36,524
Knitted cotton goods	22,000	22,496	Oats	28,088	87,814
Clothes (for men)	28,992	32,622	Wine	40,014	57,521
Fine furniture of wood	22,142	26,387	Hard wood, sawn and		
(Under) linen	27,007	29,191	hewn	26,421	35,010
			Leather prepared	26,838	25,461

In Hungary the values are fixed annually by a permanent commission comprising merchants and a few representatives of industry and agriculture, with the approval of the Ministries of Finance, Commerce, Agriculture and other authorities. In general gross values are taken and they are determined according to the value the goods represent at crossing of the frontier.

Of the imports in 1911, 21.84 per cent in value were raw material, 18.59 per cent were half-manufactured, and 64.57 per cent. were manufactured. Of the exports 52.13 per cent in value were raw material, 10.10 per cent were half-manufactured, and 37.77 per cent manufactured. The imports into Hungary from Austria were 1,528,454,000 crowns, or 73.41 per cent. the exports to Austria were 1,392,421,000 crowns or 76.07 per cent. of the whole. The imports from Germany were 187,790,000 crowns (9.01 per cent.), and the exports to Germany were 127,466,000 crowns (6.98 per cent.). The imports from Great Britain (mostly woollen goods, steam vessels, and coal) were 42,406,000 crowns (2.04 per cent.), and the exports to Great Britain (mostly flour, raw sugar, and barley) were 38,502,000 crowns (2.19 per cent.). Other countries having considerable trade with Hungary are Turkey, France, Switzerland, Italy, Roumania.

## Shipping and Navigation

The commercial marine of Hungary in 1911 —

	Number of vessels	Tonnage	Crews
Sea-going vessels	68	124,066	1,566
Coasting vessels	162	9,786	689
Fishing vessels, &c	246	447	710
Total	466	134,299	2,965

Of the total number of vessels 128 of 132,433 tons were steamers, and 838 of 1 816 tons were sailing vessels

The progress of navigation is shown as follows —

Year	Entered		Cleared	
	No	Tonnage	No	Tonnage
1907	24,080	2,444,936	24,041	3,440,941
1908	25 481	3,481,663	25 488	3,502,889
1909	83,248	4 348,861	39,243	4 351,671
1910	35,120	4,552,114	35,119	4,566,755
1911	37 250	4,664,645	37,210	4,651,998

At the port of Fiume alone in 1911, 25,021 vessels of 3,815,463 tons entered, and 24,981 vessels of 3,802,816 tons cleared. Of the vessels entered 184 of 260 000 tons, and of those cleared 99 of 164,295 tons, were British

## Internal Communications.

In 1911 the total length of navigable rivers and canals in Hungary was 3,087 miles, of which 1,922 miles were navigable for steamers.

The river traffic of Hungary during five years was as follows —

Year	Number of steamboats <sup>1</sup>	Number of passengers carried <sup>2</sup>	Goods carried in tons <sup>2</sup>
1907	141	1,916,748	3,862,270
1908	148	2,116,788	3 683,621
1909	143	2,207,450	3,947,802
1910	149	2,175,481	4,160,424
1911	166	2,443,353	4,744,130

<sup>1</sup> Exclusive the Danube Steam Navigation Company

<sup>2</sup> Inclusive the Hungarian traffic of the Danube Steam Navigation Company

In 1911 the Ferencs canal, connecting the Danube and the Tisza (Theiss) was frequented by 2,426 ships and 2,426 rafts, the goods carried amounting to 312,282 metric tons. In 1911 the canal at the iron gates was frequented by 3,537 steamers, of which 2,311 with 2,109 rafts carried 557,738 metric tons weight of goods

In 1910, the public roads of the Kingdom of Hungary had a length of 57,926 miles

The following are railway statistics for 1911 —

Length of lines — State lines, 5,045 miles, Companies lines worked by the State, 5,898 miles, Companies' lines worked by companies 2,091 miles, total length 13,034 miles. Capital expenditure (1,000 l.), 185,096, passengers carried (1,000 s), 153,800, goods carried (1,000 tons), 78 760, receipts (1,000 l.), 21,942, working expenses (1,000 l.), 13,818

The following are statistics of the Hungarian post-office for three years —

	1909	1910	1911
Number of offices	5,986	6 152	6,331
Letters and post cards (1,000 s)	523,169	549 236	586,329
Newspapers (1 000 s)	180,542	197,218	212 995
Samples and printed packets (1 000 s)	102 348	118 388	122,985
Money and postal orders (1,000 s)	23,245	29 214	30 502
value (1,000 l.)	68,176	70,860	74,882
Parcels and money letters (1,000 s)	84,243	36 417	39,349

In 1911 there were in Hungary 4 765 telegraph offices and 15 928 miles of telegraph line with 93,082 miles of wire, number of messages 12,675,000 In 1911 there were 39 urban telephone systems and 44 inter urban circuits (joining the capital, and 43 other towns and neighbourhoods among themselves and to Vienna, besides connecting Budapest directly with Berlin), with altogether 222,457 miles of wire, by which 183,184,487 conversations were held

The united postal and telegraph receipts amounted (1911) to 92,775 thousands of crowns, and the expenses to 75 743 thousands of crowns

## Money and Credit

Coinage of the Hungarian mint (in thousands of crowns) —

	1906	1907	1908	1909	1910
	1 000 crowns	1,000 crowns	1 000 crowns	1 000 crowns	1 000 crowns
Gold					
20-crown	7 082	8 880	2 770	9 175	1 2-6
10-crown	7 458	7 522	5,090	6,788	18,284
Silver	—	3 603	9 771	5 290	6
Nickel	—	269	4 086	1,722	5
Brass	—	63	830	862	6

During the period 1867-1911 the total gold coinage amounted to 695,788 thousands of crowns, the silver coinage to 299 026 thousands of crowns, and the fractional coinage (small silver, copper, nickel, and brass) to 58,560 thousands of crowns

On December 31, 1911, there were in Hungary 1 984 savings-banks and other banks with a total nominal capital of 1,409,649,000 crowns; 3 mortgage-banks with nominal capital of 200,000 crowns, and 3,845 co-operative (alliance) banks. The liabilities and assets of all the banks were (1911) as follows (in thousands of crowns) —

## LIABILITIES

—	Paid up	Reserve	Deposits	Deposits on account current &c	Mortgages	Creditors	Total including others
—	—	—	—	—	—	—	—
	1 000 cr	1 000 cr	1 000 cr	1 000 cr	1 000 cr	1 000 cr	1 000 cr

## Diplomatic Representatives

## 1 OF AUSTRIA HUNGARY IN GREAT BRITAIN

*Ambassador Extraordinary and Plenipotentiary* — His Excellency Count Albert Mensdorff-Pouilly Dietrichstein G C V O

*Councillors*. — Karl Count Trauttmansdorff and Baron G. Frankenstein

*Secretaries*. — Count A. Khuen-Hédervary, Dr Oskar Freiherr Gautschi von Frankenthurn, Count George Festetics de Tolna, and Count J. Michalowski

*Secretary Archivist*. — Aurel Poppsauer and Edward Poppy

*Naval Attaché*. — Captain A. Accurti

*Military Attaché*. — Captain Koloman Horvath.

*Consul-General*. — Theodore Ippen.

There are Consular representatives at Belfast, Birmingham, Bradford,

Bristol, Cardiff Newport, Cork Queenstown, Dublin, Edinburgh Leith, Falmouth, Glasgow, Gloucester, Hull, Jersey, Limerick, Liverpool (C G), Manchester, Newport Mon., North Shields Newcastle, Plymouth, Portsmouth Southampton Sheffield, Swansea, Waterford, Weymouth Portland etc

## 2. OF GREAT BRITAIN IN AUSTRIA-HUNGARY

*Ambassador* — Rt. Hon Sir F Cartwright, G C V O, K C M G  
Appointed Nov 1, 1908

*Councillor* — Hon Theo Russell, C V O

*Secretaries* — Hon A Akers Douglas, C M Palaret and Hon F G Agar Robartes, M V O

*Military Attaché* — Lt Col E S E W Eardley Russell, M V O

*Naval Attaché* — Commander A C Stewart, R. N. (Resident in Rome)

There are Consular representatives at Vienna (C G) Budapest (C G), Fiume, Trieste, Prague Innsbruck (V C), Lemberg (V O)

## BOSNIA AND HERZEGOVINA.

**Government.**—The Provinces of Bosnia and Herzegovina were by the Treaty of Berlin (July 13, 1878), handed over to the Austro Hungarian Government for administration and military occupation. By autograph letter of October 5, 1908 addressed to the Premiers of the two States, the sovereignty of his Majesty the Emperor King was extended over these two provinces. The direction of their administration is exercised by the Bosnian Bureau, entrusted to the common Austro Hungarian Finance Minister in Vienna in the name of the Emperor King

*Common Minister of Finance and Administrator* — Dr de Bilinski, appointed Feb 20 1912

The chief authority in the province itself, with its seat in Sarajevo, is the provincial government (*Landesregierung*), in four departments, for internal affairs, finance, justice and public works, and matters of political economy. For administration purposes there are 6 district (*Kreis*) and 54 county (*Bazirk*) authorities. The new Constitution was proclaimed on February 20, 1910. The Diet chosen by universal suffrage is competent to deal with provincial finance, taxes, railways, police, public works and civil and criminal law, subject to Austrian or Hungarian veto. There are 3 divisions of the electorate. The electors of the First Division are subdivided according to their qualification and the nature and amount of the taxes paid, and in all three divisions the number of representatives in the Diet is fixed according to the number of the inhabitants professing each religion. The Jews have 1 seat, the Roman Catholics 16, the Mohammedans 24, and the Orthodox 31 seats. The Government appoints, besides 20 members, 4 representing the authorities, 16 others being spiritual heads of the Orthodox, the Mohammedan, the Roman Catholic and the Jewish religious organizations, total 72 elected members and 20 nominated. The President and Vice Presidents of the Assembly are appointed by the Emperor each Session, each religion being represented and holding the Presidency in turn.

**Area and Population** — Bosnia and Herzegovina contain six districts (*Kreise*), with an area of 19,768 square miles. Population, 1910 1,898,044 (984,852 males and 908,192 females). Estimated population, Dec 31, 1911, 1,928,838, of whom there were Mohammedans, 618,817,

Servian Orthodox, 840,627, Roman Catholic, 442,707, Evangelical, 0,337, Greek Catholic, 8,136, Jews, 12,169. There was an increase in 1910 of 329,952 on the census of 1895, or 21.04.

The nationality is Croato-Servian, only in the greater towns there are Spanish Jews, and here and there gipsies and colonists of different nationality. The most populous towns are the capital, Sarajevo, with 51,919, Mostar, 16,392, Banjaluka, 14,800, and Tuzla, 11,333 (1910).

In 1911, number of births (living) 76,693, (dead) 218 number of deaths, 48,622, net increase 27,071.

**Instruction.**—In 1910 there were 6 gymnasia, 2 *Realschule*, 1 military college, 11 advanced schools for girls, 9 commercial schools, 458 elementary schools, 1,241 lower and 94 reformed Mohammedan schools, 1 Servian Orthodox, and 1 Roman Catholic seminary for priests, 41 Mohammedan schools for higher religious instruction, 3 training colleges for teachers, and a college for Mohammedan judges. Technical and industrial schools exist in most of the larger towns, and in the village schools the teaching of practical agriculture has been introduced. Education is free, and under certain circumstances compulsory.

**Justice.**—There is an upper court of justice in Sarajevo, the 6 district (Kreis) courts and 52 county (Bezirk) courts of first instance. In every district court (Kreisgericht) and county court (Bezirksgericht) there are 2 assessors taken from the people to advise the judge in criminal cases.

**Finance.**—For the administration of Bosnia and Herzegovina the revenue and expenditure were estimated at 3,813,888*l.* in 1911, and 3,530,780*l.* in 1912.

The chief items of revenue in 1912 were receipts from tobacco (758,167*l.*), railways (631,500*l.*), and those of expenditure in 1912 were for railways (631,667*l.*), the service of navy (323,668*l.*) and troops (296,555*l.*)

**Production and Industry.**—The agricultural population in 1910 numbered 1,658,587 or 87.9 per cent. of the whole, but agriculture is still in a low state of development, though the soil is very fertile. Forest land occupies 49.8 per cent. of the whole area. Tobacco, an important crop, is a Government monopoly. In 1911, 3,000 metric tons of tobacco (value, 3,853,693 crowns = 24 crowns = 1*l.*), were exported. Maize, wheat, barley, oats, rye, millet and buckwheat, potatoes, flax, and hemp, are cultivated. Both provinces have superabundance of fruit. In 1911 about 13,000 tons of dried plums and marmalade were exported, valued at 5,685,088 crowns.

The vine is grown, but the wine produced is of indifferent quality, the wine exported in 1910 was of the value of 344,881 crowns. Sugar-beet is cultivated, and there is a sugar factory at Usora, near Doboj. Silk culture has been introduced. Timber was exported in 1910 to the value of 30,672,475 crowns. Cattle grazing and sheep-farming are important, cattle were exported in 1910 to the number of 121,332, horses, 12,578, sheep, 68,892, goats, 46,868. Hides are not exported but sheep skins and goat-skins are sent in large quantities to Great Britain and the United States, as well as to Hungary, lamb-skins are exported to France. In Bosnia and Herzegovina in 1910 there were 221,971 horses, 1,808,930 cattle, 1,893,068 goats, 2,499,422 sheep, and 627,370 swine. Towards the agricultural development of the country Government gives assistance in many ways, by instruction, by importing horses, cattle, sheep, and poultry of superior breed, by distributing seeds, and by lending agricultural machinery to farmers.

Minerals are abundant; mining is now carried on (mainly by the

Government) for iron and copper, manganese, chromium, quicksilver, and coal. In 1910 the output of coal was 706,659 tons, of iron ore 133,382 tons, of manganese 4,000 tons. The miners employed numbered 8,051. The output of metals in 1910 consisted of raw iron, 48,842 tons (8,493,070 crowns) and wrought iron, 27,363 tons value, 4,367,220 crowns, cast-iron goods, 5,090 tons (1,058,824 crowns). There are salt pits at Tuzla, and an ammoniac soda factory. In 1910 the output of salt reached 23,579 tons, value 2,617,291 crowns. The petroleum refinery at Bosnian Brod has been amalgamated with the alkali works at Lukavac, near Tuzla. There are various factories for chemicals, sugar, timber, plum drying, matches, and sundry minor products.

**Commerce and Communications.**—Bosnia and Herzegovina belong to the Austro-Hungarian customs territory, their export to Austria-Hungary and foreign countries in 1910 was estimated at 135,458,446 crowns, and their import at 144,588,617 crowns.

Since 1878 the metric system of weights and measures has been followed side by side with the Turkish system. A law providing for the exclusive application of the metric system after a transition period of one year passed through the Diet in November, 1910, and now only awaits the Imperial sanction.

There were in 1910 1,215 miles of railway. Large railway extensions were authorized by a law of December 8rd, 1912, by which a loan of 270,000,000 crowns (11,250,000 £) is to be raised for the purpose of completing the following lines within six years of the commencement of the work:—New normal gauge lines from Banjaluka to Jajce, Sumac to Doboj, Bugojno to Rama, and from Broko to Tuzla, with a branch to Bijeljina and Raca, a new narrow gauge line from Bugojno to Arzano, and the conversion from narrow to normal gauge of the existing lines from Doboj to Sarajevo, Jajce to Bugojno, Rama to Mostar, and from Doboj to Tuzla.

There were in 1910 2,007 miles of telegraph lines, and 4,582 miles of wire. Offices 173 messages (1910), 711,995. The telephone service had in 1910, 293 miles of line and 986 miles of wire.

In 1910 there were transmitted 23,281,915 letters and postcards, and 8,529,963 packets of printed matter, samples, and newspapers.

Military service is compulsory over 21 years of age. The native troops comprise 4 infantry regiments, 4 battalion *cadres* of reserve, 4 sections of train, 1 battalion of jagers, with a total of 7,200 men, on peace footing.

*British Consul at Sarajevo*—F. G. Freeman.

## BELGIUM.

(ROYAUME DE BELGIQUE.)

### Reigning King

**Albert**, born April 8, 1875, son of the late Prince Philippe de Saxe-Coburg and Gotha and of Flanders (died November 17, 1905), and of the late Princess Marie de Hohenzollern-Sigmaringen (died Nov. 27, 1912), married Oct. 2, 1900, to Princess *Elizabeth de Bavaria*, succeeded his uncle Leopold II., Dec. 17, 1909.

*Children of the King* —(1) Prince *Leopold*, born Nov. 8, 1901 (2) Prince *Charles*, born Oct. 10, 1903 (3) Princess *Marie-Joë*, born Aug. 4, 1906.

*Sisters of the King* —(1) Princess *Henriette*, born Nov. 30, 1870, married Feb. 12, 1896, to Prince Emmanuel of Orleans, Duke of Vendôme (2) Princess *Josephine*, born Oct. 18, 1872, married May 28, 1904, to Prince Charles of Hohenzollern.

*Aunt of the King* —Princess *Charlotte*, sister of Leopold II. born June 7, 1840, married July 27, 1857, to Archduke Maximilian of Austria, elected Emperor of Mexico July 10, 1863, widow June 19, 1867.

*Daughters of the late King* —(1) Princess *Louise*, daughter of Leopold II. and of Marie Henriette, Archduchess of Austria, born Feb. 18, 1858, married Feb. 12, 1875, to Prince Philip of Saxe-Coburg and Gotha. Marriage dissolved Jan. 15, 1906. (2) Princess *Stéphanie*, daughter of Leopold II. and of Marie Henriette, born May 21, 1864, married to Archduke Rudolf, only son of the Emperor of Austria, May 10, 1881, widow January 30, 1889, married March 22, 1900, to Elemér, Count of Lónyay de Nagy Lónya (3) Princess *Clémentine*, daughter of Leopold II. and of Marie Henriette, born July 30, 1872, married to Prince Victor Napoleon, Nov. 14, 1910.

King Albert has a civil list of 3,300,000 francs, and the Countess of Flanders has a dotation of 50,000 francs.

The Kingdom of Belgium formed itself into an independent State in 1830, having from 1815 been a part of the Netherlands. The secession was decreed on October 4, 1830, by a Provisional Government, established in consequence of a revolution which broke out at Brussels, on August 25, 1830. A National Congress elected Prince Leopold of Saxe-Coburg King of the Belgians on June 4, 1831; he ascended the throne July 21, 1831. By the Treaty of London, Nov. 15, 1831, the neutrality of Belgium was guaranteed by Austria, Russia, Great Britain and Prussia. It was not until after the signing of the Treaty of London, April 19, 1839, which established peace between King Leopold I. and the King of the Netherlands, that all the States of Europe recognised the Kingdom of Belgium.

### Constitution and Government.

According to the Constitution of 1831 Belgium is 'a constitutional, representative, and hereditary monarchy. The legislative power is vested in the King, the Senate, and the Chamber of Representatives. The royal succession is in the direct male line in the order of primogeniture. By marriage without the King's consent, however, the right of succession is forfeited, but may be restored by the King with the consent of the

two Chambers. No act of the king can have effect unless countersigned by one of his ministers, who thus becomes responsible for it. The King convokes, prorogues, and dissolves the Chambers. In default of male heirs, the King may nominate his successor with the consent of the Chambers. If the successor be under eighteen years of age, the two Chambers meet together for the purpose of nominating a regent during the minority.

The Senate consists of members elected for eight years, partly directly and partly indirectly. Their total number is 120, of whom 27 are elected by the Provincial Councils. The number elected directly is equal to half the number of members of the Chamber of Representatives, and is *proportioned to the population of each province*. The constituent body is similar to that which elects deputies to the Chamber except that the minimum age of electors is fixed at thirty years. In the election of members both of the Senate and Chamber of Representatives directly, the principle of proportional representation of parties was introduced by Law of December 29, 1899. In 1911-12 the number of electors for the Senate was 1,460,286, of whom 755,453 had each one vote, 394,123 two votes, and 310,660 three votes. Senators elected indirectly are chosen by the provincial councils, two for each province with less than 500,000 inhabitants, three for each with a population up to 1,000,000, and four for each with over 1,000,000. No one, during two years preceding the election, must have been a member of the council appointing him. All senators must be at least forty years of age, those and elected directly must pay not less than 1,200 francs in direct taxes or own immovable property in Belgium yielding an income of 12,000 francs. In provinces, however where the number eligible for the Senate would be less than one in 5,000 of population, the list is extended to this proportion by admission of the most highly taxed. Sons of the King or failing these, Belgian princes of the reigning branch of the Royal Family are by right Senators at the age of eighteen but have no voice in the deliberations till the age of twenty-five years.

The members of the Chamber of Representatives are all elected directly by the electoral body. Their number at present, 186, is proportioned to the population, and cannot exceed one for every 40,000 inhabitants. They sit for four years, one half retiring every two years, except that after a dissolution a general election takes place. Every citizen over twenty-five years of age, domiciled for not less than one year in the same commune and not legally disqualified has a vote. Every citizen over thirty-five years of age with legitimate issue, and paying at least 5 francs a year in house tax, has a supplementary vote, as has also every citizen over twenty-five years of age owning immovable property to the cadastral value of 2,000 francs, or having a corresponding cadastral income from such property or who for two years has derived at least 180 francs a year from Belgian funds either directly or through the Savings Bank. Two supplementary votes are given to citizens over twenty-five years of age who have received a diploma of higher instruction, or a certificate of higher secondary instruction or who fill or have filled offices or engaged in private professional practice, implying at least average higher instruction. No person has more than 3 votes, failure to vote is a misdemeanour, punishable by law. In 1911-12 the number of electors for the Chamber was 1,721,755, of whom 998,488 had one vote, 404,788 two votes, and 318,488 three votes. Deputies must be not less than twenty-five years of age, and resident in Belgium. Each deputy has an annual indemnity of 4,000 francs (160*l.*), and a free pass all the year

over Government and Companies' railways between his residence and the place of Session.

The Senate and Chamber meet annually in the month of November, and must sit for at least forty days, but the King has the power of convoking them on extraordinary occasions, and of dissolving them either simultaneously or separately. In the latter case a new election must take place within forty days, and a meeting of the Chambers within two months. An adjournment cannot be made for a period exceeding one month without the consent of the Chambers. Money bills and bills relating to the contingent for the army originate in the Chamber of Representatives.

Senate, 1912 — Catholics, 70, Liberals, 85 Social Democrats, 15 Chamber of Representatives 1912 — Catholics, 101; Liberals, 44; Social Democrats, 89, Christian Socialist, 2

The Executive Government consists of 11 departments, under the following Ministers:—

*President of the Council and Minister of War*—Ch de Broqueville  
Appointed November 11 1912

*Minister of Science and Art*—P Foullet, June 17, 1911

*Minister of Interior*—Paul Buryer Appointed September 5, 1910.

*Minister of Finance*—M Levie Appointed June 17 1911

*Minister of Agriculture and of Public Works*—G Hellegalle, Appointed November 11 1912.

*Minister of Foreign Affairs*.—M J Davignon Appointed May 2, 1907

*Minister of Justice*.—H Carton de Wiart Appointed June 17, 1911

*Minister of the Colonies*—J Benkin Appointed October 30, 1908

*Minister of Industry, and Labour*—M. A Hubert Appointed May 2, 1907

*Minister of Railways*.—A Van de Vyvere Appointed November 11, 1912.

*Minister of Marine and of Posts and Telegraphs*—P Seyers Appointed November 11, 1912.

Besides the above responsible heads of departments, there are a number of 'Ministres d'Etat,' without portfolio, called on special occasions by the sovereign.

The Ministry of Marine was created in November, 1912

#### *Local Government.*

The provinces and communes (2,029 in 1910) of Belgium have a large amount of autonomous government. The provincial electors are the same as those who elect the senators directly, the qualifications of the communal electors are also the same, except that these must have been domiciled at least three years in the commune, and a supplementary vote is given to owners of real property yielding an income of at least 150 francs. No one has more than 4 votes. In communes with over 30,000 inhabitants there are councillors elected directly, by single vote, by citizens enrolled on the communal electoral lists, and possessing the qualifications requisite for electors to the Councils of Industry and Labour; half the councillors are appointed by the workingmen electors, and half by the electors who are industrial heads (*chefs d'industrie*). In communal elections vote by ballot is suppressed, except when there is a single mandate to be conferred. Candidates obtaining an absolute majority are declared elected; others have seats allocated in accordance with the system of "Proportional Representation." In the year 1911-12 there were 1,460,236 provincial, and 1,820,074

communal electors. To be eligible to the Provincial or Communal Council, persons must be twenty-five years of age and domiciled in the province or commune. Half the Provincial Council is renewed every four years, and it meets fifteen days each year. There is a permanent deputation of six members elected, which is presided over by the Governor of the province. All provincial and communal interests, including local finances, are under the care of the Council, as far as they are not provided for in the general administration. The Communal Councils are elected for eight years, half being renewed every four years. In each commune there is a college composed of the burgomaster, president, and a certain number of aldermen, corresponding almost to the permanent deputation of the Provincial Council, and both are the organs of the central administration.

### Area and Population

Belgium has an area of 29,451 square kilometres, or 11,378 English square miles. The following table shows the population at various dates:—

Census Years	Population	Total Increase	Increase per cent. per annum	Census Years	Population	Total Increase	Increase per cent. per annum
1866	4,827,838	298,372	65	1890	6,069,821	549,312	99
1876	5,386,185	508,852	1 05	1900	6,698,548	624,227	1 03
1880	5,520,009	188,824	85	1910	7,423,784	780,236	1 09

#### Area and population of provinces —

Provinces	Area Eng. sq. miles	Population		Population per sq. mile, 1910
		Census Dec. 31, 1910	Estimated Dec. 31, 1911	
Antwerp (Anvers)	1,098	968,677	987,201	884
Brabant	1,268	1,469,677	1,494,416	1,158
Flanders	1,249	874,135	878,417	699
	West			
East	1,158	1,120,835	1,125,814	967
	East			
Hainaut	1,437	1,282,867	1,239,712	857
Liège	1,117	888,341	890,918	798
Luxembourg	981	275,691	279,170	298
Luxembourg	1,706	281,215	281,814	155
Namur	1,414	326,846	363,449	231
Total	11,378	7,423,784	7,490,411	652

In 1910 there were 3,680,790 males and 3,742,994 females, or 98 males for every 100 females. Of the population in 1900 (exclusive of children under 2 years of age), 2,674,606 spoke French only, 2,822,005 Flemish only, 28,814 German only, 801,537 French and Flemish, 66,447 French and German, 7,288 Flemish and German, and 42,889 spoke all three languages. Civil condition of the population in 1900 —

	Unmarried	Married	Widowed	Divorced
Males	2,047,607	1,146,774	127,014	3,439
Females	1,898,333	1,148,438	352,202	4,645

In 1900 there were 206,061 foreigners (99,119 males and 106,942 females) in Belgium. Of these 63,923 were Dutch, 56,576 French, 53,578 German, 10,417 Luxembourgish, 5,748 British, 3,543 Italian, 2,991 Austro-Hungarian, 2,351 Russian, 2,281 Swiss, and 4,523 of other nationalities.

Returns for 1900 according to occupation, a certain number being tabulated under more than one head --

	Males	Females	Total
Mining and metal industries	867,486	17,899	885,276
Industries connected with vegetable products	260,551	45,699	306,250
Industries connected with animal products	43,178	14,895	58,073
Mixed industries	978,363	244,290	622,653
Commerce	248,336	136,900	385,236

<sup>1</sup> The suburbs comprise 8 distinct communes

### Religion.

Of the inhabitants professing a religion the majority is Roman Catholic. But no inquisition on the profession or faith is now made at the censuses, and therefore the last available figures, those of 1891, are the only clue to the numbers of the three dominant faiths. According to these there were — Protestants and Anglicans 27,900 Jews 18,200 There are, however, statistics concerning the clergy, and according to these there were in 1912 — Roman Catholic higher clergy 85, inferior clergy, 5 685, Protestant pastors, 38, Jews (rabbi and ministers) 14 The State does not interfere in any way with the internal affairs of either Catholic or Protestant Churches There is full religious liberty, and part of the income of the ministers of all denominations is paid from the national treasury, this amounted, in 1912, to 7,269 600 francs to Roman Catholics, 107,000 francs to Protestants, and 29,200 francs to Jews, subsidies for buildings devoted to Protestant and Jewish religious services, 10,000 francs There are few endowments.

In 1910 there were six Roman Catholic dioceses, 190 deaneries, 6 443 Catholic churches and chapels, 6 large and 11 small seminaries In 1900 there were 2,474 convents of which, 291, with 8,297 inmates, were for men, and 2 183, with 31 668 inmates, for women

The Protestant (Evangelical) Church is under a synod

### Instruction.

Of the four universities, Ghent and Liège are State, Brussels and Louvain free

Universities 1910-11	Students of					Total
	Theology	Jurisprudence	Philosophy	Medicine	Sciences	
Brussels	—	200	150	300	267	917
Ghent	—	179	85	146	84	494
Liège	—	480	209	226	910	1,775
Louvain	98	608	434	555	805	1,902

Attached to the universities are various special technical schools, 2 694 students in 1910-11 There are 6 commercial high schools, the Royal Academy of Fine Arts at Antwerp, 716 students in 1910, 83 schools of design, 17,108 students, royal conservatoires and other schools of music, 20,920 students in 1910 Public schools, 1910 —

—		No.	Pupils	—		No.	Pupils
Royal Atheneums and colleges	36	7,775		Middle-class normal schools	4		188
Middle-class schools (male)	90	18,572		Primary normal schools	54		4,799
Middle-class schools (female)	44	9,167		Primary schools	7,525		929,347
				Infant	3,112		271,387
				Adult	4,722		240,079

There are many private or free schools—infant, primary, and adult schools, mostly under ecclesiastical care. Besides, 1908-09 83 commercial industrial schools, 24,372 pupils, 71 commercial and 195 free professional and commercial schools, 25,083 pupils.

Each commune must have at least one primary school. The cost of primary instruction devolves on the communes, with subsidies from the State and provinces. The total sum spent on elementary education in 1906 was 54,312,000 francs.

The proportion of the population above seven years who could not read or write at the census of 1900 was 22.1 per cent.; in 1890, 28.8 per cent., in 1880, 33.2 per cent. In 1911 of the 65,424 young men called out for military service, 5,066, or 7.74 per cent., could neither read nor write, in 1890 the corresponding percentage was 15.92.

### Justice and Crime

Judges are appointed for life. There is one Court of Cassation, three Courts of Appeal, and Assize Courts for criminal cases. There are 26 judicial districts, each with a Court of first instance. In each of the 222 cantons is a justice and judge of the peace. There are, besides, various special tribunals. There is trial by jury. The Gendarmerie (8,353) and the *Marde Civique* (46,562) are used for the maintenance of internal order.

#### Criminals sentenced —

	1906	1906	1907	1908	1909	1910
Assize Courts	97	88	72	60	92	65
Correctional Tribunals	42,110	46,806	47,194	45,718	44,712	47,918

#### The mean number of inmates of the various classes of prisons were —

	1905	1906	1907	1908	1909	1910
Central prisons	758	746	745	734	738	740
Secondary „	3,648	4,009	4,189	4,175	4,165	3,653
Reformatories <sup>1</sup>	184	190	168	142	144	136

<sup>1</sup> The figures show only the number of children in the correctional branch of the sixties charity schools annexed to the Ghent central prison.

### Pauperism.

There are numerous private charitable associations, but the only public charity institutions are refuges, *dépôts de mendicité*, hospitals, and the *bureaux de bienfaisance*, under the Communal Councils, while the provinces contribute to maintain certain classes of hospitals, refuges, or almshouses, and asylums. The communes must furnish assistance to their paupers. The charity institutions received in donations and legacies 4,150,647 francs in 1910. Outdoor relief is provided under certain conditions. Statistics of *dépôts de mendicité* for the reception of beggars and vagabonds (adults):—

Year	Total Entries	Mean Population	Year	Total Entries	Mean Population
1907	4,469	5,187	1909	4,761	5,724
1908	4,685	5,421	1910	4,597	5,676

Telegraphs and Telephones	21,360,000	Repayments &c	2,836,000
Post office	96,273,250		
Steam boats	2,208,000		
Domains, forests, &c.	5,188,000		
Various profits (Bank, Monnaie &c.)	24,079,625		
Repayments	9,144,124		
Total	757,834,640 (80,806,1861)	Total	755,540,109 (80,221,4047)

National liabilities on January 1, 1912 —

	Francs
Share of the Netherlands debt at 2½ per cent.	219,859,032
Loans at 8 per cent.	3,514,394,406
Total	3,734,253,438 (149,188,6524)

Almost the entire debt was raised for and devoted to works of public utility. There is a sinking fund for all descriptions of the debt, except the

2½ per cent. old debt. The debt charge amounted to 125,954,858 francs (4,998,208*l.*) in 1912

The total debt amounts to about 498 francs per head, and the annual charge to about 16½ francs per head, but the interest is more than covered by the revenue from railways alone. The total exports of home produce in 1911 were 478 francs per head

### Local Finance.

In 1909 the total revenue for all the provinces was 81,566,258 francs, expenditure 26,872,836 francs; provincial debts, 1910, 85,568,988 francs

### Defence

Maritime frontier 42 miles, Dutch frontier, north and east, 268 miles German frontier in the east, 60 miles Luxembourg frontier, in the east 80 miles French frontier, south and west, 384 miles The chief military arsenal of the kingdom is Antwerp, the fortifications of which, designed to shelter the whole army in case of need are now being remodelled at enormous cost. There are also fortifications at Liège, Huy, and Namur on the Meuse, where there is a strong line of defence.

The Belgian army was till recently recruited partly by voluntary enlistment and partly by conscription of the old type with many exemptions but in December, 1909, a law was passed substituting "personal service" for conscription with substitution, and greatly reducing the number of exemptions. Voluntary enlistment is retained (for those who desire to make the army a profession) first engagements being for 5, 4, or three years, according to whether the recruit is 16, 17, 18, or over 18 on enlistment. The young men of the contingent (compulsory recruits serve for 1 year and 8 months in the infantry, 1 year and 10 months in the garrison artillery and engineers, 2 years and 4 months in the field artillery, and 3 years in the cavalry. These terms will however be reduced, after 1912, to 15 months in the case of the infantry, engineers and garrison artillery, 1 year and nine months in the case of the field artillery, and 2 years in the cavalry

The total length of service is 8 years in the first line or "active army," and 5 years in the second line, or reserve forces. The first line reservists will be liable to be called up for training for 4, 6, or 8 weeks, according to the arm to which they belong, in the 2nd, 3rd, or 4th years of service, and the training period may be divided between the two years

The authorised peace strength of the Belgian army is 42,800 (exclusive of officers) and the number of men available in war including depôts, should be about 180,000, but the actual peace strength in 1910 was only about 41,000

The field army consists of 4 divisions, and 2 cavalry divisions. The former are composed of two brigades of infantry (each consisting of two regiments of 4 battalions), a brigade of artillery (12 field batteries of 4 guns each), a battalion of carabineers, a company of cyclists, a squadron of gendarmes, a company of engineers, &c. The strength of a division is about 22,000 combatants. The cavalry divisions each contain 2 brigades of 2 regiments and 2 batteries of horse artillery. Strength about 4,000 combatants. The total strength of the field army should be close on 100,000 men, leaving 80,000 for the fortresses and fortified positions, depôts included

The Gendarmes is a semi military corps of about 3,500 of all ranks, nearly half of them mounted. It furnishes a squadron to each field division as divisional cavalry

There is also a Garde Civique of 46,568 officers and men, organised on

a military basis, and possessing a large reserve. In time of war it would be employed on the lines of communication, and would assist in garrisoning the fortresses.

The Belgian infantry is armed with the Mauser rifle. The field artillery has the shielded Krupp 75 mm gun, calibre 7.5 cm.

Peace establishment of the army in 1912, by arms of the service —

	Officers	Men	Horses
Administration	279	435	21
Staffs	118	—	224
Infantry	1745	25,070	272
Cavalry	804	5,363	5,530
Artillery	636	8,316	8,607
Engineers	104	1,548	49
Train	29	790	381
Medical and other Services	97	2,010	64
Total	3,543	43,081	10,108

The military budget of Belgium in 1912 (effective services only) amounted to 2,594,000/.

The army estimates for 1913 amounted to 81,497,265 francs (3,259,890/). A portion of the total is assigned for aviation purposes. Belgium has no navy.

## Production and Industry

### I. AGRICULTURE.

In each province there is an official Agricultural Commission delegates from which, along with specialists, form a supreme council of agriculture.

Of the total area, 2,945,589 hectares, 1,736,174 are under cultivation, 521,495 under forest, 190,444 fallow or uncultivated, the rest roads, marshes, rivers, &c.

The following figures show the yield of the chief crops for three years —

Crop	Acreage			Produce in cwts		
	1909	1910	1911	1909	1910	1911
Wheat	832,580	360,360	277,910	7,821,111	6,667,100	7,823,136
Barley	87,448	79,040	85,211	1,040,807	1,603,771	1,903,841
Oats	618,048	617,500	605,140	12,843,300	11,561,161	11,813,002
Rye	635,120	629,850	629,850	11,578,731	11,039,679	11,541,487
Potatoes	346,308	469,300	—	2,419,648	2,804,196	—
Beet (sugar)	144,344	183,267	147,466	1,364,118	1,344,621	1,452,279
Tobacco	9,445	14,325	9,890	17,831	211,751	196,786

<sup>1</sup> Tons.

The average value of the total products of the forests is about 21,653,482 francs.

On December 31, 1909, there were 255,229 horses, 1,556,833 horned cattle, and 1,116,560 pigs.

## II. MINING AND METALS AND OTHER INDUSTRIES

There is a special department of Industry and Labour. There are a Superior Council of Industry, a Council of Mines, and a Council of specialists for advising the State as to the interests of various industries.

Of the more important industries the following may be mentioned: artificial silk, motor cars, glass, iron and steel, lace (particularly hand made lace), linen, and gloves.

1,522 quarries in 1910, workmen 35,711 value of products \$6,418,720 francs workmen engaged in metallic mines 864, iron ore produced in 1900 247,890 tons, valued at 1,320,100 francs, in 1910, 122,980 tons, valued at 566,950 francs. Coal mines in 1916, 217, of which 188 were worked, work people, 1910, 143,701, 1911, 142,580. Production of coal —

	1906	1907	1908	1909	1910	1911
Tons (1000)	28,569	23,705	23,558	23,517	23,916	23,125
Value in 1000 fr.	353,472	339,657	303,579	337,906	348,877	—

Iron ore, from Luxembourg was imported to the value of 9,048,809 francs in 1909, 9,224,891 francs in 1910, 8,231,724 francs in 1911.

Pig and manufactured iron produced —

	1906	1907	1908	1909	1910
<b>Pig iron</b>

Tons	1,164,745	1,216,690	989,400	1,264,650	1,334,550
1,000 fr.	169,046	192,954	137,895	157,457	193,220

In 1911, 2,106,120 metric tons of pig iron were produced, and in 1912, 2,344,315 tons.

In 1910 there were 16 pig iron works in activity and 2 unemployed, 40 blast furnaces active and 8 inactive, number of workmen, 4,214. For manufacture of iron, 1910, 38 works active, 185 puddling furnaces; workmen, 10,155, steel works, 25 active, 3 inactive, Martin and other furnaces, 27; Bessemer converters, 70; workmen, 16,877, zinc produced, 1911 193,230 tons, value 119,668,000 francs workmen, 7,999, lead, 18,464,000 francs, silver from lead, 27,754,000 francs, workmen, 1,818.

In 1910 there were 93 sugar manufactories, produce 271,232 tons of raw sugar, 22 refineries, output 114,698 tons, 125 distilleries, output 71,887 hectolitres of alcohol at 50° G.L.

In 1910 400 fishing vessels caught fish to the value of 8,541,199 francs.

Commerce  
GENERAL COMMERCE

	Imports	Exports
	£	£
1910	170,536,440	125,297,120
1911	180,536,990	145,254,000
1912	175,283,000	149,520,000

General imports, 1911 by sea, 3 261 700,000 francs, by land, railway, canals and rivers, 3,644,700,000 francs, exports, by sea, 2,551,500,000 francs, by land, railway canals and rivers, 3,327,800,000

Imports for home consumption, exports of Belgian origin, and transit trade, in millions of francs —

	1905	1906	1907	1908	1909	1910	1911
	Million frs	Million frs	Million frs	Million frs	Million frs	Million frs	Million frs
Imports	8 058 5	8 434 0	8,778 6	8,527 4	8 104 8	4 265 0	4,508 5
Exports	2,338 8	2 793 8	2 548 1	2,506 4	2,809 7	8 407 4	8,580 8
Transit	1 923 2	2 268 8	2,346 0	2,021 0	2,290 5	2,287 2	2,293 9

The customs receipts amounted, in 1906, to 56 287 943 francs in 1907 77 788 044 in 1908 57,526 988, in 1909 60 900 545 in 1910 67 870 484 in 1911 65 425 120 (3 617 004L). The commercial treaty of 1863 provided for the 'most favoured nation' treatment between Great Britain and Belgium. This treaty terminated in 1878, but since then the system in force under the treaty has been continued by an arrangement terminable after 8 months notice.

The amount of revenue collected by means of a tariff on imported goods is very small and when compared with the value of the entire imports it will be found that the average duty charged in relation to the entire imports amounts to less than 1 per cent. The customs tariff is intended more as a protection to home industries than as a means of revenue production.

Leading articles of special commerce in year 1911 —

Imports	£	Exports	£

The vessels entered and cleared in 1911 were as follows —

Nationality	Entered		Cleared	
	No.	Tonnage	No.	Tonnage
Belgian	1,959	2,074,930	1,959	2,060,649
British	5,160	7,034,959	5,165	6,991,793
German	1,725	4,042,578	1,728	4,048,915

## Internal Communications

The total length of the roads in Belgium (1911) was as follows — State roads, 5,072 miles, provincial roads, 987 miles, conceded roads, 140 miles, by roads, 19,347 miles, total 25,446 miles. The majority of the roads are paved with stone.

The total length of navigable waterways (rivers and canals) in 1911 was 1,238 miles.

The length of railways (1911) — State lines, 2,697 miles, private lines, 218 miles, light railways, 2,420 miles, total, 5,335 miles. Under construction, 454 miles.

Passengers conveyed by State railways in 1911, 180,840,189, by companies 18,049, 57. Gross receipts 1911 for the State 318,872,749 francs for companies 33,909,926 francs, expenses for the State 210,845,039 francs, for the companies 14,151,463 francs. The first cost of State railways to end of 1911, 2,824,458,816 francs, net receipts 2,854,876,425 francs, financial charges 2,790,909,215 francs.

The work of the Post Office in Belgium in four years was as follows —

	1908	1909	1910	1911
Private letters	182,546,178	193,620,497	208,696,675	218,176,673
Official letters	85,194,740	95,473,873	86,091,149	37,392,456
Post-cards	105,056,568	112,601,424	119,736,212	123,255,448
Printed matter	207,562,821	220,865,628	246,988,131	261,797,474
Newspapers	158,721,476	160,521,278	171,964,998	180,198,608

On December 31, 1911, there were 1,658 post offices in Belgium. The gross revenue of the Post Office in the year 1911 amounted to 40,774,771 francs, and the expenditure to 22,182,110 francs.

The telegraphs in Belgium carried 22,084,097<sup>(1)</sup> despatches, private and official, in the year 1911. In 1911 the total length of public telegraph lines was 4,774 miles, and the length of wires 25,834 miles, exclusive of rail ways and canal telegraphs. There were in 1911, 1,659 telegraph offices. Receipts in 1911 (telegraphs and telephones), 19,252,911 francs, expenses (telegraphs and telephones), 16,074,466 francs.

In 1911 there were 248 urban telephone systems with 144,885 miles of wire, and the inter-urban systems had 18,890 miles of wire, total number of conversations 121,951,280 in 1911.

### Money and Credit

No gold has been minted since 1882, and no silver 5 franc pieces since 1876.

The one bank of emission in Belgium is the National Bank, instituted 1850. By law of March 26, 1900 its constitution was modified, and its duration extended to January 1, 1929. Its capital and reserve amounted in 1911 to 80,623,440 francs. It is the cashier of the State, and is authorised to carry on the usual banking operations. Its situation in 1911, was —

Cash on hand	1000 francs
Note circulation	246,707
Accounts current, creditors	989,783
Portfolio (commercial)	133,541
Advances on public funds	745,832
	90,914

There are joint-stock and private banks, also agricultural banks, credit unions, and popular banks. The following are statistics of the State savings-banks —

Year	Offices	Depositors	Amount of Deposits at end of year	Year	Offices	Depositors	Amount of Deposits at end of year
			Francs				Francs
1906	1,060	2,419,710	812,692,928	1909	1,206	2,710,112	870,145,064
1907	1,137	2,528,207	848,781,586	1910	1,217	2,808,540	964,668,844
1908	1,160	2,624,091	886,240,741	1911	1,266	2,961,738	1,007,663,403

### Money, Weights, and Measures.

*The Franc*

Par value 25 22½ to 21 sterling

Belgium belongs to the Latin Monetary Union

The weights and measures are those of the metric system

### Diplomatic Representatives.

#### 1 OF BELGIUM IN GREAT BRITAIN

*Envoy and Minister* — Count de Lalaing; appointed May 30, 1903

*Councillor of Legation*. — E. de Prelle de la Nispe

*First Secretary of Legation*. — G. de Ramain

*Consul-General in London*. — M. E. Pollet.

There are Consular representatives of Belgium in the following towns —

Aberdeen, Arbroath, Belfast, Berwick, Birmingham, Bradford, Bristol, Cardiff, Cowes, Dartmouth, Dover, Dublin, Dundee, Edinburgh, Falmouth

<sup>(1)</sup> Including 18,478,960 telegrams sent to the administration of the railway system.

Glasgow, Goole, Grimsby, Guernsey, Harwich, Hull, Leith, Leeds, Lerwick, Limerick, Liverpool, London, Manchester, Middlesbrough, Milford Haven, Newcastle, Plymouth, Portsmouth, Queenstown, Ramsgate, Sheffield, Southampton, Sunderland, Swansea, Yarmouth, and other places

## 2 OF GREAT BRITAIN IN BELGIUM

*Envoy and Minister*—Hon Sir F H Villiers, G C V O, K C M G, C B, appointed September, 1911

*Secrétaire*—H A G Watson and J W R Macleay

*Military Attaché*—Lt Col G T M Bridges

*Naval Attaché*—Captain Howard Kelly

There is a Consul General and three Vice Consuls at Antwerp and Vice-Consuls at Bruges, Brussels, Charleroi, Ghent, Liège, Ostend, and Spa

## BELGIAN CONGO

(CONGO BELGE)

**Constitution and Government.**—The Congo Independent State was founded in 1882 by Leopold II., King of the Belgians, and the State was placed under his sovereignty, but its perpetual neutrality, in accordance with the provision of Chapter III of the General Act of Berlin (1885) was guaranteed [Concerning this Act, see STRATSMAN'S YEAR BOOK for 1908—p. 874]

The annexation of the State to Belgium was provided for by treaty of November 28, 1907, which was approved by the chambers of the Belgian Legislature in August and by the King on October 18 1908. The Minister for the Colonies is appointed by the King and is a member of the Council of Ministers. He is President of the Colonial Council, consisting of 14 members, 8 of whom are appointed by the King and 3 chosen by the Senate and 3 by the Chamber of Representatives. One of those appointed by the King, and one chosen by the Legislative Chamber retire annually, but may be re-appointed. The King is represented in the Colony by a Governor General, assisted by several vice Governors General. The budget is presented annually to the Chambers and voted by them. The financial accounts have to be verified by the Court of Accounts. An annual report on the Congo Administration has to be presented to the Chambers along with the budget.

The Annexation has up to date been recognised by all the Powers with exception of Great Britain.

The Belgian Minister for the Colonies in October 1909 indicated his scheme of reform in the Congo. The natives would be granted the right to take the produce of the soil in the Domain. This would be accomplished in three stages. Since July 1 1910 the Lower Congo (Middle Congo) Ubangi Bangala Kwango Kasai Katanga the southern portion of the Eastern Province Aruwimi and the banks of the river as far as Stanleyville are open to freedom of trade. On July 1 1911 the Domain of the Crown and on July 1 1912 the Waste district would also be thrown open. Furthermore the Government would levy taxes in money and the system of the provisioning of the agents would be abolished. (See map among the introductory matter of the YEAR BOOK for 1910.) In March 1910 various decrees ameliorating the condition of affairs were voted by the Colonial Council regulating taxation abolishing the exploitation of Domain land by the State in July, 1912 and abolishing the powers of the Comité Spécial of Katanga.

*Governor General* —F. Fuchs (appointed May 25, 1912)

The precise boundaries of the Congo Colony were defined by the neutrality declarations of August, 1885, and December, 1894, and by treaties with Germany, Great Britain, France, and Portugal.

The territory is divided into twenty-two administrative districts (March 28, 1912) —Lower Congo, Middle Congo, Kwango, Lake Leopold II., Equator, Lulonga, Bangala, Ubangi, Lower Uele, Upper Uele, Ituri, Stanleyville, Aruwimi, Lova, Kivu, Maniema, Sankuru, Kasai, Lomami, Tanganika, Moero, Lulua, and Upper Luapula. The last four districts form the sub-government of Katanga, with its capital at Elisabethville, the other eighteen districts forming the government general of Belgian Congo, with Boma as its capital. At the head of each district there is a commissioner. In 1911 there were, altogether about 350 posts and stations at which 1,987 European Government agents officiated.

**Area and Population.**—The area of the Colony is estimated at 909,654 square miles, with a population of Bantu origin officially estimated at 15 millions. Sir H. Johnston's estimate is 15½ millions, and another estimate is 9 millions. The European population in January, 1911, numbered

4,008 Of these, 2,432 were Belgian, 311 English, 197 Portuguese, 188 Swedish, 43 Norwegian, 40 French, 40 American, 215 Italian, 29 Danish, 64 German, 121 Dutch, 72 Swiss, 68 Russian, 19 Austrian, 30 Greek, 35 from Luxembourg, and 29 others

The native languages comprise many dialects, every tribe having its own Kiswahili is the language spoken by the natives who have been under Arab influence Bangala is the commercial language on the upper Congo, Ficta is used on the lower Congo The religion of the natives consists of a gross fetishism, but mission work is actively carried on There are 138 mission stations, with 571 missionaries, of whom 350 are Catholic and 221 Protestant In education they co-operate with the Government, which has formed colonies where children are collected and taught

**Finance**—In 1911, the revenue was 40,501,700 francs, and the expenditure 59,012,728 francs, in 1912, 45,377,639 francs and 66,038,170 francs respectively

For 1913 the receipts and expenditure were estimated as follows —

Receipts	Francs	Expenditure	Francs
Customs	8,961,500	Interior	33,220,069
Direct taxes	10,142,000	Defence	3,112,400
Transports, &c.	3,750,000	Posts and Telegraphs &c.	1,211,503
Taxes in kind	230,000	Justice Education &c.	3,107,411
Mines	7,700,000	Industry Commerce Agriculture	1,434,000
Various	6,744,000	Various	2,511,94
Rubber tax	2,960,000		
Posts and telegraphs	740,000		
		Total ordinary	50,838,064
		extraordinary	1,024,020
Total	40,418,100	Total	51,862,084
	(1,116,347)		(2,438,263)

The debt contracted at various dates is given as follows Under decree of February 7, 1888 authorising the issue of bonds amounting to a nominal capital of 150,000,000 francs, the amount of 87,262,500 francs was issued, under decrees of October 17, 1896, and June 14, 1899, 14,000,000 francs (nominal capital) was issued at 4 per cent interest, on July 5, 1887 bonds were created and delivered to the members and subscribers of the late 'Comité d'Etudes du Haut Congo' amounting to 422,200 francs yielding interest at 2½ per cent. from January 1, 1900

In October, 1901, a loan of 50,000,000 francs, at 4 per cent. interest, was issued for the purpose of public works, including railways A decree of February 1, 1904, authorised the creation of bonds to bearer of the public debt for a nominal capital of 30,000,000 francs at 3 per cent interest Emprunt 1906, 4 per cent de 150,000,000 francs 1st instalment 10,000,000 francs, a second of 10,000,000 francs to be issued in December or January 1910, and a third instalment of 10,000,000 francs was issued on May 19, 1911 Loan, 4 per cent, 1909 8,800,000 francs The total public debt of the Belgian Congo amounts (1912) to 278,747,400 francs (1,142,888) l

**Defence**—The Colony possesses a force of native troops amounting to 18,000 men. They are all infantry and are organised in 26 independent companies The force is recruited by conscription and volunteering, the annual contingent being 3,375 men in 1912 The officers (182) and 250

non commissioned officers, are Europeans, for the most part Belgians. The term of service is seven years, and the recruits are trained in camps of instruction before being drafted to their companies.

**Justice**—There are 7 courts of first instance, 12 county courts and 2 courts of appeal (one at Boma and the other at Elizabethville) There are altogether 77 magistrates in the Congo

**Production, Commerce, Shipping**—The four chief products in the order of their importance are rubber, palm nuts and palm-oil, white copal and cocoa. Ivory is also abundant. Coffee grows freely and the cultivation of cocoa is successful. Tobacco is grown in all native villages. Plantations of rubber and coffee have been established by the Government. Cattle do not thrive on account of the deadly tsetse fly. There are no native industries and few skilled workmen. Mining flourishes, the chief minerals being gold and copper. Other minerals are known to exist—coal, iron, tin and manganese—but as yet these have not been obtained in paying quantities. The gold mines in 1911 employed some 3 000 natives, the output was 2,000 pounds and the exports 1 995 pounds. In 1911 the shipment of copper was 2 184,636 pounds (336 708 pounds in 1910)

The value of the commerce in 1895 was as follows—Imports, special 427 430*l*, general, 473,440*l* exports, special 437,720*l*, general, 485,430*l*. The development in the last five years was as follows—

Years	Imports		Exports	
	Special	General	Special	General
	£	£	£	£
1907	1 007 270	1 637 480	3 51 90	3 101,110
1908	1 068 550	1 740 830	1 734 80	2 274 090
1909	835 700	1 159 310	3,248 040	3 020 270
1910	1 413,570	1 750 11	664 091	3 325 947
1911	1 045 810	334 602	4,163,697	5,158,210

In the trade of 1911 the chief imports and exports were—

	Imports			Exports	
	Special	General		Special	General
	Francs	Francs		Francs	Francs

Of the special imports (1911) the value of 31,435,138 francs came from Belgium, 5,882,230 francs from Great Britain, 2,454,173 francs from Germany, 2,177,246 francs from France, and 972,077 francs from Holland. Of the special exports the value of 47,586,266 francs went to Belgium, 468,782 francs to Great Britain, 3,413,896 francs to neighbouring Portuguese possessions, 429 000 francs to British East Africa, and 705,920 francs to Holland.

According to the Board of Trade Returns the imports into the United Kingdom from the Congo State in 1911 amounted to the value of 35,8911 (rubber, 17,5551, gum, 9221) and the exports of British produce and manufactures to the Congo State, to 256,5511 (cottons 158,9611)

At the port of Boma in 1911 of sea going vessels there entered 117 of 485,041 tons. In the coasting trade there entered 90 vessels of 9,378 tons. There is regular steam communication every three weeks with Antwerp and frequent steam communication with Liverpool, Hamburg, Rotterdam, Lisbon, and Bordeaux.

The *Administration* possesses 11 steamers on the Lower Congo, and 37 on the Upper Congo.

A special office, called the 'Office Colonial,' collects and gives information on all subjects relating to commerce and industry in the Congo.

**Internal Communications**—The Congo is navigable for about 100 miles from its mouth to Matadi, and on this section 11 steamers belonging to the State ply. Above this for over 200 miles, are numerous rapids which render the river unnavigable as far as Stanley Pool (Leopoldville). Above the Pool there are about 1,200 miles of navigable water as far as Stanley Falls, while several of the great tributaries are navigable over a considerable extent of their course.

A railway of about 250 miles in length, running at an average distance of 20 miles south of the river connects Matadi with Stanley Pool. This railway is open for traffic in its whole length. There are four other short lines in the Congo, including two sections of the Cape-to-Cairo Railway making a total mileage of 800. The distance from Elisabethville, Katanga, on the Cape to Cairo Railway, to Cape Town is about 2,300 miles. On January 1, 1911, the entire rolling stock in Kongo consisted of 93 locomotives, 37 passenger coaches and 589 freight cars. Projected lines include one from Elisabethville to Lukuma, 310 miles, Kambovo to Lake Dilolo 435 miles, and the extension of the Benguela Railway in Angola to Dilolo to connect with the second line mentioned. The last two lines would shorten the distance from Elisabethville to the sea by about 1,000 miles. From Leopoldville a public transport service on the Upper Congo has been organised by the Government, 37 steamers being employed for this purpose.

An important development in 1911 was the construction of a pipe line from Matadi to Leopoldville, 246 miles long, for the purpose of transporting crude oil for the use of river steamers. It has a diameter of 4 inches, with 8 pumping stations capable of delivering 50,000 tons of oil at Leopoldville the terminus. The concession is for 50 years, at the expiration of which period all the pipe lines, with the material, except the vessels and stores of petroleum, will pass into the hands of the Congo Government.

In 1911 there were 39 post offices, 17 telegraph offices and 6 telephone offices. In 1911 in the internal service 401,427 letters, papers, &c., were transmitted, and in the external, 2,079,652 were handled, and 15,964 passed in transit. The Congo is included in the Postal Union. Telegraph lines connect Boma and Leopoldville 280 miles, Leopoldville and the Equator, 464 miles, Kasongo and Uvira (Lake Tanganyika), 310 miles, Stanleyville and Ponthierville, 79 miles, Boma and Banana and Moanda, 80 miles, and there are 50 miles of telegraph line in Mayumbe total length 1,083 miles. There are at present ten stations in the Belgian Congo—at Banana, Boma, Coquilhatville, Lisala, Stanleyville, Lova, Kindu Kongolo, Kikondja, and Elisabethville. All these posts communicate with each other.

The installation of stations at Leopoldville, Eolo, and Lusambo along the *Sankuru Valley* is at present under consideration, for the purpose of connecting Boma and Elisabethville through the Kasai basin.

The legal money is as in Belgium, but on the Upper Congo the currency consists of brass rods, cowries, &c. The total money in circulation on January 1, 1912, amounted to 740,0671 (on January 1, 1911, it was valued at 355 4181). The Metric System was introduced by law on December 2 1912.

*British Consul*—W J Lamont (at Boma). There are British Vice Consuls at Katanga, Leopoldville, Stanleyville, and Kasai District.

## BHUTÁN

A State in the Eastern Himalayas between 26° 45' and 28° N latitude and between 88° and 92° E longitude bordered on the north and east by Tibet, on the west by the Tibetan district of Chumbi and by Sikkim, and on the south by British India. Extreme length from east to west 190 miles extreme breadth 90 miles. Area about 20,000 square miles, population estimated at 250,000.

The original inhabitants of Bhutan, the Tephus, were subjugated about two centuries ago by a band of military colonists from Tibet. In 1774 the East India Company concluded a treaty with the ruler of Bhutan but since then repeated outrages on British subjects committed by the Bhutan hill men have led from time to time to punitive measures, usually ending in the temporary or permanent annexation of various *dhars* or submontane tracts with passes leading to the hills. In November 1864 the eleven western or Bengal *dhars* were thus annexed. Under a treaty signed in November, 1865, the Bhutan Government was granted a subsidy of Rs. 50,000 a year on condition of good behaviour. By an amending treaty concluded in January, 1910, under which the Bhutan Government surrendered the control of its foreign relations to the British Government the subsidy has been increased to Rs. 1,00,000 a year. This gives the Indian Government an effective control over the State, while the occupation of two strong positions at

Bava and Diwángiri, within a few miles of their frontier, serves as a material guarantee against further aggression.

The form of Government in Bhután, which existed from the middle of the sixteenth century until 1907, consisted of a dual control by the clergy and the laity as represented by Dharma and Deb Rajás. In 1907 the Deb Rájá, who was also Dharma Rájá, resigned his position, and the Tongsa Penlop, Sir Ugyen Wangchuk, K C I E, was elected as the first hereditary Maharaja of Bhután.

Chief towns. Punakhá, the winter capital, a place of great natural strength. Tasichozong (Tashichodzong), the summer capital, Páro, Angdu phorang (Wangdupotang), Tongsa, Taka and Biaka.

The people are nominally Buddhists, but their religious exercises consist chiefly in the propitiation of evil spirits and the recitation of sentences from the Tibetan Scriptures. Tásichozong (Tashichodzong), the chief monastery in Bhután, contains 300 priests.

Beyond the guards for the defence of the various castles, there is nothing like a standing army.

The chief productions are rice, Indian corn, millet, lac, wax, two kinds of cloth, musk, ponies, chowries, and silk. The State is now beginning to realise the necessity of encouraging foreign capital for industrial enterprises such as mines, tea gardens, and the working of its extensive and valuable forests. Muzzle loading guns and swords of highly tempered steel are manufactured.

Imports into Bengal and Eastern Bengal and Assam, and exports from those Provinces to, Bhután —

## BOLIVIA

(REPÚBLICA BOLIVIANA)

## Constitution and Government

THE Constitution of the Republic of Bolivia (so named in 1825) bears date October 28, 1880. By its provisions the executive power is vested in a President, elected for a term of four years by direct popular vote, and not eligible for re-election, there is a Congress of two chambers, called the Senate and the Chamber of Deputies. The suffrage is possessed by all who can read and write. There are 16 Senators (2 for each Department) elected for six years and 75 Deputies elected for four years. Both Senators and Deputies are elected by direct vote of the people. Of the Senators one third retire every two years, of the Deputies one half retire every two years. Senators receive a salary of 500 bolivianos (40l) per month during the sittings, which as a rule, last for 60 days, but may be extended to 90 days and Deputies receive 48 for each day they attend. Extraordinary sessions may be held for special purposes. There are a President, two Vice-Presidents and a ministry, divided into six departments—of Foreign Relations and Worship, Finance, Government and Public Works, Justice and Industry, War and Colonisation, and Education and Agriculture.

*President of the Republic*—Señor Efraim Siles, elected for the term 1902-13 (18,000 bolivianos).

The supreme political, administrative, and military authority in each department is vested in a prefect. The Republic is divided into 9 departments, 55 provinces, and 487 cantons and 246 vice cantons, administered respectively by prefects, sub prefects, corregidores and alcaldes. Prefects and sub prefects are appointed by the President of the Republic, corregidores and alcaldes by the sub prefects of the provinces. The capital of each department has its municipal council, the subdivisions have municipal boards, and the still smaller subdivisions have municipal agents. The territories in the north east of the Republic and in the Gran Chaco are governed by two officials called *delegados nacionales*.

Departments and Territories	Area square miles	Census 1900	Estimated 1910	Per square mile 1910
La Paz	38,800	445,616	516,914	8.60
Cochabambá	28,800	338,163	380,669	10.83
Potosí	48,900	325,615	377,718	7.70
Santa-Cruz	141,700	209,592	243,177	1.70
Chuquisaca	20,400	204,434	237,142	12.03
Tarija	70,800	192,887	219,429	1.68
Oruro	19,000	56,031	99,864	2.25
El Beni	102,100	32,180	87,330	3.50
De los Chiquitos	2,795	—	219,852	59.5
Territories	119,400	10,000	36,984	5.09
Total	708,190	1,744,568	2,287,980	3.24

The Indian population in 1900 was 920,864, or 50.9 per cent. of the whole; the mixed was 485,018, or 28.7 per cent., the white was 231,088, or 12.7 per cent., the negro 3,845, or 0.21 per cent., and the unclassified,

170,936 or 2.4 per cent. Of the population not under 7 years of age, 564,000 were engaged in agriculture, 999,937 in the industries, 55,521 in commerce, 49,647 in the liberal professions, 36,285 in domestic service, 12,625 in mining, and 3,106 in artistic professions. The foreign population numbered 7,425, of whom 2,072 were Peruvian. The admission and settlement of immigrants are facilitated under the regulations published in March, 1906.

The boundary disputes of Bolivia with Brazil and with Chile were settled by treaties of November, 1903 and October 1904. That with Peru was settled by direct negotiations between Bolivia and Peru.

The population of La Paz (the capital) estimated is 73,856. Cochabamba, 24,512; Sucre, 23,416; Santa Cruz, 20,535; Tarija, 7,817; Potosí, 23,450; Oruro, 20,670; Trinidad, 4,810. The temporary capital of the colonial territory in the north west of the republic is Riberalta, population, 2,134. The capital of the Great Eastern Chaco is Villa Montes, 1,658. In 1912, the Government founded the new town of Caracaro in the department of La Paz.

### Religion, Instruction, and Justice

The Roman Catholic is the recognised religion of the State; the exercise of other forms of worship is permitted. The religious orders have 18 convents (10 for males and 8 for females), the male members number about 241, the female 280; there are about 567 secular clergy. In 1900 the non-Catholic population numbered 24,245. The Church is under an archbishop (resident in Sucre) and 3 bishops. The maintenance of the Church costs the State about 200,000 bolivianos a year, 14,000 bolivianos being devoted to the propagation of the faith among the Indians. In 1911 a law was passed that all marriages must be celebrated by the civil authorities.

Primary instruction, free and nominally obligatory, is under the care of the municipalities. In 1912 (including industrial, parish, and private schools), there were 990 elementary schools with 3,960 teachers and 81,336 pupils. For secondary instruction there were 21 colleges, 5 clerical institutions, and 5 private lyceums with, in all, 180 teachers and 2,177 pupils. For superior instruction there are 19 establishments with 78 professors and 780 students. At Sucre and La Paz are the only two universities which possess more than one faculty; at both degrees may be obtained in law, medicine, and theology; at La Paz there is also a faculty of commerce. In some departmental capitals are schools of commerce and at La Paz the military college. At some places are rural schools for the natives, and in 1911 a normal college for training teachers of Indians was established at La Paz. A normal school for training teachers generally was established at Sucre in 1909, and has 60 students. In all the departmental capitals there are public libraries; at La Paz are 2 museums, at Oruro and Potosí are mineralogical museums. The State spent 2,4341 in 1912 for educational purposes.

The judicial power resides in the Supreme Court, in superior district courts, and in the courts of local justices. The Supreme Court sitting in the Capital of the Republic has 7 judges; the district courts (one in each department) have each 5 judges, except that in El Beni which has only one; the local tribunals have judges of instruction and parish alcaldes. Public justice is directed by an Attorney General and by district and local attorneys. The administration of justice is free.

### Finance.

The revenue of Bolivia is derived mainly from customs duties, spirit duties, tin and silver mining, rubber export, patents, and stamps. From

Jan 1, 1912 onward, a tax of 3 per cent is imposed on the liquidated profits of all mineral enterprises the gross value of whose 'production and exportation exceeds 5,000<sup>00</sup> yearly. The chief branches of expenditure are finance, war, and public works. The ordinary revenue and expenditure for 7 years were as follows (12½ bolivianos = 1£) —

—	Revenue	Expenditure	—	Revenue	Expenditure
	£	£		£	£
1908	832,400	985,180	1910	1,000,688	1,019,754
1907	1,086,670	1,167,80	1911	1,838,040	1,885,482
1908	1,274,080	1,829,400	1912	1,378,000	1,383,09
1909	1,004,000	1,811,370			

Until five years ago, Bolivia had no foreign debt. In December 1908, a loan of half a million sterling was negotiated in order to pay off some internal debts and to aid in the establishment of a gold standard, but this loan is now held by the Banco de la Unión Boliviana, which was established on January 1, 1911 with a capital of 1,275 000<sup>00</sup> 1 000,000<sup>00</sup> of which is to be subscribed by the Bolivian Government out of the loan of 1 500 000<sup>00</sup> which was made in France at the end of November 1910. The 1908 loan now amounts to 400 000<sup>00</sup>. There is also an amount of 35 159<sup>00</sup> issued in 3 per cent bonds and annuities decreed by the Joint Arbitration Tribunal of Brazil and Bolivia. Total debt charge (1912), 136 889<sup>00</sup>.

The total internal debt amounts (1911) to 4,910,796 bolivianos.

The departmental revenues for 1911 were estimated at 2,570,219 bolivianos. These revenues are mainly from territorial contribution by natives, land taxes, taxes on tobacco, hules, inheritances, imported and exported cattle, &c. The expenditure is chiefly on justice, police, public works, instruction, and worship. The municipal revenues amount to 224 000<sup>00</sup>.

## Defence

The law of February 5th, 1910, provides for a permanent force of 3,153 officers and men. Military service is compulsory for all males from the 20th to the 50th year.

The army is a militia, with a total service in the first line of 5 years, of which about 1 year is spent in the ranks. For the next 5 years (from age of 25 to that of 30) the Bolivian soldier belongs to the 'ordinary reserve'. After this the men pass to the 'extraordinary reserve' for 10 years, and finally complete their service by 10 years in the Territorial Guard.

The permanent formations are 6 infantry battalions of about 300 men each, 2 cavalry regiments totalling about 600 each, one field and two mountain batteries. But a considerable force of militia could be mobilised in event of war.

In addition to the above troops, there are small bodies of infantry, 40 to 80 strong (called *columnas*), at the chief towns of departments, which can be expanded to battalions, if necessary, also 2 squadrons which do duty in Gran Chaco.

The Bolivian infantry are armed with the Mauser rifle, model 1898. The material for 5 field batteries and 9 mountain batteries of 4 guns each has recently been obtained from Europe.

Military expenditure in 1912, 266,318<sup>00</sup>.

### Production and Industry

It is estimated that about 4,940,000 acres are under cultivation, but agriculture is in a backward condition. Irrigation by means of artesian wells is being attempted in some regions. Wheat, maize, barley, beans, potatoes, are produced mostly for local consumption, and coffee, coca, quina, &c., are exported to Chile and Argentina. Cocoa and coffee are grown on the slopes of La Paz and Cochabamba. Coffee and other products are grown in El Beni and Santa Cruz. Rubber is produced on 40,642 000 acres in the National Territories and in the Departments of El Beni and Santa Cruz, and parts of La Paz and Cochabamba. The quantity exported in 1911 was 3 645 metric tons, value 18,921 619 bolivianos. The public lands of the State have an area of about 246,000 square miles, of which 104,000 square miles are reserved for special colonisation.

The number of cattle was (1912), 734 266 sheep 1 499,114 horses, 98 846 mules, 44 584 asses 172 939, goats, 467 950 pigs, 114 148 llamas, 414,047 alpacas, 112 033 vicuñas 200 domestic fowls, 78,477

The mineral wealth of Bolivia includes silver copper tin, lead zinc, antimony bismuth, wolfram, gold, and borate of lime. Bolivia produces one quarter of the total tin output of the world, standing next to the Malay Peninsula in the production of this metal. In 1911 the tin exports amounted to 37,072 tons, bismuth, 414 tons, copper ingots, &c., 2 050 tons, silver ore, 127,000 kilograms; other metals, 12,648 tons, gold 55 kilograms. The chief silver mining company is the Huanchaca Company, which produces nearly all the silver obtained. Gold is found in small quantities throughout Bolivia, both in rivers and in quartz reefs, but its production is mainly limited to washings by Indians. The value of the tin and other minerals exported in 1911 was as follows (in bolivianos) — tin 52,639,608, copper, 1 426,953, silver, 4 587,746 bismuth, 2,106 162 various minerals wolfram antimony, borax &c. 2,854 619. Large deposits of common salt are found near Lake Poopó and in the South of Bolivia. In 1911 large tracts of land were taken up for the production of petroleum especially near Calacoto, on the Arica La Paz railway.

### Commerce

Bolivia having no seaport, imports and exports pass chiefly through Arica, Mollendo, Antofagasta, and the river ports of Suarez on the Paraguay, Montes on the Iténez, Villa Bella, on the Madeira, and Bahia on the Upper Acre. The Argentine route through Salta is now little used. The chief imports are provisions, hardware wines and spirits, cotton, woollen, linen and silk goods, and ready made clothes. The import trade is chiefly in the hands of Germans, but English goods are largely introduced. The chief exports are silver, tin and rubber. The value of imports and exports for four years are given as follows (12 5 bolivianos = 1 £ in 1909) —

	1906	1909	1910	1911
	£	£	£	£
Imports	2 854 865	2 954 961	3,904 187	4 089 717
Exports	2 770 624	3,647 680	5 042 771	5,610 428

The values of imports (dutyable and duty free) are determined according to the appraisement in force, those of exports, by declarations of the exporters, based on current prices at the place and time.

The principal imports are cottons, woollens, cattle, provisions, machinery and hardware, wines, spirits, clothing. In 1910 the exports consisted of

tin, 2,960,000*l*, in 1911 (6 months), 2,012,000*l*; silver, 420,000*l*, in 1911 (6 months), 225,700*l*; copper, 143,000*l*, in 1911 (6 months), 70,200*l*; bismuth, rubber, 2,260,000*l* (more than one third of the total exports), gold, cocoa, 35,000*l*, in 1911 (6 months) 26,400*l*. raw hides, 17,450*l*, in 1911 (6 months), 10,600*l*

The commerce (in order of value) is with United Kingdom, Germany, United States, Chile, France, Belgium, and Italy

Total trade between U K and Bolivia for 5 years —

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports from Bolivia to U K	167,625	78,200	1,346,466	1,484,819	1,586,877
Exports to Bolivia from U K	25,398	1,7405	202,904	289,614	325,818

In July 1912, a Commercial Treaty was ratified between Great Britain and Bolivia (Signed August, 1911)

### Communications

In 1912 the total length of line open in Bolivia was 778 miles, comprising 900 miles of the older railways, and the rest being operated provisionally by the contractors on new lines now being constructed. The principal line is the Antofagasta and Bolivia Railway, from Antofagasta, on the Pacific coast to Ollague, thence to Oruro thence to Viacha thence to La Paz (719 miles). Under the Bolivian-Chilian treaty of October 24, 1904 railway construction on a large scale is being undertaken. The Arica-La Paz line (208 miles, of which 186 miles are in Bolivia) is begun from La Paz via Lluta with Tacora and to Corocoro. It is expected that the proposed Pan American Railroad will follow the shore line of Lake Titicaca from Guayaquil to Viacha, and thence to the Argentine border by way of Uyuni, Tupiza, and La Quiaca, a total distance in Bolivia of 529 miles, of which 361 are already in operation.

Up to the end of October, 1911, 3,801,973*l* has been spent on the various lines in the course of construction. Length of lines being constructed, 418 miles. Length of lines projected, 1,169 miles.

Traffic on Lake Titicaca and on the Bolivian rivers is carried on by steamers, which belong to private owners.

There are about 2,804 miles of cart roads connecting the more important towns.

In Bolivia there are 200 post offices with 248 officials. In 1911, 6,486,572 pieces of postal matter were handled. The postal receipts amounted (1906) to 810,593 bolivianos and the expenses to 851,102.

In 1912 there were 2,500 miles of telegraph line, including private lines. All the departmental capitals are connected by telegraph. There is telegraph communication with foreign countries by the lines of the Central and South American Telegraph Company, the Southern railway telegraph lines of Peru, the West Coast of America Telegraph Company, and also by way of Tupiza and Buenos Aires. Despatches (1910) sent, 180,554, received, 360,058. Cost of administration, construction, &c., 351,270 bolivianos, deficit, 182,648 bolivianos.

A contract has been made between the Bolivian Government and Marconi's Wireless Telegraph Company for the establishment of wireless telegraph in Bolivia.

### Money, Weights, and Measures

In Bolivia there are (1910) 17 banks of issue, including the Banco de la Nación (State bank). These banks are allowed to issue 100 bolivianos notes for every 40 bolivianos gold in their reserve. The total available currency is (1910) as follows—Private banks—paper, 2,675,000*l*; gold, 1,080,000*l*. Banco de la Nación—paper, 4,625,000*l*; gold, 1,850,000*l*. Total—paper, 7,200,000*l*; gold, 2,880,000. There are 4 mortgage banks. The Bank of Chile and Germany, and the German Transatlantic Bank have branches in Bolivia.

On September 14 1906, a monetary law was passed providing for the adoption of a gold standard. The unit of account is the gold peso of one fifth of a pound sterling weighing 1.5976 grams, 916 fine, thus containing 1.464486 grams of fine gold. There are two gold coins struck—British and Peruvian pounds and half pounds—there is no Bolivian gold yet in circulation. Silver coins 800 fine all pieces of 50 and 20 centavos. Nickel coins, pieces of 10 and 5 centavos. Gold is legal tender to any amount and English and Peruvian gold coins of corresponding value have legal currency the rate of exchange being fixed at 12.5 bolivianos = 1*l*. Silver is legal tender up to 10 pesos, and nickel up to 1 peso. Silver and nickel coins are being minted. In 1909 silver coin to the value of 1,000,000 bolivianos (50 and 20 centavo pieces) were coined for Bolivia at Birmingham. There are also paper notes of 1, 5, 10, 20, 50 and 100 Bolivianos.

The metric system of weights and measures is used by the administration and prescribed by law, but the old Spanish system is also employed. The quintal is equal to 101½ lbs.

### Consular Representative

#### 1 OF BOLIVIA IN GREAT BRITAIN

*Envoy Extraordinary and Minister Plenipotentiary*—Col. Pedro Suarez.  
*First Secretary*—Dr. Alcides Arguedas.

#### 2 OF GREAT BRITAIN IN BOLIVIA

*Envoy Extraordinary and Minister Plenipotentiary*—Cecil W. G. Gosling.  
There are Consular representatives at La Paz, Oruro, Sucre, Santa Cruz, Uyuni and Cochabamba.

## BRAZIL

(ESTADOS UNIDOS DO BRAZIL)

### Constitution and Government

BRAZIL became a Portuguese settlement in 1500. On the French invasion of Portugal, in 1607 the Portuguese Royal family fled to Brazil. In 1813 the colony was declared 'a kingdom'. The Portuguese Court having returned to Europe in 1821 a national congress assembled at Rio de Janeiro and on May 13, 1822 Dom Pedro, eldest surviving son of King João VI of Portugal, was chosen 'Perpetual Defender' of Brazil. He proclaimed the independence of the country on September 7, 1822, and was chosen 'Constitutional Emperor and Perpetual Defender' on October 12 following. In 1831 he abdicated the crown in favour of his only son, Dom Pedro II who reigned as Emperor until November 15 1889 when by a revolution he was dethroned and he<sup>1</sup> and his family exiled, and Brazil declared a Republic under the title of the United States of Brazil.

According to the constitution adopted by the National Congress on 24 February, 1891, the Brazilian nation is constituted as the United States of Brazil. Each of the old Provinces forms a State, administered at its own expense without interference from the Federal Government save for defence for the maintenance of order, and for the execution of the Federal laws. Fiscal arrangements in such matters as import duties, stamps, rates of postage, and bank note circulation belong to the Union but export duties are the property of the various States.

The legislative authority is exercised by the National Congress with the sanction of the President of the Republic. Congress consists of the Chamber of Deputies and the Senate. It meets annually on the 3rd of May, without being convoked unless another day be fixed by law and sits four months, but may be prorogued or convoked extraordinarily. No member of Congress, after his election, can contract with the executive power or accept any commission or paid office, except such as a diplomatic or military or imposed by law. In ordinary circumstances, the acceptance of diplomatic or military office would cause the loss of the legislative services of a member the permission of the Chamber is required. Nor can any member of Congress take part in the administration of any company which receives a subsidy from the Federal Government. Deputies and Senators are paid, and neither can be Ministers of State, and retain at the same time their seats in Congress. Deputies must have been Brazilian citizens for four years. Senators must be over thirty five years of age and must have been citizens for six years.

The Chamber of Deputies consists of 212 members elected for three years by direct vote (providing for the representation of the minority), in a proportion not greater than one to every 70,000 of population as shown by a decennial census, but so that no State will have less than four representatives. It has the initiative in legislation relating to taxation.

<sup>1</sup> Dom Pedro born in 1825 died in 1891.

The following table shows the number of Deputies from the different States and from the Federal district —

	Deputies		Deputies		Deputies
Amapaz	4	Alagoas	6	Rio Grande do Sul	16
Pará	7	Sergipe	4	Minas Geraes	37
Maranhão	7	Bahia	22	Goyas	6
Piauí	4	Espírito Santo	4	Mato Grosso	4
Ceará	10	Rio de Janeiro	17	Federal District	10
Rio Grande do Norte	4	São Paulo	22		
Parahyba	5	Paraná	4	Total	212
Pernambuco	17	Santa Catharina	4		

Senators, 68 in number, are chosen by direct vote, three for each State, and for the Federal district, for nine years, and the Senate is renewed to the extent of one-third every three years. The Vice-President of the Republic is President of the Senate.

The executive authority is exercised by the President of the Republic. He must be a native of Brazil, over thirty five years of age. His term of office is four years, and he is not eligible for the succeeding term. The President and the Vice-President are elected by the people directly, by an absolute majority of votes. The election is held on the 1st of March in the last year of each presidential period in accordance with forms prescribed by law. No candidate must be related by blood or marriage, in the first or second degree, to the actual president or vice president, or to either who has ceased to be so within six months.

The President has the nomination and dismissal of ministers, supreme command of the army and navy, and, within certain limits, the power to declare war and make peace. He (with the consent of Congress) appoints the members of the Supreme Federal Tribunal and the diplomatic ministers. No minister can appear in Congress, but must communicate by letter, or in conference with commissions of the Chambers. Ministers are not responsible to Congress or the Tribunals for advice given to the President of the Republic.

The franchise extends to all citizens not under twenty-one years of age, duly enrolled, except beggars, 'illiterates,' soldiers actually serving, and members of monastic orders, &c., under vows of obedience.

*President of the Republic.*—Marshall Hermes da Fonseca, elected March 2, 1910. Assumed office November 15, 1910. Fourth term of office, (1910-1914).

There are 7 Secretaries of State at the head of the following Departments — 1. Finance, 2. Justice, Interior and Public Instruction, 3. War, 4. Marine, 5. Foreign Affairs, 6. Communications and Public Works, 7. Agriculture, Industry, and Commerce.

## I. LOCAL GOVERNMENT.

Each State must be organized under the republican form of government, and must have its administrative, legislative, and judicial authorities distinct and independent. The governors and members of the legislatures must be elective; the magistrates must not be elective nor removable from office save by judicial sanction. The Federal executive cannot intervene directly in the local government of the States. In case of obstinate infringement of the Federal Constitution by State authorities the only resource of the central power is an appeal to the Supreme Tribunal of Federal District. The Federal District is administered by a council elected by the citizens of the District, the municipal executive authority being exercised by a President appointed for five

# AREA AND POPULATION

669

years by the President of the Republic. There are in Brazil 3,161 municipalities and 2,161 parishes.

## Area and Population.

Following are the census returns of 1890 and of 1900 —

States	Area sq. miles.	Population		
		1890	1900	Per sq. mile 1900
Alagoas	22,538	511,440	642,249	28.7
Amazonas	732,439	147,915	249,756	0.3
Bahia	164,643	1,919,802	2,117,956	12.3
Ceará	40,247	806,687	849,127	21.1
Espírito Santo	17,312	185,997	209,788	12.1
Goyaz	288,536	227,572	255,284	0.9
Maranhão	177,541	490,854	459,508	2.8
Matto Grosso	532,633	92,827	118,525	0.2
Minas Geraes	221,951	3,184,099	3,594,471	16.2
Pará	448,903	328,455	445,856	1.0
Parahyba	26,854	457,232	490,734	17.0
Paraná	85,451	249,491	327,180	3.8
Pernambuco	49,578	1,030,224	1,178,150	23.7
Piauí	116,523	267,609	334,828	2.9
Rio de Janeiro	26,634	876,884	926,085	34.7
Rio Grande do Norte	22,195	268,273	274,317	12.3
Rio Grande do Sul	91,388	897,456	1,149,070	12.5
Santa Catharina	28,682	288,769	320,389	11.2
São Paulo	112,807	1,384,753	2,232,279	20.3
Sergipe	15,093	310,926	356,264	23.6
Federal District	588	522,651	780,951	1,359.2
Aggregate	3,218,991	14,338,915	17,818,556	5.4

In 1900 the population consisted of 8,825,636 males and 8,492,920 females.

In 1911 the population was estimated at 23,070,660, and the area 3,293,564 square miles.

The Acre Territory (not included in the census results) has an area of about 74,000 sq. miles, and a population of about 70,000. For this territory Brazil paid to Bolivia 2,000,000 in 1902, the revenue from the territory in 8 years, 1903-07, amounted to 2,118,401. In 1909 the Territory petitioned to be received into the Brazilian Union as a State.

The next census was fixed for June 30, 1911, but owing to lack of funds it was postponed. In 1911 the population of Rio de Janeiro was estimated at 1,123,637; in 1906, 811,365. São Paulo (1911), 450,000, of Bahia, 290,000, of Pernambuco, 130,000, of Belém, 300,000, of Porto Alegre, 100,000, of Minas, 50,000, of Riohoro, 35,000, of Santos, 35,000, of Ceará, 22,000, of Macaé, 26,000; Parahyba, 22,000. São Luiz, 22,000.

The number of immigrants into Brazil from 1880 to 1911 was 2,327,153. In 1911 there were 123,200 immigrants, as follows: Portuguese, 64,754; Spaniards, 27,007; Italians, 23,631; Russians (mostly Poles), 12,236; British, 4,326; Germans, 4,236; Americans, 2,337; French, 1,345; Swedes,

1,116 English, 1,045, and 5,852 of 32 other nationalities. These immigrants were classified as follows: 78,021 voluntary and 55,595 subsidized agriculturalists, 99,811, and of various other professions, 33,805.

A boundary treaty with Colombia was signed on April 24, 1907, and a boundary treaty with Peru was signed September 8, 1909.

### Religion

The connection between Church and State has been abolished, and absolute equality declared among all forms of religion. The Government left to the Church all religious buildings and their properties and income. The Catholic Church is perfectly free; religious orders are allowed and are prosperous. All but about 100,000 of the population are Catholics.

There is a Cardinal whose seat is at Rio de Janeiro and who acts as an Archbishop, an archbishop at Bahia, one at Rio de Janeiro, one at São Paulo, one at Pará, and one at Mariana (Minas). There are 25 suffragan bishops. For instruction of the clergy there are 11 seminaries.

### Instruction.

Education is not compulsory. The Republican Government undertakes to provide for higher or university instruction within the Union, leaving the provision of primary and training schools to the State Governments. There is in fact no university in Brazil, but there are 25 faculties which confer degrees. In Rio de Janeiro are also the military college, the preparatory school of tactics, and the naval school. At the Capital are maintained by the Federal Government a school for the blind and another for the deaf and dumb. The Federal Government maintains also a School of Arts and a National Institute of Music in the Capital, there being similar academies of music in the States of Maranhão, Pará, São Paulo, and several in the State of Rio de Janeiro. In Manaus, Bahia, and Curitiba there are schools of Fine Arts. There are besides 28 industrial schools, 11 agricultural and 9 commercial institutions for tuition. There are faculties of law at Recife, São Paulo, Ceará, Goiás, Pará, Bahia, Belo Horizonte, Porto Alegre, and Rio de Janeiro (2), faculties of medicine at Rio de Janeiro, Bahia, and Porto Alegre, colleges of pharmacy at Ouro Preto, Baur de Faria, and São Paulo, schools of odontology at Rio de Janeiro, Belo Horizonte, and also attached to the colleges of medicine and pharmacy, engineering colleges at Rio, Ouro Preto, Bahia, Recife, Porto Alegre, and São Paulo.

There existed in 1910 in the various States, 12,221 primary schools with 684,539 (352,418 boys and 282,121 girls) pupils and 8,064 teachers. Of the total number 6,918 are government schools, 2,608 municipal and 2,695 private. But on April 5, 1911, a decree was issued for the reform of the school system, a feature of which will be that a Board of Education will have entire control over all schools. There are also 327 secondary schools with 30,258 pupils. For teachers' diplomas there are 29 colleges in all Brazil, supported by the Union and 15 private. In recent years public instruction has made great progress.

### Justice and Crime

There is a supreme Federal court of Justice at Rio de Janeiro, and Federal judges in each State. Justice is administered in the States in accordance with State law by State courts, but in Rio de Janeiro Federal Justice is administered. Judges are appointed for life. There are also municipal magistrates and justices of the peace, who are elected for four years, and whose chief function is to settle cases up to a certain amount.

## Finance

Revenue and expenditure (gold milreis = 2s 3d, paper milreis = 1s 4d)

	Revenue		Expenditure	
	(Gold) £	(Paper) £	(Gold) £	(Paper) £
1908	18,100	1,076,616	1,886,000	23,419,910
1909	17,140	2,708,1	11,112,7	2,388,711
1910	11,741,0	19,064,5	4,201,5.5	2,088,47
1911	2,609,1	1,131,301	7,311,0	6,188,111
1912	17,481,078	1,284,301	11,141,101	31,097,13

The Budget for 1913 fixed the expenditure at 451,374,055 milreis paper and 80,861,909 milreis gold, and estimated the receipts at 125,792,996 milreis gold and 354,448,000 milreis paper. Expenditure, 37,855,128; receipts, 37,767,800.

The consolidated foreign debt of Brazil on December 31, 1911, amounted to 82,903,120/ and 800,000,000 francs, the internal paper debt, to 620,520,600 milreis. Paper money in circulation on March 31, 1912, 612,619,628 milreis.

The rate of interest on the Foreign Debt varies from 4 per cent to 5 per cent, that on the Internal Funded Debt from 4 per cent to 6 per cent, but this last has been to a large extent redeemed. The internal debt is chiefly represented by bonds called *Apólices* inscribed to the holder, and the payment of its capital and interest which is provided for by an annual vote of Congress, is under the charge of the sinking fund department (*Caixa da Amortização*), independent of the Government, directed by a committee, presided over by the Minister of Finance, and composed of a general inspector and five large Brazilian bondholders.

## State Finances

Each of the States of Brazil has its own receipts, expenditure and debt. The last available figures are those of 1907. For this see THE STATESMAN & YEAR BOOK 1912 p. 676.

On July 24, 1912 a bill was introduced into the Senate, making it necessary for the States to obtain the Federal authorization before contracting any loans.

## Defence

Under the military law of January 1908, military service is obligatory on every Brazilian from 21 years of age to 45. The terms of service are 2 years in the ranks, 7 in the reserve, 7 in the Territorial Army and 8 in the National Guard. The reservists are called up for training annually for 4 weeks, besides which there is rifle practice once a month. The men in the territorial army also have an annual training of 2 to 4 weeks. The army consists of 16 regiments of infantry each of 3 battalions, and 12 battalions of rifles, of 12 regiments of cavalry of 4 squadrons and 5 regiments of 2 squadrons, 5 regiments of field artillery of 9 batteries each with 4 guns, 5 howitzer batteries, 6 mountain batteries, 5 battalions of engineers and 8 battalions of garrison artillery. The country is divided into 13 territorial districts, each generally containing one rifle battalion. They also supply men for 5 "strategical" brigades and 3 cavalry brigades, all stationed in the south near the frontiers of the three southern republics. Each "strategical"

The distribution of the imports and exports in 1910 and 1911 was as follows —

From or to	Imports		Exports	
	1910	1911	1910	1911
	£	£	£	£
Germany	7,431,186	8,124,411	7,457,151	7,412,808
United States	6,160,783	7,107,280	22,436,818	23,146,257
France	4,453,761	4,671,583	6,248,317	6,144,110
Great Britain	13,431,137	17,048,408	13,698,125	13,427,373
Portugal	2,040,772	2,641,198	166,518	297,110
Austria Hungary	660,802	771,071	1,401,590	1,548,989
Belgium	2,131,019	2,202,708	1,172,326	1,556,669
Argentina	4,026,114	4,024,858	2,323,670	2,558,770
Uruguay	1,704,441	1,131,808	1,131,474	1,131,474

The chief articles of commerce between the United Kingdom and Brazil (Board of Trade statistics) in two years were —

Imports into U K from Brazil	1910	1911	Exports from U K to Brazil	1910	1911
	£	£		£	£
Cacao and inc	14,434,521	17,036,661	Cocoa and inc	1,344,390	1,442,316
Raw cotton	800,271	602,400	Cottons and yarn	174,207	1,919,301
Coffee	661,000	808,000	Machinery	1,045,768	1,261,677

Total trade between United Kingdom and Brazil for 5 years —

	1905	1906	1907	1908	1909
Imports from Brazil into U K	6,944,977	11,290,126	17,495,088	10,564,000	9,887,000
Exports to Brazil from U K	5,115,107	6,470,641	17,421,085	11,984,460	12,640,000

## Shipping and Navigation

In 1911 there entered the ports of Brazil 16,837 foreign steam vessels of 12,557,819 tons and cleared, 16,836 steam vessels of 22,572,498 tons. Of those entering 2,541 with a tonnage of 7,445,203 were British, 1,024 with a tonnage of 2,915,255 German and of those clearing 2,557 with a tonnage of 7,467,787 were British and 1,844 with a tonnage of 3,919,698 were German.

The merchant navy in 1911 consisted of 238 steamers of 130,582 tons net, and 290 sailing vessels of 60,728 tons net. All coasting and river vessels must be Brazilian. The Brazilian Lloyd for coasting trade maintains a monthly service between Rio de Janeiro and New York and has also inaugurated a service between Liverpool, Portugal and Brazil.

## Internal Communications

Brazil possessed on December 3, 1911, railways of a total length of 18,750 miles open for traffic, besides 2,460 miles in process of construction to link up the different State systems, and 3,123 miles for which plans have been approved. During the year 1911, 471 miles were added. About 1,878 miles of railway are owned and administered by the Government. The private

lines are being taken up by one or two large companies, the most important of which is the Brazil Railway Company. This controls a system which when complete, will join up the railways of Brazil with those of Uruguay, Argentina and Paraguay. On April 1 1911, the total length of this line was 3,102 miles, 238 miles are under construction and 1,540 miles are being planned.

The telegraph system of the country is under control of the Government. In 1911 there were 20,716 miles of line and 72,962 miles of wire. There were 2,043 telegraph offices. The number of messages was 2,835,970 (2,814,350 in 1910). Telegraph revenue 600,000 milreis gold and 6,500,000 paper, expenditure 14,343,930 paper and 828,888,940 gold.

The Post Office carried (1911) 198,514,000 letters, 12,475,000 postcards and 77,498 other postal packets. There were 3,246 post offices.

A wireless system is now in process of completion. Fifteen new stations were erected along the Amazon and Paraguay rivers and 5 on the coast.

### Money and Credit

The metallic money in circulation at the end of 1907 amounted to 114,600 milreis gold and 9,054,158 milreis silver. The amount of paper money in circulation is being gradually reduced. The amount in circulation on December 31, 1911 was 204,173,200 milreis. A law is to be proposed (1913) creating two new coins, one of gold value one pound sterling, and one of silver value about 10d. the gold piece to be exactly divisible by 25 of the silver ones. This will mean reducing the par standard from 27 pence to 16 pence. Under decree of December 30 1905 the Bank of Brazil was re-organized. It has a monopoly of the issue of gold cheques for payment of duties, preference given to it for the substitution of paper money by bank notes and after satisfactory liquidation of the old account it will have the right to issue interest bearing 'notes'. Its revenues for the year 1911 amounted to 11,867,570 milreis (741 171/2), and its reserve fund was 1,672,579 milreis. A decree was issued in November 1907, for the establishment of a Central Agricultural Bank with a capital of 20,000,000 milreis.

The value of the currency milreis fluctuates. In 1909 the average rate of exchange was 17 1/2d.

### Money, Weights, and Measures

#### MONEY

The *Milreis* of 1,000 *Reis* is of the par value of 2s. 2 93/4d. (practically 27d.). The Government was authorized in December 1905 to purchase bar silver for the coinage of 2, 1, and 1/2 milreis pieces .900 fine, weighing respectively 20, 10, and 5 grammes.

#### WEIGHTS AND MEASURES

The French metric system, which became compulsory in 1872, was adopted in 1882, and has been used since in all official departments. But the ancient measures are still partly employed. They are —

The <i>Libra</i>	=	1 012 lbs avoirdupois
„ <i>Arroba</i>	=	92 88 „ „
„ <i>Quintal</i>	=	129 54 „ „
„ <i>Alquiere</i> (of Rio)	=	1 imperial bushel
„ <i>Oitava</i>	=	55 84 grains

## Diplomatic and Consular Representatives

### 1 OF BRAZIL IN GREAT BRITAIN

*Envoy and Minister* — F. de Oliveira Lima

*1st Secretary* — Alberto Guerra Duval

*2nd Secretary* — A. da Silva Gordo

*2nd Secretary* — J. de P. Rodrigues Alves

*Military Attache* — Manoel S. de Oliveira

*Naval Attache* — Captain Cinadros

*Consul General in Liverpool* — J. C. da F. Pereira Pinto

*Consul General in London* — F. Alves Vieira

There are Consular representatives at Belfast, Birmingham, Bristol, Cardiff, Cork, Cowes, Dover, Dublin, Dundee, Edinburgh, Falmouth, Glasgow, Hull, Leith, Limonck, Manchester, Milfordhaven, Newcastle, Plymouth, Portsmouth, Southampton.

### 2 OF GREAT BRITAIN IN BRAZIL

*Envoy and Minister* — Sir W. H. D. Hagland, K.C.M.G., C.B., appointed 1906

*Secretaries* — A. Robertson and H. S. Birch

There are Consular representatives at Rio de Janeiro (C.G.), Bahia, Pará, Pernambuco, Rio Grande do Sul, Santos, Ceará, Maceio, Maranhão, Porto Alegre, Manaus, Parangaba and São Paulo.

## BULGARIA

## Reigning King

**Ferdinand**, youngest son of the late Prince Augustus of Saxe-Coburg and Gotha, and the late Princess Clémentine of Bourbon-Orléans (daughter of King Louis Philippe), born February 26, 1861, was elected Prince of Bulgaria by unanimous vote of the National Assembly July 7, 1887, assumed the government August 14, 1887 in succession to Prince Alexander, who had abdicated September 7, 1886. His election was confirmed by the Porte and the Great Powers in March, 1896. Married (1) April 20, 1893, to Marie Louise (died January 31, 1899) eldest daughter of Duke Robert of Parma issue Boris, born January 30, 1894, Cyril, born November 17, 1895. Eudoxia, born January 17, 1898. Nadejda, born January 30, 1899. (2) On February 28, 1908, to Princess Eleonore of Reuss-Kostritz.

The Prince must reside permanently in the Principality. The princely title is hereditary. In May 1893, the Grand Sublime confirmed the title of 'Royal Highness' to the Prince and his heir and this style was recognised by the Porte and by Russia in April 1896. On July 10, 1911, the Grand Sublime confirmed the title of 'King'. According to the Constitution the Sovereign must profess the Orthodox religion, excepting the case of the present King.

The civil list is fixed at 1,250,000 leva (francs) besides 430,000 leva for the maintenance of palaces &c.

## Constitution and Government

The Principality of Bulgaria was created by the Treaty of Berlin signed July 13, 1878. It was ordered by the Treaty that Bulgaria should be constituted an autonomous and tributary Principality under the suzerainty of His Imperial Majesty the Sultan with a Christian Government and a national militia. The Prince of Bulgaria should be freely elected by the population and confirmed by the Sublime Porte with the consent of the Powers, but no member of any of the reigning Houses of the Great European Powers should be elected. On October 5, 1908, Bulgaria declared her independence. The difficulty as to compensation to the Turkish Government in respect of railway claims has been arranged by an understanding between the Turkish Government and the Oriental Railways Company and the Powers have recognised Bulgarian independence, and the title of 'King of the Bulgarians' assumed by Prince Ferdinand.

Eastern Rumelia (since its union with Bulgaria also known as Southern Bulgaria) was created by the Treaty of Berlin, signed July 13, 1878. It was to remain under the direct political and military authority of the Sultan under conditions of administrative autonomy with a Governor General nominated by the Porte. On September 18, 1885, the Government was overthrown by a revolution, and the union of the province with Bulgaria proclaimed. As the result of the Conference held at Constantinople by the representatives of the signatory Powers of the Berlin Treaty during the latter months of 1885, the Sultan, by Imperial Firman, April 6, 1886 agreed that the government of Eastern Rumelia should be confided to the Prince of Bulgaria as Governor General, the Musulman districts of Kirjali and the Rupchus (Rhodope) being re-ceded to the Porte. The rectification of the Organic Statute—chiefly as concerned the questions of the tribute and the customs—was undertaken by a Turco-Bulgarian commission sitting at Sofia, but its labours were abruptly brought to a close by the events which overthrew Prince Alexander on the night of August 20, 1886. The province for all purposes forms part of Bulgaria. It is under the administration at Sofia, which is now the only recognised capital, Philippopolis being merely the seat of a prefecture.

By the Constitution of 1879, amended May, 1893, and June, 1911, the

legislative authority was vested in a single Chamber, called the *Sobranje* or *National Assembly*. The members of it are elected by universal manhood suffrage at the rate of one member to every 20,000 of the population. Those residing in the city where the National Assembly meets receive 15 leva (12s) a day (including Sundays and holidays) during session, others, 20 leva (16s) a day with travelling expenses. All over 30 years of age who can read and write (except the clergy, soldiers on active service, persons deprived of civil rights &c) are eligible as representatives. The duration of the Assembly is four years, but it may be dissolved at any time by the King, when new elections must take place within two months. Laws passed by the *Sobranje* require the assent of the King. Questions concerning the acquisition or cession of territory, changes in the constitution, a vacancy on the throne, or the appointment of a regent have to be decided by a Grand *Sobranje*, elected for the special purpose in a manner similar to that in which the ordinary *Sobranje* is elected, but with double the number of members. For the Fifth National Assembly (1911) 1 043 048 electors were entitled to vote but only 556,792 actually voted.

*Sobranje* (elected September 19, 1911) 190 Nationalists 5 Agrarians 7 Liberals, 6 National Liberals 1 Young Liberal, 6 Democrats

The executive power is vested in a Council of eight Ministers nominated by the King—namely 1 Minister for Foreign Affairs and Public Worship 2 Minister of the Interior and of Public Health 3 Minister of Public Instruction, 4 Minister of Finance 5 Minister of Justice 6 Minister of War 7 Minister for Commerce and Industry, 8 Minister of Agriculture 9 Minister of Public Works, Ways and Communications, 10 Minister of Railways, Posts and Telegraphs.

### Area and Population

The estimated area of Bulgaria is 33,647 English square miles. By a census taken on December 31 1910, the population of the whole kingdom was ascertained to be 4 337 516 (2 206,491 males and 2 130,825 females) as against 4 035,575 (2 057,092 males and 1 978 483 females). Bulgaria is divided into 12 districts (including the 8 districts of Eastern Rumelia)

Area and population of districts according to census of December 31, 1910 —

		Area	Popula- tion			Area	Popula- tion
		sq miles				sq miles	
1	Bourgas	6 409	311 508	8	Rousse (Rus chuk)	2 145	406 809
2	Varna	2 354	329 114	9	Sofia	1 852	451 98
3	Vidin	8 226	237 571	10	St. Zagora	6 540	441 989
4	Vratsa	173	31 440	11	Tyрноvo	2 471	444 167
5	Kustendil	84	73 122	12	Choumen	2 691	222 601
6	Plough (Philippopolis)	3 238	447 308	Total		38 647	4 337 16
7	Pleven	1,801	361 948				

The population, divided according to nationality, was as follows in 1910 3,203,810 Bulgarians, 488 010 Turks, 75 773 Rumanians 63,487 Greeks 98,004 Gipsies, 37,663 Jews, 3 863 Germans, 3 275 Russians and 61,690 of other nationalities. The present capital of the Principality is the city of Sofia, with a population (census, 1910) of 102,812. The other principal towns, with population in 1910, are Philippopolis 47,981, Rustchuk, 36,255 Varna, 41,419, Shumla, 22,225, Silivro (Shiven), 50 598, Pleвна (Pleven), 28,049

1 See note under Area and Population of Turkey

The census returns of 1905 referring to callings (issued in 1912) shows the following distribution of the population—Agriculture, 3,109,270 (1,552,240 men and 1,557,030 women), mining 2,064 (1,948 men and 716 women), industry 358,846 (200,775 men and 158,071 women), transport workers, 64,408 (34,170 men and 30,238 women), commerce, 165,806 (82,390 men and 73,416 women) public defence, 49,336, public service, 48,596 (26,767 men and 21,829 women), liberal professions, 78,566 (39,985 men and 38,581 women) Total 1905, 4,035,575—2,057,092 men and 1,978,483 women

The movement of population in the principality in five years has been —

Years	Marriages	Living births	Still births	Deaths	Surplus of births
1907	40,542	181,138	1,000	93,111	87,548
1908	37,016	170,748	939	100,000	17,400
1909	38,771	172,583	1,544	113,904	19,771
1910	—	—	—	—	—
1911	41,508	1,000	—	74,800	—

### Religion and Instruction

The national faith is that of the Orthodox Greek Church, though, in 1870, in consequence of its demand for and acceptance of religious autonomy, the Bulgarian Church was declared by the Patriarch of Constantinople to be outside the Orthodox communion. The church is governed by the Synod of Bishops. There are 11 Eparchies or Bishoprics. The clergy, both Orthodox and of other religious bodies are paid by the State and also receive fees for services at funerals, marriages &c. Of the population in 1905, 3,345,519 belonged to the Orthodox Church 603,867 were Mahomedans, 37,656 were Jews, 29,684 were Catholics, 12,622 Gregorian Armenians, 5,644 Protestants. The Mahomedans are mostly in the northern and eastern provinces.

There is a university at Sofia, with three faculties—History and Philology, Physics and Mathematics, and Law. In 1908-09 it was attended by 1,569 students, of whom 217 were women, and there were 58 professors and lecturers.

In 1909-1910 the Bulgarian and other secondary schools were as shown in the following table. The non-Bulgarian schools were Turkish, Greek, Jewish, Armenian, American, French and German —

Description of Schools	Schools	Teachers		Pupils	
		Male	Female	Male	Female
Gymnasias	27	1941	—	1,992	2,807
Lower Middle Class	262	1,908	468	33,058	15,141
Special Technical and Other Schools	10	—	—	4,749	4,744

In 1909-10 there were 3,786 elementary schools with 8,697 teachers and 430,011 pupils (262,394 boys and 167,717 girls).

For education the State grants a yearly subvention which provides for half the cost (two-thirds in the case of the elementary schools), the remainder being provided in towns by the municipalities and in villages by the communal authorities. Education is free and nominally obligatory for a period of four years (8-12). The richer parents are, however, required to pay 20 leva (16s.) a year for each of their children attending the higher schools. There are free public libraries at Sofia, Philippopolis, Varna, and Rustchuk.

### Finance.

The estimated revenue and expenditure of Bulgaria for 5 years were as follows (25 leva = £1) —

	1908	1909	1910	1911	1912
Revenue	£ 843,430	£ 1,087,400	£ 884,940	£ 1,187,811	£ 7,610,120
Expenditure	£ 805,480	£ 1,151,190	£ 888,160	£ 1,110,616	£ 7,677,041

For 1912 the chief sources of revenue are direct taxes, 1,593,640*l*; indirect taxes 2,743,600*l*. The chief branches of expenditure were Public Debt 1,605,880*l*; War 1,620,000*l*; Interior, 441,280*l*; Instruction, 998,640*l*; Finance 343,000*l*; Public Works (including railways, posts and telegraphs), 1,360,120*l*.

Debt in 1911, 24,407,976*l* as follows — 6 per cent loan of 1892, 3,470,700*l*; 5 per cent loan of 1902, 4,064,200*l*; 5 per cent loan of 1904, 3,884,700*l*; 4½ per cent loan of 1907, 5,733,400*l*; 4½ per cent loan of 1909 (to the Russian Government) 3,271,976*l*; 4½ per cent loan of 1909, 3,978,000*l*.

### Defence

Service is universal and compulsory. Mahomedans are exempted, but like all others exempted, pay a tax. Service in the ranks commences at the age of 20 and is now for 2 years in the infantry and for 3 years in the other arms. Reserve service is for 18 years in the infantry and 16 years in the other arms. The reservists are liable to be called out for 3 weeks training annually.

After completion of his reserve service, the Bulgarian soldier passes to the Opolchenie (Territorial Army), serving in the first ban for 4 years (infantry), or 5 years (all other arms). Finally the men of all arms pass for 2 years to the second ban, thus completing a total service of 26 years.

The Bulgarian infantry is organised in 36 regiments of 2 battalions, each of 4 companies, and the artillery in 9 regiments of 2 divisions each of 3 batteries of 4 guns, 12 mountain batteries, and 3 battalions of fortress artillery. Every infantry regiment has also a *uzhka* company, which permits of a company being constantly detached to the frontier. These companies are relieved half yearly. While on frontier duty they receive no recruits. On mobilisation each infantry regiment expands to four battalions, and each artillery regiment forms a third division of 3 batteries. Further from the large number of reservists of each regiment is formed a reserve regiment of 4 battalions, and a depot battalion.

There is one guard cavalry regiment of 3 squadrons, 4 line regiments of 4 squadrons and 6 of 3 squadrons. On mobilisation all regiments are raised to 4 squadrons and a depot squadron. There further are 3 battalions of pioneers, 1 railway battalion, 1 pontoon battalion, 1 telegraph battalion, etc.

The Opolchenie forms on mobilisation 36 battalions of the first ban, and 36 half battalions of the second ban.

The reservists not required to complete the field units join the depots and are available to make good the waste of war.

Bulgaria is divided into 9 military districts, each of which supplies a complete division to the field army, besides a portion of the independent cavalry, fortress artillery and engineers, mountain artillery, etc. The

strength of the divisions in peace (8 battalions, 6 batteries, etc.) is small, but in war, besides the expansion above mentioned, a third (reserve) brigade is added, raising each division to 24 battalions, 3 squadrons, 9 batteries, a battalion of pioneers, &c., to a total strength, including divisional troops, of 23,500 men.

The peace strength of the Bulgarian army is about 3,900 officers and 56,000 all other ranks but the field army consisting of 9 divisions and 1 cavalry division, with the remainder of the reserve troops (available for the communications) and the mountain and howitzer artillery regiments should amount to about 235,000 combatants.

The Bulgarian infantry is armed with the Mannlicher magazine rifle, calibre 315. Cavalry have the Mannlicher carbine. The field gun is the Schneider Q F gun of 7.5 cm calibre. The mountain batteries are armed with the light Krup 7.5 cm Q F guns.

### Production and Industry

The State is theoretically the owner of the land; the land holder has a perpetual lease descending to heirs, and pays one tenth of the produce by way of rent (paid still, to a great extent, in kind). The communes hold pasture land and wood land in perpetuity and pay no rent and over such lands the members of the communes have grazing and wood cutting rights.

About five-sevenths of the population are engaged in agriculture, most of them being small proprietors holding from one to six acres. The total area of Bulgaria comprises 9,570,450 hectares of which in 1911, 3,927,571 hectares is cultivated and 3,041,824 hectares is under woods and forests. About 2,506,137 hectares is under cereals, 7,789 under tobacco, and 79,406 under vines. The principal agricultural product is wheat, of which there was a yield of 17,170,164 cwt. in 1909, 22,626,986 cwt. in 1910 and 23,563,167 cwt. in 1911. The yield of rye was 7,381,778 cwt. in 1911, oats, 5,840,078 cwt., barley, 8,708,935 cwt., maize 28,881,121 cwt. The total yield of cereals of all kinds in 1910 was 2,688,127 tons, in 1909, 2,010,000 tons valued at 18,764,000/. Wine, tobacco and silk are also produced, and of roses is largely manufactured. Cotton and rice are grown. In 1912, 1,120,500 hectares (1,118,409 in 1911) was estimated area under wheat cultivation, with an expected yield of 17,350,000 quintals (19,596,000 in 1911), rye, 215,000 hectares (220,721 in 1911) yielding 3,150,000 quintals (3,751,176 in 1911), barley, 260,000 hectares (251,178 in 1911), yielding 4,000,000 quintals (4,425,523 in 1911), oats 160,000 hectares (180,797 in 1911) yielding 1,750,000 quintals (2,967,735 in 1911), maize, 650,000 hectares (631,935 in 1911), yielding 14,000,000 quintals (7,770,240 in 1911), rice, 3,000 hectares (2,319 in 1911), yielding 30,000 quintals (30,238 in 1911), sugar beet, 3,000 hectares (2,967 in 1911) yielding 450,000 quintals (620,000 in 1911), tobacco, 10,600 hectares (12,123 in 1911), yielding 80,000 quintals (106,472 in 1911). In 1905 there were in Bulgaria 8,081,816 sheep, 1,370,201 goats, 2,167,275 head of cattle, and 463,241 pigs, 536,618 horses, 124,216 asses, and 11,628 mules.

All minerals belong by law to the State. Besides the coal mines at Pernik worked by the Government, coal of good quality has also been found in Balkans near Trevna, and several working concessions have been granted. About 1,000,000 cubic metres of stone are quarried annually. Iron is found in large quantities, gold, silver, lead, manganese and copper also exist in the country. The chief manufactures are woollen goods, cottons, cord, and cigarettes.

# Commerce

## Imports and exports —

	1903	1907	1908	1909	1910	1911
	£	£	£	£	£	£
Imports	4,333,970	4,387,000	206,025	6,417,180	1,008,260	7,824,000
Exports	4,482,000	5,026,000	4,404,250	4,457,347	5,164,068	7,886,800

The following table shows the trade by countries for 1911 —

Country	Imports	Country	Exports
	£		£
U Kingdom	1,199,000	U Kingdom	409,000
Austria Hungary	1,886,000	Austria Hungary	478,000
Belgium	202,000	Belgium	2,161,000
Germany	1,640,000	France	446,000
France	987,000	Germany	916,000
Italy	365,000	Turkey	1,108,000
Turkey	639,000	Greece	508,000
Other countries	1,027,000	Other countries	80,000
Total	7,404,000	Total	7,380,000

The chief imports in 1910 were coal, 132,389; iron, 931,040; building timber 270,720; machinery implements &c 791,078; cottons, 1,976,310; hides skins, leather, &c, 967,500. The chief articles of export were wheat 1,505,610; maize, 589,648; live stock, 292,978; silk cocoons 144,934; hides skins, &c, 154,298; attar of roses, 231,718. Other exports are fruit, timber, and tobacco.

A commercial Convention specifying maximum rates of duties leviable on British imports into Bulgaria fixing the dues leviable on merchandise &c. landed at Bulgarian ports and providing for the most favoured nation treatment between Bulgaria and Great Britain was signed at Sofia on December 9 1900.

Total trade between United Kingdom and Bulgaria for 5 years —

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports from Bulgaria into U K	806,024	63,093	118,040	129,66	317,061
Exports to Bulgaria from U K	564,400	656,618	856,734	707,092	940,998

## Shipping and Communications

The number of vessels entered at the ports of Bulgaria in 1910 was 16,930 of 3,895,880 tons, and 18,898 of 3,891,863 cleared. The chief ports are Varna and Bourgas on the Black Sea, and Rustchuk, Sistor, Vidin on the Danube.

In 1911, Bulgaria (including Eastern Rumelia) had 1,200 miles of railway open, and 187 miles under construction. Railways connect Sofia with the general European system. There were, in 1910, 3,679 miles of State telegraph lines with 6,711 miles of wire and 350 telegraph offices, the messages in 1910 were 1,966,358. There were, in 1910, 27 telephonic systems with 177 miles of line. There were 2,203 post offices, and the number of letters, newspapers, &c, carried in 1910 was 61,960,916.

### Money and Credit.

There is a National Bank of Bulgaria, with headquarters at Sofia and branches at Philippopolis, Rustchuk, Varna, Burgas, Turnovo and 59 agencies in the different towns of Bulgaria, its capital is 10,000,000 leva, provided by the State with a reserve fund of, 1911, 7 923,671, and it has authority to issue both gold notes and silver notes. The latter were issued for the first time in December, 1899, in September 1911, the note issue amounted to 94,512,000 gold, and 28,600,000 silver. Three foreign banks one German (Banque de Crédit, capital 3,000,000 frs.), one Austro Hungarian (Banque Balkanique, capital 4 000,000 frs.), and the other French (Banque Générale de Bulgarie capital 2,000,000 frs.) have been founded, having their headquarters at Sofia and branches at Varna, Philippopolis, Rustchuk, and Burgas. There are 120 agricultural banks for making advances on personal security, with an aggregate capital of 42,845,403 leva on December 31, 1910, and power to borrow from the National Bank. There are a few Bulgarian gold coins, of the value of 100, 20, and 10 leva (frances), but the gold circulation is supplied by foreign 10 and 20 franc pieces. There are silver coins of  $\frac{1}{2}$  lev and 1 lev, 2, and 5 leva (frances) nickel coins of 2 $\frac{1}{2}$ , 5, 10 and 20 stotinki (centimes), the notes of the National Bank circulate at par.

*Minister in London* — M. Michel Madjaroff (February, 1912)

*Chargé d'Affaires* — M. Constantin C. Mincoff

*Minister Plenipotentiary and Envoy Extraordinary, and Consul General* — Sir Henry G. O. Bax Ironside K C M G

*Secretaries* — W. O'Reilly and E. Overy M V O

*Military Attaché* — Lt Col F. Lyon, D S O

*Vice Consul* — W. B. Heard

*Hon. Attaché* — K. E. Digby

There are Vice-Consuls at Philippopolis and Varna, and Consular Agents at Burgas and Rustchuk.

## CHILE

(REPÚBLICA DE CHILE)

### Constitution and Government.

THE Republic of Chile threw off allegiance to the Crown of Spain by the declaration of independence of September 18 1810 finally freeing itself from Spanish rule in 1818. The Constitution voted by the representatives of the nation on May 25, 1833 with a few subsequent amendments, establishes three powers in the State—the legislative, the executive, and the judicial. The legislative power is vested in the National Congress consisting of the Senate and the Chamber of Deputies. The Senate is composed of 37 members popularly elected by provinces for the term of six years in the proportion of one Senator for every three Deputies while the Chamber of Deputies composed of 118 members chosen directly by departments for a period of three years consists of one representative for every 5000 of the population, or a fraction not less than 15,000, the present number of deputies was determined in 1910 on the basis of the census results of 1905. Both bodies are chosen by the same electors. Electors must be 21 years of age, and able to read and write. The executive is exercised by the President of the Republic elected for a term of five years, by indirect vote, the people nominating by ballot, delegates who appoint the President. A retiring President is not reeligible. In legislation the President has a modified veto a bill returned to the chambers with the President's objections may, by a two thirds vote of the members present (a majority of the members being present), be sustained and become law. The day of a Presidential election is June 25 of the last of the five years of a Presidency, and the inauguration takes place on September 18 of the same year.

*President of the Republic*—Señor Dr. Ivonne Barros Lino, assumed office December 28 1910.

The salary of the President is fixed at 1,8841, with 9231 for expenses.

The President is assisted in his executive functions by a Council of State of five members nominated by the President and six members chosen by the Congress, and a Cabinet or Ministry divided into six departments viz, Interior, Foreign Affairs, Justice and Public Instruction Finance, Defence Industry and Public Works.

### LOCAL GOVERNMENT

For the purposes of local government the Republic is divided into Provinces, presided over by *Intendentes*, and the Provinces into Departments, with *Gobernadores* as chief officers. The Departments constitute one or more municipal districts each with a council or municipality of 9 members, inhabitants popularly elected for three years. The police of Santiago and

of the capitals of departments is organised and regulated by the President of the Republic at the charge of the national treasury

### Area and Population

The Republic is divided into 23 provinces, subdivided into 78 departments, and 1 territory. Departments and territories are subdivided into 865 sub-delegations and 3 068 districts.

In 1834 the provinces of Tarapaca and Tacna were ceded to Chile by Peru. The cession of Tacna was originally for ten years, at the end of which period a *plebiscite* of the province would decide to which country it should belong. The provinces, however, are still occupied by Chile.

Area and population of the provinces at the end of 1910 —

Provinces	Area Sq Miles	Popu- tion 1910	Pop per Sq Mile	Provinces	Area Sq Miles	Popu- tion 1910	Pop per sq Mile
Tacna	9 248	42,925	8.1	Valle	3 401	10 868	48.5
Tarapacá	18,125	116 940	6.1	Concepcion	3 500	230 664	66.7
Antofagasta	46 597	118,715	2.6	Arauco	2,446	62 769	25.5
Atacama	20 720	105 115	2.1	Biobío	5 245	100 485	18.7
Cochinbo	18,457	178 731	18.1	Mallico	2,973	113 920	36.8
Aconcagua	6,485	152,789	23.0	Cautin	580	161 935	29.1
Valparaíso	1 858	209 466	144.3	Valdivia	8 532	131 751	13.7
Santiago	6 663	468 990	61.4	Llanquihue	5,590	118 28	2.0
O Higgins	2 289	94 27	40.3	Chiloé	8 580	11 67	1.4
Colechagua	3 853	150 421	41.8	Magallanes			
Curico	2,978	108 100	36.0		14 174	23 600	0.2
Talca	2 689	157 790	33.9				
Linares	3 941	111 773	27.7				
Maule	2,474	115 368	44.6	Total	992 500	3 410 060	11.1

Many islands to the north, west, and south, belong to Chile. The coast line is about 2,485 miles in length.

In 1885 the population numbered 2,527,320, in 1895 2,712,140 in 1905 3,399,928. In 1907, 3 249,279 (1,624,221 males and 1,625 058 females).

The population of the principal towns in 1910 was — Santiago, 332,724, Valparaíso, 179,815, Concepcion, 55,554, Iquique, 44,171, Talca, 38,040, Chillan, 42,500, Antofagasta, 32,496, Viña del Mar, 26,262, Curico, 18 318, Temuco, 16,087, La Serena, 24,425, Talcahuano, 16,261, Valdivia, 17 681. The great majority of the population is of European origin. The indigenous inhabitants are of three branches the *Fuegians*, mostly nomadic, living in or near Tierra del Fuego, the *Araucans* (101,118) in the valleys or on the western slopes of the Andes, the *Changos*, who inhabit the northern coast region and work as labourers.

Births, marriages, and deaths, exclusive of still births —

Year	Births	Marriages	Deaths	Surplus of Births
1906	117,082	18,507	104,890	12,142
1907	126,104	21,286	96,534	29,570
1908	126,733	21,483	104,226	25,507
1909	129,333	19,637	104,707	24,626
1910	130,052	19 326	106,073	23 979

Immigration is small, but is encouraged by the Government. The number of immigrants in 1910 was 2,543 in 1911, 1,711. Colonies (agricultural settlements) are encouraged and their number and importance are increasing.

### Religion

The Roman Catholic religion is maintained by the State, but according to the Constitution all religions are respected and protected. There is one archbishop (Santiago), three bishops, and two vicars apostolic.

### Instruction

Education is gratuitous and at the cost of the State, but is not compulsory. Professional and secondary instruction is provided in the Universities (one belonging to the State, the other a Catholic university) and the National Institute of Santiago, and in the lycæums and colleges established in the capitals of provinces and in some departments. In the State University the branches included are theology, law, and political science, medicine and pharmacy, physical and mathematical sciences, philosophy, literature, and the fine arts. In 1911, in the 2 Universities there were 2,685 matriculated students studying law, mathematics, medicine, pharmacy, dentistry, and nursing. In the same year 41 *hijos* for boys and 36 for girls had 1,033 teachers and 20,329 matriculated students (12,062 males and 8,277 females). There are 15 normal schools with 262 teachers and 2,822 students besides one belonging to the Archbishopric with 74 students. There are many institutions for technical instruction. The Agricultural Institute has 94 students and there are 6 other schools for different agricultural subjects. There are mining schools at La Serena, Santiago and Copiapó. Ten commercial schools have 2,286 pupils. There are schools of industry of design, of electric work, of hygienic work, of mechanics, of modelling. Among the professional schools are 29 for girls with 286 teachers and 4,084 students. The Society for the Development of the Textile Industries maintains 11 schools with 902 pupils. There were in 1911, 2,896 public primary schools, with 375,274 pupils, an average attendance of 188,326, and 4,829 teachers. In addition the private schools receiving assistance from the Government had 36,577 scholars, and those receiving no assistance had 30,385 teachers. Other educational institutions are the Paedagogic Institute, the National Conservatory of Music, the National Observatory, School of Arts and Trades, Institute for Deaf Mutes, School for the Blind, and public museums. The National Library contains 135,494 volumes. The cost of maintaining the public primary schools in 1910 was 7,317,885 pesos. There are 254 newspapers and journals published in Chile, including 63 dailies and 113 weeklies.

### Justice, Crime, Pauperism

There are, in addition to a High Court of Justice in the capital, seven Courts of Appeal distributed over the Republic, tribunals of First Instance in the departmental capitals, and subordinate courts in the districts. In 1910, 548 children (448 boys and 105 girls) were sent to the 200 reformatory schools, 41,877 offenders (6,632 women) were sent to prison,

1,280 criminals were sent to houses of correction (*presidios*), and 234 men were sent to the 2 penitentiaries.

At 99 hospitals in Chile in 1910, there were admitted 96,550 patients, on December 31 there were 7 082 in hospital, at the imbecile asylum at the end of 1910 there were 2 593 patients

### Finance

The public revenue is mainly derived from nitrate duties, customs duties, the alcohol tax, the railways, post office &c, while the chief branches of expenditure are for the national debt and public works and salaries.

In recent years the revenue and expenditure (ordinary and extraordinary) in gold and in currency pesos was as follows (gold pesos = 18*d*) —

Years	Revenue		Expenditure	
	Gold	Currency	Gold	Currency
1908	65,230,892	160 428,470	39 102,517	198,311 780
1909	128,008,021	245 267,030	135 169,887	800,459,758
1910	82 764,423	132,975 645	60,677,704	234,143 253
1911	71 908,370	119 214,928	80 775,635	204,191,707
1912	101 050 000	139,200 000	71 358,878	281,128,726

Estimated expenditure for 1910 in pesos is 287,401,000 currency and 55,746 000 gold. The estimated income is 194,900,000 currency and 108,000 000 gold.

On June 1, 1912, the external debt amounted to 35,163,620*l*, equivalent to 338,781,600 gold pesos. The internal debt stood at 180,593,872 pesos paper, of which 150,366,403 represent issues of paper money

### Defence

The Chilean Army is a national militia in which all able bodied citizens are obliged to serve. Liability extends from the 18th to the 45th year inclusive. Recruits are called up in their 20th year, and are trained for one year. And they afterwards serve for 9 years in the reserve of the active army. After that they belong till completion of their 45th year to the second reserve. The latter is organised as a second line army.

Chile is divided into 4 zones, or military districts, each of which furnishes a complete division on mobilisation. There are 16 battalions of infantry, 8 regiments of cavalry, 4 batteries of horse artillery, 8 batteries of field artillery, 8 batteries of mountain artillery, 2 battalions of fortress artillery, and 4 battalions of engineers. The total strength of the active army is 18,000 officers and men.

The infantry are armed with the Chilean Mauser rifle (1895), calibre 7 mm, and the cavalry have a carbine of similar pattern. The field artillery are armed with Q F Krupp guns.

Military expenditure about 1,220,000*l*. The peace establishment for 1912 was fixed at 19,360 and 1,787 gendarmes.

The principal vessels of the Chilean fleet are as follows —

Name	Launched	Displacement, Tons	Extreme Armoring Inches	Main Armament	Torpedo Tubes	Indicated Horse Power	Nominal Speed
<i>Pre Dreadnoughts</i>							
Capitan Prat	1890	3,986	12	6 3/4 in 3 4/7 in	4	12,000	18.5
<i>Dreadnoughts</i>							
Valparaiso Almirante Cochrane	bidg 28,000		—	10 14-in 12 6 in	—	37,000	23
<i>Armored Cruisers</i>							
Esmeralda	1890	7,050	6	8 in 10 6 in	3	18,000	23.0
O Higgins	1896	8,000	7	4 8 in 10 6 in	3	16,000	17
<i>Protected Cruisers</i>							
Blanco Encalada	1898	4,420	—	2 8 in 10 6 in	5	14,500	22.0
Pres. Errazuriz	1890	4,080	—	4 6 in	3	5,400	19.6
Chacabuco	1894	4,300	—	2 5 in 10 4 7 in	5	16,000	24.0

There are also 3 torpedo gunboats, 13 destroyers, 5 modern torpedo boats, and 2 submarines. Also a mine ship, and a hospital ship. Total strength of navy, 6,084 officers and men.

### Agriculture and Industry

Agriculture and mining are the principal occupations. Chile produces annually large quantities of cereals, besides excellent wine, fruit, and vegetables. In 1910, 2,285,320 acres were under wheat and 129,970 acres under barley. The principal crops of the harvest 1911-12 were estimated as follows:—Wheat, 248,460 tons, potatoes 101,240 tons, barley, 26,281 tons, oats, 13,002 tons, maize (corn) 15,510 tons, beans 18,513 tons, peas, 8,743 tons, wine, 28,004,394 gallons, chuchas, 5,591,752 gallons, cordials, 4,794,980 gallons, spirits, 731,241 gallons. On December 31, 1912, the live stock of Chile comprised 415,000 horses and mules, 1,640,322 oxen, 3,587,788 sheep, and 159,000 pigs. Dairy farms and the production of butter and cheese are on the increase. In Patagonia and Tierra del Fuego large tracts of country are devoted to sheep farming. Extensive natural forests are found, the largest being found in the provinces of Valdivia (1,885,406 acres), Llanquihue (1,406,024 acres), and Chiloé (1,188,572 acres). The wealth of the country, however, consists chiefly in its minerals, especially in the northern provinces of Atacama and Tarapaca.

The number of work people employed in mineral workings in 1905 was 53,600, of whom 6,500 worked at coal mines, 15,500 at metalliciferous mines, 30,600 at nitrate of soda workings, and 1,000 at other works. In 1911, it was 73,180.

The metals obtained were gold, silver, copper, cobalt, and manganese, the non metallic substances being coal, nitrate, borate, salt, sulphur, and guano. In June, 1912, it was reported that iron ore deposits had been found in the province of Coquimbo, estimated at over 200,000,000 tons. The value of mineral output in 1909, was 19,583,913 $\frac{1}{2}$ , in 1910, 22,527,927 $\frac{1}{2}$ , in 1911, 24,880,000 $\frac{1}{2}$  (nitrate alone, 20,320,000 $\frac{1}{2}$ ).

The total exports of nitrate and of iodine in recent years are stated as follows —

Years	Nitrate	Iodine	Years	Nitrate	Iodine
	Metric tons	Metric tons		Metric tons	Metric tons
1900	1,668,771	64	1909	1,114,196	—
1907	1,400,623	99	1910	974,133	—
1908	1,831,111	930	1911	9,399,791	—

The more important of the industries of Chile (after the chemical and metallurgical) are those concerned with the manufacture or preparation of food substances, beverages (beer, wine, spirits), textiles, clothing, leather, wood work (including furniture and carriages of various sorts), pottery.

### Commerce

Imports and exports (including re-exports) (special trade, including bullion and specie) (1 peso = 18d) —

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports	2,074,140	2,044,410	1,950,211	2,311,427	2,175,000
Exports	2,074,140	2,074,410	2,843,587	3,711,000	4,000,000

The following table shows the principal imports and exports for 1911 (1 peso = 18d) —

Imports	Value	Exports	Value
	(old) pesos		(old) pesos
Cottons and Woollens	78,640,863	Minerals	294,411,411
Coal and other Minerals	68,111,111	Vegetable products	1,111,111
Oil &c	2,074,474	Industrial articles	1,111,111
Machinery	42,298,571	Animal products	88,947
Paper materials	11,104,902	Timber	118,148
Animal products	94,848,711	Live animals	42,111,111
Chemicals	4,444,444		

Foreign trade of Chile (in gold pesos each equal to 18d) —

Imports from	1910	1911	Exports to	1910	1911
Great Britain	94,063,702	111,777,869	Great Britain	127,057,288	14,013,102
Germany	2,044,029	89,318,452	Germany	68,408,224	71,894,104
United States	5,620,794	43,221,838	United States	67,618,844	73,404,980
Argentina	1,007,002	21,410,848	France	14,948,724	16,008,861
Peru	14,920,519	20,848,781	Belgium	9,420,514	9,681,811
France	19,208,021	18,990,996	Netherlands	6,714,057	6,424,811
Belgium	6,758,268	10,667,006	Spain	5,404,771	6,111,870
Italy	8,848,432	8,681,839	Argentina	2,878,856	8,384,000
India	11,008,906	6,104,645	Peru	2,057,200	1,074,477
Australia	7,468,658	6,056,340	Italy	1,914,817	978,871

The foreign trade is distributed over about 15 ports, the principal of which are Iquique, Valparaíso, Pisagua, Coquimbo, Coronel, Talcahuano, Chilo, and Antofagasta.

The chief imports into, and domestic exports from the United Kingdom (Board of Trade Returns) from and to Chile in two years, were as follows (but of the metal imports here given large quantities are really from Bolivia) —

Imports	1910	1911	Exports	1910	1911
	£	£		£	£
Nitrate	1 112 011	1 177 225	Cottons	1 891 441	1 400 688
Copper	4 618	4 401 152	Woolens	148 850	716 476
Copper ore	468 000	426 687	Ironwork	792 144	910 815
Tin ore	235 72	208 401	Coal	708 706	44 217
Wool	588 311	113 444	Machinery	382 177	689 445
			New ships	6 760	41 781

Total trade between Chile and United Kingdom for 5 years —

	1908	1909	1910	1911	1912
	£	£	£	£	£
Imports from Chile to U K	6,603 489	5 608 559	181 737	4 936 818	4 958 000
Exports to Chile from U K	1 866 440	4 632 025	471 568	6 159 419	6 165 000

### Shipping and Navigation

The commercial navy of Chile consisted, in 1911 of 84 steamers of 69,604 tons net and 91 sailing vessels of 52 918 tons net. The shipping entered and cleared at the ports of Chile in 1911 was as follows — Entered 14,698 vessels of 26,164,068 tons, cleared, 14 649 of 25,941,933 tons.

The Chilean 'South American Steamboat Company' with 12 steamers for general navigation and 7 for river navigation receives an annual subvention. The vessels of the company ply between South American Pacific ports, but do not now go to San Francisco in California. Other steamship lines on the coast are those of the Pacific Steam Navigation Company (British), with 43 steamers and the lines of 6 other British companies, the Kosmos Steamship Company (German), and the Roland line (German), the Italian Lloyd del Pacifico has begun a service between Genoa and Chilean ports.

### Communications

In 1910 there were in Chile 15,000 miles of public road, and 972 miles of navigable river.

In 1911 the total length of railway lines open for traffic was 3 952 English miles, of which 1,979 belonged to the State. Mileage under construction 1,828. Number of passengers carried (1911), 11 164,444. The trans-Andine railway has been completed by a line from Los Andes to the summit of the Cordillera joining one of the same range (1 metre) from Mendoza. The whole line was opened for traffic in April 1910. The Arica to La Paz railway was opened on Aug. 6, 1912. It has a length of 266 miles, of which 127 are in Chile and 139 in Bolivia. The cost was 2,450,000L.

The post-office in 1911 dispatched 73,393,296 postal packets, of which

4,494,895 were sent abroad. There were 1,104 post offices, besides letter boxes. Revenue (1911-12), 3,426,946 pesos gold, expenditure, 4,269,960 pesos gold.

The length of telegraph lines at the end of 1910 was 22,334 miles, of which 16,513 miles belonged to the State. In 1911 there were 887 telegraph offices, 2,225,000 messages were sent. The Telephone and railway companies have 8,000 miles of telephone lines.

There is also a wireless telegraphy system with 13 stations.

### Money and Credit

In 1912 a law was promulgated establishing a Bank of Issue (Caja de Emision). There are a number of joint stock banks of issue with agencies in Chile. Their joint capital amounted on September 30, 1911, to 183,199,628 pesos, and their reserve funds to 44,145,074 pesos. The largest of the banks is the Bank of Chile with a paid up capital of 30,000,000 pesos. The banks are required to guarantee their note issue by depositing gold, Government notes or securities in the Treasury. There are also land banks which issue scrip payable to bearer and bearing interest, and lend money secured as a first charge on landed property and repayable at fixed periods. Several savings banks are established in the large towns. The 19 principal ones contained on July 1, 1912, deposits to the amount of 2,108,868½. The public savings banks number 72 and on December 16, 1912, had 301,353 depositors.

The currency is mostly paper, the time fixed for the conversion of legal tender paper money has been deferred till January 1, 1916. Under the law which came into force on September 12, 1907, the President in 1907 issued 30,000,000 pesos in legal tender paper money. The paper peso in 1910 fluctuated between the value of 11½d and 10½d.

### Money, Weights, and Measures

According to the Act of 1895, the coinage of Chile is as follows.—Gold coins are 20, 10, 5 peso pieces, called respectively *Condor*, *Doblon*, and *Escudo*. The 10 peso gold piece weighs 5.90103 grammes 916 fine and heretofore contains 5.49178 grammes of fine gold. Silver coins are the peso, weighing 20 grammes, 400 fine, and the fifth, tenth, and twentieth of a peso. Bronze coins (95 of copper to 5 of nickel) are the *centavo* and 2½, 2-, and ½-centavo pieces. The monetary unit is the twentieth part of a condor or the (uncoined) gold peso, of the value of 1s. 8d. Its use is obligatory in transactions with the Customs Department of the Government, it serves, too, as the basis of perhaps the larger half of the trade in imported merchandise, though the actual gold coin is not in these cases usually tendered. A forced paper currency is in general use, the paper peso varying considerably in relative value, and representing (1913) about 10½d. The English sovereign has a legal value of 13½ pesos.

The metric system has been legally established in Chile since 1865, but the old Spanish weights and measures are still in use to some extent.

### Diplomatic and Consular Representatives

#### 1 OF CHILE IN GREAT BRITAIN

*Envoy and Minister*—Agnatín Edwards.

*First Secretary*.—Enrique Oyarza.

*Second Secretary*.—Ricardo Pepper.

*Military Attaché*—Lieut. Col. Alfredo Schonmeyer  
*Naval Attaché*—Lieut. Commander Alfredo Santander  
*Financial Attaché*—Luis Waddington  
*Attaché*—Julio Bittencourt  
*Consul in London*—Vicente Echeverría Larraín

There are Consular representatives at Belfast, Cardiff, Dublin, Edinburgh, Glasgow, Hull, Liverpool (C G), Nottingham, Queenstown, Sheffield Southampton and many other places

## 2 OF GREAT BRITAIN IN CHILE

*Envoy and Minister*—Vacant.  
*Secretary*—John C T Vaughan, M V O  
*British Consul General at Valparaíso*—E G B Maxse, C M G  
 There are Consular representatives at Coquimbo (C), Antofagasta (C), Arica (V C), Caldera, Coronel, Iquique (C), Lota, Junín (V C), Pisagua (V C) Punta Arenas (V C), Talcahuano (V C), Tocopilla, Tomé

## CHINA

(TA CHING KUO—CHUNG KUO)

## Government

Up to February 12, 1912, China was a Monarchy, on that day it became a Republic.

The Chinese Imperial family was of Manchu origin dating from 1644, and was styled *Ta Ch'ing Ch'ao* ('Great Pure Dynasty'). The last Emperor P'u yi, was the tenth of the line, but the official genealogy is carried back six generations earlier than the real founder and P'u yi's will be the sixteenth name in the canonized series of Ta Ch'ing Emperors. He was born on February 11 1906, succeeded his uncle the Emperor Tsai tien on November 14 1908, and abdicated on February 12, 1912. He retains the title of Manchu Emperor, but with his death the title will cease. For account of the Revolution of 1911, see *STATESMAN'S YEAR BOOK* for 1912, pp. 699-701.

In the abdication edict (published February 15 1912) the Emperor directed Yuan Shih K'ai to set up a Provisional Republican Government.

The Provisional Government is composed of a President, a Vice President, and a National Council, and the administration is carried on by the following Ministries:—(1) Foreign Affairs (*Wai Chiao Pu*) (2) Interior (3) Finance. (4) Education (5) War (6) Marine (7) Industry and Commerce. (8) Agriculture and Forestry (9) Posts and Communications, and (10) Justice. The affairs of Mongolia and Tibet, formerly under the control of the Ministry of the Colonies, are now under the 'Department for Mongolia and Tibet.'

*Provisional President of the Republic.*—Yuan Shih K'ai.

*Provisional Vice President.*—Li Yuan Hung (resides at Wuchang)

The Provisional President was elected on February 15, 1912, and on March 10 he took the oath of office. His tenure of the Presidency will continue until the meeting of the National Convention, i.e. the Upper and the Lower Houses sitting together. In September, 1912, laws were promulgated governing the elections. The final elections for the Lower House were to have taken place on January 10, 1913, and the Parliament to meet on April 8, 1913.

The Parliament consists of a Senate (the Upper House) and a House of Representatives (the Lower House). One member of the House of Representatives nominally represents 800,000 head of population, but pending the taking of a complete census the total number of members returned by the Provinces, including Mongolia and Tibet, is 596. The members of the Senate, elected by the Provincial Assemblies and various Electoral Colleges, number 274.

The Cabinet (*Kuo Wu Yuan*) is composed of the Premier, the heads of the various Ministries and the Chief of the General Staff. On August 1, 1912, Dr G. E. Morrison was appointed Political Adviser to the President of the Republic, and in March, 1913, Mr F. J. Goodnow Constitutional Adviser.

The following are the members of the Cabinet (January, 1913) —

*Premier* — Ping Chuu

*Minister of Foreign Affairs* — Luang Ju hao

*Minister of Finance* — Chou Hsueh hai

*Minister of Education* — Fan Yuan lien

*Minister of War* — Tuan Chi jun

*Minister of Justice* — Han Shuh ying

*Minister of the Interior* — Chao Ping chun

*Minister of Agriculture and Forestry* — Chen Chen huen.

*Minister of Industry and Commerce* — Liu Kuei yi

*Minister of Communications* — Chu Chi Chien

*Minister of Marine* — Liu Kuan hsiung

Considerable discussion as to the seat of Government has resulted in the retention of Peking as the capital for the time being. The Government has not yet been recognised by the Powers.

The Republic has adopted a new flag on which the old yellow dragon has been replaced by five stripes—crimson, yellow, white, blue and black—to denote the five races comprised in the Chinese people, Mongol, Chinese, Manchu, Mohammedan, and Tibetan.

#### LOCAL GOVERNMENT

Under the monarchy each of the 22 provinces was ruled by a Viceroy placed over one, two, or three provinces, or by a Governor over a single province, either under a Viceroy or depending directly on the central government. He was assisted by various other high officials, such as the Treasurer, the Judicial Commissioner, and the Commissioner of Education. In August, 1910 in addition a Commissioner for Foreign Affairs was appointed to each of the more important provinces, to rank immediately after the Treasurer—a step which marked the growing importance of foreign relations in Chinese eyes. Each province was sub-divided into prefectures ruled by prefects, and each prefecture into districts, each with a district magistrate. Two or more prefectures were united into a *tao* or circuit, the official at the head of which being called a *Taotai*. Each town and village had also its unofficial governing body of 'gentry'. An Edict of July 22, 1908, instituted Provincial Assemblies, and the first meetings were held on October 14, 1909.

The question of the system of Provincial Government to be adopted is the source of much irritation, the provinces demanding a degree of autonomy which the Central Government is not prepared to grant them. Actually each of the Provinces is under a *Tutu* or Military Governor, who controls only one province (unlike the Viceroys of the late régime). Most of the *Tutus* are upstarts of the Revolution, whose occupation of the position was formally recognised by the President in July 1912. In each of the provinces of Shansi, Hupei and Szechuan there is also a Civil Administrator, who ranks with the *Tutu*. The other high offices in the Provinces are for the time being in a state of utter confusion, but in most Provinces the following officials are found under one title or another: Civil Commissioner, Finance Commissioner, Judicial Commissioner, Commissioner of Education, Industrial Commissioner, and Commissioner for Foreign Affairs.

Regulations have been issued to the Provinces for the election by popular ballot of Provincial Assemblies to take the place of the old unrepresentative bodies, but there is great difficulty in enforcing them

### Area and Population

The following table gives a statement of the area and population of the whole of the Chinese Empire according to the latest Chinese estimates —

	Area	Population
	Eng sq miles	
China Proper	1 582 470	407,253 030
Dependencies—		
Manchuria	385 610	16 000 000
Mongolia	1 967 400	2 600 000
Tibet	483 200	6 500 000
Chinese Turkestan &c	1 063 340	1 200 000
<b>Total</b>	<b>4,277 170</b>	<b>483 553 030</b>

In 1904, Mr Rockhill the American Minister at Peking, after a careful inquiry came to the conclusion that the number of the inhabitants of China Proper at the present time is probably less than 270,000,000. The Chinese Imperial Customs in 1911 put the total population at 437 988,000. The figures in the following table are those issued by the Chinese Government as the results of an estimate made for the purpose of the apportionment of the indemnity to the Powers. In the last column the seat of the Viceroy or Governor is named under the heading of Capital —

Provinces	Area English square miles	Population	Pop per sq mi	Capitals
Chihli	116 500	20 087 000	172	Paoitingfu <sup>1</sup>
Shantung	35 070	33 247,900	683	Chi nan
Shensi	81,880	12 200,450	149	T'ai yuan
Honan	67 040	21,816 500	520	K'ai feng
Kiangnan	58,000	19 980,285	367	Soochow <sup>2</sup>
Anhui	54,810	23 670,314	437	Anch ing
Kiangsi	60 490	26,682,125	289	Nan-ch'ang
Chekiang	36,670	11 680,692	310	Haag-chow
Fukien	40,330	22,876,540	494	Fu-chou
Hupeh	71 410	35 230 685	492	Wu-chang (Hankow)
Hsenan	83 280	22,169 072	266	Ch'ang-sha
Shensi	75,270	5 450,182	111	Hsien

Szechwan	218 480	68 724,990	314	Ch'eng tu
Kwangtung	69 970	31 686 961	319	Canton
Kwangsi	77,200	8,142,330	47	Kuail in
Yunnan	67 180	7,650 282	114	Kwai-yang
Yunnan	148,680	12,534,374	84	Yunnan fu
<b>Total</b>	<b>1,582,470</b>	<b>407 253,030</b>	<b>256</b>	

<sup>1</sup> While Paoitingfu is the provincial capital, the Viceroy has since 1870 had his seat at Tientsin.

<sup>2</sup> Hankow is the capital of the Liang-shing Viceroyalty consisting of the Provinces of Kiangnan, Kiangsi, and Anhwei.

On February 27, 1911, the Chinese Government published the results of the second National Census as follows —

Enumeration group	Number of families	Approximate number of inhabitants <sup>1</sup>	Enumeration group	Number of families	Approximate number of inhabitants <sup>1</sup>
Peking	184,570	692,850	Kwangsi	3,489,878	17,199,865
Shantung	692,898	3,461,980	Hupei	4,682,583	24,662,685
Fongtien	799,836	3,999,180	Hunan	4,283,184	21,440,820

Chékiang	3,884,811	19,441,555			

<sup>1</sup> Calculating an average of 5 persons to each family

The Island of Formosa was ceded to Japan in accordance with the terms of the Treaty of Shimonoseki ratified and exchanged at Chéfoo on the 8th of May, 1895. The formal transfer of the Island was effected on the 2nd of June, 1895.

In November, 1897, the Germans seized the Port of Kiao Chan, on the east coast of Shantung, and in March, 1898, obtained from the Chinese a 99 years' lease of the town, harbour, and district. By agreement with the Chinese Government, dated March 27, 1898, Russia took possession of Port Arthur and Talienwan and their adjacent territories and waters, on lease for the term of 25 years, with option of extension by mutual agreement. In 1900, in consequence of the 'Boxer' uprising, Russia occupied Manchuria. Japan, after long and unsuccessful efforts to induce Russia to withdraw, broke off diplomatic relations, and on February 8, 1904 commenced hostilities. The war, in the course of which Japan proved victorious both on land and at sea, was brought to an end by the Treaty of Portsmouth signed September 5, 1905. Under this Treaty Russia and Japan agreed to evacuate Manchuria, except the territory affected by the lease of Kwantung (or the Liao tung Peninsula), where Japan succeeds to the leasehold and other rights of Russia. The exclusive administration of Manchuria (with the exception mentioned) was to be restored to China. By treaty of December 22, 1905, China leased to Japan the Liao tung Peninsula, conceded to Japan the control of the railways as far as Chang-chun (Kwanchengtze), and the right to construct a railway from Antung to Mukden, and agreed to open 16 Manchurian ports and cities to foreign commerce. In July, 1910, a convention was signed between Russia and Japan agreeing to co operate to maintain the "status quo" in Manchuria in accordance with the treaties and conventions already made. For such period as Russia should hold Port Arthur, Great Britain was, by agreement with China, April 2, 1898, to hold Wei Hai Wei, in the province of Shantung. For defensive purposes Great Britain has, in addition, obtained a 99 years' lease of territory on the mainland opposite the island of Hong Kong. The Chinese Government granted to the French in April, 1898, a 99 years

lease of the Bay of Kuang Chau Wan, on the coast of the peninsula, between Hong Kong and the Island of Hainan, and in November, 1899, the possession of the two islands commanding the entrance of the bay. This territory has been placed under the authority of the Governor General of French Indo China.

Peking, the capital of China, according to a census undertaken by the Minister of the Interior (1912) gives the total population as 1,800,000. Tientsin, from 750,000 to 900,000, Canton and Singan, each doubtfully credited with 1,000,000.

The Chinese population of the treaty ports is (1911) estimated as follows, mostly from Imperial maritime customs, partly from Consular returns —

Ports	Population	Ports	Population
Antung	181 000	Hangchow	850 000
Tatungku	5 000	Amoy	460 000
Niuchwang	61 000	Wenchau	100 000
Chiawangtao	5 000	Swatow	8,000
Tientsin	800 000	Poochau	624 000
Chefoo	54 000	Amoy	114 000
Kiauchau	34 000	Swatow	66 000
Chungking	698,000	Canton	900 000
Changsha	250 000	Kongmun	67 000
Yochau	70 000	Samsheu	6 000
Ichang	4 000	Kingchow	43 000
Shasi	90 000	Pakhoi	20 000
Hankau	820,000	Wuchau	59 000
Kiukiang	36 000	Nanning	37 000
Wuhu	125,000	Lungchow	13 000
Nanking	267 000	Mengtze	11 000
Chiakung	184 000	Sze-mao	15 000
Shanghai	651 000	Tengyueh	10 000
Szechau	500 000		

According to an estimate of the Imperial Customs authorities, in 1911 the total number of foreigners resident in China was 153,522, the nationalities most numerously represented being —

Japanese	78 206	American	8,470	French	1 925
Russian	51 221	Portuguese	8 224	Other nationalities	2 362
British	16 256	German	2,754		

### Religion.

Three religions are acknowledged by the Chinese as indigenous and adopted, viz. Confucianism, Buddhism, and Taoism.

The police authorities of Peking, about the end of 1908, made a census of the temples in Peking and of their inhabitants. The totals are as follows: Temples of all descriptions, 1 049, Buddhist priests, 1,553, Taoist, 133, Nuns, 102, Students (T'u ti), 924, Servants, 795, Lodgers in temples 15,445.

Under the monarchy the Emperor was considered the sole high priest of the Empire, and could alone, with his immediate representatives and ministers, perform the great religious ceremonies. No ecclesiastical hierarchy is maintained at the public expense, nor any priesthood attached to the Confucian religion. The Confucian is the State religion, if the respect paid to the memory of the great teacher can be called religion at all. But distinct and totally separate from the stated periodic observances of respect offered to the memory of Confucius as the Holy Man of old (who was deified by Imperial

decrees of December 30, 1906), and totally unconnected therewith, there is the distinct worship of Heaven (tien), in which the Emperor, as the 'sole high priest,' worshiped and sacrificed to 'Heaven' every year at the time of the winter solstice, at the Altar of Heaven, in Peking. With the exception of the practice of ancestral worship, which is everywhere observed throughout the Empire, and was fully commended by Confucius, Confucianism has little outward ceremonial. The study and contemplation and attempted performance of the moral precepts of the ancients constitute the duties of a Confucianist. Buddhism and Taoism present a very gorgeous and elaborate ritual in China, Taoism—originally a pure philosophy—having abjectly copied Buddhist ceremonial on the arrival of Buddhism 1,800 years ago. Probably all Chinese (not Mahometans or Christians) profess and practise all three religions. The bulk of the people, however, are Buddhist. There are probably about 30 million Mahometans, chiefly in the north west. Roman Catholicism has long had a footing in China, and is estimated to have about 1,000,000 adherents, with 32 vicariates apostolic besides those of Manchuria, Tibet, and Mongolia. Other Christian societies have stations in many parts of the country, the number of Protestant adherents being estimated at about 150,000. Most of the aboriginal hill tribes are still nature worshippers, and ethnically are distinct from the prevailing Mongoloid population.

### Instruction

For many centuries education of a purely Chinese type was general, and led through an intricate system of public examinations to all classes of employment under the State. Being confined in its scope to the study of Chinese classical literature, this form of education was gradually undermined by the influence of increasing intercourse with other countries, until it was completely swept away by an Imperial Decree of September 3, 1905, abolishing the historic system of examinations.

Since that date an enormous impetus has been given to the new educational movement: schools for the teaching of 'western learning' springing up in every town throughout large portions of the Empire.

The Imperial University at Peking is a Government institution, where the English, French, German, Japanese, and Russian languages, and law, mathematics, chemistry, physiology &c., are taught by European and Japanese professors (6 in 1910), the Chinese education of the pupils (200 in 1910) being entrusted to Chinese teachers (13 in 1910). By the energy of a British medical missionary, an important medical school was founded in Peking in 1906, for the training of Chinese medical students. The expenses of the foundation were met by public subscription among Chinese and foreigners. The Government has undertaken to recognise the diplomas to be issued by this school of medicine, which is known as the Union Medical College, and has given an annual grant towards its expenses. At Tientsin there are a Chinese University with 5 foreign and 7 Chinese professors, an Anglo-Chinese College, an industrial school under Japanese tuition, general medical colleges, and various private and mission schools. In 1911 a scheme was set on foot in London to establish a modern university in Central China (at Hankau Wuchang). The scheme was promoted by committees representative of the Universities of Oxford, Cambridge, and London in this country, and of the Universities of Harvard, Columbia, California, and Toronto in Canada and the United States of America. At Chefoo is an imperial college, and in the province are 10 other higher schools with 1,900 students and 73 teachers (53 being

Chinese). There are also private schools and mission schools with medical missionaries and hospitals, all of which are successful. In 15 provincial capitals colleges have been founded, while primary and secondary schools, mechanical, agricultural, police, and military schools are springing up all over China. In the Wuchow prefecture about 60 Government schools have recently been opened, local Buddhist temples having been confiscated and adapted to school purposes. There are numerous Catholic and Protestant mission schools and colleges at Shanghai and other ports, where the French and English languages and lower branches of western science are taught. It is estimated that altogether some 36,600 educational institutions of all grades (military and naval schools included), are to be found in China, with an aggregate enrolment of 880 000 students.

The engagement of America to return to China the surplus of her indemnity of 1860 amounting to some 10 million taels, produced an undertaking from China to spend an equal amount in sending students to the United States. Three such batches of students have already been sent.

Translations of foreign standard works are gradually reaching the most distant parts of the Empire with the effect that the desire for western knowledge becomes year by year more evident among the people. The Chinese Government has of late years established schools with and without foreign instructors in connection with the different arsenals and military establishments at Tientsin, Pao ting fu, Nanking, Shanghai, Canton, and Fuchau, and steps are being taken for the gradual re organisation of military instruction.

Ten Chinese newspapers are published at Shanghai, and some 20 in Peking, while the number of native papers and the influence they wield is growing rapidly. Altogether there must be well over 200 daily, weekly, or monthly journals in China.

### Justice

Under the old system justice was very badly administered, so much so that the Treaty Powers had to claim the right of extra-territorial jurisdiction over their own citizens in China. The new régime has brought changes in the judicial system. For the present four kinds of courts are established. (1) The High Court of Justice (*Tu Li Yuan*) which is the Supreme Court of Appeal. (2) Provincial High Courts (*Kao Teng Shen Pan Ting*) in each of the provincial capitals. (3) District Courts, and (4) Courts of First Instance.

Great Britain and the United States have special courts in China, the one, His Majesty's Supreme Court for China at Shanghai (established 1865), and the other, the United States District Court for China (established 1906).

The first trial by jury in the annals of China took place on March 28, 1912.

### Finance

No comprehensive statement of the revenue and expenditure of China is published officially, and such estimates as have been formed by Europeans are founded on financial reports of provincial governors published from time to time in the *Peking Gazette*.

According to the Budget for the year 1911 (China's first Budget), published (October, 1910) by the Board of Finance, the total revenue amounts to 297,000,000 taels, while the expenditure is 376,000,000 taels, leaving a

deficit of \$4,000,000 taels. This was however, ruthlessly cut down by the Senate till a deficit of 80,000,000 taels was converted into a surplus of 3,500 000 taels.

Chief Sources of Revenue	Taels	Chief Items of Expenditure	Taels
Land tax estimated to produce	49,000 000	Repayment of loans, &c	56 600 000
Tea and salt taxes "	47,000 000	Army and navy	28 600 000
Government lands "	47,000 000	Communications	87 000 000
Likin "	44,000 000		
Customs "	42,000 000		

The land tax varies in different provinces from 10d. or 1s to 6s 6d or more per acre. The rate of incidence is theoretically fixed but under other names additional taxes are imposed on land. Salt is a Government monopoly all producers being required to sell to Government agents who at a price which covers the duty re sell to merchants provided with salt warrants.

Budget for 1912 — Revenue 268,000,000 taels, expenditure 268,811,000 taels.

The collection of the revenue on the Chinese foreign trade and the administration of the lights on the coast of China are under the management of the Imperial Customs Service which has a large staff of European, American, Japanese and Chinese subordinates, the department being organised somewhat similarly to the English Civil Service. By Imperial Decree of May 9, 1906, the customs service, hitherto supervised by the Board of Foreign Affairs, was placed under the control of two Chinese high officials, forming a new department known as the Shui Wu Chu, or Revenue Council. Since November, 1901 the Native Customs at the Treaty Ports hypothecated for the service of the indemnity have been under the Imperial Maritime Customs.

On November 22 1912, an Audit Bureau was established charged with auditing the expenditures and revenues of the Central and Provincial Governments. On Jan 15 1913, an inspectorate general was established for the Salt Gabelle.

The receipts from maritime customs and from opium likin in the last 5 years were (in Haikwan taels) —

Year	Customs	Opium likin	Total	Total	Exchange
	Taels	Taels	Taels	£	Pence
1906	23 080 478	3 871 422	3 901 895	4 388 812	32
1907	31 633 951	3 005 206	3 589 217	4 827 598	31½
1910	32 732 856	2 889,028	35 621 879	4 789 254	32½
1911	32,015 669	2 664 164	36,179 833	4 871 085	32½
1912	—	—	39 930 612	6,090 629	36½

The foreign debt secured on Imperial revenue outstanding December 31, 1911 is shown in the following table —

No.	Nature of Loan	Rate of Interest	Original Amount	Principal outstanding Dec. 1 1911
1	Silver Loan of 1894. (Hong Kong and Shanghai Bank)	7½	10 900,000 Tls	2 160 000 Tls
2	Gold Loan of 1895 (Hong Kong and Shanghai Bank)	6½	3,000,000	800 000
3	"Casell Loan of April, 1895 (Chartered Bank)	6½	1,000 000	265,700.
4	"Arnhold Karberg Nanking Loan, 1895 (Barclays Bank)	6½	1 000 000	265,700.

No	Nature of Loan	Rate of Interest	Original Amount	Principal outstanding Dec. 1 1911
5	Russian Loan" of 1895 (French Group)	4%	1,820,000	11,587,478.1
6	Gold Loan of 1896 (Hong Kong, Shanghai, and German Banks)	3%	16,000,000	12,897,435.1
7	Gold Loan of 1898. (Hong Kong, Shanghai, and German Banks)	4½%	16,000,000	14,022,625.1
8	Imperial Railways of N. China Loan 1899 (Hong Kong and Shanghai Bank)	5%	2,360,000	1,897,500.1
9	Shensi Railway Loan 1902. (Russo-Chinese Bank)	5%	1,600,000	1,600,000.1

27	Currency Reform Loan 1911 (10,000,000) (American, British German French)	"	10,000,000	400,000
28	Hukwang Railways Loan 1911 (German, British, French American)	6½	6,000,000	8,000,000
29	Hupeh Prov. Silver Loan, 1911 (British German, French, American)	7	2,000,000 H'kow ts	2,000,000 H'kow ts
30	Kwangtung Silver Loan, 1911 (British French, German)	7½	5,000,000 dollars	5,000,000 dollars
31	Various Loans, 1912 (British, Belgian, and Six Power Group)	6½	7,800,000	7,800,000

Total principal outstanding December 31, 1911 72,034,760.1 11,080,000 taels and 5,000,000 dollars, approximately equivalent to 74,440,760.1.

In February, 1912, 'The Chinese Government 6½ per cent. Reorganization Gold Loan of 1912' was floated. The amount was 35 millions sterling.

### Defence.

The task of erecting an army on modern lines was inaugurated by Imperial decree in January, 1905, and in October, 1907, an edict was issued ordering the formation of 36 divisions in the various provinces of the Empire by 1912. Recruitment for this new army, which is called the Lu Chun, is on a principle of modified conscription (which in many provinces amounts to the voluntary principle owing to the dense population and the readiness to serve). The terms of service are 3 years with the colours, 3 in the first reserve and 4 in the second reserve, or 10 years in all. First reservists are called out for 30 days training every year, and men in the second reserve for a like period every other year.

These 36 divisions, of about 10,000 combatants apiece, will eventually be comprised in two armies, a Northern and a Southern. In 1909 recruitment was furthermore commenced for a division of Imperial Guards. Fourteen divisions are understood to be complete and the formation of 16 more has been begun, a "mixed brigade" existing to represent each of them. A division consists of two brigades of infantry, each of 3 battalions, one regiment of cavalry, one regiment of artillery of 9 batteries, and one sapper battalion. Although the Guards Division, the 14 other divisions and the 16 mixed brigades ought to number about 250,000 men, it is estimated that the present strength does not exceed 180,000. The northern troops appear to be superior to the others both in training and armament. No organisation is as yet contemplated for the second reserve, which is supposed to form an army in second line. Besides the Lu Chun there are provincial troops still in existence which are the remains of a force which the Lu Chun is superseding; these provincial troops are being reorganised to form a police, they are under the control of the Viceroys of provinces and consist only of mounted troops and infantry.

At the present time the army administration consists of the General Staff and the Ministry of War in Peking and Military Councilors in various provinces. The total force, including provincial troops, patrol troops, &c., is variously estimated as 300,000 to 500,000, and it probably is nearer the latter figure. Pay is considerably in arrears, efforts at disarmament are met with great opposition, and in many districts the army in occupation has turned to its own profit the local sources of revenue.

The Chinese navy consists of the 4,300 ton cruiser *Hai Chi*, (28 in. 10.17 in. guns) of 24 knot original speed, three 3,000 ton cruisers *Hai Yang*, *Hai Shen* and *Hai Shen* (36 in., 8.4 in. guns) and 19.5 knot original speed, a few miscellaneous vessels, some old torpedo boats, and some modern gunboats built in Japan. Two new cruisers of 2,750 tons each (*Yang Swei* and *Chao Ho*) were built in England in 1911, and one (*Fai Hung*) in America. Principal armament of all 28 in. and 4 in. Also 2 gunboats (displacement 780 tons) built in Japan as complement to 12 others constructed there 1906-08. Various more extensive naval programmes have from time to time been mooted but none of them have as yet materialised. The number of the personnel cannot be exactly stated, but it is worthy of mention that both the French and the Japanese who have fought against them, are unanimous in considering the Chinese bluejacket to be a very high asset.

### Production and Industry

China is essentially an agricultural country, and the land is all freehold held by families on the payment of an annual tax. The holdings are in general small, the implements used are primitive, irrigation is common. Horticulture is a favourite pursuit, and fruit trees are grown in great variety. Wheat, barley, maize, and millet and other cereals, with pease and

beans, are chiefly cultivated in the north, and rice in the south. Sugar, indigo, and cotton are cultivated in the south provinces. The area of cotton production is the basin of the middle and lower Yangtze, but the quantity produced cannot be estimated. At the end of 1916 there were stated to be 33 mills in China, of which half were at Shanghai, with a total of 903,416 spindles and 8 806 looms, and their annual output was given as 372,000,000 lbs. of yarn and 45,000,000 yards of sheetings and drills. Under the restrictive measures introduced in 1906 the cultivation of the opium poppy is being gradually contracted. Other decrees followed with the same purpose, and the anti opium campaign culminated on May 8, 1911 in the signature of an agreement with the British Government whereby the import of Indian opium into China was to be reduced in the same proportion as the diminution of the cultivation of native opium, the importation and cultivation to cease in 1917. A clause was inserted providing that Indian opium shall cease to be conveyed into any province which can show that it has effectively suppressed the cultivation and import of native opium. A further important concession to the desire of the Chinese Government to suppress opium was made by the British Government in the provision for ear marking a restricted number of chests of Indian opium for shipment to China, the number of permits being limited in 1911 to 30,600 and progressively reduced by 5,100 in each successive year during the remaining six years. Tea is cultivated exclusively in the west and south, in Fu Kien, Hupeh, Hunan, Kiang-si, Cheh Kiang, Nganhwai, Kwangtung, and Szechwen. The exportation of tea (especially black leaf), which fell off owing to the competition of Ceylon and Indian teas, has tended to increase in recent years. In 1911, 1,950 404,000 lbs. (valued at £5,161,800) were exported. The culture of silk is more important than that of tea. Silk culture in China, however, is not in a prosperous condition. Still 27 per cent. of the world's supply of raw silk is from China, the most serious rivals being Japan with 23 per cent. and Italy with 25 per cent. An important feature in the development of the Chinese industries is the erection of cotton and wool mills, and of filatures for winding silk from cocoons in Shanghai, Canton and elsewhere. At Shanghai a new cotton spinning and weaving factory with 30,000 spindles, was opened by a Japanese company. It was reported that a total of 34 mills with 932 606 spindles and 4,635 looms were established in China on January 1, 1912. At the large centres flour and rice mills are beginning to supersede native methods of treating wheat and rice. At Hanyang, near Hankau, are large Chinese iron works, supplied with ore from mines at Ta-yeh, about 60 miles distant. These works were turning out about 800 steel rails a day, but a large amount of machinery was destroyed during the Revolution, and the works are not yet in proper running order.

Many of the 18 provinces and the 3 provinces of Manchuria contain coal, and China may be regarded as one of the first coal countries of the world. The principal collieries worked by foreign methods are the following — Keping Lanchow mines (joint British and Chinese), 1,453,546 tons in 1911; Fushun mines (Japanese), 830,800, Peking Syndicate mines (British), 417,100, Pinghsiang mines (Chinese), 640,000 Hungshan and Fangtze mines (German), 486,553, Ching Ching mines (Chinese), 150,000, total (1911), 9,897,973 tons. Iron ores are abundant in the anthracite field of Shansi, where the iron industry is ancient, and iron (found in conjunction with coal) is worked in Manchuria. The Ta-yeh mines have (in consideration of a loan of 3,000,000 yen at 8 per cent.) been mortgaged to a Japanese syndicate for 30 years, the Han-yang foundry engaging to buy from 70,000 to 100,000 tons of ore annually during that period at prices already fixed till 1915. On the Upper Yangtze a

foreign syndicate is working for petroleum. Copper ore is plentiful in Yunnan, where the copper mining industry has long existed, near Kinkiang rich veins of copper ore are now being worked, and near the city of Mengtze tin, lead, and silver are found. Antimony ore is exported from Hunan. In Tam Chua (Hainan) mining for tin and gold has been begun under the Chinese Board of Works, silver, copper, and lead are known to exist in the island. Many mining concessions have been granted, but in the majority of cases, the foreign concessionaires have failed to make any practical use of the concessions granted to them, although the first 3 coal mines named above are all foreign enterprises.

The mineral exports of China in two years are given as follows —

Exports	1910		1911	
	Tons	£	Tons	£
Antimony				
Regulus and refined	6 38	5 003	15 818	8,310
Ore	610	60 114	6,704	35,386
Iron				
Pig and manufactured	64 348	113 997	66 757	114 977
Ore	180 461	11 008	110 521	33,043
Lead	2	3 1	11	155
Ore	1 094	11 008	5 325	16 711
Quicksilver	48	9 007	18	8 916
Tin in slabs	1 407	849 128	1 960	961 4 1
Zinc	206	2,604	699	11 977
Ore	1 631	1,581	4 70	6 982

Tin is the most important mineral export. It is mined in Yunnan, and through Mengtze it reaches Hong Kong, whence it is shipped to foreign countries. Coal exports are increasing rapidly, amounting in 1911 to 326,810 tons, value 256,640/ as against 818,124 tons value 229,602/ in 1910.

### Commerce

Foreign trade of China (exclusive of bullion) —

	1907	1908	1909	1910	1911
	£	£	£	£	£
Net Imports	61,064,250	52,600,731	54,471,650	19,381,477	63,481,180
Exports	42,061,518	86,888,050	44,139,681	11,278,654	50,803,081

Trade by countries in 1911 —

	Imports from	Exports to	Total Trade
	£	£	£
United Kingdom	13,110,791	13,138,460	14,445,250
Hong Kong	19,959,811	18,057,619	38,017,290
India	4,986,068	782,104	5,768,199
Russia and Siberia	2,324,671	6,826,414	9,159,985
France	406,876	1,364,568	1,670,984
Germany	2,023,468	1,807,779	4,221,942
Belgium	1,468,143	811,685	2,574,827
Italy	20,894	1,858,292	1,549,194
United States	5,496,202	4,612,988	10,069,186
Japan	16,704,881	6,353,937	19,063,296

The imports into China from Hong Kong come originally from, and the exports from China to that colony are further carried on to Great Britain, Germany, France, America, Australia, India, the Straits, and other countries.

The share of the British Empire in the foreign trade of China in 1911 was 43.47 per cent., Japan coming second with 19.47 per cent., and Germany third with 9.73 per cent.

The chief imports and exports are as follows (1911) —

Imports	£	Exports	£
Opium	6 487 066	Beans and beancake	6 462,491
Cotton goods	19 390 845	Cotton raw and waste	2,905,194
Woolen goods	397 084	Oils, vegetable	1 854 410

		Tea	5 161 800

Of the tea in 1911, 15,541,466 lbs were exported to Hong Kong 19 698,933 lbs. to the United Kingdom, 110 245 465 lbs. to Russia and Siberia, and 17 486,000 lbs. to the United States. The total export of tea to foreign countries has been as follows — 1885, 283,833,466, 1895, 248,757,393, 1905, 162,573,064, 1911, 195,040,400 lbs.

China has besides an extensive coasting and river trade, which, by treaty, is largely carried on by British and other foreign as well as Chinese vessels.

The commercial treaty of 1858 provided for most favoured nation treatment in the case of Great Britain that of 1902, in the case of British possessions, and also made provision respecting investments by Chinese in non Chinese companies, and by British in Chinese companies. Dairen is the customs port for all the leased territory and has out stations at Kinchow, Pulantien, Pitzewo, and Port Arthur. Net Value of Trade at each Port in 1911 —

## Shipping and Navigation.

During 1911, 183,398 vessels, of 85,771,973 tons entered and cleared Chinese ports. Of these 1,373 of 712,181 tons were American, 28,835 of

37,712,440 tons, British, 2,602 of 3,154,157 tons, French, 4,848 of 6,849,660 tons, German, 21,259 of 19,172,727 tons, Japanese, 1,744 of 1,237,027 tons, Russian, and 180,828 of 17,881,543 tons, Chinese. Of vessels engaged in foreign trade only the entrances during the year numbered 36,418 of 12,833,667 tons, and the clearances 35,748 of 12,085,448 tons.

The nationality of the vessels (direct foreign trade) was mainly as follows

Nationality 1911	Entrances		Clearances	
	No	Tons	No	Tons
British	4 637	4,865 672	4 763	5 923,402
American	811	294,833	319	394 669

### Internal Communications

China is traversed in all directions by numerous roads, and, though few are paved or metalled, and all are badly kept, a vast internal trade is carried on partly over them, but chiefly by means of numerous canals and navigable rivers. In February, 1898, the Chinese Government agreed that all internal waterways should be open both to foreign and native steamers.

In 1911 there were 1,020 vessels registered for inland waters navigation, of these, 169 were foreign and 851 were under the Chinese flag.

In 1911 an Edict was issued commanding that all trunk lines of railway should revert to Government and that provincial control should cease. The construction of the Canton Hankow and Szechuen Hankow lines is now in the hands of the Central Government, and a loan of 6,000 0000 has been raised specially for this purpose. At the end of 1911 there were open to traffic about 5,500 miles of Chinese railway, not including the Russian and Japanese systems on Chinese territory in Manchuria, while more than 2,800 miles of new trunk lines were under construction. The following statement shows the nationality of the companies which have financed various lines, the approximate length of projected railways, and the length of main line open —

	Total projected. Miles	Line open. Miles

The imperial Chinese telegraphs are being rapidly extended all over the Empire. They now connect all the principal cities of the Empire, and there are lines to all the neighbouring countries. The telegraph lines (end of 1910) had a length of 45,260 kil, with 80,407 kil of wire, there are 560 offices. The administration is now completely under government control, partly Imperial and partly provincial.

The postal work of the Empire, formerly carried on by the Government Courier service and the native posting agencies, was gradually taken in hand by the Chinese Imperial Post Office, begun in 1897 under the management of the Maritime Customs. By Edict of November 6 1906, the control of the Postal Service was transferred to the Ministry of Communications, and the transfer was actually effected in July 1911. The work of the Post Office extends over the 18 Provinces and Manchuria, which have been divided into postal districts, or sub districts. In 1911 there were 6,201 post offices in the country. The number of letters, cards, &c., was 321,000,000, and parcels 3,037,000, total 324,037,000, as against 358,768,000 in 1909. China has postal conventions with India, France, Japan, Germany, Hong Kong, Natal, and Russia, and through their intermediary has postal communication with postal union countries, the disadvantage of not belonging to the union being thus diminished.

## Money, Weights, and Measures

## MONEY

The sole official coinage and the monetary unit of China has been hitherto the copper cash, of which about 1,220 = 1 haikwan tael, and about 35 = 1 penny. A coin recently issued in great numbers by the provincial mints is the 'hundredth of a dollar'. This coin of which the issue to the end of 1906 is computed to have been 12,500,000,000 has been readily accepted, but latterly at rates corresponding closely to the intrinsic value of the metal in it. The face value of the coin is about  $\frac{1}{100}$  dollar, the intrinsic worth about  $\frac{1}{100}$  dollar. The use of silver bullion, or sycee, as the medium of exchange, is not now much less common, but the circulation of the dollar is certainly extending. The haikwan (or customs) tael was equal in value in 1911 to 32  $\frac{1}{2}$  dollars.

The dollar (of the same weight and touch as the Mexican dollar) is now current in all the provinces, even in out of the way districts. Notes for cash are also much in vogue.

In the treaty of September 5 1902, China agreed with Great Britain to take the necessary steps to provide a uniform national coinage which should be legal tender for all purposes throughout the Empire and an Imperial Decree was issued in October 1908, commanding the introduction of a uniform tael currency, of which the unit must be a silver tael coin of 98 touch weighing 1 Kup'ing or Treasury scale tael or ounce. This decree was cancelled by a further decree of May 25 1910 establishing the silver dollar (yuan) of 90 touch and weighing 72 Treasury weight tael as the unit of currency. The touch and weight of the silver subsidiary coins (50c, 25c, and 10c) was also definitely specified while provision was made for further subsidiary coins (5c nickel, 2c, 1c,  $\frac{1}{2}$ c, and  $\frac{1}{10}$ c copper) of touch and weight to be laid down later. The minting of these silver coins has begun, but very few are as yet in circulation. By the law of May, 1910, the several mints have been brought under the Central Government and are no longer practically private ventures of local viceroys. All coins are now minted at the Imperial Mint in Tientsin and at branch mints in Hankow, Chengtu and Mukden. The Kup'ing tael weighs 575.642089 grams, somewhat less than the Haikwan tael which weighs 581.47 grams. A decree for uniform weights and measures was issued Oct. 9, 1907, whereby the Kup'ing or Treasury scale was made the standard weight.

## WEIGHT

10 <i>Ser</i>	= 1 <i>Hu</i>
10 <i>Hu</i>	= 1 <i>Hao</i>
10 <i>Hao</i>	= 1 <i>Li</i> (nominal cash)
10 <i>Li</i>	= 1 <i>Pên</i> (Candaren)
10 <i>Pên</i>	= 1 <i>Chien</i> (Maos)
10 <i>Ch'ien</i>	= 1 <i>Liang</i> (Tael) = $1\frac{1}{2}$ oz avoirdupois by treaty
16 <i>Liang</i>	= 1 <i>Chin</i> (Catty) = $1\frac{1}{3}$ lbs.    "    "
100 <i>Chin</i>	= 1 <i>Tan</i> (Picul) = 133 $\frac{1}{3}$ lbs.    "    "

## CAPACITY

10 <i>Ke</i>	= 1 <i>Sheng</i>
10 <i>Sheng</i>	= 1 <i>Pou</i> (holding from $6\frac{1}{2}$ to 10 <i>Kin</i> of rice and measuring from 1.13 to 1.63 gallon). Commodities, even liquids, such as oil, spirits, &c., are commonly bought and sold by weight.

## LENGTH

10 <i>Fen</i>	= 1 <i>Tsun</i> (inch)
10 <i>Tsun</i>	= 1 <i>Chih</i> (foot) = 14 1 English inches by treaty
10 <i>Chih</i>	= 1 <i>Chang</i> = 2 fathoms
1 <i>Li</i>	= approximately 3 cables

In the tariff settled by treaty between Great Britain and China, the *Chih* of 14 1 English inches has been adopted as the legal standard. The standards of weight and length vary all over the Empire the *Chih*, for example, ranging from 9 to 16 English inches and the *Chang* (= 10 *Chih*) in proportion but at the treaty ports the use of the foreign treaty standard of *Chih* and *Chang* is becoming common.

## Diplomatic Representatives

## 1 OF CHINA IN GREAT BRITAIN

*Envoy and Minister* — Liu Yuk lin  
*Councillor of Legation* — Sir John McLeavy Brown, C M G  
*Secretary* — P K C Tyan  
*Second Secretary* — Yuen kah Shuen  
*Attachés* — Tung Chen lin, Lau Tu ching, Lao Ming vi  
*Commercial Attaché* — Tsung Yu huan

## 2 OF GREAT BRITAIN IN CHINA

*Envoy and Minister* — Sir John Jordan, G C I E, K C B, K C M G  
 Appointed October 26, 1906  
*Councillor of Legation* — Vacant  
*Secretaries* — Hon E S Scott, M V O, T H Lyons and Sir S Head, Bart.  
*Naval Attaché* — Capt the Hon. H G Brand M V O, R N  
*Military Attaché* — Major D S Robertson  
*Chinese Secretary* — S Barton  
*Commercial Attaché* — William P Ker  
*Judge* — Sir H W de Sausmarez (at Shanghai)  
*Assistant Judge* — F S A Bourne, C M G

There are British Consular representatives at Peking, Amoy, Canton (C G), Changsha, Chefoo, Chengtu (C G), Chinkiang, Chungking, Foochau, Hangchau, Hankau (C G), Harbin, Ichang, Kiukiang, Kuangchau, Mukden (C G), Newchwang, Nanking, Pakhoi, Shanghai (C G), Swatan, Tengyueh, Thien tsin (C G), Wuchau, Wuhu, Yunnan fu (C G).

## Chinese Dependencies and Frontier Provinces

**Manchuria**, lying between the province of Chihli and the Amur river, and extending from the Hingan mountains eastwards to Korea and the Ussuri river, has an area of about 363,610 square miles and a population probably of about 20,000,000, but variously estimated at from 5,750,000 to 29,400,000. It consists of 8 provinces, Sheng King or Fengtien (area, 56,000 sq miles, pop. 10,312,741), capital Mukden, Kirin (105,000 sq miles, pop. 6,000,000), capital Kirin, and Heilung-chiang or the Amur province (203,000 sq miles pop. 1,500,000) with Tsitsihar for its capital. The population given above for Fengtien province is from an official Chinese statement of November, 1908, which also gives the agricultural population as, 2,520,146, and the cultivated area as 4,332,333 acres.

The chief towns are Mukden, the capital, with about 158,182 inhabitants, Newchwang (50,000) standing about 80 miles up the Liao river, at the mouth of which is the port of Ying-tse (60,000) often called Newchwang. Besides Newchwang, Mukden, An tang, Tatung kau, Tiehling, (23,492) Tungchiangtsu, (7,299) and Fakumen, (19,482) are open to commerce. Other important towns are Hsin min fu (20,000), Liao-yang (40,000), Feng hwang-cheng (25,000). In Kirin province is the town of Chang chun (Kwangchengtze) with 80,000 inhabitants. The chief town in the Heilung chiang province is Tientshar (30,000). In Manchuria, however, there are many other populous towns situated on the old trade routes.

The Manchu population, especially in the south, has been largely absorbed by Chinese immigrants, so that the southern province, being now connected with China by railway as well as by maritime trade, has become closely identified with distinctively Chinese interests. The lease of the southern extremity of the Liao-tung peninsula, containing Port Arthur, Talien wan and other ports with the adjacent waters and islands, was by treaty of December 22, 1905, made over to Japan, and various concessions as to control and construction of railways were granted.

The Manchurian railways extend from Shan hai kwan on the frontier of Chihli northwards to Hsin min tun and Mukden, and round the Liao tung gulf to Port Arthur which is directly connected with Mukden by the South Manchurian Railway (Japanese line) running northwards to Harbin 615 miles from Port Arthur. There is a branch line of 75 miles from Chang-chun to Kirin. A line 16 miles in length of a metre gauge has been laid (1908) by local Chinese capital from near Tientshar to Ang ang ch'i for commercial purposes. A line from Sinsin Fu to Tientshar Fu (630 miles) is in project, to be surveyed in 1910. At Harbin the railway joins the line which runs for a length of 960 miles over Manchurian soil and connects the Siberian frontier with Vladivostock. The new town, Harbin on the Sungari river, at some distance from the old town of the same name is rapidly extending.

Early in 1913 the Chinese Government created two new official posts in Manchuria, that of Commander in Chief of the Chinese troops and that of Government Resident.

Tibet, extending from the Pamir region eastwards between the Himalayan and Kwen lun mountains to the frontiers of China, has an area of 468,200 square miles with a population estimated at 6,500,000. Lhasa, the capital, has from 15,000 to 20,000 inhabitants. The country being bleak and mountainous and strangers having been jealously excluded, wide regions are still unexplored.

Chinese authority was in the past represented by two Ambans who had charge, respectively, of foreign and military affairs. There were three Chinese commandants of troops at Lhasa, Shigatse, and Dingri where the permanent military force of about 4,600, provided by China, were mostly quartered. There were a few other Chinese officials, but the civil and religious administration of the country was left almost entirely to Tibetans. The head of the government is the Dalai Lama, who resides at the Po-ta-la (or palace) near Lhasa. He acts through a minister or regent (nomo-khan), appointed for life by the Chinese Government from among the chief Tibetan Lamas, and he is assisted by five ministers. One Tibetan frontier region was transformed into a Chinese province with Batung for its capital, and a Chinese military force having taken and pillaged Lhasa, the Dalai Lama fled to India. He was thereupon deposed by the Chinese, who unsuccessfully attempted to adopt measures for ascertaining and appointing a proper successor to the office.

The prevailing religion is Lamaism, a corrupt form of Buddhism, but along with it there exists the Bon, or Shamanistic, faith. In some places agriculture is carried on, barley and other cereals as well as pulse and vegetables being grown. In some favoured regions fruits, including peaches and even grapes are produced. In other places the pursuits are pastoral, the domestic animals being sheep and yak (often crossed with Indian cattle), while in some regions there are buffaloes, pigs, and camels. Wool spinning, weaving, and knitting are common, and there are many hands skilful in making images and other decorations for religious edifices. The chief minerals worked are gold, borax, and salt. There is a large trade with China and considerable traffic across the Indian frontier.

For the removal of hindrances to the Indian trade a treaty was made with China as suzerain of Tibet) in 1890, supplemented by a second treaty in 1893, but the hindrances still remained. Consequently, in 1904, the Indian Government sent a mission with an escort to arrange matters directly with the Tibetan Government. The mission met with a good deal of armed opposition, but at length, on September 7, a convention was executed at Lhasa. The convention provides for the re-erection of boundary stones (alluding to former pastoral disputes) on the Sikkim frontier, for marts at Yatung, Gyantze and Gartok for Tibetan and British merchants for the demolition of forts on the trade routes, for a Tibetan commissioner to confer with British officials for the alteration of the objectionable features of the treaty of 1893, for the settlement of an equitable customs tariff, for the repair of the passes and the appointment of Tibetan and British officials at the trade marts. The Tibetans have paid an indemnity of 2,500,000 rupees (166,666*l.*), and the evacuation of the Chumbi valley by the British began in February, 1908. Further, no Tibetan territory may be sold, leased or mortgaged to any foreign Power, nor may Tibetan affairs, or Tibetan public works, be subject to foreign management or interference without the consent of the British. The adhesion of China to this convention was secured by an agreement signed at Peking on April 27, 1906. Under the Convention of August 31, 1907 Great Britain and Russia agree not to enter into negotiation with Tibet except through the Chinese Government, nor to send representatives to Lhasa. But this engagement does not affect the provisions of the British Tibetan convention of September 7, 1904, ratified by China in 1906. Negotiations were begun at Simla in Sept. 1907, for the conclusion of Trade Regulations between India and Tibet, and were brought to a satisfactory conclusion in April 1908.

In March and April, 1912, Presidential Orders were issued which claimed to regard Tibet and Mongolia as integral parts of China, and proposed to put them on exactly the same footing as the provinces. H. M. Government demurred to this as far as Tibet was concerned, and insisted on the fact that, as laid down in the Lhasa Convention of 1904, Great Britain recognised only China's suzerainty and not her sovereignty in Tibet.

The Chinese forces in Lhasa having been besieged there by the Tibetans, were eventually allowed to march out without their arms and were sent back to China via India. In March, 1918, all Chinese officials, civil and military had evacuated Tibet.

In the meantime, a treaty between Tibet and Mongolia was signed on January 21, 1912, the principal provisions of which being that each country recognises the independence of the other. They both undertake to promote and spread Buddhism, and to open their frontiers for mutual trade and intercourse.

The province of *Sia-Kiang*, consisting of Chinese Turkestan, Kulja,

Zungaria, and outer Kan su, comprehends all the Chinese dependencies lying between Mongolia on the north and Tibet on the south. It is under the control of a Military Governor, being now regarded as a separate province. Its area is estimated at about 550 840 square miles and population at about 1,200,000. The inhabitants are of various races, mostly mixed Kirghiz, Persian, Kalmuck and Chinese. The chief towns are Kashgar, Yarkand, Khotan, Kirya and (towards the north) Aksu. The country is administered under Chinese officials, residing as Urumsai, the subordinates being usually natives of the country. In some regions about the Kashgar and Yarkand rivers the soil is fertile, irrigation is practised and cereals, fruits and vegetables are grown. Other productions of the country are wool, cotton, and silk. Jade is worked, and in some districts gold is found.

### Mongolia.

*Ruler* —Djebzoun Damba Khutukhta.

The Cabinet is made up as follows —

*President of the Council of Ministers of Mongolia* —Jain nain Khan Namnan Souroun

*Minister of the Interior* —Tchin Souzouktou Tzin van Lama Tzerin Tchimet.

*Minister of Foreign Affairs* —Daitzin van Hauda dorgi

*Minister of War* —Erdeni Dalai Tzun van Gombo-Souroun

*Minister of Finance* —Touchetou Tzun van Tchakdorgah

*Minister of Justice*. —Erdeni Tzun van Namsarai

The vast and indefinite tract of country called Mongolia stretches from the Kiengh mountains on the east to the Tarbagatai mountains on the west, being intersected towards its western end by the Altai mountains and the Irtysh river. On the north it is bounded by Siberia and on the south by the outer Kan su and other regions which are united into Sin Kiang. The area of Mongolia is about 1,367 600 square miles, and its population about 2,600 000. A wide tract in the heart of this region is occupied by the Desert of Gobi which extends south westwards into Chinese Turkestan. The inhabitants are nomadic Mongols and kalmucks who range the desert with camels, horses, and sheep. Even in fertile districts they are little given to agriculture. The chief town or centre of population is Urga, about 170 miles due south of Maimaichen, which is a frontier emporium for the brisk caravan trade carried on with China across the Gobi Desert, goods being easily transported to the Siberian frontier town of Kiakhta which stands about 100 miles from the south end of Lake Baikal. The imports at Urga in 1908 amounted to about 1,560,000*l.*, and the exports to about 990,000*l.* The chief exports were wool, skins and hides, furs, horns, &c. The commerce between Mongolia and China will no doubt be stimulated by the projected railway from Kalgan to Urga (530 miles) and the Urga Kiakhta railway (170 miles), both being Chinese undertakings.

During the Chinese Revolution an independent Government was set up in Outer Mongolia under the leadership of the Hutukhtu (living Buddha) of Urga. The Chinese Government having despatched forces to reduce Outer Mongolia, in defiance of the frequent representations of the Russian Government, the latter in October despatched to Urga an envoy, who has recognised on behalf of his Government the independence of Outer Mongolia. On Nov 3rd, 1912, a Russo-Mongolian Agreement was concluded, by which the Russian Govern-

ment undertook to assist Mongolia to maintain the autonomous régime she has established, to support her right to have a national army, and to admit neither the presence of Chinese troops on her soil nor the colonization by the Chinese of her territory. The Mongolian Sovereign and Government will assure to Russian subjects and Russian commerce as in the past the full enjoyment of their rights and privileges as enumerated in the Protocol, and it is clearly understood that no other foreign subjects in Mongolia shall be granted fuller rights than those accorded to Russian subjects. Early in February 1913, Russian officers were sent to Mongolia as military instructors, to raise a native mounted brigade on the Cossack model.

Mongolia is to all intents an independent state, though China has not as yet recognised it.

Buddhist Lamaism is the prevalent form of religion, the Lamas having their residence at Urga and other centres.

## COLOMBIA.

(LA REPÚBLICA DE COLOMBIA)

### Constitution and Government

THE Republic of Colombia gained its independence of Spain in 1819, and was officially constituted December 27, 1819. It split up into Venezuela, Ecuador, and the Republic of New Granada February 29, 1832. The Constitution of April 1, 1858, changed the Republic into a confederation of eight States under the name of Confederation Granadina. On September 20, 1861, the convention of Bogotá brought out the confederation under the new name of United States of New Granada, with nine States. On May 8, 1883, an improved Constitution was formed, and the States reverted to the old name Colombia—United States of Colombia. The revolution of 1885 brought about another change and the National Council of Bogotá, composed of three delegates from each State, promulgated the Constitution of August 4, 1886. The sovereignty of the States was abolished, and they became simple departments with governors appointed by the President of the Republic, though they have retained some of their old rights, such as the management of their own finances. In 1909, a new territorial division of the country was adopted: 15 departments and 4 "Intendencias" being formed.

The legislative power rests with a Congress of two Houses, called the Senate and the House of Representatives. The Senate contains 34 Senators elected indirectly by electors specially chosen for the purpose. The House of Representatives consists of 92 members elected by the people in 24 electoral circumscriptions (one for every 50,000 of population), but in each of the 4 intendencias appointed by the Intendente his secretary and 3 inhabitants chosen by the municipal council of the capital of the intendency. Senators are elected for 4 years, Representatives for 2 years.

The President is elected by direct vote of the people for a term of 4 years and his salary is 9,600 gold dollars per annum. Congress elects, for a term of one year two substitutes one of whom, filling the president during a presidential term, fills the vacancy.

*President of the Republic*—Señor Carlos E. Restrepo, appointed July 15th, 1910.

The ministries are those of the Interior, Foreign Affairs, Finance, Treasury, War, Public Instruction and Public Works.

### Area and Population

The area of the Republic is estimated at about 461,606 square miles. According to a census taken in 1870, the population, including that of Panama, at that date was 2,951,323. The area and population of the 15 departments and 4 intendencias was, according to the census of 1912, as follows:—

	Area sq miles	Popula- tion (1912)	Per sq mile		Area sq miles	Popula- tion (1912)	Per sq mile
Antioquia	22,762	740,927	32	Quibdó with			
Atlántico	1,008	114,857	114	Cocorinas	—	99,576	—
Bolívar	22,820	425,875	19	Chocó	—	40,663	—
Boyacá	16,480	596,490	36	Cocuyá	—	53,018	—
Caldas	7,380	341,498	46	Meta	—	29,299	—
Cañón	20,403	211,753	10	Total			
Cundinamarca	8,048	715,618	88	Intendencias	336,840	242,546	0.7
Huila	8,100	158,191	19				
Magdalena	19,060	140,106	7				
Panamá	29,769	400,990	13				
Nariño	8,860	303,915	31				
Santander	17,855	400,084	22				
Norte Santander	6,253	264,391	42				
Tolima	10,080	282,426	28				
Valle	8,847	217,147	24				
Total Departments	262,766	5,232,415	25	Grand Total	461,606	4,475,261	11

This excludes about 30,000 uncivilized Indians. On December 4, 1903, Panama asserted its independence and was formed into a separate Republic, but Colombia has not yet recognised the independence of Panama.

The capital, Bogotá (pop. 121,257), lies 8,600 feet above the sea. The chief commercial towns are Barranquilla (48,807), connected with the coast by 17 miles of railway, Cartagena (34,889), Medellín (70,547) a mining centre, Cali, 26,425, Bucaramanga (19,735), Cúcuta (20,384), the last two being coffee centres.

The boundary line with Brazil is still undefined, and there are difficulties with Peru and Ecuador which have been submitted to the decision of the King of Spain under the convention of September 12, 1905.

## Religion and Instruction

The religion of the nation is Roman Catholicism. There are 4 Catholic archbishops, viz. of Bogotá, Cartagena, Medellín, and Popayán, the first having 4 suffragans and the other three 2 a-piece. One of the suffragan sees is Panamá, belonging to ecclesiastical province of Cartagena, and now also to the Republic of Panamá. Other forms of religion being permitted, so long as their exercise is not contrary to Christian morals nor to the law. There is a Ministry of Public Instruction which has the supreme direction of education throughout the Republic, and is divided into 5 sections: primary, secondary, professional, artistic and industrial. Education is stated to be in a satisfactory condition, there being 4,371 schools with 272,873 pupils in 1912. Nearly all the schools for secondary education, maintained or assisted by the nation, are entrusted to religious corporations of the Catholic Church. There are in the capital Faculties of letters and philosophy, of jurisprudence and political sciences, of medicine and natural sciences, and of mathematics and engineering. For the working class there are many schools of arts and trades directed by the Salomon Fathers. There are other schools or colleges open, under religious orders, and the school of fine arts has been reopened. 21 normal schools have been established in 13 departments, and schools of mining at Medellín and Pasto. Primary education is gratuitous but not compulsory. Total spent on education (1912), \$41,460. The Republic possesses a national library, museum, and observatory.

## Finance

Revenue and expenditure for 4 years in gold pesos —

Year	Revenue.	Expenditure
1910	10,821,600	10,821,600
1911	12,445,119	12,682,119
1912	12,048,145	12,500,000
1913	14,070,852	14,060,294

The internal debt consists of the consolidated internal, amounting on July 1st, 1912, to 5,476,838 silver pesos, and the floating, amounting to 2,766,545 pesos gold. This is exclusive of the paper money in circulation, amounting in 1912 to more or less the value of 10,000,000 pesos gold.

The external debt, mostly due to British creditors, in 1898 amounted, with arrears, to 8,514,421; the nominal value of the debt being 2,700,000. A settlement was arrived at in that year whereby new bonds were issued for 2,687,800. Under arrangement of 1905 unpaid coupons were exchanged for non interest-bearing certificates. Of 351,000, the amount of these, 70 per cent. has been paid off, and payment of the remaining 30 per cent. is contingent on Colombia receiving compensation from the United States in respect of the secession of Panama. On March 30th 1910 the total outstanding was 2,660,400, and from April, 1911, to January, 1912 it was reduced to 2,480,800. In addition to the external debt of 1906, there are guarantee railway debts amounting to 1,469,400.

## Defence

The strength of the national army is determined by Act of Congress. The peace footing was fixed at 7,000 in 1910. After the war the actual strength was reduced to 10,000 men, and in 1905 to 5,000, many of these being engaged in making or repairing highways. There are now 6,000 men. Every able bodied Colombian is liable to military service.

The Colombian navy consists of the following vessels —On the Atlantic 3 cruisers, on the Pacific, 2 cruisers, 2 gunboats, 1 torpedo-boat, 2 tugs, on the river Magdalena, 1 gunboat. The ships are all old, and of little or no fighting value. It is very doubtful if they could ever get to sea.

## Production

Colombia is rich in minerals, and gold is found in all the departments. Gold was produced in 1907 to the value of 668,501, and silver to the value of 142,184. In 1911, gold was exported to the value of 3,751,828 gold pesos (bullion, 2,454,834, and gold-dust, 1,296,999). In 1911 the total value of export of mineral products amounted to 4,507,762 do lars gold. The mines are in Antioquia, Cauca, Bolivar, Tolima, and Magdalena. Other minerals, more or less worked, are copper, platinum, lead, mercury, cinnabar (14 mines), manganese (7 mines), emeralds (52 mines). The emerald mines of Muso and Cosquez belong to the Government. No statistics of their output are published, but they are said to yield 1,000,000 pesos worth of stones per annum. Nearly all the emeralds mined to-day come from Colombia. The Pradera iron works north-east of Bogotá have a capacity of 20 tons of pig iron daily, and manufacture wrought iron, rails, sugar mills, castings, &c. In the immediate neighbourhood of the works are coal, iron, limestone, sand, manganese, and fireclay deposits, which

render the locality highly favourable for the development of metallurgical industries. The salt mines at Zipaquirá, north of Bogotá, are a government monopoly and a great source of revenue, supplying most of the interior departments. The maritime departments use sea salt evaporated at the numerous natural salt pans along the coast. In several of the departments there are extensive deposits of coal and petroleum. The Government has undertaken the working of the coal mines at San Jorge which had been abandoned. On the coasts there are valuable pearl fisheries which the Government desires to concede for a term of years.

Only a small section of the country is under cultivation. Much of the soil is fertile, but of no present value, from want of means of communication and transport. Coffee is the staple product, but transport is difficult. In 1910-11 12,641,156 kilograms of coffee were exported, and in 1911-12 12,237,875 kilograms. Tobacco is grown and shipped to Germany. Cotton is produced in Magdalena, Bolívar, Antioquia and Santander, and is beginning to be cultivated in Boyacá and Cundinamarca. Cocoa, sugar, vegetable, ivory, and dyewoods are produced, besides wheat, maize, plantains, &c. Banana cultivation is extending, and near Santa Marta a large amount of capital is being invested in this industry. The rubber tree grows wild, and its cultivation has begun. Tolu balsam is cultivated, and copaiba trees are tapped but are not cultivated. Dye and cedar woods are abundant on the Magdalena river, but little or no wood of any sort is exported. The Panama hat industry is making great strides, some 86 per cent. of the hats manufactured are sent to the United States. The greatest industrial development was at Barranquilla, where several new factories were opened, including two match factories, a glass factory for the production of all kinds of glassware (no flat glass), a shoe factory, a nail factory, a cotton goods factory, a cotton gin and an ice factory. There is a considerable export trade in cattle.

In 1905, concessions of land embracing about 145,000 square miles in the rubber region were granted for 25 years. The concessionaires are to pay 1 gold dollar on every 100 lbs. of rubber gathered, they are to establish agricultural colonies, to provide a steamboat service on the rivers and to construct mountain roads.

## Commerce

In 1911 the imports amounted to 18,108,868 pesos gold, and the exports to 22,876,899. In 1910 the imports amounted to 17,885,039 pesos gold, and the exports to 17,786,806. The principal articles of export (1911), coffee, 9,475,468 gold pesos; cocoa 139,324, bananas 2,172,582, rubber, 900,886.

About 67 per cent. of the coffee exported from Colombia goes to the United States; most of the tobacco to Germany, cotton to Liverpool or Havre. The chief imports are flour, lard, petroleum, and cotton goods from the United States, rice from Germany, and cotton goods from Great Britain.

Total trade between United Kingdom and Colombia for 5 years —

	1907	1908	1909	1910	1911
—	£	£	£	£	£
Imports from Colombia into U.K.	698,118	690,833	704,802	1,843,181	1,045,216
Exports to Colombia from U.K.	1,618,733	993,009	885,155	1,196,780	1,086,959

### Shipping and Communications

In 1911 the merchant shipping of Colombia consisted of 1 steamer of 457 tons and 4 sailing vessels of 1,121 tons. At Cartagena in 1910 there entered 257 vessels of 585,709 tons, and at Puerto Colombia 327 vessels of 737,639 tons. The ports of Colombia are in regular communication with those of European and American countries by means of 7 lines of mail steamers, 3 of which are British and the others German, French, Spanish, and Italian.

The total length of railways open in Colombia in 1911 was 621 miles belonging to 9 companies and 2 States. Of the total, 466 miles have a gauge of 3 ft., the rest a metre gauge. Number of passengers carried (1911), 1,350,548, tons of freight, 383,980. The roads of Colombia are simple mule tracks, but the Government is employing soldiers to improve the main roads. Much of the inland traffic is by river and the work of clearing and canalising the lower and upper Magdalena is being carried on. That river is navigable for 900 miles, steamers ascend to La Dorada, 592 miles from Barranquilla. Tributaries supply 215 miles more of navigable water and on these rivers 42 steamers, with a total tonnage of 7,331 regularly ply.

Postal facilities between Barranquilla and foreign countries are stated to be excellent, but as to internal services there are no recent statistics. In 1911, in the internal service there were 3,200,000 letters and post-cards transmitted, and 2,438,190 packets of printed matter, samples, and business papers. Number of offices, 608. A British river transport company has contracted with the Government to convey mails and passengers to and from the interior every three days. Other companies, British, German and native ply on the rivers.

There were 11,248 miles of Government telegraph lines in 1912, 1,462,328 telegrams were despatched in 1911, and 11,294 cablegrams were sent.

### Money, Weights, and Measures

By decree of March 6, 1905, the Central Bank was constituted with a capital of 1,600,000*l.* and to it was entrusted the redemption of the paper currency and the restoration of metallic money, but this is now taken in hand by the Government. The sovereign is received by the Government and the Commerce in all transactions as the equivalent of 5 gold pesos. By a special law the exchange between the paper currency and the gold currency has been fixed at 10,000 per cent., so that the value of the paper peso is 1 cent gold.

Under the Law of June 12, 1907, the monetary unit is a gold dollar equal to one-fifth of a pound sterling and of proportionate weight, the fineness being the same. Gold coins are 1, 2½, and 5 dollars. Silver coins are (900 fine) the dollar, the half dollar, the pesos, and the real, the silver coinage being legal tender for amounts not exceeding 10 dollars gold. Nickel coins for 1, 2, and 5 dollars paper are legal tender up to 2 dollars gold, each paper dollar being reckoned as worth 1 centavo gold (as stated above). Colombia has no gold coinage beyond the British £1 and 10*s.* pieces.

The metric system was introduced into the Republic in 1857. In custom-house business the kilogramme, equal to 2,204 avoirdupois pounds, is the standard. In ordinary commerce the arroba, of 25 Colombian pounds, or 12½ kilos; the quintal, of 100 Colombian pounds, or 50 kilos, and the carga, of 250 Colombian pounds, or 125 kilos, are generally used. The Colombian libra is equal to 1.102 pound avoirdupois. The Colombian vara, or 80 cm., is still in some cases the measure of length used for retailing purposes, but in liquid measure the French litre is the legal standard.

## Diplomatic and Commercial Representatives.

### 1 OF COLOMBIA IN GREAT BRITAIN

*Minister and Envoy.*—Vacant

*Secretary of Legation.*—Saturino Bestropo (in charge).

*Attaché.*—Samuel Montana.

*Consul-General in London.*—Luis Martinez Silva

There are consuls or vice-consuls at Grimsby, Liverpool, Nottingham, Southampton, Birmingham, Cardiff, Dover, Dundee, Glasgow, & Manchester

### 2 OF GREAT BRITAIN IN COLOMBIA

*Envoy Excl., Min. Plen and Consul-General.*—Percy C. Wyndham. Appointed May, 1911

*Attaché.*—Ronald Parker

Consul at Barranquilla, and vice-consuls at Bogotá, Cartagena, Honda, Medellin, and Santa Marta, and consular agents at Tamaco and Buenaventura.

# COSTA RICA.

(*REPÚBLICA DE COSTA RICA.*)

## Constitution and Government

THE Republic of Costa Rica, an independent State since the year 1821, and forming part from 1824 to 1829 of the Confederation of Central America, is governed under a Constitution promulgated on December 7, 1871, and modified very frequently since that date. Practically there was no constitution, but only dictatorships, between 1870 and 1882. The legislative power is vested in a Chamber of Representatives called the Constitutional Congress, and made up of 48 deputies, being one representative to every 8,000 inhabitants chosen in electoral assemblies, the members of which are returned by the suffrage of all who are able to support themselves. The members of the Chamber are elected for the term of four years, one-half retiring every two years. The executive authority is in the hands of a president, elected, in the same manner as the Congress, for the term of four years. A Standing Committee of 5 deputies represents Congress during its recess and advises the President on all matters which would ordinarily come before the Chamber.

*President of the Republic.*—Ricardo Jimenez. (elected for four years from May 8, 1910.)

The administration normally is carried on by five Secretaries of State, who are appointed by, and responsible to, the President. They are the Secretaries respectively of the Interior and Police, of Foreign Affairs, Justice, and Public Worship, of Public Instruction, and War and Marine, of Finance and Commerce, and a Sub-Secretary of Public Works under the control of Secretary of Finance and Commerce.

On December 20, 1907, the 5 Central American States, by their representatives at a conference at Washington, signed (among other treaties) a treaty of peace by which all the States agree to submit disputed matters to a Court of Arbitration, the judges of which will be appointed by the Congress of each country, the decisions of this Court to be binding on all parties.

## Area and Population

The area of the Republic is estimated at 23,000 English square miles divided into seven provinces: San José, Alajuela, Heredia, Cartago, Guanacaste, Puntarenas and Limón. According to the estimate for December 31, 1911, the population was 388,266, made up as follows—

Province	Population	Province	Population
San José	121,162	Guanacaste	32,810
Alajuela	91,707	Puntarenas	20,064
Heredia	42,645	Limón	16,930
Cartago	79,668	Total	388,266

There are about 2,000 aborigines (Indians).

The official returns of births and deaths for 1910 showed 15,647 births, and 9,783 deaths, increase 6,124; for 1911, 16,820 births, and 9,688 deaths, increase, 7,356.

The immigration in 1911 amounted to 9,587, and the emigration to

8,170 The population of European descent, many of them pure Spanish blood, dwell mostly around the capital, the city of San José (81,668), and in the towns of Alajuela (6,061), Cartago (5,927), Heredia (7,761) Liberia (2,373), Puntarenas (4,709) and Limón (8,237). The government encourages immigration by the sale of land on easy terms. There are some 25,000 coloured British West Indians, mostly in Limón Province, on the banana farms.

For the purpose of public health the country has been divided into 26 districts, superintended by medical men paid by the national Treasury.

### Religion and Instruction

The Roman Catholic is the religion of the State, but there is entire religious liberty under the Constitution. The Bishop of San José is a suffragan of the Archbishop of Guatemala. Elementary instruction is compulsory and free. Elementary schools are provided and maintained by local school councils, while the national government pays the teachers, besides making subventions in aid of local funds. In 1911, there were open 356 elementary schools, the teachers numbered 1,044, and the enrolled pupils 29,904 the average attendance being 25,921. For secondary instruction there are at San José a lyceum for boys with 315 pupils in 1911, and a college for girls with 206 pupils (including a normal section). The towns of Cartago, Alajuela, and Heredia, have each a college. For professional instruction there is a Medical Faculty, and also schools of Law, Pharmacy, and Dentistry.

### Justice

Justice is administered by the Supreme Court of Justice, two Appeal Courts, and the Court of Cassation. There are also subordinate courts in the separate provinces, and local justices throughout the Republic. Capital punishment cannot be inflicted. In 1911 there were 11,760 convictions of misdemeanour, and 1,509 of crime.

### Finance

The revenue and expenditure for five years have been in gold colones worth about 22-9d. (£1 = Colones 10-45) as follows:—

	From April 1st to March 31st		From April 1st to Dec 31st		From January 1st to December 31st	
	1906-7	1907-8	1908	1909	1910	1911
Revenues	£ 662,019	£ 737,507	£ 498,480	£ 694,860	£ 777,200	£ 931,494
Expenditure	£ 675,762	£ 879,564	£ 79,380	£ 187,400	£ 847,710	£ 962,050

The revenue is chiefly derived from customs, liquors, and railways, posts, and telegraphs. The largest items of expenditure are finance, public instruction, and internal development.

The Budget estimates for 1913 are as follows:—Revenue, 8,900,000 colones (£51,874), and expenditure, 8,874,610 colones (£49,245).

The foreign debt of the Republic outstanding on December 31, 1910 was 1,617,000. To pay off this total the Government borrowed 2,000,000 (through Mr M. C. Keith, an American financier), retaining 382,600 for their own needs. The bonds are payable in 1958. In November, 1911, a

further loan of 35,000,000 francs was issued to pay off the bonds of the Pacific railway and the internal debt. The internal debt on December 31, 1911, was 11 879,441 colones (1,186,789½)

### Defence

Costa Rica has an army, including reserve and national guard, of 50 877 officers and men. The active army numbers 36,952, the reserve 3,491, and the national guard 4 634. The active army consists of 3 brigades, 1 battalion, 3 companies, and 135 unclassified soldiers. The peace strength is 1,000 men, and the war strength is estimated at 50,000 militia, as every male between 18 and 50 may be required to serve. The Republic has also 2 motor launches on the Atlantic side for Revenue purposes.

### Industry and Commerce

Almost anything can be grown in Costa Rica, but the principal agricultural products are coffee and bananas, in 1911, 74 600 acres were devoted to the cultivation of coffee, 60,000 acres to bananas. 9 309,586 bunches of bananas were exported in 1911, and 206 609 bags (weight 12,841 metric tons) of coffee. There is a brisk banana trade with New Orleans, Mobile, New York, and Boston, and also between Limon and Bristol and Manchester. Other exports of produce were gold and silver bullion and concentrates, cocoa, tortoiseshell, hides, rubber besides cedar, mahogany, fustic and other woods. New rubber plantations are proving productive. Maize, sugar, rice, and potatoes are commonly cultivated. The distillation of spirits, a government monopoly, proceeds actively. The live stock consists of 361 045 cattle, 59,173 horses, 111,540 pigs besides mules, sheep and goats. Several districts are auriferous, and mining is carried on in the Abangarez, Barranca, and Aguacate districts, at about 6 mines.

The value of imports into and exports from Costa Rica in 5 years (including coin and bullion) was as follows (in sterling 1 colon = 22 9d.) —

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports	1 611 627	1 186,563	1 162 68	1 635 399	1,525 830
Exports	1 870 870	1 502,482	1 582 508	1 723 586	1 836 646

For 1911 the value of the chief imports and exports was as follows —

Imports	£	Exports	£
Cotton goods	251 787	Bananas	890 870
Flour	80 439	Coffee	584 645
Railway material	54 619	Gold silver (bullion) and concentrates	248,381
Constructional iron	52,606	Timber	18,609
Machinery	51,759	Cocoa	17 730
Lard	40,970	Rubber	17 800
Coal	40 123	Hides and skins	18,942
		Raw Sugar	19 191

Of the import value in 1911, 845,597½ (46.29 per cent) was from the United States, 316,213½ (17.34 per cent) from the United Kingdom, 347,083½ (19.03 per cent) from Germany, 90,400½ (4.96 per cent) from

France, and 118,240L. from Spanish America. Of the value exported, 1,012,612L. (55.14 per cent.) went to the United States, 730,312L. (39.78 per cent.) to the United Kingdom, 61,921L. (3.27 per cent.) to Germany, and 12,860L. (0.67 per cent.) to France.

Total trade between the United Kingdom and Costa Rica for 5 years —

	1907	1908	1909	1910	1911
Imports from Costa Rica into U. K.	1,898,008	1,803,655	875,573	826,890	1,162,745
Exports to Costa Rica from U. K.	282,509	30,883	150,262	217,066	270,897

### Shipping and Communications

There are no official figures available as regards shipping. On the Atlantic coast there are several small sailing vessels and power launches, and on the Pacific coast some motor launches.

In 1911 there entered the ports of the Republic 604 vessels of 1,159,873 tons, and cleared 602 vessels of 1,164,372 tons. Limon is visited regularly by steamers of 7 shipping companies (2 British, 1 German, 1 Spanish, 1 French, 1 Italian, and 1 American) connecting it with ports of Europe and America. Two lines visit the Pacific port of Punta Arenas.

The railway system connects San José with the Atlantic ports, and has been extended to connect the capital with the Pacific ports, there are branch lines connecting towns to the north and south. The length of railway is about 450 miles; the system is being extended into the banana lands. At San José there is an electric tramway of 5½ miles.

In 1911 there were 200 post offices. The number of postal packets dispatched and received was 6 991 898.

There are (1911) telegraph wires of a total length of 1,580 English miles, with 130 telegraph offices. The number of messages in 1911 was 563 000. The telephone lines had a length of about 460 miles. Wireless telegraphy is working from Limon to Bocas del Toro (Panama) 60 miles, and from Blue fields and Colon to Jamaica. Limon has a radius of 300 miles.

### Money, Weights, and Measures

There are 5 banks in Costa Rica, the Anglo-Costa Rican Bank (founded 1863) and the Bank of Costa Rica (1877), with a capital of 1,200,000 and 2,000,000 colones respectively the Commercial Bank of Costa Rica (1905) with a capital of 1,500,000 colones, and the Mercantile Bank of Costa Rica (1908) with a capital of 1,200,000 colones. On September 12, 1912, a fifth bank was incorporated, the International Bank of Costa Rica, with a capital of 485,000 colones. Banks of issue must keep a reserve in gold equal to half their note circulation. The total notes in circulation on December 31, 1911, were 4,097,405 colones. The 6 banks had a reserve (December 31, 1912) of 2,678,469 colones.

On October 24, 1896, an Act was passed for the adoption of a gold standard, the monetary unit to be the gold colon, weighing 778 grammes, 900 fine (value about 28 sh.). The U.S. gold dollar is worth 2 15 colones. The new silver coinage consists of fractions of the colon, viz., 50, 25, 10, and 5-cent pieces. 400 fine silver, which are legal tender up to 20 colones, copper being legal tender up to 1 colon. Foreign gold is legal, but not foreign silver.

The metric system is now in use, the following are the old weights and measures --

The <i>Libra</i>	= 1.014 lb avoirdupois
„ <i>Quintal</i>	= 101.40 lbs „
„ <i>Arroba</i>	= 25.35 „
„ <i>Fanega</i>	= 11 bushels (imperial bushel)

The old weights and measures of Spain are in use in the country districts, but the introduction of the French metric system is legally established and in general use

## Diplomatic and Consular Representatives

### 1 OF COSTA RICA IN GREAT BRITAIN

*Charge d'Affaires in London.*—W de la Guardia.

*Secretaries*—Victor M. and Guillermo de la Guardia.

*Consul-General*—W J LeLecheur

There are Consular Representatives at Birmingham, Cardiff, Falmouth, Glasgow, Leeds, Liverpool, Manchester, Nottingham, Southampton, Swansea.

### 2 OF GREAT BRITAIN IN COSTA RICA

*Minister and Consul General*—Sir C C Mallet, C.M.G., resident at Panama

*Consul*—F N Cox

There is a Vice Consul at Port Limon

## CUBA

### Constitution and Government

Cuba, after having been continuously in Spanish possession from its discovery, was by the peace preliminaries and by the definitive treaty signed by the Peace Commissioners at Paris, December 10, 1898, relinquished by Spain, and thus has the position of an independent nation. The direct armed interposition of the United States in the struggle against Spanish domination has, however, brought the island into close association with the United States Government. On November 5, 1900, a convention met to decide on a constitution, and on February 21, 1901, a constitution was adopted, under which the island has a republican form of government, with a president, a vice president, a senate, and a House of Representatives. The United States legislature passed a law authorising the President of the United States to make over the government of the island to the Cuban people as soon as Cuba should undertake to make no treaty with any foreign power endangering its independence, to contract no debts for which the current revenue would not suffice, to concede to the United States Government a right of intervention, and also to grant to it the use of naval stations. On June 12, 1901, these conditions were accepted by Cuba, on February 24, 1902, the President and Vice President of the Republic were elected, and on May 20 the control of the island was formally transferred to the new Cuban Government. Under treaties signed July 2, 1903 the United States has coaling stations in the Bay of Guantanamo and Bahia Honda, for which they pay 2,000 dollars annually. The connection between Cuba and the United States was rendered still closer by the reciprocal commercial convention which came into operation on December 27, 1903.

In August, 1906 an insurrection broke out, and a United States Commission undertook the provisional government. On January 24, 1909, the provisional government came to an end, and the new president assumed office.

*President.*—General Mario G. Menocal (Nov., 1912)

There is a Cabinet consisting of the Secretaries of State, of Justice, of the Interior, of Finance, of Agriculture, Commerce, and Labour, of Public Instruction, of Public Works, and of Sanitation and Charity.

The National Congress is made up of a Senate (24 members, 4 for each province) and a House of Representatives (83 members, 1 for every 25,000 of the inhabitants).

### Area and Population.

Cuba has an area of 44,164 square miles with a population, according to the census enumeration of 1910, of 2,220,278. The area, population, and density of population of each of the six provinces according to the census of 1910 were as follows —

Province	Area	Population in 1910	Pop per sq mile
	Square miles		
Havana	2 772	576 266	194 1
Pinar del Rio	5 600	264,030	48 1
Matanzas	3 700	290 097	64 8
Santa Clara	9 540	514 825	47 6
Camagney	10 600	188 340	11 2
Oriente	12 488	480 607	36 5
Tal	44 000	2,220 278	46 5

The population in 1910, was made as to 52 5 per cent of males, and 47 5 per cent. of females and as to 70 3 per cent of whites and 29 7 per cent of coloured people

The movement of population in 1910 was as follows —Marriages, 12,846, births 74 286 deaths, 33,194 surplus of births over deaths 41 092

In 1911 there were 38,053 immigrants (31 055 men and 6,998 women) of whom 32,104 were Spanish

The chief towns are Havana 319 984 Santiago de Cuba, 58 614, Matanzas, 64,385, Cienfuegos 70,416 Camagney 66,460, Cárdenas, 28,576

### Instruction

According to the census returns for 1899, 64 per cent of the population could not read, 2 per cent. could read but not write 33 per cent. could write, but were without superior education 1 per cent. had received higher education Education was made obligatory in 1880, but the law was not enforced Under United States rule the elementary and secondary school systems were re organised, each municipality was required to have a school board and every town to have schools at which the attendance of children should be compulsory On Feb 3, 1911 there were 3,774 schools, with 3,856 teachers, and 152,658 enrolled pupils (79,762 boys and 72,896 girls), the average attendance was 105 774 For secondary instruction there are in the Island many institutes and colleges. The highest instruction in Cuba is given at the University of Havana, which has faculties of letters and sciences, of medicine and pharmacy, and of law The number of students is about 600 In 1912 the first military academy in Cuba was established at Cabanas Fortres

### Finance, Defence.

The receipts from customs during the fiscal year ended June 30, 1912 amounted to 28,218 624 dollars.

The Budget for the fiscal year commencing July 1, 1912, and ending June 30, 1913, shows estimated receipts 87 940,200 dollars, expenses 33,974,147 dollars, leaving a surplus of 8,966,052.

The principal items of estimated income were —Customs Revenue, 26 424 000 dollars and Consular Fees, 500 000 dollars The principal items of estimated expenditure were — Home Affairs, 10,117,394 dollars, Finance Department, 2,909 722 dollars Instruction, 4 783,638 dollars and Public Works, 8,704,625 dollars

Congress did not approve of a budget for 1911-12 and therefore that of the previous year was in operation.

The debts of the Republic of Cuba (August 1, 1911) were (according to the President's message) as follows:—

Revolutionary 6 per cent. bonds, 1898	dollars 2,198,585	
Redeemed	1,464,585	
In circulation		732,000
Interior debt, 5 per cent.	10,871,100	
"          1908, 4½ per cent	16 500 000	
Total		27,371 100
Loan of 1904, 5 per cent	35,000,000	
Amortisation	1 020,000	
Total		33,980,000
Total debt		62,083,100

During the year 1910 the public debt was decreased by 3,645,827 dollars.

For the preservation of order there is a Rural Guard horse and foot, of 5,298 men and a regular army of 4,311 enlisted men, and 212 officers. The navy consists of 13 steam launches and revenue cutters.

### Production and Industry

The staple products of Cuba are tobacco and sugar, but coffee, cocoa, cereals, and potatoes are grown, and a considerable trade is done in fruits and minerals. In 1911 the sugar crop was 1,450 630 tons, that for 1912 was 1,898,000, the largest ever raised in Cuba. In 1910 there were 175 sugar mills. The production of tobacco in 1911 was 308,497 bales (of 130 lbs each). In 1911, 183,129,188 cigars were exported. The principal fruits exported were pineapples (25,775 tons in 1911) and bananas (38,000 tons in 1910), also 3,000,000 coconuts were exported.

On June 30, 1909, the live stock in the island consisted of 2,935,549 head of cattle, 533,792 horses, 67,316 mules, and 3 202 asses.

Cuba has forest lands, many of which are in private ownership, but the forests belonging to the State have an area of about 1,250,000 acres. These forests contain valuable cabinet woods, such as mahogany and cedar, besides dye-woods, fibres, gums, resins, and oils. Cedar is used locally for cigar-boxes, and mahogany exported. Many other hard woods are used for railway sleepers, carts, ploughs and other local purposes.

In the district of Santiago de Cuba, copper, manganese, and iron mines are worked. The iron mines employ over 4,000 workmen, and supply on an average 50,000 tons of ore per month to the United States. Gold is found but little worked. There are rich beds of asphalt which are not largely worked.

### Commerce

The value of the imports and exports for 3 years (ending June 30) were as follows:—

	1908	1909	1911
	dollars	dollars	dollars
Imports	91,447,561	103,875,581	113,266,997
Exports	234,700,804	156,928,080	158,134,979

Value of specie imported in 1910, \$282,417 dollars, exported 861,538 dollars. The imports and exports were distributed as follows (in United States dollars) —

Countries	Imports		Exports	
	1910	1911	1910	1911
United States	54,859,898	60,015,005	129,329,507	106,832,848
Other Countries of America	8,219,929	—	8,891,216	—
Germany	3,542,760	7,254,657	3,648,298	8,641,565
Spain	8,680,258	9,204,791	727,297	459,703
France	5,674,999	6,204,125	1,549,690	1,907,417
United Kingdom	12,202,219	12,600,000	10,896,239	4,697,314
Other Countries of Europe	5,682,257	—	915,175	—
All Other Countries	2,231,728	10,010,359	655,052	5,178,947
Totals	106,675,681	113,200,997	124,745,304	129,186,879

### Shipping and Communications.

In 1911-12, 12,172 vessels entered and 12,806 cleared. British vessels, 268 of 508,050 tons entered the Port of Havana and 266 of 510,639 tons cleared. In Cuba there were in 1912, 1,690 miles of railway. The four lines are—the United Railways of Havana 672 miles, Cuba Railroad, 602 miles, Cuban Central Railway, 269 miles and Western Railway of Havana, 147 miles. The lines now connect the principal towns and seaports from Pinar del Rio in the west to Santiago de Cuba in the east. The larger sugar estates have private lines connecting them with the main lines. Several important railway extensions are projected. There are 1,033 miles of cart roads open to traffic. There are 487 post offices, 171 telegraph offices, and nine wireless stations operated by the Government. There are 5,065 miles of government telegraph line.

The National Bank has a paid up capital of 5,000,000 dollars. On June 29th, 1912, its assets amounted to 33,127,307 dollars. There is no Cuban currency and no paper money. The Spanish gold dollar is worth 45½¢, the silver dollar about 40¢, and the American dollar 49½¢. The principal coins used are the peso, worth 84 cents, the peseta, worth 17 cents, the real, worth 8 cents. The French 'Louis' is worth 3.85 dollars.

The metrical system of weights and measures is in use.

### Diplomatic and Consular Representatives.

#### 1. OF CUBA IN GREAT BRITAIN

*Envoy and Minister*—General Carlos Garcia Veller

*Secretary*—Gabriel Zondogni

*Chancellor*—Carlos Antrán y Batista.

*Attache*—Antonio F. Saavedra.

#### 2. OF GREAT BRITAIN IN CUBA

*Envoy and Minister*—Stephen Leech

*British Vice-Consuls at Havana*—H. D. R. Cowan and G. F. Plant

There is a British Consul at Santiago, and Vice-Consuls at Matanzas, Cienfuegos, Cardenas, and Guantánamo.

## DENMARK

(KONGERIGET DANMARK)

### Reigning King

**Christian X**, born September 26, 1870, son of King Frederik VIII and Queen Louise, married April 26 1898 to Princess *Alexandrine*, of Mecklenburg, succeeded to the throne on the death of his father, May 14, 1912

### Children of the King

- I Prince Christian *Frederik*, born March 11, 1899
- II Prince Knud, born July 27, 1900

### Brothers and sisters of the King

I Prince *Aar*, born August 8 1871, elected King of Norway under the title of Haakon VII November 1906, married July 23 1896 to Princess Maud Alexandra of Great Britain, offspring Prince Alexander (now Crown Prince Olaf of Norway) born July 9 1903

II Prince *Harald* born October 9 1869, married April 18 1904 to Princess Helena of Sonderburg-Glücksburg, offspring Princess Feodora, born July 1 1910.

III Princess *Ingeborg* born August 1888, married August 27 1897 to Prince Charles of Sweden

IV Princess *Thyra* born March 14 1880

V Prince *Gustav*, born March 4 1887

VI Princess *Dagmar* born May 28 1890

The crown of Denmark was elective from the earliest times. In 1448 after the death of the last male scion of the Princely House of Svend Estridsen the Danish Diet elected to the throne Christian I Count of Oldenburg, in whose family the royal dignity remained for more than four centuries, although the crown was not rendered hereditary by right till the year 1660. The direct male line of the House of Oldenburg became extinct with the sixteenth king, Frederik VII, on November 15, 1863. In view of the death of the king without direct heirs, the Great Powers of Europe, 'taking into consideration that the maintenance of the integrity of the Danish Monarchy as connected with the general interests of the balance of power in Europe, is of high importance to the preservation of peace, signed a treaty at London on May 8, 1852, by the terms of which the succession to the crown of Denmark was made over to Prince Christian of Schleswig-Holstein Sonderburg Glücksburg, and to the direct male descendants of his union with the Princess Louise of Hesse Cassel, niece of King Christian VIII of Denmark. In accordance with this treaty, a law concerning the succession to the Danish crown was adopted by the Diet, and obtained the royal sanction July 31, 1853.

King Frederik VIII. has a civil list of 1,000,000 kroner. The heir apparent to the crown has, in addition, an allowance of 120,000 kroner.

Subjoined is a list of the Kings of Denmark, with the dates of their accession, from the time of election of Christian I of Oldenburg —

*House of Oldenburg*

	A D		A D
Christian I	1448	Christian V	1670
Hans	1481	Frederik IV	1699
Christian II	1518	Christian VI	1730
Frederik I	1523	Frederik V	1746
Christian III	1583	Christian VII	1766
Frederik II	1559	Frederik VI	1808
Christian IV	1589	Christian VIII	1839
Frederik III	1648	Frederik VII	1848

*House of Schleswig Holstein-Sonderburg Glücksburg*

Christian IX, 1863  
 Frederik VIII, 1906  
 Christian X, 1912

### Constitution and Government

The present Constitution of Denmark is embodied in the charter of June 5, 1849, which was modified in some important respects in 1853 and 1863 but again restored, with various alterations, by a statute which obtained the royal sanction on July 28, 1866. According to this charter, the executive power is in the king and his responsible ministers, and the right of making and amending laws is in the Rigsdag, or Diet acting in conjunction with the sovereign. The king must be a member of the Evangelical Lutheran Church, which is declared to be the religion of the State. The Rigsdag comprises the Landsting and the Folkething, the former being a Senate or Upper House and the latter a House of Commons. The Landsting consists of 66 members. Of these, 12 are nominated for life by the Crown, from among actual or former representatives of the Kingdom, and the rest are elected indirectly by the people for the terms of eight years. The choice of the latter 54 members of the Upper House is given to electoral bodies composed partly of the largest taxpayers in the country districts, partly of deputies of the largest taxpayers in the cities, and partly of deputies from the totality of citizens possessing the franchise. Eligible to the Landsting is every citizen who has passed his twenty fifth year and is a resident of the district. The Folkething, or Lower House of Parliament, consists of 114 members, returned in direct election, by universal suffrage, for the term of three years. According to the Constitution there should be one member for every 15,000 inhabitants. The franchise belongs to every male citizen who has reached his thirtieth year, who is not in the actual receipt of public charity, or who if he has at any former time been in receipt of it, has repaid the sums so received, who is not in private service without having his own household, and who has resided at least one year in the electoral circle on the lists of which his name is inscribed. Eligible for the Folkething are all men of good reputation past the age of twenty five. Both the members of the Landsting and of the Folkething receive payment for their

services at the rate of 10 kroner (11s 1d.) per day, including Sundays and holidays, during the first 6 months of the session, and 6 kroner (8s 8d.) for each additional day of the session. Members must accept payment. They also receive second class free passes on the railways and may charge travelling expenses to and from Copenhagen at the beginning and end of the session.

The Rigsdag must meet every year on the first Monday in October. To the Folkething all money bills must in the first instance be submitted by the Government. The Landsting, besides its legislative functions has the duty of appointing from its midst every four years judges who, together with the ordinary members of the Højesteret, form the Rigsret, a tribunal who can alone try parliamentary impeachments. The ministers have free access to both of the legislative assemblies, but can only vote in that chamber of which they are members.

The executive (appointed July 5, 1910), acting under the king as president, and called the State Council—*Statensraadet*—consists of the following ten departments —

1 and 2 *The Presidency of the Council and Ministry of Defence* —  
Klaus Berntsen

3 *Ministry of Foreign Affairs*—C W G Ahlefeldt Laurvig

4 *Ministry of the Interior*—J Jensen Søndrup

5 *Ministry of Justice*.—F T Bülow

6 *Ministry of Finance*—Niels Neergaard

7 *Ministry of Public Instruction and Ecclesiastical Affairs*—Jacob Appel

8 *Ministry of Agriculture*—Anders Nielsen

9 *Ministry of Public Works*—Thomas Larsen

10 *Ministry of Commerce and Navigation*.—O H V B Muus

The ministers are individually and collectively responsible for their acts, and if impeached, and found guilty, cannot be pardoned without the consent of the Folkething.

Landsting, elected 1910 —28 Right, 23 Left, 5 Free Conservatives, 4 Socialists, 4 Radicals, and 2 Independents.

Folkething, elected 1910 —67 Left, 20 Radical Left, 24 Socialists, 13 Right.

Denmark is divided into 18 counties (*Amt*), each of which is administered by a Governor (*Amtmand*), and the counties into Hundreds (*Herred*), each with a portion of the Peace (*Herredsfoged* or *Birkedommer*). In the towns there is a Mayor, appointed by the government, with or without aldermen. The Hundreds are divided into parishes of which there are, in all, about 1,100. Copenhagen forms a district by itself, and has its own form of administration.

The chief of the dependencies of the Crown of Denmark, Iceland, has its own constitution and administration, under a charter which came into force August 1, 1874. By the terms of this charter, modified by two laws of October 8, 1908, the legislative power is vested in the *Althing*, consisting of 40 members, 34 elected by popular suffrage, and 6 nominated by the king.

A minister for Iceland (Bjorn Jonsson) nominated by the king, and residing at Reikjavik is the responsible head of the administration. The offices of the governor and the two Amtmænd have been abolished.

### Area and Population

The following table gives the area and population of Denmark in 1911 —

Divisions	Area 1911 English sq. m.	Population 1911	Population 1911 per sq. m.
City of Copenhagen (Kjöbenhavn) } without suburbs	27	462,161	16,800
Islands in the Baltic	5,117	1,096,458	214
Peninsula of Jutland	9,898	1,198,457	121
Færoe Islands	540	18,000	33
Total	15,582	2,775,076	178

The population (excluding the Færoes) consisted of 1,337,900 males and 1,419,176 females in 1911. The total population at the census of 1906 was 2,757,076 showing an increase during 1906—11 of 1.27 per cent. per annum. In Denmark proper the town population has increased from 1,023,334 in 1906 to 1,104,726 in 1911, while the rural population has increased from 1,565,585 in 1906 to 1,647,350 in 1911. The population is almost entirely Scandinavian, in 1901, of the inhabitants of Denmark proper, 96.66 per cent. were born in Denmark, 0.07 per cent. were born in the Colonies, 0.15 per cent. in Norway, 1.45 per cent. in Sweden, 0.97 per cent. in Sleswig, 0.47 per cent. in other parts of Germany, and 0.23 per cent. in other foreign countries. The foreign born population was thus 3.27 per cent. of the whole.

According to the occupation the population of Denmark in 1906 was classified thus —

Immaterial Production	146,284	Commerce, circulation & hotel keeping	24,130
Agriculture and Forestry	977,906	Capitalists and rural pensioners	108,723
Dairy work	13,113	Public assistance (including the aged)	88,908
Fishing	57,164	Profession not indicated	43,761
Business and industry	401,916		
Railways, posts, telegraphs, telephones, land transports, and navigation	142,067	Total	2,568,819

The population of the capital, Copenhagen (Kjöbenhavn), in 1911 was 462,161, or with suburbs, 559,598, Aarhus, 61,765, Odense, 42,237, Aalborg, 33,449, Horsens, 23,843, Randers, 22,970.

The following table gives the total number of births, deaths, and marriages with the surplus of births over deaths, in five years —

Years	Total Births	Still Births	Marriages	Deaths	Surplus of Births over Deaths
1907	74,324	1,823	20,103	37,275	37,049
1908	76,222	1,845	19,956	36,072	37,160
1909	76,391	1,815	19,944	35,897	40,494
1910	75,997	1,768	19,986	35,187	40,110
1911	78,958	1,761	19,879	37,222	38,766

Of the births in 1910, 11.1 per cent. were illegitimate. In 1907 there were 682 divorces, in 1908, 651, in 1909, 734, in 1910, 749, in 1911 736.

Emigrants, chiefly to the United States, 7,890 in 1907, 4,558 in 1908, 6,782 in 1909, 8,890 in 1910 and 8,808 in 1911.

### Religion.

The established religion of Denmark is the Lutheran, which was introduced as early as 1536, the Church revenue being at that time seized by the Crown, to be delivered up to the university and other religious and educational establishments. The affairs of the National Church are under the superintendence of seven bishops, the Bishop of Roskilde being metropolitan. The bishops have no political character. Complete religious toleration is extended to every sect, and no civil disabilities attach to Dissenters.

According to the census of 1901 there were 2,436,084 Protestants, 5,373 Roman Catholics (under a Vicar Apostolic resident in Copenhagen), 106 Greek Catholics, 3,476 Jews, 4,501 other or of no confession.

### Instruction

Elementary education has been widely diffused in Denmark since the beginning of the last century and in 1814 it was made compulsory. The school age is from 7 to 14. The public schools maintained by communal rates, are with exception of a few middle class schools, free. Of public elementary schools there are about 3,422 (40 in the capital, 147 in other towns, and 3,225 in rural districts) with 376,696 pupils in the year 1911 (5 of these communal schools are grammar schools, and 71 Møllemakoler). For higher instruction there are furthermore a veterinary and agricultural college at Copenhagen with 31 professors and teachers and about 500 pupils, 19 agricultural or horticultural schools, 80 *folkehøjskoler* or popular high schools (adult schools with about 8,000 pupils), 41 grammar schools (14 Government, 27 private), a college of pharmacy (founded 1892) with 7 teachers and 72 students, a Royal academy of arts (founded 1754) with 13 teachers and 350 pupils, a Polytechnic Institution (founded 1829) with 41 professors and teachers and about 800 students, 110 Møllemakoler or middle-class schools, and 41 grammar schools. The higher schools for children (grammar schools and Møllemakoler), together with other non-municipal schools in 1911, had an attendance of 48,300 pupils. The *folkehøjskoler* are all private, but to them and the agricultural schools the state annually makes a grant of about 28,000*l*. To the Møllemakoler grants are made amounting annually to about 25,000*l*. The University of Copenhagen founded in 1479, has 5 faculties, to all of which women are admitted on equal terms with men. It has 101 professors and teachers and about 3,000 students.

### Pauperism and Old Age Pensions

Ordinary poor relief is regulated by the law of April 9, 1891, under which in 1901, 101,915 (4.16 per cent of the population) were relieved at a cost of 398,490*l*.

Another law of 1891 concerning *Old Age Pensions* has been extended by enactments of 1902 and 1908 so as to provide for, and to regulate assistance granted to the aged poor. Recipients must be over 60 years of age, of good character and must have, for the preceding 5 years, had their domicile in the country without receiving public charity. The assistance granted may be in money, or in kind, or by abode in an hospital. It must be sufficient for maintenance and for attendance in case of illness. The estimate of the poverty of the recipient does not include private assistance unless amounting to over 100 kroner (about \$1.13) a year. The subvention is paid by the commune of domicile and half of it is refunded by the State. For the year ending March 31, 1911 79,289 persons were relieved, of whom 59,271 were principals and 20,018 dependents. The total expenditure was 644,072 $\frac{1}{2}$ , of which 326,172 $\frac{1}{2}$  was expended by the State.

### Justice and Crime.

The lowest courts of justice in Denmark are those of the hundred or district magistrates (*herredsfogder* and *birkedommere*) and town judges (*byfogder*). From these courts an appeal lies to the superior court (*Ostret*), or court of second instance, in Viborg with 9 judges, and in Copenhagen with 20 judges. The Copenhagen superior court, however, is identical with that of the civic magistrates. The supreme court (*Højesteret*) or court of final appeal, with a chief justice, 12 puisne judges, and 11 special judges sits in Copenhagen. Judges under 65 years of age can be removed only by judicial sentence.

In 1910, 3,378 men and 509 women were convicted of crimes and delicts 47,001 persons were convicted of minor offences. On March 31, 1911, 797 men and 66 women were in the penitentiaries of Denmark.

### Finance.

By the terms of the Constitution of Denmark the annual financial budget called the 'Finanslovsforlag,' must be laid on the table of the Folkething at the beginning of each session. As to the annual financial accounts called 'Statsregnskab,' the Constitutional Charter prescribes them to be examined by four paid revisers, two of whom are elected by the Folkething and two by the Landsting. Their report is submitted to both Chambers which, after due consideration, pass their resolution generally to the effect that they have no remarks to make on the balance-sheet.

The following shows the actual revenue and expenditure for the five years ending March 31 (18 kroner = 1 $\frac{1}{2}$ ). —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1907	7,064,800	4,854,080	1910	7,512,820	7,200,850
1908	5,472,210	4,222,860	1911	7,204,000	7,721,900
1909	5,100,000	5,009,720	1912	9,200,000	9,100,000

The estimated revenue for 1912-13 was 5,705,884<sup>1</sup>, and expenditure 6,351,150<sup>1</sup>. The following is an abstract of the budget for 1913 14:—

Revenue	Kroner	Expenditure	Kroner
Balance of domain revenues	1 037 416	Civil list and appanages	1 174 000
Interest on State assets	6 087 980	Rigsdag and Council of State	800 000
Direct taxes	35,091 000	Interest and expenses on State debt	12,237 162
Indirect taxes, mainly customs and excise	60 145 900	Pensions including military invalids	4 422,660
Posts and telegraphs	2 060 279	Ministry of Foreign Affairs	969 913
Balance of lotteries	1 517 228	Ministry of Agriculture	4 268,418
Separate revenues	6 083 794	Ministry of Interior	13,897 726
Revenue from employment of property and funding of debt	4,829 800	Ministry of Public Works	2 859 018
		Ministry of Justice	4,450 441
		Ministry of Commerce and Navigation	532,958
		Ministry of Public Worship and Instruction	1,396 921
		Ministry of War	19 462,470
		Ministry of Marine	9 785 993
		Ministry of Finance	8 019 263
		Iceland	237 900
		Improvement of State property and reduction of debt	12,769,812
Total revenue	117 184 651 (16 445 175 <sup>1</sup> )	Total expenditure	116 551,869 (16 365,200 <sup>1</sup> )

An important feature in the administration of the finances of the kingdom is the maintenance of a reserve fund of a comparatively large amount. In 1867 it was 8,458 110<sup>1</sup>, in 1887 990,050<sup>1</sup>, in 1907, 994 210<sup>1</sup>, on March 31, 1910, 994 342<sup>1</sup>, 1911, 994,345<sup>1</sup> 1912 985,789<sup>1</sup>. The object of the reserve fund is to provide means at the disposal of the Government in the event of sudden occurrences.

The public debt of Denmark has been incurred in part by large annual deficits in former years, before the establishment of parliamentary government, and in part by railway undertakings and the construction of harbours, lighthouses, and other works of public importance. The following table gives the national liabilities from 1907 to 1912 —

Year ending March 31	Capital of Debt	Year ending March 31	Capital of Debt
	£		£
1907	14,529 540	1910	16 704 121
1908	14 218,500	1911	18,658,859
1909	14 198 010	1912	18,346,000

The debt is divided into an internal and a foreign. The total foreign debt amounted in 1912 to 14,304,000<sup>1</sup>. The debt is at 3 and  $\frac{3}{4}$  per cent.

The interest of the debt for 1911 12 was set down as 622,903<sup>1</sup>. The investments of the State on March 31, 1912, including the reserve fund, but excluding the State railways (valued at 14,904,000<sup>1</sup>) and the domains, amounted to 2,727,000<sup>1</sup>.

The revenue and expenditure, and the property and debt of Copenhagen

and of the provincial towns and places and rural communes, were as follows —

	Revenue	Expenditure	Property	Debt
Copenhagen (April 1, 1911–March 31, 1912)	£ 2,226 407	£ 2,705,717	£ 13 188 548	£ 11,046,200
Provincial Towns and Places (April 1, 1910–March 31, 1911)	2,780,659	2 797,504	8,717 319	6,224,882
Rural Communes (April 1, 1910–March 31, 1911)	1,852,873	1,839 982	4 355,163	2 298,373

### Defence

The Danish army is a national militia, resembling in some respects the Swiss army. Every able bodied Danish subject is obliged to serve in the army or navy, except the inhabitants of Iceland, the Faroe Islands, and the Danish Antilles. Exemptions in Denmark are few even clergymen having to serve for 5 years.

Service commences at the age of 21 and lasts for 16 years. For the first 8 the men belong to the active army and for the second 8 years to the extra or territorial reserve. At the time of joining, the recruits are continuously trained for 166 days in the infantry, 280 days in the field artillery, 1 year in the garrison artillery and 200 days in the cavalry. The engineers have 7 months, and the train 2 months continuous training. In the case of about, one fourth of the men, their initial training is prolonged by periods ranging from 2½ to 8½ months, according to the arm of the service to which they belong. Subsequent training for all arms only takes place once or twice in the remaining six or seven years of army service, and then only for 25 or 30 days on each occasion. The peace strength of the active army is about 820 officers and 12,900 men.

The country is divided into two territorial commands: one including Copenhagen and the first and second Zealand brigades, the other comprising the Funen brigade, and first and second Jutland brigades. There are 11 regiments of infantry each of 3 or 4 battalions making 53 battalions altogether, also 4 regiments of cavalry, 2 regiments of field artillery each of 3 four gun batteries, 5 garrison artillery battalions, and 3 battalions of engineers. The field army would apparently consist of 5 mixed brigades, with a fighting strength of about 50,000 men.

There are two special corps of infantry and garrison artillery, formed from reservists, for the defence of Copenhagen and the island of Bornholm.

The Danish infantry is armed with the Krag-Jorgensen magazine rifle, calibre 8 mm. Mounted troops have the Remington carbane. The field artillery has been rearmed with a Krupp gun, firing a 14 88 pound shell.

The permanent staff of the Danish army (officers and non commissioned officers) is about 2,450 strong, and about 8,000 recruits are trained yearly. The military budget for 1912 amounted to 1,097,900L, of which 166,000L was for extraordinary expenditure on fortifications.

The Danish fleet is maintained for purposes of coast-defence. It consists of three monitors, *Peder Skram*, *Olufert Fischer*, and *Herluf Trolle*, carrying a pair of 9 4 inch and 4 6-inch guns; a smaller monitor, *Skjold* (launched 1898), with one 9 4 and three 4 7 inch guns; three torpedo gun boats and 20 torpedo boats, 3 submarines. This is the effective fleet.

It is reinforced by the old battleship *Jær Hvitfeld*, and a small cruiser, the *Falktyrren*.

A new coast defence battleship is under construction.

## Production and Industry

The soil of Denmark is greatly subdivided, owing partly to the state of the law which interdicts the union of small farms into larger estates, but encourages in various ways, the parcelling out of landed property and leaves the tenant entire control of his land so long as the rent is paid.

Of the total area of Denmark 80 per cent. is productive, about one sixth of the unproductive area is peat bogs. Of the productive area 6 per cent. is forest, and of the remainder less than one half is arable and the remainder pasture and meadows. The area under the chief crops in 1912, and the production in 1910-1912, were as follows:—

Crops	Area	Production		
	1912	1910	1911	1912
	Acres	Bushels	Bushels	Bushels
Wheat	101,280	4 408,414	4 378 265	4 328 203
Barley	584 285	21 128 259	18 047,266	20 366 640
Oats	1,007 347	35,328,314	26 290 587	39 914,039
Rye	690 022	18 967 614	18 026 204	18,696 564
Mixed grain	—	16 645 267	—	16,593,308
Potatoes	—	29 582,710	—	28 020 323
Beetroot, &c	75 750	502,831 842	—	413,743,000

On July 15, 1910 there were in Denmark proper 535,018 horses, 2,258,982 head of cattle, 726 829 sheep 40 267 goats and 1 467,822 swine. In 1881 there were 1 470,078 cattle and in 1871, 1 236,898.

In 1911 there were exported 23,494 horses 153,512 head of cattle 497 sheep and goats.

In 1911 there were in Denmark 27 distilleries (Copenhagen 8), whose output of brandy reduced to 100° amounted to 3 421,547 gallons (16,552,488 litres). In 1911 there were produced 24 494,734 gallons of excisable beer and 34,394,566 gallons (small) beer, not excisable.

In the same year 116,156 tons of beet sugar were produced at 8 sugar factories, and 25,402 tons of margarine and oleomargarine were manufactured at 22 factories.

In the Danish fisheries the total value of the fish caught was in 1909, 692,667l., in 1910, 769,126l. 1911, 838,697l.

## Canneries.

The following table shows the value, according to official returns, of the imports and general exports (excluding precious metal) for six years (16 kroner = 1l) —

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1906	40,813 500	31 083 700	1909	40 279 839	33 782,378
1907	43,825 800	35 006 700	1910	35 244 900	30 448,000
1908	39 523,500	34 274 600	1911	35 605 000	34,517 000

1 In 1910 and 1911 all goods transhipped are excluded from the figures.

The exports of home produce in five years were, in sterling — 1907, 23 189,000l 1908, 24,417,600l 1909, 24,656,778l , 1910, 26,965,200l , 1911 29,552 000l

In 1911 the general imports and exports, and the special imports and exports (imports for consumption and exports of Danish produce or manufacture) were as follows —

1911	Imports, (General)	Imports, (Special)	Exports, (General)	Exports (Special)
	1 000 kroner	1 000 kroner	1 000 kroner	1 000 kroner
Food substances	238 690	156 196	515 582	471 108
Personal and domestic	6 412	98 108	9 495	1,851
Fuel	49 321	45 321	5 407	0
Fodder manure seeds	2,849	69,888	10 284	7,096
Raw products	280 233	293 651	85 993	67 081
Total	705 500	623,314	626 761	536 847
	(32,506 000l)	(34 525 000l)	(34 514 000l)	(29 552,000l)

The principal articles of import and export, with their respective values, were as follows —

	Imports, 1910 (General)	Exports, 1910 (General)	Imports, 1911 (General)	Imports, 1911 (special)	Exports, 1911 (General)	Exports, 1911 (special)
	1 000 Kroner	1 000 Kroner	1 000 Kroner	1 000 Kroner	1 000 Kroner	1 000 Kroner
Colonial goods	38 278	4,583	45 021	34 094	9 370	2,467
Beverages	14,823	17 877	5,063	5 966	1,834	1,465
Textile manufactures	51,161	5,211	55 175	48,418	8,259	700
Metals and hardware	52,464	6,321	67,162	58,969	8,025	5 237
Wood & manufacture	34 187	3 184	37,989	37,015	948	2,923
Coal	45,098	—	49 374	46,276	5 407	—
Animals	8,492	54,033	12,099	11,625	62,191	61,912
Provisions, eggs, &c	58,344	301,344	55,125	25 340	422,037	233,247
Cereals, &c.	38,569	12,498	64 890	92 088	16,243	12,835

The following table shows the distribution of Danish foreign trade —

Countries	Imports, 1910 (General)	Imports, 1911 (General)	Exports, 1910 (General)	Exports, 1911 (General)
	Kroner	Kroner	Kroner	Kroner
Germany	241,564,000	205,802,000	134,511,000	180,003,000
United Kingdom	117,232,000	115,341,000	241,418,000	358,447,000
Sweden	56,304,000	67,234,000	23,129,000	30,875,000
Norway	7,407,000	7,820,000	10,883,000	16,452,000
United States	51,892,000	58,440,000	4,844,000	7,605,000
Rest of America	18,756,000	12,749,000	3,830,000	3,790,000
Russia	49,212,000	53,508,000	7,992,000	15,631,000
Holland	14,502,000	17,189,000	8,291,000	8,622,000
Belgium	8,800,000	9,992,000	2,100,000	2,836,000
France	15,848,000	17,248,000	2,389,000	2,478,000
Danish Colonies	8,085,000	8,726,000	5,797,000	7,198,000

The treaties of Commerce and Navigation between Great Britain and Denmark, made in 1661 and 1670 and confirmed in 1814 provide for the 'most favoured nation' treatment.

The values of imports whether subject to duty or duty-free and of exports always duty free, are determined by the Statistical Bureau in communication with commercial firms who state the average values of the various articles of merchandise. The quantities are verified by the Customs authorities. The prime origin and ultimate destination of goods are not recorded. The general trade comprehends all imports and exports, the special trade only imports for consumption and exports of home produce. Usually the Customs authorities easily ascertain whether imports and exports belong to the general or the special trade but sometimes the amount of imports for home consumption is determined merely by the excess of imports over exports.

The chief imports into and domestic exports from the United Kingdom from and to Denmark in two years (Board of Trade Returns) were —

Imports into U K	1910	1911	Exports to Denmark	1910	1911
	£	£		£	£
Butter	10,298,192	10,509,137	Coal	1,516,151	1,540,237
Eggs	1,732,107	2,030,607	Cottons	481,714	346,239
Bacon	6,241,720	6,600,937	Iron-ware	401,112	380,408

### Shipping and Navigation

On December 31, 1911, Denmark and colonies possessed 4,252 vessels (of 4 tons and upwards) of 538,863 registered tons in her merchant marine, of which 691 of 414,863 tons were steamers. In 1911, 85,873 vessels of 4,015,804 tons cargo entered the Danish ports, and 36,238 vessels of 1,513,632 tons cargo cleared.

### Internal Communications

Denmark proper (exclusive of Copenhagen) has (end of 1911) 4,344 miles of road, besides 22,382 miles of by ways. There are (1911) railways of a total length of 2,292 English miles open for traffic in the kingdom. Of this total about 1,216 English miles belong to the State, the total cost of which up to March 31, 1912, was 270,649,217 kroner. The railways have a gauge of 4 ft. 8½ inches, except 109 miles of which the gauge is 3 ft. 3½ inches.

The Post Office in the year 1911-12 carried 185,435,522 letters and post cards, and 160,492,918 samples and printed matter. There are 1,125 post-offices. The State telegraphs in 1911-12 carried 3,526,527 messages, of which 992,364 were internal, 2,533,163 international, exclusive of 127,752 official telegrams. The length of State telegraph wires (March 31, 1912) was 8,048 English miles, number of offices 172. At the same date the railway

and private telegraphs had 392 offices. On March 31, 1912, the length of telephonic wires of the State and the private companies was 276,000 English miles. In the year 1911-12 there were 207,719,000 telephonic conversations.

### Money and Credit

On July 31, 1912, the accounts of the National Bank balanced at 11,465 465<sup>1</sup>/<sub>2</sub>. The assets included 4 454,487<sup>1</sup>/<sub>2</sub> in bullion and specie. The liabilities included 8,525,000<sup>1</sup>/<sub>2</sub> note issue 1 486 836<sup>1</sup>/<sub>2</sub> of capital, and 454,916<sup>1</sup>/<sub>2</sub> reserve fund. In Denmark there are about 185 other banks for commercial, agricultural, industrial, and other purposes. On March 31, 1911, there were 521 savings banks, with 1 353,384 depositors, and deposits amounting to 44,219 999<sup>1</sup>/<sub>2</sub> or about 33<sup>1</sup>/<sub>2</sub> to each account.

The nominal value of the coin minted (including recoupage of worn pieces) in Denmark since 1875 is given as follows —

Years ending March 31	Gold	Silver	Brass	Total
	Kroner	Kroner	Kroner	Kroner
1875-1906	82 309 180	22 071 894	1 851,797	62 782,866
1906-1905	4 040 560	1 232 708	199 618	5 472 886
1906	—	587 037	40 041	627,078
1907	—	301 348	80 792	382,140
1908	5 026 970	808 916	129 967	6 965 853
1909	0 801 630	—	189 406	9 441,005
1910	585 270	252,066	—	5,786,236
1911	3 657 240	250 000	20 948	8,987 188
1912	8,680,560	311,694	102 765	4 085 919
<b>Total</b>	<b>71 461 480</b>	<b>25 817 362</b>	<b>7 083 313</b>	<b>99 452,155</b>

### Money, Weights, and Measures

The monetary unit, the *Krone* of 100 *öre*, is of the value of 1s 1<sup>1</sup>/<sub>2</sub>d., or about 18 kroner to the pound sterling.

Gold coins are 20 and 10-kroner pieces. The 20 kroner piece weighs 8 870 grammes .900 fine, and thus contains 8 0645 grammes of fine gold.

The 2 kroner silver piece weighs 15 grammes .800 fine, and thus contains 12 grammes of fine silver.

The standard of value is gold. Silver is legal tender up to 20 kroner.

The use of the metric system of weights and measures, under the law of May 4, 1907, became obligatory in Denmark in public offices on April 1, 1910, and generally on April 1, 1912.

### Diplomatic and Consular Representatives

#### 1 OF DENMARK IN GREAT BRITAIN

*Envoy and Minister* — H. Grevenkop Castenskiöld (1912)

*Secretary of Legation* — Mogens de Sehested

*Honorary Attaché* — Paul Baron Bertouch Lehn

*Consul-General in London* — J. W. Faber

There are Consuls at Belfast, Bristol, Edinburgh (C.G.), Hull (C.G.), Leith, Liverpool, Manchester, Newcastle, Sheffield, Southampton, Swansea, Yarmouth.

## 2 OF GREAT BRITAIN IN DENMARK.

*Envoy and Minister*—Sir Henry C Lowther, K.C.M.G. (1912)

*Secretary*—Richard S Seymour, M.V.O.

*Naval Attaché*—Captain H.D.R. Watson, R.N.

*Military Attaché*—Lieut. Col. T.M. Bridges, D.S.O.

There are Consuls at Copenhagen, Reykjavik (Iceland), St. Thomas (West Indies), Thorshavn (Faroe Islands), Elsinore (V.C.)

## Colonies

The colonial possessions of Denmark consist of territories in Europe and America. Iceland has a local legislature and, under the constitutional law of 1903 a minister appointed by the King and residing at Reykjavik. The area and population of the colonies and the value of their imports into and exports from Denmark alone in 1911 according to Danish returns, were—

Colonies	Area English sq. m.	Population 1911	Import to Denmark 1911	Export from Denmark, 1911
			£	£
Iceland	39,756	85,188	31,350	269,890
Greenland	46,740	13,517	107,710	33,210
West Indies	138	27,086	7,600	25,610
Total	86,634	125,791	146,660	328,710

The trade of Greenland is a State monopoly.

The West Indian Islands, St. Croix, St. Thomas, and St. John, are inhabited mostly by free negroes engaged in the cultivation of the sugar-cane, but the trade with Denmark, formerly considerable, has fallen off in recent years.

## ECUADOR

(REPÚBLICA DEL ECUADOR)

### Constitution and Government

The Republic of Ecuador was constituted May 11, 1830, in consequence of a civil war which separated the members of the original Republic of Colombia, founded by Simon Bolivar, by uniting the Presidency of Quito to the Vice-Royalty of New Grenada, and the Captaincy-General of Venezuela, when they threw off the Spanish yoke. Under the present constitution, promulgated December 23 1906, the executive is vested in a President, elected for the term of four years, while the legislative power is given to a Congress of two Houses: the first consisting of thirty-two senators, two for each province (chosen for four years) and the second of 48 deputies on the basis of one deputy for every 30,000 inhabitants, chosen for two years, both elected by adults who can read and write. The Congress meets on the 10th of August of every year at Quito, the capital without being summoned by the Government. The election of the President takes place in a direct manner by the people. Under the present constitution there is no election for Vice President. In case of death, or other cause of vacancy in the office of President, he is replaced (1) by the President of the Senate of the Last Congress, and (2) if he should also fail, by the President of the Chamber of Deputies.

*President of the Republic*—General Leonidas Plaza (elected April 1, 1912)

The President, who receives a salary of 24,000 sucres a year, theoretically exercises his functions through a Cabinet of five ministers (Interior, Foreign affairs, public instruction, finance and war) who, together with himself, may be impeached by Congress and who, with seven other members, form a Council of State. Each minister receives a salary of 2,880 sucres a year. The President has the power of veto, but if Congress insist on a vetoed bill becoming law, he has no alternative but to give his assent to it. He may summon an Extraordinary Congress for a specified purpose but he cannot dissolve the Chambers or shorten their sittings. By the terms of the Constitution privileges of rank and race are not allowed to exist within the Republic, but most of the Indians are virtually in bondage. By an edict of 1898, the Indians are exempted from paying tribute, and are admitted to citizenship.

The Provinces are administered by Governors, appointed by the Government, their subdivisions, or cantons, by political chiefs, and the parishes by political lieutenants. The Galapagos Archipelago is under a local administrator.

### Area and Population

The area of Ecuador is about 116,000 square miles, divided into sixteen provinces and one territory, with about 1,205,600 inhabitants, or if uncivilised Indians be included, about 1,400,000. The bulk of the population is Indian, inhabitants of pure European blood are few, those of mixed blood are estimated at about 400,000. Included in the above statement are the

Galapagos or Tortoise Islands, with an area of 2,400 square miles, and a population of about 400 Ecuador and Colombia, under treaty of November 5, 1904, are to submit their boundary dispute to the German Emperor as arbiter. The dispute between Ecuador and Peru was referred to the King of Spain, but he has declined to interfere. (See under Peru.)

The population of the Republic is distributed as follows —

Provinces	Pop	Provinces	Pop	Provinces	Pop
Carchi	36,000	Armay	132,400	Manabi	64,100
Imbabura	68,600	Loja	66,000	Esmeraldas	14,800
Pichincha	205,000	Bolivar	43,000	Oriente	80,000
Leon	109,600	Rioa	32,800	Galapagos	400
Tungurahua	108,000	Oro	32,600		
Chimborazo	122,000	Guayas	98,100		1,272,000
Cañar	64,000				

Estimated population 1910 1,500,000

The chief towns are the capital, Quito (70,000), Guayaquil (80,000) Cuenca (80,000), Riobamba (18,000), Ambato, Loja and Latacunga (each about 10,000), Bahia (8,000), Esmeraldas (4,000)

### Religion and Instruction.

The Church of the Republic, according to the Constitution, is the Roman Catholic, which has one archbishop (Quito) and six suffragan bishops. Its income, in substitution for tithes, is annually provided for in the estimates. In 1904 a law was passed and promulgated placing the Church and its property under the control of the State, and forbidding the foundation of new orders or the entrance of foreign religious communities into the country. All members of the Episcopate are required to be Ecuadorian citizens. Civil marriages are obligatory in accordance with regulations prescribed by law of December, 1902. Primary education is gratuitous and obligatory. There is a University in Quito with 32 professors and University bodies in Cuenca and Guayaquil. There are 9 schools for higher education, 35 secondary, and (1912) 1,590 primary schools, with 98,413 pupils and 2,826 teachers. There are commercial and technical schools in Quito and Guayaquil, and in 1900 English began to be taught in the normal schools, about a dozen American teachers being employed.

### Justice and Crime

The appellate courts are the Supreme Court in Quito, which is the highest tribunal and consists of 5 justices elected by Congress for a term of 6 years. The six superior courts are located at Quito, Guayaquil, Cuenca, Riobamba, Loja and Portoviejo. The first two are composed of 6 judges, the remainder of 3 judges each, all elected by Congress for 6 years. The Court of Accounts is empowered to audit and investigate all public accounts. In the Republic there are 88 cantonal and 359 parochial justices, and 85 solicitors admitted to practice.

### Finance

Of the total revenue about 70 per cent. is derived from customs duties, 15 per cent. from taxes on cocoa, real estate, white rum, and tobacco, 6 per cent. from salt and gunpowder monopolies, and the remainder mostly from excise, rents of State property, and the postal department. The revenue and

expenditure for recent years are given as follows in sterling (1 sucre = 34½), but the figures are not to be taken as representing the exact state of affairs —

	1909	1910	1911	1912 <sup>1</sup>	1913 <sup>1</sup>
	£	£	£	£	£
Revenue	1 637,960	1 511,720	1,526 419	1 897,183	2 038,658
Expenditure	1 556 468	1 547 948	1 588 613	1,897 132	2 038,658

<sup>1</sup> Estimates

The principal items of revenue are Import and export duties, alcohol duties, and salt monopoly. The chief items of expenditure are Government, army and navy education.

On the 3rd of January, 1911, a new foreign loan of 8,000,000 sucres (300,000 £), was contracted with the house of Speyer & Co., of New York. The issue was at 85 for 100 and the guarantee was, 50 per cent. of the export dues and 500 000 sucres out of the liquor dues, in dividends of 21,000 sucres per month.

No other details as to Foreign debt nor as to the Internal debt, have been made public, as owing to the violent change of Presidents and Ministers, the report of the Finance Minister has not been presented to the 1911 Congress. Up to 31st Dec., 1911, the foreign debt was stated to be 3,338,399 £ and the internal debt, 1,180,130 £.

### Defence

The Ecuadorian army in 1910 numbered 7,310 officers and men. This force is composed of 3 brigades of artillery, 9 battalions of infantry, and a regiment of cavalry. The national guard is said to consist of 100,000 men. A mining and torpedo section, a sanitary section and a telegraph and telephone corps were created in 1910. Military service is obligatory from 18 to 32 years of age in the army, and from 32 to 45 in the national guard.

The Navy consists of three vessels, the ex-Chilian cruiser *Ministro Zenteno*, 3,600 tons, eight 6 inch guns, the *Libertador Bolívar* a torpedo gunboat of 800 tons, and an old sloop which was formerly the French *Papin*.

### Production and Commerce

The staple produce of Ecuador is cocoa, which is grown in Los Rios and other provinces near the coast. The total exports of cocoa in 1911 were valued at 1,602,459 £. The largest cocoa estate in the country has been taken over by an English company. Coffee is also grown, the exports were valued in 1910 at 223,911 £. The rubber industry is also important as the accessible supply from wild trees is being rapidly exhausted, attention is now turned to the planting of trees. Other products are tagua (ivory nuts), exports 1911, 178 793 £, tobacco, the annual yield of which is from 30,000 to 40,000 quintals, and sugar. Cotton cultivation has almost ceased, and all that is now produced is sent to the mills in the interior to be manufactured into rough calicoes and other goods. Peruvian bark exports have fallen to 60 or 70 tons a year. Mangrove bark (for tanning), alligator skins, and kapok (silk cotton tree fibre *Bombax ceiba*) are exported in small quantities. Ecuador is auriferous, but mining companies have had little success. The Esmeraldas mines have absorbed much foreign capital with no practical result. At Zaruma, in the province of Oro, there are quartz crushings worked by an American company which in 1910 produced gold to the value (approximate) of 25,000 £, and cyanide lime (containing gold,

silver, copper, zinc and iron) to the value of 28,000*l*, total, 51,000*l*. At Pillahum in Cañan rich silver ore is found, but is not now worked. Petroleum is found—the oil fields of Santa Elena are being worked by two British Companies. The country is known to be also rich in copper, iron, lead and coal, and sulphur exists in great quantities in the Pichincha district and in the Galapagos Islands.

Panama hats are made almost exclusively in Ecuador, and the demand for them is greater than the makers can meet. To protect the industry a duty is charged on the straw exported. The value of exports of hats in 1910, 258 34*l*. There are flour mills, sugar works, breweries, and chocolate factories.

The value of imports and exports for five years is given as follows in sterling (10 sucres = £1) —

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports	1,969,967	2,045,473	1,870,444	1,647,660	—
Exports	2,290,695	3,089,429	3,000,623	3,427,100	2,560,046

In 1910 the chief imports were textiles, foodstuffs, iron work, clothing, and gold and silver. The chief exports were cocoa 2,105,701*l*, tagua, or ivory nuts, 476,086*l*, rubber, 206,590*l*. Of the imports in 1910, the value of 482 895*l* was from the United States, 512,400*l* from Great Britain, 323,321*l* from Germany, 108,134*l* from France. Of the exports, in 1911, the value of 932,649*l* went to France, 641 896*l* to the United States, 439,405*l* to Germany, 204,397*l* to Great Britain and colonies. Of the large quantities of cocoa shipped to Havre, the greater part is ultimately distributed among other countries.

The chief articles of import from Ecuador into Great Britain in 1911 consisted of cocoa of the value of 844,386*l*, coffee 2,828*l*, straw hats, 183,513*l*. The chief exports of British produce to Ecuador in 1911 were cotton goods, to the value of 375 754*l*, woollens, 55,739*l*, iron, wrought and unwrought, 28,384*l*.

### Shipping and Internal Communications

In 1910 there entered at Guayaquil 213 vessels of 896,262 tons (190,390 tons British), and cleared 215 vessels of 401,258 tons (195,388 tons British). Guayaquil is visited by the steamers of three European lines passing through Magellan's Straits, as well as by steamers plying only on the Pacific coast.

The roads of the country are mostly bridle-roads only, and often impassable for half the year. The one highway is from Quito towards Guayaquil, for a distance of 115 miles, but the work of thus connecting the capital and the port has long been discontinued. There is river communication throughout the principal agricultural districts on the low grounds to the west of the Cordillera by the rivers Guayas, Daule, and Vinces (navigable for 200 miles by river steamers in the rainy season), and other small affluents thereof. Navigation of these inland waters is carried on by about 17 American and Ecuadorian-built side-wheel and screw steamers, 30 steam yachts or tow ferry boats, many small steam launches, and a large fleet of gasoline launches, canoes, and other small craft.

A railway is open from Duran (opposite Guayaquil) to Latacunga (and

now Chimbacella) at only 15 minutes distance in coach from Quito. Length of line about 370 (1912) miles. This line was transferred by the Government to the Guayaquil and Quito Railroad Company, and is extended to Quito. Railways for the development of local trade have been undertaken by several local authorities. That from Puerto Bolívar (Machala) to the cocoa districts is being worked and extended, that from Ambato to the Araymo River is not yet begun. There is a project for a railway from Bahía de Caracaz to Quito undertaken by a French company. This has been partially built and is running for about 40 to 50 miles to the important cocoa district of Chone, in Manabí, with various stations at Calcota. Another line from Manta to Santa Ana, in the ivory, nut and coffee districts of Manabí, is also in course of construction and will shortly arrive at the capital of the Province Porto Viejo.

The total length of telegraphs is about 2,602 miles, Quito being connected with Guayaquil and the coast, with the Republics of Colombia and Peru, and by cable with the rest of the world. There are about 60 telegraph stations. Two telephonic systems with 400 subscribers each are established at Guayaquil, and a system is also in operation in Quito.

The inland correspondence amounts to about 820,000 letters yearly, and the foreign correspondence to 1,800,000 letters and 6,347,000 newspapers and packets.

### Money and Credit

Ecuador having no mint, the coin of the country is minted in England, the United States, and Peru.

There are two banks authorized to issue notes for circulation, viz., the Banco del Ecuador, capital 3,000,000 sucres, and the Banco Comercial y Agrícola capital 5,000,000 sucres. On December 31, 1909, the Government owed 279,187½ to the former bank, and 252,181½ to the latter. By the banking law of 1897 the banks are required to hold at least half their metallic reserve in gold (12 = 10 sucres). In 1909 their united gold reserve was 427,383½, and their circulation 6,651,897 sucres.

Other banks are the Banco Hipotecario with a capital of 2,000,000 sucres and the Banco Territorial. These are only mortgage loan banks.

On December 31, 1910 the gold and notes in circulation were as follows: gold 5,086,925 and two (508,692½) silver, 2,782,954 (278,295½) and note \$ 834,885 (983,488½).

### Money, Weights and Measures

A law passed in 1898 provided for a gold standard, which was established on June 4, 1900. The new coinage consists of the gold *condor* of 10 sucres weighing 8.136 grams and containing 7.3224 grams of fine gold (equivalent to the English sovereign), the silver *sucre* and its sub-divisions, and nickel and copper pieces. The *sucre*, so called from the likeness of Marshal Sucre (a former President) imprinted on the coin, is legal tender only up to 10 sucres.

By a law of December 6, 1856, the French metrical system of weights and measures was made the legal standard of the Republic but is not adopted by commerce. The quintal is equivalent to about 101 pounds.

## Diplomatic and Consular Representatives

### 1 OF ECUADOR IN GREAT BRITAIN

*Minister* — Vacant.

*Consul General* — C. Nevares (London)

There are Consular Representatives at Burnungham, Cardiff, Glasgow, Hull, Liverpool (C G), Manchester, Southampton and Falmouth

### 2 OF GREAT BRITAIN IN ECUADOR

*Minister* — C. L. des Grae (who is also Minister at Lima, Peru)

*Consul at Guayaquil* — A. Cartwright

*Consul at Quito* — G. W. E. Griffith (also Chargé d'Affaires)

*Vice Consul at Guayaquil* — George Powell

## FRANCE.

### Constitution and Government

#### I CENTRAL.

SINCE the overthrow of Napoleon III on September 4, 1870, France has been under a Republican form of government, confirmed on February 25, and July 16, 1875 by a constitutional law, which has been partially modified in June 1879 August 1884, June 1885, and July 1889. It vests the legislative power in the Chamber of Deputies and the Senate, and the executive in the President of the Republic and the Ministry.

The President is elected for seven years, by an absolute majority of votes, by the Senate and Chamber of Deputies united in a National Assembly, or Congress. He promulgates the laws voted by both Chambers, and ensures their execution. He selects a Ministry from the two Chambers, but may, and sometimes does, choose ministers who are not members of either Chamber (e.g. a general as Minister for War, an admiral as Minister of Marine, a civilian as Minister for Foreign Affairs) he appoints to all civil and military posts, has the right of individual pardon, and is responsible only in case of high treason. The President concludes treaties with foreign Powers, but treaties which affect the area of France or of French colonies must be approved by the Legislature, and he cannot declare war without the previous assent of both Chambers. Every act of the President has to be countersigned by a Minister. With the consent of the Senate he can dissolve the Chamber of Deputies. In case of vacancy the two Chambers united immediately elect a new President.

*President of the Republic.*—M. Raymond Poincaré, born 1858, elected President, January 17, 1913.

The Ministers or Secretaries of State the number of whom varies, are usually, but not necessarily, members of the Senate or Chamber of Deputies. The President of the Council (Premier) chooses his colleagues in concert with the President of the Republic. Each Minister has the direction of one of the great administrative departments and each is responsible to the Chambers for his acts, while the Ministry as a whole is responsible for the general policy of the Government.

The Ministry consists of the following members, March 21, 1913 —

*Prime Minister and Minister of Public Instruction.*—M. Barthou.

*Minister of Justice.*—M. Rostier.

*Minister of the Interior.*—M. Klotz.

*Minister of War.*—M. Bonnaud.

*Minister of Marine.*—M. Baudin.

*Minister of Foreign Affairs.*—M. Stephen Pichon.

*Minister of Finance.*—M. Desvieux.

*Minister of Colonies.*—M. Jean Morel.

*Minister of Agriculture.*—M. Clémentel.

*Minister of Posts and Telegraphs.*—M. Massé.

Minister of Public Works — M. Thierry

Minister of Labour — M. Chéron

*Under Secretaries of State*

For Interior — M. Paul Moral.

For Finance — M. Bourelly

For Marine. — M. Monzie.

For Fine Arts — M. Leon Bérard

The following is a list of the Sovereigns and Governments of France, from the accession of the House of Bourbon —

<i>House of Bourbon</i>		<i>Second Republic</i>	
Henri IV	1589-1610	Provisional Government	
Louis XIII le Juste	1610-1643	Feb-Dec	1848
Louis XIV le Grand	1643-1715	Louis Napoleon	1848-1852
Louis XV	1715-1774	<i>Second Empire.</i>	
Louis XVI (+ 1793)	1774-1792	Napoléon III (died 1873)	1852-1870
<i>First Republic</i>		<i>Third Republic</i>	
Convention	1792-1793	Government of National	
Directory	1793-1799	Defence	1870-1871
Consulate	1799-1804	Adolphe Thiers, President	1871-1873
<i>First Empire.</i>		Marshal MacMahon	1873-1879
Napoléon I (+ 1815)	1804-1814	F J P Jules Grevy,	1879-1887
<i>House of Bourbon restored.</i>		F Badi Carnot	1887-1894
Louis XVIII	1814-1824	Casimir Perier	
Charles X. (+ 1836)	1824-1830	(June-Jan.)	1894-1895
<i>House of Bourbon-Orléans</i>		Felix Faure	1895-1899
Louis-Philippe (+ 1830)	1830-1848	Emile Loubet	1899-1906
		Armand Fallières	1906-1913
		Raymond Poincaré	1913

The Chamber of Deputies is elected for four years by universal suffrage, and each citizen 21 years old, not actually in military service, who can prove a six months residence in any one town or commune, and not otherwise disqualified, has the right of vote. Deputies must be citizens and not under 25 years of age. The manner of election of Deputies has been modified several times since 1871. The *scrutin de liste*, under which each elector votes for as many Deputies as the entire department has to elect, was introduced in 1871. In 1876 it was replaced by the *scrutin d'arrondissement*, under which each department is divided into a number of *arrondissements*, each elector voting for one Deputy only, in 1885 there was a return to the *scrutin de liste*, in 1889 the *uniformal vote* was reintroduced and in 1912 the previous practice was again resorted to. In 1889 it was enacted that each candidate is bound to make, within the fortnight which precedes the elections, a declaration as to his being a candidate for a given constituency, and for one constituency only—all votes which eventually may be given for him in other constituencies being reckoned as void. Multiple elections and elections of persons previously condemned by the law courts are thus rendered impossible. The Chamber verifies the powers of its members. In each constituency the votes are cast up and the Deputy proclaimed elected by a commission of Councillors General appointed by the prefect of the department. The Chamber is now composed of 597 Deputies, each *arrondissement* elects one Deputy, and if its population is in excess of 100,000, it is divided

into two or more constituencies. In 1901 there were 10,868,421 inscribed electors, in 1898 there were 10,281,532, and 7,657,429 voted.

Chamber of Deputies, elected May, 1910 —Radicals, 118, Radical Socialists, 150, Democratic Left, 72 Organized Socialists, 75, Progressivists, 76, Independent Socialists, 34, Action Liberales, 32, Right, 21, Independent, 24.

The Senate is composed of 300 members, elected for nine years from citizens 40 years old, one third retiring every three years. The election of the Senators is indirect and is made by an electoral body composed (1) of delegates chosen by the Municipal Council of each commune in proportion to the population, and (2) of the Deputies, Councillors General, and District Councillors of the department. Besides the 225 Departmental Senators elected in this way, there were, according to the law of 1871, 75 Senators elected for life by the united two Chambers, but by the Senate Bill of 1884 it was enacted that vacancies arising among the Life Senatorships would be filled by the election of ordinary nine years Senators the department which should have the right to the vacant seat to be determined by lot. The Princes of deposed dynasties are precluded from sitting in either House.

The Senate and Chamber of Deputies assemble every year on the second Tuesday in January, unless a previous summons is made by the President of the Republic, and they must remain in session at least five months out of the twelve. The President is bound to convoke them if the demand is made by one half of the number of members composing each Chamber. The President can adjourn the Chambers, but the adjournment cannot exceed the term of a month, nor occur more than twice in the same session.

Bills may be presented either in the Chamber or Senate by the Government or on the initiative of private members. In the first case they are remitted to the bureau for examination, in the second, they are first submitted to a commission of parliamentary initiative. Financial laws must be first presented to and voted by the Chamber of Deputies.

The Senate, constituted as a High Court of Justice, tries cases of attempt against the safety of the State or of plotting to change the form of government.

Senators and Deputies are paid 15 000 francs (600*l.*) a year from January 1 1907 and the Presidents of the two Chambers receive, in addition, 72,000 francs (2 840*l.*) for the expense of entertainment. Members of both Chambers travel free on all railways by means of a small annual payment. The dotation of the President of the Republic is 600,000 francs (24,000*l.*), with a further allowance of 600 000 francs for his expenses. On January 1, 1905, a fund was instituted for pensions to ex Deputies, or their widows and orphans. It is supported by contributions from Deputies (deducted from their pay) as well as by gifts and legacies.

France has besides, a special institution under the name of *Conseil d'Etat*, which was introduced by Napoleon I, and has been maintained since. It is presided over by the Minister of Justice or (in his absence) by a vice president, and is composed of Councillors, Masters of Requests (*Maîtres des Requêtes*), and Auditors, all appointed by the President of the Republic. Its duty is to give opinion upon such questions, chiefly those connected with administration, as may be submitted to it by the Government. It is judge in the last resort in administrative suits, and it prepares the rules for the public administration.

## II LOCAL GOVERNMENT

For administrative purposes France is divided into 86 departments, or 87 if the 'territory of Belfort (remnant of the department of Haut-Rhin) be considered as a separate department. Since 1891 the three departments of Algeria are also treated, for most purposes, as part of France proper. The department has representatives of all the Ministries, and is placed under a Prefect, nominated by Government, and having wide and undefined functions. He is assisted by a Prefecture Council, an administrative body, whose advice he may take without being bound to follow it. The Prefect is a representative of the Executive, and, as such, supervises the execution of the laws, issues police regulations, supplies information on matters which concern the department, nominates subordinate officials, and has under his control all officials of the State. There is a Sub-Prefect in every *arrondissement* except in those containing the capitals of departments and the department of the Seine.

The unit of local government is the *commune*, the size and population of which vary very much. There were in 1906, 36,222 communes, but the territorial land survey of 1909 had the effect of increasing their number by 7. Most of them (31 690) have less than 1,500 inhabitants, and 18,471 have even less than 500, while 124 communes only have more than 20,000 inhabitants. The local affairs of the commune are under a Municipal Council, composed of from 10 to 36 members, elected by universal suffrage, and by the *scrutin de liste* for 4 years by Frenchmen after 21 years and 6 months' residence, but each act of the Council must receive the approval of the Prefect, while many must be submitted to the Council General or even to the President of the Republic, before becoming lawful. Even the commune's quota of direct taxation is settled by persons (*répartiteurs*) chosen by the Prefect from among the lists of candidates drawn up by the Municipal Council.

Each Municipal Council elects a Mayor, who is both the representative of the commune and the agent of the central government. He is the head of the local police and, with his assistants, acts under the orders of the Prefect.

In Paris the Municipal Council is composed of 80 members, each of the 20 *arrondissements* into which the city is subdivided has its own Mayor. The place of the Mayor of Paris is taken by the Prefect of the Seine, and, in part, by the Prefect of Police. Lyons has an elected Mayor, but the control of the police is vested in the Prefect of the department of the Rhone.

The next unit is the *canton* (2,911 in France), which is composed of an average of 12 communes, although some of the largest communes are, on the contrary, divided into several cantons. It is a seat of a justice of the peace (*juge de paix*) but is not an administrative unit.

The district, or *arrondissement* (362 in France), has an elected *conseil d'arrondissement*, with as many members as there are cantons, its chief function being to allot among the communes their respective parts in the direct taxes assigned to each *arrondissement* by the Council General. That body stands under the control of the Sub-Prefect. A varying number of *arrondissements* form a department, which has its *conseil général* renewed by universal suffrage to the extent of one-half every three years (one Councillor for each canton). These *conseils* deliberate upon all economical affairs of the department, the repartition of the direct taxes among the *arrondissements*, the roads, normal schools, and undertakings for the relief of the poor. Their decisions are controlled by the Prefect, and may be annulled by the President of the Republic.

## Area and Population.

## I. PROCESS AND PRESENT CONDITION.

The legal population at the date of the last two enumerations was 1—

Departments	Area Engl. sq miles	Population		Population per square mile 1911
		March 1908	March, 1911

Between the years 1811 and 1820 the average annual surplus of births over deaths was 5.7 per thousand of population, between 1851 and 1860 it was 3.4, and between 1881 and 1885 it was 1.6. The average number of births per marriage was (1851-85) about 3, in 1891 it was 2.)

In the following table, the third, fourth, and fifth columns give in brackets for the first five censuses the population, its density, and its average annual increase on the present territory of France, and are thus comparable with the data for the censuses posterior to the loss of Alsace and Lorraine.

# AREA AND POPULATION

<sup>1</sup> Decrease

In 1906, the foreign nationalities most numerous represented were English, 35,990, Belgians and Luxembourgeois 310 433, Germans, 87,836 Austrians, 18,001, Swiss, 68 892 Italians, 377 638 Spaniards, 80,914, Russians 25,606 others, 46,576, total, 1 046,885 In 1911 the total was 1,132,696

The active population of 1906 was returned under the following occupations Fisheries, 78 000, agriculture and forestry, 8,777 053, mines and quarries, 281 027, manufacturing industries 5,979,216, transport, &c, 887,837 commerce, 2,002 681, liberal professions 423,179 domestic service, &c 1 012,232, public service (including the army), 1,220,154, total, 20,720 879, of whom 7,693 412 were of the female sex

## II MOVEMENT OF THE POPULATION

### Births, Deaths, and Marriages

Year	Marriages	Living Births	Illegitimate living Births	Deaths	Surplus of Births over Deaths	Still born
1906	806,487	806,847	71,466	780,196	26,651	37,326
1907	814,061	772,681	71,076	791 752	—19,071	36,765
1908	815,641	792,178	70 413	744,135	+48,043	37,536
1909	807,687	769,565	67,505	754,957	+14,608	36,076
1910	807,710	774,890	66,978	702,972	+71,418	36,009
1911	807,788	742,114	—	776,983	—84,869	33,840

In 1911 the average birth rate for all France (living births) was 1 87 per cent. of population The départements in which the rate was highest were Finistère, 2 69 per 100, Pas-de-Calais, 2 62 per 100, Morbihan, 2 56 per 100 It was lowest in Gers, 1 26, and Lot-et-Garonne 1 34. The marriage rate in 1911 was 1 55 per cent., and the death rate 1 96 In 1910 the living

births comprised 395,669 male and 378,721 female births, or 1,046 male to 1,000 female.

The number of divorces was 10,818 in 1907, 11,461 in 1908, 12,770 in 1909, 12,975 in 1910, and 13,058 in 1911, the number having steadily increased since 1900

### III PRINCIPAL TOWNS

The following towns, according to the census of 1911 have each a total population over 85,000 —

Paris	2,888,110	Rennes	79,372	Lorient	49,039
Marseille	550,619	Grenoble	77,488	Caen	46,984
Lyon	523,796	Dijon	76,847	Cluchy	46,676
Bordeaux	261,678	Tours	73,398	Bourges	45,735
Lille	217,807	Calais	72,322	Neuilly sur	
Nantes	170,535	Orléans	72,096	Seine	44,616
Toulon	149,578	St Denis	71,759	Cherbourg	43,731
St. Étienne	148,656	Le Mans	69,361	Montreuil	43,217
Nice	142,940	Levallois Perret	68,703	Asnières	42,583
Le Havre	136,159	Clermont Ferrand	67,386	St Ouen	41,904
Bouen	124,987	Versailles	60,478	Poitiers	41,242
Roubaix	122,723	Besançon	57,976	Perpignan	39,510
Nancy	119,949	Boulogne sur		Belfort	39,371
Reims	115,178	Seine	57,027	Dunkirk	38,891
Toulon	104,582	St Quentin	55,571	St. Nazaire	38,267
Amiens	93,207	Troyes	55,486	Angoulême	38,211
Lunéville	92,181	Boulogne sur Mer	53,128	Pau	37,149
Brest	90,540	Beziers	51,042	Roanne	36,397
Angers	83,786	Avignon	49,304	La Rochelle	36,871
Tourcoing	82,644			Douai	36,314
Nîmes	80,437			Rocheport	35,019
Montpellier	80,230				

On March 4, 1906 the urban population was 16,537,284, and rural 22,715,011

In 1906 the resident population of the communes, and in 1911 the number of communes was as follows —

Communes with Population	Number 1911	Number 1906	Population 1906
Not over 500	19,270	18,716	5,077,781
501- 1,000	9,409	9,716	6,740,687
1,001- 2,000	4,845	5,043	6,985,251
2,001- 3,000	1,280	1,289	3,180,116
3,001- 4,000	512	522	1,790,287
4,001- 5,000	276	268	1,196,264
5,001- 10,000	371	341	2,469,932
10,001- 20,000	164	153	2,130,576
20,001- 30,000	184	57	1,413,798
30,001- 50,000		34	1,263,889
50,001-100,000		23	1,583,544
Over 100,000		15	5,470,143
<b>Total</b>	<b>85,241</b>	<b>86,222</b>	<b>39,262,245</b>

For fiscal and electoral purposes the population of each commune is divided into *agglomerated*, *scattered*, and *separated (complet à part)*, the first two constitute the municipal population, and the third consists of garrison, college, prison, and hospital population. Different from this is the distinction between urban and rural population, a commune being urban where the agglomerated population is over 2,000, and rural where under 2,000.

## Religion

No religion is now recognised by the State

Under the law promulgated on December 9, 1905, the Churches were separated from the State, the adherents of all creeds were authorised to form associations for public worship (*associations cultuelles*), and the State, the Departments and the Communes were relieved from payment of salaries. As transitory measures, ecclesiastics over 45 years of age and of over 25 years of service remunerated by the State were entitled to a pension and all other ecclesiastics were to receive a grant during a period of from four to eight years. All buildings actually used for public worship and as dwellings in that connection were to be made over after an inventory was taken, to the associations for public worship the places of worship for the total period of the existence of these associations, the ecclesiastical dwellings for a time.

The law of January 2, 1907, provides (among other things) that, failing *associations cultuelles*, the buildings for public worship, together with their furniture, will continue at the disposition of the ministers of religion and the worshippers for the exercise of their religion, but, in each case, there is required an administrative act drawn up by the *préfet* as regards buildings belonging to the State or the Departments, and by the *maire* as regards buildings belonging to the Communes. Forms of the documents necessary under the new law have been supplied by the Government, but the arrangement has not been accepted by the clergy, and the religious difficulty (April, 1909) still continues.

The grants paid by the State in the last year of the old régime amounted to 37,528,800 francs (1 501,150 l.), those paid by Departments and Communes to 7,555,042 francs (302,200 l.). The question of pensions and allowances to be paid under the law of December 9, 1905, is not settled, the clergy having refused to submit to that law.

There are 17 archbishops and 67 bishops of the Roman Catholic Church in France, not including Algeria or the colonies. The Protestants of the Augsburg Confession are, in their religious affairs, governed by a General Consistory, while the Reformed Church is under a Council of Administration, the seat of which is at Paris.

The Associations law, passed July 1, 1901, requires religious communities to be authorised by the State, and no monastic association can be authorised without a special law in each particular case. Before the passing of that law there were 610 recognised associations, and 753 not recognised, the establishments, mostly not recognised, numbered 19,514, and their members 159,623 (30,186 men and 129,437 women). After the passing of the law, of the 753 associations not recognised, 305 dissolved themselves and 448 asked for authorisation, which was refused by the Chambers to the majority of them.

### Instruction.

The Minister of Instruction, seconded by the Government educational bureaux and inspectors general, directs public and controls private schools. The Superior Council of 58 members has deliberative, administrative and judiciary functions, and a Consultative Committee advises respecting the working of the school system, but the inspectors general are in direct communication with the Minister. For local educational administration France is divided into 17 circumscriptions, called Academies, each of which has an Academic Council whose members comprise a certain number elected by the professors or teachers. The Academic Councils deal with all grades of instruction. Each is under a Rector, and each is provided with academy inspectors, one for each department except Nord which has two (one being for primary instruction), and Seine which has eight (one being director of primary instruction), besides primary inspectors of schools, usually one for each *arrondissement*, 20 inspectors (male or female) for the department of the Seine. Each department has a council for primary educational matters, the *prefet* being president, and this body has large powers with respect to the inspection, management and maintenance of schools and the opening of free schools.

Since 1878 primary instruction has been entirely reorganised and great progress has been made. The law of August 9, 1879, rendered obligatory for each department the maintenance of two primary normal schools: one for school masters, the other for school mistresses: there are two higher normal schools of primary instruction: one at Fontenay aux Roses for professors for normal schools for school mistresses, the other at St. Cloud for professors for normal schools for school masters. The law of June 16, 1881 made instruction absolutely free in all primary public schools: that of March 28, 1882, rendered it obligatory for all children from 6 completed to 13 years of age. The law of October 30, 1886, is the organic law of primary instruction now in force; it established that teachers should be lay: for infant schools it substituted *écoles maternelles* instead of *salles d'asile*; it fixed the programmes of instruction and established freedom of private schools under the supervision of the school authorities. The laws of July 19, 1889, and July 26, 1889, March 1 and Dec. 30, 1903 and April 22, 1905 determined the payment of the teachers, who are nominated by the *prefet* on the recommendation of the Academy inspector under the authority of the minister and who (except in towns of more than 150,000 inhabitants) are paid directly by the State which itself receives the eight additional centimes for primary instruction, formerly collected on behalf of the communes and departments.

The application of the law of July 1, 1901 as regards the teaching congregations, resulted in 1902-03 in the refusal of authorisation to the congregations applying for it and the closing of many private establishments. A law of July 7, 1904, decided on the suppression of all congregational teaching within a period of 10 years.

The following table shows the condition of primary instruction at various dates (in the figures of 1876-77 Algeria is not included, it has been included since 1887-88) —

Description of Schools	France	France and Algeria.			
	1876-77	1904-05	1910-11

1 Masters

Mistresses

3 Boys.

4 Girls

The number of pupils enrolled in the schools, public or private, is greater than the number attending them, since children changing their schools in the course of the year are enrolled several times.

Since 1903-04 the number of pupils in public schools increased, and that of the pupils in private clerical schools decreased as much the cause being, of course, the closing of congregationist schools. From 1901-02 to 1906-07 3 107 public clerical primary schools and 13,327 private clerical schools were closed by order of the Government, while 3,840 public lay and 9,015 private lay schools were opened to take the place of the schools closed. Many of the clerical schools have been transformed into lay schools, retaining their confessional character. From 1907-08 to 1908-09 there was an increase of 25 876 pupils in the lay public schools, and a diminution of 7,810 in the clerical public schools.

In the infant schools the number of pupils was 753,708 in 1901-02, and 690,922 in 1910-11 owing to the closing of many clerical private infant schools.

The pupils of superior public primary schools and of supplementary courses (which are comprised in the total of pupils of primary instruction) were (public and private schools) in 1901-02 88,611 (40,644 boys and 27,967 girls), and in 1910-11 102,063 (51,659 boys and 50,404 girls).

Courses of instruction for adults are conducted in the evening by teachers in their schools, and the number of adult pupils was estimated in 1910-11 at 51,925, and for 1911-12, 52,797. Besides, there are many popular lectures.

Besides the courses for adults in the primary schools, there are many courses provided by private associations, subventioned or not by the communes.

Pupils on leaving primary schools can obtain a certificate; in 1911

194,405 pupils (103,580 boys and 90,825 girls) obtained the certificate of primary instruction, and 6,185 pupils (3,558 boys and 2,627 girls) that of higher primary instruction. In 1911, 3.0 per cent. of the conscripts could neither read nor write, as compared with 3.0 per cent. in 1910 and 3.2 per cent. in 1909. In 1906 8 per cent. of the men married and 4 per cent. of the women signed the register with a cross.

In 1911 there were granted 5,810 elementary licences (brevets élémentaires) to school masters and 14,812 to school mistresses, 1,688 higher licences to masters, and 4,496 to mistresses (brevets supérieurs), 2,261 certificates of pedagogic efficiency to masters, and 3,915 to mistresses.

The number of primary normal schools (exclusive of Fontenay and St. Cloud) is 84 for school masters, and 82 for school mistresses (France and Algeria). The number of pupil teachers in primary normal schools in 1911-12 was 4,468 men and 4,892 women.

The cost of public primary instruction was in 1877 for France, 89½ million francs (over 3½ millions sterling) of which 22 millions (or 880,000 £) from the State, in 1897 for France and Algeria, 200 millions (8 millions sterling) of which 180 millions (or 5½ millions sterling) from the State. In 1912 the cost to the State was about 216 million francs, or 10½ millions sterling, exclusive of 10 millions for the cost of school building.

*Secondary Instruction. Boys.*—Secondary instruction is supplied by the State in the lycées, and by the communes in the colleges, by associations and by private individuals in free establishments. The course of study extends over 7 years, 4 in the first cycle, and 3 in the second, with four different courses of study, 1, Latin, Greek 2, Latin, sciences, 3, Latin living languages, 4, sciences, living languages.

Teachers must not belong to any congregation must have the diploma of licence, and a diploma proving aptitude in teaching, and free secondary schools must be open to State inspectors.

The number of public secondary schools for boys and the number of pupils in 1905, 1910 and 1911 were as follows —

Public institutions France and Algeria	1905		1910		1911	
	No.	Pupils	No.	Pupils	No.	Pupils
Lycées	110	60,211	111	60,418	112	61,194
Communal colleges	228	34,254	231	36,178	233	36,818

In the lycées 74.2 per cent. of the boys received secondary instruction, 26.8 per cent. were in the elementary or primary classes. In the colleges there were 13,191 boarders and 23,127 day pupils, the proportions were 59.4 per cent. in the secondary classes properly so-called, 27.8 per cent. in the elementary, preparatory and infant classes, and 12.8 per cent. in the agricultural, commercial and industrial classes.

Private institutions	1876		1906		1908	
	No.	Pupils	No.	Pupils	No.	Pupils
Lay	464	51,268	196	18,813	356	13,835
Clerical	809	66,816	845	48,928	871	64,428

From 1869 to 1876 the number of free lay establishments decreased by

165, that of clerical establishments increased by 31. From 1876 to 1909 the number of lay establishments still further decreased, and that of ecclesiastical establishments increased.

Besides, there were in 1906, 182 small seminaries under the authority of bishops, intended primarily for the preparation of pupils for the ecclesiastical career. They contained 13,966 pupils, but since the separation of the Church from the State they have been changed into free establishments, and are included without distinction in the total number of free clerical institutions.

*Girls*—The following table shows the condition of the institutions for girls—

Institutions	1907		1910		1911	
	No.	Pupils	No.	Pupils	No.	Pupils
<i>Lycées</i> (France)	42	14,777	43	18,003	51	19,251
Colleges (France and Algeria)	50	8,673	74	11,923	78	11,521
Secondary courses (France and Algeria)	61	1,370	67	5,756	66	5,503
Total	161	30,820	184	35,441	195	36,274

In 1910 the expenditure of the *lycées* for boys amounted to 44.5 million francs, that of the *lycées* for girls to 5 millions, nearly 5 millions was devoted to scholarships and prizes to *lycées* for boys and girls. In Paris and a number of provincial towns there are courses of secondary instruction for girls, either private or organised by the communes. Secondary instruction is also given to girls in a great number of day schools and boarding schools, lay and clerical. Many of the clerical institutions for girls as well as for boys have been transformed into lay institutions.

*Higher Instruction* is supplied by the State in the universities and in special schools, and by private individuals in the private faculties and schools. The freedom of higher instruction was established by the law of July 12, 1875, modified by that of March 18, 1880, which reserved to the State faculties the exclusive right to confer degrees. A decree of December 28, 1885, created a general council of the faculties, and the creation of universities, each consisting of several faculties, was accomplished in 1897 in virtue of the law of July 10, 1896.

The faculties are of four kinds: 14 faculties of Law (Paris, Aix, Bordeaux, Caen, Dijon, Grenoble, Lille, Lyon, Montpellier, Nancy, Poitiers, Rennes, Toulouse, and Algiers, which had (Jan. 15, 1912), from 7,507 (Paris) to 851 (Grenoble) matriculated students, 8 faculties of Medicine (Paris, 4,360; Montpellier, Bordeaux, Lille, Lyon, Toulouse, Nancy, 829); 16 faculties of Sciences (Paris, 1,752; Besançon, Bordeaux, Caen, 100; Clermont, Dijon, Grenoble, Lille, Lyon, Marseille, Montpellier, Nancy, Poitiers, Rennes, Toulouse, and Algiers), 16 faculties of letters (at the towns last named) having from 3,011 (Paris) to 75 students, 8 higher schools and mixed faculties, 15 schools with full faculties and preparatory schools of medicine and pharmacy, with from 691 to 8 students. The following statement shows the number of students by faculties or schools in January, 1904, 1911, and 1912:—

Students of	1904	1911	1912
	State Institutions	State Institutions	State Institutions
Protestant Theology	117	—	—
Law	11,084	17,292	17,027
Medicine	7,459	8,282	8,265
Sciences	4,662	6,096	6,468
Letters	4,069	6,237	6,809
Pharmacy	3,014	1,339	1,858
Schools of Medicine and Pharmacy	—	1,944 <sup>1</sup>	1,772
Total	30,405	41,190	41,194

<sup>1</sup> 1 651 medicine, 293 pharmacy<sup>2</sup> 1 022 medicine 260 pharmacy

In 1912 the total number of students in the public establishments was 41 194, of whom 35,625 were French, and 5,569 foreigners, 3,910 were women (2,114 French and 1,796 foreign). The numbers comprise not only matriculated students (among whom are students by correspondence) but also non matriculated students.

There are free faculties at Paris (the Catholic Institute of Paris comprising the law and advanced scientific and literary studies), Angers (theology, law, sciences, letters, agriculture), Lille (theology, law, medicine and pharmacy, sciences, letters, social sciences and politics), Lyon (theology, law, sciences, letters), Marseille (law), Toulouse (the Catholic Institute with theological, literary, and scientific instruction). There is, besides, in Paris a large institution for free higher instruction, the *École libre des Sciences Politiques* (43 courses).

The State faculties confer the degrees of bachelor, of licentiate, and of doctor. Admission to degrees (agregation) is by special competition, which lead to the title of *professeur* in secondary and in higher instruction.

The other higher institutions dependent on the Ministry of Public Instruction are the Collège de France (founded by Francis I in 1530), which has 50 courses of highest study bearing on various subjects, literature and language, archaeology, mathematical, natural, mental and social science (political economy, &c.), the Museum of Natural History giving instruction in the sciences and nature, the *École Pratique des Hautes Études* (history and philology, mathematical and physico-chemical sciences, and the sciences of nature and of religion), having its seat at the Sorbonne (18 courses), the *École Normale Supérieure*, which prepares teachers for secondary instruction, and since 1904, follows the curricula of the Sorbonne without special teachers of its own, the *École des Chartes*, which trains the archivist paleographers (8 courses), the *École des Langues Orientales vivantes* (16 courses), the *École du Louvre*, devoted to art and archaeology, the *École des Beaux Arts*, and the Bureau des Longitudes, the Central Meteorological Bureau, the Observatory of Paris, and the French Schools at Athens, Rome, Cairo and Indo-China, besides a school for Morocco.

Outside Paris there are eight observatories (Moulon, Besançon, Bordeaux, &c.). The observatory at Nice is dependent on the Academy of Sciences.

**Professional and Technical Instruction**—The principal institutions of higher or technical instruction dependent on other ministries are: the Com

servatoire des Arts et Métiers at Paris (with 20 evening courses on the applied sciences and social economy), the École Centrale des Arts et Manufactures, the École des Hautes Études Commerciales, 12 higher schools of commerce with about 600 pupils, dependent on the Ministry of Commerce the National Agronomic Institute at Paris, the Veterinary school at Alfort a school of forestry at Nancy, national agricultural schools at Grignon Rennes, Montpellier, 48 practical schools of Agriculture &c, dependent on the Ministry of Agriculture, the École Polytechnique, the École Supérieure de Guerre, the military school at St Cyr, the École de Cavalerie at Saumur, and other schools dependent on the Ministry of War the Naval School at Brest dependent on the Ministry of Marine, the School of Mines at Paris, the School of Bridges and Roads at Paris, with other schools dependent on the Ministry of Public Works, the School of Mines at St Etienne, and the Schools of Miners at Alais and Donvi the École Coloniale at Paris, dependent on the Ministry of the Colonies. The École des Beaux Arts, the École Nationale des Arts Décoratifs, and the Conservatoire de Musique et de Déclamation depend on the department of the Under Secretary for the Fine Arts which is attached to the Ministry of Public Instruction. In the provinces there are National schools of fine arts and schools of music and also several municipal schools as well as free subventioned schools, etc.

Technical schools of a somewhat lower grade (dependent on the Ministry of Commerce) are very numerous, comprising six national schools of arts and trades (Aix Angers, Chalons, Cluny, Lille, Paris) two schools of horology, four national professional schools, 88 practical schools of commerce and industry (of which seven are for girls), 20 practical schools of industry there are also 35 schools of industries, with 5,550 pupils 13 municipal professional schools in Paris, with 1 385 pupils, and about 370 private schools, with 92,000 pupils

### Justice and Crime.

The Courts of lowest jurisdiction in France are those of the Justices of Peace (*Juges de paix* one in each *canton*) who try small civil cases and act also as judges of Police Courts where all petty offences (*contraventions*) are disposed of. The Correctional Courts pronounce upon all graver offences (*délits*), including cases involving imprisonment up to 5 years. They have no jury, and consist of 3 judges belonging to the civil tribunals of first instance. In all cases of a *délit* or a *crime* the preliminary inquiry is made in secrecy by an examining magistrate (*juge d'instruction*), who may either dismiss the case or send it for trial before a court where a public prosecutor (*Procureur*) endeavours to prove the charge. The Court of Assizes is assisted by 12 jurors who decide by simple majority on the fact with respect to offences amounting to crimes. The highest courts are the 28 Courts of Appeal, composed each of one President and a variable number of members, for all criminal cases which have been tried without a jury, and one Court of Cassation which sits at Paris, for all criminal cases tried by jury so far as regards matters of law.

For civil cases, wherein the amount in dispute is between 200 and 1,500 francs, there is, in each *arrondissement*, a tribunal of first instance, above these are the Appeal Courts and the Court of Cassation. For commercial cases there are, in 238 towns, Tribunals of Commerce and Councils of experts (*prud'hommes*). In the towns are police courts. Throughout France there were 2,890 justices of the peace in 1908, 23 being in Paris.

All Judges are nominated by the President of the Republic. They can

be removed only by a decision of the Court of Cassation constituted as the *Conseil Supérieur* of the magistracy

The agencies for the prosecution of misdemeanours and crimes in 1906 appeared as follows—Gendarmes, 21,167, commissaires de police, 914, agents de police, 17,741 gardes champêtres, 81,864, private sworn gardes, 45,441, forest gardes, 7,430, fishery police, 2,400, railway police, 275

The following table shows the number of persons convicted (exclusive of convicts under 16 and certain others) before the various courts in five years—

Year	Assize Courts	Correctional Tribunals	Police Courts
1905	2,285	196,846	484,928
1906	2,107	188,906	408,173
1907	2,351	202,572	491,021
1908	2,379	206,825	505,738
1909	1,975	198,837	512,825

The French penal institutions consist, first of Houses of Arrest (3,276 *chambres de sécrés* and 70 *dépôts de sécrés* in 1910). Next come Departmental Prisons, also styled *maisons d'arrêt, de justice* and *de correction*, where both persons awaiting trial and those condemned to less than one year's imprisonment are kept, as also a number of boys and girls transferred from, or going to be transferred to reformatories. The reformatories are 16 for boys and 9 for girls, 10 for boys and 4 for girls being public and 5 for boys and 5 for girls being private. The Central Prisons (*maisons de force et de correction*), where all prisoners condemned to more than one year's imprisonment are kept, provided with large industrial establishments for the work of prisoners, are 9 for men and 2 for women.

All persons condemned to hard labour and many condemned to 'reclusion' are sent to New Caledonia or Guiana (military and *récidivistes*), the *dépôt de forçats* of St. Martin de Ré is a *dépôt* for transferred hard-labour convicts. Of 785 prisoners detained in this *dépôt* in 1910, 746 were sent to Guiana (430 to hard labour and 316 to relegation).

### Pauperism and Relief of Old Age

In France the poor are assisted partly through public 'bureaux de bienfaisance' and partly by private and ecclesiastical charity. They are partly under the care of the communes and partly of the departments, both of which contribute, and ultimately under the supervision of Government. The funds of the 'bureaux de bienfaisance' are partly derived from endowments, partly from communal contributions, and partly from public and private charity. In 1910 16,623 bureaux expended 47,564,536 francs and assisted 1,182,360 persons excluding 100,822 persons in Paris. Public assistance is rendered to poor or destitute children. At the end of 1910 the institutions for this purpose contained 226,204 children, the expenditure during the year amounted to 4,061,000 francs. In 1910 the hospitals for the sick, infirm, aged, or infants, numbered 1,878, they contained 191,761 beds, and at the end of the year had 62,897 patients, besides 72,738 aged and infirm inmates, their expenditure for 1910 amounted to 188,818,090 francs. In the same year 969,334 persons received gratuitous medical assistance at home and 141,821 in hospitals, the expenditure for such purposes amounting to 24,794,486 francs. At the end of 1910 the asylums for imbeciles national, departmental, and private, had 75,006 patients.

An Act was passed in 1905 for the relief of the aged poor, the infirm, and the permanently incurable, age limit, 70 but by the amendment of the Act, April 5, 1910 this was reduced to 65. It provided that the cost of the scheme should be borne by the communes, the departments, and the State. The number of persons registered for relief at their homes, has risen from 515,430 on December 31, 1908, to 607,501 on December 31, 1911. The cost to the State alone for 1910 was 48,000,000 francs, for 1911, 50,000,000 francs, and for 1912 (voted) 51,200,000 francs. In addition, contributions of the departments and communes totalled 48,800,000 francs in 1909, and 45,700,000 francs in 1910, but it has to be remembered that the increased expenditure under this law is in part balanced by the diminished activities of the 'bureaux de bienfaisance' in assisting invalids under 60 years of age. The Old Age Pensions Law of April 5 1910, as amended on February 27, 1912, provides for all wage-earners old age pensions towards which both employers and workers contribute. Contributions are to be paid up to the 60th year of the worker's life, and the pension then will be 100 francs. This sum will be increased by one tenth for every insured worker who has brought up 3 children of the age of 16. On October 1, 1912, 7,698,856 persons were registered under the scheme.

### Finance

#### I STATE FINANCE.

The following tables show the budget estimates of the revenue and expenditure proposed for 1913 as compared with those voted for 1912 —

Sources of revenue	1913	1912
	Francs	Francs
Direct contributions	563,112,861	561,929,788
Taxes assimilated to direct contributions	52,187,864	64,242,262
<b>Total direct and assimilated</b>	<b>605,250,225</b>	<b>616,172,050</b>

1911	4,689,046,846	4,547,915,740	—	141,130,106

The accounts of revenue and expenditure of the Government officials are examined by a special administrative tribunal (*Cour des Comptes*), instituted in 1807.

The French National debt has grown from 28.5 millions sterling in 1800 to 50.9 millions in 1815, 236.5 millions in 1848, 498 millions in 1871, 1,802 millions in 1912, (32,557,899,787 francs) and the interest from 1.5 millions in 1800 to 51.4 millions in 1912.

On January 1, 1911, the capital of the debt of France stood provisionally as follows —

	Capital Francs
Ministry of Finance —	
Rentes, 5 per cent., not redeemable	21,922,317,444
Rentes, 5 per cent., redeemable by annuities	3,438,174,060
Treasury debt	469,200,000
Annuities to railways	1,180,254,569
Bonds and school buildings	24,619,088
Short-dated Treasury bills	291,230,000

Repurchase of canal concessions	3 887 900
Annuity for redemption of Rentes of 1901	251 532 420
Annuity July, 1900)	4,807,884
<b>Total</b>	<b>27,583,075 802</b>
<b>Ministry of Instruction</b>	
Debt for school buildings—	
For higher instruction	1 899 854
For secondary instruction	3,920 977
For primary instruction	8 736 164
<b>Total</b>	<b>14 056 981</b>
<b>Ministry of Public Works &amp;c --</b>	
Annuities to railways	947 845 000
Purchase annuity of Western Railway Company	—,001 600 000
Social Insurance	5.8 600
<b>Total general debt</b>	<b>31 169,001 887</b>
Planting debt (April 1 1912)	1 895 898 400
<b>Grand Total</b>	<b>33,557 899 787</b> (1 302,315 9917 )

The following table shows the interest and annuities to be paid under the various heads of the public debt according to the budget estimates for 1913 —

	<b>France</b>
Consolidated debt	650 389 276
Redeemable debt interest and amortisation	307 552 977
Annuities	894 478 270
<b>Total</b>	<b>1 290 418 422</b> ( 1 616 364.)

The general debt amounts to 1,257,287 023*l* sterling and its charge to 38,642,225*l* or the capital is about 32*l* per head and the charge about 19*s*. 8*d* per head of population

## II LOCAL FINANCE.

For 1903 the revenue of the departments of France, excluding a balance of 126,810 612 francs, from 1907, amounted to 516 096 408 francs (20,643,856*l*), and the expenditure to 507 728,667 francs (20,309,146*l*). The departmental debt stood at 914,873,064 francs (36,594 922*l*). For 1911 the ordinary revenue of the communes amounted to 1,000,414,814 francs (including 80,929,325 francs for Paris) and expenditure to 985,518,896 francs (including 380,929,325 for Paris), while the debt on December 31, 1910, amounted to 4,254,290,902 francs (including 2,601,548,434 francs, the debt of Paris). For the year 1912, the revenue of the City of Paris was estimated at 447,879,992 francs (17 915,199*l*), and the expenditure at the same amount.

The capitalised value of private property has been the subject of many calculations, which, however, differ too greatly to be considered as reliable. The estimates by M de Foville put the aggregate private fortunes at land, 3,000,000,000*l*, buildings, 2,000,000,000*l*, specie, 200,000,000*l*, convertible securities, 2,800,000,000*l*, agricultural implements and live stock, 400,000,000*l*, other personal property, 680,000,000*l*, total private wealth, 8,080,000,000*l*. M Leroy Beaulieu estimates that the total yearly income of the nation reaches about 1,000 000 000*l*, of which three fifths is the product of personal labour. M Yves Guyot from fiscal data (which he shows provide an insufficient basis for a trustworthy estimate) suggests that the private wealth of France (movable and immovable) is under 2,520 millions sterling, and the revenue therefrom (exclusive of income from agricultural profits and personal work) about 320 millions sterling.

The results of the decennial valuation of buildings in France show that in the fiscal year 1909-10 there were, outside of public buildings, monuments, &c., 9,475,786 houses and 187,676 workshops and factories in the Republic.

The rental value of these 9,613,462 structures is given in the returns as 3,672,142,128 francs. The rental value in the Department of the Seine, which includes Paris, is 1,206,861,218 francs, practically one third of the total rental value of the whole of France.

The real value of all structures in the Republic, exclusive of public buildings, monuments, &c., is given as 84,798,641,000 francs.

## Defence

### I LAND DEFENCES

France has a coast line of 1,760 miles, 1,304 on the Atlantic and 456 on the Mediterranean. Its land frontier extends over 1,575 miles, of which 1,156 miles are along the Belgian, German, Swiss and Italian frontiers, and 419 along the Spanish frontier.

The fortified places are specially administered by a 'service des fortifications.' Paris, which is considered as the centre of defence, is surrounded by a wall which has 97 bastions, 17 old forts, and 38 new advance forts or batteries, the whole forming two entrenched camps at St. Denis and Versailles.

The strong places of first class, each of them with numerous forts, are—On the German frontier, Verdun, Toul, Epinal, Belfort, forming an advanced line, Mauberge, La Fère, Reims, Langres, Dijon, Besançon in a second line. On the Italian frontier Briançon and Grenoble are the chief places, with Lyon in the rear. There are also a few isolated 'forts détachés' near Nancy, Lunéville, Remisefont, Nice, &c. On the coast Toulon, Rochefort, Lorient, Brest, and Cherbourg are naval harbours surrounded by forts. In recent years, most second class and third class fortresses have been dismantled or at least 'déclassées.'

### II ARMY

The French Army consists of the national army, styled the 'Metropolitan' Army, and the Colonial Army. Both are under the War Minister, but the estimates for colonial troops abroad are included in the budget of the Minister for the Colonies. The considerable forces maintained in Algeria and Tunis, however, are all regarded as belonging to the Metropolitan Army, and their cost is included in the War Minister's budget.

Military service in France is compulsory, and it is universal in the fullest sense of the term, no exemptions being allowed except for physical disability. Liability to service extends from the age of 20 to the age of 45, but reservists do not join till they are 21, or nearly so. According to the law promulgated on the 21st March, 1905, the term of service in the ranks of the first line, or 'active' army, is now 2 years, as in Germany. The soldier then belongs to the reserve for 11 years, after which he passes to the territorial army for 6 years; finally completing his service with 6 years in the territorial reserve. Men of the reserve of the active army are called up for training and manoeuvres twice in their period of reserve service, for 4 weeks on each occasion. The men of the territorial army have only 1 training of 2 weeks and those of the territorial reserve no periodical training.

There are no "one year volunteers" in France, but voluntary engagements for 2, 4, or 5 years are encouraged, especially for the colonial army.

Owing to the length of the reserve service, also to a number of the men being released after only one year in the ranks, the number of reservists per battalion is very large (2,000 or more). On mobilisation, therefore, the reserve not only brings its unit to war strength, but every battalion and regiment forms a corresponding reserve unit, and there is still a certain surplus left for the dépôt.

Two infantry regiments make a brigade (usually 6, but sometimes 7 or 8, battalions), 2 brigades a division, and 2 divisions an army corps. French batteries have only 4 guns each. Each division has a field artillery regiment of 9 batteries (36 guns), while the corps artillery consists of 9 field and 3 howitzer batteries altogether 30 batteries to the corps. In addition there are 6 'reinforcing' batteries to each corps, which only exist as a cadre till mobilisation, if they can be placed rapidly on their war footing it gives a total of 144 guns to the corps. To an army corps in the field are also attached a cavalry brigade of 2 regiments, 1 chasseur battalion, some companies of engineers, &c. There are also 42 heavy batteries, of 2 guns each, to be distributed amongst the army corps.

A cavalry division is nominally composed of 3 brigades of 2 regiments each, with a division of horse artillery of 2 batteries, in all 24 squadrons, and 12 guns. There are 8 permanent cavalry divisions, and 2 more will be formed on mobilisation. Those now in existence are mostly stationed on the eastern frontier, but half of them have only 4 regiments.

The mobilised strength of a normal army corps would be nearly 33,000 combatants. The strength of a cavalry division of 6 regiments would be about 4,700 combatants.

The French army is localised and territorialised. There are 20 army corps 'regions' including Algeria (the 19th), the division in occupation of Tunis is furnished by Algerian troops. Each region, Algeria excepted, furnishes a complete army corps, also a variable number of units of cavalry, garrison artillery, &c. Each of the 8 infantry regiments of an army corps is recruited from its regimental district, but there is also an additional regiment (the 'regional' regiment) which is recruited, like the chasseur battalions, the cavalry, &c., from the region at large. The regional regiments and also the chasseur battalions, are usually stationed out of their own regions, in the neighbourhood of the eastern frontier. The 6th army corps (Châlons) and the 7th (Besançon) are by this means augmented to 3 divisions, and there is a brigade of 3 regional regiments and 2 chasseur battalions at Lyons. This is the general arrangement, there are certain variations which need not be detailed. Information regarding the distribution of the troops in N. Africa is given under *Algeria*.

The *Reserve Troops* form divisions corresponding to those of the first line. Therefore usually two in each region. There are in all 38 reserve divisions of approximately the same composition and strength, on mobilisation, as the first line divisions. The reserve formations of the regional regiments, of the foot artillery, and of the engineers, are available for garrisoning the fortresses.

The *Territorial Army* similarly consists of 38 divisions, and garrison troops. The Algerian troops have their own reserve formations, and also territorial reserve cadres for 10 battalions of Zouaves, 6 squadrons of Chasseurs d'Afrique, 9 field batteries, &c.

The surplus men of the reserve and territorial army would be called to the dépôts, as required, after mobilisation has taken place, and would be drafted to make good the losses of the army in the field.

The military *Ouvriers Corps* of 38 battalions, and a large number of *Chasseurs Forestiers* are recruited from men who have been passed

into the territorial army. They could be employed as garrison troops, if necessary.

The *Gendarmes* is a force of military police, recruited from the army but performing civil duties in time of peace. There is a legion in each army corps region, and some regions have more than one legion. The total strength is about 21,700 men, of whom about half are mounted. It is proposed to create a mobile gendarmerie, to deal with strikes and riots, so as to avoid the necessity for calling out troops on such occasions.

The *Garde Républicaine* is also a police force, and performs duties in Paris similar to those performed by the gendarmes in the departments. Its strength is nearly 3,000, of whom about 800 are mounted.

The *Colonial Army* is entirely distinct from the Metropolitan and consists partly of white troops and partly of native troops. The colonial troops are recruited for the most part, by voluntary enlistment, or by voluntary transfers from the Metropolitan Army, but compulsion can be used for native corps in West Africa if sufficient volunteers do not come forward. The colonial troops at home consist of 12 regiments of infantry, each of 3 battalions, and 3 regiments of artillery, each of 12 batteries (6 field and 6 garrison). These are all *permanently* stationed in France in peace time.

The troops in the Colonies according to the Budget estimate for 1912 consist of 3 battalions of the Foreign Legion (in Indo China),<sup>1</sup> 13 battalions and 4 companies of colonial infantry, 32 batteries of artillery (field, mountain, and garrison), 1 squadron of native cavalry, 3 companies of native sappers, and 49 battalions of native infantry (12 Senegal Tirailleurs, 3 squadrons Confin Sahariens, 12 Tonkinese, 9 Malagasy, and 4 Annamite Tirailleurs, 3 battalions of West African natives, and 6 battalions in French Congo). The batteries of artillery are of 'mixed' type, half to two thirds of the rank and file being natives. In the native corps the officers, and most of the non-commissioned officers are French.

The following table shows in round numbers the distribution of both Metropolitan and Colonial troops between (1) France, (2) Algeria and Tunis, and (3) the French colonies (excluding administrative corps).

	Metropolitan Army		Colonial Army		Total
	Europeans	Natives	Europeans	Natives	
France	541,000 <sup>2</sup>	—	28,000	—	571,000
Algeria and Tunis	46,000	30,000	—	—	76,000
French Colonies	—	—	12,000	40,000	52,000
Total	587,000 <sup>2</sup>	30,000	47,000	40,000	704,000
	+ 12,000 <sup>2</sup>		87,000		

The total number of troops maintained by France in overseas garrisons is about 124,000, of whom 75,000 are Europeans.

The *field army* of France may be reckoned at 19 army corps (two of 8 divisions), the Lyons brigade of 14 battalions, and 10 cavalry divisions. Total about 740,000 combatants. There are also 36 complete divisions of reserve troops and some reserve cavalry, amounting to about 490,000 men. Total strength about 1,230,000 combatants. It is, of course, uncertain how the reserve divisions may be employed, but it is conceivable that all the two division army corps would be raised to three-divisional strength by the

<sup>1</sup> The Foreign Legion consists of 2 regiments, each of 4 battalions. The headquarters of both regiments are in Algeria (*q.v.*)

<sup>2</sup> Including 24,800 men of the gendarmerie and of the garde républicaine.

incorporation of reserve divisions. It would also appear that in a war requiring France to put forward her whole strength, two additional army corps, each of two divisions, could be provided by the Algerian troops and the troops of the Colonial Army in France. These corps, with an Algerian cavalry division, would add about 70,000 men, making a grand total of about 1,800,000 combatants.

The depôts of the field army, when augmented by the surplus men of the reserve and territorial army who would be first called up (all fully trained soldiers) would amount, it is said, to about 626,000 men, besides which, 600,000 to 700,000 additional men are supposed to be available to make good losses in the field.

The organised territorial troops are said to muster 596,000 men. The military customs corps, numbering about 40,000, and the Chasseurs Forestiers, about 10,000, would also be available for local defence.

The administration of the French army consists of a general staff and a number of departments, all under the War Minister. In the consideration of general questions the War Minister is assisted by a council, called the Conseil Supérieur de la Guerre, consisting of himself as president, and 12 generals of rank, including the Chief of the General Staff (the Generalissimo of the Army in case of war) and the Chief of the Staff of the Army.

The following table shows the peace establishments of the Metropolitan Army and of the Colonial Army in France according to the budget estimate for 1913.

	France	Algeria	Tunis	Total
Staffs and Services, &c.	7,774	1,76	26	8,622
Military Schools	2,428	—	—	2,428

Train	8,020	1,850	613	10,483
Administrative Corps	14,530	3,750	700	19,000
Gendarmes and garde républicaine	24,847	—	143	24,990
Sabaran Companies	—	1,00	—	1,00
Total Metropolitan Army	511,810	60,886	18,904	617,700
Colonial Troops in France	31,344	—	—	31,344
Total	543,154	60,886	18,904	645,644

The military budget of France for 1913 shows an estimated expenditure of 812,819,198 francs (32,512,767 l.) for the Metropolitan Army, 48,287,334 francs (1,731,493 l.) for the Colonial troops in France, 101,051,374 francs (4,042,054 l.) for armament, works and buildings, and stores. Total 957,157,901 francs (38,288,316 l.). The military expenditure charged in the budget of the Minister of the Colonies for 1913 amounts to 87,183,766 francs (3,485,350 l.).

The arm of the French infantry is the Lebel magazine rifle (calibre .315). The cavalry carry the Lebel carbine. The present French field gun is the 7.5 cm (2.95 in.) Q.F., shielded, gun, model '97. The howitzer batteries are armed with 12 cm (4 in.), or 15.5 cm (6.2 in.) pieces.

#### NAVY

The Navy Estimates for 1913 amount to 481,288,219 francs (18,451,528 l.), in 1912, 423,278,924 francs (16,931,157 l.).

The French navy is under the supreme direction of the Minister of Marine, who is assisted by a Chief of the Staff. The functions of the last-named officer,

who is a vice-admiral, were enlarged in 1898. Under the Minister he has charge of all the work of the department having reference to the building, maintenance, commissioning, and mobilization of the fleet, and particularly of all that concerns preparations for war. He is chief of the Military Cabinet, while the Civil Cabinet, devoted to administrative work, is directly under the Minister. There are two sub-chiefs of the staff, of whom one is in charge of various sections, and the other of the work of the Military Cabinet. The central administration also embraces the directorates of *personnel*, *matériel*, and artillery, the inspectorate of works, the finance department, the services of submarine defences, hydrography, and other special branches. In addition to these are the Superior Council of the Navy, and the committee of inspectors-general with a series of particular inspectorates, the council of works, and a number of special and permanent technical and professional committees. For purposes of administration the French coast is divided into five maritime *arrondissements*, having their headquarters at the naval ports of Cherbourg, Brest, Lorient, Rochefort, and Toulon, at each of which the Government has important shipbuilding establishments. At the head of each *arrondissement* is a vice-admiral, with the title of Maritime Prefect, who is responsible for the port administration and the coast defences, mobile and fixed. The chief torpedo stations are Dunkirk, Cherbourg, Brest, Lorient, Rochefort, Toulon, Corsica, Bizerta, Oran, Algiers, and Bona. The naval forces afloat are the Mediterranean squadron, the northern squadron in the Channel, and the divisions of the Atlantic, the Pacific, the Far East, Cochin China, and the Indian Ocean, and there are ships on local stations. In 1898 the principal squadrons were reorganised, the most modern battle ships being collected in the Mediterranean, while the older battleships were sent into the Channel with the recent coast defence ships.

The French navy is manned partly by conscription and partly by voluntary enlistment. By the channel of the 'Inscription Maritime, which was introduced by Colbert, and on the lists of which are the names of all male individuals of the 'maritime population—that is, men and youths devoted to a seafaring life, from the 18th to the 50th year of age—France is provided with a reserve of 114,000 men, of whom about 25,500 are serving with the fleet. The time of service in the navy for the 'Inscrits is the same as that in the army, with similar conditions as to reserve duties, furloughs, and leave of absence for lengthened periods. It is enacted by the law of 1872 that a certain number of young men liable to service in the Active Army may select instead the naval service, if recognised fit for the duties, even if not enrolled in the 'Inscription Maritime. The 'Inscription' will furnish at least 50,000 men more than the navy would require upon mobilization.

A summary of French ships is as follows:—

	Complete at end of		
	1912	1913	1914
Dreadnoughts	2	4	—
Pre-Dreadnought battleships <sup>1</sup>	28	32	33(7)
armoured cruisers	30	19(7)	19(7)
Protected cruisers	12	12	7
Torpedo gunboats, etc.	7	7	7
Destroyers	27	26	7
Torpedo boats	187	7	7
Submarines	78	80	7

<sup>1</sup> Six of these, the *Danton* class, are 'semi-Dreadnoughts'. Three are 'coast defenders'.

The tables which follow of the French armour clad fleet and first-class cruisers are arranged chronologically, like the similar tables for the British navy. The ships named in italics will not be ready for sea by end of the present year.

## Armoured Cruisers

Built under programme for	Name	Displacement	Armour		Armament	Torpedo Tubes	Indicated horse-power	Max speed
			Belt	Gun				
1882	Pothuau	5 360	2½	7	2 7.6in 10 6.4in	4	16 000	19
1895	Jeanne d Arc	11 270	6	6	2 7.6in 14 5.5in	2	28 600	21
1897	Montcalm Dupetit Thouars Gueydon	9 610	6	8	2 7.6in 6 6.4in 4 4in	2	19 600	21
1898	Desaix Duplex Kléber	7 700	4	4	8 6.4in 4 4in	2	17 100	21
1899	Comde Gloire Amiral Aubé Marsillat	10 060	6½	5	2 7.6in 6 6.4in 6 4in	4	20 500	21
1900 to 1904	L. Gambetta J. Ferry Victor Hugo J. Micholet Ernest Renan	12,416 13,644	6½ 6½	8 8	4 7.6in 16 6.4in 4 7.6in 12 6.4in	3 5	27,500 (20 000) (20 000)	22 23.0
1905	Edgar Quinet W. Roussieu	14 800	12	8	16 7.6in	5	40 000	24

## Principal Protected Cruisers

1893	D'Entrecasteaux	8 014	—	2	2 9.4in 12 5.5in	6	14 600	18
1895	(united) (Châteaurenault)	8,200	—	1½	2 6.4in 6 6.4in	0	24 000	23
1897	J. de la Gravière	5 500	—	—	8 6.4in	1	17 000	23

Minor cruisers include the aerial depot ship *Foudre*, the *Descartes*, 3,988 tons (designed 1892), 4 6.4in, 6 5.5in guns, present speed about 15 knots, 3 *Prima* type, 4,000 tons (designed 1891), 6 5.4in, 4 4in guns, speeds about 17 knots, *Lavoisier* and *D'Estrees* 2,300 tons (designed 1892) 4 5.5in, 2 4in. guns, speeds about 20 knots, also 2 old cruisers of *Jean Bart* class, and a few gunboats etc.

## Production and Industry

## I AGRICULTURE

Of the total area of France (130,799,000 acres) 23,043,107 acres were under forests in 1910, and 9,656,415 acres were returned as moor and uncultivated land, and 90,814,246 acres, of which 58,829,598 acres were arable, were returned as under crops, fallow and grass. The following tables show the area (1 hectare = 2.47 acres) under the leading crops and the production (1 hectolitre of cereals = 2.75 bushels, of liquid = 22 gallons; 1 quintal = 220.4 lbs.) for four years —

Crops	1900	1910	1911	1912	1913	1914	1915	1916	1917	1918	1919	1920
<b>Corn Crops</b>	<b>1000 acres</b>	<b>1000 acres</b>	<b>1000 acres</b>	<b>1000 acres</b>	<b>1000 acres</b>	<b>1000 acres</b>	<b>1000 acres</b>	<b>1000 bushels</b>	<b>1000 bushels</b>	<b>1000 bushels</b>	<b>1000 bushels</b>	<b>1000 bushels</b>

								447 882	194 020	194 020	194 020	194 020

The annual production of wine and cider appears as follows —

Year	Under Vines acres	Wine produced thousands of gallons	Wine Import thousands of gallons	Wine Export thousands of gallons	Cider produced 1,000 u of gallons
1895	4 916 790	628,886	170 640	1 259	459 610
1895	4,816 050	622 106	189 852	37 280	896 910
1900	5 974,970	1,441 880	114,768	41,016	647 000
1909	4 018 490	1 197 810	138 048	56 190	214 610
1910	4 644,14	686 806	176 967	50,996	271 828
1911	4 824 702	590 678	207 098	24,507	468 678
1912	5 877 890	1 846 768	—	—	342 850

In 1911 there were 1 522 192 vine growers returned and the vintage was valued at 1 331 785 144 francs (53 271 405<sup>l</sup>).

The value of the crop of chestnuts, walnuts, olives, cider apples, plums, and mulberry leaves was estimated in 1910 at 187,419,040 francs (7,486 761<sup>l</sup>).

On December 31, 1911, the numbers of farm animals were Horses, 3,236,110, mules, 194 040, asses, 360 950, cattle, 14,552 430, sheep and lambs, 16 425,380, pigs 8 719,670, goats, 1,424 180.

Silk culture, with Government encouragement (*primes*), is carried on in 24 departments of France—most extensively in Gard, Drôme, Ardèche, and Vaucluse.

Silk production for 3 years —

Year	Number of producers	Quantities of e-ge put into incubation	Total production	Average yield in fresh cocoons from 25 grams of eggs
		25 grams	kilogs.	Kilogs.
1909	114 283	178 719	4 209 769	23.69
1911	102,607	141 724	5,190 428	36.650
1912	99 300	182 34	6 238,940	47 090

## II MINING AND METALS.

In France there were in 1910, 557 mines (out of 1,483 conceded mines) in work with 223,969 workers, including women and children. The annual yield of all the conceded mines was valued at 675,198,405 francs (26,507 936<sup>l</sup>), as against 13,884,630<sup>l</sup> in 1894. The output of non conceded mines in 1910 was valued at 7,670,907 francs (306,856<sup>l</sup>).

The following are statistics of the leading mineral and metal products of conceded mines in metric tons —

Year	Coal and lignite	Iron Ore	Pig Iron	Finished Iron and Steel	Worked Steel
	Metric Tons	Metric Tons	Metric Tons	Metric Tons	Metric Ton
1908	87,884,384	9,428,591	3,400,771	560,200	1,852,000
1909	87,840,086	11,381,485	3 578,848	558,000	2 040,000
1910	88,849,942	14,046,982	4,038,497	526,000	2,328,500
1911	39,289,591	16,000,000	4,426,469	—	3,837,052
1912 <sup>1</sup>	41,808,580	—	4,826,553	—	4,408,688

<sup>1</sup> Provisional

In 1910 there were 47 smelting works in activity, with 117 blast furnaces.

In 1910, the production of ores was lead and silver, 14,536 metric tons, zinc, 50,624 tons, copper, 222 tons, antimony, 26,130 tons, arsenic, 8,045 tons, manganese, 7,926 tons, and salt, 1,061,427 tons. In 1910 the output of quarries (for building stone, slate, cement, phosphates, &c) amounted to the value of 261,151,200 francs (10,446,0487).

### III MANUFACTURES.

In 1906 the numbers of persons employed in the more important industries (apart from agriculture, mining, commerce, and transport) were —

Nature of Industry	Persons employed	Nature of Industry	Persons employed
Cotton (textile)	117 200	Metallurgy	69 849
Wool	171 840	Iron work tool making &c	231 240
Silk	123 401	Foundry work	76 600
Flax, Hemp Jute (textile)	47 518	Copper and bronze	60 796
Hosiery	56 682	Tinned ware	42 511
Lace &c	156 204	Musical and scientific instru-	
Rubbings, &c.	43 871	ments, clocks &c.	81 164
Clothing of all kinds	938 905	Pottery	166 861
Linens garments	212 710	Building earthwork &c	500 180
Hats &c.	80 233	Flour milling &c	101 668
Leather work	334 208	Baking pastry &c	206 838
Wood-work	04 691		

Total number of women workers in France (1906 census) was 4 150 000 employed as follows: Agriculture, 949,000, factories (out-workers), 1,385,000, home workers, 549,000, business, public services liberal professions, 604,000, servants 772,000.

The values of the yearly imports and exports of woollens and silks in million francs are seen from the subjoined table —

Years	Woollens				Silks	
	Imports		Exports		Imports	Exports
	Yarn	Cloth	Yarn	Cloth	Tissues	Tissues
1900	9 486	42 014	64 983	212 092	59 539	316 860
1910	8 940	44 717	71 944	205 733	57 217	338 155
1911	6 770	44 796	75 178	190 875	50 713	291 955

**Sugar** — In 1911-12 there were 220 sugar works, employing 31,135 men, 1,646 women, and 1,010 children. The yield of sugar during the last 12 years (expressed in metric tons of refined sugar) was —

Years	Tons	Years	Tons	Years	Tons	Years	Tons
1900-01	1,040 284	1903-04	127 268	1906-07	662,851	1909-10	733,963
1901-02	1,071 930	1904-05	62,736	1907-08	660 832	1910-11	650 488
1902-03	776,153	1905-06	84 672	1908-09	723,961	1911-12	493,377

**Alcohol** — In 1906, 59,616 thousands of gallons of alcohol were produced in 1908, 55,886, in 1909, 53,868; in 1910 52,602, in 1911, 53,130 gallons.

### IV FISHERIES.

In the French Fisheries, including those of Algeria, the following are statistics for 8 years —

Year	No. of persons employed	Sailing boats	Tonnage	Steamers	Tonnage	Value of products
1907	152,144	88,429	195,807	241	82,578	Francs 123,801,807
1908	166,784	29,719	199,722	356	88,323	120,046,083
1909	159,899	29,598	190,707	369	35,807	184,863,725

Statistics of the French cod fisheries at Iceland in the North Sea, and at Newfoundland are given as follows for 1909 —

Cod fishery	Boats		Fishers	Produce		Value of produce
	No	Tons		Cod	Oil	
Iceland	124	13,800	2,859	11,775	4,006	7,230
North Sea	49	865	848	201	27	206
Newfoundland	944	41,265	6,155	5,220	1,937	18,007
Totals	847	56,290	9,863	64,786	6,970	25,443

The chief produce of the inshore fisheries in weight and value, in 1909 was as follows —

	Tons	1000 Francs		Tons	1000 Francs
Herring	31,888	7,451	Tunny fish	6,458	4,208
Mackerel	9,630	8,379	Lobsters	1,731	3,092
Sardines	31,580	18,540	Oysters <sup>1</sup>	72,480,051	807
Anchovies and Sprats	3,275	1,171	Mussels	2,807	2,000
				(1000 pairs)	

<sup>1</sup> Pices

## Commerce

In French statistics General Trade includes all goods entering or leaving France, while Special Trade includes only imports for home use and exports of French origin.

The *Commission Permanente des Valeurs* annually determines the values (called actual values) which represent the average prices of the different articles in the Customs list during the year. The values fixed at the end of one year and applied to that year retroactively are applied also during the following year at the end of which the provisional results thus obtained are revised according to new values definitely fixed by the Commission. Thus each year there are published first the provisional and later the definitive commercial statistics. The customs entries show the country of origin of imports and that of ultimate destination of exports. For five years (provisional for 1912) the values were —

Years	General Commerce		Special Commerce <sup>1</sup>	
	Imports	Exports	Imports	Exports
	1 000L	1 000L	1 000L	1 000L
1903	287,216	264,812	225,620	202,028
1909	314,260	299,292	249,844	228,724
1910	364,000	324,000	286,938	249,852
1911	392,896	320,488	322,633	243,094
1912	—	—	318,034	265,454

<sup>1</sup> Excluding postal packets.

The chief subdivisions of the special trade were —

	Imports (1 000 000)			Exports (1 000 000)		
	1910	1911	1912	1910	1911	1912
Food products	61	81	68	84	29	6
Raw materials	174	161	180	78	73	77
Manufactured goods	60	61	64	187	140	154
Total	284	303	312	249	242	266

The chief articles of import and export (special trade) were in millions of francs (25 fr = £) —

Imports	1910	1911	Exports	1910	1911
Wine	204	301	Textiles woollen	212	180
Wool	655.4	626.2	silk	332.8	202.0
Cereals	901.9	71.1	cotton	826.2	834.2
Raw silk	340.3	417.4	Wine	243.5	187.7
Raw cotton	449.9	551.1	Raw silk and yarn	188.6	189.4
Timber and wood	165.0	170.0	Raw wool and yarn	341.4	423.7
Hides and furs	403.0	408.4	Paris goods &c, &c	179.1	163.4
Oil seeds	400.7	451.1	Leather	23.6	140.0
Coffee	184	147.4	Linen and clothes	173.1	197.7
Coal and coke	370.7	371.7	Metal goods and tools	201.7	230.0
Ores	107.1	113.4	Cheese and butter	110.3	119.5
Cattle	78.7	93.1	Modes and artificial		
Machinery	94	90	flowers	94.3	87.2
Raw Caoutchouc &			Automobiles	151.9	162.4
Gutta percha	830.1	287.8	Skins and furs	24.0	288.9
Copper	128.5	149.3	Chemical products	149.2	160.6
Flax	62.4	56.0			

The chief imports for home use and exports of home goods are to and from the following countries, in millions of francs —

Imports from	1912	1911	Exports to	1912	1911
United Kingdom	1 019.7	693.0	United Kingdom	1 350.9	1 218.3
Belgium	624.9	542.0	Belgium	1 119.0	1 024.0
Spain	330.2	290.0	Germany	814.0	794.1
United States	874.0	626.8	United States	424.1	370.7
Germany	981.2	89.7	Switzerland	401.7	394.0
Austria-Hungary	101.7	87.7	Italy	803.1	777.0
Italy	307.2	190.0	Spain	137.4	15.6
Argentina	332.7	339.8	Algeria	24.0	489.1
Russia	411.2	443.1	Argentina	181.7	170.4
Algeria	408.8	493.6	Russia	61.3	58.9
Australia	228.4	339.0	Turkey	86.4	81.2

The value of general commerce imported and exported through the various channels was as follows, in millions of francs (25 fr = £1) —

	1908	1909	1910	1911
<b>Imports —</b>				
By sea	2073.9	2209.1	2602.8	2788.4
French ships	2816.4	3120.4	3507.8	3931.7
Foreign				
Total by sea	4889.3	5329.5	6110.6	6720.1
land	2291.1	2498.0	2708.0	3189.8
Total	7180.4	7827.5	8818.6	9909.9
<b>Exports —</b>				
By sea	2271.6	2607.4	2741.1	2682.8
French ships	1817.8	2100.0	2077.3	1908.8
Foreign				
Total by sea	4094.4	4612.4	4818.4	4591.6
land	527.0	2865.0	3162.3	3181.1
Total	4621.4	7477.4	7980.7	7772.7

The share of the principal French ports in the general trade (1911) was as follows—imports and exports combined—in millions of francs —

Marseille	8858.8	Bordeaux	950.6	Tourcoing	465.9
Havre	2714.5	Boulogne	502.9	Belfort, P.C.	388.7
Paris	1535.2	Rouen	497.7	Leumont	346.0
Dunkirk	1104.1	Dieppe	468.2	Calais	326.7

The imports and exports (special trade) of gold and silver coin and bullion and of bronze coin were as follows in 1911 —

	Gold	Silver	Bronze	Total
Imports	10,481,316	7,909,754	6,122	18,400,806
Exports	1,577,846	5,781,777	41,750	11,400,678

The value of goods in transit in 1907 was 35 million sterling, in 1909, 40 million sterling, in 1910 44 million and in 1911, 46 million.

The import duties including shipping and other dues, amounted in 1908 to 21,428,190l. in 1909, to 22,025,680l., in 1910, to 24,540,320l., in 1911, to 32,247,225l.

The treaty of 1926 provides for 'the most favoured nation treatment' between the United Kingdom and France in matters of navigation, and that of 1882 (which includes Algeria), in matters of commerce, customs duties, &c. in 1897 the treaties in force between the United Kingdom and France were extended to include Tunis.

The following table gives the declared value, in pounds sterling, of the staple articles consigned to the United Kingdom from France in four years —

Staple Imports into U.K.	1908	1909	1910	1911
Apparel, &c.	1,498,977	2,064,988	1,988,660	1,830,601
Silk manufactures	3,978,918	4,017,060	4,087,030	3,900,742
Woolen	4,186,830	2,935,009	2,601,851	2,432,432
Cotton	1,602,430	1,981,030	1,678,244	1,418,075
Butter	2,964,339	2,818,897	2,118,072	1,666,793
Wine	1,774,796	1,933,641	2,133,197	2,331,469
Sugar	1,106,070	1,179,661	1,012,160	96,014
Leather and manufactures	1,123,550	1,300,741	1,223,506	1,333,116
Carriages, &c.	1,726,611	2,644,644	2,686,614	2,604,230

The total quantity of wine imported into the United Kingdom from France in 1911 was 8,458,049 gallons

The following table exhibits the value of the principal articles of British produce consigned from the United Kingdom to France in four years —

Staple Exports from U K	1908	1909	1910	1911
	£	£	£	£
Woolen manufactures & yarn	1 710,298	1 712 774	1,932,008	1,714,229
Iron and steel	1 157,810	1 001,504	1 021,849	1 886,908

Machinery	2 071 71	1 568 012	1 870 864	2,078 59

Total trade between France and United Kingdom for 5 years (in thousands of pounds) —

	1905	1909	1910	1911	1912
Imports from France into U K	41 842	44 205	44 208	41 686	45 490
Exports to France from U K	22 165	21 438	22 500	24 321	12 740

### Shipping and Navigation

On December 31, 1910, the French mercantile navy consisted of 15,895 sailing vessels, of 638,081 tons net, with crews 71,966, and 1,726 steamers of 815,567 tons, and crews numbering 16,610, plus 10,625

Of the sailing vessels 168 of 15,213 tons were engaged in the European seas, and 253 of 370,723 tons in ocean navigation of the steamers 261 of 255,891 tons were engaged in European seas, and 229 of 506,748 tons net in ocean navigation. The rest were employed in the coasting trade in port service, or in the fisheries

In 1909 and 1910 the navigation at the French ports was as follows —

Entered	With Cargoes		In Ballast		Total	
	Vessels	Tonnage	Vessels	Tonnage	Vessels	Tonnage
1909

The most important ports were (1911) Marseille, with 4 285 arrivals and 4 088 departures; Bordeaux, with 1 556 arrivals and 867 clearances; Havre with 2 277 arrivals and 1 624 clearances; and Calais, with 1,783 arrivals and 1 590 clearances.

## Internal Communication

### I RIVERS, RAILWAYS ET C.

On January 1, 1911, there were in France 23,721 miles of national roads in addition to the vicinal roads.

Navigable rivers (1910), 5,450 miles, actually navigated, 8 843 miles; canals, 5,104 miles, actually navigated, 3,051 miles; rivers navigable for rafts, 1,908 miles.

By a law of 1842, the construction of railways was left mainly to companies, superintended, and if necessary assisted, by the State, which now constructs lines which the companies work, and works on its own account one important State system. There are lines of local interest subventioned by the State or by the departments. The concessions granted to the six great companies expire at various dates from 1950 to 1980, the periods of State guarantee of four of them terminate at the end of 1914, and of the others in 1934 and 1935.

The length of line open for traffic in 1912 was 25,390 miles of lines of general interest and 6,601 miles of lines of local interest. Total cost to December 31, 1908, 744,800,000; receipts (1909) 708,400,000; expenses 41,480,000; passengers carried 421,936 930, goods carried 165,027,920 metric tons. On January 1, 1909, the Western Railway system was transferred to the State under laws of July 13 and December 18, 1908.

On December 31, 1911, the length of tramways worked was 5,618 miles.

### II POSTS AND TELEGRAPHS

In 1911, France had 14,379 post-offices. The receipts on account of posts, telegraphs, and telephones, amounted to 576 million francs, the expenditure to 509 million francs. The number of letters, &c., carried in 1911 was —

	Internal	International		Transit
		Despatched	Received	
		millions	millions	
Letters	1 808	102	95	129
Post-cards	4.8	6	6	0
Other packages	1.98	113	7	68
Total	8 934	226	1 02	199

The total length of the telegraphic lines in 1911 was 114,394 miles, with 483,302 miles of wire. There were 21 396 telegraph offices, of which 17 619 belonged to the State, and the remainder to railway companies and private persons. In 1911 there were despatched 65 518,497 telegrams, of which 51,005,166 were internal, 9,640,649 international, 1,892 682 in transit, and 2,971,000 were official.

In 1911 there were in France 9 423 urban telephone systems with 30,630 miles of line and 803,306 miles of wire. number of conversations in 1911, 296,209,491. There were 18,789 inter urban circuits with 64,517 miles of line, and 328 407 miles of wire. conversations in 1911 34 944,877. In 1911 the gross telephone receipts were 50,434,582 francs.

## Money and Credit

The nominal value of the French money coined in France during 1909, 1910 and 1911 was —

Year	Gold	Silver	Bronze	Total
	France	France	France	France
1909	200 727 050	17 574 34	743 962	218 344 654
1910	186 684 110	20 068 018	600 787	207 352 915
1911	1 8 794 730	6 901 771	1 700 600	256 497 101

The statistics of private banking are too unsatisfactory to be given.

The ordinary savings banks numbered 550 (with 1 837 branch offices) on December 31 1912, the number of depositors was (in 1911-12) 8 632,412, to the value of 1 7 848 457, thus giving an average of 1971 for each account. The National savings banks, on December 31 1911 held deposits and interest amounting to 1,704,094 437 francs due to 5,970,839 depositors, or on the average 285 58 francs to each depositor.

The Bank of France, founded in 1806, has the monopoly of emitting bank notes.

The situation of the bank on December 31, 1910, was —

	Millions of francs
Cash	
Gold	4 134
Silver	511
Portfolio	4 023.0
Advances	1 909.7
Notes in circulation	680.2
Accounts current	5,235.7
	849.4

## Money, Weights, and Measures

The *Franc* of 100 centimes is of the value of 9½d or 25·225 francs to the pound sterling

Gold coins in common use are 20 and 10 franc pieces. The 20 franc gold piece weighs 6·4516 grammes 900 fine and thus contains 5·80645 grammes of fine gold. Silver coins are 5, 2, 1, and half franc pieces and 20 centime pieces. The 5 franc silver piece weighs 25 grammes 900 fine, and thus contains 22·5 grammes of fine silver. The franc piece weighs 5 grammes the 2 franc, and contains 4·175 grammes of fine silver. Bronze coins are 10, 5, and 2 centime pieces.

There is a double standard of value gold and silver, the ratio being theoretically 15½ to 1. Of silver coins however, only 5 franc pieces are legal tender and of these the free coinage has been suspended since 1876.

The present monetary convention between France, Belgium, Italy, Switzerland and Greece is tacitly continued from year to year, but may be denounced by any of the contracting States, and, if denounced will expire at the end of the year which commences on January 1, following the denunciation. According to its terms, the five contracting States have their gold and silver coins respectively of the same fineness, weight, diameter, and current value, and the allowance for wear and tear in each case is the same. The coinage of 5 franc pieces, both gold and silver, is temporarily suspended, and the issue of subsidiary silver is, with certain exceptions for special reasons, limited to 7 francs per head of the population of each State (but 6 francs for Greece). Each Government, in its public offices, accepts payments in the silver 5 franc pieces of each of the others and in subsidiary silver to the amount of 100 francs for each payment. Each State engages to exchange the excess of its issues over its receipts of subsidiary silver for gold or 5 franc silver pieces, and at the termination of the convention each is bound to resume also its 5 franc silver pieces, and to pay in gold a sum equal to the nominal value of the coin resumed. [But see also under Italy.] The following are the total issues of the five States authorised by the convention of 1897—France, 394 millions of francs, Italy, 232·4 Belgium 46·8, Switzerland 28 Greece, 15.

The monetary system of the Union has been adopted, either wholly or partially, in Spain, Rumania, Bulgaria, Servia, Russia, Finland, and many of the South American States.

## Diplomatic Representatives.

## 1 OF FRANCE IN GREAT BRITAIN

Ambassador — M. Paul Cambon, G C V O

Counsellor — M. A. de Fleurbaey.

Second Secretaries — M. F. C. Roux and M. Roger Cambon.

Third Secretaries — M. A. Thierry and Comte de Montholon.

*Attaché*.—M de Lagareme.

*Military Attaché*.—Lieut. Col. Vicomte de la Panouse

*Naval Attaché*.—Capitaine Comte de Saint Seine

*Secretary Archivist*.—J Kuecht

*Consul-General in London*.—M de Coppet.

There are also French Consuls at—Cardiff, Dublin, Edinburgh Glasgow, Liverpool, Manchester (V C), Newcastle, Southampton (V C), and other places.

## 2. OF GREAT BRITAIN IN FRANCE

*Ambassador*.—Right Hon. Sir Francis Bertie GCB, GCMG GVO, Appointed January 1903

*Minister Plenipotentiary*.—Hon L D Carnegie MVO

*Secretaries*.—G D Grahame, MVO, P Lorraine, Hon P Ramsay R. F O Bridgeman, and R. C Parr

*Naval Attaché*.—Captain W A H Kelly, RN

*Military Attaché*.—Col W F Fairholme, CMC, MVO

*Commercial Attaché*.—Sir H Austin Lee, KCMLT (C B)

*Consul-General*.—W S H Gastrell

There are British Consuls at Ajaccio Bordeaux, Brest Calais, Cherbourg Dunkirk Havre (CG), Lyon Marseille Nantes, Nice Rouen, and other towns

## ANDORRA

The republic of Andorra, which is under the joint suzerainty of France and the Spanish Bishop of Urgel, has an area of 175 square miles and a population of 5,281. It is governed by a council of twenty four members elected for four years by the heads of families in each parish. The council elect a first and second syndic to preside, the executive power is vested in the first syndic, while the judicial power is exercised by a civil judge and two magistrates (*jugues*). France and the Bishop of Urgel appoint each a magistrate and a civil judge alternately. A permanent delegate, the Prefect of the Pyrénées Orientales, moreover, has charge of the interests of France in the republic.

## Colonies and Dependencies

The colonies and dependencies of France (including Algeria and Tunisia) have an area roughly estimated at about 4,000,000 square miles with a population of about 41,800,000. Algeria, however, is not regarded as a colony but as a part of France, and Tunis is attached to the Ministry of Foreign Affairs. The administration of the colonies is directed or controlled by the Ministry of the Colonies which was organised as a separate department in 1894. Most of them enjoy some measure of self government and have elective councils to assist the governor. The older colonies have also direct representation in the French legislature, Réunion, Martinique and Guadeloupe sending each a senator and two deputies, French India, a senator and a deputy, Senegal, Guiana, and Cochin China each a deputy, while most of the others are represented on the 'Conseil Supérieur des Colonies'. This council consists of the senators and deputies of colonies, delegates from other colonies, and officials and other persons appointed on account of their special knowledge or qualifications. Some only of the colonies have a revenue sufficient for the cost of administration. In the budget estimates of 1912 the expenditure of France directly on the colonial service was estimated at 108,477,406 francs (exclusive of a large expenditure on Algeria). Of this expenditure 827,840 francs were for civil administration, 84,765,837 francs for military services, and 7,417,900 francs for penitentiary services. The French Ministries of War and Marine have also to bear heavy colonial expenses not included in the budget relating to the colonies. The military contribution of the colonies for 1912 is put at 14,650,000 francs of which 13,650,000 francs are from West Africa, 700,000 from Madagascar, and 300,000 from Guiana.

The area and population of the colonial domain of France in 1907, as given in the Report of the Budget Commission on the Budget for 1909, are as follows—

	Year of Acquisition	Area in Square Miles	Population
<i>In Asia—</i>			
India	1817-1	196	27,000,000
Annam	1884	304,920	16,817,000

## ASIA

## FRENCH INDIA

The French possessions in India, as established by the treaties of 1814 and 1815, consist of five separate colonies, which cover an aggregate of 50,803 hectares (about 126 square miles), and had in 1909 the following estimated populations —

*Pondichéry	48,538	Bahour	19,665	Nodoukadou	5,703
Oulgaret	26,353	Lettapacom	14,560	Cotcherly	11,845
Modéharpeith	15,153	*Karikal	17,857	*Chandernagar	25,293
Anaucoupom	15,267	Grande Alde	8 827	*Mahé	10 729
Villénour	23,459	Neravy	6 359	*Yanaon	5 033
Tiroubouvané	21,769	Tirnoular	6,186	Total	282 386

In 1912 the population of the Provinces was as follows — Pondichéry, 184,754, Karikal, 56 579, Chandernagar, 25,293, Mahé, 10,729, Yanaon, 5,033, Total, 282,386

The colonies are divided into five *dependances* (the chief towns of which are marked with an asterisk in the above table) and seventeen communes having municipal institutions. There is also an elective general council. The Governor of the colonies resides at Pondichéry. The colonies are represented in the Parliament at Paris by one senator and one deputy. At Pondichéry the birth rate in 1911 was 42.7 and the death rate 34.3 per 1,000. There were in 1911-12, 58 primary schools and 4 colleges, all maintained by the Government, with 266 teachers and 5,240 pupils. Local revenue and expenditure (budget of 1912) 1,709,312 rupees, expenditure of France (budget of 1913), 230,000 francs. Outstanding debt, January 1, 1912, 470 400 francs. The principal crops are paddy, groundnut, and rice. There are at Pondichéry 5 cotton mills and at Chandernagar 1 jute mill, the cotton mills have, in all, 1,622 looms and 73,092 spindles, employing 12 020 persons. There are also at work 2 oil factories and a few oil presses for ground nuts, 2 rice factories and a cocoastine factory. The chief exports from Pondichéry are oil seeds. At the ports of Pondichéry, Karikal, and Mahé in 1911 the imports amounted to 8 618,302 francs, and the exports to 37,988,286 francs. At these three ports in 1911 372 vessels of 783,527 tons entered and 353 of 759 821 tons cleared. Pondichéry is visited by French steamers sailing monthly between Colombo and Calcutta in connection with the Messageries Maritimes. Railway open, 16 miles, Pondichéry to Villapouram, and Peralam to Karikal.

## FRENCH INDO CHINA

French Indo-China, with an area of about 256 000 square miles and a population in 1911 of 16,990 229, of whom 20,784 were European (excluding military forces), consists of 5 States: Annam, Cambodia, Cochin China, Tonking and Laos, and Kwang Chau Wan leased from China (see below). The whole country is under a Governor-General, assisted by a Secretary General, and each of the States has at its head a functionary bearing the title of Resident-Superior or Lieutenant-Governor, according as the State is a Protectorate or a direct French Colony.

Throughout the country there are native tribunals from which there is an appeal to courts at Saigon and Hanoi. In these appeal courts European judges, in matters affecting natives, are assisted by Annamite mandarins.

In 1905 the penal system was reformed, punishment by torture (the cangue, &c) being abolished.

There is a common budget for the whole of Indo-China, and also a separate budget for each of the States. The Provinces, about 120 in number, have also their budget, as have the municipalities. The general budget is supported by receipts from customs, government monopolies, indirect contributions, posts, telegraphs, and railways in all the countries of the union, and besides maintaining these, provides for military and judicial services, public works and other matters relating to the whole of the union. For 1912 the revenue and expenditure estimated in all the budgets amounted to 59,580,391 piastres. Expenditure of France (budget of 1913) for military purposes was 17,979,772 francs. The outstanding debt of Indo-China on January 1, 1910 amounted to 846,918,000 francs. On Dec 20 a loan of 90,000,000 francs was agreed to by the French Chamber of Deputies.

The military force projected for 1913 consists of 10,878 European troops and 18,816 natives total, 25,467. The forces are commanded by the Commandant-Superior, a general of division with the same rank as army corps generals in France. The naval force comprises ships of quite modern construction: 1 armoured battle ship, 3 armoured cruisers, 3 protected cruisers, 4 torpedo destroyers, 1 armoured gunboat, 12 torpedo boats, 4 submarines, and about half a score of gunboats or other vessels of little fighting value. The naval force is provided with about 4,500 men.

In Indo-China there are mines yielding in 1911:—coal, and lignite 434,046 (metric) tons, zinc ore, 28,241 tons. The value of the total output was 6,355,978 francs.

In 1887 the French possessions in Indo-China, including Annam, Tonkin, and Cambodia, were united into a Customs Union. The total value of the imports in 1911 was 244,143,000 francs, and the exports 250,147,000 francs. The chief export is rice, amounting for 1911 to 117,470 metric tons. Other exports are fish, pepper, hides, coal, cotton, rubber and sugar.

Into Great Britain in 1911 the imports from Indo-China amounted to 142,805L (chiefly rice).

In 1911 1,839 vessels of 1,681,893 metric tons entered, and 1,677 vessels of 1,638,895 tons cleared.

The oldest railway in Indo-China is that from Saigon to Mytho, which is being extended from Mytho to Cantho (60 miles). In recent years there has been rapid development of the railway system. Total length of line in 1912, 1,158 miles. There are train lines and light railways at Hanoi and Saigon. Within the union there are (1912) 8,719 miles of telegraph line with 376 telegraph offices, and 12 urban and 5 inter-urban telephone systems with (together) 270 miles of line. There are 309 post offices (1912).

The Bank of Indo-China, with an authorised capital of 36 million francs and reserve and redemption funds amounting to 24,265,000 francs, has till 1920 the privilege not only of making advances on security, but also of engaging in financial, industrial, or commercial enterprise in Indo-China and New Caledonia. For French Indo-China there is a coinage of silver pieces, piastres,  $\frac{1}{2}$ -piastres,  $\frac{1}{4}$  piastres, and  $\frac{1}{8}$  piastres, the piastre (since 1895) weighs 27 grams, and the fractional coins in proportion, the piastre and  $\frac{1}{2}$  piastre are '800 fine, but the  $\frac{1}{4}$  and  $\frac{1}{8}$ -piastre (since 1898) only 835 fine. The piastre and the Mexican dollar are usually worth rather less than 24d. There are two bronze coins, one equal to the 100th and the other the 375th part of a piastre.

In 1900 the territory of Kwang Chau Wan on the coast of China, leased from China in 1898, and increased in 1899 by the addition of 2 islands in

the bay, was placed under the authority of the Governor General of Indo-China. The territory has been divided into 8 administrative circumscriptions, but the Chinese communal organization is maintained. Its area is about 199 square miles and its population about 150,000. The imports are chiefly cotton yarn, opium, petroleum, the exports are straw sacks, swine, mats. The port is a free port. The territory is regularly visited by the vessels of two French companies. Official buildings, a post office, roads, &c., have been or are being constructed.

*British Consul at Hanoi*.—T. F. Carlisle.

*British Vice Consul at Saigon*.—J. L. O'Connell.

### Annam

French intervention in the affairs of Annam, which began as early as 1787, was terminated by a treaty, signed on June 6, 1884, and ratified at Hué on February 23, 1886, by which a French protectorate has been established over Annam. The King Than Thai, who succeeded to the throne in 1889, has, in accordance with the wishes of the French Government, abdicated in favour of his second son, Duy Tan, 8 years of age (1907) who is placed under the control of a Council of Regency. The ports of Turan, Qui Nhon, and Xuan Day are opened to European commerce and the customs revenue conceded to France. French troops occupy part of the citadel called Mang Ca) of Hué, the capital (population 60,611). Bu Dinh, the largest town, has 74,400 inhabitants. Annamite functionaries, under the control of the French Government, administer all the internal affairs of Annam. The area of the protectorate is about 52,100 square miles, with a population in 1911 of 5,554,822 including 1,899 Europeans (exclusive of the military forces). The population is Annamite in the towns and along the coast, and consists of various tribes of Moïs in the hilly tracts. There are 5 secondary schools with 28 teachers and 596 pupils. Local budget, 1912 balanced at 3,566,462 piastres. The Phanrang river has been utilised to irrigate about 10,000 acres, and similar works, on a smaller scale, have been carried out in Central Annam. The productions are rice, maize and other cereals, the areca nut, mulberry, cinnamon, tobacco, sugar, betel, manioc, bamboo, excellent timber, also caoutchouc, cardamoms, coffee, dye, and medicinal plants. Raw silk is produced, amounting annually to about 300,000 kilogrammes, one-third of which is exported, and the remainder used in native manufactures. There are about 215,000 head of cattle in Annam and cattle rearing is of some importance. There are iron, copper, zinc, and gold in the province of Quang nam, the mines are worked by natives. At Nongnam, near Tourane, coal mines are worked. In North, Central, and Southern Annam there are salt works. The chief imports are cotton yarn, cottons, tea, petroleum, paper goods, and tobacco, chief exports, sugar, rice, cotton and silk tissues, and paper. 132 vessels of 62,336 metric tons entered at the ports in 1908.

### Cambodia.

Area, 45,000 square miles, population in 1911, 1,634,252, of whom 1,092 were Europeans (excluding the military forces). The present King, Sisowath, in 1904 succeeded his late brother Norodom, who had recognised the French protectorate in 1863. The country is divided into 57 provinces. The two chief towns are Phnom Penh (population 62,355), the capital of the territory, and Kampot, a seaport but not accessible for sea-going vessels. The budget is estimated at 4,323,414 dollars, including a sum of 524,000 dollars allowed

for the civil list of the king and princes. The chief cultures are rice, betel, tobacco, indigo, sugar tree, and silk tree, pepper, maize, cinnamon, coffee. Pepper is grown by 61 villages with 4,780 planters, the production being 750,000 kilogrammes annually. Cotton growing is extending, the production is estimated at 9,000 tons, the whole of which is exported. Salt is worked. There are important factories at Khsach Kandal, near Pnom-Penh, for the shelling of cotton seeds. The external trade is carried on mostly through Saigon in Cochin-China. The imports comprise salt, wine, textiles, arms, the exports comprise salt fish, cotton, tobacco, rice, also boats.

### Cochin-China

The area of French Cochin China is estimated at 20,000 square miles. The whole is divided into 21 provinces. The towns of Saigon and Cholon have been formed into municipalities. The Colonial Council contains 18 members. The colony is represented in France by one deputy. The population consists mainly of Annamites, Cambodians, Moïs, Chams, Chinese, and a few Indians, Malays, Tagals, and foreigners. In 1911 the total population was put at 3,050,785 of whom 11,251 were Europeans (excluding the military forces). In 1911 there were 325 births among the white and 105,012 among the coloured population, and of deaths, 177 among the former, and 79,785 among the latter. Saigon had in 1911 a population of 64,845, of whom 2,939 were Europeans. The town of Cholon has about 191,655 inhabitants. There are about 380 schools, with 800 teachers, and 19,000 pupils. In 1903 it was decided to found a school of medicine at Saigon. There are many establishments for medical aid.

The total area is put at 5,011,277 hectares (1 hectare = 2.47 acres) of which 1,522,666 hectares are cultivated, and 3,488,611 hectares uncultivated (1,748,694 hectares being forest). The chief culture is rice, to which 1,358,706 hectares are devoted. Other crops are maize, beans, sweet potatoes, earth nuts, cotton, sugar cane, tobacco, coffee, coco nuts, betel nuts, pepper, oranges, bananas, &c. The farm animals comprise 11,243 horses, 241,744 buffaloes, 109,071 cattle, 709,380 pigs, 3,492 sheep and goats.

Extensive irrigation and drainage works are in progress in the central and south western provinces. River and coast fishing is actively carried on, there are about 73,520 boats on the rivers, and 3,000 on the coast, the fishery products are valued at 2,800,000 francs yearly. There are 9 rice mills in Saigon and Cholon, turning out each from 450 to 900 tons a day. In these towns are also 2 saw mills, 2 soap factories, and a varnish factory. Commerce is mostly in the hands of Europeans and Chinese, but about 22,000 Annamites are small traders. The chief exports are rice, fish and fish oil, pepper, cotton, copra, silk, shrimps, singlars, hides, cardamoms. 756 vessels of 1,542,962 metric tons entered at the ports of the colony in 1908. The Messageries vessels, the steamers of the French National Company, of the Messageries Fluviales, of the Chargeurs Réunis, of the British P and O Company, and of the Norddeutscher Lloyd visit Saigon regularly. (For railways see Indo China.) At Saigon there are 5 banks or bank agencies.

### Tonking

This territory, annexed to France in 1884, has an area of 46,400 square miles, and is divided into fourteen provinces, with 8,000 villages and a population in 1911 of 6,112,720, of whom 6,132 were Europeans (exclusive of military forces). The King of Annam was formerly represented in Tonking by a viceroy, but, in July, 1897, he consented to the suppression

of the viceroyalty and the creation of a French residency in its place. Chief town Hanoi, an agglomeration of many villages, with a population of 136,676 in 1911. This town became on January 1, 1902, the capital of Indo-China, instead of Saigon. There are 88 schools. In 1902 a school of medicine for natives was opened at Hanoi. The chief crop is rice, exported mostly to Hong Kong, other products are sugar-cane, silk, cardamom, cotton, coffee, various fruit trees, and tobacco. About 500,000 kilograms of raw silk are produced annually, of which 300,000 kilograms are used in native weaving and the remainder exported. At Haiphong is a cotton mill with 25,000 spindles. At Hanoi there is another with 10,000 spindles. The chief industries are silk, cotton, sugar, pepper, and oils. Chief imports are metals and metal tools and machinery, yarn and tissues, beverages. Chief exports rice and animal products. The principal port is Haiphong, which is visited regularly by the steamers of two French lines. In 1908 1,254 vessels of 398,978 metric tons entered at the ports of the colony. The transit trade to and from Lungchau and Mengtze is small.

The Laos territory, under French protectorate since 1893 is estimated to contain 88,000 square miles, and in 1911 there were 640,877 inhabitants. The capital is Vientiane. In the country there are three protected states. Luang Prabang, which has a capital of the same name, the residence of the King who is assisted in his government by a French Administrator. The other protected states are Bassac and Muong Sing. The soil is fertile, producing rice, cotton, indigo, tobacco and fruits, and bearing teak forests, from which the logs are now floated down the Mekong to Saigon. Gold, tin, lead and precious stones are found, and concessions have been granted to several French mining companies. But there are serious difficulties with the natives and for commercial purposes the country is almost inaccessible. It can be entered only by the Mekong, which is barred at Khone by rapids. A railway, four miles in length has been constructed across that island, and by means of it several steam launches have been transported to the upper waters, where they now ply. A telegraph line connects Hué in Annam with the towns on the Mekong, and these with Saigon. The cost of the Laos administration is borne by Cochin-China (to the extent of six thirtieths), Tonkin and Annam (five thirtieths), and Cambodia (two-thirtieths).

## Government

The government and administration of Algeria are centralised at Algiers under the authority of the Governor General who represents the Government of the Republic throughout Algerian territory. With the exception of the non-Musulman services of Justice Public Instruction Worship, and the Treasury which are under competent ministers, all the services are under his direction. He has to prepare a special budget for Algeria, he grants concessions for works, and he contracts loans in the name of the Colony.

The budget of Algeria which, since 1901 has been entirely distinct from that of France comprises under revenue the imposts of every sort which are collected within the Colony and under expenditure the whole of the civil disbursements. The expenditure on War and Marine is still at the cost of the mother country, as is also the burden of guarantees of interest on railways up to 1926. The budget, prepared by the Governor under the control of the Minister of the Interior, is discussed and voted by the Financial Delegations and the Superior Council. These Delegations were instituted in 1898 to enable the body of tax payers to state their views on questions of imposts by means of elected delegates. There are three Delegations representing respectively the French colonists, the French tax payers other than colonists, and the Musulman natives. The Superior Council is composed of elected members and of high officials. Lastly, the Governor is assisted in the exercise of his functions by a purely consultative council of government.

\* See Morocco

The French Chambers have alone the right of legislating for Algeria, while such matters as do not come within the legislative power are regulated by decree of the President of the Republic. Each department sends one senator and two deputies to the National Assembly.

*Governor General* — M. Lataud, appointed March 22, 1911

### Area and Population.

The census of March 4, 1906, showed a population (including the military forces) amounting to 5,281,850 on an area of 184,474 sq. miles. Since 1901 the area has been increased by the acquisition of new territories in the south, and now extends to about 343,600 sq. miles. The colony has been organized in 2 great divisions called respectively Northern and Southern Algeria. Northern Algeria consists as formerly of Civil Territory and *Territoire de Commandement*, but the Civil Territory has been extended, while the *Territoire de Commandement* has been diminished and will before long be completely merged in the Civil Territory. Northern Algeria contains 17 *arrondissements* and 269 communes and 74 are mixed communes. Southern Algeria consists of the 4 Territories of Ain Sefra, Ghardaia, Tougout and the Saharan Oases organized under decree of August 14, 1905. These territories contain 12 communes of which 5 are mixed and 7 native.

Population, including military forces, on March 5, 1911 —

	Municipal Population			Population numbered separately			Grand Total
	Euro- pean	Native	Total	Euro- pean	Native	Total	
Northern Territory	746,011	4,239,474	4,985,964	40,018	23,000	63,018	5,048,982
Southern Territory	47,333	491,002	538,335	8,441	4,260	12,701	551,036
Grand Total	793,344	4,730,476	5,523,820	48,459	27,260	75,719	5,600,000

Population according to Departments and Territories in 1911

Northern Algeria (Department)	Population	Southern Algeria (Territories)	Population
Alger	1,720,881	Ain Sefra	140,000
Oran	1,320,103	Ghardaia	141,877
Constantine	2,118,446	Tougout	166,651
		Saharan Oases	40,879
Total	5,159,430	Total	491,806

The total population in 1891 was 4,124,732, in 1896, 4,429,431. In 1906, the native population numbered 4,447,149; French, 449,420; naturalized Jews and their offspring, 64,645; Tunisians, 3,088; Moroccans, 25,377; Spaniards, 117,475; Italians, 33,153; other foreigners, 17,849. Of the municipal population of Northern Algeria, 2,484,400 were males, and 2,284,574 were female.

The following statistics of movement of population are given for 1910—

—	Marriages	Divorces	Births	Deaths
European	5 005	—	21 878	13 003
Musulman	55 680	—	12" 27	49 816
Total	41 294	—	148 685	106 819

Still births are included in births and deaths. The European still births numbered 676, Musulman, 1,328.

The chief towns with the total communal population in 1911 were Alger, 172,397, Oran 123 086, Constantine, 66 173, Bône, 42,039, Sidi bel Abbes, 30 942, Tlemçen, 39,874, Mostaganem, 23,166, Mascara, 24,254, Rhda, 35,461, Philippeville, 27,137, Setif 26 261.

### Religion and Instruction

The native population is entirely Musulman, the Jews being now regarded as French citizens. The Roman Catholic Church has an archbishop and 2 bishops, with 386 officiating clergymen. There are 21 Protestant pastors and 7 Jewish rabbins sharing in Government grants.

At Algiers (city) there is an institution for higher instruction attended in 1911 by 1 292 students (809 for Law, 211 Medicine and Pharmacy, 108 Science, 164 Letters), Professors (1911), 102. There are higher Musulman schools (*médcras*) at Algiers, Tlemçen, and Constantine where 219 pupils in 1911 were prepared for native employments. In Algeria there are 22 establishments for secondary instruction with (1911) 5,988 pupils (4,411 boys and 1,577 girls). In 1911 there were 1 235 primary and infant schools, public and private, with 3,026 teachers and 141,537 pupils, inclusive of 226 Musulman schools. There were four normal schools for men teachers with 25 professors and 110 students (70 Musulman) and six normal schools for women teachers with 22 professors and 218 students. The estimated expenditure on public instruction by the State was, for 1911, 8,861,798 francs.

### Crime

There is an Appeal Court at Algiers, and in the arrondissements are 16 courts of first instance. There are also commercial courts and justices of the peace with extensive powers. Criminal justice is organised as in France for Europeans. Since 1902 there have been criminal courts and special repressive tribunals for trying natives accused of crime. In 1911, 3 502 persons were arrested for various crimes. On December 31, 1911, the number in carcerated was 3,876, including 83 females.

Musulman justice is administered to natives by the Cadis in the first instance with an appeal to French courts.

### Finance

The natives pay only direct taxes. The departments of War and Marine are excluded from the estimates, but the proceeds of the military tax, the Government monopolies, and some other revenues are paid to France. The total expenditure (including military and extraordinary disbursements) exceeds the Algerian revenue by about 75,000,000 francs. The budget estimates for 1911 showed revenue 144,549,940 francs, and expenditure

140 546,551 francs, for 1912 the estimated revenue and expenditure were as follows —

Revenue		Expenditure	
	Francs.		Francs.
Taxes (direct)	15 922,191	Administration debt	25 678,61
Taxes (indirect)	44 132,432	Interior	26 147 64
State domain	8,970 469	Native affairs	6,793,893
Monopolies &c	9 691,824	Finance	9 630 114
Various	2,714,689	Posts and Telegraphs	12,101,870
Receipts d'ordre	28,569 463	Public Works	19 113 373
Extraordinary	37 839,000	Agriculture, &c.	6 682,565
		Various	273,000
		Extraordinary	37 259 000
Total	145 167 014 (5,806 6811.)	Total	145 165,971 (5 806 2311.)

For the Southern Territories in 1912 the revenue was put at 6 523,301 francs, and the expenditure at 6,513,284 francs

At the end of 1906 the debt of Northern Algeria amounted to 53,313,000 francs in capital and 107,997,045 francs in annuities amortisation and interest.

### Defence.

The military force in Algeria constitutes the XI<sup>th</sup> Army Corps. French residents are under the same obligation to serve as in France; natives are under the obligation to serve 8 years with the colours and 7 in the Reserve but the total number taken is fixed, and there is a ballot, substitution being allowed. The troops are permanently stationed in North Africa, but they belong to the 'Metropolitan', not to the Colonial Army. There are 4 regiments of zouaves each of 5 battalions, and 5 battalions of African light infantry, each of 5 companies. 6 regiments of cavalry (*Chasseurs d'Afrique*), of 5 squadrons. 12 'African' field batteries and 2 garrison battalions, also about 12 companies of engineers. These are all European troops and in the case of the artillery and engineers their recruiting depôts are in France. [The Foreign Legion of 2 regiments of 4 battalions is recruited from foreigners of any nationality, but officered chiefly by Frenchmen, the headquarters of both regiments are in Algeria but battalions are sent to any colony where they may be required. The Natives are 4 regiments of Algerian *Tirailleurs* each of 6 battalions (one has now 8), and 4 regiments of Spahis (Arab cavalry) each of 5 squadrons. The officers and a proportion of the non-commissioned officers, of the native regiments are French. The troops are organised in 3 divisions with headquarters at Algiers, Oran, and Constantine, respectively, but some of them at present form part of the field army in Morocco. Those in occupation of Tunis form a fourth division, headquarters at Tunis. The Algiers and Constantine divisions each consist of only one infantry and one cavalry brigade, with a field artillery division of 3 batteries. The Oran division, and that in Tunis, have each 2 infantry brigades, and a cavalry brigade. The Oran division has 3 field batteries, the Tunis division 6 field batteries. The battalions of garrison artillery are at Algiers and Biseria, and the headquarters of 2 engineer battalions are at the same places. The strength of the troops in Algeria, according to the budget estimate for 1912, is 66,164 of all ranks.

### Agriculture and Industry

There exists in Algeria a small area of highly fertile plains and valleys in the neighbourhood of the coast, mainly owned by Europeans, which is

cultivated scientifically, and where profitable returns are obtained from vineyards, cereals, &c., but the greater part of Algeria is of limited value for agricultural purposes. The northern portion is mountainous and generally better adapted to grazing and forestry than agriculture, and a large portion of the native population is quite poor. In spite of the many excellent roads built by the Government, a considerable area of the mountainous region is without adequate means of communication and is very inaccessible.

The soil is, under various systems, held by proprietors, by farmers, and by *Métayers* or *Khammés*. Most of the State lands have been appropriated to colonists. The population engaged in agriculture in 1909 was 3,922,620, 213,756 being Europeans. In 1911 the chief cereal crops were, wheat 3,303,405 acres, yielding 19,599,727 cwt., barley, 3,360,435 acres, yielding 20,464,958 cwt., oats, 433,864 acres, yielding 8,453,770 cwt. Other crops are maize, potatoes, beans, and dila. Flax, tobacco and silk are cultivated.

In 1911 there were 371,700 acres under vines, yielding 185,754,096 galls of wine. The orange, date, mandarin, citron, banana, pomegranate, almond, fig, and many other fruits grow abundantly. The production of olive oil is an important industry. In 1909 12,907,908 trees yielded 4,871,087 cwt. of olives and 7,073,572 galls of oil. Forests cover 6,559,490 acres, and, for the most part, belong to the State and communes. The greater part is mere brushwood, but on 645,000 acres are cork-oak trees, from which in 1909, 140,434 cwt. of cork valued at 136,631*l.* were obtained. The dwarf palm and alfalfa are worked on the plains. Timber is cut for firewood, also for industrial purposes, for railway sleepers, telegraph poles, &c., and for bark for tanning. Considerable portions of the forest area are also leased for tillage, or for pasturage for cattle, sheep, or pigs. The forest revenue annually amounts to over 240,000*l.*

In 1911 there were in Algeria 226,764 horses, 192,484 mules, 279,315 asses, 1,113,952 cattle, 8,528,610 sheep, 3,861,847 goats, and 110,012 pigs.

There are extensive fisheries for sardines, anchovies, sprats, tunny fish, &c., and also shell fish. In 1909 5,180 persons, and 1,322 boats of 4,914 metric tons were employed in fishing, and the fish taken were valued at 152,034*l.*

In 1909, 44 mines (out of 94 concessions) were worked for iron, zinc, lead, mercury, copper, antimony, and petrol. The quantity of iron ore extracted (1909) was 127,426 tons, valued at 59,600*l.* of lead and zinc ore, 24,758 tons, valued at 150,800*l.* of copper ore, 14,940 tons, valued at 17,000*l.* The output of all the mines in Algeria in 1909 was valued at 21,634,043 francs. Petroleum has been found in Oran, 121,020 metric tons being produced in 1908. The output of phosphates in 1908 was 452,060 metric tons, as compared with 373,763 metric tons in 1907.

### Commerce

The foreign trade of Algeria in recent years has been as follows (in 1,000*l.* sterling) —

—	Imports	Exports	—	Imports	Exports
1907	17,928	12,580	1910	20,213	19,731
1908	17,970	12,768	1911	22,007	20,587
1909	18,190	12,169	1912	26,202	20,703

Of the imports in 1912 the value of 22,426,000*l.* came from France, of the exports the value of 15,419,000*l.* went to France.

In 1911 and 1910 the distribution of the special trade among the principal countries was as follows, in thousands sterling) :—

From or to	Imports (1910)	Imports (1911)	Exports (1910)	Exports (1911)
France	10001	10001	10001	10001
French Possessions	17 51	12 508	16 415	15,808
Great Britain	184	233	798	768
Germany	556	591	734	1 027
Belgium	176	19	423	408
Spain	43	41	418	473
Italy	247	285	185	194
Russia	114	1 200	505	512
Austria Hungary	41	56	138	14
United States	112	142	148	157
Morocco	14	222	269	116
Brazil	576	559	88	19
Netherlands	364	350	40	—
	60	14	979	706

Chief imports and exports in thousands of francs —

Imports	1912	Exports	1912
Cottons	67,404	Sheep	27 811
Woolens	3,508	Hides and skins	8 761
Clothing and linen	18 229	Wool	217
Skins and manuf. thereof	21 046	Wheat	29 288
Machinery and parts	20 851	Oats	4 960
Other metal work	27 771	Barley	15 472
Furniture and wood work	37 601	Olive oil	11 010
Toys, brushes, &c.	786	Cork	11,028
Paper, &c.	17 375	Wine	220 840
Coal	10 985	Phosphates	11 590
Sugar	16 804	Iron ore	14 710
Vegetable oil	9 816	Zinc ore	12 674
Iron and steel	11 001	Fruit, fresh and dried	18,168
Coffee	9 577	Tobacco cigars &c.	15,648

In 1912 the receipts of the customs authorities amounted to 39,075,546 francs (1,563,021/ )

### Shipping and Communications

In 1912, in the French and Foreign trade, 4,614 vessels of 5,978,490 tons net entered, and 4,688 of 5,866,416 tons net cleared at Algerian ports.

On January 1, 1912, the mercantile marine of Algiers consisted of 980 vessels of 51,771 tons net.

Algiers is now the most important coaling station in the Mediterranean

National roads have a length of 1,826 miles.

In 1911 there were 2,031 English miles of railway open for traffic (exclusive of lines on Tunisian territory) The railway receipts (1910) amounted to 51,824,778 francs.

The postal receipts in 1911 were 5 489,208 francs, and there were 665 post offices. The telegraphic receipts were 2,108,764 francs, and those from telephones 1,617,997 francs. The total for the three services was 8,086,668 francs.

The telegraph of Algeria consisted in 1911, of 8,977 miles of line and 24,550 miles of wire, with 684 offices. Telephone urban systems, 4,690 miles of line, inter-urban, 7,867 miles of line.

The Bank of Algeria, whose privilege has been extended to the end of 1920, is a bank of issue, with a capital of 20,000 000 francs, but its note circulation must not in any case exceed 150,000 000 francs. Several co-operative agricultural banks, assisted by Government funds, are in operation. There are in Algeria 7 savings banks with, on December 31, 1909 19,427 depositors, the amount due to depositors being 6,786,867 francs.

### FRENCH EQUATORIAL AFRICA (FRENCH CONGO)

The French Congo extends along the Atlantic coast between the German Kamerun colony and the territories of the Belgian Congo, with the exception of the Spanish territory on the coast from the Muni river on 1° N lat. to the German Kameruns and inland to the meridian of 11 20 E. of Greenwich, and the Kabinda region which is Portuguese. Inland it is bounded by the Congo and Ubanghi rivers and stretches northwards to the Bahr-el Ghazal and Lake Chad. French acquisition began on the Gabun river in 1841, Libreville was founded in 1849, Cape Lopez was gained in 1862, and the French possessions extended along the coast for about 200 miles. Since then the territories have been increased by exploration and military occupation and their limits have been defined in a series of international conventions. By a convention, dated November 14, 1911, France agreed to cede certain parts of the colony to Germany in return for German recognition of the French protectorate in Morocco. The total area ceded is about 107,270 square miles with a population of about 1,000,000. Sleeping sickness is very prevalent in the district and is fast decimating the population. At the same time Germany ceded to France from her Cameroons territory 6,450 square miles (See map in the STATISTICAL YEAR BOOK for 1912).

The area is about 669,000 square miles containing a population estimated in 1906 at 10 millions of negro and other races. By decree of February 15 1906, the French Congo is divided into four circumscriptions which form three colonies, viz.—the Gabun Colony (capital Libreville), the Middle Congo Colony (capital Brazzaville), and the Ubangi-Shari-Chad Colony (capital Bangui), the Chad region is, however, for some purposes administered as a military Territory. The three Colonies have each a Lieutenant Governor, they all have financial and administrative autonomy, and each has an administrative council. The population of Gabun in 1911 was 26,000 (537 French), of Libreville, 210 (163 French).

Decrees have been issued changing the name of the French Congo into French Equatorial Africa and extending over the Gabun, the Middle Congo, and the Ubangi-shari Colonies, and Chad Military Territory the authority of the Governor-General.

The Lieutenant-Governors are under the Governor General of the French Equatorial Africa, who is assisted by a Secretary-General and a Council of Government. There is a general budget for the whole of French Equatorial Africa, and also separate budgets for the colonies. Local revenues accrue

chiefly from customs duties, there are native hut and poll taxes. The sale of alcohol to natives is restricted, and in some areas prohibited. For 1911 the colonial budget gave the following figures: General budget, 5,542,900 francs, loan fund 6,046 700 francs. The colonial budgets were as follows: Gabon 1 584,800 francs, Middle Congo, 2,087,000 francs and Ubangi, 1 401,000 francs, Chad Military District, 7,508,000 francs. The estimated expenditure of France on the French Congo for 1913 was 8,583,802 francs. In the colony there are 43 mission schools for boys and 10 for girls, with about 3 600 pupils (724 being girls). There is considerable shipping at Loango, but Libreville is not accessible for large vessels. Both these ports are visited by the vessels of the *Chargers Rennis*. The total imports were valued in 1910 at 11,119 000 francs, and the exports at 17,454,000 francs. The military force of the colony (1912) consists of 4,832 men, of whom 357 are Europeans. The development of the Ubangi Colony has progressed, but trade is in an indifferent state in Middle Congo, and is in a bad state in Gabon, owing to the critical condition of the concession companies. The natives cultivate manioc. Europeans successfully grow coffee, vanilla, and cocoa. The forests contain valuable woods, and rubber is collected. The mineral resources of the territory include gold, copper, and iron. The exports comprise rubber, ivory, various woods, palm oil, palm kernels, coffee, cocoa kola nuts, *piassava* and other produce. In 1908, 116 vessels of 244,829 tons entered and 116 vessels of 246 537 tons cleared the ports of the French Congo. The chief port is Libreville. The tenure of conceded land by concession companies now (since July, 1910) depends on actual cultivation or exploitation of the soil. A decree came into force on January 1 1911 forbidding the manufacture and exportation of impure caoutchouc, it being expected that an improvement of the quality produced will soon have beneficial effects upon the trade of Gabon. The Central African telegraph line connects Brazzaville with Loango, and is in communication with the English Atlantic cable. Wireless telegraphy connects Brazzaville and the head of the Southern Railway in the Loango Region, a distance of 800 miles and also Brazzaville and Leopoldville. A line is being laid to connect Brazzaville with Stanley Pool in the Belgian Congo, and ultimately with the German East African telegraph system at Lake Tanganyika. The total length of line in operation (end of 1911) is about 900 miles.

On the north east of Lake Chad is the state of Kanem, which was completely subjected to France in 1903 and is now only a district of the Shari territory with Maï for its capital. Wadai to the east of Kanem, with an area of about 170,000 square miles, and a semi-civilised population of about 2,000,000, accepted the French Protectorate in the summer of 1903. In 1911 a French force occupied Aradja, some miles to the north of the capital, Abeshir which is in communication with Benghazi, on the coast of Tripoli, by caravans.

British Consul — W. J. Lamont

## MADAGASCAR

### Government.

The last native sovereign of Madagascar, Rānavahona III (born 1861), succeeded in 1883. The French having claimed a portion of the north west coast as ceded to them by local chiefs, hostilities were carried on in 1882-84 against the Hovas who refused to recognise the cession. In 1885 peace was made, Diégo Suarez being surrendered to France. A French Resident-General was received at the capital, and the foreign relations of the country were claimed to be regulated by France. By the Anglo French agreement of August 5, 1890 the protectorate of France over Madagascar was recognised by Great Britain, but the Native Government steadily refused to recognise any protectorate. In May, 1895 a French expedition was despatched to enforce the claims of France, and on October 1, the capital having been occupied, a treaty was signed whereby the Queen recognised and accepted the protectorate. By a unilateral convention made in January, 1896, Madagascar became a French possession, and by law promulgated August 6 1896, the island and its dependencies were declared a French colony.

On February 27 1897 the Queen was deposed by the Resident General, and on March 11 she and her family were deported to the island of Réunion, whence, in March, 1899, she was transferred to Algiers.

*Governor-General* — M. Albert Piquet (1910)

A Consultative Council of Administration has been established at Antananarivo. The Colony is not represented in the French Parliament, nor has it any elective assembly. The island is partly under civil and partly under military administration. In 19 provinces or districts there are civil administrators, in 5 military territories or circles military officers direct affairs. The administrative system is based on the autonomy of the different races. The administrators appoint as local governors and chiefs of districts usually those who have been chosen by popular vote. Natives are employed to a large extent in subordinate positions both in the civil and military administration.

### Area and Population.

Madagascar is situated on the south-eastern side of Africa, from which it is separated by the Mozambique Channel, the least distance between island and continent being 240 miles, greatest length, 980 miles, greatest breadth, 360 miles. The area is estimated at 228,000 square miles. The census of June 1, 1911, showed a population of 3,104,881, of whom 9,919 were French, 2,201 were of other European birth, 5,863 were Asiatic, 14,717 were African and 3,072,381 were Malagasy (1,801,718 male and 1,368,665 female). For 1908 the movement of population is given as Civil European and mixed population, births 481, deaths 511, marriages 85, divorces 4, natives, births 68,862, deaths 81,778. The Malagasy races or tribes are very numerous, the more important being the Hova (847,480), the Betsileo (408,024), the Betsimisaraka (348,169), the Tanala (154,729), the Sakalava (155,126), and the Bara (140,450). Hindu, Chinese, Arabs, and other Asiatics carry on small retail trade. The most intelligent and enterprising tribe is the Hova, whose language, allied to the Malayan and Oceanic tongues, is understood over a large part of the island. The people are divided into a great many clans, who seldom intermarry. The slave trade was nominally abolished in 1877, slavery in Imerina and in all parts under French authority was abolished by proclamation.

tion on September 27, 1896. The system of forced labour in the public service was abolished on January 1, 1901, but the personal tax due from 16 to 60 years of age, formerly 5 francs, has been increased to 10, 15, in some provinces 20, and in Antananarivo to 30 francs. The population of the chief towns were: The capital, Antananarivo, in the interior, 94,813, Fianarantsoa 8,179, Tamatave 8,761, Andoveranto 5,600, Majunga 7,205, Diego Suarez 10,877, Ambositra 3,000, Tulcar 2,900, Mananjary 2,600. The principal ports are Tamatave, on the east coast, and Majunga on the north west coast.

In 1898 Diego Suarez (a French colony from 1885), the island of Nosy Bé (area, 130 sq. m.) on the west coast, and the island of Ste. Marie on the east coast (area, 64 sq. m.) were placed under the authority of the Governor General of Madagascar.

### Religion, Education, Justice

Up to 1895 a large portion of the Hova and of the other tribes in the central districts had been Christianised. The Christian population was estimated at 450,000 Protestants, and 50,000 Roman Catholics. There are many missionary societies at work, French (Catholic and Protestant) British (the London Missionary Society, the Friends Mission, and the Anglican Mission), there is also a Norwegian Lutheran Mission. French Catholic missions had 258 members (67 female), Protestant and Anglican missions had 177 (78 female). The outlying tribes are still mostly heathen.

Education is compulsory from 8 to 14 years of age. In 1911 there were 574 official schools for Europeans with 917 teachers and 54,048 pupils, and 402 non-official schools, with 1,201 masters and 39,469 pupils. Of the official schools in 1911, 20 were for European children, having 44 teachers and 902 pupils; and 552 schools were for native children, having 873 teachers and 53,148 pupils. Since 1905, no state subvention has been given to private schools. The State expenditure in education in 1911 was 88,539*l*. Private (or mission) schools are required to carry out the Government programmes. Children are required to learn the French language.

For the administration of French justice there are a *Parquet* consisting of a *Procureur Général* and other officials, a court of appeal, 4 courts of first instance in the principal towns, and justice of peace courts at 17 centres. For native justice there are tribunals in the districts and provinces, and the natives have the right of appeal from lower to higher tribunals, and finally to the Governor General.

### Finance

The local revenue of Madagascar is derived chiefly from direct taxation (including a personal tax and taxes on land and houses), from customs and other indirect taxes, from colonial lands, from posts and telegraphs, markets, and miscellaneous sources, and from subventions granted by France. The chief branches of expenditure are general administration, public works, the post office, and the public debt. For 1911 the local budget showed revenue and expenditure of 1,202,506*l*, apportioned as follows: ordinary expenditure, 923,076*l*, extraordinary, 158,518*l*; railroad, 55,629*l*, native medical assistance, 65,281*l*. The expenditure of France on Madagascar in 1918 (2,514,551 francs) was wholly for military purposes.

The colony has since 1897 contracted debt to the amount of 4,200,000*l*. at the average yearly rate of interest of 3.02 per cent. Of this debt the amount outstanding was on Jan. 1, 1910, 99,283,000 francs. The loans were made for the purpose of public works or for the conversion of loans for that purpose.

### Defence

The troops in Madagascar (including the forces at Diégo-Suarez) consist of 2,411 Europeans, and 6,376 natives. The police and militia are maintained on the local budget.

### Production and Industry

In 1896, on the completion of the French occupation of the Island, the Malagasy system of land tenure was modified, foreigners were permitted to acquire land, and registration of land was begun. Government lands, urban or non urban, are let or sold to private persons, or to companies for agriculture, pasturage, or mining.

Cattle breeding and agriculture are the chief occupations of the people. There were in 1910 4,492,131 cattle in the island 2,125 horses, asses, and mules, 246,955 sheep (rough native breed) 98,421 goats, and 407,782 pigs. The area under cultivation by Europeans in 1910 was 976 379 acres in extent, of which 105,343 acres were actually cultivated. In addition the following areas were under crops cultivated by natives: sweet potatoes, 55,623 hectares, manioc, 42,794 hectares, maize, 36,764 hectares, potatoes 12,421 hectares, haricots, 10,635 hectares. Madagascar is a rice exporting country. In 1910 there were 875,000 acres under rice cultivation, producing 700,000 tons. Other farm products are sugar, coffee, cotton, cacao, vanilla, tobacco, cloves, mulberry trees, and rubber trees. Sericulture is encouraged. The forests abound with many valuable woods, while caoutchouc, gums, resins, plants for textile, tanning, dyeing and medicinal purposes abound. The principal article at present produced in the island is caoutchouc which is exported to London, Hamburg, and Marseilles. Silk and cotton weaving are carried on, and the manufacture of textures from the raphia palm fibre, and of metal work. Works for the preparation of sugar, rice, soap, beer, &c., are being undertaken by Europeans.

Of minerals, gold, iron, copper, lead, silver, zinc, antimony, manganese, nickel, sulphur, graphite, lignite (March 1912) and also coal have been found. Mining is carried on under the Decree of May 23, 1907. In 1909, 100 concessions for gold mining, embracing 299,694 hectares were worked. In 1912 metals and minerals were produced as follows: gold 84,185 ozs., graphite, 2,732 tons, rock crystal, 56½ tons, and corundum 469 tons.

### Commerce

The trade of Madagascar has been as follows in five years —

	1907	1908	1909	1910	1911
Imports	£ 1,005,180	£ 1,205,670	£ 1,865,013	£ 1,324,477	£ 1,790,556
Exports	£ 1,114,520	£ 923,640	£ 1,355,127	£ 1,517,531	£ 1,901,413

The chief articles of import and export in 1911 were the following —

Imports	1911	Exports	1911
Cottons	2,715,785	Gold	92,022
Wines, common	277,017	Cattle	20,440
Spirits	230,725	Tanning Bark	63,558
Coal	tons 6,806	Rice	6,175
Cement	4,699	Hides	6,538
Lime	2,742	Rafia fibre	8,308
Ironwork	1,567	Manioc	18,204

Of the imports in 1911, the value of 1,541,127*l* was from France, and 65,157*l* from French colonies (the two together being some 90 per cent of the whole). Of the exports, the value of 1 202,273*l* was to France, and 63 823*l* to French colonies.

### Shipping and Communications

Tamatave, the principal seaport of the island, is visited by the steamers of two French shipping companies, and the principal ports are connected with each other by steamers plying monthly. In 1911, 11,928 vessels of 1,616,687 tons entered and cleared at the ports of Madagascar. Of the total tonnage 18,579 vessels of 2 539 256 tons were French, 4,182 vessels of 306 236 tons were British. There are as yet but few roads in Madagascar in the European sense of the word. At the end of 1911 there were 1 175 miles of metalled roads. The transport of mails and passengers by motor cars is being extended. A fortnightly service of motor cars has been established between Antananarivo and Miarinarivo (61 miles) and a service—twice weekly—between Antananarivo and Ambositra, a distance of 186 miles. Waggon roads have been made from Tamatave to Antananarivo, from Antananarivo to Majunga, and between most of the chief military posts. A road (124 miles) is being constructed between the port of Tamatave and Lake Alaotra in the north, of which 20 miles had been completed in 1910. Tamatave is also connected by a railway of about 7 miles with Ivondra, then by a canal with Brickaville whence a railway of 168 miles is open to Antananarivo (total, 190 miles). Transport over the waterways, near the coast, is in the hands of a French Company.

There is postal communication throughout the island. The telegraph line has (1911) a length of 4 461 miles, and a cable connects with Mozambique, and another with Mauritius. There are 385 miles of telephonerline and three Government wireless telegraph stations.

### Money and Banks

The Comptoir National d'Escompte de Paris has agencies at Antananarivo, Tamatave, Diégo Suarez, Mananzary, Majunga and Tulcar. In 1911 the Bank of Madagascar, with headquarters in Paris, was opened at Tamatave (soon to be removed to Antananarivo) with a capital of 600,000 francs.

The only legal coin is the silver 5 franc piece, with its silver sub-divisions as well as copper coins of 5 and 10 centimes, but the Italian 5 lire piece and Belgian Greek, and other coins of equal value are also in circulation. For smaller sums the coin used to be cut up into fractional parts, and weighed as required, but this is now an illegal practice. The Government has withdrawn this cut money at the rate of 30 grammes of silver for 5 francs, and has replaced it by fractional silver and copper coin.

### Consular and other Representatives

#### OF GREAT BRITAIN IN MADAGASCAR

Consul at Antananarivo —T. P. Porter

Vice Consul at Tamatave —C. Bang

There is also a Vice Consul at Majunga and a Consular agent at Diégo Suarez.

## MAYOTTE AND THE COMORO ISLANDS

The archipelago of the Comoro Islands, comprising Mayotte, Anjouan, Grande Comore and Moheli, forms a colony which in 1908 was united to the general government of Madagascar

The island of Mayotte (140 square miles) had a population (1906) of 9,989 inhabitants. There is an increasing emigration to Zanzibar and Madagascar in 1902 there were 3 schools with 3 teachers and 78 pupils. The chief product was formerly sugar, but the cultivation of vanilla has now superseded that of the sugar cane. There are now only three sugar works and two distilleries for rum. Besides vanilla and sugar, cacao, aloes and perfume plants (citronella, ylang-ylang, patchouli, &c.) are cultivated.

Grand Comore, Moheli, Anjouan, and a number of smaller islands, have an area of about 620 square miles and population in 1911 of 94,844 (64,647 natives, and 497 Europeans). The Sultan of Grande Comore on February 7,

1910, ceded his sovereign rights to France. Vanilla, cacao and perfume plants are successfully cultivated. Grande Comore has a fine forest and exports timber for building and for railway sleepers.

Local budget of Mayotte and dependencies, 1909, 221,841 francs, and of Grand Comore 176,200 francs. Outstanding debt January 1, 1910, 883,760 francs.

Imports into Mayotte and Comores in 1911 amounted to 52,566½ exports, to 188,261½. The principal imports were cotton fabrics, metals, and rice, the principal exports, hides, sugar and vanilla.

### REUNION

Reunion (or Bourbon), about 420 miles east of Madagascar, has belonged to France since 1767. It is administered by a governor assisted by a privy council, and an elective Council General and is represented in the French Parliament by a Senator and two deputies. It has an area of 970 square miles and population (1912) of 173,822, of whom 159,218 were Europeans, there were also 8,841 British Indians, 1,868 natives of Madagascar, 2,927 Africans, 884 Chinese, 584 Arabians. The chief towns are St. Denis, with 23,972 inhabitants in 1912, St. Pierre, 29,481, St. Paul, 18,646, St. Louis, 13,848. The towns are under the French municipal law. In 1911 there were 165 schools with 380 teachers and 15,051 pupils. The chief port, Pointe des Galets, is connected by a coast railway of 80 miles with St. Benoît, on the one hand, and St. Pierre on the other. In 1888 this railway was taken over by the State. The chief productions are sugar (40,000 tons exported in 1911), rum (958,877 gallons), coffee (81 tons), tapioca (2,860 tons), vanilla (51 tons), spices. The chief imports are rice (1911, 293,709 bags), grain, &c., the chief export is sugar. In 1911, 121 vessels of 240,729 tons entered, and 113 vessels of 217,730 tons cleared at the ports of the Island. The Tauxatave Reunion Mauritius Telegraph Cable is open for traffic. The local budget for 1912 showed income and expenditure 5,071,980 francs. Expenditure of France (budget 1913) 2,238,190 francs. The Colony, as such, has no debt, 18 communes have debts, amounting in January 1913 to 6,698,386 francs, incurred for works and buildings. The Bank of Reunion has a capital of 1,000,000 francs and reserve fund (1914) of 1,500,000 francs.

St. Paul and Amsterdam, small islands in the Indian Ocean, belong to France.

Kerguelen, a desolate island, about 50 S lat. and 70 E long., was annexed by France in 1893.

*British Consul at Reunion.*—E. G. B. Maxse, C M G.

There is a British Vice Consul at St. Denis.

### FRENCH SOMALI COAST

The Somali Coast Protectorate lies between the Italian Colony of Eritrea and British Somaliland, the inland boundary towards Abyssinia being, by convention of March 20, 1897, at a distance of 90 kilometres (about 56 miles) from the coast. The territory has an area of about 5,790 square miles, and the population was estimated in 1910 at about 208,000. It is administered by a Governor with a Privy Council. The port of Obok was acquired for France in 1862, but it was not till 1884 that its active occupation began. In 1884 Sagallo and Tadjurah were ceded to France, in 1885, Ambedo, in 1888 the territory was delimited by agreement with Great Britain; in 1888 a port was created at Djibouti, now the seat of government.

Djibouti has (1911) 13,896 inhabitants, of whom 556 are European (267 French). The natives are either of the Danakil or the Somali race. In 1902, a French mission school for boys and one for girls were opened at Djibouti with 50 pupils. The expenditure of France on the Somali coast (budget of 1913) was 1,097,500 francs. The local budget for 1911 balanced at 1,411 000 francs. The country has scarcely any industries, but with the coast fisheries and inland trade there is considerable traffic. The chief imports are cotton goods, butter, sugar, galvanised iron, the chief exports were coffee, ivory, hides and skins. The total imports in 1911 reached 32,620,688 francs and the total exports 18,774 926 francs. The export of the products of Abyssinia in 1911 amounted to 18,974,926 francs. Merchandise imported at Djibouti, destined for Abyssinia, amounted to 22,708 001 francs. Much of the traffic with Abyssinia which formerly passed by Zailah now goes by Djibouti by railway to Diré Dawaah. The French Somaliland has about 192 miles of railway. [See also under *Abyssinia*]. The vessels of 4 French, 5 English, 1 German, 1 Austrian, 1 Russian, and 1 Italian shipping company visit Djibouti, which is also in communication with Aden by means of French and English steamboats for local traffic. In 1911 there entered at Djibouti 379 steam merchant vessels of 692,188 tons, and cleared 578 of 692,019 tons.

#### FRENCH WEST AFRICA AND THE SAHARA.

A treaty of October 19, 1906, determines the course of the Anglo French boundary from the Gulf of Guinea to the Niger. The British government has leased to France for purposes of commerce two pieces of land, one on the right bank of the Niger between Lealaha and the confluence of the rivers Moussa and Niger, and the other on one of the mouths of the Niger, each to form one block of from 25 to 120 acres with a river frontage not exceeding 486 yards, the lease, at first to be for 30 years. It is further stipulated that, within the boundaries indicated in the convention, British and French as regards persons and merchandise shall enjoy for 30 years the same treatment in all matters of river navigation, of commerce, and of tariff and fiscal treatment and taxes of all kinds.

Under the Anglo-French Convention of April 8 1904, the river port of Yarbenda on the Gambia (belonging to the British colony of Gambia) with all its landing places, was ceded to France, and, if this port should prove inaccessible to sea going merchantmen, access to the river will be granted to France at an accessible point lower down. At the same time the Los Islands were ceded to France.

By an agreement, dated July 6, 1911 between England and France, the boundary line between French Guinea and Sierra Leone was re-adjusted.

By a Convention between Great Britain and France the former recognised the right of France to all territory west of the Nile basin, which practically includes the whole of the Sahara (exclusive of the Libyan Desert), and the State of Wadai. The French Sahara may be roughly estimated at about 1½ million square miles.

A decree of October 1, 1902, divided French West Africa as follows — (1) The colony of Senegal, (2) French Guinea, (3) the Ivory Coast, (4) Dahomey, (5) the Territories of Senegambia and of the Niger. The Senegambia and Niger Territories consist of the protectorate which was formerly dependent on Senegal, the territories of the Upper Senegal, the Middle Niger, and the Military Territories, all being united under one administrative and financial régime. In 1903 the French Protectorate was extended over the Moorish tribes of Trarza and Brakna to the north of the lower Senegal, and for these territories a provisional government, with civil

and military functionaries, was formed under the name of Mauritania. Over the whole of French West Africa there is a Governor General, who is assisted by a Secretary and by a Council, the seat of the general government being at Dakar.

In 1904 a further reorganisation took place by which the Territories of Senegambia Niger were broken up the Senegal Protectorate restored to that Colony, and the rest of the Territories formed into a fifth colony called Upper Senegal Niger, with its capital at Bamako on the River Niger. At the same time Mauritania was made a Civil Territory in five circles, Trarza, Brakna, Gorgol, Yagant and Guinimaka, administered by a Commissioner. In January, 1909, the whole of Mauritania was formed into a French protectorate.

The five Colonies are each under a Lieutenant-Governor, subject to the direction of the Governor General, who has been relieved of the direct administration of any portion of his Government, and is free to devote the whole of his attention to directing and controlling the common interests of the five Colonies. To facilitate this object a General Budget has been created, drawn up by the Governor General, which provides for all the services which are common to all the Colonies and the funds for which are provided by the customs and shipping dues of each of the Colonies, which have now only their internal revenues to depend upon for their local budgets, which have, however, been relieved of the cost of all the general services.

The expenditure of France on French West Africa (budget estimates for 1913) amounts to 20 555,575 francs most of which is military expenditure. The general budget of the Colonies for 1911 amounted to 20 875,000 francs, in addition there are the separate budgets of the Colonies. The outstanding debt of French West Africa on January 1 1910 amounted to 156 277,000 francs. The military forces consist of 8,956 men of whom 2 098 are Europeans.

The population of French West Africa is (1911) 1,100 000, of whom 7,104 are Europeans including 6,377 French, 112 English and 75 Germans. The area 1,510,000 sq miles (including Mauritania). Schools are at work for elementary primary superior and commercial primary, and technical education, with a central normal school for training native teachers for the village schools. The whole system is supervised by an Inspector of Education for French West Africa. Over 10,000 children are receiving elementary instruction, about 3,000 of the pupils being girls. The expenditure on the schools for 1908 was put at 1,015,380 francs.

The principal imports and exports of French West Africa in 1911 were as follows —

Imports			Exports		
Articles	Pounds	Value	Articles	Pounds	Value
		£			£
Textile fabrics	13,60 283	1 579 41	Mahogany	52 887 210	87 824

Other articles	—	2,853,474	Total	—	4 674 874
Total	—	5,819,874			

The imports into French West Africa are mostly food substances, tissues, and beverages, the exports from these colonies are chiefly fruits, oils and oil seeds.

The use of French weights and measures, and money, is compulsory throughout French West Africa.

The colony of Senegal consists of —

1 The four municipal communes of St. Louis, the capital of the Colony (population 1910 22,093, Europeans, 995), Dakar, a fortified naval station, and the seat of the Government General of French West Africa (population, 24,914, Europeans 1,098), Rufisque (population, 12,457, Europeans 318), and Gorée (population, 1,181 Europeans, 158). The total area is 438 square miles. The natives of these towns are French citizens, and have the right of vote.

2 The territories of direct administration, in which the Government exercises absolute authority, which consist of —

The district of Tivouane and one kilometre on each side of the Dakar St. Louis Railway.

A rectangle with a front of two kilometres and a depth of one kilometre around the posts of Richard Toll, Dagana, Podor, Saldé, Matam, and Bakel on the river Senegal, Kaolack, Fatick and the island of Foundoungne in the Sine Saloum, Sedhiou, Ziguinchor, and the island of Carabane on the river Casamance, and Portudal, Nianing and Joal on the sea coast east of Rufisque.

In these territories the natives are not French citizens and are not electors.

The former Protectorate has been restored to the Colony, but with a separate budget. The total population of Senegal in 1911 was put at 1,172,096 (including 4,875 Europeans), and the area 74,000 sq. miles.

The Colony is represented in the French Parliament by a deputy, elected by the four communes. The budget of the directly administered territory provided for 1911, 8,124,000 francs, the budget of the Protectorate 4,947,000 francs, the budget of the port of Dakar, 310,000 francs.

Education is supervised by the Inspector of Education for French West Africa under the Decree of 1903. All towns having a sufficiently numerous European or assimilated native population have urban schools giving the same instruction as the French primary schools, modified to suit local requirements. At Dakar there is a superior technical school common to all the colonies, and a normal school for the training of native teachers, and of interpreters, *kadis* (native judges), and chiefs sons. In 1908 there were in Senegal 35 public schools with 3,608 pupils and 4 private Catholic schools with 53 pupils. There is a Muslim superior school at St. Louis with 26 pupils. A large hospital for natives is in construction at Dakar.

The natives cultivate ground-nuts, millet, maize, and some rice, other products are castor beans, some coco-nuts, gum from the Sahara, and rubber from the Casamance river. Ground nuts form the bulk of the exports.

Native industries comprise weaving, pottery, brick making and jewellery.

The chief imports are cottons, foodstuffs, metal work, coal. The chief exports are oil-seeds and rubber.

There are 1,390 miles of telegraph and about 100 miles of telephone lines. A submarine cable from Brest to Dakar was completed in April 1905 so that the French West African Colonies are now independent of foreign cables.

One railway connects Dakar, Rufisque and St. Louis (165 miles), another Kayes to the Niger (544 miles), a third, Thiès to Kayes (83 miles), a fourth, Kayes to Ambidédi (27 miles).

There is a river service on the Senegal from St. Louis to Kayes, the former

capital of Senegambia Niger (490 sea miles), during the rainy season, and extensive works for the improvement of the river have been carried out. The Senegal is closed to foreign flags. Dakar, the principal port, is in regular communication with French ports by the steamers of 4 French lines, and with Liverpool and Hamburg by a British and a German line. Works are in progress for the extension and deepening of the harbour, the erection of sheds and workshops, and the construction of a large dry dock. The Bank of West Africa, with a capital of 5,895 000 francs, and reserve funds 254,000 francs, was founded in 1901 for the purpose of carrying on financial, industrial, or commercial operations with it the Bank of Senegal at St Louis has been fused.

*H B M's Consul General at Dakar*—Captain C Braithwaite Wallis  
*Acting Vice Consul*—P H Stormont

French Guinea lies on the coast between Portuguese Guinea and the British colony of Sierra Leone, and extends inland so as to include the territories of Dingiray, Siguiri, Kouroussa, Kankan, Kissidougou, and Bevia. The area is about 95,000 square miles and the population was estimated in 1906 at about 1,498,000, including 1,147 Europeans. A regular system of Government lay schools has recently been introduced all over French West Africa. In 1907 there were 22 official schools with 1,304 pupils, and 2 Catholic schools with 67 pupils. The principal product is rubber, others are palm oil and nuts, millet, earthnuts, gum and coffee, which is grown in the Nufex region. There is an experimental garden near Konakry (the capital) where the culture of bananas, pine apples, rubber trees, and other plants is being tried. Futa Jallon contains cattle in abundance. In 1909 there were 8,974 cattle and 2,812 sheep. Gold is found in the river Tinkisso and in the Bowie and Siki districts. The principal exports were rubber, cattle, ground nuts, and palm kernels. Total commerce in 1911 37,948,169 francs. A road from Konakry to the Niger has been made and will be connected by branches with the railway stations. The rail way which is to run from Konakry to the Niger at Kouroussa (366 miles long) was opened in January, 1911. It will be continued beyond the Niger to Kankan (49 miles). The jetty 1,066 feet long, at Konakry has been completed. In the colony there are 1,650 miles of telegraph and 48 miles of telephone line, with 6 miles of submarine line. In 1910 imports were 1,728,7194, and exports 732,2401. Konakry is visited regularly by the steamers of two French, one English, and one German company. The budget of the colony provided for 1911 the sum of 6,192,000 francs.

The Ivory Coast lies between Liberia and the British Gold Coast Colony, and, including the kingdom of Kong, extends inland to the military territories of the French Sudan. The French obtained and asserted rights on the coast about 1843, but did not actively and continuously occupy the territory till 1883. Area about 130,000 square miles, population in 1910, 1,132,812, Europeans about 750. The seat of administration is now Bingerville, formerly called Adjame (European population, 127), where extensive building operations are now in progress. There were in 1907 29 official schools with 578 pupils and 4 Catholic private schools with 66 pupils. The principal centres of population and trade are Grand Bassam, with a lagoon forming an excellent harbour of refuge, Assinie, Grand Lahou, Samandira, Tabou, and, in the interior, Abbejan, Abome, Tiamali, Bondaku, and Korbogu. The natives cultivate maize, plantains, bananas, pineapples, and other fruits, European coffee culture is successful, especially in Elima near Assinie, coco-nuts and rubber are

collected. The mahogany forests inland are worked, gold is found near Grand Bassam in Baonli, on the Comoé River and on the Bia River, gold ore output in 1908, 2 857 grammes (7 412 francs). The ports of the Colony are visited by the liners of two French, one British (Elder Dempster), one German, and one Belgian shipping company. It is proposed to create a port and railway at Petit Bassam, and a sum of 10,000,000 francs has been assigned from the colonial loan for this purpose. The port works at Petit Bassam (now called Port Bouet) are in progress, and from Abbejan on the north side of the lagoon, the railway is being constructed, since June 1 1909, there has been communication between Abbejan and Dimbokro, (114 miles). There were at the end of 1907, 1,840 miles of telegraph and 420 miles of telephone lines with 5 miles of submarine wires. Telegraph lines connect the principal towns and extend to adjoining colonies. Telephonic communication exists between Bassam and Bingerville and other places. The budget of the colony for 1911 provided for the sum of 5,474,000 francs.

*British Vice Consul at Grand Bassam* — Vacant

**Dahomey** stretches from the coast between German Togoland on the west and the British possessions of Lagos and Nigeria on the east and extends northwards to the French Military Territories. France obtained a footing on the coast in 1853, and gradually extended her power until in 1894 the whole kingdom of Dahomey was annexed. The colony has only about 70 miles of coast, but opens out northwards into a wide hinterland. The colony is divided into 11 circles. The circles of Pado N Gourma and Say (comprising about 24,000 square miles) were, in March 1907 transferred to the Upper Senegal and Niger Colony. The population in 1910 was about 825 950, including 377 Europeans. The seat of government is Porto Novo (the chief business centre) which has about 19,000 inhabitants. Village, regional, and urban schools are instituted under the new West African educational system. In 1907 there were 6 official schools with 709 pupils, and 21 private schools with 1,944 pupils. The natives are of pure Negro stock, and belong to the Fon branch of the Ewe family. They are industrious agriculturists in the coast region and grow maize, manioc, yams, and potatoes. The forests contain baobab trees and coco nut and oil palms. At Porto Novo there is an experimental farm. Total imports (1910), 1,427,931; exports, 715,294. The principal imports were cottons, machinery, liquors, and tobacco, the chief exports were maize, palm kernels, palm oil, copra, the exports of kola nuts and of rubber are decreasing. In 1907 489 vessels entered and cleared. There are few roads in the colony. At Kotonou an iron pier has been erected and from that port a railway runs into the interior to Savé (156 miles) with a branch line to Whydah and Segberé in Lake Ahémé (20 miles). The line is intended to run to Chaorn (400 miles). The gauge is a metre. Line open (1908), 192 miles under construction 125 miles. A metre gauge railway has also been constructed from Porto Novo to Sakété (25 miles) along the Lagoon frontier. A telegraph line connects Kotonou with Abomey, the Niger, and Senegal. In the colony there are 1,725 miles of telegraph line, and 120 miles of telephone line. French and English coins are in circulation, as well as cowrie shells. On coins other than French there is an import duty of 25 per cent. The budget of the colony for 1911 provided for the sum of 3,582,000 francs.

The Colony of Upper Senegal and the Niger was formed in 1904 from the Territories of Senegambia and the Niger, less the Senegal Protectorate, which was restored to Senegal.

The new Colony is bounded on the north by the Algerian sphere, on the west by the Falemé river and the frontier of French Guinea, on the south by the frontiers of the Ivory Coast, Gold Coast, Togoland, and Dahomey and now includes Fada N'Gourma and Say, whence the boundary runs to the frontier of N. Nigeria which it follows to Lake Chad and on the east by a line northward from Lake Chad. It therefore includes the valley of the Upper Senegal, more than two thirds of the course of the Niger, the whole of the countries enclosed in the great Bend, and the Sahara to the Algerian sphere of influence. The area is about 72 000 square miles with a population in 1910 of about 4,471,031 including 931 Europeans.

At the same time that this Colony was formed the Military Territories, which now form an integral part of it, were broken up. The Second Military Territory, which included nearly all the country within the Bend was handed over to the Civil administration, and the First (Timbuktu) and Third (Zinder Chad) were amalgamated under a colonel as the Military Territory of the Niger, divided into 4 districts: Timbuktu, Gao, Niamey, Zinder each under a major. This Military Territory is administered under the authority of the Lieutenant Governor of the Colony and its budget forms an annexe to the Colonial budget and amounted, for 1911, to 1,510 000 francs.

With the exception of the Military Territory of the Niger the whole of Upper Senegal Niger is under civil administration with the same judicial and educational systems as the other Colonies comprised in the Government General. The budget of the colony for 1911 provided for an income of 3,963,342 francs and an expenditure of 3,816 962 francs.

The most important and populous towns in the Upper Senegal and Niger are Bobo Dioulasso (7,700 inhabitants), Bamako (6,500 inhabitants), Segou (6 200 inhabitants), Kayes (5,900 inhabitants), Djenna (4 900 inhabitants). The most important centres of the military territory are Timbuktu (5,100 inhabitants), Goundam (3 200 inhabitants), Dori (3 400 inhabitants), Filingue (2 700 inhabitants). All the principal towns have urban schools. At Kayes is a professional school and a school for sons of chiefs. In 1907 there were in Upper Senegal and Niger, including Military Territories, 50 official schools with 1,639 pupils, and 2 Catholic private schools with 95 pupils. There is a Mussulman superior school with 30 pupils (official).

The natives cultivate ground nuts, millet, maize, rice, cotton, other products are rubber and karité.

Native industries comprise pottery, brick making, jewellery, weaving, leather making. Chief imports are cottons food stuffs, metal work. Chief exports are ground nuts, cattle, rubber skins and wool.

There is a very complete system of telegraph throughout the Colony from Kayes to Niamey and Zinder, and soon to Lake Tchad. There were at the end of 1907, 4,050 miles of telegraph line and 7½ miles of telephone line.

The Senegal-Niger Railway goes from Kayes to Koulikoro a distance of 349 miles. Small steamboats perform the service from Koulikoro to Timbuktu so that it is now possible to perform the whole journey from Europe to Timbuktu by rail and steamer.

A telegraph line is shortly to connect Timbuktu with Algiers.

**Mauretania**, formed into a protectorate in January, 1909 consists of the five districts of Niarta, Brakna, Gorgol, Gnidimake, and Tagant, with a total area of 344,967 square miles. The northern limit of the protectorate is approximate and the foregoing area is obtained by taking the latitude 23° 3' N as the northern boundary. The population in 1906 was about

222,000, of whom 190,000 were nomad Moors. Military operations were necessary in 1909, to subdue revolts of the tribesmen, and were successful. Fights with robber bands of Moors and Tripolitans took place in 1910. The budget of the protectorate for 1911 provided for the sum of 1,619,800 francs. In 1909 there were 187 schools. Total length of railway (1910) 1,198 miles.

## TUNIS

(AFRIKIYA)

**Government.**—*Sidi Mohamed Ben Naar* Bey, born 1855, son of Mohamed Pasha Bey nephew of Suli Ali, former Bey of Tunis, succeeded his cousin, *Sidi Mahomed el Hadi*, May 12, 1906. The heir presumptive is *Sidi Mohamed Ben Marnous Bey*, born 1858.

The reigning family of Tunis, occupants of the throne since 1705, descend from *Hussein ben Ali*, commonly believed to be a native of the Isle of Crete, who made himself master of the country, acknowledging, however, the suzerainty of the Sultan of Turkey.

After the French invasion of the country in the spring of 1881, the treaty of *Ksar es-Said* (May 12, 1881), confirmed by convention signed June 8, 1883, placed Tunis under the protectorate of France. The government is carried on under the direction of the French Foreign Office, which has a special department for Tunisian affairs, under the control of a French Minister Resident (General), who is also Minister of Foreign Affairs, and a ministry of 9 heads of departments, 7 of the ministers being French and 2 Tunisian. The country is divided into 13 districts (contrôles civils), 3 military circles, and 1 military post, the district governors (contrôleurs) are French, the subordinate officials (*Kaids* and *Sheiks*) are Native. French tribunals administer justice between subjects of European powers, and also between them and natives, there are Native courts for cases between natives. French administration in Tunis has been confirmed by conventions with all the European Powers regulating the status and the conditions of trade of their respective citizens within the Regency.

*French Resident-General.*—Gabriel Alapetite

The army of occupation for 1913 numbers 17,514 men, including 890 officers. The cost of maintaining this force is borne by the budget of the Republic, and is estimated for 1913 at 1,198,924 francs. The Tunisian army (which is little more than the Bey's guard) numbers about 600 officers and men. There is a French gendarmerie of 139 also rural Tunisian police, and in the larger towns a civil police.

**Area and Population.**—The present boundaries are on the north and east the Mediterranean Sea, on the west the Franco-Algerian province of Constantine, and on the south the great desert of the Sahara and the Turkish Pashalik of Tripoli. Area about 50,000 English square miles, including that portion of the Sahara which is to the east of the *Bled Djerid*, extending towards *Gadamés*. Population, in 1910, about 1,923,217, but no proper census has ever been taken. The majority of the population consists of *Bedouin* Arabs and *Kabyles* with about 50,000 Jews. The French population in 1911 was estimated as 46,944, exclusive of the army of occupation. The foreign population in 1911 was estimated as 148,478, of whom 88,082 were Italian, 11,809 Anglo-Maltese.

The capital the city of Tunis, had a population at the end of 1907, of 187 000 Moslems, and 43,000 Jews, besides a large population of French, Italians, and Maltese. By means of the canal, which was opened in 1898, Tunis is directly accessible to ocean going vessels.

The bulk of the population is Mohammedan under the Sheikh ul Islam, and the revenue from the "Habus" lands, like that from the "Wakf" lands in Egypt, is applied to religious, educational, and charitable purposes. There are about 35 000 Roman Catholics, under the ministrations of the Archbishop of Carthage, and about 25 other clergymen. The Greek Church (400), the French Protestants, and the English Church are also represented, and there are 30 English Protestant missionaries at work.

**Education.**—Within the Regency in 1908 there were 179 public schools, 5 lycées and colleges, and 21 private schools, total 205. At all the schools there were 25 531 pupils, of whom 15 543 were boys. Of the total number of pupils, 6,569 were French, 4 993 Mussulman, 5,990 Jews, 6 068 Italian, 1,634 Maltese, 277 others. In the Great Mosque at Tunis there is a Mohammedan university. In the city are 86 and in the interior 1 214 Mussulman primary schools, some of them assisted by Government funds. Many private schools have recently sprung up at Tunis and Sfax. The abolition of congregational teaching decreed in France has been extended to the Regency as regards French children. The Italian Government and certain Italian societies still maintain Italian schools at Tunis and other large towns.

**Finance.**—For 1911 the receipts were estimated at 49,274 774 francs (1,970,990*l.*), and the expenditure at 45,748 656 francs (1,829 946*l.*).

At the end of 1906 the total Tunisian debt amounted to 9 287,260*l.* of which 7,667,320*l.* was the balance still due on the consolidated debt (1892), and the remainder for a railway and other loan (1903). In 1910 the Tunisian Government was authorised to contract a loan of 90 000 000 francs for railways, roads, and colonisation. In 1911 the interest and sinking fund of floating debt amounted to 10 365 832 francs (414 633*l.*).

The loan was raised in 1907, 1908 and 1909.

**Industry.**—The chief industry is agriculture. The area of wheat in 1911 was 1,401 725 acres, and in 1910 1,217,626 acres; the production in 1911 was 1,009 766 quarters. The area in 1911 of barley was 1 192,768 acres, and the production 1,678,646 quarters; and of oats the area was 148,200 acres, and the production 464,062 quarters. The total area of vineyards in 1911 was 40,158 acres, and 9,880,000 gallons of wine produced; there were also 11,428,660 olive trees and 990,000 gallons of olive oil produced. In the south of Tunisia there are about 1,350,000 date palms; the export of dates in 1910 was 4,915 metric tons. Other products are almonds, oranges, lemons, shaddockes, pistachios, alfalfa, grass, henna, and cork. The cork forests in the north-west have an area of 348,270 acres; the quantity of cork exported in 1910 amounted to 4,922 tons. Considerable areas of agricultural land have been acquired either on lease or by purchase by immigrants. In 1906 the total area occupied by French colonists was 1,729,000 acres, by Italians 222,000 acres, and by other Europeans 98,000 acres.

In 1906 there were 32 mines worked. These are being developed, and the output steadily increases. Copper ore, lead-ore, zinc-ore are all found. By far the greatest development has been in phosphates, the output of which is increasing yearly. Iron has been found near Kef.

In 1911 the farm animals were—horses, 39,441, asses and mules, 74,240, cattle, 191,450, sheep, 686,780, goats, 468 828, camels, 110 707, pigs, 17,898.

Native industries are the spinning and weaving of wool for garments, carpet weaving, leather embroidery, saddle making, the manufacture of slippers, pottery (in ancient style), and matting, tanning and silk weaving are declining.

The Fisheries are in the hands of Italians, Maltese and Greeks. In 1910, 1 976 boats were engaged in this industry, with a total of 7,165 men. Sardines, anchovies, allaches, tunny (978,091 francs) were caught, and the total value amounted to 2,100,000 francs.

### Commerce

**Commerce.**—The imports and exports in recent years have been to the following amounts (including precious metals) —

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports	4 114 410	4 101 130	4 777 871	4 210 892	4 807,837
Exports	4 184 440	3 704 700	4 886 041	4 416 043	4 444 028

Imports in 1910 and exports in 1911 were —

Imports (1910).	£	Exports (1911).	£
Grain	170 851	Corn	1 928,722
Flour	360 612	Cattle	144,996
Iron and Hardware	464,691	Hides	110,839
Machinery	250 091	Separate grain	182 780
Coal	135 331	Olive oil	100,000
Sugar	140,662	Phosphates	1 585,409
Timber	100 104	Iron	174,130
Cotton goods	467 608	Zinc ore	168,680
Tobacco	51 710	Lead ore	925,300
Petroleum	48 785	Wine	152,960
Tissues, wool	73 153	Fish	159,271

The distribution of the trade in 1910 was mainly as follows —

From or to	Imports from	Exports to
	£	£
France	2,370 197	2 875 156
Algeria	494,417	258,192
Great Britain	440 587	481 170
Italy	734 952	879,354
Spain	39 142	47 807
Germany	80 438	105 127

In the year 1911 there entered the ports of the Regency 11 994 vessels of 4,350,405 tons, and cleared, 12,210 of 4 149 077 tons, of the tonnage entered 1,934 028 tons represented French vessels.

Good roads to the length of 1,987 miles have been constructed between 1882 and 1910.

Length of railways 949 miles in 1910

There were in 1910, 2,870 miles of telegraphs and 9,942 miles of wire, 204 telegraph offices, messages (1910), 1,847,186 In 1910 urban telephone

systems had 697 miles of line, inter urban systems had 2,545 miles of wire. There were in 1910, 415 post offices; letters sent and received, internal service, 81,006,891, external service, 39,192,146. The savings banks had 5,620 depositors with deposits of 6,078,000 francs in 1910.

**Money, Weights, and Measures.**—The Banque d'Algérie has begun operations in the Regency and issues Tunisian bank notes.

The legal coinage since 1892 consists of pieces similar to the French, the pieces being coined in France.

The ounce = 31.487 grammes, the multiples of the ounce are the various denominations of the *Rottolo*, which contains from 16 to 42 ounces.

The *Kafis* (of 16 *whibas*, each of 12 *sahs*) = 16 bushels.

The principal measure of length is the *pik* the *pik Arabi* for linen = 5892 yd., the *pik Turki* for silk = 7058 yd., the *pik Andouli* for cloth = 7094 yd.

French weights and measures have almost entirely taken the place of those of Tunis, but corn is still sold in *kafis* and *whibas*.

**British Consul-General at Tunis**—Ernest J. L. Berkeley, C.B., appointed July 1, 1899.

**Vice Consul**—P. Wilkinson.

**Vice-Consuls at Bizerta, Sfax, and Susa, Consular Agents at Mehdia, Monastir, Gabes, and Gerba.**

# AMERICA

## GUADELOUPE AND DEPENDENCIES

Guadeloupe, situated in the Lesser Antilles, consists of two islands separated by a narrow channel, that on the west being called Guadeloupe proper or Basse-Terre, and that to the east, Grande-Terre, with a united area of 150,940 hectares (383 sq m), it has five dependencies consisting of the smaller islands, Marie Galante, Les Saintes, Désirade, St Barthélemy, and St Martin, the total area being 688 square miles. It is under a governor and an elected council and is represented by a senator and two deputies. Population (1911) 212,480, of whom 3,461 were born in France and 12,306 were foreigners. Instruction (1911) is given in 1 *lycée* with 396 pupils, a secondary course for girls at Pointe à Pitre, with 294 pupils, and 105 public and private elementary schools. The public elementary schools have 260 teachers and 12,290 pupils, and the private have 770. The colony is divided into *arrondissements*, cantons, and communes. The seat of government is Basse-Terre (8,656 inhabitants). Pointe à Pitre (22,664 inhabitants) has a fine harbour. Revenue and expenditure balanced at 4,622,551 francs in the local budget of 1911, expenditure of France (budget of 1913), 331,678 francs. Outstanding debt, January 1, 1910, 250,000 francs. Chief cultures sugar, 41,329 tons exported in 1911, coffee 2,114,600 pounds exported in 1911, cacao, 2,337,610 pounds exported. For local consumption there are grown bananas, sweet potatoes, manioc, tobacco, indian corn, and vegetables. The area of the colony is 439,660 acres, divided as follows, in acres — Sugar cane, 64,220; coffee, 12,350; cacao 9,880; products for local use, 41,165; forests 78,000; arable land not cultivated, 113,425; and waste land, 118,620. The forests, covering 71,256 hectares of mountainous district, are interspersed with valuable timber, which is little worked. The total value of the imports in 1911 was 748,194/ and of the exports was 781,476/. In 1911, 307 vessels of 338,234 tons cleared the ports of the colony. Guadeloupe is in direct communication with France by means of two steam navigation companies. Within the islands traffic is carried on by means of roads. The Bank of Guadeloupe with a capital of 3,000,000 francs, and reserve funds amounting to 843,746 francs, advances loans chiefly for agricultural purposes, even on the security of jewellery. Silver coin has disappeared from circulation, nickel treasury tokens (*bons*) of 1 franc and of 50 centimes are authorised up to a total emission of 1,000,000 francs.

*British Vice Consul* at Guadeloupe.—J. E. de Vaux

## GUIANA.

The colony of French Guiana is administered by a Governor, assisted by a Privy Council of 5 members. The colony has a Council-General of 16 members and is represented in the French Parliament by one deputy. Area about 30,500 square miles, and population, 1911, 49,099. Cayenne, the chief town and only seaport, has a population of 18,527, and the other 14 communes have 12,798. At Cayenne there are a court of first instance, a court of appeal, and justices of the peace, with jurisdiction in other localities. A decree of November 12, 1905, established a justice of the peace at Sinnamary and one at Mana. The military force consists of 153 European officers and men. In the colony there are 23 primary schools, with about 2,600 pupils, and there is a college at Cayenne, which has also a local museum and a library. Local budget for 1912 balanced at 3,592,099 francs.

*British Consul at Cayenne* —H Fourrage

#### MARTINIQUE

The colony is under a Governor, a General Council, and elective municipal councils. It is represented by a senator and two deputies. Area 385 square miles, divided into 31 communes, population in 1911, 184,004. The military force consists of 17 officers and 394 men. There is a law school (at Fort-de-France) with 56 students, 2 secondary schools with 671 pupils, 2 normal schools with 27 pupils, primary schools with 16,889 pupils (including 7 private schools). Chief commercial town, Fort de France (population, 27,619). Sugar and cocoa are the chief productions, then come coffee, tobacco, and cotton. There are 12,000 hectares under the food producing crops. Tobacco culture is under special regulations. There are 15 sugar works and 67 rum distilleries. In 1911, sugar to the value of 485,098*l*, rum to the value of 268,862*l*, and cocoa to the value of 41,854*l* were exported. The total imports in 1911 were valued at 794,194*l* and the exports at 903,309*l*. Vessels entered in 1911, 390 of 387,380 tons, and cleared 389 of 393,107 tons. The island is visited regularly by the steamers of French and American companies. For local traffic there are subsidised mail coaches, and subsidised steamers ply on the coast. The colony is in telegraphic communication with the rest of the world by telegraph cables. The local budget for 1912 balanced at 5,326,390 francs, expenditure of France (budget of 1913), 1,187,531 francs. Debt outstanding January 1, 1912 4,474,210 francs. The Bank of Martinique at Fort de France with a capital of 3,000,000 francs and a reserve fund of 2,001,411 francs in 1912, advances loans for agricultural and other purposes.

*British Consul at Martinique* —H J Meagher

#### ST PIERRE AND MIQUELON

The largest islands of two small groups close to the south coast of New foundland. Area of St. Pierre group, 10 sq miles, population in 1911, 4,299, area of Miquelon group, 63 sq miles, population, 448, total area,

93 sq miles, total population, 4,209. In May, 1906, for economical reasons, a change was made in the form of administration. Instead of a Governor there is now an Administrator who organizes and regulates the various branches of the public service. He is assisted by a consultative council of administration and municipal councils. Chieftown, St Pierre. Primary instruction is free. There are 3 public schools for boys, and 3 for girls, with (in all) 16 teachers and 340 pupils. There are, besides, infant schools, 'salles d'aile,' frequented by 125 children. There are a private boarding school and two private schools with 365 pupils.

The islands, being mostly barren rock, are unsuited for agriculture. The chief industry is cod fishing, which has steadily declined. In 1912 there were 40 local smacks engaged in fishing on the Newfoundland banks, the average catch per vessel being 1,828 metric cwts. The "Metropolitan" (French) fleet numbered 240 vessels and had 6,838 men engaged in the work in 1912. The imports comprise textiles, salt, wines, food stuffs, meat, and the exports cod dried and fresh and fish products. In 1912 1,495 vessels of 168,789 tons entered and 1,495 of 168,480 tons cleared at the Islands. The imports were valued at 203,985*l*, and the exports at 327,918*l*. In 1911, the latter consisting mainly of dried codfish. St Pierre is in regular steam communication with Boston and Halifax, and is connected by telegraph cable with Europe and the American continent. Local budget for 1910, 497,660 francs. Expenditure of France (budget 1918), 242,949 francs. Debt outstanding January 1, 1910, 439,000 francs.

*British Consul*—Mr A P Murray

## AUSTRALASIA AND OCEANIA

### NEW CALEDONIA AND DEPENDENCIES

New Caledonia is administered by a Governor assisted by a Privy Council consisting of the Secretary General, the Procureur Général (the head of the Judicial administration) the Superior Commandant of the Troops, the Director of the Penitentiary administration, the head of the Department of Domains and Colonization, and two notables of the colony appointed by the President of the Republic. The colony has also an elective Council General

Nouméa, the capital, has a municipality; other centres of population are locally administered by municipal commissions. The colony contains a penal settlement at Nou Island. Since 1896, however, no convicts have been sent thither, and the convict element in the population is quickly decreasing. Area, 7,650 square miles. The penal population comprised 6,741 men and 298 women, total 7,034, of whom 1,750 were convicts undergoing hard labour, 3,980 were freed, and 1,404 were simply relégués (banished). In 1912 the population was 50,606, of whom 18,188 were free, 5,671 of convict origin, and 28,075 black. Nouméa had (1912) 8,961 inhabitants, of whom 5,207 were free. The immigrants from France are not numerous. Other immigrants are Javanese, Tonkinese, Indians, and islanders from the New Hebrides to the number of 3,000. Primary instruction is provided in public and also in private elementary schools, the latter being assisted by the municipalities. In 1912 there were 94 public and private primary schools with 2,018 pupils (937 being girls). There is a secondary school at Nouméa with 110 pupils. Local budget for 1912, receipts, 3,969,650 francs, expenditure, 3,685,602 francs. The expenditure of France on the colony in the budget of 1913 was 2,869,443 francs, the greater part of which was for the penal establishment. In 1912 the military force consisted of 400 Europeans. Of the total area more than half is mountainous or not cultivable, about 1,600 square miles is pasture land, about the same area is cultivated or cultivable, and about 500 square miles contain forest which is being worked. The land is divided into 3 domains: that of the state (in which gratuitous concessions may be made), that of the penal establishment (about 400 square miles), and that of the native reserve. The chief agricultural products are coffee, copra, cotton, manioc (cassava), maize, tobacco, bananas, pine apples. There are 100,000 cattle and about 5,000 sheep. Local industries develop slowly, there are a grain storage and cleaning dépôt, a perfumery manufactory and meat preserving works. About 199,798 hectares of mining land are owned and 97,660 hectares have been granted for prospecting. There were 32 mining concessions in 1910, employing altogether 3,521 workmen, mostly Japanese. In 1911 the mineral export comprised nickel ore 120,059,297 metric tons, and cobalt and chrome ore, 32,806,093. The value of the mineral export was 4,745,831 francs. The imports in 1911 were valued at 606,223, and the exports at 523,970. The imports comprise wine, coal, flour, rice, the exports, minerals, coffee, copra, rubber, guano. In 1911, 117 vessels of 188,612 tons entered and 126 of 193,074 tons cleared at the port of Nouméa. Nouméa is connected with Sydney in N. S. Wales by a steamer sailing monthly, and by other vessels sailing irregularly. There is a mail service by steamer along the coast. A railway from Nouméa to Bourail (80 miles) is under construction, it is open for traffic to Dumbéa (about 10 miles). Harbour improvements are in progress, a pier and a slip are being constructed, dredging operations are about to begin, and a wharf and a dry dock are contemplated. There are 580 miles of telegraph line and 115 of telephone line.

#### Dependencies of New Caledonia are

1. The Isle of Pines, 30 miles to the south-east, with an area of 58 square miles and a population of about 600.
2. The Wallis Archipelago, north-east of Fiji, with an area of 46 square miles and about 4,500 inhabitants. The islands were placed under the French protectorate in 1887. There is a French Resident, and the archipelago is in regular communication with Nouméa.

3 The Loyalty Islands, 60 miles east of New Caledonia, consisting of 3 large islands, Maré, Lifou, and Uvéea, and many small islands with a total area of about 800 square miles. The chief culture in the islands is that of coconuts, the chief export sandal wood and rubber.

4 The Huon Islands, 170 miles north west of New Caledonia, a most barren island.

5 Futuna and Alafi, south of the Wallis Islands, with about 1,500 inhabitants were annexed by France in 1888.

The New Hebrides, in accordance with the Anglo French convention of February (ratified in October), 1906, are jointly administered by the High Commissioners of His Britannic Majesty and the French Republic. There are French and English courts, and a mixed court with a judge foreign to both nations. Maize, coffee, vanilla, coconut trees are grown. In some places sulphur is abundant.

*British Consul at Nouméa.*—W. J. Holmes

### FRENCH ESTABLISHMENTS IN OCEANIA

These, scattered over a wide area in the Eastern Pacific, are administered by a governor with a privy council, and an Administrative Council consisting of certain officials, the *maire* of Papeete, and the Presidents of the Chambers of Commerce and Agriculture. The establishments consist of the Society Islands, the most important of which are Tahiti and Moorea, the former with an area of about 600 square miles and 11,691 inhabitants, the latter with an area of 50 square miles and 1,564 inhabitants. Other groups are the Marquesas Islands, with a total area of 480 square miles and 3,424 inhabitants, the two largest islands being Nukahiva and Hiva-oa, the Tuamotu group, consisting of two parallel ranges of islands from King George's Island on the north to Gloucester Island on the south, their total population being 3,828, the Leeward Islands (*Iles sous le Vent*), of which the more important are Huahine (pop. 1,230), Raiatéea and Tahaa (pop. 3,347) and Bora Bora Maupiti (pop. 1,295), the Gambier, Tubuai, and Rapa Islands, the Gambier group (of which Mangareva is the principal) having six square miles of area and 1,533 inhabitants, the Tubuai (or southern) Islands, of which Rurutu and Rimitara are the largest, Raiavae (or Vavitu), and far to the south, Rapa, having together an area of 115 square miles and about 2,550 inhabitants. The total area of the Establishments is estimated at 1,520 square miles, and their population on December 28, 1911, at 31,477 of whom 28,219 were natives. There were 28,875 French, 2,656 other Europeans, and 975 Chinese. In 1908 it was decreed that separate islands or groups should no longer be regarded as distinct Establishments, but that all should be united to form a homogeneous colony.

The most important of the islands is Tahiti, whose chief town is Papeete with 3,617 inhabitants, of whom 1,909 are French. A higher primary school, with a normal school, has been established at Papeete, and there are 6 primary schools, each with about 100 pupils, in various islands, besides 4 Catholic and 2 Protestant mission schools. Pearls and mother o' pearl are important products. The island is mountainous and picturesque with a fertile coast land bearing coconut, banana, and orange trees, sugar cane, vanilla, and other tropical fruits, besides vegetables grown in temperate climates. Cotton, coffee, and tobacco are now little cultivated. The chief industries are the preparation of copra, sugar, and rum. Value of imports (1911) 288,257 l., exports, 300,765 l. The chief imports are tinware, wheat, flour, metal work. The chief exports are copra, mother-o' pearl, vanilla-coconuts and oranges. In 1911 the shipping entered consisted of 67 vessels of 166,588 tons and 65 of 164,518 tons cleared, the greater part of the tonnage represents visits of

steamers connecting the islands with New Zealand. The New Zealand company (with a French subvention) has a monthly service connecting San Francisco, New Zealand and Australia with Papeete, the Tuamotu Islands, the Marquesas, and the Leeward Islands. The shipping between the islands is carried on by sailing boats, of which in 1911, there entered 287 with a tonnage of 21,803 (value of cargo, 92,428l.), and cleared 266, tonnage 24,646 (value of cargo, 165,968l.).

For all the islands the local budgets for 1910 showed a revenue of 109,232l. and an expenditure of 100,548l. For 1913 the French subventions amounted to 204,000 francs.

*British Consul at Tahiti* — A. Richards.

## GERMAN EMPIRE.

(DEUTSCHES REICH)

### Reigning Emperor and King

**Wilhelm II.**, German Emperor, and King of Prussia born January 27, 1859, became German Emperor June 15 1888 (see *Prussia*)

#### *Heir Apparent*

Prince *Friedrich Wilhelm*, born May 6 1892, eldest son of the Emperor King (see *Prussia*)

The present German Empire is essentially different from the Holy Roman Empire which came to an end in 1806, amid the convulsion of the Napoleonic wars, and of which Austria was the leading member. The East Frankish or Germanic throne after the extinction of the Karling line was filled by election, though with a tendency towards the hereditary principle of succession. At first the king and Emperor was chosen by the vote of all the great Princes of the realm but the mode came to be changed in the thirteenth century, when a limited number of princes fixed at seven for a time and afterwards enlarged to eight (nine from 1692 to 1777), assumed the privilege of disposing of the crown, and, their right being acknowledged were called Electors. The election of Wilhelm I., king of Prussia, as German Emperor (1871) was by vote of the Reichstag of the North German Confederation on the initiative of all the reigning Princes of Germany. The Imperial dignity is hereditary in the House of Hohenzollern, and follows the law of primogeniture.

Since Charles the Great was crowned by the Pope at Rome Emperor of the West in the year 800 there have been the following German Kings and Roman Emperors, those never crowned or called Emperor being marked with an asterisk —

<i>House of Charles the Great</i>		Heinrich III	1029-1056
Karl I., 'Der Grosse'	800-814	Heinrich IV	1056-1106
Ludwig I., 'Der Fromme'	814-840	Heinrich V	1106-1125
Ludwig II. 'Der Deutsche'	848-876		
Karl II. 'Der Kahle'	876-877	<i>House of Saxony</i>	
Karl, 'Der Dicke'	881-887	Lothar II., 'Der Sachse'	1125-1137
Arnulf	887-899		
*Ludwig III., 'Das Kind'	899-911	<i>House of Hohenstaufen.</i>	
<i>House of Franconia</i>		*Konrad III	1138-1152
*Konrad I	911-918	Friedrich I., 'Barbarossa'	1152-1190
<i>House of Saxony</i>		Heinrich VI	1190-1197
*Heinrich I., 'Der Vogelsteller'	919-936	*Philipp and rivals	1198-1208
Otto I., 'Der Grosse'	936-973	Otto IV. of Brunswick	1208-1216
Otto II	973-983	Friedrich II	1215-1250
Otto III	983-1002	*Konrad IV	1250-1254
Heinrich II. 'Der Heilige'	1002-1024	*Wilhelm of Holland	1254-1256
<i>House of Franconia.</i>		<i>The Great Interregnum</i>	
Konrad II., 'Der Salter'	1024-1039	*Richard of Cornwall	1256-1272
		<i>House of Habsburg</i>	
		*Rudolf I	1273-1291

<i>House of Nassau</i>		Matthias	1612-1619
*Adolf	1292-1298	Ferdinand II	1619-1637
<i>House of Habsburg or Austria</i>		Ferdinand III	1637-1657
*Albrecht I	1298-1308	Leopold I	1657-1705
<i>Houses of Luxembourg, Bavaria, &amp;c</i>		Joseph I	1705-1711
Heinrich VII	1308-1313	Karl VI	1711-1740
Ludwig IV, Der Baier	1314-1347	<i>House of Bavaria</i>	
Friedrich of Austria, a rival	1314-1330	Karl VII	1742-1745
Karl IV	1347-1378	<i>House of Habsburg-Lorraine</i>	
*Wenceslaus of Bohemia	1378-1400	Franz I	1745-1765
*Ruprecht von der Pfalz	1400-1410	Joseph II	1765-1790
Sigmund of Brandenburg	1410-1437	Leopold II	1790-1792
<i>House of Habsburg or Austria</i>		Franz II	1792-1806
*Albrecht II	1438-1439	Confederation of the Rhine	
Friedrich III	1440-1498	German 'Bund	1806-1815
Maximilian I	1498-1519	North German Confederation	1815-1866
Karl V	1519-1556	<i>House of Hohenzollern</i>	
Ferdinand I	1556-1564	Wilhelm I, 'Der Grosse'	1871-1888
Maximilian II	1564-1576	Friedrich III	1888 (March-June)
Rudolf II	1576-1612	Wilhelm II	1888 (June)

1 Maximilian I in 1498 took the title of Emperor Elect. From Ferdinand I to Francis II all the Emperors, as never crowned by the Roman Pontiff, took formally the title of Emperor Elect (Erwählter Römischer Kaiser).

## Constitution and Government

The Constitution of the Empire bears date April 16, 1871. By its terms, all the States of Germany 'form an eternal union for the protection of the realm and the care of the welfare of the German people.' The supreme direction of the military and political affairs of the Empire is vested in the King of Prussia, who, in this capacity, bears the title of *Deutscher Kaiser*. According to Art. 11 of the Constitution, 'the Emperor represents the Empire internationally, and can declare war if defensive, and make peace, as well as enter into treaties with other nations, and appoint and receive ambassadors. But when treaties relate to matters regulated by imperial legislation, and when war is not merely defensive, the Kaiser must have the consent of the Bundesrat, or Federal Council, in which body, together with the Reichstag, or Diet of the Realm, are vested the legislative functions of the Empire. The Emperor has no vote on laws passed by these bodies. The Bundesrat represents the individual States of Germany, and the Reichstag the German nation. The 61 members of the Bundesrat are appointed by the Governments of the individual States for each session, while the members of the Reichstag, 397 in number (about one for every 81,640 inhabitants), are elected by universal suffrage and ballot, for the term of five years. By a law passed in 1906, members of the Reichstag are paid 8,000 marks (1501) for the session with deduction of 20 marks (11) for each day's absence, they have free passages over German railways during session. The duration of the legislative period is five years. The various States of Germany are represented as follows in the Bundesrat and the Reichstag:—

States of the Empire	Number of Members in Bundesrat	Number of Deputies in Reichstag
Kingdom of Prussia	17	235
" " Bavaria	6	48
" " Saxony	4	28
" " Württemberg	4	17
Grand Duchy of Baden	3	14
" " Hesse	3	9
" " Mecklenburg Schwerin	2	6
" " Saxony	1	3
" " Mecklenburg-Strelitz	1	1
" " Oldenburg	1	3
Duchy of Brunswick	2	3
" " Saxe-Meiningen	1	2
" " Saxe-Altenburg	1	1
" " Saxe-Coburg Gotha	1	2
" " Anhalt	1	2
Principality of Schwarzburg-Sonderhausen	1	1
" " Schwarzburg-Rudolstadt	1	1
" " Waldeck	1	1
" " Reuss Älterer Linie	1	1
" " Reuss Jüngerer Linie	1	1
" " Schaumburg Lippe	1	1
" " Lippe	1	1
Free town of Lübeck	1	1
" " Bremen	1	1
" " Hamburg	1	3
Reichsland of Alsace Lorraine	3	15
Total	61	397

The last elections (January, 1912) resulted in the return of the following Socialists, 110, Centre Party, 90, National Liberals 44 Conservatives, 45, Radicals, 41, Poles, 18, Free Conservatives, 13, Anti Semites, 11, Other Parties 25 (5 Alsatians, 4 Lorrainers, 5 Guelphs 1 Dane, 2 Bavarian Peasants League 2 German Peasants League and 6 Independents)

The total number of electors to the Reichstag inscribed on the lists at the general election of 1912 was 14 441 436 while the number of actual voters was 12,260,626 (4,250,401 Socialists, 1 896,843 Centre Party, 1,662,670 National Liberals, 1,497,041 Radicals and 1,126,270 Conservatives)

Both the Bundesrat and the Reichstag meet in annual session convoked by the Emperor. The Emperor has the right to prorogue and dissolve the Reichstag after a vote by the Bundesrat. Without consent of the Reichstag the prorogation may not exceed thirty days, while in case of dissolution new elections must take place within sixty days, and a new session must open within ninety days. All laws for the Empire must receive the votes of an absolute majority of the Bundesrat and the Reichstag. The Bundesrat is presided over by the Reichskanzler, or Chancellor of the Empire, and the President of the Reichstag is elected by the deputies.

Since the foundation of the Empire there have been five Chancellors — (1) Prince Bismarck, 1871-90, (2) Count Caprivi, 1890-94, (3) Prince Hohenlohe, 1894-1904, (4) Prince Bülow, 1904-1909, (5) Dr van Bethmann Hollweg, 1909

The laws of the Empire, passed by the Bundesrat and the Reichstag, to take effect must be promulgated by the Emperor, and the promulgation, like all other official acts of the Emperor, requires the counter signature of the Chancellor of the Empire. All the members of the Bundesrat have the right to be present at the deliberations of the Reichstag.

The following are the imperial authorities or Secretaries of State: they do not form a Ministry or Cabinet, but act independently of each other, under the general supervision of the Chancellor.

1. *Chancellor of the Empire* — Dr von *Bethmann Hollweg*
  2. *Secretary for Foreign Affairs* — Herr von *Jagow*
  3. *Imperial Home Office* and *'Representative of the Chancellor'* — *Delbrück*
  4. *Imperial Admiralty* — Herr von *Tirpitz* *Admiral Commanding in Chief* — *Heinrich Prince of Prussia*
  5. *Imperial Secretary of Justice* — Herr Dr *Lisco*
  6. *Imperial Treasury* — Herr *Kühn*
  7. *Imperial Post-Office* — Herr *Kraetke*
  8. *Secretary for the Colonies* — Herr Dr *Solf*
- And, in addition, the following presidents of imperial bureaux —
9. *Railways* — Herr *Wackerzapp*
  10. *Imperial Exchequer* — Herr von *Magdeburg*
  11. *Imperial Bank* — President, Herr *Havenstein*
  12. *Imperial Debt Commission* — Herr *Kuhn*
  13. *Administration of Imperial Railways* — Herr von *Brentenbach*
  14. *Imperial Court Martial* — General der Infanterie von *Linde-Suden*

Acting under the direction of the Chancellor of the Empire the Bundesrat represents also a supreme administrative and consultative board and as such has twelve standing committees—namely, for army and fortifications for naval matters tariff excise and taxes trade and commerce, railways, posts, and telegraphs, civil and criminal law, financial accounts, foreign affairs for Alsace Lorraine for the Constitution for the Standing orders, and for railway tariffs. Each committee consists of representatives of at least four States of the Empire, but the foreign affairs committee includes only the representatives of Bavaria, Saxony, Württemberg and two other representatives to be elected every year.

### Area and Population.

#### I PROGRESS AND PRESENT CONDITIONS

The following table gives the area and population of the twenty five States of Germany in the order of their magnitude, and of the Reichsland of Alsace-Lorraine as returned at the census of Dec. 1, 1910 —

States of the Empire	Area English sq. miles	Population Dec 1, 1910			Pop per sq mille 1910
		Male	Female	Total	
Prussia	184,616	19,847,725	20,317,494	40,165,219	224.0
Bavaria	29,292	3,379,530	3,507,711	6,887,291	234.4
Württemberg	7,594	1,192,392	1,245,182	2,437,574	323.2
Baden	5,828	1,059,579	1,088,254	2,147,833	367.9
Saxony, Kingdom of	5,789	2,323,903	2,482,758	4,806,661	829.5
Mecklenburg-Schw	5,068	317,964	321,994	639,958	126.2
Hesse	2,966	439,198	642,858	1,282,051	439.0
Oldenburg	2,482	244,018	239,024	483,042	194.3
Brunswick	1,418	242,783	251,555	494,338	348.6
Saxony, Gr. Duchy of	1,397	204,375	212,774	417,149	298.6

States of the Empire	Area English sq miles	Population Dec. 1, 1910			Pop per sq mile 1910
		Male	Female	Total	
Mecklenburg Str	1,131	53,518	52,924	106,442	93.8
Saxe-Meiningen	953	136,614	142,148	278,762	291.5

Lubeck	115	56,911	59,688	116,599	1,013.3
Bremen	99	148,529	150,997	299,526	3,017.6
Alsace Lorraine	5,604	965,625	908,389	1,874,014	333.9
Total	208,780	32,040,166	32,885,827	64,925,993	310.4

The population of the lauds now included in the German Empire (with out Helgoland) was 24,831,396 in 1816 and 31,589,547 in 1837, showing an average annual increase of nearly 1.3 per cent. The following table shows the actual increase in population at various periods, with the annual rate of increase per cent. The small increase in 1867-71 is explained by the intervention of the war with France.

Year	Increase	Annual Rate per cent.	Year	Increase	Annual Rate per cent.
1867 <sup>1</sup>	3,220,083	0.97	1890	2,572,766	1.07
1871	970,171	0.60	1895	2,851,431	1.12
1875	1,668,568	1	1900	4,087,277	1.50
1880	2,501,701	1.14	1905	4,274,311	1.46
1885	1,621,643	0.7	1910	4,284,504	1.38

<sup>1</sup> Since 19.5

The increase of population during 1905-10 was greatest in Bremen, Hamburg, Oldenburg, Lubeck, Prussia, Hesse, Baden and Saxony, and least in Anhalt, Brunswick and Mecklenburg-Schwerin.

The number of households in 1905 was 13,274,591 (in 1900, 12,260,012). Of the total population in 1895, 50.2 per cent., in 1900 47.0 per cent., in 1905, 54.3 per cent., lived in towns of 2,000 inhabitants and above. Of every 100 inhabitants there lived in—

	No of Towns	1895	No of Towns	1900	No of Towns	1905
Large towns <sup>1</sup>	28	18.9	33	16.2	41	19.0
Medium „	150	10.7	194	12.6	208	12.9
Small „	806	13.6	864	13.5	945	13.7
Country „	2,111	12.0	2,289	12.1	2,386	11.8
Other places	—	49.8	73,599	45.6	72,311	42.6

<sup>1</sup> For the official significance of these names see under Principal Towns

With respect to conjugal condition, the following was the distribution in 1910 —

	Males	Females	Total
Unmarried	19,516,340	18,591,604	88,107,944
Married	11,698,028	11,621,685	23,329,713
Widowed	866,676	2,563,872	3,450,548
Divorced and separated	49,122	88,666	187,788

According to the occupation-census of June 12, 1907, the population of Germany was divided as in the table below. Of the total 81,497,100 (exclusive of next-of kin without principal occupation and without income) were actually engaged in the various occupations.

Place	Agriculture, Cattle rearing &c.	Forestry, Hunting, Fishing	Mining, Metal Works, and other Industries	Commerce and Trade	Domestic and other Service (dwelling in household or not)	Professions	Without Profession or Occupation	Total
Prussia	5,789,937	87,574	6,688,881	956,173	184,436	1,037,012	2,067,844	18,850,538
Bavaria	1,677,980	19,968	1,020,308	358,181	136,291	161,871	424,854	3,637,548
Saxony (King dom of)	253,987	7,916	1,238,991	266,642	111,249	132,808	269,384	2,261,161

Total Empire	9,722,472	160,786	11,256,254	3,477,626	1,736,469	738,350	1,494,983	31,497,100

In 1900 the population speaking German numbered 51,883,181, German and a foreign language, 262,918 (including Polish, 169,634, Wendish, 23,779, Masurian, 10,898, French, 9,356, Lithuanian, 9,214, Czech, 8,506, Cassubian, 1,652; Moravian, 1,361), those speaking only a language other than German, 4,221,129 (Polish, 3,085,489; French, 211,679, Masurian, 112,949, Danish, 141,061; Lithuanian, 708,305, Cassubian, 180,213; Wendish,

93,032, Dutch, 80,351 Italian, 65,981, Moravian, 64,882, Czech, 48,018, Frisian, 20,877, English, 20,217, Walloon, 11,841)

On December 1, 1910, Germany contained 1,259,878 subjects of foreign powers, as follows —

Subjects of		Norway	3,334
Belgium	18,455	Switzerland	43,257
Denmark	26,233	Other European countries	10,044
France	19,140		
Great Britain and Ireland	18,319	Total Europe	1 286,048
Italy	104 204	United States	17,572
Luxemburg	14,356	Other States	6,253
Netherlands	144 175		
Austria Hungary	867,159	Total extra European	23,825
Russia and Finland	137,697		
Sweden	9,675	Total foreign subjects	1,259,878

In 1905 the number of foreign subjects was 1,028 560

## II MOVEMENT OF THE POPULATION

The following table shows the movement of the population of the Empire during five years —

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1907	503,964	2,060,973	61,040	179,178	1,178 349	882,624
1908	500,620	2,076,660	61,608	184,112	1,197,098	879,562
1909	494,127	2,038,857	60,079	183,700	1,154,296	884,061
1910	496,996	1 982,836	58,058	179,684	1,103,723	879,113
1911	512 819	1,927,039	56,310	177,056	1,186,608	740,431

The still births in 1911 were 2.9 per cent., and the illegitimate births 9.19 per cent. of the total number of births.

Of the children born in 1911, 992,062 were boys, and 934,970 girls.

In the various German States in 1910 the movement of population was as follows —

States	Marriages	Births			Deaths
		Total	Still born	Illegitimate	
Prussia	821,151	1,225 228	35,881	93,450	782 799

Schwarzburg-Rudol	841	3,844	96	329	1,699

States	Marriages	Births			Deaths
		Total	Still born	Illegitimate	
Waldeck	446	1,491	48	84	911
Reuss, Elder Branch	683	1,893	66	177	1,284
Reuss, Younger Branch	1,218	4,149	140	571	2,696
Schaumburg Lippe	400	1,149	88	50	663
Lippe	1,261	4,529	146	204	2,400
Lübeck	868	2,769	63	840	1,826
Bremen	2,600	7,932	290	722	4,663
Hamburg	9,007	28,414	800	3,373	15,840
Alsace-Lorraine	18,071	46,443	1,000	3,515	24,099
Empire	512,819	1,927,089	56,810	179,584	1,185,608

The following table shows the annual number of German emigrants for five years —

Year	Total	Destination					
		European Countries	United States	Brazil	Other American Countries	Africa	Asia
1907	31,696	1581	80,431	167	740	87	—
1908	19,938	1671	17,951	36	1,940	38	1
1909	24,921	1041	19,880	367	4,256	26	—
1910	23,581	771	22,713	353	2,184	16	—
1911	22,090	981	18,960	368	3,067	18	—

<sup>1</sup> All to Great Britain

From the various German States in 1911 the number of emigrants was as follows —

States	Number	States	Number
Prussia	11,835	Anhalt	46
Bavaria	3,171	Schwarzburg-Rudol.	8
Saxony	1,367	Schwarzburg-Rudol.	21
Württemberg	920	Waldeck	8
Baden	749	Reuss, Elder Branch	38

Mecklenburg-Sch.	111	Schaumburg-Lippe	10
Grand Duchy of Saxony	100	Lippe	41
Mecklenburg-Stir.	8	Lübeck	38
Oldenburg	335	Bremen	614
Brunswick	87	Hamburg	805
Saxe-Meiningen	64	Alsace-Lorraine	473
Saxe-Altenburg	29	Not stated	2,462
Saxe-Coburg-Gotha	28		22,090

### III. PRINCIPAL TOWNS

German towns are officially distinguished as large towns (with 100,000 inhabitants and upwards), medium towns (20,000-100,000 inhabitants), small towns (5,000-20,000 inhabitants), and country towns (2,000-5,000 inhabitants). In 1905, only 1 town had over 1,000,000 inhabitants, 10 others over 250,000, 30 others over 100,000, 43 between 50,000 and 100,000, and 137 between 20,000 and 50,000. According to the results of the census of December 1, 1910, the population of the principal towns at that date was —

Town	State	Pop (1910)	Town	State	Pop (1910)
Berlin	Prussia	2,071,267	Mainz	Hesse	110,634
Hamburg	Hamburg	931,035	Hamborn <sup>1</sup>	Prussia	101,708

<sup>1</sup> Incorporated April 1 1911

### Religion

The Constitution provides for entire liberty of conscience and for complete social equality among all religious confessions. The relation between Church and State varies in different parts of the Empire. The Jesuit order is interdicted in all parts of Germany, and all convents and religious orders, except those engaged in nursing the sick and purely contemplative orders, have been suppressed. There are 5 Roman Catholic archbishoprics, 14 suffragan bishoprics, and 6 bishoprics immediately subject to Rome, there are 3 apostolic vicariates. The 'Old Catholics' have a bishop at Bonn.

The following are the results of three religious censuses —

Creed	1900	Per Ct. of Pop	1905	Per Ct. of Pop	1910	Per Ct. of Pop
Protestants	85,231,104	62.5	37,646,852	62.1	39,991,421	61.6
Catholics	20,327,913	36.1	22,109,644	36.5	23,321,453	36.7
Other Christians	203,793	0.4	259,717	0.4	283,945	0.4
Jews	586,833	1.0	607,862	1.0	615,021	1.0
Others and unclassified	17,585	0.03	17,203	0.03	214,152	0.3

Roman Catholics in 1905 were in the majority in only three of the German states, Alsace Lorraine, Bavaria, Baden, and formed more than 20 per cent of the population in only four others, Oldenburg, Wurttemberg, Hesse, Prussia.

### Instruction

Education is general and compulsory throughout Germany. The laws of Prussia, which provide for the establishment of elementary schools (*Volksschulen*), supported from the local rates, in every town and village, and compel all parents to send their children to these or other schools, have been adopted, with slight modifications, in all the States of the Empire. The school age is from six to fourteen.

The following table shows for the different German States the number of elementary public schools, the teachers employed in them and children attending them, according to a school census taken in 1911 —

States	Schools	Teachers		Pupils		
		Males	Females	Males	Females	Total
Prussia	28,684	91,648	24,000	8,298,877	5,279,268	6,573,146
Bavaria	7,566	19,531	4,851	621,652	620,014	1,041,676
Saxony	4,770	18,384	710	578,571	562,582	771,108
Wurttemberg	2,250	8,219	784	170,239	180,701	251,940

Brünen	64	806	260	17 842	17,942	35,784
Hamburg	222	2 182	1,889	57,759	57 848	115 007
Alsace Lorraine	2,074	8 123	2 686	183 979	118 816	231 796
Empire	41 557	148 217	89 268	5,137 446	5 162,608	10,800,049

There were also in 1911, 480 private schools with 11,894 boys and 14,257 girls who received instruction similar to that given in the Public Elementary Schools.

The system of secondary education is also practically homogeneous. Above the elementary schools rank the middle schools of the towns, the *Bürger Schulen* and *Höhere Bürgerschulen*, which fit their pupils for business life. Children of the working classes may continue their education at the *Fortbildungs Schulen* or continuation schools, which are open in the evening or other convenient time. The *Gymnasien* are the most fully developed classical schools, preparing pupils in a nine years' course for the universities and the learned professions. The *Progymnasien* differ from these only in not having the highest classes. In the *Realgymnasien*, Latin, but not Greek, is taught, and what are usually termed 'modern subjects' have more time devoted to them. *Realprogymnasien* have a similar course, but have no class corresponding to the highest class in the preceding. In the *Oberrealschulen* and *Realschulen* Latin is wholly displaced in favour of modern languages. The teachers in German schools are required to hold a Government certificate, and to have undergone a year's probation. Higher schools for girls are called *Höhere Töchterschulen*. Besides these there are numerous *Gewerbeschulen* or technical schools, *Polytechnics*, normal schools, seminaries, and the universities.

In 1911 the number of secondary schools was as follows — For boys, *Gymnasien*, 524 with 9,769 teachers and 160,287 pupils, *Realgymnasien*, 243, with 3,708 teachers and 70,375 pupils, *Oberrealschulen*, 167, with 2,473 teachers and 75,832 pupils, *Progymnasien*, 81, with 570 teachers and 9,509 pupils, *Realschulen*, 411, with 4,265 teachers and 59,968 pupils. For girls, *Gymnasien*, 39, with 1,039 teachers and 22,137 pupils, High schools, 789, with 11,859 teachers and 212,834 pupils.

There are 11 fully-equipped Technical High Schools,<sup>1</sup> with the power of granting degrees. They are all aided by the States to which they respectively belong. The statistics for the winter half year 1911-12 are as follows —

Schools	Teaching Staff	Students	Schools	Teaching Staff	Students
Berlin	168	2,828	Aachen	61	936
Münich	70	2 659	Brunswick	40	496
Darmstadt	81	1 780	Danzig	48	1,308
Karlsruhe	83	1,849	Breslau	20	226
Hannover	87	1,708			
Dresden	95	1 485	Total	772	14,187
Stuttgart	79	1 125			

<sup>1</sup> The last, at Breslau, was opened on Nov. 29th, 1910.

Of the students, 11 045 were fully qualified students, 1 910 were women.

For instruction in agriculture there are Agricultural High Schools at Berlin (805 students in 1911-12), Hohenheim (216) Bonn Poppelsdorf (511), and Weihenstephan near München (226), at 8 of the universities there are Agricultural Institutes, at Weihenstephan (Bavaria) an agricultural and brewing academy, in Prussia 16 secondary agricultural schools, and in other German States 6, in Prussia 26 farming schools, in other States 19, in Prussia 118 lower agricultural winter schools, and in other States 77, besides many schools for special agricultural instruction (in Prussia alone 1 320). Other technical schools are 5 Veterinary High Schools with 1 329 students, 15 schools of mining, 15 schools of architecture and building, 5 academies of forestry 27 schools of art and art industry (*Kunst and Kunstgewerbe Schulen*), 429 commercial schools (including 5 commercial universities) about 100 schools (including universities) for textile manufactures 12 for special metal industries 12 for wood working, 4 for ceramic industries, 11 for naval architecture and engineering, 8 for ships engineers 19 for navigation, and 11 public music-schools. There are also numerous smaller as well as private music and other schools, and a large number of artisans or trade schools. There is a naval academy and school at Kiel, and military academies at Berlin and Munich, besides 47 schools of navigation, 9 military schools, and 9 cadet institutions.

In 1911 the proportion of illiterates among the recruits was 01 per cent.

There are 21 universities in the German Empire, besides the Lyceum Hosianum at Braunsberg (13 teachers), which has only faculties of theology (Roman Catholic) and philosophy, the academy at Posen, and the Colonial Institute at Hamburg. Negotiations are in progress, and are nearly complete, for the establishment of a University at Frankfurt.

The following table gives the number of teachers and students for the winter half year 1911-12

Universities	Professors and Teachers	Students				Total
		Theology	Jurisprudence &c	Medicine	Philosophy	
Berlin	434	415	2 216	1 872	4 637	9 140
Bonn	197	447	842	660	2,090	3 987
Breslau	193	334	642	594	1 681	2 641
Erlangen	104	380	106	436	340	1,402
Freiburg	187	282	608	882	844	2,406
Gießen	94	82	144	447	508	1,272
Göttingen	157	125	304	801	1 611	2,399
Greifswald	101	102	187	270	35	1,097
Halle	176	378	530	370	1 502	2,777
Heidelberg	173	1 4	389	687	1 081	2,291
Jena	116	70	802	266	1 010	1,768
Kiel	128	60	828	617	719	1 816
Königsberg	149	92	380	432	701	1,566
Leipzig	244	291	672	1 091	1 816	5 170
Munich	192	161	316	298	1,065	1 927
Münster	266	171	1 091	2,387	2,048	6 797
Rastatt	80	866	418	160	1 169	2 072
Rostock	70	86	98	355	265	652
Strasbourg	177	234	426	468	1 008	2,138
Tübingen	118	462	464	552	574	1,862
Würzburg	109	701	270	741	846	1,466
	3,810	4,576	11,366	12,844	26,641	50,428

The matriculated students included 2,786 women. In addition there were 10,129 non-matriculated students (8,080 men and 2,049 women). The total number of students was thus 64,503.

In four universities, namely, Freiburg, München, Münster, and Würzburg, the faculties of theology are Roman Catholic, four are mixed, both Protestant and Roman Catholic—Bonn, Breslau, Strassburg, and Tübingen, and the remaining thirteen are Protestant.

### Justice and Crime

A uniform system of law courts exists throughout the Empire, though, with the exception of the Reichsgericht, all courts are directly subject to the Government of the special State in which they exercise jurisdiction, and not to the Imperial Government. The appointment of the judges is also a State and not an Imperial function. The Empire enjoys uniform codes of commercial and criminal law.

The lowest courts of first instance are the *Amtsgerichte*, each with one or more judges, competent to try petty civil and criminal cases. The *Landgerichte* exercise a revising jurisdiction over the *Amtsgerichte*, and also a more extensive original jurisdiction in both civil and criminal cases, divorce cases, &c. In the criminal chamber five judges sit, and a majority of four votes is required for a conviction. But in the courts with appellate jurisdiction only three judges sit. Jury courts (*Schwurgerichte*) are also held periodically, in which three judges preside, the jury are twelve in number. The first court of second instance is the *Oberlandesgericht*. In its criminal senate, which also has an original jurisdiction in serious cases, the number of the judges is seven. There are twenty-nine such courts in the Empire. The total number of judges on the bench in all the courts above mentioned is 9,974. In Bavaria alone there is an *Oberster Landesgericht* with 22 judges, with a revising jurisdiction over the Bavarian *Oberlandesgerichte*. The supreme court is the *Reichsgericht*, which sits at Leipzig. The judges, 100 in number, are appointed by the Emperor on the advice of the Bundesrat. The court exercises an appellate jurisdiction over all inferior courts, and also an original jurisdiction in cases of treason. It has 5 criminal and 7 civil senates.

The following table shows the number of criminal cases tried before the courts of first instance, with the number and sex of convicted persons, and the number of the latter per 10,000 of the civil population over twelve years of age —

Year	Cases tried		Persons convicted		Total	Conviction per 10,000 inhabitants
	Amtsger	Landger	Males	Females		
1906	1,308,927	88,337	451,187	82,630	538,767	125.2
1907	1,291,802	81,141	449,227	81,496	530,723	122.2
1908	1,327,831	86,734	462,745	85,665	548,410	124.0
1909	1,387,239	85,457	458,304	85,879	544,183	120.8
1910	1,387,242	87,369	459,492	86,926	546,418	119.1

Of the persons convicted in 1906, 55,277; 1907, 54,118; 1908, 54,693; 1909, 49,697; 1910, 51,325 were under eighteen years of age, and in 1906, 284,448; 1907, 226,257; 1908, 246,091; 1909, 249,787; 1910, 247,490 had been previously convicted. In 1911, 552,556 persons were convicted of whom 50,838 were juveniles.

### Pauperism.

The general principles as to poor-relief in all the German States, except Bavaria and Alsace Lorraine, are laid down by the Imperial law of June 8, 1874, amended by the law of March 12, 1894. The territory under this law is divided into local unions (*Ortsarmenverbände*) and provincial unions (*Landarmenverbände*). Usually a local union is a commune (*Gemeinde*), while a provincial union consists of a large administrative division such as a circle (*Kreis*), a province, or a whole State. For the purposes of poor relief a settlement is acquired by two years' continuous residence (after the age of 18), by marriage or by descent. A German in distress must be relieved by the local union in which he becomes destitute, and the cost must be refunded by the local union in which he has a settlement, or by the appropriate provincial union. In communes poor relief forms part of the ordinary local government business, in towns the actual administration is carried out by a special committee under the presidency of the burgher master. Poor rates are usually not levied. In most large towns the Elberfeld system of unpaid district visitors is in force. Statistics of pauperism are not published regularly, the last issue related to the year 1885.

### Compulsory Insurance

As preventive measures under this head must be mentioned the imperial laws introducing the compulsory insurance of workmen against sickness, insurance against accidents by employers, and the insurance of workmen against old age and infirmity.

Under an Imperial law of 1883 and amending Acts (continued in 1912) workmen must be insured against sickness, and must themselves pay two-thirds of the contributions, their employers paying one-third. For accident insurance under an Act of 1884 and amending Acts, the contributions are paid entirely by the employers, and they, for mutual protection, have united into associations according to the nature of the industries in which they are engaged. The working of these insurance associations is controlled by Government. For invalidity and old age insurances under an Act of 1889 amended in 1899, the contributions are paid half by the workmen and half by their employers, while towards each pension the Government grants an annual subsidy of 50 shillings. The employers are responsible both for their own and the workmen's contributions, but the latter may be deducted from wages paid subsequently.

Contributions are paid by the purchase of stamps from the Post Office: these are affixed by the contributing person to cards on which there are spaces for stamps for 52 weeks. When the contributions are complete, the card is handed in to a specified office and a certificate given in return.

The old age pension is given on the completion of the 70th year of the workman's age, contributions having been paid for 1,200 weeks (equal to about 24 years); a margin of 8 weeks being allowed each year. The amount of wages per annum of each class, the amount of weekly contributions of workman and employer for each class, and the pension for each are in shillings or pence respectively —

	Class I	Class II	Class III	Class IV	Class V
Yearly wages	Up to 250	250—550	550—650	650—1150	1150—2000
Weekly contrib.	1 $\frac{1}{2}$ pence	2 $\frac{1}{2}$	3 $\frac{1}{2}$	5 $\frac{1}{2}$	4 $\frac{1}{2}$
Yearly pension	110	140	170	200	250

Adding the State subsidy of 50 shillings to the pension, we find the total annual sum paid to the pensioner.

The amount expended in compensation (in various forms) in 1910 under the sick insurance law (Act of 1883 and subsequent Acts) was 19,875,000*l.*, under the accident insurance law (Act of 1884 and subsequent Acts), 8,006,000*l.*, under the invalidity and old age pensions law (Acts of 1889 and 1899), 12,486,000*l.*, total, 40,367,000*l.*

Of the various insurance schemes in operation for the benefit of working men that for insurance against sickness, according to the statistics published in March, 1912, had in 1910 (excepting the 'Knappschaftskassen' (Societies for Miners) with 88,506 members) 93 188 societies with altogether 18,000,875 members.

In the three years 1908-10 the operations showed —

	1908	1909	1910
Members	12,824 094	12,519 785	13 000 875
Cases of Sickness	5 206,148	5 065 793	5 197 080
Days of Sickness	108 894 200	105 838 41	104,708 104
Ordinary revenue £	10 664 567	16 565 206	17 880,858
Ordinary expenditure £	16 252,724	10 723,187	17,527 356

To the revenue each member contributed in 1910 about 28s and bore a share of the expenditure amounting to about 26s 4d. The cost of sickness in 1910 amounted to 16,001 041½ of which each member's share amounted to about 24s 5d.

### Finance

The common expenditure of the Empire is defrayed from the revenues arising from customs certain branches of the excise, and the profits of the posts, telegraphs, and State railways. The individual States are assessed to make up any deficit in proportion to population.

The following tables exhibit the revenue and expenditure (in pounds sterling) for five years beginning April 1, the figures for the last 2 years being budget estimates (20 marks = 1£) —

Years beginning 1 April	REVENUE			EXPENDITURE		
	Ordinary	Extraord. (loans &c.)	Total	Ordinary (recurring and non recurring)	Extraord. (military &c.)	Total
	£	£	£	£	£	£
1909	131 618 776½	55,743 24½	187 362 020	181 195 780	82 120 445	263,316 225
1910	140 095 290	7 075 085	147 170 375	188,879 420	12 883 620	201 763 040
1911	135 990 716	10 545 790	146 536 506	185 830 71	10 645 790	196 476 505
1912	137 683 100	11 711 655	149 394 755	137 683 100	1 723,650	149,406 755
1913	154,486,140	4 831 796	159,317,936	152 485 140	6 106 796	158,591,936

The amounts raised by customs, excise, and stamps were as follows (in thousands of pounds sterling) —

	1903	1909	1910	1911	1912
Customs and excise	57,800	58 193	62 148	63,276	63,328
Stamps	5,006	9 880	9,927	10,859	12 977
Total	62 806	68,073	72 075	74 137	76,305

The sums paid in lieu of customs and excise by the parts of the Empire not included in the Zollgebiet are included in the above figures. The share of this direct Imperial taxation is about 12s 4d. per head.

The chief branches of Imperial expenditure, ordinary and extraordinary in 5 years (estimates for the last two years) have been in pounds sterling:—

Years beginning 1 April	Army	Navy	Assignments <sup>1</sup>	Debt
	£	£	£	£
1908	41,519,535	17,872,420	9,772,115	8,087,000
1909	43,431,395	20,996,605	6,025,475	8,658,760
1910	40,409,030	22,108,815	9,000,000	11,248,810
1911	40,814,985	22,901,685	8,174,635	14,287,400
1912	47,263,435	23,521,835	9,753,355	12,001,630

<sup>1</sup> These assignments (*Ueberweisungen*) are repayments to the various States of the surplus of the revenue from spirit duties.

The following table gives the estimated total revenue and expenditure for the financial year ending March 31, 1913 —

Expenditure	Marks	Revenue	Marks
1 Ordinary —		1 Ordinary —	
Reichstag	143 200	Customs and Excise	1 618 994 400
Chancery	314,500	Posts and Telegraph	791 881 000
Foreign Office	15 721 490	Printing office	11 788,000
Home Office	3 110 100	Railways	141 740 000
Colonial Office	—,521 100	Banks	16 985,000
Imperial Army	688,943 600	Various	2,142,000
" Navy	181 108 200	Income of the Treasury	104,682 700
Ministry of Justice	2 858 100		
Imperial Treasury	88,345 600		
Debt of Empire	284 403 600		
Audit Office	1 805 00		
Pension Fund	148 411 800		
Posts and Telegraphs	667 679,00		
Printing Office	9 561 800		
Railways	108 587 000		
Railway Office	454 400		
Expenditure of the Treasury	4 968 400		
Total permanent	—,285 178 600		
2 Total transitory	406 488,500		
Total Ordinary	2 751 062,000	Total ordinary	1 751 662 000
3 Extraordinary	184 475 100	Total Extraordinary	184,475 100
Grand total	2,886 185,100 (144 905,7551)	Grand total	2,886 185,100 (144,806 7551)

The Federal contributions (*Matricular Beiträge*) are assessed according to population, at a rate per head fixed annually in the Imperial budget. For 1913 they were estimated as follows —

	£		£		£
Prussia	7,329 760	Brunswick	90 200	Reuss Younger	
Bavaria	1 167,785	Saxe-Meiningen	50 800	Branch	27 875
Saxony	674,790	Saxe-Altenburg	89 440	Schaumburg Lippe	8,515
Wurttemberg	428,815	Saxe-Coburg-Gotha	46 930	Lippe	27 540
Baden	391 060	Anhalt	60,420	Lübeck	11,280
Hesse	223,965	Schwarzburg Sou		Bremen	54,665
Mecklenburg		derhausen	18 410	Hamburg	185 190
Schwerin	115,776	Schwarzburg		Alsace-Lorraine	842,115
Saxe-Weimar	76,125	Badenstadt	18 375		
Mecklenburg-Strelitz	78,425	Waldeck	11,369	Total	11,787,605
Oldenburg	65,155	Reuss, Elder Branch	18,280		

In October, 1912, the total funded debt amounted to 4,523,656,790 marks, of which 690,474,500 marks bears interest at 4 per cent., 1,982,202,200 marks at 3½ per cent., 1,660,889,290 marks at 3 per cent., the Treasury

bonds amounted to 800,000,000 at 4 per cent. There is a debt of 598,000,000 marks free of interest, and the 'Reichs Kassenscheine,' or Imperial Treasury bills, amount to 120,000,000 marks

As a set-off against the debt of the Empire there exists a variety of invested funds. The war treasure fund, 120,000,000 marks, is not invested, but preserved in gold at Spandau

## Defence

### I FRONTIER

Germany has a total frontier length of 4,570 miles. On the north it is bounded by the North Sea (293 miles), Denmark (47 miles), and the Baltic (927), on the south well defined mountain ranges and the Lake of Constance separate it from Austria (1,043) and Switzerland (256 miles). On the east Germany is bounded by Russia for 848 miles, on the west by France (242 miles), Luxemburg (111 miles), Belgium (70 miles), and Holland (377 miles).

Some of the coast defences and batteries have been placed under the jurisdiction of the admiralty. The empire is at present divided into ten fortress districts (Festungs Inspektionen), each including a certain area with fortified places. The following is a list of these districts, and the names of the fortresses in each: the fortified places of the first class, serving as camps, being distinguished by italics, while those specially designed for railway protection or obstruction are marked by asterisks (\*) and coast fortresses by a dagger (†) —

1 KÖNIGSBERG Königsberg Danzig,† Pillau,† Memel,† Boyen 2 POSEN Posen, Glogau, \* Nasse, Glatz. 3 BERLIN Spandau, Magdeburg Torgau, \* Küstrin 4 MAINZ Mainz, Ulm, Rastatt 5 METZ Metz, Diedenhofen, \* Bitsch \* 6 COLOGNE (Köln) Cologne, Koblenz, Wesel \* Saarbrücken 7 KIEL Kiel, Friedrichsort,† Cuxhaven,† Geestemünde,† Wilhelmshaven,† Swinemünde† 8 THORN Thorn, Graudenz, Vistula Passages (Weichselübergänge), Dirschau 9 STRASBURG Strassburg New Breisach 10 MUNICH (München) Ingolstadt Garmersheim \*

These fortresses are all connected with each other by means of underground telegraphs, while strategical railway lines lead from the principal military centres towards the frontiers

### II ARMY

Military service in Germany is compulsory and universal with the usual exemptions. Liability (Wehrpflicht) commences at the age of 17, and ends at 45 but actual service (Heerpflicht) begins at 20. The term of service in the First Line, or active army is 7 years, 2 in the ranks, and 5 in the reserve, except in the cavalry and horse artillery, in which the periods are 3 and 4. During the period of reserve service the soldier is regarded as belonging to his corps, and is obliged to join it twice in the 5 (or 4) years for training. The duration of training is limited by law to 8 weeks: it is usually 6 weeks, or perhaps only a month.

The next stage is 5 years (cavalry and horse artillery 8 years) in the first 'ban' of the Landwehr, or Second Line Army. The Landwehr men are twice called out for exercise during this period, for 8 to 14 days on each occasion. Landwehr cavalry, however, are not called out for training in time of peace. After 5 years in the first 'ban' of the Landwehr, the soldier passes to the second 'ban,' and remains in it until he has completed his 39th year, i.e. for 8 to 7 years (8 to 9 in the case of the cavalry and horse artillery). There is no training during this period.

Finally all soldiers are passed into the Landsturm (second 'ban') in which

they remain until they have reached the age of 45, that is for 6 years. The *Landsturm* is a purely home defence force. The first 'ban' consists of all those between the ages of 17 and 39 who for one reason or another have received no military training. The second 'ban' contains all the men, whether trained or untrained, between 39 and 45.

Well educated young men are admitted into the German army as volunteers, serving for one year only, but paying all their expenses. These supply almost all the Reserve and *Landwehr* officers.

There are now about 1,100 reservists per battalion available, a considerable proportion of whom are taken to form *Reserve Troops* on mobilisation. There are therefore a large number of Reserve Troops intermediate between the First Line and the *Landwehr*. The balance of the reservists will join the depots, and will be available for making good the losses in the field. The depot units would be augmented by the annual contingent of recruits, and if necessary by other young men whose 'Wehrpflicht' has commenced.

The Ersatz (lit. compensatory) reserve is composed of the young men of 20 who are fit for service, but are in excess of the numbers required for the annual contingent of recruits. They are liable to and a certain number receive, 3 trainings of 10, 6 and 4 weeks, respectively. The primary object of this reserve is to supply the waste of war for which purpose the men would be called to the depots on mobilisation, and their training completed. But a certain proportion of the ordinary (fully trained) reservists will also be available for this purpose, and the depot or Ersatz battalions will apparently be formed at first of about one third fully trained and two thirds partially trained, reservists. On the other hand a large number of Ersatz reservists are now trained in special (non combatant) duties though they can of course be called to the depots if required.

Two regiments of infantry (6 battalions) form a brigade, two brigades a division, and two divisions an army corps. Ten divisions, however, have each 3 brigades. The intended employment of the reserve troops in war has not been divulged, but it seems possible that most of the 2 brigade divisions will be augmented by a reserve brigade, and that all army corps will take the field with six brigades (36 battalions), the artillery being proportionately increased by reserve regiments. To each infantry division is attached in war an artillery brigade (12 batteries) and a regiment of cavalry (4 squadrons). To each army corps 4 batteries of howitzers, also a battalion of rifles and a pioneer (engineer) battalion. All field and horse artillery batteries have 6 guns. The war strength of a complete division, of two brigades, without reserve units, is about 14,000 combatants, and of an army corps of two divisions, about 30,000. The strength of a 3 brigade division would be about 21,000, and of an army corps of 6 brigades about 43,000 combatants. There are altogether 23 army corps in the army of the German Empire.

There is only one permanent cavalry division, that of the guard, but in war at least eight divisions would be formed from the line regiments. The normal strength of a cavalry division is 3 brigades of 2 regiments each, with 2 (or possibly 3) batteries of horse artillery. In all 24 squadrons and 12 (or 18) guns.

The kingdom of Prussia, together with Baden and Hesse, is divided into 16 military districts, each of which furnishes a complete army corps, and 2 (or 3) *Landwehr* divisions, as well as its proportion of cavalry, garrison artillery, &c. There is also the Prussian Guard Corps, drawn from the whole kingdom. Saxony furnishes 2 army corps (XIIth and XIXth), Württemberg one army corps (XIIIth), the Reichsland (Alsace and

Lorraine) 2 army corps (XVth and XVIth), and the kingdom of Bavaria 3 army corps (1st, 2nd, and 3rd Bavarian). The strength of the field army (25 army corps and independent cavalry) together with the reserve troops, amounts to about 1,220,000 combatants. To this must be added the mobile Landwehr, the total strength of which amounts to about 600,000. The total of the mobile forces of the German Empire is therefore about 1,820,000. Behind this there are, according to some computations, about 1,500,000 men, wholly or partially trained, to supply the waste of war. These figures do not include garrison units, or any part of the Landsturm.

The constitution of 1871 provides that the whole of the land forces of the Empire shall form a united army in war and peace, under the orders of the Emperor. All German troops are bound by the constitution to obey unconditionally the orders of the Emperor, and accordingly take the oath of fidelity, but this oath is not administered to the Bavarian troops in time of peace. The Prussian War Office performs the functions of an Imperial Ministry of War, but Bavaria, Saxony, and Württemberg have also War Ministers of their own. The king of Bavaria also retains by a special convention the general administration of the Bavarian troops. The military budgets of Saxony and Württemberg are prepared in Berlin and Bavaria is bound to vote military supplies in a fixed proportion to the other budgets.

The German infantry are armed with the Mauser magazine rifle, model 1898, calibre 811". The cavalry have the Mauser magazine carbine. All classes of cavalry carry the lance. The field and horse artillery are armed with a Krupp gun firing a 15 lb shell, of 1896, the carriage is of more modern date. The light field howitzer is a 30 pr the heavy howitzer is a 94 pr.

The military expenditure of the German Empire, entered in the budget for 1912-13, amounted to 34,447,230*l* ordinary, and 189,933*l* extraordinary, total, 34,637,163*l*. This is exclusive of expenditure on colonial troops.

The following table gives in detail the peace establishment of the German Army in 1912 —

	Officers	Non-commissioned Officers and Men	Horses
Infantry, 217 regiments	18,232	892,748	2,506
Rifles (Jäger) 18 battalions	406	11,096	—
Machine-gun sections 13	52	1,161	702
District Headquarters, 80	927	6,885	—
Non-combatants	2,966	661	—
<b>Total Infantry</b>	<b>17,588</b>	<b>411,961</b>	<b>8,210</b>
Cavalry 108 regiments	2,588	70,798	69,934
non-combatants	871	906	—
Field Artillery 100 regiments	8,368	69,764	42,738
non-combatants	1,163	214	—
Foot Artillery 28 regiments	1,173	37,847	3,366
non-combatants	227	40	—
Pioneers (Engineers), 23 battalions	760	19,575	325
non-combatants	161	65	—
Railway, telegraph and balloon units (including non-combatants)	675	10,418	1,397
Trains, 25 battalions (ditto)	547	7,961	5,726
Small miscellaneous corps	784	2,880	—
Non-regimental officers &c.	8,566	1,613	—
<b>Total</b>	<b>52,891</b>	<b>622,758</b>	<b>124,490</b>

With regard to overseas garrisons, Germany maintains about 2,700 men at Kiauchau, these are marines and sailors, but native troops are being organised. There is also a colonial force with a special colonial staff, these troops are not included in the army, and they serve under the direct orders of the German Chancellor, their total establishment is about 340 officers, 2,250 German non-commissioned officers and men, and 3,880 native soldiers. The officers and non-commissioned officers are mostly seconded from the home army.

The normal strength in South west Africa is about 150 officers and 2,000 other ranks, all German.

There are also about 600 native police, with white officers, mostly in the minor colonies.

### III NAVY

Estimates — 1912, 22,870,000/ 1911, 22,801,700/ , 1910, 22,127,740/ , 1909, 20,426,780/ 1908, 16,966 186/ 1907, 13,628 247/

After the war of 1870-71 the German navy was re-organised, and a *Flotten-Gründungsplan* laid down. By a cabinet order of March 30, 1889 the administration was wholly re-organised. The chief command was separated from the administration and vested in a naval officer, while the administration was transferred to the *Reichsmarineminister* having at its head under the chancellor the naval secretary of state. The first of these officials deals generally with the movements of the fleet and with questions relating to coast defence training, the efficiency of the *personnel* &c while the imperial arsenals and dockyards matters more especially concerning the *matériel*, clothing, victualling, &c, fall to the department of the secretary of state. The ships of the German navy are divided between the Baltic and North Sea stations. The chief naval establishments are at Kiel on the Baltic and Wilhelmshaven on the North Sea, and the Kaiser Wilhelm Canal, across the Schleswig Holstein neck from Kiel to the Elbe, which was opened in the month of June, 1895, facilitates the transference of forces from one base to the other. Danzig is now an effective base also, with a dockyard. In 1906 Cuxhaven and Sonderburg were also selected as naval bases.

The following is a statement of the strength of the German fleet —

Class	Effective in middle of		
	1912	1913	1914
Dreadnoughts	13	17	21
Pre-Dreadnought battleships	20	20	20
Old and coast service battleships	2+7	—	—
Armoured cruisers	9	9	9
Protected cruisers	44	20	28
Destroyers	128	141	153
Torpedo boats (old)	47	47	47
Submarines	16	26 or more	4

Note.—German ships are usually completed for sea about June each year. Certain ships which have no fighting value are omitted.

Germany subsidises, as auxiliary merchant cruisers, seven vessels with a nominal speed of from 18 to 24 knots or more, viz. the *Kronprinzessin Cecilie*, *Kronprinz Wilhelm*, *Kaiser Wilhelm der Grosse*, *Kaiser Wilhelm II*, *George Washington*, *Prinz F. Wilhelm*, and *Berlin*. There are also sub-ventured to some extent the *Amerika* and *Kaiserin Augusta Victoria* (28,000 tons) of about 17 knots speed.

The German navy is manned by the obligatory service of the maritime population (*seemannische Bevölkerung*)—sailors, fishermen, ships carpenters, and others, and also of the semi-maritime population—that is, of those who have smaller experience of the sea. All these are freed on this account from service in the army. Great inducements are held out for able seamen to volunteer in the navy and the number of these in recent years has been very large. The total seafaring population of Germany is estimated at 80,000, of whom 48,000 are serving in the merchant navy at home and about 6,000 in foreign navies. The naval personnel is 38,500 plus a reserve of about 110,000 men. It is extremely efficient, especially in torpedo service. Practically the entire fleet is always in commission. Very elaborate precautions are taken to keep the personnel free from certain diseases which impair efficiency.

## Production and Industry

### I AGRICULTURE.

In Germany (except the Mecklenburgs) there is complete free trade in land. Generally speaking, small estates and peasant proprietorship prevail in the West and South German States, while large estates prevail in the north east.

According to the latest returns (1893 and 1900), 91 per cent of the area of Germany is productive and 9 per cent unproductive. The subdivision of

the soil, according to the latest official returns (1900), was as follows (in acres) — Arable land, vineyards, and other cultivated lands, 65,199,530, grass, meadows, permanent pasture, 21,397,800, woods and forests, 84,569,800, all other 12,333,890

On June 12, 1907, the total number of agricultural enclosures (including arable land meadows, cultivated pastures, orchards, and vineyards) each cultivated by one household was as follows —

Under 2 1/2 acres	2 1/2 to 24 1/2 acres	24 1/2 to 247 acres	247 acres & over	Total
2,73,055	2,908,329	674,982	28,566	5,736,032

On June 12, 1907 these farms employed 15,169,549 persons, in the year ending June 12, 1907 the greatest number employed at the same time was 19,732,424.

The areas under the principal crops in acres were as follows —

	1909	1910	1911	1912
Wheat	4,528,460	4,401,010	4,935,495	4,814,027
Rye	15,326,830	15,465,830	15,171,950	15,670,990
Barley (Summer)	4,115,890	3,926,130	3,963,010	3,973,980
Oats	10,774,920	10,723,020	10,818,962	10,966,335
Potatoes	8,809,330	8,240,210	8,308,705	9,353,875
Hay	14,903,840	14,902,640	14,827,895	14,806,530
Vines	286,840	281,380	275,077	272,285
Tobacco	40,460	38,550	38,510	39,440

Total 1907	4 345 047	20 190 544	7 708 710	22 146 53	8 688 971
Total, 1912	4 516 207	20 1 3 788	5 787 948	21 886 078	8 888 971

## II FORESTRY

Forestry in Germany is an industry of great importance, conducted under the care of the State on scientific methods. The forest area of the Empire is put at 84 569 800 acres, of which crown forests occupy 675,540 acres. State and partly State forests 11,015 910 acres, communal forests, 5,577 470 acres, private forests, 16,130 000 acres, and forests belonging to various associations or foundations 1,277,560 acres. Of the whole forest area about one third (11,225,660 acres) is under foliage trees, oak, birch, ash, beech, &c., and two thirds (23 344 240 acres) bear pine, larch, red and white fir, &c. The forests yield, according to the latest report, 26,183,410 cubic yards of timber and 23,348,640 of firewood.

## III MINING

The great bulk of the minerals raised in Germany is produced in Prussia, where the chief mining districts are Westphalia, Rhenish Prussia, and Silesia, for coal and iron, the Harz for silver and copper, and Silesia for zinc. Saxony has coal, iron, and silver mines, Lorraine rich coal and iron ore fields, and the Grand Duchy of Luxembourg rich iron ore fields.

The quantities of the principal minerals raised are as follows —

	1907	1908	1909	1910	1911
	Metric Tons	Metric Tons	Metric Tons	Metric Tons	Metric Tons
Coal	143,185,691	147,671,149	148,788,050	152,827,777	160,747,580
Lignite	62,546,671	67,615,200	69 657 606	69,547,289	73,760,867
Iron ore	27,697,128	24 278,151	25,504 464	28,709,700	29,879,361
Zinc ore	698,425	706,441	722,566	718,316	699,970
Lead ore	147,272	156,861	159,853	146,497	140,154
Copper ore	771,227	727,834	798,618	925,957	868,600
Rock Salt	1,285,138	1,331,984	1,869,806	1,424 063	1,438,492
Potassic salt	5,749,368	6,099 022	7,042,084	8,311,671	9,606 876
Other products	534,298	552,351	528,664	554,049	561,428

The total value of the minerals raised in Germany and Luxembourg was in 1908, 1,871 million marks, in 1909, 1,980 million marks, in 1910, 2,009 million marks, in 1911, 2,086 million marks.

The following table shows particulars of the production of the foundries in Germany and Luxemburg in 1910 and 1911 (provisional) —

	Quantity in metric tons 1910	Value in sterling 1910	Quantity in metric tons 1911	Value in sterling 1911
		£		£
Pig iron	14,793,604	40,142,650	15,280,527	42,525,550
Zinc	221,308	4,969,950	235,778	5,717,950
Lead	159,851	2,067,000	161,287	2,207,600
Copper	34,926	2,119,300	37,452	2,200,700
Silver	420	1,532,750	440	1,606,650
Gold	5	645,950	5	693,750
Tin	11,394	1,556,750	12,412	1,974,800
Sulphuric acid	1,616,336	2,155,600	1,534,465	2,031,050

In 1912 the total output of pig iron was 17,852,571 tons

#### IV FISHERIES

In 1907 the persons engaged in fishing numbered 83,665, of whom 15,811 were employed in sea and shore fishing and 17,854 on inland waters. In 1911, 701 boats, with an aggregate crew of 6,876, were engaged in deep-sea fishing in the North Sea. In 1910 the yield of the North Sea fisheries was valued at 825,063*l.*, and the Baltic fisheries, 392,443*l.* total value of fish caught, 1,908,804*l.* Fresh fish, valued at 2,389,150*l.* in 1910 were imported, in 1911 2,608,250*l.*

#### V MANUFACTURES

The chief seats of the German iron manufacture are in Prussia, Alsace Lorraine, Bavaria, and Saxony. Steel is made in Rhenish Prussia. Saxony is the leading State in the production of textiles, but Westphalia and Silesia also produce linen, Alsace Lorraine, Württemberg, Baden and Bavaria produce cotton goods. Woollens are manufactured in several Prussian provinces, also in Saxony and Bavaria, silk in Rhenish Prussia, Alsace, and Baden. Beetroot sugar is an important manufacture in Prussia, Brunswick, Anhalt, and Bavaria, &c. glass, porcelain, and earthenware in Silesia, Thuringia, Bavaria and Saxony, clocks and wooden ware in Württemberg and Bavaria, and beer in Bavaria, Prussia, Saxony, Baden, Hamburg, Bremen, &c.

The following are the statistics of the beetroot sugar manufacture in the Zollgebiet:—

Years beginning 1 August	Number of Factories	Beetroot used in Metric Tons	Production in Metric Tons		No. of Kgs. Beetroot to produce 1 Kg of Sugar
			Raw Sugar	Molasses	
1907	365	13,482,750	2,017,071	237,286	6.59
1908	358	11,800,132	1,980,387	275,895	6.90
1909	356	12,892,068	1,947,580	282,411	6.82
1910	354	15,748,931	2,512,828	325,058	6.27
1911	343	9,000,575	1,407,781	292,935	8.47

In 1901-11 there were 24 manufactories of sugar from starch, which yielded 10,061 tons of dry sugar, 62,316 tons of syrup, and 4,519 tons of colour.

The following table shows the quantity of beer brewed within the Beer-excise district (*Bräusteuervergleichs*), which includes all the States of the Zollgebiet, except Bavaria, Württemberg, Baden, and Alsace-Lorraine. The amounts are given in thousands of hectolitres (1 hectolitre = 22 gallons) —

Years beginning 1 April	Beer Excise Dist.	Bavaria	Württemberg	Baden	Alsace-Lorraine	Total (Zollgebiet)
1907	42,183	18,641	3,975	3,286	1,450	69,535
1908	40,190	18,483	3,660	3,227	1,401	66,961
1909	37,840	18,254	3,516	3,186	1,290	63,754
1910	38,080	18,110	3,981	2,801	1,206	64,185
1911	41,848	19,647	4,378	3,208	1,483	70,553

The total number of active breweries in the Beer-excise district was in 1911, 4,204. The amount brewed per head of the population in 1911 was in gallons — the Excise district, 17, Bavaria, 54, Württemberg, 89, Baden, 82, Alsace-Lorraine, 21, the entire Zollgebiet, 23 gallons. In 1911, there were 67,236 distilleries in operation which produced 80,121,558 gallons of alcohol.

In 1911, 518,821 juvenile workers were employed in Germany, 340,316 being males and 178,505 females. Of these, 7,434 were boys and 5,970 girls under 14 years of age.

### Commerce

The commerce of the Empire is under the administration and guidance of special laws and rules, emanating from the Zollverein, or Customs Union, which, since March 1, 1906, embraces practically the whole of the states of Germany and the Grand Duchy of Luxemburg, as also the Austrian communes of Jungholz and Mittelberg. A few districts in Baden (8,863 inhabitants) on the Swiss frontier, and the Island of Helgoland, the Free Haven of Hamburg, Bremen, Bremerhaven, Geestmünde, Cuxhaven and Emden, still remain unincorporated. The commercial statistics, however, exclude only the commerce of the island of Helgoland and the districts in Baden. Population of the entire Zollgebiet in 1906, 60,871,554.

Since 1879 Germany has been protectionist in her commercial policy. Of the total imports in 1911, the value of 229,665,600<sup>l</sup> was subject to duty, and 255,636,050<sup>l</sup> duty-free (exclusive of the precious metals). The duties levied amounted to 43,680,500<sup>l</sup>, or 19 per cent. of the value of the imports subject to duty.

The following table shows (in pounds sterling) the special trade for six years —

Years	Imports	Exports	Years	Imports	Exports
1907	£450,081,050	£344,745,830	1910	£476,492,600	£322,000,000
1908	£394,854,650	£334,074,900	1911	£500,847,250	£311,312,000
1909	£443,820,500	£312,004,350	1912	£506,093,000	£307,022,000

The following are the principal details of the special commerce for the years 1911 and 1912 (20 marks = £1)

Classes of goods	Imports		Exports	
	1911	1912	1911	1912
	million marks	million marks	million marks	million marks
Agricultural products and foodstuffs	6,541	6,580	1,423	1,592
Mineral raw materials	899	916	640	724
Manufactures of fats, oils and wax	25	24	45	40
Chemical & pharmaceutical products	846	864	756	760
Textile materials and manufactures	789	804	1,410	1,284
Leather and leather goods	160	112	40	460
Rubber goods	20	24	57	112
Plated goods not of textile fibres	5	8	1	7
Brooms, brushes, &c.	2	1	12	0
Manufactures of wood &c.	71	84	120	142
Paper and paper goods	20	25	277	210
Books, statutory pictures &c.	4	40	68	62
Manufactures of stone &c.	30	29	2	10

Glassware	20	16	108	112
Precious metals & manufactures of	380	388	171	196
Base metals, & manufactures thereof	117	139	1,487	1,562
Machinery & electrotechnical goods	113	108	912	964
Firearms, clocks, toys &c.	24	32	102	204

In Germany the average value of most imported articles is fixed annually under the direction of the Imperial Statistical Office, by a commission of experts. Since April 1, 1911 the value of all exports and of all imports is declared. The price fixed is that of the goods at the moment of crossing the frontier. For imports the price does not include Customs duties, cost of transport, insurance, warehousing &c. incurred after the frontier is passed. For exports the price includes all charges within the territory but drawbacks and bonuses are not taken into account. The quantities are determined according to obligatory declarations and for imports the fiscal authorities may actually weigh the goods. For packages, an official tare is deducted. The countries whence goods are imported, and the ultimate destination of exports are registered.

The imports of gold (coined and in bars) in 1911 amounted to 11,925,100/, of silver (coined and in bars) to 3,059,560/, the exports of gold amounted to 3,840,900/, of silver to 2,001,050/.

Some of the leading imports and exports under the above heads were, in thousands of marks value, as follows in 1911 —

		1 000 Marks			1 000 Marks			1 000 Marks
Imports	Horses	108,426	Coffee (raw)	251,569	Bras	160,623		
	Eggs	171,868	Tobacco (raw)	116,581	Woolen yarn	112,780		
	Wheat	238,875	Maize	86,720	Raw silk	131,908		
	Eya.	76,012	Hides, skins	465,377	Nitrate	185,294		
	Coal	179,310	Hog's lard	87,705	Copper	231,046		
	Lignite	70,601	Linseed	94,870	Butter	120,197		
	Iron ore	172,572	Cotton (raw)	604,117				
	Barley	462,106	Wool	871,699				
Exports	Cottons	291,518	Machinery	544,397	Aniline dyes	116,607		
	Woolens	262,008	Iron, iron goods	1,014,178	Copper & manuf.	183,125		
	Coal	267,984	Edible goods	202,784	Hides, skins	164,809		
	Sugar	372,577	Clothing	112,549	Leather & manuf.	287,906		
	Books	51,200	Coke	96,071	Rye	160,861		
	Stockings	64,017	Telegraph cables	21,285	Wheat flour	87,017		
	Gloves	26,989	Raw cotton	49,948	Beer	33,041		

The special commerce by countries of the "Deutsches Zollgebiet" (since March 1, 1906, "Deutsches Wirtschaftsgebiet") was mainly distributed as follows in 1910 and 1911 —

From or to	Imports (1910)	Imports (1911)	Exports (1910)	Exports (1911)
	1,000 Marks	1 000 Marks	1,000 Marks	1,000 Marks

The ports of Hamburg and Bremen are the chief gates of commercial intercourse of Germany with the United Kingdom and the United States.

### Shipping and Navigation

The following was the distribution of the mercantile navy of Germany only ships of more than 17·65 tons gross tonnage) on January 1 of the last three years —

	Baltic Ports		North Sea Ports		Total Shipping	
	Number	Net tonnage	Number	Net tonnage	Number	Net tonnage
1910 —						
Sailing vessels	400	17,808	2,808	492,447	3,208	500,750
Steamers	589	285,755	1,411	2,068,233	1,999	2,353,987
Totals	989	303,563	2,719	2,560,680	4,658	2,854,737
1911 —						
Sailing vessels	396	17,215	2,847	486,022	3,243	503,237
Steamers	590	292,902	1,423	2,194,781	1,973	2,487,693
Totals	946	310,117	2,780	2,580,803	4,076	2,990,930
1912 —						
Sailing vessels	396	18,486	2,831	497,478	3,227	515,964
Steamers	590	292,231	1,439	2,215,245	2,029	2,517,731
Totals	946	310,717	2,790	2,712,723	4,755	3,033,695

Of the total shipping on January 1, 1912, 2,260 of 812,718 tons, 1911, 2,246 of 297,998 tons, 1910, 2,247 of 286,271 tons, 1909, 2,240 of 283,098 tons, 1908, 2,218 of 284,081 tons belonged to Prussian ports. The total number of sailors required for manning the ships of the merchant navy was, on January 1, 1912, 75,130, 1911, 73,993, 1910, 73,516, 1909, 72,462. The size of the various ships in 1912 was as follows —

	Under 100 Tons gross	100-500 Tons gross	500-1,000 Tons gross	1,000-2,000 Tons gross	2,000 Tons gross and over
Sailing vessels	2,039	479	49	74	82
Steamers	234	517	249	299	710

Of the sailing vessels 1,310 were totally of iron or steel, of the steamers 1,997 were of iron or steel.

Built in German private yards 1911, 859 vessels of 406,763 tons gross (including 26 war vessels of 49,544 tons gross). Of these, 151 of 18,784 tons gross (including 3 war vessels of 2,230 tons gross) were built for foreigners. Built in foreign yards for Germans, 163 trading vessels of 61,708 tons gross.

Shipping of the German Empire, in which each vessel, if it entered several ports on a single voyage, is counted only once —

	With Cargoes		In Ballast		Total	
	Number	Net tonnage	Number	Net tonnage	Number	Net tonnage
1908 —						
Entered	95,822	25,417,998	11,872	2,015,472	107,694	27,433,477
Cleared	76,904	17,628,882	30,536	9,462,530	107,440	27,091,412
1909 —						
Entered	98,179	26,897,114	11,346	2,048,657	109,525	28,945,771
Cleared	79,650	18,858,281	30,586	9,825,970	110,236	28,684,251
1910 —

## Internal Communications

## I RAILWAYS.

Out of 38,747 miles of railway open for traffic 2,917 miles belonged to private companies. The following table gives some details —

Years	Total Length in English miles	Total Capital £	Expenditure £	Receipts £	Percentage on Capital of Surplus
1905	35,235	785,166,100	77 485,000	122,432,860	6 11
1906	35,760	759,848,550	85,305,050	132,054,800	6 15
1907	36,200	789 697,700	95,218,600	137,904,650	5 41
1908	37,026	821 379,310	99,753,520	112,360,000	4 86
1909	37,441	851,853,011	100,833,477	115,950,000	4 92
1910	38,747	876,917,215	103,725 098	152,524,442	5 57

In 1910, 531,527,817 metric tons of goods, including live cattle, were carried, and paid 1,903,193,721 marks, the number of passengers in 1910 was 1,541,276,095, yielding 835,031,618 marks

In 1910 there were 2,808 miles of tramway, and 6,404 miles of Kleinbahnen. The length of railway line of normal and narrow gauge respectively

belonging to each of the State systems, and the length of private line, were as follows on March 31, 1912 —

Railway system	Normal gauge	Narrow gauge	Total
	Miles	Miles	Miles
Prussian Hessian	23 623	148	23 771
Bavarian	6 112	71	6 183
Saxony	1 744	214	2 068
Württemberg	1 281	62	1 293
Baden	1 060	17	1 067
Mecklenburg	681	—	681
Oldenburg	404	—	404
Royal Military	48	—	48
Alsace Lorraine	1 203	46	1 301
Total	35 171	600	35 881
Private	2 207	109	2 316
Grand Total	37 378	1 309	38 747

## II CANALS AND NAVIGATIONS<sup>2</sup>

Nature of Waterway	Length navigable for vessels of draught						Total
	Over 16ft. 4 8in	15ft. 1 4in to 16ft. 4 8in	9ft. 10in. to 15ft. 1 4in	6ft. 6 7in to 9ft. 10in	Under 6ft. 6 7in		
	miles	miles	miles	miles	miles	miles	
Navigable rivers	220	268	295	1 330	2 376	4 989	
Canalised rivers	—	3	1	116	758	878	
Canals	68	2	10	374	861	1,315	
Ship canals through lakes, &c	232	75	211	309	457	1,284	
Totals	520	348	517	2,129	4,922	8,436 <sup>1</sup>	

<sup>2</sup> Exclusive of 100 miles of unclassified waterways — Latest available figures (for 1904).

Up to the end of 1908 there were added 28 miles.

The Kaiser Wilhelm canal, connecting the North Sea and the Baltic, has a length of 61 miles, breadth at bottom 72 ft., at surface 213 ft., depth 28 ft. 6 in., cost of construction, 7,800,000. In the year ending March 31, 1912, 52,817 vessels of 8,472,261 tons net used the canal.

## III POSTS AND TELEGRAPHS

The postal and telegraphic services are retained in the hands of their respective Governments. All parts of the Empire except Bavaria and

Württemberg are united to form an imperial postal district (*Reichspostgebiet*)  
Statistics for 1911 —

—	Employees	No. of Post Offices	No. of Boxes	No. of Tele- graph Offices
Reichspostgebiet	210,338	34,536	130,715	36,812
Bavaria	16,468	5,273	19,320	7,908
Württemberg	6,414	1,178	5,731	2,223
Total in Empire	233,270	40,987	155,766	46,444

Amount of business transacted in 1911 —

—	Reichspostgebiet	Bavaria	Württemberg	Empire
Letters	2,734,891,660	233,852,410	197,406,640	3,175,650,600
Post Cards	1,678,835,420	155,493,610	66,885,900	1,901,234,130 <sup>1</sup>
Printed matter	1,561,381,156	161,783,170	65,642,310	1,778,306,680
Business papers	23,563,880	1,404,100	173,140	25,129,620
Samplers	90,236,540	10,860,260	2,766,020	103,862,820
Journals	1,922,601,730	257,240,680	49,665,880	2,379,912,730
Total including other despatches	8,287,199,600	894,737,630	313,088,990	9,535,021,220
Money sent (£ ster- ling)	3,241,384,821	229,731,735	34,487,827	2,568,387,433

<sup>1</sup> The use of post cards for inland correspondence in Germany is almost double that of any other country.

Finances of the postal and telegraphic and telephonic services in 1911  
(in marks) —

—	Reichspostgebiet	Bavaria	Württemberg	Empire
Receipts	155,375,064	78,797,660	28,719,922	258,092,647
Expenditure	664,762,652	59,839,100	20,969,415	745,691,167
Surplus	90,812,412	18,958,560	7,750,508	112,601,480

The following are the telegraph statistics for the year 1911 —

—	Telegraph Lines kilometres	Telegraph Wires, kilometres	Inland Telegrams	Foreign Telegrams
Reichspostgebiet	120,563	506,008	24,222,210	14,167,176
Bavaria	27,064	83,700	2,667,478	1,160,816
Württemberg	11,328	16,640	793,716	413,950
Total in Empire	238,600	706,348	27,683,404	15,741,942

In 1911 the urban telephone systems had 117,612 kilometres of line and 5,022,771 kilometres of wire; conversations, 1,694,753,080. The 9,376 interurban systems had 1,296,965 kilometres of wire; conversations, 877,382,949.

### Money and Credit

Money (in thousands of marks) coined since the foundation of the present Empire —

Year beginning 1 April	Gold	Silver	Nickel	Copper	Total
1907	37,070 9	74,929 2	5,460 7	1,283 0	148,201 8
1908	68,243 7	58,869 7	5,418 9	741 0	132,817 2
1909	159,634 5	49,021 6	2,938 1	784 9	211,794 2
1910	186,430 1	43,485 5	4,107 8	200 0	214,478 3
1911	186,346 1	40,910 2	6,524 3	1,142 2	184,922 8
Total (1871 March 31, 1912)	5,007,205 5	1,080,866 8	108,639 3	22,848 5	6,214,075 1
Withdrawn	141,491 6	1,007 6	3,309 4	45 2	145,858 8
Remaining	4,865,713 9	1,079,879 2	100,329 9	22,298 3	6,068,021 3

Average financial condition of the note issuing banks (thousands of marks) —

Year	Bks.	LIABILITIES				ASSETS			
		Capital	Reserve Fund	Notes in Circulation	Total including other Liabilities	Coin & Bullion	Notes of State & other Banks	Bills	Total including other Assets
1907	5	325 500	78 733	1,690,751	2,844 695	906 837	120 897	1 925,177	2,644 695
1908	5	325 500	79 640	1,664,560	2,764,147	1 068,185	108 163	1 091 888	2,766 147
1909	5	325 500	79 742	1 721 216	2,892 193	1 111,671	107 695	1 067 789	2,992 193
1910	5	325 500	79 779	1 751 110	2 848,565	1 121 531	107 861	1 135,918	2,948,666
1911	5	325 500	79 821	1,803,780	2,903 142	1 108 900	100 334	1 229,963	2,906,142

'Reichskassenscheine,' small paper notes for 5 and 10 marks (not legal tender) in circulation end of March 1911, 120 000,000 marks

### Money, Weights, and Measures.

The *Mark*, of 100 *Pfennig* is of the value of 11½d., or 20 43 marks to the pound sterling. Gold coins are 20, and 10 mark pieces, called respectively *doppel-krone*, and *krone*. The 20 mark piece weighs 7 96495 grammes 900 fine, and consequently contains 7 16846 grammes of fine gold. Silver coins are 5, 2, and 1 mark pieces and half mark pieces. The mark weighs 5 5 grammes 900 fine, and thus contains 5 grammes of fine silver. Nickel coins are 25, 10, and 5 pfennig pieces. There are bronze coins of smaller denominations.

The standard of value is gold. Silver is legal tender only up to 20 marks. The metrical system of weights and measures is in force.

### Diplomatic Representatives

#### 1 OF GERMANY IN GREAT BRITAIN

*Ambassador* — His Serene Highness Prince Lieknowsky; accredited 1912

*Counsellor of Embassy* — Herr Dr. Richard von Kühlmann, C V O

*Second Secretary* — Herr O. von Schubert.

*Third Secretary* — Herr Leopold von Holach.

*Naval Attaché*.—Commander Erich von Müller  
*Military Attaché*.—Major Ostertag, C V O  
*Attache*.—Herr Baron von Friesen, Herr Lieutenant Wilhelm Erbgraf  
 von Bentzack und Waldeck Limpurg, and Herr Lieutenant von Bülow  
*Director of Chancery*.—Geheimer Hofrat C Lentze  
*Chancellors*.—Herr H Meinck, Herr F Carow, M V O, Herr H Doerner,  
 and Herr W Baatz  
*Consul General in London*.—Geh. Legationsrat Johannes  
*Consul in London*.—Herr Legationsrat Hagen  
 Germany has also Consular representatives at the following places —  
 Aberdeen Belfast, Bradford, Cardiff, Dublin, Dundee, Glasgow, Hull, Leith  
 Liverpool, London, Manchester, Newcastle, Peterhead, Plymouth, South  
 ampton, Sunderland

## 2 OF GREAT BRITAIN IN GERMANY

*Ambassador*.—Right Hon Sir E Goschen, GCMG, GCVO,  
 appointed November 1, 1908

*Councillor*.—Earl Granville, M V O

*Secretaries*.—Hugh Gurney H G Chilton, H J Bruce M V O and  
 H T Beresford Hope

*Military Attaché*.—Lt. Col. Hon. A V F Russell, M V O

*Naval Attaché*.—Captain H D R Watson, R N

*Consul General in Berlin*.—H Boyle (1909)

There are also British Consular representatives at the following places —  
 Cologne, Danzig, Düsseldorf (C G), Frankfurt on Main (C G), Hamburg  
 (C G), Stettin, Mannheim, Bremen, Kiel Breslau Harburg Wismar  
 Husum, Swinemunde, Königsberg, Memel Cuxhaven, Emden, Flensburg,  
 Hanover, &c

### Colonies and Dependencies

The following is a list of the various Colonies and regions under the protection or influence of Germany, the estimates given being necessarily vague —

	Date of Acquisition	Method of Government	Estimated Area Sq. Miles	Estimated Population
<b>In Africa —</b>				
Togo	1884	Imperial Governor	83,706	1,000,400
Kamerun	1884	Imperial Governor	191,198	2,908,300
German South-West Africa	1884-90	Imperial Governor	322,450	88,900
German East Africa	1885-90	Imperial Governor	884,180	10,022,000
Total African Possessions	1884-90		931,400	12,419,500
<b>In Asia —</b>				
Kiauchau	1897	Imperial Governor	200 <sup>1</sup>	166,900
<b>In the Pacific:—</b>				
German New Guinea —				
Kaiser Wilhelm's Land	1885-86	Imperial Governor	76,000	861,700
Bismarck Archipelago	1885		20,000	
Caroline Islands	1899			
Palaus or Pelew Islands	1900		550	
Marianne Islands	1900		250	
Solomon Islands	1896	Imperial Governor	4,300	20,000
Marshall Islands, etc.	1898		120	
Samoan Islands —				
Samoa	1899		600	
Upolu	1900		240	
Total Pacific Possessions	1884-99		96,100	257,800
Total Foreign Dependencies	1894-99		1,027,500	12,644,300 <sup>2</sup>

<sup>1</sup> Not including the 127,270 square miles with a population of 1,000,000 annexed (1911) to France, but including the 4,450 square miles ceded by Germany to Japan.

<sup>2</sup> Exclusive of the Bay with an area of about 200 square miles, and the neutral zone with an area of about 1,500 square miles, and population of 1,200,000.

<sup>3</sup> Of these (1912), 20,450 were whites.

Imports from the German colonies into Germany 1911, 2,152,460/ exports from Germany to the colonies, 2,512,800/, against 2,477,800/ and 2,439,900/ respectively in 1910. Total imports to the German colonies in Africa and the Pacific, 1911, 7,110,610/, exports from these colonies, 1911, 4,899,810/, against 6,442,110/ and 5,042,965/ respectively in 1910. Imports into Great Britain from German colonies, 1911, 488,880/, British domestic exports to the German colonies, 648,894/.

### Togo

Togo, with Little Popo and Porto Seguro, in Upper Guinea, between the Gold Coast Colony on the west and French Dahomey on the east, area 33,700 square miles, coloured population 1,000,000, European population, 1910, 363, of whom 327 were German. Coast line about 32 miles, but inland the territory, between the rivers Volta and Mono, widens to three or four times that breadth. Togo is under an Imperial governor, assisted by a secretary, an inspector of customs, and a local council of 7 unofficial members. Lome, the chief port, and capital, Aneho (now closed to maritime trade), Porto Seguro, and Bagida are on the coast. The government stations are Misahöhe with Kpendu, Kete Kratchi with Bismarckburg, Sansone-Mango, Bawari, Atakpame, Sokodé. Togo station is on Lake Togo. The military force is small. There are two Government schools with 312 pupils, some being trained as clerks and interpreters and learning handicrafts. Missionary societies have 308 schools with 10,193 native children. In the courts of justice in the year 1910 57 Europeans and 5,602 natives were sentenced. The climate at the coast is unhealthy for Europeans. Inland the country is hilly with streams and watercourses. There are long stretches of forest and brushwood, and dry plains alternate with cultivable land. Maize, yams, tapioca, ginger, and bananas are cultivated by the natives, most of whom are Ewe negroes, oil palms, caoutchouc, and dye-woods grow in the forests but the main commerce is the barter trade for palm oil, palm kernels, and gum, carried on by a few factories on the coast. There are now considerable plantations of palms, coffee, cocoa, kola, kinkia, and manihot. In 1910 464,470 kilos of cotton and 137,045 kg of cocoa were produced, tobacco is being tried, as also rubber, fibrous and other plants. In 1909 there were 135,000 meal plants in the Colony. In the Sokode and Mangu districts are about 65,000 head of cattle, sheep, goats, poultry, and pigs are found, but nowhere in large numbers, in some districts horses of small size are bred. Native industries are weaving, pottery, smith work, straw plaiting, wood cutting. There is no mining by Europeans, but the natives in the Sokode district extract iron (1910 400 tons were extracted). Revenue estimated for 1912 at 3,150,000 marks, expenditure, the same amount. Total imports (1911), 9,620,080 marks; exports, 9,317,552 marks. The exports comprised palm kernels, 1,635,438 marks, palm oil, 911,686 marks, rubber 969,478 marks, cotton, 417,490 marks, maize, 979,923 marks. The chief imports were cottons, 1,816,641 marks, cotton yarn, 179,406 marks, spirits, 684,000 marks, iron and ironware, 607,392 marks, tobacco, wood, and colonial produce. In 1910, 327 vessels of 576,639 tons (365,697 German) entered the ports. There are good roads, connecting Lome with Misahöhe and with Atakpame, and other roads are in construction. A railway connects Lome with Aneho (Little Popo) and Palme, 128 miles. Cost of service, 1910 340,155 marks, the receipts, 502,614 marks. Total length of line (1913), 200 miles. There are 18 post and telegraph stations and 4 sub stations, connected by telegraph and telephone with the Gold Coast Colony, French Dahomey, and with Europe.

Governor—Duke Adolphus Frederick, of Mecklenburg  
British Consul General.—O Braithwaite Wallis

### Kamerun

The Kamerun Protectorate lying between British Nigeria and the French Congo, extends from the coast north eastwards to the southern shore of Lake Chad, area 191 180 square miles, population 2,720,000. Bantu negroes near the coast, Sudan negroes inland. In 1911 there were 1,455 whites, of whom 1,111 were German. The protectorate is under an imperial governor, assisted by a chancellor two secretaries, and a local council of three representative merchants. The seat of Government is at Buëa. Military force, 171 Germans and 1,300 natives, police force, 28 Germans and 621 coloured men. Four Government schools at Duala, Victoria, Jaunde, and Garia, have about 733 pupils. Four missionary societies have schools with 24,270 pupils. In 1910, 94 Europeans and 6,360 natives were convicted in the criminal courts. The soil in the coast region is fertile, and numerous valuable African vegetable productions grow in profusion. Plantations of cocoa occupy 9,583 hectares, coffee, 10 hectares, rubber of various sorts, 6,472 hectares, kola, 152 hectares. There are 175,049 oil palms. In Victoria, the experiments are being made towards the cultivation of cloves, vanilla, ginger, pepper, and many other products, an active trade in ivory and palm-oil. The colony is rich in hardwood, ebony is abundant. Catile roasting is carried on with success in the hinterland. Revenue (mainly from import duties) and expenditure for 1912 9,590,000 marks, including 2,845,000 marks of subvention. Duala (pop. 22,000), Victoria, Kribi, Rio del Rey and Campo are important trading stations, and Aquatown and Bell town are the principal native settlements. Gold and iron have been found.

Imports over sea, 1911 29,317,514 marks exports 21 250,883 marks. Chief exports palm kernels, rubber, palm oil ivory, cocoa. Chief imports textiles, spirits, timber, salt, iron wares, and colonial produce. In 1910 there entered at the 5 ports 529 trading vessels of 1,290,829 tons. Roads are being constructed between the coast towns and from the coast inland. The total length of railway line (1913) is 149 miles. The Manenguba railway is constructed to the length of 160 kms. [The receipts were (1911), 380,432 marks. A line from Duala to Edea and Widumenge is projected and other lines near the south west coast. The telegraph system is being rapidly extended. Kamerun is connected by cable with Bonny in Southern Nigeria. A new direct cable is in construction.

*British Consular Agent at Duala—E. C. Holder*

### German South-West Africa.

This Protectorate includes the region lying between Portuguese West Africa and Cape Colony, and extending eastward to the British sphere, exclusive of Walvisch Bay, which belongs to Cape Colony. Area 322,450 square miles, population, 82,235 belonging to the Hottentot and Bushman, the Bantu and the Damara races. European population, 1911, 18,963 (11,140 German), the military force (inclusive of police) 8,547 men. In 1909 the 10 Government schools had 548 pupils, and the Mission schools had about 3,000. In 1910, 515 Europeans and 2,371 natives were convicted in the criminal courts. The whole southern part and much of the east is barren and desert. There have been extensive boring operations for water, in many cases successful. The coast lands are held by the 'Deutsche Kolonial Gesellschaft für Südwest Africa,' which has given the special names of Deutsch-Namaland to the southern part of its territories, and Deutsch-Damarsland to the northern. The seat of administration is at Windhoek, other stations being Gobabis, Otjimbingua, Swakopmund, Keetmanshoop, Gibeon. The natural harbours

are Sandwich Harbour, which is being gradually sanded up, and Angra Pequena, or Lüderitz Bay. A new harbour has been constructed at Swakopmund. For farm purposes, crown lands and native lands have been disposed of to the extent of several millions of acres. Up to April 1, 1911, 1,141 farms of size varying according to the district from 5,300 to 81,800 hectares had been sold. There is, however, little agriculture, but market gardening is common. Cotton cultivation has begun in the Outjo district, viticulture, silk culture, and tobacco-growing are being tried. The government has experimental stations for agriculture, gardening, and forestry. The chief industry is pastoral. In 1911, the live stock consisted of 144,445 cattle, 384,248 sheep, 10,257 angora goats, 384,986 other goats, 12,683 horses, 6,064 mules, 6,622 asses, 7,761 swine, 954 camels. Large herds and flocks of cattle and sheep belong to natives.

Copper has been found at Otavi and Otjuzongati, at Tsumeb, in the Otavi region. Copper mining is carried on. 40,256 tons of copper ore were exported in 1910. Diamonds have been found near Lüderitz Bay, and in 1912 766,465 carats were produced, valued at 268,423. Gold has been found, but not in sufficient quantity of working, and marble, asbestos, graphite, and other minerals have been observed.

The revenue and expenditure for 1912 were put at 36,020,000 marks, 13,828,000 marks being Imperial contribution.

The total imports (including government imports) in 1911 amounted to 45,301,955 marks, exports, 28,573,244 marks. In 1911 the imports comprised cereals and flour, 13,267,000 marks, tobacco, 973,000 marks, beer, 1,752,000 marks, timber, 1,028,000 marks, meat, 1,105,000 marks, textiles, 4,843,000 marks, iron and non-ferrous work, 10,713,000 marks. The chief exports were animal products, guano, and copper ore, the last named to the value of 5,697,000 marks. German imports, 3,684,000 marks, exports to Germany, 20,693,000 marks. In 1910, 483 vessels of 1,328,356 tons entered at the ports of the colony.

There is a railway of 237 miles (gauge about 23½ in.) from Swakopmund to Windhoek, from Swakopmund to Tsumeb (359 miles), from Otavi to Grootfontein. The Lüderitz Bay Keetmanshoop railway was completed in July, 1908. Total length open, 1,304 miles (1913). The State has bought the Otavi and Otavi-Grootfontein railways, the latter from the South-West Africa Company, and leases the line to the company for 30 years, reserving the right to terminate the lease in 20 years. The costs of the service on the 3 lines were in 1910, 6,607,000 marks, the receipts, 9,939,000 marks. The mining rights in the lands transferred to the State are to be a monopoly of the company. A telegraph line connects Swakopmund, Karibub, Okahandja and Windhoek, and a telephone system works in connection with this line. The colony has 1,592,438 miles of telegraph line and 415 miles of telephone line. The Protectorate communicates with European countries by means of the Cape and Mossamedes cable which touches at Swakopmund.

*British Consul.*—E. H. W. Müller

### German East Africa

German sphere, East Africa, has a coast line of about 620 miles, estimated area, 384,000 square miles. The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4,000,000 marks. The coast line extends from the mouth of the Unjila to Cape Delgado, or (more accurately) to 10° 40' S. lat. The German Empire is

represented in the Protectorate by an Imperial governor. There are 9 communes, each with an administrator and a council of from 8 to 5 members. The members are appointed by the Governor, they may be German or not, but one must represent native interests, local finance and other matters are submitted to these councils. The native population is estimated at 10,000,000, consisting mostly of tribes of mixed Bantu race. Estimates of local populations for 1910 are Tabora, 500,000, Dar-es-Salaam 185,500, Ujiji, 175,000, Tanga, 77,101, Bagamoyo, 77,500, Kilwa, 100,791, Lindi, 354,237, Pangani, 68,757. Arabs, Indians, Syrians, and Goanese number about 7,000. The European population in January, 1911, numbered 4,227 (3,118 Germans). Justice is administered in the Chief Judicial Court and in District and Native Courts. In the year 1910, 164 Europeans and 16,084 natives were convicted in the criminal courts. Of the natives 84 were sentenced to death. The military and police force consists of about 320 Germans and 4,540 natives. In 1909 there were 31 Government schools, including 4 for handicrafts, with 14 Europeans and 77 native teachers and 3,821 pupils. Five Protestant and three Catholic missionary societies have schools with over 50,000 pupils. Near the coast forests of mangrove, coco-palm, baobab tamarind, &c., in the higher regions the acacia, cotton tree, sycamore, banian, and other trees. Government forests, 280,827 hectares. Near the coast there are German plantations of coco-palms, coffee (on the higher lands), vanilla, tobacco, caoutchouc, cacao, sugar, tea, cotton, cardamom, cinchona. Fibre plants are successfully cultivated. There are several Government experimental stations for tropical culture and cattle-rearing. In 1911 there were 1,489,178 head of cattle, 2,798,437 sheep and goats. Minerals known to exist within the Protectorate are coal, iron, lead, copper, mica, and salt, gold ore was extracted to the extent of 7,833 tons in 1911, valued at 943,645 marks (46,400 £). Agates, topaz, moonstones, tourmalin, and quartz crystals are found, and garnets in large quantities. The production of salt (36,530 cwts in 1911) was the largest yet recorded. The chief seaports are Dar-es-Salaam, Bagamoyo, Saadani, Pangani, Kilwa, Lindi, Mikindani, and Tanga, but few of these are accessible to ocean going vessels, though gradual improvements are being introduced. Wide, well kept roads (on some of which rest houses and stores are provided) run all through the colony. The Usambara railway from Tanga to Muheza (218 miles) is open for traffic. Costs of service in the year 1910 on the Usambara railway was 616,900 marks, the receipts from all lines, 1,436,000 marks. The Central Railway from Dar-es-Salaam to Tabora (528 miles) was completed in February, 1912. Total length of line (1913), 743 miles. There are also Government coasting, river, and lake steamers. Dar es Salaam is in telegraphic communication with the coast towns, Zanzibar, many inland centres, and, at Ujiji, with the African trans-continental line, 30 post offices and 29 telegraph stations. The revenue and expenditure for the year 1912 were put at 19,320,000 marks (including Imperial contribution of 3,618,000 marks). Imports, 1911, 45,891,442 marks, exports, 22,437,760 marks. Chief exports rubber, 5,764,000 marks, copra, 1,909,000 marks, ivory, 708,000 marks, coffee, 572,000 marks, vegetable fibre (mual), 4,011,000 marks, insect wax, 442,000 marks. Chief imports cottons, rice, articles for consumption, hardware and iron. The trade is chiefly with Zanzibar and Germany. In 1910, 333 vessels of 2,000,000 tons entered the various ports. There visited the ports also 3,890 dhows of 37,420 tons.

Governor.—Dr Schuee.

British Consul-General.—E. A. W. Clarke, 1909 (residing at Zanzibar).

**Kiau-Chau.**

Kiau Chau, on the east coast of the Chinese province of Shan tung, was seized by Germany in November, 1897, the town, harbour, and district were by treaty transferred to Germany on a 99 years lease, March 6, 1898, and the district was declared a Protectorate of the German Empire, April 27, 1898. The administration is entrusted to the navy department, and a naval officer is governor.

Area, about 200 square miles, exclusive of the bay (about 200 square miles). There are 33 townships, and a population of about 165,000, white population with the garrison, 1910 3,898 (Germans, 3,806). Surrounding the district and bay is a neutral zone, whose outer limit is 80 miles from highwater mark on the coast of the bay, its area being about 2,500 square miles, and population about 1,200,000. There are numerous German Schools for Chinese, mostly taught by missionaries. At Taing Tau there is a school for European children with 140 and a higher-class school with 145 pupils. For the year 1912 the sum required for administrative expenses was 14,540,000 marks (Imperial subvention, 8,298,000 marks). The garrison (2,391 men) consists of German marines, with a small force of Chinese soldiers. There are judicial officers for European residents, with an appeal to the German consular court at Shanghai, Chinese residents are subject to this jurisdiction only in specified cases. In the year 1909, 225 Europeans and 119 natives were convicted in the criminal courts.

The products are fruits, beans, ground-nuts, sweet potatoes, &c., and silk culture, coal mining, briquette-making, brewing, soap-making are carried on, and there is a prosperous silk factory. Over 1,000 Chinese are employed on the floating dock. At Kiau-Chau in 1910 the imports amounted to 69,875,000 marks and the exports to 60,561,000 marks. The chief imports were raw cotton, cotton goods, and cotton yarn, metals, paper, sugar, and matches. The chief exports were straw braid, silk, ground nut and bean oil, and Shantung pongee. In 1910, 555 vessels of 832,245 tons entered at Kiau Chau, 6,014 junks entered, and 5,550 cleared. A railway, Tsing Tau to Poshan = 272 miles.

**In the Pacific**

1 *Kaiser Wilhelm's Land*.—Kaiser Wilhelm's Land, the northern section of south east New Guinea, was declared a German protectorate in 1884. Including Long Island, Dampier Island, and some other small islands, it has an estimated area of 70,000 square miles, and a population of 531,000 natives, white population (1910) 728 (Germans, 578). There is a chief judicial court in Rabaul and district courts there and in Friedrich Wilhelmshafen. In the year 1910, 81 Europeans and 325 natives were convicted in the criminal courts. Three Protestant and two Catholic missionary societies are at work with schools in the territory and in Bismarck Archipelago, attendance about 7,500. The development of the Protectorate has been entrusted to the German New Guinea Company, but the administration was transferred to the Imperial Government on April 1, 1899. Area and sago palms, bamboos, ebony, and other woods abound. Cultivated area 30,520 hectares, chiefly under coco palms, and casoutchouc. The natives barter copra, mother-of-pearl, and trepang. Horsem, cattle, and goats flourish on this island. Gold has recently been found in the Bismarck Mountains. Imports of the whole colony except Samoa (1911) 8,014,831 marks, exports, 12,026,851 marks (mostly copra). In 1910, 765 merchant vessels of 404,700 tons visited the port of Kaiser Wilhelm's Land and the Bismarck Archipelago. The chief harbours are Friedrich Wilhelmshafen,

Berlinhafen and Konstantinshafen. The seat of Government is Herbertshöhe in the Bismarck Archipelago. Estimated revenue and expenditure (for all the lands with the exception of the Samoan Islands), 1911, 2,760,000 marks, including 1,208,000 marks of Imperial subvention.

2. *Bismarck Archipelago*.—In November, 1884, a German Protectorate was declared over the New Britain Archipelago and several adjacent groups of islands, then renamed the Bismarck Archipelago. The chief islands are Neu Pommern (formerly New Britain), Neu Mecklenburg (New Ireland), Neu Lauenburg (Duke of York Islands) and Neu Hanover, Admiralty, Anchorite, Commerson, Hermit, and other islands. Native population (1906) about 188,000, coloured non native population was 398 (mostly Chinese). White population (1909) 474 (364 German). Wesleyan and Catholic missions are at work. In 1908, the total cultivated area was 13,464 hectares, chief products, copra, cotton, coffee, and rubber.

3. *Solomon Islands*.—Germany owns part of this group, including the islands of Bougainville and Buka, but Choiseul, Isabel or Mahaga, and various smaller islands to the east of Bougainville were transferred to Great Britain November 14, 1899. Missionary societies are at work, their schools have about 120 pupils. Sandal wood and tortoiseshell are the chief commercial products. The German islands are placed under the officials of Kaiser Wilhelm's Land.

4. *The Caroline Pelew (or Palau), and Marianne (or Ladrone) Islands*.—By treaty of February 12, 1899, these islands, with the exception of Guam (the largest of the Marianne Islands) ceded to the United States in 1898, passed on October 1, 1899, from Spanish to German possession for payment of 840,000. For administrative purposes the islands are divided into two groups, the Eastern Carolines, with Ponapé as the seat of Government, the Western Carolines, the Pelew Islands and the Marianne Islands, with Yap as administrative centre. They all form part of the German New Guinea Protectorate. White population (1910) 320 (Germans 194). The native population (1911) was 55,000. Imports into East and West Carolines and the Pelew and Marianne Islands (1910), 1,067,618 marks, exports, 1,664,558 marks (mostly copra).

The Carolines consist of about 500 coral islets, Ponapé having about 2,000 inhabitants, Yap 7,155, and Kusai 400. The population is mainly of Malay origin, with some Chinese and Japanese. The chief export is copra. The Pelew (Palau) Islands, to the west of the Carolines, have (1904) 3,101 inhabitants, they are about 26 in number, mostly coral, many of them uninhabited, the largest is Babelthuap, which contains the bulk of the population. The German Marianne Islands, to the north of Pelew, have (1904), 2,646 inhabitants, their northern group is actively volcanic and uninhabited.

5. *Marshall Islands*.—The Marshall Islands, consisting of two chains or rows of lagoon islands (several uninhabited), known respectively as Ratak (with thirteen islands) and Ralik (with eleven islands), have belonged to Germany since 1884. European population in 1910, 179 (91 German). Other population, estimated, 15,000. The administration was taken over from the Jaluit Company by the German Colonial authorities on April 1, 1906. Since then the Marshall Islands have formed a district (Bezirk) under the New Guinea government. The chief island and seat of the German Imperial Commissioner is Jaluit, most populous island Majuro, 2,600 inhabitants. Protestant (American) and Catholic missions are at work. There are plantations of coco-palm (1,275 hectares). Imports in 1910, 1,296,958 marks,

exports, 9 277,881 marks. The chief export is phosphate (8,561,000 marks in 1910).

5. *Samoan Islands*.—Among German dependencies are included Savaii and Upolu, the largest of the Samoan or Navigator Islands. By the Anglo-German Agreement of November 14, 1899, ratified by the United States in January, 1900, Great Britain renounced all rights over the islands in favour of Germany as regards Savaii and Upolu and in favour of the United States as regards Tutuila and other islands. Under the German Imperial Governor there is a native High Chief with a native council, the several districts being administered by chiefs. Justice is administered by native as well as European judges and magistrates.

Savaii has an area of about 660 square miles, Upolu 840 square miles. Both islands are mountainous, fertile and well watered. Several adjacent islets, exceedingly fertile and populous, are included in the German dependency. The port of Apia is in Upolu. There is a Government Council containing 8 unofficial members (3 of whom are British) chosen by the Governor from among the settlers. In Apia there is a central and also a district Court. 27 Europeans and 452 natives were convicted in these Courts (1910). The inhabitants of the islands are Polynesians, nominally Christian (Protestant, Catholic and Mormon), but native superstitions are prevalent. Population 1910, 34,480 distributed as follows:—Upolu, Manono and Apolima, 20,662, Savaii, 12,816. There were in 1911 490 white inhabitants (284 German, 106 British), also 1 854 Chinese and 1,003 non native inhabitants of mixed race. There is a German Government school with 201 pupils, and mission schools with over 8,000 pupils. There are 60 miles of good roads. The revenue and expenditure for 1911 were estimated at 950,000 marks. Trade is in the hands of German, British and American firms. Except in the 'Plantation District' Europeans may not lease land from natives and cannot buy land from natives except formerly leased. The Governor's consent is required for sale or lease of land in the 'Plantation District, about 7 sq. miles, and the purchase or lease of other lands must be with the Government. Natives cannot contract debts with Europeans. The staple product is copra. Rubber trees are being planted. Imports (1911) 4,066,288 marks, exports, 4 389,983 marks. The imports are chiefly haberdashery kerosene, provisions, &c, mainly from Australia and New Zealand. The chief exports are copra and cocoa beans. In 1911, 63 vessels of 115,108 tons (exclusive of coasters and ships of war) entered at the port of Apia (of these 62 with a tonnage of 112,516 were British), and 67 vessels with a tonnage of 114 085 cleared (62 of these with a tonnage of 112,516 were British). Regular steam communication with New Zealand. Wireless stations have been erected at Apia, in Samoa, and Nauru (or Pleasant Island, one of the Marshall Islands), respectively. Two other stations are planned—at Rabaul in New Guinea, and on Yap, one of the Caroline Islands.

The currency is in marks but English and American gold and silver coin are legal tender. 1l = 20 42 marks, 5 U.S. dollars = 20 95 marks.

*British Acting Vice-consul at Apia*.—T. Trood

## STATES OF GERMANY.

Statistics of area, population, births, deaths, marriages, emigration, primary schools, universities, and railways are given collectively for all the German States under the head of *German Empire*.

## ALSACE-LORRAINE

(REICHSLAND ELSSASS LOTHRINGEN)

**Constitution.**—The fundamental laws under which the Reichsland, or Imperial Land, of Alsace-Lorraine is governed were voted June 9, 1871, June 20, 1872, June 25, 1873, July 4, 1879, and May 31, 1911. By the law of June 9, 1871, it is enacted, 'The provinces of Alsace and Lorraine, ceded by France in the peace preliminaries of February 26, 1871, under limits definitely fixed in the Treaty of Peace of May 10, 1871, shall be for ever united with the German Empire. The Constitution of the German Empire was introduced in Alsace Lorraine on January 1, 1874. By the law of May 31, 1911, a Constitution was granted to Alsace Lorraine, by which it received 3 votes in the Federal Council. The Emperor exercises sovereign powers in the country, and at the head of the Government is a Governor (*Statthalter*), appointed and recalled by the Emperor, who lives at Strassburg. Local laws are made by the Emperor with the consent of the Diet, which consists of two Chambers. The First Chamber is made up of five representatives of the religious communities (2 Catholic, 2 Protestants, 1 Jew), the President of the Supreme Court at Colmar, a representative of the University of Strassburg, four representatives of the larger cities—Strassburg, Metz, Colmar and Mülhausen, a representative of the Chamber of Commerce in each of these towns, six representatives of the Agricultural Councils—two representatives elected by the Chamber of Craftsmen of Strassburg, and a number of members nominated by the Emperor—this number not to be greater than the rest of the members, and at present amounts to 13, all of whom hold office for 5 years. The Second Chamber, consisting of 80 members, is elected on general direct suffrage, by secret ballot, for a period of 5 years.

**Statthalter.**—Count v. Wedel, appointed October 18, 1907.

**Area and Population.**—The Reichsland has an area of 14,523 square

kilometers or 5,665 English square miles. It is administratively divided into three Bezirke, or districts.

Districts	Area, English square miles	Population		Pop per sq. mile. 1910
		1910	1905	
Oberelsass	1,354	517,865	512,079	308.6
Unterelsass	1,848	700,938	688,695	379.2
Lothringen	2,403	655,211	615,790	272.6
Total	5,605	1,874,014	1,814,564	334.3

In 1910 the population speaking German numbered 1,634,260, French 204,262. The number of foreign subjects was 76,886. The garrison (1910) consisted of 82,276 men. In 1910, 53.2 per cent resided in towns of 2,000 inhabitants and upwards, 46.8 per cent in rural communes. Chief towns, Strassburg (178,891 inhabitants in 1910), the capital of Alsace Lorraine, Mülhausen (96,041) in Oberelsass, and Metz (68,598), in Lothringen. Marriages, 1911, 13,071, births, 46,930, deaths, 34,081, surplus of births, 12,849. Of the births, 1,265 (2.70 per cent) were still born, and 3,181 (6.8 per cent) were illegitimate.

**Religion, Instruction, Justice, and Crime.**—In 1910, there were 1,428,343 Catholics, 408,274 Protestants, 3,863 other Christians, 30,483 Jews.

There is a university (at Strassburg see *German Empire*), and in 1910 18 Gymnasien, 3 Progymnasien, 6 higher Realschulen, 11 Realschulen (4 united with gymnasia), 1 agricultural school, 1 technical school, 7 seminaries, 5 preparatory schools for teachers, 68 higher girls schools, 2,852 elementary schools, 73 private elementary schools, 491 infant schools, 49 intermediate schools, 5 institutions for the deaf and dumb, 2 for the blind, 2 for idiots.

There is an Oberlandesgericht (Supreme Court) at Colmar, and six Landgerichte. In 1909, 13,421 persons were convicted of crime.

**Finance.**—Budget estimate for year ending March 31, 1912, 3,681,529 $\frac{1}{2}$ , expenditure ordinary, 3,484,493 $\frac{1}{2}$ , extraordinary, 197,031 $\frac{1}{2}$ , total, 3,681,529 $\frac{1}{2}$ . More than half the revenue from customs and indirect taxes, one of the largest branches of expenditure is for public instruction. Debt of 3 per cent rentes in circulation to the amount of 1,265,022 marks, equivalent, if capitalised, to a debt of 42,167,000 marks.

**Production and Industry.**—Area under principal crops and yield in 1911 (1 hectare = 2.47 acres, 1 metric ton = 2,204 lbs.) —

Crops	Hectares	Metric Tons	Crops	Hectares	Metric Tons
Wheat	137,423	308,369	Potatoes	93,154	670,590
Rye	58,502	82,992	Oats	116,407	175,855
Barley	48,625	93,886	Hay	189,805	303,661

Vineyards, 1911, 28,440 hectares, yield, 164,889 gallons of wine, tobacco, 1910, 1,482.48 hectares, yield, 3,220 tons of dried tobacco, hops, 1911, 3,947 hectares, yield, 3,190 metric tons.

The cotton manufacture is the most important in Germany, woollens are produced on a smaller scale. Mineral products, 1911, 17,754,571 metric

tons of iron ore valued at 2,466,100l, pig iron, 2,908,229 tons (8,810 650l); cast iron products, 70,989 tons (685,100l), sulphuric acid, 32,728 tons (51,500l), coal, 3,083,436 tons (1,636,500l), salt 60,790 tons (80,700l), besides gypsum and limestone.

### ANHALT

(HERZOGTHUM ANHALT)

The reigning Duke is **Friedrich**, born August 19, 1856, son of the late Duke Friedrich of Anhalt and of Princess Antoinette of Saxe-Altenburg. Succeeded at the death of his father, January 24 1904 married, July 2, 1889, to Princess **Marie** of Baden

*Brothers and Sisters of the Duke*—I Princess **Elizabeth**, born September 7 1857 married April 17 1877, to the Grand Duke of Mecklenburg Strélitz II Prince **Edward** born April 19 1861 married February 8, 1895 to Princess Louise of Saxe-Altenburg offspring Princess **Marie** born June 10 1898 Prince **Jochim Ernst** born January 11, 1901, Prince **Eugen** born April 17 1903 III Prince **Albert** born June 18, 1864 married, July 6, 1891 to Princess Louise of Schleswig Holstein the marriage was dissolved December 13 1900 IV Princess **Alexandra** born April 4 1868 married January 25 1887 to the Prince Sizzo of Schwarzburg Rudolstadt

The entailed property belonging to the ducal family is the sole resource of the Duke. Part of it, called 'the select entail, yielding about 600,000 marks, cannot be sold by the Duke without the approbation of the Diet. To the entailed property belong very large private estates in the State and in Prussia embracing an area of nearly 260 square miles

The legislative power is vested in a Diet of 36 members, two appointed by the Duke, eight representatives of landowners who pay the highest taxes, two of the highest taxed inhabitants belonging to the mercantile and industrial classes, fourteen of the other inhabitants of towns, and ten of the rural districts, the representatives being chosen for 6 years by indirect vote. The executive power is entirely in the hands of the Duke, who governs through a Minister of State

Population, 1910 331,128 The capital Dessau, 56,605 inhabitants, Bernburg, 33,724, Cöthen, 23,416, Zerbst, 19,210, Rosslau, 11,354 Population mostly Protestant (1910), 12,765 Catholics, 1,883 Jews.

Estimate income and expenditure, 1912-13, 1,613,791l Public debt, June 30, 1911 276,478l, State property, June, 1911, 1,832,344l.

*Consul General*—H Boyle

## BADEN

(GROSSHERZOGTHUM BADEN)

**Reigning Grand-duke.**—**Friedrich II.**, born July 9, 1847, son of the Grand duke Friedrich I and of the Grand-duchess Luise, Princess of Prussia, succeeded to the throne on the death of his father, September 28, 1907, married, September 20, 1885, to Hilda, daughter of the Grand-duke of Luxemburg, Duke of Nassau.

*Sister of the Grand-duke.*

**Victoria**, born August 7, 1862, married, September 20, 1881, to Crown Prince Gustaf, now King Gustaf V of Sweden.

Till 1771, Baden was a Margraviate divided into two or more lines, it was then united, and subsequently received various additions, and its ruler took the title of Elector in 1803, and of Grand-duke in 1806.

The Grand-duke has a civil list of 78,499*l* (exclusive of the appanages of the other members of the Grand duke's family).

**Constitution.**—The Constitution of Baden vests the executive power in the Grand duke, the legislative authority is shared by him with a representative assembly (Landtag), composed of two Chambers. The Upper Chamber comprises the princess of the reigning family who are of age, the heads of the mediatised families, the Roman Catholic Archbishop, the prelate of the Protestant Church, elected for 4 years are eight members by the territorial nobility, one representative for each of the two Universities and one for the Technical High School, three of the Chambers of Commerce, two of the Chamber of Agriculture, and one of the Chambers of Trades, two Oberbürgermeister of the towns subject to the municipal law, and one Bürgermeister of one of the other towns (of more than 3,000 inhabitants), one member of one of the District Councils, and (at the most) eight members appointed for 4 years by the Grand-duke, two being high legal functionaries appointed during their term of office. The Second Chamber is composed of 78 representatives, 24 of whom are elected by towns, and 49 by rural districts for 4 years. Every citizen 25 years of age, not convicted of crime, nor receiving parish relief, has a vote. Citizens 30 years of age are eligible. The Chambers must be called together at least once every two years. Members of the First Chamber whose seats are not hereditary, are paid 1,500 marks (75*l.*), of the Second Chamber 3,000 marks (150*l.*), if living at Karlsruhe 1,000 and 2,000 marks (50*l.* or 100*l.*) for the session, with deduction of 15 marks for each day's absence, they travel free of charge on the Baden State Railways during session.

Last election, October, 1909: 26 Centre Party, 17 National Liberals, 20 Socialists, 2 Conservatives, 7 Democrats, 1 Peasants' League.

The executive is composed of four departments—the Ministers of the Interior, of the Grand-ducal House, Justice and Foreign Affairs, of Finance, and of Ecclesiastical Affairs and Instruction.

For general administrative purposes there are 53 'Amtbezirke,' superintended by four general commissioners (Landes-Kommissare). For local government there are 11 circles (Kreise), and 1,595 communes (Gemeinden), 120 communal cities, and 1,475 parishes.

# AREA AND POPULATION—RELIGION, INSTRUCTION 903

## Area and Population.—

District	Area Square miles	Population		Pop. per square mile 1910
		1910	1905	
Konstanz	1,610	325,924	311,318	202.4
Freiburg	1,880	564,590	548,305	308.5
Karlsruhe	998	610,784	587,397	615.1
Mannheim	1,386	641,545	588,708	462.9
Total	5,819	2,142,838	2,010,728	368.2

Including a part of the Lake of Constance, area is 5,889 square miles

Principal towns, 1910 —

Mannheim	193,902	Konstanz	27,591	Lahr	15,191
Karlsruhe	184,813	Baden	22,066	Lörrach	14,756
Freiburg	83,824	Offenburg	16,648	Wamheim	14,170
Pforzheim	69,082	Bruchsal	15,391	Durlach	18,896
Heidelberg	58,016	Rastatt	15,196	Villingen	10,924

Marriages, 1911 15,389, births, 61,645, deaths, 38,014; excess of births, 23,831. Included in the births were 1,598, or 2.58 per cent, still born, and 4,998, or 8.08 per cent, illegitimate children.

**Religion and Instruction** — In 1911 there were 1,278,836 Catholics, 826,364 Protestants, 5,408 other Christian sects, 25,896 Jews, and 6,329 others.

The Grand duke is Protestant, and head of the Protestant Church, which is governed by a synod, and whose affairs are administered by a board (Oberkirchenrat). The Roman Catholic Church has an Archbishop (at Freiburg), whose 4 suffragans are outside the Grand Duchy. State contributions to the Roman Catholic Church, 1912, 25,392; (besides 5,120; dotation of the archbishopric) to the Protestant Church 23,611. To a certain number of 'Old Catholic' parishes, the State contributes yearly 2,118. The Jews have 16 rabbinate, and receive (1912) 1,122.

Instruction is general and compulsory. The elementary schools are maintained by the communes and by the State, and administered by local authorities under the inspection of Government. Public schools in Baden —

	Number	Teaching Staff	Students & Pupils
<i>Universities (summer session 1912)</i>	8	533	4,227
Technical Academy (winter session 1911-12)	1	92	1,576
Academy of Arts (1911-12)	1	16	119
Humboldt-Hochschule (winter session, 1911-12)	1	24	544
Gymnasiums (1910-11)	17	404	5,159
Realgymnasiums, Realprogymnasiums, Oberrealschulen, Realschulen, and höhere Bürgerschulen (1910-11)	49	952	15,948
Higher Schools for Girls (1910-11)	30	812	5,313
Elementary Schools (1908-09)	1,717	7,060	865,546
Normal Schools (1910-11)	12	189	2,368
Technical, Agricultural, and other special schools (1910-11)	260	1,042	32,816

Besides a great number of private middle schools, elementary schools and special schools.

In 1910, 16,581 persons were serviced.

**Finance.**—The Budget is voted for a period of two years. Estimates for 1912.—

Revenue	Marks	Expenditure	Marks
Direct taxes	25,887,150	General debt } Interest and	38 706 040
Indirect taxes	20,701,150	Railway debt } amortisation	
Domains (Crown land) and salt-works	18 281 080	Estimate of building expenses for railways	35 000 000
Justice and Police	9 219 170	Civil list and appanages	1,811 868
Railways (net)	29 860 690	Ministry of State	869,151
Ministry of the Grand-ducal House, of Justice and Foreign Affairs	1 375,885	Ministry of the Grand-ducal House, of Justice and Foreign Affairs	12,028 610
Ministry of Ecclesiastical Affairs and Instruction	4,918,400	Ministry of Ecclesiastical Affairs and Instruction	19 935 543
Ministry of Interior	9 242 245	Ministry of Interior	29 551 890
Finance	8,812 110	Finance	1 127 990
Chamber of Accounts	200	Chamber of Accounts	131 060
		Charges of collection of revenue	21 415 490
		Pensions	9,754 750
		Contributions to German Empire	911,316
Total revenue	184 198 940 (6 709 447.)	Total expenditure	172 853,730 (6 617 687.)

Direct taxes are on property and income, indirect taxes chiefly on wine, beer and meat, registry, duties on succession, on change of possession

There was only a railway debt of 27,143 225/ in 1912

**Production and Industry.**—Of the area 55.6 per cent. is under cultivation, 89.2 per cent forests, 5.2 per cent uncultivated (houses, roads, water, &c.) Arable land 1,389,320 acres, vineyards 89,192, chestnut plantations 1,284, meadows 528,110, pastures 103,938, and forests 1,460,709 acres (of which 251,150 belong to the State, 651,586 to the communes, 50,363 to other bodies, and 597,610 to private persons)

Area in acres and yield in metric tons (2,204 lbs) in 1911 —

Crops	Area	Yield	Crops	Area	Yield
	Acres	Tons		Acres	Tons
Wheat	103,480	80,550	Spelt	97,020	74,080
Rye	119,450	78,530	Potatoes	217,530	671,760
Summer barley	188,880	102 030	Hay	836,100	1,292,660
Oats	188,860	128,820	Tobacco	19,820	10,810
			Hops	2,570	980

Vines 28,530 acres, yield 8,028,020 gallons of wine, beetroot, turnips, hemp, and chicory are also grown. Mineral produce almost solely salt and building-stone.

**Principal manufactures.** Tiles, jewellery machinery, clocks, musical instruments, chemicals, silk ribbons, cotton tinsnes, felt and straw hats, paper and cardboard, leather, wood work, brushes, and cigars

In 1911 there were 862 strikes and lock-outs, affecting 81,353 working men, the highest number of strikers at the same time, 13,511, 9 strikes were completely, and 19 partially, successful.

**Communications.**—Mannheim is at the head of regular Rhine navigation, 1911, arrival 4,335,734 tons, departure 682,223 tons. The capital

invested by the State in railways is 42,700,000/. At the end of 1911 there were 1,276 miles of railway (normal gauge lines) in operation with 466 stations.

*British Chargé d'Affaires at Carlsruhe*—Lord Acton, M V O

*Consul*—Dr Paul Ladenburg (Mannheim)

## BAVARIA.

(KÖNIGREICH BAYERN)

**Reigning King**—Otto Wilhelm Luitpold born April 27, 1848 succeeded his brother, Ludwig II., on June 13 1886

**Regent.**—Prince Ludwig (See below).

### Cousins of the King

I Prince Ludwig born January 7 1846 became Regent in succession to his father Prince Luitpold, who died Dec 12 1912 married February 20, 1868 to Archduchess, Maria Theresa of Austria-Este of the branch of Modena born July 2 1849 of which marriage there are nine children —1 Prince Rupprecht born May 18 1869 married July 10 1900 to Marie Gabriele daughter of Duke Karl in Bavaria offspring Prince Luitpold born May 8 1901 Prince Albrecht, born May 3 1905 2 Princess Adelgunda born October 17 1870 3 Princess Marie born July 6 1872 married May 31, 1897 to Prince Ferdinand of Bourbon 4 Prince Karl, born April 1 1874 5 Prince Franz born October 10 1875 married, July 8 1912 to Princess Isabella von Croy daughter of Duke Karl von Croy 6 Princess Hildegard, born March 5 1881 7 Princess Wiltrud, born November 10, 1884 8 Princess Helmutrud, born March 22 1886 9 Princess Gundelinde born August 26 1891

II Prince Leopold born February 9 1846 brother of the Prince Regent married April 20 1873 to Archduchess Gisela of Austria-Hungary eldest daughter of the Emperor King Franz Joseph I Offspring of the union are —1 Princess Elisabeth born January 8 1874 married December 3 1893 to Count von Seefeldt 2 Princess Augusta, born April 28, 1875, married November 15 1898 to Archduke Joseph Augustus of Austria. 3 Prince George, born April 2, 1890 married February 10, 1912, to Archduchess Isabella Maria, daughter of the Archduke Frederick of Austria. 4 Prince Konrad born November 23, 1898.

III Theresa, born November 12, 1870 sister of the Prince Regent abbess of the chapter royal of St. Anne at Munich.

A nephew of the Regent is Prince Heinrich, born June 24, 1884 son of Prince Arnulf who died November 18, 1907

The members of the royal house of Bavaria are descendants of the ancient Counts of Wittelsbach who flourished in the twelfth century Duke Maximilian I of Bavaria was elevated to the rank of Elector of the Holy Roman Empire in the Thirty Years War and Elector Maximilian Joseph was raised to the rank of king by Napoleon I in 1806

The civil list of the King and allowances to other members of the royal family are fixed at present at 5 402 475 marks.

**Constitution and Government.**—The Crown is hereditary in the male line To the king belongs the sole executive power, but his ministers are responsible for all his acts. The legislative functions are exercised jointly by the king and Parliament, the latter consisting of an Upper and

a Lower House. The Upper House—Chamber of 'Reichsräte,' or councillors of the realm—consists at present of 18 royal princes, 2 crown dignitaries, the 2 archbishops, the heads of 17 mediatised houses, and 32 other hereditary 'Reichsräte,' a Roman Catholic bishop, the president of the Protestant Oberconsistorium, and 18 life-members appointed by the Crown. The number of life-members so appointed must not exceed one-third of the hereditary councillors. According to the law of April 6, 1906, the election of deputies is direct and secret. Entitled to vote is every citizen who has completed his 25th year, has been a citizen, and has for at least a year paid a direct tax. Eligible as a deputy is every citizen entitled to vote unless there are definite grounds for his exclusion. The number of deputies is fixed at 168, calculated at the average rate of 1 for every 38,000 inhabitants. Deputies are elected for 6 years. They receive 180*l.* for a regular session (in which the budget is presented), and 15*l.* a day during an extraordinary session, and are entitled during session, and for 8 days before and 8 days after, to travel free over the State railways. Members of the Upper House are unpaid, but have free railway passes.

The executive is carried on, in the name of the king, by a 'Staatsrat,' or Council of State, consisting of nine members, besides the Ministers and one prince of the blood royal, and by the Ministry as a whole, made up of seven departments, namely, of the Royal House and of Foreign Affairs, of Justice, of the Interior, of Education and Ecclesiastical Affairs, of Finance, of Communications, and of War.

#### Area and Population —

Regierungsbezirke	Area, Sq. miles	Population		Pop. per sq. mile 1910
		1910	1905	
Upper Bavaria (Oberbayern)	6,686	1,532,065	1,414,224	229.1
Lower Bavaria (Niederbayern)	4,293	724,331	707,367	168.5
Palatinate (Rheinpfalz)	2,372	937,085	885,833	352.8
Upper Palatinate (Oberpfalz)	3,882	600,234	574,898	155.5
Upper Franconia (Oberfranken)	2,798	661,862	637,709	200.8
Middle Franconia (Mittelfranken)	3,036	980,868	868,846	306.9
Lower Franconia (Unterfranken)	3,360	710,943	682,532	211.8
Swabia (Schwaben)	3,934	789,853	753,177	200.7
Total	30,346	6,887,291	6,524,372	226.9

To the area has to be added 257 square miles for water.

The total population at the end of 1910 was 6,887,291 (3,379,530 males and 3,507,711 females).

The increase of the population since 1880 has been as follows —

Year	Population	Population per sq. mile	Annual increase per cent.
1885	5,420,199	185.1	0.51
1890	5,594,932	191.0	0.83
1895	5,813,544	198.7	0.78
1900	6,174,657	210.9	1.22
1905	6,524,372	222.3	1.13
1910	6,887,291	229.9	1.19

## Urban and rural population at the censuses of 1905 and 1910 —

Censuses	No. of Towns	No. of Rural Communes	Towns, &c. with 2,000 inhabitants and over			Communes, &c. with less than 2,000 inhabitants		
			No.	Population	Per cent. of pop.	No.	Population	Per cent. of pop.
1905	255	7,789	804	2,761,647	42.3	7,668	2,782,785	57.7
1910	255	7,720	834	3,079,023	44.7	7,660	3,808,969	55.3

In 1910 the urban population was thus distributed —

	No.	Population 1910		No.	Population 1910
Large towns <sup>1</sup>	8	1,052,624	Small towns	57	505,951
Medium „	19	741,989	Country „	176	397,992

<sup>1</sup> See under *German Empire* for official signification of these terms.

## Conjugal condition, 1910 and 1905 —

	Total (1910)	Males (1910)	Females (1910)	Total (1905)
Unmarried	4,169,138	2,102,941	2,066,197	3,965,758
Married	2,832,648	1,165,334	1,168,314	2,188,894
Widowed	374,918	107,820	267,598	381,675
Divorced and separated	8,997	3,487	5,510	7,482

For occupations see *German Empire*. In 1910 the number of foreigners in Bavaria (exclusive of other Germans) was 134,122 (British, 1,064)

## Natural movement of the population —

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1908	50,442	232,397	6,447	28,534	146,179	86,218
1909	48,774	227,226	6,265	28,017	143,225	84,001
1910	49,464	221,528	5,988	26,921	136,846	84,682
1911	50,888	215,208	5,760	26,465	141,547	73,656

## Principal towns, 1910 —

Towns	Dec. 1, 1910	Towns	Dec. 1, 1910
Munich (München)	596,467	Hof	41,126
Nuremberg (Nürnberg)	333,142	Pirmasens	38,463
Augsburg	102,487	Bayreuth	34,547
Würzburg	84,496	Aschaffenburg	29,893
Ludwigshafen a. Rh.	83,801	Amberg	25,242
Fürth	66,553	Landshut	25,187
Kaiserslautern	54,659	Erlangen	34,877
Regensburg (Regensburg)	52,024	Ingolstadt	23,745
Bamberg	45,063	Speyer	23,045

The populations of the two largest towns, Munich and Nuremberg, were calculated at the end of 1910 to be approximately 590,816 and 334,768 respectively

**Religion.**—Religious division of the population, December 1, 1910 —

Provinces	Roman Catholics	Protestants	Jews
Upper Bavaria	1,385,047	114,494	11,652
Lower Bavaria	718,435	7,037	468
Palatinate (Rheinpfalz)	414,955	508,851	8,998
Upper Palatinate	549,960	48,404	1,395
Upper Franconia	282,999	874,967	2,946
Middle Franconia	251,458	669,502	14,219
Lower Franconia	571,827	126,128	11,925
Swabia	679,552	105,202	3,462
<b>Total</b>	<b>4,862,233</b>	<b>1,942,385</b>	<b>55,066</b>

Besides the above there are included in other Christian sects 5,916 Old Catholics, 8,017 Mennonites, 164 Anglican, 1611 Greek Catholics and Russian Orthodox, 1,189 Irvingites, 25 Anabaptists, 1,833 Methodists, 5,841 Free Christians, 1,049 other Christians, 1,870 of religion not Christian, 4,240 of religion not stated or without religion, 908 of religion not ascertainable.

There are 2 Roman Catholic archbishoprics, those of Munich and Bamberg each with 3 suffragan bishoprics, 218 deaneries, and 3,603 parishes. The Protestant Church is under a General Consistory—Ober-Consistorium—and three provincial consistories, 81 deaneries, and 1,049 parishes. Of the three universities of the kingdom, two, at Munich and Würzburg, are Roman Catholic, and one at Erlangen Protestant.

**Instruction.**—(For Universities, see under *Germany*) Education compulsory from six to sixteen. In 1910-11 there were 7,600 elementary schools (public and private), with 18,852 teachers (18,521 male, 4,831 female), and 1,045,806 pupils. The year's expenditure on the public schools (7,566) was 3,099,455. There were 333 agricultural schools, with 6,841 pupils, besides 411 winter schools, with 1,820 pupils.

**Justice, Crime, and Pauperism.**—Bavaria is the only German State with an *Oberstes Landesgericht* or appeal court intervening between the *Oberlandesgerichte* and the *Reichsgericht*, it has a bench of 22 judges. Under it are 5 *Oberlandesgerichte*, 28 *Landgerichte* and 266 *Amtsgerichte*. The number of judges was (1911) 1,888. In 1910, 85,021 criminals were convicted.

In 1909, poor receiving relief 285,269 (128,863 permanent paupers), the sum expended of the ordinary budget, 690,605.

**Finance.**—The Bavarian budget is voted for a period of two years. The estimates of the ordinary budget for each of the years 1910 and 1911 balanced at 31,807,430. For 1912 and 1913 the estimates were —

Sources of Revenue	£	Branches of Expenditure	£
Direct taxes	3,185,000	Public debt	847,427
Stamps, fines, &c.	1,704,655	Civil list and appanages	270,123
Indirect taxes	3,490,798	Diet	25,255
State railways, posts, tele- graphs, mines &c.	20,423,945	Foreign Affairs	99,420
State domains	244,511	Communications	2,595
Various	8,878,296	Justice	1,822,351
Imperial repayments	879,506	Interior	2,050,674
		Finance	746,510
		Worship and Education	2,512,550
		Pensions and allowances	1,066,000
		Contributions to Imperial expenditure	2,417,443
		Administration	22,279,608
		Reserve fund	56,825
<b>Total gross revenue</b>	<b>33,510,700</b>	<b>Total expenditure</b>	<b>33,510,700</b>

Since January 1, 1912, the direct taxes are income tax, trade tax, house-tax and land tax. The estimates of the extraordinary budget for each of the years 1912 and 1913 balanced at 3,120,1631.

Debt, December 31, 1910, 118,887,9021, 94,802,1941 being railway debt. Gross receipts from the State railways (estimates for 1912 and 1913), 15,416,6401, net receipts, 1,500,0001.

**Army**—The Bavarian army, though forming an integral part of the German army, is in time of peace under the command of the King of Bavaria, and has its own administration. The military supplies, though voted by the Bavarian Parliament, must bear a fixed proportion to the amount voted for the rest of Germany by the Reichstag. The Bavarian troops form the 1st, 2nd, and 3rd Bavarian army corps, not numbered consecutively with the other German army corps, and there are certain differences in the matter of uniform permitted to the Bavarian troops. The administration of the fortresses in Bavaria is also in the hands of the Bavarian Government during peace.

The peace strength of the Bavarian army is between 72,000 and 78,000 men.

**Production and Industry**—Of the total area, nearly one half is under cultivation, one sixth under grass, and one third under forests.

The areas under the chief crops, and the yield in 1911, were as follows —

	Area, acres	Metric Tons		Area, acres	Metric Tons
Wheat	717,652	431,397	Oats	1,280,507	741,151
Rye	1,376,387	764,862	Potatoes	924,370	2,510,811
Summer barley	928,700	671,269	Hay	3,193,180	4,628,076

Vines, 51,425 acres, yielding 15,607,242 gallons, 43,487 acres under hops yielded 4,800 metric tons.

In 1911 the output of coal was 2,311,637 metric tons, iron ore, 375,409 tons, pig iron, 166,684 tons, cast iron wares, 171,977 tons, sulphuric acid, 170,089 tons.

The quantity of beer brewed in 1911 was 432,116,080 gallons. In 1910-11, the distilleries produced 3,579,796 gallons of alcohol.

Strikes and lockouts in 1910 and 1911 —

	Number	Workmen affected	Results		
			Entirely successful	Partially successful	Unsuccessful
Strikes (1910)	260	18,068	66	131	63
(1911)	266	19,489	68	105	92
Lockouts (1910)	78	19,712	7	67	19
(1911)	18	5,325	8	2	8

## BREMEN

(FREIE HANSESTADT BREMEN)

The State and Free City of Bremen form a republic, governed, under a Constitution proclaimed March 5, 1849, and subsequently revised by a Senate of sixteen members, chosen for life, forming the executive, and the 'Bürgerschaft' (or Convent of Burgesses) of 150 members, invested with the power of legislation. The Convent is elected for six years by the votes of all the citizens, divided into classes. University men return 14 members, the merchants 40 members, the mechanics and manufacturers 20 members, and the other inhabitants who have taken the burgher oath the rest. The Convent and Senate elect the sixteen members of the Senate, ten of whom at least must be lawyers, and three merchants. Two burgomasters, elected for four years, direct the affairs of the Senate, through a Ministry divided into twelve departments—namely, Foreign Affairs, Church and Education, Justice, Finance, Police, Medical and Sanitary Administration, Military Affairs, Commerce and Shipping, Ports and Railways, Public Works, Industry, and Poor Laws. All the ministers are senators.

Area, 99 square miles, population census (1910), 295,715 (1911), 305,734.

On Dec. 1, 1910, Bremen contained 257,980 Protestants (87·2 per cent.), 21,074 Roman Catholics (7·1 per cent.), 1,217 other Christians, 1,251 Jews; others 14,248. Marriages in 1911 2,609, births, 7,932, deaths 4,670, excess of births, 3,262, still-births, 220, illegitimate births, 804.

Bremen contains two Amtsgerichte and a Landgericht, whence appeals lie to the 'Hanseatische Oberlandesgericht' at Hamburg.

In 1911/12 the revenue was 2,498,776*l.*, and expenditure 3,027,448*l.* Thirty-six per cent. of the revenue is raised from direct taxes, 68 per cent. of which is income-tax. The chief expenditure is for interest and reduction of the public debt. Debt, 1912, 15,080,805*l.*, the whole incurred for the promotion of commerce and navigation, and for public works.

Next to Hamburg, Bremen is the largest port for the international trade of Germany. Seventy-six per cent. of the commerce was, in 1911, under the German, and about 9 per cent. under the British flag. Aggregate value of imports, 1911, 196,236,460*l.*, of which 3,810,320*l.* were from Great Britain, exports, 103,390,690*l.*, of which 7,543,670*l.* went to Great Britain.

For shipping entered and cleared, see under 'German Empire.' Merchant vessels belonging to Bremen December 31, 1911, 713 of 898,767 tons net register, including 478 steamers of 754,258 tons. Bremen has several important shipping companies, the chief of which are the 'Norddeutscher Lloyd' with, on December 31, 1911, 253 sea-going ships of 718,549 gross register tons, 81 of which are Transatlantic steamers of 808,553 tons; 49 Indo-Chinese coast-steamers of 71,725 tons and 2 training-ships of 5,833 tons, the 'Hansa' Company, with 73 ships of 257,072 tons, the 'Neptun Company' with 72 steamers of 51,653 tons, the 'Argo' Company with 31 ships of 48,033 tons, the 'Roland Line' with 11 steamers of 54,490 tons, the 'Hamburg Bräuer Afrika Line' with 14 steamers of 39,233 tons, and the 'Rickmers Reismühlen, Reederei u. Schiffbau, Aktien-Gesellschaft' (1911), with 30 steamers of 74,143 tons.

Total number of emigrants who embarked at Bremen, 1910 157,896, 1911, 115,644 Of these, 681 in 1910, and 1,577 in 1911 embarked for the United Kingdom

Railways, 31 miles, owned and worked by the State

British Consul-General.—Walter R. Hearn (Hamburg)

British Consul at Bremen.—Christian Mosle. There is a Vice Consul at Bremerhaven

## BRUNSWICK

(HERZOGTHUM BRAUNSCHWEIG)

The last Duke of Brunswick was Wilhelm I., born April 23, 1806, the second son of Duke Friedrich Wilhelm and of Princess Marie of Baden, ascended the throne April 25, 1831, and died October 18, 1884.

The heir to Brunswick is the Duke of Cumberland, excluded owing to the refusal to give up claim to the throne of Hanover. On the death of the late Regent, Prince Albert of Prussia, September 13, 1906, it was proposed that the Duke of Cumberland having for himself and his eldest son renounced the right to succeed, his second son should be called to the throne. On February 28, 1907, the Brunswick Diet adopted the proposals of the Constitutional Commission which were unfavourable to the proposed compromise. On May 28, 1907, Johann Albrecht, Duke of Mecklenburg, was elected as regent. He accepted the regency on June 5 1907. Married December 12, 1909, to the Princess Elizabeth of Stolberg-Rossla.

The Brunswick regency law of February 16, 1873, enacts that in case the legitimate heir to the Brunswick throne be absent or prevented from assuming the government, a Council of Regency, consisting of the Ministers of State and the Presidents of the Landtag and of the Supreme Court, should carry on the government; while the German Emperor should assume command of the military forces in the Duchy. If the rightful heir, after the space of a year, is unable to claim the throne, the Brunswick Landtag shall elect a regent from the non-reigning members of German reigning families.

The legislative power is vested in one Chamber, consisting of forty-eight members. Of these are elected for four years fifteen by the inhabitants of towns, fifteen by those of rural districts, two by the Protestant clergy, four by the landlords, three by the industrial classes, four by the scientific professions, five by those who are highest taxed for income. The Chamber meets every two years. The executive is represented by a responsible Ministry of

State, consisting at present of three departments, namely—of State, Foreign Affairs and Finance, of Justice and Ecclesiastical Affairs and of the Interior.

Area, 1,418 square miles, population (1910), 494,339. There were only 25,888 Catholics in 1910. Marriages, 1911, 4,123, births, 12,281, deaths, 8,426, excess of births, 3,865, still births, 415 illegitimate births, 1,407.

The capital, Brunswick (Braunschweig), had 143,552 inhabitants, 1910.

The budget is voted by the Chamber for the period of two years, but each year separately. It is in two parts, the first, Staatshaushalts Etat, comprehends the particular expenditure of the State, the other, Kloster und Studienfonds-Etat, principally the expenditure for schools, arts and sciences. For the year from April 1, 1912, to April 1, 1913, the budget of the Staatshaushalt is fixed at 788,220*l* revenue and 748,075*l* expenditure. The revenue and expenditure of the Kloster und Studienfonds-Etat are put at 219,320*l*. Not included in the budget estimates is the civil list of the Duke—55,266*l*. The public debt of the Duchy, exclusive of a premium loan repayable by 60,990*l* yearly till 1924, on August 31, 1912, was 1,481,093*l*, three-fifths of which were contracted for railways. The property of the State consists chiefly of domains and forests and of active funds amounting to about 1,862,200*l*. in 1912, besides an annuity of 131,250*l* till 1932, stipulated at the sale of the railways of the State.

*British Minister Plenipotentiary*—Right Hon Sir W. E. Goschen, G. C. V. O., K. C. M. G.

*Consul-General*—Walter R. Hearn (Hamburg).

## HAMBURG

(FREIE UND HANSE-STADT HAMBURG)

**Constitution.**—The State and Free City of Hamburg is a republic. The present Constitution came into force on January 1, 1861, revised 1879 and 1906. The Government is entrusted, in common, to two Chambers of Representatives, the Senate and the Bürgerschaft, or House of Burgesses. The Senate, which exercises chiefly, but not entirely, the executive power, is composed of eighteen members, one half of whom must have studied law or finance, while seven out of the remainder must be merchants. The members of the Senate are elected for life by the House of Burgesses, but a senator may retire at the end of six years. A first and second burgomaster, chosen annually by ballot, preside over the Senate. No burgomaster can be in office longer than two years, and no member of the Senate may hold any other public office. The House of Burgesses consists of 160 members, 80 of whom are elected by ballot by all tax paying citizens. Of the remainder, 40 are chosen, by ballot, by the owners of house-property, while the other 40 are chosen, by ballot, by burgesses who are or have been members of the Senate or of the House of Burgesses or members of various guilds, corporations, and courts of justice. All the members of the House of Burgesses are chosen for six years, in such a manner that every three years new elections take place for

one half the number. The House of Burgeses has in permanence a Committee of the House, consisting of 20 deputies, of whom no more than five may be members of the legal profession. The Committee watches the proceedings of the Senate and the general execution of the articles of the Constitution. In all matters of legislation, except taxation, the Senate has a veto, and, in case of a constitutional conflict, recourse is had to an assembly of arbitrators, chosen in equal parts from the Senate and the House of Burgeses also to the Supreme Court of Judicature of the Empire (Reichsgericht) at Leipzig.

The jurisdiction of the Free Port was, on January 1, 1882, restricted to the city and port, and on October 15, 1888, the whole of the city, except the actual port and the warehouses connected with it (population 1 729 in 1910), was incorporated in the Zollverein. This involved an expenditure of six millions sterling, to which the Imperial Government contributes two millions.

**Area and Population.**—Area, 160 English square miles, population on December 1, 1880 of 453,869, December 1, 1910, 1 014,864. The State consists of two divisions, the population of each of which was as follows on November 1, 1911.—City of Hamburg, 958,079, Landgebiet (4 Landherrenschaften), 85,860. There were on December 1, 1910 28,675 foreigners—9 920 Austrians, 2,481 Swedish and Norwegians, 3,776 Danes, 2,277 British, 7,921 other Europeans, 1,776 non Europeans, and 526 unclassified.

Emigration via Hamburg for five years —

Year	From Hamburg itself	Other Germans	Foreigners	Total	Bound for the United States	For other Destinations
1907	761	8 489	146,782	155,962	147,285	8,747
1908	529	6 071	41,995	48 595	37,442	11,153
1909	502	5 851	107,182	113,535	98 322	15,213
1910	639	6,857	110 635	118,181	103,077	15 054
1911	612	5,895	80,388	86,895	67,528	19,367

Marriages (1911), 9,007 births, 23,414 (800, or 3.42 per cent, still born, 3,188, or 13.62 per cent, illegitimate), deaths, 15,040, surplus of births, 7,574.

**Religion, Instruction, and Justice.**—On December 1, 1910, 980,071 Protestants (91.66 per cent.), 51,036 Roman Catholics (5.08 per cent.), 3,942 other Christians (0.39 per cent.), 19,472 Jews (1.92 per cent.), and 10,143 'all other' (1.00 per cent.).

In the year ending March, 1912, Hamburg (State) had 244 public elementary schools with 8,858 teachers (2 334 male, 1,522 female), and 120,740 pupils, cost for the year, 16,333,896 marks, of which 18,151,754 marks was provided by the State, 19 higher State schools with 11,662 pupils and 77 private schools with 12,770 pupils.

The State contains three Amtsgerichte, a Landgericht, and the "Hanseatische Oberlandesgericht," or court of appeal for the Hanse Towns and the Principality of Lübeck (Oldenburg). In 1910, 9,814 and 1911, 9,072 persons, in the State of Hamburg, were convicted of crime.

**Finance.**—For 1912 the ordinary revenue was estimated at 10,198,875*l.*, and expenditure 10,198,875*l.* Direct taxes amount to nearly half of the whole revenue, and next to that the proceeds of domains, quays, railways, &c. Expenditure for the debt, 1,716,555*l.* in 1912 for education, 1,158,112*l.* The Income Tax amounts to 2*l.* 2*s.* per head of population.

Public debt, January 1, 1912, 769,451,839 marks (88,472,591*l.*), incurred chiefly for public works.

**Commerce and Shipping.**—Hamburg is the principal seaport in Germany. Value of imports and exports by sea. —

## HESSK

(GROSSHERZOGTHUM HESSEN)

Reigning Grand Duke —Ernst Ludwig, born November 25, 1868, the son of Grand duke Ludwig IV. and of Princess Alice of Great Britain and Ireland, succeeded at the death of his father, March 13, 1892. Married, first, April 19, 1894, to Princess Victoria, born November 25, 1876, the daughter of Duke Alfred of Saxe Coburg and Gotha. The marriage was dissolved December 21, 1901. Married, secondly, February 2, 1905, to Princess Elenore of Solms Hohensohlms Lich, born September 17, 1871, offspring Georg, born November 8, 1906. Ludwig, born November 20, 1893.

Sisters of the Grand Duke —Victoria born April 5 1868 married to Prince Ludwig of Battenberg, April 30 1884. II. Elisabeth, born November 1 1864, married to the Grand Duke Sergius Alexandrovitch of Russia, June 15, 1884 widow February 17, 1905 III. Irene, born July 11, 1866, married to Prince Heinrich of Prussia, May 24 1888. IV. Anna, born June 6 1873 married (as Alexandra Feodorovna) to Nicholas II. Emperor of Russia, November 26, 1894.

Children of Prince Alexander uncle of the late Grand Duke Ludwig IV. (died Dec. 13, 1883), and Princess Julia von Battenberg, born Nov. 12, 1835 (died Sept. 18, 1896), are I. Marie, born July 15 1853 married April 29, 1871 to the Prince and Count Gustaf von Erbach-Schönberg, widow Jan. 20, 1908. 2. Ludwig born May 24, 1854, commander in the British navy married to Princess Victoria of Hesse, April 30 1884, offspring Alice, born February 25, 1885 married to Prince Andrew of Greece, October 7 1903. Louise, born July 13, 1869. George, born Nov. 6, 1869. Ludwig, born June 25, 1900. 3. Emma Josef, born September 24 1861 married to Princess Anna of Montenegro, May 5, 1897

<sup>1</sup> Alexander, Prince of Bulgaria, 1879-80, afterwards Count Hattenau, died Nov. 16 1898, and Henry married to Princess Beatrice of Great Britain, died January 20 1909.

The former Landgraves of Hesse had the title of Grand-duke given them by Napoleon I. in 1806, together with a considerable increase of territory. At the Congress of Vienna this grant was confirmed, after some negotiations. The reigning family are not possessed of much private property but dependent almost entirely upon the grant of the civil list, amounting to 1,266,000 marks.

**Constitution**—The Constitution bears date December 17, 1820, but was modified in 1856, 1862, 1872, 1900 and 1911. The legislative power is vested in two Chambers, the first composed of the princes of the reigning family, the heads of a number of mediatised houses, the Roman Catholic bishop, the chief Protestant superintendent, a representative of the University, one of the Technische Hochschule, two members elected by the noble landowners, and twelve life members, nominated by the Grand duke, as well as one representative of commerce, agriculture and industry respectively, while the second consists of fifteen deputies of the towns that have a special franchise, and forty three representatives of the smaller towns and rural districts. Electors are Hessians above twenty five years of age who pay direct taxes. Elections are direct and the voting is by ballot. The members of the Second Chamber are elected for six years one half of the number retiring every three years. The Chambers must meet every year. Members not hereditary of both Chambers who reside more than  $1\frac{1}{4}$  mile from the place of meeting receive an allowance of 9s a day and 3s for each night, and travelling expenses.

The executive is represented by a ministry of State, divided into three departments, namely, of the Interior, of Justice and of Finance. The minister of state is also minister of the Grand-ducal House and Foreign Affairs, and head of the department of Justice.

For administrative purposes, the Grand duchy is divided into three provinces, eighteen circles (Kreise), and 983 communes (Gemeinden).

### Area and Population.

Provinces	Sq. Miles	Population			Pop per sq mile 1910
		1900	1905	1910	
Starkenburg	1 160	488 588	542 096	590 880	505.0
Upper Hesse (Oberhessen)	1 900	282 047	296 753	309 283	248.7
Rhenish Hesse (Rhein Hessen)	530	848 824	869 424	882 428	791.6
Total	2,066	1 118,970	1,269 175	1,282,591	482.0

There were 689,198 males and 642,853 females in 1910. Increase from 1905 to 1910 was at the rate of 1.20 per cent. per annum.

The largest towns are Mayence or Mainz (including Mombach and Kastel), with 110,634, Darmstadt, the capital, 87,089 (including Besungen), Offenbach (including Bürgel), 76,583, Worms 46,819 (including Hochheim, Neuhausen und Pfaffigheim), Gießen, 31,153 inhabitants, 1910.

**Religion and Instruction.**—At the census of 1910 there were 848,004 Protestants, 397,549 Catholics, 6,707 of other Christian sects, 24,663 Jews, and 5,728 unclassified, or of no religion. The Grand-duke is head of the Protestant Church, which is governed by a synod, and whose affairs are administered by a consistory (Oberkonsistorium). The Roman Catholic Church has a Bishop (at Mainz). The State contribution to the Protestant

Church in 1912 was 319,000 marks (15 500*l*) to the Catholic Church, 171 372 marks (8,586*l*)

**Instruction is compulsory** The elementary schools are maintained by the communes, but with contributions by the State. There are 986 public elementary schools with (1912) 3,417 masters, 569 mistresses, and 213,628 pupils. Continuation schools (Fortbildungsschulen) winter 1911-12, 27 344 pupils. Hesse has 11 gymnasia, 2 progymnasia, 3 realgymnasia, 9 oberrealschulen, 9 realschulen, 1 Agricultural College (Landwirtschaftsschule), and 32 incomplete realschulen (höhere Bürgerschulen), with (1911) 709 teachers and a total attendance of 12 737 6 higher girls schools with (1912) 3 391 pupils and 46 private schools with (1912) 8,645 pupils. The University at Giessen had 1 350 matriculated students, and a Technical High School at Darmstadt, with 1,384 students in 1912. There are many industrial technical, agricultural and other special institutes.

In 1910 there were 8,115 persons convicted of criminal offences in the Grand Duchy.

**Finance.**—The ordinary revenue and expenditure were estimated for the year 1912 to balance at 4,009 962*l*

Direct taxes are income tax and property tax (only to be considered as a supplementary tax) the direct taxes paid to the communes are an income-tax, land tax, trade tax, and rent tax, the indirect taxes are chiefly a stamp-tax dog tax, duties on successions, &c. Public debt 21,796,596*l* 1912 nearly all railway debt.

**Production and Industry**—Of the area, 63.4 per cent. is under cultivation, 31.5 per cent. forests, 5.1 per cent. uncultivated (houses, roads, water, &c.) Arable land occupies 916,938 acres meadows and pastures, 249,964 vineyards, 36 865, and forests, 596,804 acres, of the latter 180 169 belong to the State, 222 754 to the communes, 7 931 to other bodies, and 191,674 to private persons.

Areas and yield of chief crops 1911 (1 hectare = 2.47 acres 1 metric ton = 2,204 lbs.) —

Crops, 1910	Area	Yield	Crops	Area	Yield
	Acre	Tons		Acre	Tons
Rye	175 479	143,209	Potatoes	169 635	639,248
Wheat	77 242	63,268	Oats	143,621	124 547
Summer barley	123,423	118,406	Hay	231,602	388,125

81,861 acres under vines, yielding 8 527,750 gallons of wine to the value of 1 173,778*l*

Domestic animals, December 2, 1907 —Horses, 61,951, cattle, 332 489 sheep 64,648 swine, 384,815, goats, 131,660

Minerals to the value of 193,769*l*, and salt of 34 036*l* were raised in 1910. The principal manufactures are leather, cloth, paper, chemicals, furniture, wagons, railway cars and carriages, machinery, musical instruments, tobacco and cigars, sparkling wine.

## LIPPE.

## (FÜRSTENTUM LIPPE.)

Reigning Prince, **Leopold IV**, born May 30, 1871, son of the late Count Ernst of Lippe Biesterfeld, and Carola, Countess of Wartensleben, married August 16, 1901, to Princess Bertha of Hessen Philippsthal Barchfeld, offspring Ernst, born June 12, 1902. Leopold Bernhard, born May 19, 1904, Karoline, born August 4, 1905. Count Leopold assumed the Regency in succession to his father, September 27, 1904, but the right of succession was claimed by Prince Georg of Schaumburg Lippe, and the dispute was settled by a judicial court at Leipzig on October 25, 1905.

The succession fell to the Lippe Biesterfeld branch of the house of Lippe on the death of Prince Karl Alexander, January 13, 1906. For the expenses of the court, &c., are allotted the revenues arising from the Domanium (farms, forests, &c.), which, according to the covenant of June 24, 1868, are indivisible and inalienable entail estate of the Prince's house, the usufruct and administration of which belong to the reigning Prince. By the law of March 24, 1898, the Regent draws all the revenues from the domanium, and therefrom makes annual payments to the Landkasse.

A charter of rights was granted to Lippe by decree of July 6, 1836, partly replaced by the electoral law of June 3, 1876, according to which the Diet is composed of twenty-one members, who are elected in three divisions determined by the scale of the rates. The discussions are public. To the Chamber belongs the right of taking part in legislation and the levying of taxes, otherwise its functions are consultative. A minister presides over the government.

Except 5,925 Catholics and 780 Jews (1910), the people are Protestants. Marriages, 1911, 1,261, births, 4,383, deaths, 2,400, stillborn, 148, illegitimate, 196. The Capital, Detmold, has 14,298 inhabitants (1910). Area 469 square miles, population 1910, 150,937.

For 1912-1913 the revenue was estimated at 122,492, and expenditure at 125,613. Public debt in 1912, 63,919.

## LÜBECK.

(FREIE UND HANSE-STADT LÜBECK.)

The free city and State of Lübeck form a Republic, governed according to a Constitution proclaimed December 30 1848, since revised up to July 17, 1907. There are two representative bodies—the Senate, exercising the executive, and the *Bürgerschaft*, or House of Burgesses, exercising, together with the Senate, the legislative authority. The Senate is composed of fourteen members, elected for life, and presided over by one burgomaster, who holds office for two years. There are 120 members in the House of Burgesses, chosen by all citizens of the town. A committee of thirty burgesses, presided over by a chairman elected for one year, has the duty of representing the legislative assembly in the intervals of the ordinary sessions, and of carrying on all active business. The government is in the hands of the Senate, but the House of Burgesses has the right of initiative in all measures relative to the public expenditure, foreign treaties, and general legislation. To the passing of every new law the sanction of the Senate and the House of Burgesses is required.

The city of Lübeck had (1910) 116,599 inhabitants. Marriages in the State (1911) 868, births, 2,768, deaths, 1,825, excess of births, 944, there were 308 illegitimate births, and 65 stillbirths.

On December 1, 1910, Protestants numbered 111,543, Roman Catholics 3,802, other Christians 276, Jews 623, and 'unclassified' 189. Education is compulsory between the ages of 6 and 14. There are (1912) 28 elementary schools (9 for boys, 9 for girls, 10 for either sex) with 11,209 pupils, for boys 1 gymnasium (650 pupils), 1 real gymnasium (612 pupils), 1 real school (586 pupils), 1 private higher school (433 pupils), and 2 public middle schools (1,846 pupils), for girls there are 1 public high school (568 pupils), 2 private high schools, 1 private middle school (708 pupils) and 2 public middle schools (1,865 pupils). There are also a public technical school for apprentices, 1 architectural school, 1 naval school, 1 school for engineers of steamers, 1 public and 1 private commercial school, and 1 private technical school for women. Lübeck contains an *Amtegericht* and a *Landgericht*, whence the appeal lies to the 'Hanseatisches Oberlandesgericht' at Hamburg. In 1907, 601, 1908 1,006, in 1909, 862 and 1910, 883 criminals were convicted. In 1910, 8,097 persons received poor relief from the City 'Armen Anstalt', which spent, in 1910, 301,245 marks (15,052*l.*)

Estimated revenue and expenditure for 1912, 16,891,800 marks (844,590*l.*) About one-third of the revenue is derived from public domains, chiefly forests and industrial establishments, and over one-third from direct taxation. Of the expenditure, one-sixth is on account of the public debt, 70,401,653 marks (3,520,084*l.*) in 1911.

Total imports into Lübeck, 1910, 4,417,000*l.*, total exports, 2,437,600*l.*

Number of vessels entered 1911, 3,258 of 862,641 tons, cleared, 3,264 of 869,448 tons.

British Vice Consul—D. E. Wilhelm Eschenburg.

## MECKLENBURG-SCHWERIN

(GROSSHERZOGTHUM MECKLENBURG SCHWERIN)

Grand-duke **Friedrich Franz IV.**, born April 9, 1882, son of Friedrich Franz III and Anastasia Mikhailovna, daughter of the Grand duke Michael Nikolaievitch of Russia, married June 7, 1904, to Alexandra, daughter of Ernst August of Brunswick Lüneburg, Duke of Cumberland, succeeded on the death of his father, April 10 1897. Offspring Prince Friedrich Franz, born April 22, 1910. Sisters of the Grand duke are 1 *Alexandrina*, born December 24 1879, married April 26, 1898, to Christian, King of Denmark. 2 *Cecilie*, born September 20, 1886 married June 6, 1905, to Friedrich Wilhelm, Crown Prince of the German Empire and of Prussia.

*Uncles and Aunts of the Grand-duke.*—I *Paul Friedrich*, born September 19 1852, married May 5 1881 to Princess Marie of Windisch-Grätz. Offspring 1 *Marie Antoinette*, born May 23, 1884. 2 *Heinrich Borwin* born December 16 1885. Duke Paul in 1884 renounced all hereditary rights to the Grand-duchy for himself and his descendants. He himself became a Roman Catholic. II *Mari*, born May 14 1854, married August 23, 1874 to Grand-duke Vladimir second son of Alexander II. Emperor of Russia. III *Johanna Albrecht*, born December 8, 1867. Regent of the Duchy of Brunswick, married for the second time to Elisabeth, daughter of the late Duke Botho zu Stolberg-Rossla. IV *Elizabeth* born August 10 1869 married October 24 1890 to Friedrich August, Grand-duke of Oldenburg. V *Adolf Friedrich* born October 10 1883. VI *Helene*, born April 19 1876 married February 7 1901 to Queen Wilhelmina of the Netherlands, with the title Prince of the Netherlands.

The Grand-ducal house of Mecklenburg is the only reigning family in Western Europe of Slavonic origin and claims to be the oldest sovereign house in the Western world. In their full title, the Grand-dukes style themselves Princes of the Wends. Their genealogical table begins with Niklot, who died 1160, and comprises 25 generations. The title of Grand-duke was assumed in 1816.

The political institutions of the Grand-duchy of Mecklenburg Schwerin and of Mecklenburg Strelitz are of an entirely feudal character but in March, 1907, the Grand Dukes of both Grand Duchies intimated to the estates at Schwerin and New Strelitz, respectively their intention of introducing a form of constitutional government. Part of the legislative power (only in the Domain has the Grand duke the whole legislative power) is in the hands of the Diet—*Landtag*. There is only one Diet for both Grand duchies, and it assembles every year for a few weeks, when it is not in actual session it is represented by a committee of nine members. Seats and votes in the Diet belong to the Ritterschaft—that is, the proprietors of Rittergüter, or Knights Estates—and to the Landschaft, consisting of the burgomasters of 42 towns of Mecklenburg Schwerin and 7 towns of Mecklenburg Strelitz. The Ritterschaft has nearly 800 members, but only a few of them take seats in the Diet. The Domain has not a representation of its own. The only elected representatives of the people are the 8 deputies returned to the German Reichstag.

The executive is represented by a ministry divided into four departments, appointed by, and responsible to the Grand-duke alone. There is no other administrative division than that springing from the ownership of the soil, in which respect the country is divided as follows, with population in 1910.—Grand-ducal Domains, 198,250. Knights Estates (Rittergüter), 120,454, Convent Estates (Klostergüter), 7,889, Towns and Town Estates, 313,865. Total, 639,958, half rural. The chief towns (1911) were Rostock (65,383 inhabitants), Schwerin (42,519 inhabitants), the capital, Wismar (24,378 inhabitants), Güstrow (17,805 inhabitants), and Parchim (10,608 inhabitants).

In 1910 there were Protestants, 615,512, Catholics, 21,043, other Christians, 1,288, Jews, 1,413, not stated, 702. The parishes are generally well endowed with landed property.

There are 1,285 elementary schools with 92,912 pupils (1911), Gymnasien, 7 with 1,819 pupils, Realgymnasien, 6 with 1,492 pupils, Realprogymnasien,

2 with 187 pupils, Realschulen, 5 with 1,254 pupils, 6 preparatory schools with 618 pupils, higher private schools, 18 with 2,154 pupils, normal schools, 2 with 398 pupils, navigation schools, 2 with 129 pupils, agricultural school, 1 with 55 pupils, technical schools, 2 with 198 pupils in the summer session and with 808 pupils in the winter session, institutions for the deaf and dumb, 1 with 54 pupils, institution for the blind, 1 with 90 pupils, schools for artisans, 50 with 5,843 pupils. There is a university at Rostock (see *German Empire*).

There are 43 Amtsgerichte, 3 Landgerichte, and 1 Oberlandesgericht at Rostock, which is also the supreme court for Mecklenburg-Strelitz. There are also certain special military and ecclesiastical tribunals.

There exists no general budget for the Grand duchy. There are three systems of finance entirely distinct. 1. That of the Grand-duke estimated for July 1, 1912-13 at 1,143,100*l*. 2. The financial administration of the States, the resources of which are very small. 3. The common budget of the Grand duke and States, the receipts and expenditure of which balance at 339,345*l*. (for July 1, 1912-13). On July 1 1912 the public debt was estimated at 7,025 6,0*l*. The interest of the railway debt (306,045*l*), and of the consolidated loan of 1896 amounting to 600,000*l* is covered by the annuity of 48,000*l* paid by the State railways, and the remaining debt is more than covered by the State funds.

*Consul General* — W. E. Hearn (Hamburg).

## MECKLENBURG STRELITZ

(GROSSHERZOGTHUM MECKLENBURG STRELITZ)

Grand duke **Adolf Friedrich**, born July 22, 1848 the son of Grand duke Friedrich Wilhelm and of Princess Augusta, the daughter of the late Duke Adolphus of Cambridge, succeeded at the death of his father, May 30, 1904 married April 17, 1877, to Princess Elizabeth of Anhalt, born September 7, 1857. Offspring Mary, born May 8, 1878. Jutta, born January 24 1880 married July 27, 1899, under the name of Militza, to Prince Danilo of Montenegro. Adolf Friedrich, born June 17 1882.

The reigning house of Mecklenburg-Strelitz was founded, in 1701, by Duke Adolf Friedrich II, youngest son of Duke Adolf Friedrich I of Mecklenburg. There being no law of primogeniture at the time, the Diet was unable to prevent the division of the country, which was protested against by subsequent Dukes of Mecklenburg-Schwerin. The Grand-duke is, however, one of the wealthiest of German sovereigns, having seigniorial rights over more than one-half of the country.

Mecklenburg-Strelitz has, in common with Mecklenburg-Schwerin a Diet consisting of landowners and town magistrates. The country is divided into two provinces. Stargard which alone participates in the Constitution, and Ratzeburg, whose special Constitution, framed in 1869, was put in force in 1906. Of the 48 burgomasters and nearly 800 members of the Ritterschaft (see *Mecklenburg-Schwerin*), 7 burgomasters and over 80 proprietors of Rittergüter belong to Mecklenburg-Strelitz.

A form of constitutional government is about to be introduced. The executive is entirely in the hands of the Grand-duke, and is exercised by him through his Government, at the head of which is a Minister of State. For 1910-11 revenue 236,660*l*, expenditure 226,600*l*. Debt, July 1, 1910, 119,940*l*.

The overlordship of the soil within the State is distributed as follows —The Grand duke has seigniorial rights over 527 square miles, tithed and untithed nobles over 343 square miles, and town corporations over 117 square miles.

Marriages, 1911, 776, births, 2,885, deaths, 2,661, surplus of births, 775. Among the births were 85 stillborn, and 384 illegitimate children.

With the exception of 2,627 Catholics, 298 Jews and 213 persons of other confessions (1903), the people are Protestants. The total population on December 1, 1910 numbered 106,847 (53,523 males and 52,824 females). The capital, Neu-Strelitz, had 11,928 inhabitants in 1910.

*British Minister Plenipotentiary* — Rt. Hon Sir W. E. Goschen, G. C. V. O., K. C. M. G.

*Consul General* — W. E. Hearn (Hamburg).

## OLDENBURG

(GROSSHERZOGTUM OLDENBURG)

Grand-duke Friederich August, born November 16, 1852, the son of Grand-duke Peter and of Princess Elizabeth of Saxe-Altenburg, succeeded at the death of his father June 13, 1900, married (1), February 18, 1878, to Princess Elizabeth (died August 28, 1895) daughter of Prince Friedrich Karl of Prussia, (2), October 24, 1896, to Princess Elizabeth of Mecklenburg Schwern, issue of first marriage, a daughter, Sophia, born February 2, 1879, married February 27, 1906, to Prince Ritel Friedrich, second son of the Emperor Wilhelm II., of the second, a son, Nicolaus, born August 10, 1897, and two daughters, Ingeborg Alix, born July 20, 1901, and Alsborg Mathilda, born May 19, 1903. *Brother of the reigning Grand-Duke* — Prince Georg, born June 27, 1855.

The ancient house of Oldenburg is said to be descended from Witdukind the celebrated leader of the heathen Saxons against Charles the Great. In the fifteenth century a scion of the House of Oldenburg, Count Christian VIII., was elected King of Denmark, Sweden, and Norway. The main line became extinct with Count Anton Günther in 1667, whereupon the territory of the family fell to the King of Denmark, who made it over to Grand-duke Paul of Russia, in 1773, in exchange for pretended claims upon Schleswig-Holstein. The Grand-duke then (1773) gave Oldenburg to his cousin Prince Friedrich August of Holstein-Gottorp with whose descendants it remained till 1810, when Napoleon incorporated it with the Kingdom of Westphalia. But the Congress of Vienna not only gave the country back to its former sovereign but, at the urgent demand of Czar Alexander I., added to it a territory of nearly 400 square miles, with 50,000 inhabitants, bestowing at the same time upon the Prince the title of Grand-duke. Part of the new territory consisted of the Principality of Birkenfeld, on the left bank of the Rhine, close to the French frontier. Another part consisted of the Principality of Lübeck and another of a piece of the secularized bishopric of Münster. The Grand-duke has a civil list of 400,000 marks, or 20,000 £, and the revenues from the crown lands (Krongut) is estimated at 255,000 marks, or 12,750 £, he draws also a considerable revenue from private estates of the family in Holstein.

By the Constitution, 1849, revised 1852 and 1905, the legislative power is exercised by a Landtag, or Diet, elected for five years, by the vote of all citizens paying taxes. By a law of April 17, 1908, the direct mode of election was introduced in 1911. The Grand Duchy is divided into 29 districts. The Landtag consists of 45 delegates. The executive is vested, under the Grand-duke, in a responsible ministry of three departments. The outlying Principalities of Lübeck and Birkenfeld have also provincial councils, both of 15 members, summoned twice a year by the provincial government.

The budgets are divided into the budget of the Grand-duchy and the budgets of the Duchy of Oldenburg and the Principalities of Lübeck and Birkenfeld. Estimated revenue, 1912, 819,245 £, expenditure, 818,341 £.

Debt, 1912, 3,717,404.

The population, 1910 —Duchy of Oldenburg, 391,240, Principality of Lubeck, 41,800, Principality of Birkenfeld, 50,490, total, 488,042 (244,018 males and 239,024 females) Oldenburg, the capital, had 30,242 inhabitants in 1910.

In 1910 Oldenburg contained 371,650 Protestants, 107,508 Roman Catholics other religions 2,359 1,525 Jews. The State Church (Protestant) is under the Ministry for Ecclesiastical Affairs.

The following table shows the public school statistics of Oldenburg in 1911 —

	Number	No. of Teachers	No. of Pupils
Gymnasals	5	68	1 108
Oberrealschulen	3	61	1 240
Realschulen	3	44	985
Höhere Töchtereschulen	18	91	1,608
Bürgerschulen	35	105	2 604
Vorschulen	9	85	1,104
Volksschulen (Elementary)	704	1 457	82,834
Seminaries (Protest. and Cath.)	4	49	573
Agricultural	11	79	561
Navigation	1	6	89
Technical	2	32	342
Deaf and Dumb	1	5	81

Oldenburg contains an Oberlandesgericht and a Landgericht. The Amtsgerichte at Lubeck and Birkenfeld are under the jurisdiction of the Landgerichte at Lubeck and Saarbrücken respectively.

Consul General —W. E. Hearu (Hamburg)

## PRUSSIA

(KÖNIGREICH PREUSSEN)

### Reigning King

**Wilhelm II.**, born Jan. 27, 1859, eldest son of Friedrich III., German Emperor and King of Prussia—who was eldest son of Wilhelm I., and was born October 18, 1831, married, Jan. 26, 1893, to Victoria (Empress and Queen Friedrich), Princess Royal of Great Britain, succeeded his father March 9, 1888, and died June 15, 1888, when he was succeeded by his son, Prince Friedrich Wilhelm, under the title of Wilhelm II. The Empress married, Feb. 27, 1881, Princess Victoria of Schleswig Holstein-Sonderburg-Augustenburg, born Oct. 22, 1853, daughter of the late Duke Friedrich of Schleswig Holstein-Sonderburg-Augustenburg.

*Children of the King*

1 Prince *Friedrich Wilhelm*, born May 6, 1882, Crown Prince of the German Empire and of Prussia, married June 6 1905 to Princess Cecilie born Sept. 20, 1886 daughter of the late Friedrich Franz III, of Mecklenburg-Schwernin, offspring, Prince *Wilhelm Friedrich*, born July 4, 1906, Prince *Ludwig Ferdinand*, born November 8, 1907, Prince *Hubertus*, born September 30 1909 Prince *George*, born Dec. 19, 1911, 2 Prince *Wilhelm Eitel Friedrich*, born July 7, 1893 married, February 27 1906 to Princess Sophie Charlotte, daughter of the Grand Duke Friedrich August of Oldenburg, 3 Prince *Adalbert* born July 14, 1884, 4. Prince *August Wilhelm*, born Jan 29, 1887 married, October 22, 1906 to Princess Alexandra Victoria of Schleswig Holstein 5 Prince *Oscar* born July 27, 1888, 6 Prince *Joachim*, born Dec 17 1890 7 Princess *Viktoria Luise*, born Sept 13, 1892

*Brother and Sisters of the King*

1 Princess *Charlotte* born July 24 1860 married Feb 15 1878 to Prince Bernhard eldest son of Duke George II of Saxe-Meiningen 2 Prince *Heinrich* born Aug 14 1862, married May 24 1888 to Princess Irene daughter of the late Grand-duke Ludwig IV of Hesse offspring of the union are two sons Waldemar born March 20 1899 Sigismund born Nov 27 1896 3 Princess *Victoria* born April 12, 1866 married Nov 19 1890 to Prince Adolf of Schaumburg Lippe. 4 Princess *Sophie* born June 14 1870 married, Oct 27 1889 to Crown Prince Konstantin of Greece Duke of Sparta 5 Princess *Margarethe* born April 22 1872 married Jan 20 1893 to Prince Friedrich Karl Ludwig of Hesse.

The Kings of Prussia trace their origin to Count Theodor of Zollern in Swabia, one of the generals of Charles the Great. His successor, Count Friedrich I built the family castle of Hohenzollern, near the Danube, in the year 980. A subsequent Zollern, or Hohenzollern, Friedrich III, was elevated to the rank of a Prince of the Holy Roman Empire in 1273 and received the Burggraviate of Nuremberg in fief, and his great-grandson, Friedrich VI was invested by king Sigmund in 1416, with the Margraviate of Brandenburg, and obtained the rank of Elector in 1417. A century after, in 1511, the Teutonic knights owners of the large province of Prussia, on the Baltic, elected Margrave Albrecht, a younger son of the family of Hohenzollern, to the post of Grand Master, and he, turning Protestant, declared himself hereditary duke. The early extinction of the male line of Albrecht brought the province of Prussia by inheritance to the electors of Brandenburg who likewise adopted Protestantism. In the seventeenth century, the Hohenzollern territories became greatly enlarged by Friedrich Wilhelm the Great Elector under whose fostering care arose the first standing army in Central Europe. The Great Elector, after a reign extending from 1640 to 1688, left a country of one and a half million inhabitants, a vast treasure and 38,000 well-drilled troops to his son, Friedrich I who put the kingly crown on his head at Königsberg on January 18, 1701. His successor Friedrich Wilhelm I, after adding part of Pomerania to the possessions of the house, left his son and successor Friedrich II, called 'the Great,' a State of 47,770 square miles, with two and a half millions of inhabitants. Friedrich II., added Silesia, an area of 14,200 square miles, this, and the large territory gained in the first partition of Poland, increased Prussia to 74,340 square miles, with more than five and a half million inhabitants. Under the reign of Friedrich's successor, Friedrich Wilhelm II., the State was enlarged by the acquisition of the principalities of Ansbach and Bayreuth, as well as the vast territory acquired in another partition of Poland, which raised its area to nearly 100,000 square miles,

with about nine millions of souls. Under Friedrich Wilhelm III, nearly one half of this State and population was taken by Napoleon, but the Congress of Vienna not only restored the loss, but added part of the Kingdom of Saxony, the Rhineland, much of Westphalia, and Swedish Pomerania, monding Prussia into two separate pieces of territory, of a total area of 106,820 square miles. This was shaped into a compact State of 134,463 square miles, with a population of 22,789,436, by the war of 1866.

At present the total 'Krondotations Rente,' as far as it figures in the budgets, amounts to 15,719,296 marks, or 770,554*l*. The reigning house is also in possession of a vast amount of private property, comprising castles, forests, and great landed estates in various parts of the kingdom, known as 'Kronfideikommiss und Schatullguter,' the revenue from which mainly serves to defray the expenditure of the court and the members of the royal family.

The Royal Fideikommiss was last regulated by Cabinet Order of Aug. 30, 1848. Besides this the Royal Crown treasure founded by King Friedrich Wilhelm III, consists of a capital of 6 millions, which has since considerably increased, and also the family Fideikommiss likewise founded by King Friedrich Wilhelm III, for the benefit of princes born afterwards. It comprises the domains of Flatow, Krojanke, and Frauendorf, as well as the Fideikommiss founded by the late Prince Karl (Ghenicke). Finally, the Royal House is also entitled to the House Fideikommiss of the Hohenzollern princes.

Dating from King Friedrich I of Prussia (Elector Friedrich III of Brandenburg), there have been the following

#### SOVEREIGNS OF THE HOUSE OF HOHENZOLLERN

Friedrich I	1701	Friedrich Wilhelm III	1797
Friedrich Wilhelm I	1713	Friedrich Wilhelm IV	1840
Friedrich II called 'the Great'	1740	Wilhelm I	1861
Friedrich Wilhelm II	1788	Friedrich III (Mar 9-June 15)	1888
		Wilhelm II	1888

### Constitution and Government.

Various fundamental laws vest the executive and part of the legislative authority in a king, who attains his majority upon accomplishing his eighteenth year. The crown is hereditary in the male line, according to primogeniture. In the exercise of the government the king is assisted by a council of ministers, appointed by royal decree. The legislative authority the king shares with a representative assembly, the Landtag, composed of two Chambers, the first called the 'Herrenhaus, or House of Lords, and the second the 'Abgeordnetenhaus, or Chamber of Deputies. The assent of the king and both Chambers is requisite for all laws. Financial projects and estimates must first be submitted to the Abgeordnetenhaus, and be either accepted or rejected *ex bloc* by the Herrenhaus. The right of proposing laws is vested in the Government and in each of the Chambers.

The Herrenhaus is composed of, first, the princes of the royal family who are of age, including the sons of the formerly sovereign families of Hohenzollern-Hechingen and Hohenzollern-Sigmaringen, secondly, the chiefs of the mediatised princely houses, recognised by the Congress of Vienna, to the number of sixteen in Prussia, thirdly, the heads of the territorial nobility formed by the king, and numbering some fifty members,

fourthly, a number of life peers, chosen by the king from among the rich landowners, great manufacturers, and 'national celebrities', fifthly, eight titled noblemen elected in the eight older provinces of Prussia by the resident landowners of all degrees, sixthly, the representatives of the universities, the heads of 'chapters', and the burgomasters of towns with above fifty thousand inhabitants, and seventhly, an unlimited number of members nominated by the king for life, or for a more or less restricted period.

The Abgeordnetenhaus consists of 443 members—362 for the old kingdom, 80 added in 1867 to represent the newly annexed provinces and 1 in 1876 for Lauenburg. Every Prussian who has attained his twenty fifth year, and is qualified to vote for the municipal elections of his place of domicile, is eligible to vote as indirect elector. Persons who are entitled to vote for municipal elections in several parishes can only exercise the right of indirect elector, or 'Urwähler', in one. One direct elector, or 'Wahlmann,' is elected from every complete number of 250 souls. The indirect electors are divided into three classes, according to the respective amount of direct taxes paid by each, arranged in such manner that each category pays one-third of the whole amount of direct taxes levied on the whole. The first category consist of all electors who pay the highest taxes to the amount of one-third of the whole, the second, of those who pay the next highest amount down to the limits of the second third, the third of all the lowest taxed, who, together, complete the last class. Direct electors may be nominated in each division of the circle from the number of persons entitled to vote indirectly, without regard to special divisions. The representatives are chosen by the direct electors. The legislative period of the Abgeordnetenhaus is limited to five years. Every Prussian is eligible to be a member of the second Chamber who has completed his thirtieth year who has not forfeited the enjoyment of full civic rights through a judicial sentence, and who has paid taxes during three years to the State. The Chamber must be re-elected within six months of the expiration of the legislative period, or after being dissolved. In either case former members are re-eligible. The Landtag is to be regularly convoked by the king during the month of November, and in extra ordinary session, as often as circumstances may require. The opening and closing of the Landtag must take place by the king in person, or by a minister appointed by him. Both Chambers are to be convoked, opened, adjourned, and prorogued simultaneously. Each Chamber has to prove the qualification of its members, and to decide thereon. Both Chambers regulate their order of business and discipline, and elect their own presidents, vice presidents, and secretaries. Functionaries do not require leave of absence to sit in the Chamber. When a member accepts paid functions, or a higher office connected with increased salary, he vacates his seat and vote in the Chamber, and can only recover the same by a new election. No one can be a member of both Chambers. The sittings of both Chambers are public. Each Chamber, at the proposition of the president or of ten members, may proceed to secret deliberation. Neither Chamber can adopt a resolution when the legal majority of its members is not present. Each Chamber has a right to present addresses to the king. No one can deliver a petition or address to the Chambers, or to either of them, in person. Each Chamber can refer documents addressed to it to the ministers, and demand explanations relative to complaints contained therein. Each Chamber has the right to appoint commissions of investigation of facts for its own information. The members of both Chambers are held to be representatives of the whole population. They vote according to their free conviction, and are not bound by prescriptions

or instructions. They cannot be called to account, either for their votes or for opinions uttered by them in the Chambers. No member of the Chambers can, without its assent, be submitted to examination or arrest for any proceeding entailing penalties, unless seized in the act, or within twenty-four hours of the same. All criminal proceedings against members of the Chambers, and all examination and civil arrest, must be suspended during the session, should the Chamber whom it may concern so demand. Members of the Abgeordnetenhaus receive and must accept travelling expenses and diet money from the State, according to a scale fixed by law, amounting to 15 marks, or 15 shillings, per day.

Lower House composed as follows — Conservatives, 151, Free Conservatives, 62, National Liberals, 65, Progressives, 87, Centre, 103, Poles, 15, Socialists, 6, Independents, 4.

The executive government is carried on by a Staatsministerium, or Ministry of State, the members of which are appointed by the king, and hold office at his pleasure. The Staatsministerium is divided into nine departments, as follows —

1 *President of the Council of Ministers, Minister of State, Minister of Foreign Affairs, and Imperial Chancellor* — Dr von Bethman Hollweg.

2 *Minister of State and Minister of Finance* — Dr Lohse, appointed August, 1910.

3 *Minister of State and Minister of Public Works* — Breitenbach, born 1856, appointed June 1906.

4 *Minister of Ecclesiastical Affairs and Instruction* — Dr von Trott zu Solz, appointed July, 1909.

5 *Minister of Agriculture, Domains, and Forests* — Dr Ehrh von Schorlemer, appointed 1910.

6 *Minister of Justice* — Dr Beseler, appointed November, 1905.

7 *Minister for Interior* — Von Dillwitz, appointed July, 1910.

8 *Minister of Commerce and Industry* — Sydow, appointed Oct., 1909.

9 *Minister of State and Minister of War* — General von Heeringen, appointed 1909.

*Imperial Secretary of State for the Interior* — Dr Delbrück, appointed Minister (without portfolio), July, 1910. *Imperial State Secretary of the Foreign Office* — Von Kiderlen Wächter, September, 1910. *Imperial State Secretary of the Naval Office* — Von Tirpitz, born 1849, Minister since March 29, 1898.

The salary of the President of the Council is 54,000 marks, and that of each of the other ministers 36,000 marks, and, since 1905, 14,000 marks "representation money."

For local government Prussia is divided into Provinces, Government districts (*Regierungsbezirke*), urban circles (*Stadtkreise*), and rural circles (*Landkreise*). Urban circles consist of towns of over 25,000 inhabitants, rural circles consist of the smaller towns, rural communes (*Landgemeinden*), and manors (*Gutsbezirke*). For provinces and rural circles the local authorities of the constituent areas elect deliberative assemblies which appoint executive committees. Each province has a governor (*Oberpräsident*), each government district has a president, and deals chiefly with local affairs of State concern. In towns the deliberative authority is the town council (*Stadterverordnetenversammlung*), elected on the 3-class system of property suffrage. The executive is a magistracy with the burgher master as president. Each rural circle has a *Landrat*. Local administrative business varies according to

the nature of the administrative division. The matters dealt with are such as poor relief, roads, light railways, &c., but in rural districts they include agricultural interests, and in towns, education, sick insurance, valuation, collection of certain taxes, mustering of recruits, management of gas, water, and electric works, &c. The Crown controls the administration of all the administrative areas.

## Area and Population.

### I. PROGRESS AND PRESENT CONDITION

Provinces	Area Square Miles	Population		Pop per Square Mile 1910
		1910	1906	
East Prussia (Ostpreussen)	14 786	1 064,175	2,080,179	189.0
West Prussia (Westpreussen)	9 801	1 709 474	1,641 874	172.7
Berlin	24	2,071 257	2 040 148	89,279.0

Hohenzollern (Hohenzollernsche Land)	441	71 011	68 242	141.0
Total	13,154	40 160 219	37 298 264	324.0

<sup>1</sup> Including Helgoland

### Development of Prussia since 1875 —

Year	Area in Sq. Miles	Population	Average per Sq. Mile	Percentage of Annual Increase
1875	184,179	25 742 404	191.6	—
1900	184 537	29 957 307	222.7	1.1
1906	184 622	34,472,609	256.1	1.5
1908	185 184	37 298 264	255.9	1.59
1910	185 184	40 166 219	297.0	1.64

The population living in towns and that not in towns in 1905 and 1910 were as follows —

	1910	1905 <sup>1</sup>	Annual increase per cent. 1906-1910
Town population	16,608,745	17,378,945	1.74
Country population	21,301 484	19,914,290	1.26

<sup>1</sup> On the same areas as in 1910.

## Urban and rural population --

Census	No. of Towns	Nos. Rural Communes <sup>1</sup>	Towns and Communes, with 2,000 inhabitants and upwards			Communes, &c. with less than 2,000 inhabitants		
			No	Pop	Per Ct.	No	Pop.	Per Ct.
1896	1,806	52,518	1,840	16,384,323	51.4	51,064	15,470,866	48.6
1900	1,286	52,117	1,968	19,144,609	55.5	51,415	15,637,609	44.5
1905	1,279	51,748	2,068	21,900,088	58.7	50,984	15,888,231	41.3
1910	1,370	51,386	2,460	25,024,116	62.5	50,158	15,071,168	37.5

<sup>1</sup> Including 16,143 separate 'Gutsbezirke' in 1896, 15,955 in 1900, 15,672 in 1905 and 15,668 in 1910

## Conjugal condition 1910 --

	Males.	Females	Total
Unmarried	12,161,517	11,177,281	23,678,798
Married	7,164,129	7,168,027	14,316,156
Widowed	500,917	1,583,157	2,084,074
Divorced or separated	81,169	55,029	66,191

The division of the population according to occupation is shown in the section relating to the *German Empire*

In 1910 the number of foreigners (exclusive of other Germans) resident in Prussia was 688,839, of whom 301,710 were Austrians and Hungarians, 137,449 Dutch, 90,667 Russians, 20,296 Danes, 7,602 Swedes and Norwegians, 9,898 British, 10,703 Belgians, 8,832 Americans (United States), 23,029 Swiss, and 4,283 French

## II MOVEMENT OF THE POPULATION

Year	Marriages	Total Births	Still-born	Illegitimate	Total Deaths incl. Still born	Surplus of Births
1903	809,922	1,308,912	39,301	94,779	719,970	595,942
1907	813,038	1,298,291	88,805	97,288	719,604	578,687
1908	811,181	1,308,483	88,834	99,598	782,608	515,875
1909	807,904	1,297,080	57,990	109,134	705,772	591,268
1910	810,415	1,265,615	67,105	98,696	675,148	591,466
1911	821,151	1,225,601	30,874	97,796	732,728	492,873

In 1911 2.93 per cent of the total births were stillborn, and 7.93 per cent illegitimate

The emigration from Prussia by German ports and Antwerp was in 1904, 16,402, in 1905, 16,206, in 1906 16,088, in 1907, 18,905, in 1908, 10,989, in 1909, 12,813, in 1910, 14,021, in 1911, 11,835. Of the total number in 1911, 10,584 went to the United States. To the total, the province of Brandenburg (including Berlin), contributed 2,125, Hanover, 1,831

## Religion

Absolute religious liberty is guaranteed by the Constitution. Nearly two-thirds of the population are Protestants, and rather over one-third Roman Catholics. In 1910, the numbers were Protestants, 24,280,547, Roman Catholics, 14,581,829; other Christians, 189,887; Jews, 415,926;

others and unknown, 147,080 Catholics are in a majority only in West Prussia, Posen, Silesia, Westphalia, Rhine Province, and Hohenzollern.

The Evangelical or Protestant Church is the State Church, and since 1871 has consisted of a fusion of the Lutheran and Calvinistic bodies, from which, however, there are still a few dissenters. It is governed by 'consistories, or boards appointed by Government, one for each province. There are also synods in most circles and provinces, and general synods representing the *old provinces only*. The constitution of the Catholic Church differs in the various provinces. Altogether in Prussia there are two archbishops and ten bishops. In every part of the Monarchy the Crown has reserved to itself a control over the election of bishops and priests. The higher Catholic clergy are paid by the State, the Prince Bishop of Breslau receiving 84,000 marks a year and the other bishops about 22,700 marks. The incomes of the parochial clergy mostly arise from endowments.

### Instruction.

Education in Prussia is compulsory. Every town, or community in town or country, must maintain a school supported by local rates, supplemented by the State, and administered by the local authorities, who are elected by the citizens, and called aldermen or town councillors. All parents are compelled to have their children properly taught or to send them to one of these elementary schools, in which all fees are now abolished. No compulsion exists in reference to a higher educational institution than elementary schools, but parents who send more than one child to any school supported by the community have, in many cases a reduction made in the charge, and a limited number of pupils (about 10 per cent.) whose parents cannot afford to pay the full rate either enjoy this reduction or are admitted entirely free, at the discretion of the authorities. The school age is from 6 to 14 years, and the number of children of that age in 1910 was returned at 7,165,744.

The following table gives the educational statistics of Prussia —

	No	Teaching Staff	Students or Pupils
Universities (1911-12) <sup>1</sup>	10 <sup>4</sup>	1,927 <sup>5</sup>	28,385 <sup>6</sup>
Gymnasien & Progymnasien <sup>2</sup> (1910-11) <sup>1</sup>	872	7,197	121,878
Realgymnasien Realprogymnasien and Higher Realschulen <sup>2</sup> (1910-11) <sup>1</sup>	202	5,317	109,579
Realschulen <sup>2</sup> (1910-11) <sup>1</sup>	171	1,694	86,182
High schools for girls (Lyceum) public (1911-12) <sup>1</sup>	942	10,390 <sup>6</sup>	158,634
High schools for girls, private (1911-12) <sup>1</sup>	234		
Middle schools, public (1911) <sup>3</sup>	629	7,154	123,459
" " private (1911) <sup>3</sup>	934	5,646	62,365
Public elementary schools (1911)	23,684	165,016 <sup>7</sup>	6,672,074
Private " (1911)	262	958	8,498
Public normal schools (1911)	200	1,294	14,715

<sup>1</sup> Winter half year. <sup>2</sup> Incl. teachers and scholars of preliminary schools. <sup>3</sup> Incl. girls' schools not officially recognised. <sup>4</sup> Incl. Lyceum at Braunsberg with 18 teachers and 30 students. <sup>5</sup> Incl. lecturers and special teachers. <sup>6</sup> Incl. regular technical and assistant teachers. <sup>7</sup> Including technical and assistant teachers, but excluding teachers of religion. <sup>8</sup> Including 1,206 women students.

There are also 5 technical high schools (Berlin, Hanover, Aachen, Danzig, Breslau), 2 forestry schools (Eberswalde, Münden), 2 technical mining schools (Berlin, Clausthal), 2 agricultural high schools (Berlin, Poppelsdorf), agricultural institutes connected with universities, 2 veterinary high schools (Berlin, Hanover), a great number of other schools for various aspects of agriculture, 4 commercial high schools (Berlin, Cologne, Frankfurt a. Main, Königsberg i. Pr.), besides other special schools and State establishments for art and music, the Academy of Posen, &c.

The Universities, the high schools (exclusive of commercial high schools), some of the Gymnasias, Realgymnasias, and similar schools, as also all the normal schools, are maintained and administered by the Government, while all the other scholastic institutions are supported by the community, &c., under control of the Government. (For number of professors, teachers, and students at each of the Universities of Prussia, see under *German Empire*.)

The whole of the educational establishments (exclusive of agricultural and some technical institutes) in Prussia are under the control of the Minister of Public Instruction and Ecclesiastical Affairs, but there is a local supervision for every province. The administration of each of these, as far as regards the *Regierungs Bezirke*, is vested in a President, who is the head of the Civil Government (*Regierung*) while the management of the higher (secondary) schools and the normal schools belongs to the Provincial School Collegium, under the supervision of the Oberpräsident, who is the head of the Civil Government of the province. As a general rule, the administration of school funds provided by the State is under the control of the Civil Government, which likewise takes upon itself nearly the whole management of the lower and elementary schools, while the Schul Collegium is responsible for the higher schools and the normal schools, for the general system of instruction and discipline therein, the proper selection of school books, the examination and appointment of masters, and the examination of those who leave school for the Universities.

According to the Constitution of 1850, all persons are at liberty to teach, or to form establishments for instruction, provided they can produce to the authorities the prescribed proofs of their moral, scientific, and technical qualifications. Both private and public establishments for education are placed under the superintendence of the Minister of Public Instruction, while all public teachers are considered, directly or indirectly, State servants.

For the year 1911-12 the ordinary expenditure for instruction and similar purposes under the Department of the Ministry of Instruction amounted to about 212,000,000 marks (10 600,000 £), besides 14,000,000 marks (700,000 £) for non-recurring expenditure. For educational institutions under other ministries the sum of about 19,000,000 marks, exclusive of non-recurring expenditure, was set aside, so that the total ordinary expenditure of the State on instruction for the year amounted to nearly 231,000,000 marks. The total expenditure for all kinds of schools amounted in 1911-12 to about 600,000,000 marks.

### Justice, Crime

Prussia contains 14 Oberlandesgerichte (see under *German Empire*). The Oberlandesgericht at Berlin is called the Kammergericht, and serves as an ultimate appeal court for summary convictions, though for all cases the court of final instance is the Reichsgericht at Leipzig. The prosecution in all criminal cases is conducted by *Staatsanwälte* or public prosecutors, paid by the State. In 1910 there were 344,770 persons convicted of crime in Prussia.

## Finance.

Effective, ordinary and extraordinary revenue and expenditure for years ending March 31 following the year indicated in the table (20 marks = £1) —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Marks	Marks		Marks	Marks
1905	3,400,945,206	3 137,467,213	1908	4,151,150,190	3,968,126,498
1906	3,800,690,662	3,634,936,308	1909	4,608,102,407	4,892,875,416
1907	4,968,702,411	3 737,817,024	1910	4,629,745,554	4,631,155,108

## Budget estimates for years ending March 31 —

Heads of Receipts and Expenditure	Revenue		Expenditure	
	1911-12	1912-13	1911-12	1910-11
	Marks	Marks	Marks	Marks
Ministry of Agriculture	161 214 504	159 394 004	70,646 120	72,555,189
" Finance	659 590 400	714,806 810	238,844,216	236 064,183
" Commerce, &c.	284 8-8 890	296 078 320	267 675 940	267 427 097
Public Works	2 181,784,000	2 581 063,000	1 847 742 000	1,864,407 000
Detachments and financial administration	473,635,935	507,495 935	642,556,814	671 956,650
State administration (Justice, &c.)	244,840,827	260 330,831	819 840 606	852,085,381
Total ordinary	4 885 456 740	4 263 846 450	3 971 814,496	4,078 224 806
Extraordinary	49 658,000	37 598,800	214,000,253	238,007 850
Total	4,084,814 749 (204,265 737L)	4 301 345,250 (215 062 113L)	4 085 814 749 (204,265 737L)	4 301 345,250 (215 062 113L)

The total expenditure amounted (1911) to 5*l.* 1*s.* 2*d.* per head of population. The direct taxes amounted almost to 8*s.* 9*d.* per head. Since April 1, 1895, only the income tax, a new supplementary tax (*Vermögenssteuer*), and the tax vom Gewerbebetriebe im Umherziehen are direct State-taxes, the land tax, the house tax, and the trading tax are received by the communes.

The expenditure for the army and navy is not entered in the budget of Prussia, but forms part of the budget of the Empire.

Public debt in 1911 and 1912 —

	1911	1912
	Marks	Marks
National debt bearing interest	1,050 000,000	1,102,338,000
Consolidated debt at 4 per cent.	6,398 878 750	6,090,875,900
"       "       " 2½ per cent.	1,669 837,700	1 591 394 150
"       "       " 3 per cent.	610 000,000	640,000,000
Treasury bonds	94,861 508	91 706,580
State railway debt	2,049 248	2,002,706
Debt of provinces annexed in 1890		
Total national debt	9,531 877,158 (476,583,852L)	9,428,544,046 (471,443,702L)

The sinking fund of the railway debt in 1912 amounted to 189,261*l.* and of the annexed provinces' debt to 2,327*l.* The charges for interest, amortisation, and management of the debt amounted to 20,817,457*l.* in the financial year 1912. The debt amounts to 1*l.* 17*s.* 3*d.* per head of population, and the annual charge to 8*s.* 6*d.* per head.

**Army**—The conditions of service have been already described under *German Empire*. The total peace strength of the Prussian army at the present time is about 480,000 of all arms and ranks.

## Production and Industry

### I AGRICULTURE

The number of farms in Prussia, in 1895, was as follows—Under 1 hectare, 1,646,659; 1-10 hectares, 1,236,399; 10-100 hectares, 402,209, over 100 hectares, 20,880, total, 3,306,651.

The total area of the farms in 1895 was 28,479,789 hectares. These farms supported, 1895, a population of 10,948,476, of whom 4,633,055 were actively engaged in agriculture. The areas under the chief crops, and the yield in metric tons, 2 years, were as follows (1 hectare = 2.47 acres, 1 metric ton = 2,204 lbs.)—

	1910	1910	1911	1911
	Hectares	Tons	Hectares	Tons
Wheat	1,146,620	2,482,912	1,175,084	2,605,041
Rye	4,790,771	8,041,248	4,700,751	4,427,786
Summer barley	836,610	1,868,748	829,070	1,116,417
Oats	2,806,627	5,291,617	2,818,692	5,210,403
Potatoes	2,231,254	52,790,213	2,940,679	25,630,213
Hay (meadow)	3,252,470	14,541,688	3,247,436	10,099,899

In 1911 there were vineyards on 17,100 hectares, yielding 587,197 hectolitres of wine, hops on 1,097 hectares yielding 4,546 tons. On December 1, 1907, Prussia contained live stock comprising 3,046,304 horses, 12,011,584 cattle, 5,408,867 sheep, 15,095,854 swine, and 2,235,529 goats.

In 1905-06 Prussia contained 238 establishments engaged in the manufacture of beet-root sugar, which consumed 12,595,787 metric tons of beet root in the production of 1,861,870 metric tons of raw sugar and 260,859 metric tons of molasses. In 1905-6 there were 4,328 breweries in action in Prussia, which brewed 33,600,000 hectolitres of beer, or 90 litres per head of the population. In 1905-06 there were 8,404 distilleries in operation, which produced 3,722,032 hectolitres of alcohol.

### II MINERALS

The output of coal increased from 17,571,581 tons in 1848 to 184,044,080 tons in 1907, and the output of lignite in the same time from 8,118,553 tons to 52,660,597 tons. Quantities (in metric tons) and values (in marks) of the coal and iron ore raised, and of the pig iron produced in 1908-09—

	1910		1911	
	Tons	Marks	Tons	Marks
Coal	142,771,812	1,417,750,859	151,824,080	1,461,665,285
Lignite	56,644,991	185,441,598	60,581,943	199,078,003
Iron ore	4,823,606	40,298,270	4,948,711	41,624,648
Pig-iron	9,925,612	875,180,891	10,477,968	633,331,938

In 1910 the numbers employed in and about mines in Prussia were: Underground workers, 484,504; surface workers, 147,054; boys (under 18), 24,458; females, 7,566; total, 663,584. The amount of their wages was 800,392,890 marks.

**Commerce.**—The trade of Prussia forms an important part of the general trade of the German customs district (Zollgebiet). This is carried on through the various ports of the Baltic and North Seas, through many navigable rivers and canals, and an extensive network of roads, railways, telegraphs, and telephones. There are 92 chambers and corporations of commerce in the large towns of the Kingdom. There are no separate statistics for the trade of Prussia; it is included in that of Germany.

**Internal Communications.**—On April 1, 1910, the length of the system open for traffic was as follows: Broad gauge, main lines 19,602 miles, broad gauge, local lines, 9,322 miles; total broad gauge 28,924 miles. Narrow gauge, 208 miles. Total length of State lines, 29,132 miles. Private lines, 1,826 miles. Total railway mileage, 30,959 miles. Plans for the electrification of main railway lines are being steadily pushed on. The line between Dessau and Bitterfeld was the first to be electrified and the experiment was so successful that a longer stretch has been chosen, Magdeburg—Bitterfeld—Leipzig—Halle. It is uncertain whether electric traction will meet military requirements, and there will, therefore, be no electrification for the present of strategic railways or of lines which are of strategic importance.

### REUSS, Elder Branch.

(FÜRSTENTHUM REUSS—ÄLTERE LINIE.)

The reigning Prince is Heinrich XXIV, born March 20, 1878, succeeded his father Heinrich XXII, who died April 19, 1902. Sisters of the reigning prince are *Emma*, born Jan. 17, 1881, married May 14, 1908, to *Archibald*, Count of Kunig, *Maria*, born March 26, 1882, married Feb. 4, 1904, to *Ferdinand*, Baron Gnagnoni. *Hermine*, born Dec. 17, 1887, married Jan. 7, 1907, to *Johann Georg*, Prince of Schönau. *Caroline Ida*, born Sept. 4, 1891, married November 7, 1911, to *Martin Christopher*, Prince of Holberg-Rosela.

The Regent of the Principality is Prince Heinrich XXVII, Prince of Reuss-Gera since Oct. 15, 1908.

The princely family of Reuss traces its descent to the old prefects of Weida, who were imperial functionaries and afterwards free lords. All the

heads of the house, ever since the commencement of the eleventh century, have been called Heinrich. In the year 1701 it was settled, in a family council that the figures should not run higher than a hundred, beginning afterwards again at one. The present sovereign of Reuss-Greiz has no civil list, but a great part of the territory over which he reigns is his private property.

The Constitution, bearing date March 28, 1867, provides for a legislative body of 12 members, 3 nominated by the sovereign, 2 by the possessors of large estates, 3 elected by towns, and 4 by rural districts. The public revenue and expenditure for 1912 were estimated at 92,203/. There is no public debt.

Area, 122 square miles, population (1910), 72,789

The population is mainly Protestant, only 1,205 being Catholic. The capital, Greiz, has (1910) 23,245 inhabitants.

## REUSS, Younger Branch

(FÜRSTENTHUM REUSS—JÜNGERE LINIE.)

The reigning Prince is **Heinrich XXVII**, born Nov 10, 1858, the son of Prince Heinrich XIV and of Princess Agnes, succeeded his father March 31, 1913 married November 11 1884, to Princess Elise, born September 4, 1864, daughter of Prince Hermann of Hohenlohe Langenburg. Offspring: I Princess Victoria, born April 21, 1889 II Princess Luise Adelheid, born July 17, 1890 III Prince Heinrich XLIII, born July 25, 1893, died May 13 1912 IV Prince Heinrich XLV born May 13 1895 *Sister of the reigning Prince* Princess Elisabeth, born October 27, 1859, married November 17, 1887, to Prince Hermann of Solms Braunfels, widow August 30, 1900.

The reigning house forms a younger branch of the Reuss family. As in Reuss-Greiz, a great part of the territory of the Principality is the private property of the reigning family.

All the princes are called Heinrich, and to distinguish them they have numbers attached to their names, beginning and ending in each century. Number I is given to the first prince of the branch born in the century and the numbers follow in the order of birth until the century is finished, when they begin again with number I.

The Principality has a Constitution, proclaimed November 30 1849, and modified April 14, 1852, and June 20, 1856. Under it restricted legislative rights are granted to a Diet of sixteen members of whom three are elected by those paying the highest income tax, and twelve by the inhabitants in general. The head of the collateral Reuss-Kostritz family is hereditarily a member. The Prince has the sole executive and part of the legislative power. In the administration of the State a cabinet of three members acts under his direction. On November 23, 1892, the hereditary prince (Heinrich XXVII) received authority from the reigning prince to carry on the government in his name, and on April 2 1910, in consequence of the permanent incapability of the reigning prince, the hereditary prince was appointed Regent.

The annual estimated revenue, 138,965/ for the financial period 1911-13, expenditure, 138,965/. Public debt (1910), 52,027/.

Of the total population (152,752 in 1910), 147,272 were Evangelical, 3,498 Catholic, 779 other Christians, 375 Jews, 828 not included in these sects. The capital, Gera, has (1910) 49,276 inhabitants.

British Vice-Consul.—R. M. Turner

## SAXE-ALTENBURG

(HERZOGTUM SACHSEN-ALTENBURG)

The reigning Duke is Ernst, born August 31, 1871, the son of Moritz (brother of the late Duke Ernst) and Augusta, Princess of Saxe-Weiningen, succeeded to the throne February 7, 1908, on the death of his uncle, married, February 17 1898, to Princess Adelheid of Schaumburg Lippe, born September 22, 1875. Offspring, Princess Charlotte Agnes, born March 4, 1899, Prince Georg Moritz born May 13, 1900, Princess Elisabeth, born April 6, 1903, Friedrich Ernst, born May 15, 1905.

There was a separate Duchy of Saxe-Altenburg from 1603 till 1672, but its territories were afterwards incorporated with Saxe-Gotha until 1826, when the Duke of Hildburghausen, which had been a separate Duchy since 1680, exchanged Hildburghausen for Altenburg, and became Duke Frederick of Saxe-Altenburg. In 1874 the Duke resigned his right to a civil list, in exchange for a charge upon the State or crown-domains (*Domänenfideicommiss*).

The legislative authority is vested in a Chamber of thirty two representatives, elected for three years nine chosen by the highest taxed inhabitants, eleven by the inhabitants of towns, and twelve by those of rural districts. The Chamber meets once at least in each financial period.

The executive is divided into four departments, namely—1, of the Ducal House, Foreign Affairs, Worship, 2, of Justice, 3, of the Interior, 4, of Finance. The budget is voted for three years, estimates for the period 1911-1913, revenue and expenditure, 259,946*l*. Two thirds of the revenue are derived from the State domains and the remainder from direct taxes. Public debt, 1911, 44,870*l*, which the funds of the State (exclusive of reserve funds in the "*Landesbank*") exceeded by 242,277*l*.

Population, 1910, 216,125. In 1910, 207,825 Protestant, 7,248 Catholic. The capital, Altenburg, had 39,976 (1910) inhabitants. Many of the inhabitants are of Slavonic origin. The peasants of the "*Ostkreis*" (eastern part of the Duchy) are reputed to be more wealthy than those of any other part of Germany, and the rule prevails among them of the youngest son becoming the heir to the landed property of the father. Estates are kept for generations in the same family, and seldom parcelled out. The rural population, however, has been declining in numbers for the last thirty years.

Gymnasias, Realschulen, and teachers' seminaries, 1912, 1,890 pupils, *Bürger-schulen* 5,420 pupils (2,845 boys and 2,775 girls), 204 public elementary schools, 611 teachers (58 female) and 37,821 pupils. Annual expenditure on elementary schools, 95,496*l*, of which 21,485*l* was provided by the State.

*British Consul-General* — A. O. Grant Duff (Leipzig)

*Vice-Consul* — R. M. Turner

# SAXE-COBURG AND GOTHA.

(HERZOGTHUM SACHSEN COBURG-GOTHA.)

The reigning Duke is **Charles Edward** (R.R.H. Duke of Albany), born July 19, 1884, son of the late Leopold Duke of Albany, and Princess Helena of Waldeck and Pyrmont, succeeded his uncle, Alfred, July 30, 1900 married October 11, 1905, to Princess Victoria Adelheid, daughter of Duke Friedrich Ferdinand of Schleswig Holstein-Sonderburg-Glücksburg offspring Prince Johann Leopold, born August 2, 1906, Princess Sibylla Kalma Marie, born January 18, 1908, Prince Dietmar Hubert, born August 24, 1909

Sister of the Duke is Princess *Alice*, born February 25, 1883, married February 10, 1904, to Prince Alexander of Teck.

The immediate ancestor of the reigning family of Saxe-Coburg and Gotha was Duke John Ernst, seventh son of Duke Ernst the Pious who succeeded his brother Albrecht, Ernst's second son, in 1699, in the Duchy of Saxe-Coburg, to which he added Saalfeld. John Ernst's two sons ruled in common under the title Dukes of Saxe-Coburg-Saalfeld but their single successor Ernst Frederick I (1764-1800) introduced the principle of primogeniture. On the extinction of the line of Saxe-Gotha Altenburg in 1825, Ernst I received, in 1826, Gotha in exchange for Saalfeld which was assigned to Saxe-Meiningen, and assumed the title of Ernst I of Saxe-Coburg and Gotha. The family is in possession of a large private fortune, accumulated chiefly by Duke Ernst I., to whom the Congress of Vienna made a present of the Principality of Lichtenberg. This Principality he sold, September 22, 1834, to the King of Prussia, for a sum of two million thalers, and other advantages. According to an agreement of July 19 1905 the income of the Gotha domains is divided between the Duke and the State. The Duke further receives one-half of the *excess of revenues over expenditure from the Coburg domains.*

The fundamental law of the two Duchies, proclaimed May 3, 1852, vests the legislative power in the Duke in conjunction with two separate chambers, one for the Duchy of Coburg and the other for the Duchy of Gotha. For the common affairs of the two Duchies the two Chambers meet in common. The Coburg Chamber consists of eleven, and that for Gotha of nineteen members, chosen in as many electoral divisions, by the indirect vote of all the electors. Every man above the age of twenty five who pays direct taxes has a vote, and every fully-qualified citizen above thirty may be elected a deputy to the Landtag or Chamber. Deputies resident in Coburg or Gotha receive six marks per diem, the others ten marks per diem and travelling expenses. New elections take place every four years. The two assemblies meet separately, regularly in the first and last years of their duration, otherwise when necessary, the 'United Parliament' meets alternately at the towns of Coburg and of Gotha.

The domain budget is voted for four years for Coburg. The annual domain revenue for Coburg 1909-1913 is estimated at 27,035*l.*, and expenditure 15,985*l.* The special State revenue and expenditure for the years ending March 31, 1911-13, for Coburg are 65,072*l.*, and 66,252*l.* respectively, and for Gotha 216,045*l.*; while the common State-revenue and expenditure (1911-13) of Coburg and Gotha, are 121,784*l.* Public debt, 1912, 89,500*l.* for Coburg, and 122,546*l.* for Gotha, both being largely covered by real property and stocks. In 1910 there were 250,454 Protestant, 4,951 Catholic, and 319 other Christians, 783 Jews, and 670 persons of other religion. The chief towns, Gotha and Coburg, have respectively 29,553 and 23,789 inhabitants (1910)

*British Minister-Resident.*—A. C. Grant Duff

*Vice-Consul.*—R. M. Turner

## SAXE MEININGEN

(HERZOGTUM SACHSEN MEININGEN)

The reigning Duke is **Georg II.**, born April 2, 1826, the son of Duke Bernhard I. Succeeded, on the abdication of his father, September 20, 1866. Married, (1) May 18, 1850, to Princess Charlotte of Prussia, who died March 30, 1855, (2) October 28, 1858, to Princess Feodora of Hohenlohe-Langenburg, who died February 10, 1872, (3)morganatically, March 18, 1873, to Helene Franz, Baroness von Heldburg. *Offspring* (first marriage) —I Prince *Bernhard*, born April 1, 1851, married February 18, 1878, to Princess Charlotte, eldest daughter of the late German Emperor Friedrich III., offspring Feodora, born May 12, 1879 married September 24, 1898, to Prince Henry XXX of Reuss, Younger Branch. II Princess *Marie Elisabeth*, born September 23, 1853 (Second marriage) III Prince *Ernst*, born September 27, 1859, married morganatically Sept. 20, 1892, to Katharina Jensen, Baroness von Saalfeld. IV Prince *Friedrich*, born October 12, 1861, married April 25, 1889, to Princess Adelheid of Lippe, offspring three daughters and three sons, Georg, born October 11, 1892, Ernst, born September 23, 1895 and Bernhard, born June 30, 1901.

The line of Saxe Meiningen was founded by Duke Bernhard, third son of Ernst I of Saxony surnamed the Pious, the friend and companion in arms of King Gustaf Adolf of Sweden. The Duchy was only one-third its present size up to the year 1826, when, by the extinction of the ancient family of Saxe Gotha, the territories of Hildburghausen and Saalfeld fell to the father of the present Duke. The Duke has a civil list of 394,286 marks paid out of the produce of the State domains. Besides these he receives the half of the surplus revenue, which is estimated for each of the three financial years 1912-14 at 40,738*l*.

There is a legislative organization, consisting of one Chamber of twenty four representatives, four elected by those who pay the highest land and property tax, and four by those who pay income tax on an income of 150*l* or more, sixteen by all other inhabitants. There are new elections every six years.

Budget for the 3 financial years 1912-14, revenue, 527,316*l*; expenditure, 445,840*l*; 81,476*l* of the revenue are drawn from State domains. Chief expenditure, *Matrikularbeiträge* (or contributions) for the Empire, the interest of the public debt the expenses for the administration of the State domains and of the State, and the civil list for the Ducal family. Debt in 1911, 319,288*l*, largely covered by productive State capital.

Population, 278,762 in 1910. In 1910, 271 433 Protestants 5 238 Catholics, 1,137 Jews. The capital, Meiningen, had, in 1910, 17,186 inhabitants. In 1911 there were 2,244 marriages, 7,854 births alive, 4,389 deaths, surplus of births, 3,464. Of the births 250 (2.9 per cent.) were stillborn, and 976 (12.0 per cent.) illegitimate.

In 1912 there were 319 public elementary schools with 903 teachers (785 male, 118 female) and 48,928 (18.0 per cent. of the inhabitants) pupils.

*British Vice-Consul* —R. M. Turner (resides in Leipzig)

## GRAND-DUCHY OF SAXONY

(GROSSHERZOGTHUM SACHSEN)

The reigning Grand duke is **Wilhelm Ernst**, born June 10, 1876, son of the late Prince Karl August and Princess Pauline of Saxe Weimar, succeeded his grandfather, the late Grand-duke Karl Alexander, January 5, 1901 married, April 30, 1903, to Caroline, Princess of Reuss, who died January 17, 1905 married a second time, January 4, 1910, to Feodora, Duchess of Sachsen Meiningen

The family of the Grand-duke stands at the head of the Ernestine or elder line of the princely houses of Saxony which include Saxe-Meiningen Saxe-Altenburg and Saxe-Coburg Gotha while the younger or Albertine line is represented by the Kings of Saxony. *In the event of the Albertine line becoming extinct, the Grand-duke of Weimar would ascend the Saxon throne.* Saxe-Weimar was formed into an independent Principality in 1840. After a temporary subdivision the Principality was finally on the death of the last duke of Eisenach in 1741, united into a compact whole under Ernest Augustus (1728-1748) who introduced the principle of primogeniture. At the Congress of Vienna a considerable increase of territory together with the title of Grand-duke was awarded to Duke Karl August, known as a patron of German literature.

The Grand duke has a large private fortune. He has also a civil list of 1,020 000 marks or 51 000 £.

The Constitution was granted May 5, 1816 slightly altered October 15, 1850. It was the first liberal Constitution granted in Germany. The legislative power is vested in a House of Parliament of one Chamber, composed of 38 members, five chosen by landowners having a yearly income of from 150 £ upwards, five by other persons of the same income (one each from the University of Jena, the Chamber of Commerce, the Chamber of Handicrafts, the Chamber of Agriculture, and the Chamber of Labour) and twenty three by the other inhabitants. All deputies are elected directly. All citizens over twenty five years of age have the franchise. The Chamber meets every three years. The executive, acting under the orders of the Grand duke but responsible to the representatives of the country, is divided into three departments.

The budget is granted for a period of three years, from 1911 to 1913, annual income and expenditure 612 769 £. The State forests yield a large income, while there is a graduated tax on all incomes, the estimates for which are based on a total income for the population of 9,418,916 £ in January, 1909. Public debt, 145,826 £ in 1908. The debt is more than covered by real property and stocks.

The Grand duchy consists of the three detached districts of Weimar, Eisenach, and Neustadt, to which belong also 24 smaller exclaves. Population, December 1, 1910, 417,149. Marriages, 1911, 3,489, births, 11,797 deaths 7,164, surplus of births, 4 638. Among the births, 375 (3.18 per cent.) were stillborn, and 1,408 (10.94 per cent.) illegitimate. In 1910, 48.94 per cent. lived in rural communes. Weimar, the capital, had 34,582 inhabitants in 1910, Eisenach, 38,862, Jena, 38,487, Apolda, 22,610.

In 1910 there were 898 774 Protestants, 19,980 Catholics, 1,323 Jews, 841 other Christians, and 1,231 not stated.

The University at Jena (see Germany) serves the four Saxon Duchies. The public schools in the Grand duchy at the close of 1910-11 were as follows —

Schools	No.	Teachers	Pupils
Elementary schools	455	1 159	65 888
Gymnasias	3	56	586
Realgymnasias	2	29	583
Realschulen with Realprogymnasium	1	12	179
Oberrealschule (recently founded)	1	30	40
Realschulen (1 private)	5	38	616
Normal schools	2	5	296
Drawing schools	2	7	375
Deaf-mute and blind asylum	1	10	52

Saxe-Weimar contains two Landgerichte, while the district of Neustadt is subject to the jurisdiction of the Landgericht at Gera, common to Saxe-Weimar and the Reuss Principalities. The Oberlandesgericht at Jena is a common court of appeal for the four Saxon Duchies, Schwarzburg-Rudolstadt, the two Reuss Principalities, and parts of Prussia.

*British Minister Plenipotentiary* — Rt Hon Sir W E Goschen, G C V O, K.C.M.G.

## KINGDOM OF SAXONY

(KÖNIGREICH SACHSEN)

**Reigning King** — Friedrich August III., born May 25, 1865, son of the late King Georg, succeeded to the throne on the death of his father October 15, 1904, married November 21, 1891, to Princess Luise of Tuscany, born September 2, 1870. The marriage was dissolved February 11, 1903. Offspring: Prince Georg, born January 15, 1893, Prince Friedrich Christian, born December 31, 1893, Prince Ernst Heinrich, born December 9, 1896, Princess Margarethe, born January 24, 1900, Princess Maria Alix, born September 27, 1901, Princess Anna Monica, born May 4, 1903.

The King has two sisters: Princess Mathilde born March 19, 1863, and Princess Marie Josefa, born May 31, 1867, married October 2, 1886, to the late Archduke Otto of Austria, widow November 1, 1906, and two brothers: Prince Johann Georg born July 16, 1869, married (1) April 5, 1894, to Duchess Maria Isabella of Württemberg (died May 24, 1904) (2) October 26, 1904, to Princess Maria Immaculata of Bourbon, and Prince Max, born November 17, 1878, became a priest July 26, 1896.

The royal house of Saxony counts amongst the oldest reigning families in Europe. Heinrich of Eilenburg, of the family of Wettin, was Margrave of Meissen 1089-1103, he was succeeded by his son, Heinrich (1108-1123), and Konrad the Great (1123-1156) well known in Saxon history. The house subsequently spread into numerous branches, the elder of which, called the Ernestine line is represented by the ducal families of Saxe-Altenburg, Saxe-Coburg-Gotha, and Saxe-Meiningen, and the grand-ducal family of Saxe-Weimar, while the younger, the Albertine line lives in the rulers of the Kingdom of Saxony. In 1900 the Elector Friedrich August III. (1763-1827), on entering the Confederation of the Rhine, took from Napoleon the title of King of Saxony which was confirmed by the Congress of Vienna in 1815. The predecessors of the present King were Friedrich August I (1806-1827), Anton (1827-1854), Friedrich August II (1854-1856), Johann (1856-1873), Albert (1873-1900), Georg (1900-1904).

**King Friedrich August III** has a civil list of 3,741,802 marks per annum. Exclusive of this sum are the appanage of the Prince Johann Georg, and the appanage of the Princess Mathilde amounting (1910-11) to 349,554 marks. The formerly royal domains consisting chiefly of extensive forests, became, in 1830, the property of the State.

**Constitution and Government.**—The Constitution dates from September 4, 1831, but has undergone alterations up to 1909. The crown is hereditary in the male line; but, at the extinction of the latter, also in the female line. The sovereign comes of age at the completed eighteenth year, and, during his minority, the nearest heir to the throne takes the regency.

The legislature is jointly in the King and Parliament, the latter consisting of two Chambers. The Upper Chamber comprises the princes of the blood royal who are of age, one deputy of the (Lutheran) archbishopric of Meissen, the proprietor (or one deputy) of the 'Herrschaft' of Wildenfels, one of the proprietors of mediatised domains, now held by five owners, one deputy of the University of Leipzig, the two proprietors of 'Ständeherrschaften,' the Lutheran 'Oberhofprediger' at Dresden, the Dean of the Roman Catholic Chapter of St. Peter at Bautzen in his character as 'Apostolic Vicar' at Dresden, the superintendent at Leipzig, one deputy of the collegiate institution of Wurzen, one of the proprietors of four estates in fee, twelve deputies elected by the owners of other nobiliary estates for life, ten noble proprietors and five other members without restriction nominated by the King for life, and the burgomasters of eight towns. The Lower Chamber is made up of forty-three deputies of towns and forty-eight representatives of rural communes. The qualification for a seat in the Upper House is the possession of a landed estate worth at least 4,000 marks a year, and the qualification for the right of electing to the same is the possession of a landed estate worth at least 3,000 marks a year, which qualification, however, is not required by the *ex officio* deputies of chapters and of the university. Members of the Lower House must be Saxon citizens over thirty, and pay some direct State taxes, and electors are all Saxon citizens above twenty-five years of age who pay some direct contribution. Every elector has a right to one, two, or three additional votes according to (1) the amount of his income, (2) the value of his landed property, (3) the possession of an income (by public officials) over a certain amount, (4) his right as an elector for the Chamber of Industry or the Chamber of Agriculture, (5) his scientific education, (6) his scientific or artistic profession, (7) his age (an elector over 50 years of age has an additional vote). The members of both Houses, with the exception of the hereditary and certain of the *ex officio* members, are each allowed 12 marks per day (6 marks per day if they reside in the town where the Legislature meets) during the sittings of Parliament, and an allowance for travelling expenses. Both Houses may propose new laws, no taxes can be imposed, levied, or altered without the sanction of both.

Last election 1911 Conservatives, 29, National Liberals, 26, Radicals, 10, Socialists, 26

The executive is in the King and in the Ministry of State (*Gesamt-Ministerium*), and in the separate Ministries of Justice, of Finance, of the Interior, of Education and Ecclesiastical Affairs, of Foreign Affairs, and of War.

### Area and Population —

Governmental Divisions	Area, Eng. Sq. Miles	Population.		Population per Sq. Mile 1910
		Dec. 1910	Dec. 1905	
Dresden	1,674	1,350,287	1,284,397	806.6
Leipzig	1,378	1,234,623	1,146,423	895.9
Bautzen	958	443,548	426,420	467.5
Chemnitz	799	920,548	851,130	1151.6
Zwickau	983	857,659	800,231	872.4
Total	5,787	4,806,661	4,508,601	839.8

The growth of the population is shown in the following table —

Year	Population	Density per Sq Mile	Annual Increase per Cent.	Year	Population	Density per Sq Mile	Annual Increase per Cent.
1875	2,760,559	471	1.99	1900	4,302,216	730.6	2.19
1885	3,182,008	545	1.41	1905	4,508,601	779.1	1.46
1895	3,787,688	654.5	1.38	1910	4,506,661	839.6	1.32

The conjugal condition of the population was as follows in 1910 —

	Males	Females	Total
Children	784,656	790,612	1,575,168
Adults—			
Unmarried	558,954	557,231	1,111,185
Married	916,325	914,939	1,831,174
Widowed	54,798	198,603	248,396
Divorced or separated	14,265	26,473	40,738

Saxony contains (1900) 47,009 Lusatian Wends, most of them in the district of Bautzen. In 1900 there were 161,534 foreigners (exclusive of Germans belonging to other German States).

The movement of the population is shown in the following table —

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1909	38,641	141,480	4,769	20,082	57,786	80,955
1910	38,907	134,009	4,599	20,115	72,251	7,649
1911	41,286	180,257	4,374	19,790	79,750	46,133

The population of the principal towns was, 1910 (including the municipalities incorporated up to July 1, 1912) —

Leipzig	560,859	Zittau	37,064	Reichenbach	29,689
Dresden	450,665	Freiberg	36,337	Grimmitschan	28,618
Chemnitz	287,807	Meissen	8,845	Morano	25,470
Plauen	121,272	Bautzen	82,764	Glauchau	25,156
Zwickau	73,542				

**Religion.**—Although the royal family is Roman Catholic, the vast majority of the inhabitants of Saxony are Protestants. In 1910, Lutherans, 4,501,510, Roman Catholics, 238,872, Reformists, 16,531, other Christians, 30,548, Jews, 17,587, unclassified, 6,613. Of the Lutheran Church, the chief governing body is the 'Landes-Conistorium' or National Consistory at Dresden, and it also has a representative Synod (*Synode*) with 35 clerical and 42 lay members (1901).

**Instruction.**—In 1911, there were 2,803 public Protestant and 56 Roman Catholic common schools, 58 private and chapter schools, and 1,948 advanced common schools (*Fortbildungsschulen*), or altogether 4,865, with a total attendance of 971,915. In addition there were 1 technical high school at Dresden (winter term, 1911-12, 1,186 students), 1 mining academy at Freiberg

(358 students), 1 forestry academy at Tharandt (109 students), and 1 veterinary high school at Dresden (280 students), further, 19 Gymnasias, 18 Realgymnasias, 5 'Oberrealschulen', 29 'Realschulen', 26 seminaries, 5 higher girls schools and 'Studienanstalten' (1912) altogether 108 educational establishments, with a total attendance of 82,927 (1911), exclusive of the University and a large number of industrial, commercial, agricultural, manual, and art institutes. The University of Leipzig is one of the largest in Germany (5,170 students) See under *Germany*

**Justice, Crime, and Pauperism.**—Saxony has one 'Oberlandesgericht', at Dresden, 7 'Landgerichte', and 111 'Amtsgerichte'. The 'Reichsgericht' has its seat at Leipzig. In 1909, 80,798 persons were convicted of criminal offences.

Recent statistics of pauperism are not available

**Finance.**—The financial period extends over a term of two years. The budget for each of the two years 1912-13 estimated the receipts from State property and taxes at 19,161,297*l.*, and the cost of working and of collection at 13,556,886*l.* the surplus being 5,604,411*l.* Other receipts were estimated at 8,499,836*l.*, and expenditure at 9,104,247*l.*, so that the ordinary revenue and expenditure balanced at 22,661,133*l.* The extraordinary expenditure for 1912-1913 was put at 3,834,885*l.* More than one half of the total revenue is derived from domains, forests, and State railways. Expenditure on public debt, 1,939,475*l.* for each of the years 1910 and 1911. Public debt, 1911, 43,494,725*l.* incurred almost entirely on railways and telegraphs, and other works of public utility.

**Production and Industry.**—Saxony is, in proportion to its size, the busiest industrial State in the Empire, rivalled only by the leading industrial provinces of Prussia. Textile manufactures form the leading branch of industry, but mining and metal working are also important.

In 1911, of the total area, 2,466,864 acres were under cultivation, viz. — 2,028,246 acres (82.22 per cent.) arable, 422,870 acres (17.12 per cent.) meadow, 15,639 acres (0.63 per cent.) pasture, 809 acres (0.03 per cent.) vineyard, besides 950,256 acres under wood, of which 425,588 acres belonged to the State.

Areas under the chief crops in acres and the yield in metric tons (of 2,204 lbs.) in 1910 —

Crop	Acres	Metric tons	Crop	Acres	Metric tons
Wheat	164,771	147,441	Oats	479,819	813,711
Rye	516,100	86,551	Potatoes	811,081	296,854
Barley	84,084	40,306	Hay	422,810	891,607

On May 1, 1911, the factory hands in Saxony were returned at 757,518, of whom 494,848 were males and 262,670 females, 246,069 were engaged in the textile industry, 191,208 in the manufacture of machinery and tools, 54,489 in industries connected with stone and earth, and 47,627 in those connected with paper and leather. The total number of factories and industrial establishments was 80,623. The following shows the mining statistics for five years —

Year	Coal Mines				Other Mines			Total			
	No. of Mines	Hands	Production in metric tons		Value in 1,000 marks	No. of Mines	Hands	Produce in 1,000 marks	No. of Mines	Hands	Produce in 1,000 marks
			Coal	Lignite							
1907	199	28,951	4,878,431	2,485,548	69,455	84	2,504	1,819	143	31,455	71,274
1908	105	31,890	7,908,600		76,788	28	9,878	542	133	31,209	77,810
1909	103	32,437	8,209,000		78,915	34	9,159	1,358	137	34,596	77,478
1910	110	33,384	8,635,000		78,950	39	1,941	1,438	189	35,335	79,468
1911	108	32,964	5,066,000	4,330,000	76,500	28	1,072	1,818	186	34,006	77,828

<sup>1</sup> Exclusive of mines not worked

In 1910 the Saxon iron-foundries produced 512,844 metric tons of finished iron, value 4,697,403<sup>1</sup>. In 1910-1911, 487 breweries produced 87,796,560 gallons of beer, and 554 distilleries consumed 113,163 metric tons and 294,347 gallons of raw material in the manufacture of spirits and produced 2,696,785 gallons of pure alcohol.

*British Minister Resident* — A. C. Grant Duff (residing at Dresden)

*British Consul* — Ch. W. Palmé (residing at Dresden)

There are vice-Consuls at Dresden, Leipzig and Chemnitz

## SCHWARZBURG-RUDOLSTADT

(FÜRSTENTUM SCHWARZBURG-RUDOLSTADT)

The reigning Prince is Gunther, born August 21, 1852, succeeded his cousin Prince Georg, Jan. 19, 1890, married December 9, 1891, to Princess Anna Luise of Schönburg-Waldenburg.

The Schwarzburg-Rudolstadt line is a younger branch of the house of Schwarzburg, being descended from Albrecht VII, 1605, who died in the middle of the seventeenth century. The present sovereign has a civil list of 300,000 marks. The State domains are the property of the reigning family.

For all legislative measures the Prince has to obtain the consent of a Chamber of Representatives of sixteen members, four elected by the highest assessed inhabitants, and the rest returned by the general population. The deputies are elected for three years.

There are triennial budgets. For the period 1909-11 the annual public income and expenditure were settled at 144,766*l* each. Public debt (1911), 227,208*l*.

Area, 368 sq miles, population (1910), 100,702, Protestant (1910), 99,210, Catholics, 1,288, other Christian sects, 88, and Jews, 78. Rudolstadt, the capital, had (1910) 12,937 inhabitants.

## SCHWARZBURG-SONDERSHAUSEN

(FÜRSTENTUM SCHWARZBURG-SONDERSHAUSEN)

Since the decease on March 28, 1909, of Prince Karl Gunther, the principality of Schwarzburg-Sondershausen has been united with Schwarzburg-Rudolstadt by a personal bond of union under the government of Prince Günther. (See Schwarzburg-Rudolstadt).

The princes of the house of Schwarzburg belong to a very ancient and wealthy family. The small territory of the house was left undisturbed at the Congress of Vienna. But it is now transferred to the State and in return for its use the Prince of Schwarzburg-Sondershausen receives an annual grant (Domaneurente) of 25,000*l*.

Restricted legislative rights are given to a Diet which consists of eighteen members, six appointed by the Prince, six elected by certain highly taxed landowners and others, and six elected by the inhabitants in general. The sole executive and part of the legislative power is in the hands of the Prince, who exercises his authority through a Government divided into five departments.

For the years 1912 to 1915 the annual revenue and expenditure are estimated to amount to 170,887*l*. Public debt (April 1, 1912), 301,584*l*. In the debt is included a railway loan of 115,000*l*, against which there are claims amounting to 112,000*l*.

Area, 833 sq miles, population (1910), 89,917, mostly Protestant. The chief towns, Sonderhausen and Arnstadt, have respectively 7,769 and 17,841 inhabitants.

## WALDECK

(FÜRSTENTUM WALDECK.)

Reigning Prince, **Friedrich**, born January 20, 1865, the son of Prince George Victor and Princess Helena of Nassau, succeeded at the death of his father May 12, 1893, married, August 9 1895, to Princess Bathildis of Schaumburg Lippe, offspring Prince Josias, born May 18, 1896, Prince Max born September 13, 1898, Princess Helene, born December 22, 1899, Prince Georg Wilhelm, born March 10, 1902.

Brother and sisters of the reigning prince are —I. Princess Pauline born October 10 1855 married, May 1 1891 to the Hereditary Prince Alexis of Bentheim Steinfurt II. Princess Emma, born August 2, 1856 married January 7, 1879 King Willem III of the Netherlands widow November 20, 1890 III. Princess Helene born February 17 1861 married, April 27, 1882, to Prince Leopold Duke of Albany son of Victoria, Queen of Great Britain widow March 26, 1884. IV. Princess Elisabeth born September 6, 1873 married, May 3, 1890, to Alexander hereditary Count of Erbach-Schönburg. V. Prince Wolrad-Friedrich (brother on the father's side), born June 22, 1892.

After the war between Austria and Prussia, at the end of 1866, a Treaty of Accession was signed by the Prince on July 14, 1867 by which he surrendered his chief sovereign rights to King Wilhelm I. for ten years retaining merely nominal power and renewed November 24 1877 till January 1 1888. A Treaty made March 2, 1887 continued the arrangement for the future, making it terminable on notice given.

There is a legislative assembly of fifteen members, with authority restricted to purely local affairs. In terms of the 'Treaty of Accession' all public officials are appointed by the King of Prussia, and take the oath of fidelity to him. Prussia also manages the finances of the Principality.

The revenue and expenditure for 1912 was 74 870*l*, and for 1913, 75,800*l*.

The debt on July 1, 1910, was 77,595*l*.

Area, 433 sq miles population (1910), 61,707 (30,544 males and 31 163 females) Protestants, 57,817, Catholics, 2,858; other Christians 393 Jews, 590 unclassified, 49 The residence town, Arolsen, had 1,793 inhabitants in 1910

*British Minister Resident* —A. C. Grant Duff (residing at Dresden)

*Consul-General* —W. B. Hearn (Hamburg)

## WÜRTTEMBERG.

(KÖNIGREICH WÜRTTEMBERG.)

Reigning King —**Wilhelm II.**, born February 25, 1848, son of the late Prince Friedrich of Württemberg (cousin of the late king Karl I) and of the late Princess Katharine of Württemberg (sister of the late king), ascended the throne on the death of Karl I, October 6, 1891 Married (1),

February 15 1877, to Princess *Marie* of Waldeck Pyrmont, who died April 30, 1882, issue Princess *Pauline*, born December 18, 1877, married October 29, 1898 to Prince Friedrich of Wied (2), April 8, 1886, Princess *Charlotte* of Schaumburg Lippe, born October 10, 1864

The former Duchy of Württemberg became, with a large increase of territory an electorate in 1803, and was erected into a Kingdom by the Peace of Pressburg, 1805, and by a decree of January 1, 1806. The civil list of the king amounts to 102,299*l* with additional grants of 2,528*l* for the other members of the royal family

**Constitution and Government**—Württemberg is a constitutional hereditary Monarchy, the Constitution of which bears date September 25, 1819, but certain changes were made by the law of July 16, 1906. The Constitution vests certain powers in the Landstände or two 'Estates' of the realm, called together at least every two years to discuss and sanction the estimates. In the first chamber are: 1. The princes of the Royal House, 2. the heads of princely or countly (gräfllich) families to whose possessions a vote in the imperial or provincial diet was formerly annexed, also the heads of 2 other families conditionally, 3. members (not more than 6) appointed by the King, 4. 8 members of knightly rank, 5. 6 ecclesiastical dignitaries, 6. a representative of the University of Tübingen, and one of the technical high school of Stuttgart, 7. 2 representatives of commerce and industry, 2 of agriculture, and 1 of handicrafts. The second chamber consists of: 1. a deputy from each district (Oberamtsbezirk), 2. 6 deputies from Stuttgart, and 1 from each of 6 other towns, 3. 9 deputies from the Neckar and Jagst circle, and 8 from the Black Forest and Danube circle. All the members of the second Chamber are chosen for 6 years, and they must be thirty years of age, property qualification is not necessary. The president of the Upper Chamber is appointed by the king, the vice-president is elected by the Chamber from among the mediatised princes and nobles (royal princes and life members being ineligible), the president and vice-president of the Second Chamber are both elected by the deputies. When the Chambers are not sitting they are represented by a committee of twelve persons, consisting of the presidents of both Chambers, two members of the Upper, and eight of the Lower House. A special court of justice, called the Staats Gerichtshof, is appointed guardian of the Constitution. It is composed of a president and twelve members six of whom, together with the president are nominated by the king while the other six are elected by the combined Chambers. Members of both Chambers receive 15 marks a day for attendance, a free pass over the railways, reimbursement of incidental travelling expenses.

Last election 1906. Conservatives, 15, German Party, 18, Socialists 16, People's Party, 23, Centre, 25.

The executive is a Ministry of State of six ministerial departments. The heads being the Ministers of Justice, of Foreign Affairs and the Royal House, to whose province belongs also the administration of the State railways, posts, and telegraphs, of the Interior, of Ecclesiastical Affairs and Public Education, of War, and of Finance. There is also a Privy Council (Geheimer Rat), of which the Ministers and some Councillors (Wirkliche Staatsräte) are members, and which the sovereign has a right to consult on all occasions.

For administrative purposes the country is divided into 4 circles (Kreise). 64 districts (Oberämter), and 1,892 communes (Gemeinden).

## Area and Population —

Circles	Area in Sq. Miles	Population		Population per Sq. Mile 1910
		1910	1905	
Neckar	1,286	882,569	811,478	685.5
Black Forest (Schwarzwald)	1,844	570,620	541,662	309.6
Jagst	1,985	414,969	407,059	209.0
Danube (Donau)	2,419	569,216	541,980	239.0
Total	7,534	2,437,574	2,302,179	323.5

In 1910 there were 1,192,392 males and 1,245,182 females.

In 1910, 872,192, or 35.8 per cent., lived in communes of 5,000 inhabitants and upwards, and 1,565,382, or 65.5 per cent., in other communes. Foreigners, 25,848 in 1910. According to the last census of employment (1907) of the total population of 2,338,010 882,421 were engaged in agricultural pursuits, 934,971 in industry, 224,077 in trade and commerce, 10,971 in domestic service, 124,431 in the army and the professions, and 161,139 without any calling.

The movement of the population for five years was —

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1907	18,626	77,828	2,098	6,365	46,206	31,622
1908	18,073	78,584	2,216	6,648	47,010	31,574
1909	17,511	77,012	2,199	6,303	45,560	31,452
1910	17,449	74,016	1,885	6,146	43,611	30,405
1911	17,964	71,658	1,971	6,027	45,525	26,133

The population in 1910 of the largest towns was as follows —

Stuttgart <sup>1</sup>	286,218	Göppingen	22,373	Schwenningen	15,411
Ulm	56,109	Gmünd	21,312	Feuerbach	14,244
Heilbronn	42,683	Tübingen	19,076	Zuffenhausen	12,752
Esslingen	32,216	Heidenheim	17,780	Ebingen	11,423
Bietingen <sup>1</sup>	29,763	Tuttlingen	15,862	Aalen	11,247
Ludwigsburg <sup>1</sup>	24,926	Ravensburg	15,594		

<sup>1</sup> Including extensions.

**Religion.**—The various creeds were distributed as follows at the census of 1910:—

Kreise	Protestant	Roman Catholic	Other Christians	Jews	Others
Neckar	792,176	105,817	7,404	6,276	1,064
Black Forest	418,409	147,807	3,381	1,359	164
Jagst	275,976	125,475	1,048	2,412	56
Danube	514,626	551,294	1,080	1,935	286
Total	1,471,182	789,925	12,863	11,982	1,561

In the king is vested the right of guardianship and direction over the churches, and, so far as he belongs to the Evangelical Church also the conservation of the episcopal rights in this church. The administration of the Evangelical Church is in the hands of a consistorium of one president, nine councillors, and six general superintendents, at Ludwigsburg, Heilbronn, Reutlingen, Tübingen, Hail, and Ulm. The representative body of the Evangelical ecclesiastical communes is the Evangelical Landes synode, consisting of 25 clerical and 25 lay representatives of the dioceses and 1 of the evangelical theological faculty of the university, with 3 clerical and 3 lay members appointed by the evangelical princes. It meets at least every six years, oftener if necessary. The Roman Catholics are under a bishop, who has his see at Rottenburg, and is suffragan to the archbishop of Freiburg in Baden. The State exercises its rights over the Catholic Church through the Catholic Kirchenrat, which is appointed by the king and is subject to the Ministry of Worship. The Jews likewise are under a special council (Oberkirchenbehörde), nominated by the king on the proposition of the Minister of Ecclesiastical Affairs and Public Education.

**Instruction**—Education is compulsory, and there must be one public school or more in every commune. According to official returns, there is not an individual above the age of ten unable to read and write. In 1911 there were 2,250 places with elementary schools with 6,081 teachers, attended by 362,708 pupils, 104 Realschulen with 17,009 pupils, 22 grammar schools (Elementarschulen) with 4,939 pupils, 18 gymnasia, of which 4 are training colleges for the Protestant clergy, 6 Realgymnasias, 5 Progymnasias and 7 Real progymnasias, 50 Latin schools, having together 9,287 scholars. For girls there are 23 high schools with 6,776 pupils and 1 gymnasium with 76 pupils. There are, besides, the Technical High School at Stuttgart, the Veterinary High School at Stuttgart, the Agricultural High School at Hohenheim, and several agricultural and other special institutes. The State funds appropriated to education amounted in 1909-10 to 586,100. For Tübingen University, see under Germany.

**Justice**—In addition to other tribunals there is one Oberlandesgericht at Stuttgart. In 1909-20,029 persons were convicted of crimes.

**Finance**—Estimated revenue and expenditure for two years ending March 31—

Sources of Revenue	1911-12	1912-13
	Marks	Marks
Forests, Farms, Mines, Metal, and Salt Works	14,213,212	13,701,342
Commercial Revenues—Railway net receipts	20,095,133	21,281,290

Public debt, 30,425,976*l* divided into the general debt and the railway debt. The latter amounted to 28,924,116*l* on April 1 1911

**Army**—The troops of Wurtemberg form the 13 corps of the German army (q.v.) Their strength on a peace footing is about 24,454

**Industry**—Wurtemberg is primarily an agricultural State, and 2,938,900 acres, or 64 per cent. of the entire area, are under cultivation, and 1,482,240 acres, or 31 per cent. under forest.

Areas under the principal crops and yield in metric tons in 1911 —

	1911			1911	
	Acres	Yield tons		Acres	Yield tons
Wheat	104,611	71,116	Oats	371,967	224,514
Rye	49,601	21,744	Potatoes	25,312	755,170
Barley	250,287	177,771	Hay	1,081,877	1,834,160
Sweet	286,220	173,689	Hoofs	959	2,158

In 1912 wheat, spelt and rye produced 346,000 tons barley 171,000 tons 195,700 potatoes, 1,297,200 hoofs 22,260 (all preliminary figures)

Vines 37,603 acres yield 3,643,134 gallons of wine. In 1910 were produced 87,686,676 gallons of beer. The total value of the minerals raised in 1910 was 218,850*l*. There are active iron foundries and salt works.

**British Minister**—Sir V. Corbett K.C.V.O. (residing at Munich)

**Consul at Stuttgart**—J. H. H. Gastrell

## GREECE

(KINGDOM OF HELLAS)

### Reigning King

**Konstantinos I**, born August 2nd, 1868, the eldest son of Georgios (George I) succeeded on the assassination of his father March 18 1913, married October 27 1889, to Queen Sophia, born June 14, 1870 Princess of Prussia sister of the Emperor William II

### Children of the King

I Prince *Georgios*, born July 19, 1890 II Prince *Alexandros* born August 1, 1893 III Princess *Helena* born May 2 1898 IV Prince *Pavlos*, born December 14 1901 V Princess *Irene*, born February 14 1904

### Brothers and Sister of the King

I Prince *Georgios*, born June 24, 1869, High Commissioner in Crete 1898-1906, married, November 21 1907, to Princess Marie, only child of Prince Roland Bonaparte, offspring — Prince *Petros*, born December 3, 1908, Princess *Eugenia*, born February 11 1910 II Prince *Nicolaos*, born January 21, 1872 married, August 29, 1902, to the Grand Duchess Helena Vladimirovna, daughter of the Grand Duke Vladimir of Russia, offspring, Princess *Olga* born June 11 1903, Princess *Elizabeth*, born May 23, 1904 Princess *Maria* born November 20 1906 III Princess *Maria* born March 3 1876, married April 30 1900 to the Grand Duke George Mikhailovitch of Russia IV Prince *Andreas*, born February 1, 1882, married, October 7, 1903 to Princess Alice daughter of Prince Louis of Battenburg offspring Princess Margaret born April 17, 1905 Princess *Theodora* born May 30, 1906 V Prince *Christophoros* born August 10 1888

By decision of the Greek National Assembly of April 14, 1913, a civil list of 2,000 000 drachmas (80,000*l*) was settled on the King, and an annual sum of 300,000 drachmas on the Queen Mother

Greece, a province of the Turkish Empire since the latter part of the 15th century, gained its independence in the insurrection of 1821-29, and by the Protocol of London of February 3, 1830 was declared a kingdom under the protection of Great Britain, France, and Russia. The crown was accepted by Prince Otto of Bavaria, who ascended the throne January 23, 1833 being under the age of eighteen. He was expelled the Kingdom, after a reign of 29 years, in October, 1862 which event was followed by the election under the directing guidance of the three protecting Powers, of King George I in 1863

The King, according to Art. 49 of the Constitution of 1864, attains his majority upon completing his eighteenth year. Within two months at the most the King must convocate the Legislature. If the successor to the throne is either a minor or absent at the time of the King's decease, and no Regent has been appointed, the Legislative Chamber has to assemble of its own accord within ten days after the occurrence of that event. The constitutional royal authority in this case has to be exercised by the ministerial council, until the choice of a Regent, or the arrival of the successor to the throne. The

present sovereign is allowed, by special exception to adhere to the religion in which he was educated, the Protestant Lutheran faith, but his heirs and successors must be members of the Greek Orthodox Church

### Constitution and Government

The Constitution of Greece, adopted October 29, 1864, vested the whole legislative power in a single chamber, called the *Bulé*, consisting of 335 representatives, elected by manhood suffrage (in the proportion of 1 for every 12,000 inhabitants) for the term of four years. In 1911 the Constitution was modified and a substitute for a second chamber was adopted in the re-establishment of the Council of State. The functions of the Council will be the elaboration of *Projets de Lois* and the annulling of official decisions and acts which may be contrary to law. The new Constitution came in force on June 1, 1911. The deputies must be at least 25 years of age and their number has been fixed at 181. The elections take place by ballot, and each candidate must be put in nomination by the requisition of at least one-thirtieth of the voters of an electoral district. The *Bulé* must meet annually for not less than three, nor more than six, months. No sitting is valid unless at least one third of the members of the Assembly are present, and no bill can pass into law without an absolute majority of members. Every measure, before being adopted, must be discussed and voted, article by article thrice, and on three separate days. A revision of any non fundamental provisions of the new Constitution may be demanded, after the lapse of ten years by an ordinary Parliament by means of two votes passed by a two-thirds majority, provided that the second vote shall not be taken until at least one month after the first, and provided also that such revision shall be carried out by a newly elected Chamber. The Chamber of Deputies, unless specially convoked at an earlier date, for extraordinary occasions, must meet on October 1 (old style) of every year. The deputies are paid 1,000 drachmai each per session except those living in Athens, who receive only 800 drachmai. In case of absence extending over more than five sessions, the deputy has 20 drachmai per session taken from the total amount due to him.

Chamber of Deputies (March 28 1912) Ministerialists, 147, Opposition, 34 (8 supporters of M. Theotokis, 3 of M. Zaimis, 7 of M. Blavromichalis, 8 of M. Rallis, and 8 are Independents)

The Ministry, appointed October 19, 1910, is as follows —

Premier and Minister of War — M. *Venizelos*.  
 Minister of Foreign Affairs — M. *Coromilas*.  
 Minister of the Interior — M. *Egoufis*.  
 Minister of Finance — M. *Alexandre Dromoulis*.  
 Minister of Commerce and Agriculture — M. *Nichalakopoulos*.  
 Minister of Justice — M. *Rattian*.  
 Minister of Public Instruction — M. *Tzermoukos*.  
 Minister of Marine — M. *Stratos*.

### Area and Population.

At the census of 1879 Greece had a population (including that of Thessaly in 1881) of 1,978,768; in 1898, 2,188,098, in 1896, 2,438,806, on October 27, 1907, 2,681,952. In 1896 the population consisted of 1,246,816 males and 1,184,986 females, in 1907, 1,324,942 males and 1,357,010 females.

Estimated population 1909, 2,666,000. The area of Greece is about 25,014 square miles, and thus has about 105 inhabitants to the square mile. The population of the nomos or departments into which Greece is divided is as follows<sup>1</sup> —

Nomos or Departments	Population 1907	Nomos or Departments	Population 1907
Acarnania and Ætolia	141,406	Eurytania	47,192
Acbeia	1,50,916	Karditia	92,941
Argadia	162,824	Lacedæmon	87,106
Argolis	81,948	Laconia	61,522
Arta	41,180	Larisa	86,066
Attica	341,247	Leucas	41,186
Bœotia	65,816	Magnesia	162,742
Cephalonia	71,237	Messenia	127,992
Corfu	99,671	Phocis	62,246
Corinthia	71,229	Phthiotis	112,828
Cyclades	130,378	Trikkala	90,648
Ellis	108,510	Triphylia	80,523
Eubœa	116,903	Zante	42,502
		Total	2,631,952

<sup>1</sup> See note under population of Turkey

In recent years there has been considerable emigration. According to United States statistics the number of Greek immigrants into the States was, in 1904-05 10,515, 1905-06, 19,490, in 1906-07, 36,580, in 1907-08, 21,489, in 1908-09 14,111, in 1909-10, 25,888, 1910-11, 45,000.

The principal towns are the following, with populations, 1907 —

Athens	167,479	Larisa	18,041	Calamata	15,397
Phæra	73,579	Trikkala	17,809	Chalcis	10,958
Patras	37,724	Hermoupolis	17,773	Tripolitza	10,958
Corfu	13,978	Pyrgos	13,690	Laurium	10,007
Volo	23,569	Zante	13,580	Syra	18,132

## Religion

The great majority of the inhabitants of the Kingdom are adherents of the Greek Orthodox Church. By the terms of the Constitution of 1864 the Greek Orthodox Church is declared the religion of the State, but complete toleration and liberty of worship is guaranteed to all other sects. Nominally, the Greek clergy owe allegiance to the Patriarch of Constantinople, though he now exercises no governing authority, he is elected by the votes of the bishops and optimates subject to the Sultan, his jurisdiction extends over Thracæ and other countries, including Bosnia and Crete, as well as the greater part of Asia Minor. The real ecclesiastical authority, formerly exercised by him in Greece, was annulled by the resolutions of a National Synod, held at Nauplia in 1883, which vested the government of the Orthodox Church, within the limits of the Kingdom, in a permanent council, called the Holy Synod, consisting of the Metropolitan of Athens and 4 archbishops and bishops, who must during their year of office reside at the seat of the executive. The Orthodox Church has 4 archbishops and 8 bishops in Northern Greece, 4 archbishops and 8 bishops in the Peloponnese; 8 bishops in the islands of the Greek Archipelago, and one archbishop and 4 bishops in the Ionian Islands. There are (1901) 171 monasteries and 9 nunneries, with 2,205 monks and 191 nuns. The Roman

Catholic Church has an Archbishop at Athens, another in the Ionian Islands, and a Metropolitan at Naxos. The two latter prelates are metropolitans with one and five suffragans respectively.

### Instruction.

All children between the ages of five and twelve years must attend school, but the law is not well enforced in country districts. Of the army recruits 80 per cent. are illiterate and 15 per cent. can read only.

There were (1910-11) 3,551 primary schools with 4,641 teachers (of whom 990 were of the female sex) and 259,854 pupils (82,458 females). For secondary education there were 41 high schools, 284 middle schools, 6 commercial schools which with others, totalled 328, having 1,318 teachers and 31,399 pupils (80,178 boys and 1,221 girls). There are 2 agricultural schools in Greece with, together, 50 pupils. There is a Trade and Industrial Academy. The Government Trade Schools at Athens and Patras have together 126 pupils. In 1912 the University of Athens (founded 1838) had 49 ordinary professors, 106 lecturers, and 3,358 students studying medicine, law, philosophy, theology, and chemistry. Of the total number, 800 were from abroad, chiefly from Turkey. The Polytechnicon Mezzoion with 22 professors, and 170 students, provides instruction in painting, sculpture and mechanics.

The cost of primary instruction is borne by the communes with a subvention from the State.

### Finance

In accordance with the peace preliminaries between Greece and Turkey and the Greek Law of Control of March 1898 the financial commission of delegates representing Germany, Austria-Hungary, France, Great Britain, Italy, and Russia (the mediating powers) is established at Athens in direct relation with the Greek Minister of Finance. To this commission were assigned, for the payment of the interest on the external debt, the revenues from the salt, petroleum, matches and playing cards monopolies, the duties on tobacco, cigarette paper, Naxos emery, the stamp duty and the import duties at the port of Piræus. In their report for 1911 the Commissioners announce an income of 61,763,494 drachmas (2,470,586*l.*), of which 34,520,329 drachmas (1,890,813*l.*) were derived from the conceded revenues, and 27,243,165 drachmas (1,089,726*l.*) from the receipts of the Piræus customs.

The collection of the assigned revenues and the administration of the monopolies is entrusted to a Greek Company called the Société de Régie des Revenues affectées au Service de la Dette Publique, which is under the control of the international commission.

The ordinary revenue (exclusive of receipts from loans, &c.) and expenditure in recent years have been (in currency drachmas of fluctuating value) —

	Nature of results	Revenue	Expenditure
		Drachmas	Drachmas
1908	Estimated	186,642,783	184,042,556
1909	Estimated	129,719,358	126,708,010
1910	Estimated	141,560,607	140,028,457
1911	Estimated	186,277,463	185,094,472
1912	Estimated	143,618,646	142,448,113

For the year 1912 the total revenue and expenditure were as follows —

Sources	Revenue	Branches	Expenditure
	Drachmai		Drachmai
Direct taxes	24 100 001	Public debt	86 626 048
Duties and excise	53,023 601	Pensions	9,153 993
Stamps and dues	13 991 100	Civil list	1 323 000
Monopolies	18 041 000	Chamber of Deputies	701,40
State property revenue	8,103 201	Ministries	
State property sales	772 100	Foreign Affairs	4 457 740
Post and Telegraph	5 829 000	Justice	0 703 002
Various	18,078 648	Interior	17 754 048
		Worship and Instruction	6 188 796
Total ordinary	139 997 644	War	11,580 847
Extraordinary	4 121 101	Marine	3 801 339
		Commerce and Agricul- ture	9 840 784
		Finance	25 731 278
		Various	563 606
Total	144 118 645	Total	143 826,20

The outstanding external debt of Greece amounted on December 31 1912, to 32,493 380/. The currency debt in December, 1911 stood at 180 225,845 paper drachmai. The estimated charge for the whole Greek debt in 1911 was 33 570,811 paper drachmai.

## Defence

Military service in Greece is compulsory and universal with very few exemptions. It commences in the 21st year and lasts for the long period of 36 years. The term of service in the active army or first line, is 2 years, followed by 11 in the first reserve and 9 years in the second reserve. The soldier then passes to the National Guard (territorial army) for 7 years, and completes his service with 7 years in the reserve of this force. Postpone-ments and reductions of service are permitted in certain cases, but are con-ditional on the payment of a tax. Men in excess of the annual con-tingent of recruits receive 6 months training in the ranks, and are then transferred to the Liability reserve which corresponds to the supplemen-tary reserve of other armies. To counterbalance the extra expense, a large proportion of the men in their 2nd year are regularly released before their full term has expired.

The field army is to consist of 4 divisions each containing 3 regiments of 3 battalions and 1 or 2 battalions of *evzones* (light infantry). There are four field artillery regiments of 28 batteries all told, and 2 regiments of mountain artillery of 8 batteries, also 3 heavy batteries. There are 3 cavalry regiments of 16 squadrons all told, and two engineer regiments of 17 companies all told. Batteries have 4 guns. The total strength of the army in the field would be something over 80 000 men. The peace strength of the army was fixed at 1,888 officers and 22 060 other ranks, for 1912.

On mobilisation the reserve is to form divisions corresponding to those of first line, but at the present time all the reservists of the active army would apparently be required to bring units to war strength. The Liability reserve, if not also absorbed by the first line, would be available to make good losses on field service.

The territorial army is, of course, primarily intended for home defence, but it is understood that certain classes are liable to be drafted to the field army in time of war. The territorial army has no definite organisation at

present, and the men receive no training. The country is divided into 4 zones, or regions.

The Greek infantry are armed with the Mannlicher Schonauer rifle, model 1908. The field artillery is armed with Schneider Canet Q F guns.

The Greek Navy was re-organized in 1906, and in view of the subsequent expansion of the Turkish fleet, a corresponding increase is under consideration. The principal vessels are as follows:—

	Launched	Displacement Tons	Armour Belt In	Gun In	Principal Armament	Torpedo Tubes	Horse Power	Max Speed Knots
Spetsai	1889	5,000	12	13½	3 10·6 in 14 in.	3	6,700	17
Hydra	1889							
Pasara	1890							
Acroff	1910	10,118	8	6½	4 0·2 8·7 in.	3	19,000	22
New Ship	Builder	—	—	—	—	—	—	—

There are eight destroyers of about 400 tons launched in 1906-07. Some new boats are building or projected. There are also 11 old torpedo boats, some of which have recently been reboilered, one submarine and a number of miscellaneous craft, including an old battleship, *Basilissa Georgios*, which dates from 1868.

The *Acroff* was acquired through a deceased millionaire of that name leaving the bulk of his fortune for improving the navy.

### Production and Industry

Greece is mainly an agricultural country, and the economic life is directly dependent on the products of the soil. The cultivated area extends to about 5,563,100 acres, of which about 1,112,000 acres are under cereals, 1,200,000 fallow, and 2,025,400 covered with forest; there are, besides, about 5,000,000 acres under pasture, and 3,000,000 acres of waste land. By the draining of Lake Copais, an area of about 53,000 acres has been acquired for agricultural purposes. Irrigation and drainage canals, farm roads, and buildings are being constructed, tree planting is undertaken, and the breed of cattle is being improved.

While there are a few large proprietors in Greece, the land is to a large extent in the hands of peasant proprietors and *metayer* farmers. On the whole, agriculture is in a backward state, though the soil is of unusual fertility. The cereals grown are wheat, barley, rye, maize, mealin. The most favoured and best cultivated crop is the currant, which covers vast districts. The yield for 1911 was 825,000,000 lbs. Thirty thousand *strommata* (*stromma*=0·2,471 acre) of currant plantations have been uprooted in accordance with a law to limit the production of currants. Five thousand *strommata* still remain to be destroyed. Olives are next in importance to currants, yielding 81,224,000 oke (1 oke=2·85 lbs.) in 1911. The total yield of olive oil was about 20,292,000 gallons. The wheat fields of Thessaly yielded 2,478,941 bushels in 1911. About a similar quantity of wheat is imported into the country. Tobacco in 1911 yielded 76,830 cwts., the vineyards, 140,551,000 oke; figs, 240,000 cwts. The fig industry is centred in the port of Calamata. Two kinds of cheese are produced in Greece—alfoid cheese in brine and head cheese. The production of the former in 1911 amounted to about 8,000 barrels, or from 830,000 to 400,000 oke. Most of the alfoid cheese is consumed in Greece, chiefly in the cities of Athens and Piræa. The production of head cheese reached

about 1,584,000 to 2,000,000 okeas, and was valued at 177,700*l*. There are in Greece 100,000 horses, 360,000 cattle and 2,900,000 sheep. Greece has a great variety of mineral deposits, and there are now in force about 85 mining concessions embracing a total area of nearly 20,000 acres. The ore and other minerals worked include iron, copper, zinc, lead, silver, manganese, aluminium, antimony, tin, nickel, magnesite ore, cobalt, coal, sulphur, ochre, and various other earths. The Laurium district, Thessaly, Euboea, the Aegean islands and other parts of Greece yield a large output of ores and earths.

The mineral output of all Greece in 1909 and 1910 is given as follows:—

	1909	1910		1909	1910
	Tons	Tons		Tons	Tons
Chromite	7,400	1,000	Manganese	1,287	—
Copper	100	91	Magnetite	74,407	48,918
Emerald	10,000	8,000	Nickel	600	180
Iron	440,000	608,849	Sulphur	52,025	51,581
Manganese Iron	40,000	35,000	Zinc	48,524	87,106
Iron pyrites	24,577	27,637			
Lead	40,013	185,207	Total	958,578	1,011,085
Lignite	3,749	1,500			

The total sale of minerals of all kinds, including salt (£118,000), is given as £1,086,366 in 1909 and £930,729 in 1910.

### Commerce

Value of the commerce of Greece (25 drachmas = £1) —

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports	5,704,880	6,185,800	6,501,000	6,232,600	6,289,490
Exports	4,062,710	4,435,500	4,007,476	5,626,400	636,100

The special commerce for 1909 and 1910 was as follows with the leading countries (25 drachmas = £1) —

	Imports from (1909)	Imports from (1910)	Exports to (1909)	Exports to (1910)
	£	£	£	£
Austria-Hungary	691,290	799,800	410,602	450,000
Belgium	117,500	109,800	2,641,8	374,300

## Principal special imports and exports in 1911 —

Imports	£	Exports	£
Agric. products	2,119 98	Agric. products	2,918,003
Yarn and thread	791 445	Raw minerals	981 137
Raw minerals	1 071 818	Wines, &c.	704,880
Forest products	483,200	Oils (olive, &c.)	568,944
Wrought metals &c.	266,304	Animal products	211,670
Chemicals	832 546	Forest products	167 639
Living animals	122,672	Wrought metals	81,458
Fishery products	804 644	Chemicals	42,891
Animal products	230 470	Fishery products	35,697
Paper books &c.	178 204	Sugar &c.	5 985

The customs revenue amounted in 1911 to 1 051,582/ against 966,494/ in 1910

The commercial treaty of 1846 provides for the most favoured nation treatment between the United Kingdom and Greece and the declaration of November 1904 extends the scope of the treaty so as to include all British possessions, colonies, &c. which accord the most-favoured nation treatment to Greece (that is all except India, Canada, the Cape and New South Wales). The treaty is terminable July 25 1910, and then after 12 months notice.

The staple article of import from Greece into the United Kingdom (Board of Trade Returns) is *currants* the value of which amounted in 1911 to 1,716,106/. Other articles of import in 1911 were — iron ore (including chrome) 205 462/ raisins, 70 423/ , sponges, 106,914/ , wine, 443/ , olive oil, 21,240/. Of the exports from the United Kingdom to Greece in 1911, cotton goods and yarns were valued at 438,839/ , woollens, worsteds and yarn, 191 856/ , coal 404 924/ , iron, 82,815/ , machinery, 67,443/.

The total trade between Greece and the United Kingdom for 5 years was (in thousands of pounds) as follows —

	1906	1907	1910	1911	1912
	£	£	£	£	£
Imports from Greece to U.K.	1 843	1 400	2,130	2 273	4,118
Exports to Greece from U.K.	1 706	1 461	1,545	1 701	2 568

## Navigation and Shipping

The merchant navy of Greece in 1912 had 811 sailing vessels of 145,264 tons, and 879 steamers of 690 573 tons. In 1910, 2,747 vessels of 3,763,583 tons entered and 8 005 of 4,099 686 tons cleared at the port of Piræus, which has some three fifths of the total shipping of Greece. A considerable amount of the carrying trade of the Black Sea and the Eastern ports of the Mediterranean is under the Greek flag.

## Internal Communications.

There are about 3,000 miles of roads. There is a canal across the Isthmus of Corinth (about 4 miles).

Railways were open for traffic in 1911 for a length of about 849 miles. The railway from Piræus to the Turkish frontier (275 miles), *via* Athens and Larissa, has been completed. It was always intended to connect the Greek with the Turkish railroads, but the Turkish Government long refused its consent. Greece was thus completely isolated by land from the rest of

Europe. But in January, 1913 the Greek Government decided to prepare plans for linking up the Piræus-Larissa Railway with the lines in Macedonia, so that the construction of the new line which will connect Greece with the rest of Europe, may be completed as soon as possible after the war. In all probability the route along the coast by Gida, Katerina, and Salonika will be the one adopted. The Piræus-Athens Peloponnesian railway has a length of 423 miles, the Thessalian railway 145 miles, and the Piræus Athens railway six miles.

The telegraph lines in 1910 had a length of 5,845 miles, with 10,247 miles of wire. The number of offices was 770. They despatched 1,388,628 inland telegrams, 423,112 international and 39,603 official. Receipts 2,031,087 drachmai. In 1910 there were 1,047 miles of telephone line, belonging to 4 urban systems.

Of post offices there existed 1,082 at the end of 1910 and there passed through the post in that year 18,952,000 letters, 1,786,000 post-cards, and 16,482,000 printed papers and samples in the internal and the international services. The receipts were 3,527,466 drachmai and the expenses, 3,650,837 drachmai.

### Money and Credit.

The nominal value of the Greek coinage (minted in Paris) put in circulation since 1866 has been gold in 1876 1,000,000 drachmai, in 1884, 11,000,000 drachmai; total gold, 12,000,000 drachmai; silver, up to 1883, 26,262,866 drachmai; bronze, up to 1883, 6,816,065 drachmai; nickel, 1893-95, 3,000,000 drachmai. Since 1884 there has been no issue of coin except the nickel money. In accordance with the Convention of the Latin Union, 1885, the Greek Government may issue fractional silver to the nominal value of 15,000,000 francs. Up to 1910 it had struck silver coins of this kind to the value of 10,799,999 drachmai. The total paper money in circulation at the end of 1909 was 142,437,627 drachmai (about 5,700,000*l*).

The National (with which is now united the Epiro-Thessalian) and the Ionian Banks are authorised to issue notes to the amount of 88,000,000 drachmai, including 14,000,000 drachmai in notes under 5 drachmai. This privilege has been extended to December 31, 1930. By successive agreements dated September 27, October 27 and December 1, 1910, the Bank was authorised to issue supplementary notes up to 35,000,000 drachmai. Up to December 31, 1911, the total paper circulation was 139,825,384 drachmai.

The reserve of the National Bank of Greece on November 30, 1912, was 213,233,700 drachmai.

### Money, Weights and Measures

Greece entered in 1868 the Latin Monetary Union.

The *Dracma*, of 100 *lepta*, is equivalent to the franc (25.225 francs = 1*l*. sterling). 100 new drachmai = 112 old drachmai. The currency drachma is now nearly at par value.

By Royal decree of January 30, 1893, the gold coins of Great Britain, Austria, Germany, Denmark, Russia, Spain, Turkey, Egypt, and the United States are accepted by the Treasury and by private persons as legal tender, one-fourth per cent. being deducted from their nominal value.

In September, 1898, it was announced that it had been decided to introduce the metric system as regards measures of length, weight, and capacity.

The change from the old system is to be gradual, commencing with measures of length. The old system is as follows:—

The <i>Oke</i>	=	2 80	lbs. avoirdupois.
„ <i>Stater</i>	=	123 20	„ „
„ <i>Leve</i> (Venetian)	=	1 05	„ „
„ <i>Barri</i> (wine)	=	16 83	imperial gallons.
„ <i>Kilo</i>	=	0 114	„ quarter
„ <i>Pala</i>	=	9	of an English yard
„ <i>Stremma</i>	=	242	„ „ acre

## Diplomatic Representatives.

### 1 OF GREECE IN GREAT BRITAIN

*Envoy and Minister*—J. Gennadius.

*Consul-General*—J. Stavridis.

There are consuls of Greece at Birmingham, Cardiff, Dublin, Edinburgh, Glasgow, Liverpool, Manchester, and vice consuls and consular agents at various other towns.

### 2. OF GREAT BRITAIN IN GREECE.

*Envoy and Minister*—Sir J. E. H. Elliot, G.C.V.O., K.C.M.G., appointed November, 1903.

*Secretary*—H. H. D. Beaumont.

*Consul (Piræus)*.—Charles J. Cooke.

There are British Consular representatives at (alamanata (halamaia), Cephalonia, Corfu, Ergastaria (Laurium), Patras, Milo, Piræus, Santorini, Seriphos, Syra, Volo, Zante, Zea.

## MOUNT ATHOS.

Mount Athos is inhabited by the monks of Greek (17), Russian, Bulgarian, and European monasteries. The monks till the fields, tend the vineyard, take in the harvest, fish, weave, sell in shops, and, indeed, take upon themselves all the secular duties of the community as well as the sacred. Originally inhabited by one mediaeval ascetic, Peter the Athonite, it has at last grown to a religious colony of thousands, and after paying taxes to Greece in the 18th century it was sacked by the Turks in 1839, and was under Turkish rule until November 15, 1912, when the Greeks occupied it. The suggestion has been made that Mount Athos should be governed by an International Commission composed of representatives of all Orthodox States, which would preserve the independent administration of this Monastic Republic. At present each of the many monasteries is a sort of little republic in itself, each electing its own abbot or archimandrite. In the maintenance of the whole peninsula as a large republic, all the monasteries will be affiliated; and some new sort of franchise will have to be exercised to choose a supreme Patriarch and to decide the new civil laws which shall take the place of the Turkish laws. But several difficulties have arisen, among them the opposition to the scheme of the monks themselves, and for the present (March, 1913) no definite action has been taken.

## GUATEMALA.

(REPÚBLICA DE GUATEMALA.)

### Constitution and Government.

THE Republic of Guatemala, established on March 21, 1847, after having formed part for twenty-six years of the Confederation of Central America, is governed under a Constitution proclaimed December 1879, and modified October 1885, November 1887, October 1889, and July, 1903. By its terms the legislative power is vested in a National Assembly, consisting of representatives (one for every 20,000 inhabitants) chosen by universal suffrage for four years, and a Council of State of 13 members, partly elected by the National Assembly, partly appointed by the President of the Republic. The executive is vested in a President, elected for six years.

*President of the Republic*—Don Manuel Estrada Cabrera for the term 1911-17.

The administration is carried on, under the President, by the heads of six departments—of Foreign Affairs, Government and Justice, Hacienda and Public Credit, Public Instruction, Fomento War.

For recent treaties between Central American States see under *Costa Rica*.

### Area and Population

Area, estimated at 43,290 English square miles. In 1903 the population was 1,842,134; December 31, 1910, estimate 1,992,000. About 80 per cent are pure Indians, most of the remainder being half-caste, there being very few descendants of Europeans. Guatemala is administratively divided into 23 departments. Number of births in 1911, 76,688 (40,019 males and 36,669 females), number of deaths, 36,881, surplus, 39,807.

Capital of the Republic and seat of the government is Guatemala la Nueva with 90,000 inhabitants (1910), five-sixths of them of European origin. Other towns are Quetzaltenango 28,940 Coban, 30,770 and Totonicapan, 28,310. A boundary convention with Honduras of March, 1905, has been extended to March 1, 1912.

### Religion and Instruction.

Roman Catholicism is the prevailing religion, but all other creeds have complete liberty of worship. Guatemala has an archbishop under whom are suffragan bishops for Costa Rica, Honduras, Nicaragua, and San Salvador. The State does not recognise any creed.

Education is free and compulsory. In 1911 there were 1,821 government secondary and primary schools, with 56,685 pupils. There were also 128 private primary and secondary schools; 6 institutes and normal schools, 4 establishments for professional and 9 for special instruction, and 66 rural schools. The National Central Institute confers degrees which are recognised in all the Central American Republic. Among the other institutions are a school of Handicraft for Women, a National Conservatoire of Music, a School of Art (390 pupils in 1911), and schools for law (58 pupils in 1911), medicine (72 pupils in 1911), engineering, &c. There is a German school, endowed by the German Government. The national library contains 19,400 volumes.

### Justice and Crime.

Justice is administered in a supreme court, 6 appeal courts, and 26 courts of first instance. In all the municipalities there are Justices of Peace.

## Finance

Ordinary revenue and expenditure in currency (61 paper dollars = £1 in 1907, 76 = £1 in 1908; 77 = £1 in 1910) —

	1907	1908	1909	1910	1911
	dollars	dollars	dollars	dollars	dollars
Revenue	35,297,823	37,335,958	49,239,722	61,571,440	62,047,475
Expenditure	44,560,322	49,929,752	70,544,261	45,959,410	69,161,969

The budget for the fiscal year 1912-13 shows an income of 87,500,000 dollars, of which 26,500,000 are derived from customs. The expenditure is 42,720,332 dollars, distributed as follows: Government and justice, 4,724,170 dollars, foreign relations, 2,408,239 dollars, finance, 2,574,922 dollars, public credit, 22,000,000 dollars, war, 5,267,263 dollars, public instruction, 8,199,085 dollars, pensions, 511,093 dollars.

On December 31, 1910 (according to the report of the Council of the Corporation of Foreign Bondholders) the outstanding amount of the 4 per cent External Debt of 1895 was 1,482,800<sup>1</sup>, certificates in respect of unpaid interest, 1898 and 1899, 29,656<sup>1</sup>, arrears of interest (1899-1911), 712,000<sup>1</sup>, total, 2,221,456<sup>1</sup>. On July 13th, 1911, the Council of Foreign Bondholders accepted a proposal made by Guatemala for a settlement of the long default upon her external debt. But the default continued, and the British Government was requested (in 1912) to take some action in the matter. The interest coupons of Guatemala have now been fourteen years in arrears. On December 31, 1908, the outstanding amount of the gold debt, according to the Finance Ministers' Report, was 18,694,445 dollars gold. Currency debt (1909), 71,976,214 dollars currency.

## Defence

The military force of Guatemala, as reorganised, numbers 85,535 officers and men when mobilised. The reserve army consists of 40,575, divided into 31 battalions. All male citizens are liable to conscription from 18 to 50.

## Production and Industry

By the National Land Law of 1894, the State lands (except those on the frontiers and the sea-shore) were divided into lots for sale, the maximum allotment permitted to one person being 15 caballarias (or about 1,687 acres).

Uncultivated lands may be granted gratuitously to immigrants or to immigrant companies, to municipalities, villages and schools, or as assistance towards road-making. The forest area has an extent of 526,593 hectares.

The soil in general is exceedingly fertile. The most important crop is coffee, of which the yield in 1911 amounted to 785,851 quintals (100 lbs.) valued at 1,117,000<sup>1</sup>. There were in 1911 2,156 plantations, comprising an area of 880,320 acres, and trees to the number of 68,161,626. The largest coffee plantations are in the hands of Germans. The crop for 1912-13 is expected to yield 650,000 quintals. About 1,680 acres are devoted to tobacco culture. The sugar crop amounted in 1910 to 164,234 quintals, valued at 116,500<sup>1</sup>, bananas, 1,236,684 bunches, valued at 70,000<sup>1</sup>, wheat, 260,000 quintals, valued at 154,110<sup>1</sup>; maize, 2,844,000 quintals; sweet

potatoes, 173,000 quintals, and beans, 159,000 quintals. The exports of timber (chiefly mahogany and cedar) in 1910 totalled 4,700,000 cubic feet. The department of Peten is rich in mahogany and dye woods, for which there is a ready market in the United States, whither they are carried over land through British Honduras and Mexico. Cotton is grown in small quantities. On the high plateaux the area of the cattle-grounds (potreros) is about 753,640 acres. The agricultural production of the country in 1910 was valued at 428,825,081 pesos, of which 92,705,680 pesos were for coffee, 66,880,800 pesos for maize, 30,783,303 pesos for timber and 12,998,850 pesos for sugar. The number of horses in the Republic in 1899 was estimated at 50,343, cattle, 196,780, sheep, 77,600, swine, 29,784.

Placer gold mines at Las Quebradas, near Yzabal, are worked successfully, silver in the departments of Santa Rosa and Chiquimula, and salt in the departments of Alta Vera Paz and Santa Rosa. An American company has recently obtained a concession to explore for mines over the whole Republic and has already commenced operations.

### Commerce

Value of the commerce (in gold pesos or dollars) —

	1907	1908	1909	1910	1911
	Dollars	Dollars	Dollars	Dollars	Dollars
Imports	5,518,574	5,511,586	5,351,817	4,261,300	6,514,437
Exports	19,178,460	6,766,143	10,079,319	—	10,981,759

The values of the principal imports and exports in U.S. dollars for 1911 were —

Imports	1911	Exports	1911
	Dollars		Dollars
Cottons	1,843,640	Coffee	7,282,746
Ironware, machinery, and coal	636,420	Rubber	159,921
Provisions, foodstuffs, and liquors	419,817	Timber	153,178
Drugs	217,685	Hides	325,390
Woolens	277,600	Bananas	526,711
Idem	272,306	Sugar	344,915
		Skins	20,153

In 1911 the United States imports amounted to 2,696,144 dollars, Germany, to 1,592,658 dollars; United Kingdom, to 1,314,203 dollars, and France, to 266,060 dollars.

Total trade between Guatemala and the U.K. for 5 years —

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports from Guatemala to U.K.	268,234	144,731	214,500	246,017	371,213
Exports to Guatemala from U.K.	209,226	230,306	220,706	243,264	245,236

### Shipping and Communications.

In 1910, 623 vessels of 1,187,800 tons entered the ports of the Republic and 620 of 1,145,990 tons cleared. Of the vessels entered 211 were American, 130 German, and 81 British. The chief ports on the Atlantic side are Puerto Barrios and Livingston, on the Pacific side, San José, Champerico and Ocos. The steamers of the United Fruit Company vessels run from New Orleans and New York to Puerto Barrios, and the steamers of the Hamburg American line from Hamburg touch at Puerto Barrios and Livingston. The Pacific Mail Line, the Kosmos Line steamers, and other companies steamers visit Guatemalan ports.

The latest railway returns to hand are as follows—(1) Central Railway (135 miles in extent) Number of passengers carried during 1911 848,895, imports, 8,923 tons, exports, 24,831 tons local freights, 94,360 tons. (2) Guatemalan Railway 195 miles in extent Number of passengers, 116,306 exports 15,533 tons imports, 15,736 tons, local freights, 25,946 tons, bananas, 94,369 bunches. (3) Western Railway (51 miles in extent) Number of passengers, 192,140, imports, 10,411 tons, exports, 13,225 tons, local freights, 25,064 tons. (4) Ocos Railway (25 miles in extent) Number of passengers, 28,584, imports, 9,189 tons, exports 8,180 tons local freights, 4,394 tons. (5) Verapaz Railway (27 miles in extent) Number of passengers, 3,708, imports, 1,862 tons, exports, 1,603 tons, local freights, 669 tons. Total length of line (1911) 433 miles. Considerable progress was made with the Pan American Railway, which would place the country in communication with Mexico. The Los Altos Railway was also progressing.

There are a few good roads and many bridges have been recently built, but away from the railway most of the traffic is on mule back.

There were in 1911 311 post offices, through which passed 12,270,364 letters, &c. Of telegraph and telephone lines in 1910 there were 4,196 miles. Despatches, 1,203,261. The telephone system has 230 offices.

### Money, Weights, and Measures

Important Guatemalan Banks are—(1) The Bank of Guatemala (1885) capital, 10,000,000 pesos, paid up capital 2,500,000 pesos, reserve, 4,312,512 pesos. (2) The International Bank of Guatemala (1877), subscribed capital, 2,000,000 pesos, reserve fund, 1,651,000 pesos. (3) The American Bank (1896), paid up capital, 3,000,000 pesos, reserve fund, 1,200,000 pesos. (4) The Western Bank (Banco de Occidente) of Quetzaltenango (1881), capital, 2,000,000 pesos, paid up capital, 1,650,000 pesos reserve fund, 2,300,000 pesos.

The silver peso or dollar is not now current, the money in use being paper or fractional nickel coin. The value of the paper peso in September 1911, was about 2½d.

The Dollar or Peso, of 100 Centavos, weight, 25 grammes, .900 fine, nominal value, 4s. Nickel coins are the real, nominal value 6d., and the half and quarter real.

The Spanish <i>Libra</i> of 16 ounces	= 1.014 lb avoirdupois.
<i>Arroba</i> of 25 libras	= 25.35 lb     "
<i>Quintal</i> of 4 arrobas	= 101.40     "
<i>Tonelada</i> of 20 quintals	= 18.10 cwt.
<i>Panga</i>	= 1½ imperial bushel

The metrical system is now adopted.

## Diplomatic and Consular Representatives

### 1 OF GUATEMALA IN GREAT BRITAIN

*Charge d'Affaires*.—Don José M. Larduebel.

*Consul-General* (London).—F. de Arca.

There are also Consular representatives at Glasgow, Liverpool, Manchester, Southampton, Birmingham, Cardiff, Grimsby.

### 2 OF GREAT BRITAIN IN GUATEMALA

*Extraordinary, Minister and Consul-General*.—Sir Lionel E. G. Carden, K.C.M.G.

There is a British Consul at Quetzaltenango; Vice-Consuls at Livingston, Puerto Barrios, and San José.

## HAITI.

(RÉPUBLIQUE D'HAÏTI.)

### Constitution and Government

THE Republic of Haiti, formerly a French colony, was proclaimed independent January 1, 1804, and is now governed under a Constitution of October 6, 1889. The legislative power is vested in a Chamber of the Communes of 99 members (1 for each Commune) chosen for 3 years by direct popular vote, and in a Senate of 39 members chosen for 6 years (renewed to the extent of one third every 2 years) by the Chamber of the Communes from a list made out partly by the President and partly by the electors. The President is elected for 7 years by the two Chambers in joint session. Members of both houses are paid by the month during session, (representatives 300 dollars, and senators 150 dollars).

*President of the Republic*—Général Tancrède Auguste, elected August 8, 1912.

The administration of the Republic is carried on, under the President by six heads of departments. The President receives a salary of 4,800*l*.

### Area and Population

The area of the Republic, which embraces the western portion of the island of Haiti—the larger but less populated eastern division forming the Republic of *Santo Domingo*—is estimated at 10,204 English square miles. The inhabitants were estimated to number 960,000 in 1887, the ecclesiastical estimate, based on parish registers, in 1909 put the number at 2,029,700. The majority of them are negroes, there are also great numbers of Mulatto Haytiens, the descendants of the former French settlers. There are about 6,000 foreigners of whom about 10 per cent. are white. Capital Port-au-Prince, with 100,000 inhabitants, situated on a large bay, and possessed of an excellent harbour. Cape Haiti has a population of about 30,000, Les Cayes about 12,000, Gonaïves, 13,000, Port de Paix, 10,000. The language of the country is French, though most of the common people speak a debased dialect known as Creole French.

### Religion and Instruction.

The religion is Roman Catholicism. There is an archbishop with 4 suffragan bishops. Public elementary education is free, the country being divided into 15 inspectors' districts. The sum allotted for public instruction amounts to nearly 1,000,000 dollars annually, but the educational system is still very imperfect, especially in rural districts. In 1910 education was made compulsory. There are 400 national schools, besides private schools, and 5 public lycées. The Deutscher Schulverein of Hamburg opened a school here in April, 1912.

### Finance

The revenue of Haiti is derived almost exclusively from customs, paid in American gold on exports and imports. The largest portion of the expenses

litare is for debt charges, 2,882,466 U. S. gold dollars (\$81,164 gourdes). For 5 years ending September 30, the revenue is given as follows (in U. S. gold dollars for export duties and in paper gourdes worth at present about 1: 4d.—average last five years 10d.)

	U. S. Gold dollars	Currency gourdes
1908-09	2,760,887	7,408,542
1909-10	2,694,107	6,684,656
1910-11	3,272,858	7,717,799
1911-12	3,057,227	8,227,315
1912-13	3,914,480	7,571,082

On March 31, 1912 the debt consisted of gold loans amounting to 23,168,612 gold dollars of foreign debt, and 1,184,087 gold dollars internal debt, making a total of 24,352,699 gold dollars. The currency debt amounts to 15,514,812 dollars paper, including the paper and nickel money, and the floating debt.

### Defence

The army is at present actively undergoing a reform, and will consist of 5,000 trained troops. There is a special 'Guard of the Government,' numbering 650 men, commanded by 10 generals, who also act as aides de-camp to the President of the Republic. The Republic possesses a flotilla of four small vessels, which can raise steam with difficulty—17 *Drechsels* ex American cruiser, and cruiser *L'Esclandre*. *Le Nord Alexis*. A small second-hand yacht *Vertueux* has just been purchased in Europe.

### Production and Commerce

The industries of Haiti are mainly agricultural, and the most important product is coffee of excellent quality, but the export duty is so considerable as to prevent the development of its cultivation. Cocoa is grown extensively and cotton is exported in increasing quantities. The cultivation of tobacco is extending, and a cigar and cigarette factory is successful. Sugar is extensively grown, and there are 4 sugar making establishments. Rum and other spirits are distilled but not exported: the rum is of a superior quality. Logwood is an important product, and other valuable woods are now exported. Cattle breeding is neglected. The output of soap from local factories cannot compete with imports from the United States.

Haiti possesses considerable mineral resources quite undeveloped. Gold, silver, copper, iron, antimony, tin, sulphur, coal, kaolin, nickel, gypsum, limestone and porphyry are found but are little worked. Some effort has been made to work copper mines in the last few years, and concessions have been granted for mining coal, iron, and copper.

Imports and Exports for 2 years —

	Imports	Exports
	Dollars	Dollars
1910	7,881,744	7,943,117
1911	7,943,117	7,652,000

For fiscal year 1911 (ending September 30) the quantities of the principal exports, and for 1910 and 1911 the value of imports, were —

Exports.		1911	Imports.	1910	1911
					Dollars.
Coffee	lbs	54,225,767	United States	702,065	5,790,388
Cocoa		3,835,803	France	805,924	831,849
Logwood		350,000,000	United Kingdom	901,770	896,517
Cotton		5,238,641	Germany	398,848	439,782
Orange peel		468,703	Other countries	473,189	409,816
Hides, skins		361,731			
			Total	7,681,746	7,148,117

Other articles exported are logwood root, fustic, various timbers, resin, honey, zinc, copper (old metal), wax, and tortoise shell. Coffee and cocoa are shipped to Havre, log wood to the United States. The chief imports are cottons, sacks, machinery, and iron work.

The staple article of British produce exported to Haiti and Santo Domingo consists of cotton manufactures, valued at 276,728<sup>1</sup>/<sub>2</sub>, linens, 9,418<sup>1</sup>/<sub>2</sub>, iron, wrought and unwrought, 30,817<sup>1</sup>/<sub>2</sub> in 1911.

Total trade between Haiti and the U K for 5 years. Imports, 1907, 299,127<sup>1</sup>/<sub>2</sub>, 1908, 193,742<sup>1</sup>/<sub>2</sub>, 1909, 335,152<sup>1</sup>/<sub>2</sub>, 1910, 1,183,918<sup>1</sup>/<sub>2</sub>, 1911, 576,377<sup>1</sup>/<sub>2</sub>. Exports, 1907, 252,129<sup>1</sup>/<sub>2</sub>, 1908, 311,816<sup>1</sup>/<sub>2</sub>, 1909, 282,461<sup>1</sup>/<sub>2</sub>, 1910, 991,388<sup>1</sup>/<sub>2</sub>, 1911, 413,722<sup>1</sup>/<sub>2</sub>.

### Shipping and Communications.

In 1911 the registered shipping consisted of about 5 steamers of 1,410 tons (net), and 8 sailing vessels of 1,392 tons. At Port au Prince in 1909 there entered 192 steam vessels of 320,392 tons, and cleared 200 of 334,910 tons. Several lines of steamers (German, French, and Dutch) connect the ports of Haiti with New York and Hamburg and other European ports. The Hamburg America Line has the largest share in the shipping.

A light railway has been constructed from Port au Prince to Lake Assuei (28 miles), and to Leogane (22 miles) but the traffic is small. Construction of a railway from Gonaïves to Hincha, and thence to Port-au Prince was begun and 14 miles executed, but not opened to traffic. A concession has been granted the 'National Railroad Company of Hayti' for a railroad from Cape Haiti to Port au Prince, now in construction. Total length of line 64 miles. Port-au Prince has 5 miles of tramway.

The principal towns are connected by the Government telegraph system. A cable runs from the Mole St. Nicholas to Santiago de Cuba and from the Mole to Port au Prince, and also to Cape Haiti, whence it runs to Puerto Plata (Santo Domingo) and to South America.

There are 31 post offices. Haiti joined the Postal Union in 1880. Length of Telegraph lines, 124 miles.

### Money, Weights, and Measures

The Banque Nationale de la République d'Haiti, established October 31, 1910, with a capital of 10,000,000 francs, undertakes to render services to the Government in respect of loans and other matters. It has its headquarters in Paris and its principal office in Port au Prince.

The *Gourde*, or dollar, nominal value, *ss.* Nickel coins are 50-, 20-, 10- and 5-centime pieces, and bronze 3-, 2-, and 1-centime pieces. The money in circulation (1912) consists of paper money, 3,289,812 gourdes

nickel coins, 7,000,000 gourdes; bronze coins, 225,000 gourdes, total, 15,514,812 gourdes. It is estimated there are also 2,100,000 dollars in American gold in circulation. The bank notes are to be issued by the "Banque Nationale de la République d'Haïti" under the control of the Haitian Government. In 1907 the premium on gold as against Haitian gourdes rose to 500 per cent. in consequence of the issue of 2,000,000 nickel gourdes. On August 19, 1912, a law was approved providing for the withdrawal from circulation within two years of 4,000,000 gourdes. On August 1, 1912, some 2,000,000 gourdes were to be withdrawn and a similar amount on August 1, 1913, and 1914 respectively.

The weights and measures in use are those of France.

## HONDURAS

(REPÚBLICA DE HONDURAS.)

### Constitution and Government.

THE Republic of Honduras, established January 11, 1889, before the dissolution of the Confederation of Central America in 1889, is governed under a charter proclaimed October, 1894. It gives the legislative power to a Congress of Deputies consisting of 42 members, chosen for 4 years directly by popular vote, in the ratio of one per 10,000 inhabitants. It meets for 60 days on January 1 each year. The executive authority rests with a President, nominated and elected by popular vote for 4 years.

*President*—General Manuel Bonilla (1912-1916)

The administration of the Republic is carried on by a Council of five ministers, to whom are entrusted the departments of Foreign Relations, Government and Justice, War, Treasury and Public Credit, Public Works and Agriculture, and Instruction.

The active army consists of about 2,000 men, and the reserve has 54,000 men.

### Area and Population.

Area about 46,250 English square miles, with a population, in 1910, of 553,446 (270,722 males and 282,724 females), according to official figures, or under 11 inhabitants to the square mile. The Republic is divided into 17 departments. The bulk of the inhabitants consists of aboriginal 'Indians,' and the sparse European descended population, mainly of Spanish origin. Of the Indians about 90,000 are uncivilized. The capital is the ancient town of Tegucigalpa, with 22,187 inhabitants in 1911-12; other towns are Panguire, 7,132, Nacaome, 8,152, La Esperanza, 11,458, Santa Rosa, 10,574, Cholinteca, 8,065, San Pedro Sula, 7,820. The main ports are Amapala on the Pacific, and, on the Atlantic, Puerto Cortez (2,500), Omoa (1,000), Ulua, La Ceiba, Trujillo, Rostan and Utila.

In 1911 there were 2,464 marriages, 20,552 births, 10,356 deaths. Excess of births over deaths, 10,196.

### Religion, Instruction, Justice.

The Roman Catholic is the prevailing religion, but the Constitution guarantees freedom to all creeds, and the State does not contribute to the support of any. Instruction is free compulsory (from 7 to 15 years of age), and entirely secular. At Tegucigalpa there is a central university with faculties of medicine, and of science, law, and political sciences; at Comayagua there is a school of jurisprudence. For secondary instruction the Government maintains a Central Institute at Tegucigalpa, and subsidizes colleges in the departments. To these colleges five normal schools are annexed. In 1910 they had 325 pupils. For primary instruction there were 888 schools with, in 1911, 39,525 pupils, and an average attendance of 20,864. The number of teachers was 882. The expenditure on education in 1911 was 223,054 pesos, 32,514 being for primary and 78,538 for secondary.

The judicial power resides in the Supreme Court with five judges chosen directly by the people for 4 years, four Appeal Courts, and departmental and local judges.

### Finance

The revenue is mainly derived from customs, and from spirit, powder, and tobacco monopolies. For the years stated, ending July 30, the receipts and expenditures (in silver pesos) are given as follows:—

	1907-08	1908-09	1909-10	1910-11	1911-12
Revenue	3,899,287	3,503,215	4,149,082	10,768,888	18,140,416
Expenditure	4,205,995	3,503,215	3,992,628	10,768,888	15,095,101

In July, 1910, the external debt of Honduras consisted of four loans contracted from 1867 to 1870, amounting to 5,398,570<sup>1</sup> with arrears of interest amounting to 17,071,940<sup>1</sup>, total 22,938,876<sup>1</sup>. No interest has been paid since 1872. The internal debt on August 31, 1910, was stated to amount to 4,053,879 silver pesos. On Jan 11 1911, a treaty was signed in Washington by which the United States became directly interested in the financial regeneration of Honduras.

### Production and Industry

The chief culture is that of bananas, mostly on the Atlantic coast where coconuts are also grown. The coconut groves of Puerto Sal extend from the Ulua River to the Cuero River, a distance of about 60 miles, and are said to contain 28,183 fruit-bearing trees. Rubber is produced in slowly increasing quantity, coffee is grown but there is scarcity of labour for the picking of the berries sarsaparilla is exported Tobacco too is grown. While the Department of El Paraiso has become noted for its fine quality of tobacco, the Department of Copan still leads in quantity producing 75 per cent. of the total amount raised in the Republic. This finds a market in the neighbouring Republics and also in Peru. The amount of tobacco land cultivated during 1910 is estimated at 4,450 acres, yielding about 1,726,180 pounds. Corn produced in 1911 totalled 246,452,925 pounds 3,860,025 pounds of beans 2,396,025 pounds of rice, and 814,575 pounds of wheat. The total number of farms was 686, of cattle ranches, 1,019. Cattle breeding is carried on extensively, and dairy farming on a small scale. Cattle are exported to Cuba. In 1909 there were within the Republic about 466,215 head of cattle, 64,123 horses, 13,434 mules, 145,352 pigs, and 24,052 sheep. About 150,400 acres are devoted to pasture. There are considerable local industries such as the plaiting of straw hats. During 1910 sixteen concessions were granted for agricultural land, covering an area of 12,350 acres.

The mineral resources of Honduras are great—gold, platinum, silver, copper, lead, zinc, iron, antimony, nickel being found in almost every department. There is an American silver mining company at work, and giving an increasing output every year. Gold, raw silver, some copper and lead, and various ores are exported. Deposits of brown and other coal have also been found. The chief requisites for the development of the mining industries are capital, and facilities for transport.

### Commerce.

	1908-09	1909-10	1910-11	1911-12
Imports	\$ 618,317	\$ 881,730	\$ 589,181	\$ 668,967
Exports	406,776	494,393	484,599	589,146

The silver peso is worth about 1s. 8d. The chief imports are cottons,

broaderstuffs, and provisions. In the year 1911-12 the chief articles of import and export were as follows —

Imports	1911-12	Exports	1911-12
	£		£
Cottons	980 650	Minerals	319,508
Provisions	94 71	Bananas	237 535
Iron and iron ware	88 45	Office	15 883
Timber	40 20	Cocoanuts	35 018
Postage stamps	54 400	Mahogany	12,241
Chemicals	26,254	Animals	60 782

Of the imports in 1912, 71 per cent came from the United States

The treaty of Commerce and Navigation of 1887 provides for the "most favoured nation" treatment between the United Kingdom and Honduras.

Total trade between Honduras and United Kingdom for 5 years was as follows —

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports from Honduras	4 530	4 465	1,901	3 059	1 827
Exports to Honduras	70 300	78,569	77 913	91,538	138,275

In 1911 the registered shipping comprised 2 steamers of 1563 tons and 8 sailing vessels of 383 tons, total tonnage, 1,945 tons. The transport of fruit, &c., to the United States is effected largely by small vessels built for the purpose. Puerto Cortez, La Ceiba, and Tela are visited by the boats of three American companies, Puerto Cortez by Mexican cattle boats, and Trujillo by cattle boats trading with Havana, in autumn fruit is shipped at Roatan in American boats. Amapala, on the Pacific coast, is visited by the steamers of the Pacific Mail Steamship Company, and of the Kosmos Company.

### Communications

In general travelling and transport are accomplished by means of mules and ox carts. Little is done in the way of road making or repairing. There is a railway of 57 miles from Puerto Cortez to San Pedro Sula and La Pimienta, the line is in bad repair, but is being continued to La Brea on the Pacific coast. Forty miles of private railway are used for transport of bananas, near La Ceiba on the north coast. In 1911 there were 163 post offices, the internal correspondence amounted to 542,365 letters, &c., the foreign correspondence to 538 582 letters, &c. In 1911 there were 236 telegraph offices and 3,183 miles of telegraph line. The telephone, with 100 miles of line and 95 stations, is in use in the capital and some other towns.

### Money, Weights, and Measures

The silver *peso* or *dollar*, of 100 cents, weighs 25 grammes, '900 fine. The fractional silver money consists of 50, 25, 20, 10, and 5 cent pieces. There is a 1-cent copper coin. Gold coins of the value of 20, 10, 5, and 1 dollar circulate as national money. The monetary unit is the silver peso, which (1908) is worth about 1s. 8d., the gold dollar being worth 4s. On February 16, 1910, the mint of Honduras was opened after having

been closed two years, owing to the fact that most of the silver in bars is exported to other countries. In August, 1919, the Government coined some silver, but chiefly copper coins, to replace the amount which disappeared from circulation. It has gathered about 34,000 copper coins and expects to coin new ones to the amount of 1,000,000. By decree No. 68 in the official publication 'Le Gaceta' of March 4, 1910, 2-cent pieces were to be coined in addition to the 1-cent pieces. These were to weigh 4.25 grams, tolerance being 5 centigrams, the diameter 19.5 millimetres, and 235 coins to each kilo or 2.2 pounds. The 1-cent pieces were to weigh 2.12½ grams, or one half of their former weight, tolerance being 5 centigrams, diameter 15 millimetres, and 470 coins to each kilo. This was later changed, so that the actual weight of the 2-cent piece is 3½ grams and of the 1-cent piece 1.9 grams.

There is one bank in the Republic, the 'Banco de Honduras'. Honduras, having a greater variety of commercial products and a circulating medium of base metallic, suffers less than several of the Central American States from fluctuations of exchange.

The metric system of weights and measures has been legal since April 1, 1897, but the old Spanish system is still in general use.

The Arroba	{ for wine	= 3½ imperial gallons.
	{ oil	= 2½ "
" Square Vara		= 1.90 vara = 1 yard
" Manzano		= 1½ acre.
" Fanega		= 1½ imperial bushel.

## Diplomatic and Consular Representatives

### 1. OF HONDURAS IN GREAT BRITAIN

*Consul-General*—M. J. Kelly

There are Consuls at Manchester, Cardiff, Glasgow, Liverpool, Birmingham and Southampton.

### 2. OF GREAT BRITAIN IN HONDURAS

*Minister*—Sir Lionel E. G. Carden, K. C. M. G. (resident at Guatemala)

There are Consuls at Amapala, Omoa, Tegucigalpa, and Truxillo vice consuls at San Pedro Sula, and La Ceiba

## ITALY.

(REGNO D'ITALIA )

## Reigning King

**Vittorio Emanuele III.**, born November 11, 1869, the only son of King Umberto I of Italy and of Queen Margherita, succeeded to the throne on the death of his father, July 29, 1900, married October 24, 1896, to *Elena*, born January 8, 1878, daughter of Nicholas, King of Montenegro, offspring Princess *Jolanda*, born June 1, 1901, Princess *Mafalda*, born November 19, 1902, Prince *Umberto*, Nicola Tommaso Giovanni Maria, Prince of Piedmont and Heir Apparent, born Sept. 15, 1904, Princess *Giovanna*, born November 18 1907

*Mother of the King*

Queen *Margherita*, born November 20 1851 the only daughter of the late Prince Ferdinand of Savoy Duke of Genoa married, April 22, 1868, to Umberto of Savoy Prince of Piemonte (King of Italy, 1878), widow July 29, 1900.

*Cousins of the King*

Prince *Emanuele Filiberto* of Savoy Duke of Aosta, born January 13 1868, married, June 2, 1891, to Princess *Elisa* d Orleans, daughter of the late Comte de Paris offspring, Prince *Amedeo Umberto* Duke of Apulia born October 21, 1898 and Prince *Ateneo*, Duke of Spolito born March 8, 1900 Prince *Vittorio Emanuele* of Savoy Aosta Count of Turin, born November 24 1870 Prince *Luigi Amedeo* of Savoy Aosta, Duke of the Abruzzi born January 30, 1878 Prince *Umberto Maria* of Savoy Aosta, Count of Salaparuta, born June 22, 1899—children of the late Prince *Amedeo* of Savoy, Duke of Aosta the first three from his union with Maria Vittoria, Princess of Pozzo della Cisterna, who died November 4, 1898 the last from his union with the Princess *Maria Luigia* of Naples

Most genealogists trace the origin of the reigning house to a German Count Berthold, who, in the eleventh century, established himself on the western slope of the Alps, between Mont Blanc and Lake Lemano. In the end of the eleventh century the Count of Savoy acquired the countries of Turin and Susa. Count *Amedeo*, in 1383, founded a law of primogeniture which led to the immediate acquisition of the territory of Nice. In 1416 the Counts of Savoy adopted the title of Duke, in 1418 they acquired the Principality of Piedmont, and in 1713 they obtained the island of Sicily, with the title of King. Sicily had to be exchanged, in 1720, for the Isle of Sardinia, to which henceforth the royal dignity remained attached. The Genoese territory was added at the peace of 1615. The direct male line of the House of Savoy died out with King *Carlo Felice* in 1831, and the crown fell to Prince *Carlo Alberto*, of the house of Savoy-Carignano, a branch founded by *Tommaso Francesco*, born in 1596, younger son of Duke *Carlo Emanuele I* of Savoy. King *Carlo Alberto* abdicated the throne March 23, 1849, in favour of his son, the late King *Vittorio Emanuele II*, who, by the Peace of Zurich, November 10, 1859, obtained Lombardy, with the exception of Mantua and a part of the surrounding territory. On March 11, 1860, annexation to Sardinia was voted by plebiscites in Parma, Modena, the Romagna, and Tuscany, on October 21, Sicily and Naples (including *Benevento* and *Frosinone*, part of the Papal States), and on November 4, the Marches and Umbria. The first Italian Parliament assembled in February 1861, and declared (March 17, 1861) *Vittorio Emanuele* King of Italy. The remaining part of the province of Mantua and Venetia were added in 1866. Finally, the remaining part of the Papal States (province of Rome), having been taken possession of by an Italian army (September 20, 1870), after the withdrawal of the French garrison, was annexed to the Kingdom by plebiscite on October 2.

The civil list has been settled at 16,050,000 lire<sup>1</sup> from this amount the children of the late Prince Amedeo, Duke of Aosta, receive jointly allowance of 400,000 lire, Prince Tommaso, Duke of Genoa, an allowance of 400,000 lire, and Queen Margherita, an allowance of 1,000,000 lire.

The greater part of the private domains of the reigning family were given up to the State in 1848.

### Constitution and Government

The present Constitution of Italy is an expansion of the *Statuto fondamentale del Regno*, granted on March 4, 1848 by King Charles Albert to his Sardinian subjects. According to this charter, the executive power of the State belongs exclusively to the Sovereign, and is exercised by him through responsible ministers, while the legislative authority rests conjointly in the King and Parliament, the latter consisting of two Chambers—an upper one, the Senate, and a lower one, called the *Camera dei Deputati*. The Senate is composed of the princes of the royal house who are twenty-one years of age (with the right to vote when twenty-five years of age), and of an unlimited number of members, above forty years old, who are nominated by the King for life, a condition of the nomination being that the person should either fill a high office, or have acquired fame in science, literature, or any other pursuit tending to the benefit of the nation or, finally, should pay taxes to the annual amount of 3,000 lire, or 120*l*. In 1912 there were 369 senators exclusive of six members of the royal family. The electoral law of June 30, 1912, made the suffrage almost universal for men only denying the franchise to those younger than 30 who have neither performed their military service nor learnt to read and write. The number of deputies is 508, or 1 to every 71,000 of the population (census 1911). In 1911 the number of enrolled electors was 8,227,183 (9 per 100 inhabitants without distinction of sex or age) exclusive of the electors temporarily disfranchised on account of military service. For electoral purposes the whole of the Kingdom is divided into 508 electoral colleges or districts and these again into several sections. No deputy can be returned to Parliament unless he has obtained a number of votes greater than one tenth of the total number of inscribed electors, and than half the votes given. A deputy must be thirty years old, and have the requisites demanded by the electoral law. Incapable of being elected are all salaried Government officials, as well as all persons ordained for the priesthood and filling clerical charges, or receiving pay from the State. Officers in the army and navy, ministers, under secretaries of State, and various other classes of functionaries high in office, may be elected, but their number must never be more than forty, not including the ministers and the under secretaries of State. Deputies are to receive 240*l*. annually, of which 160*l*. will be direct pay ment, and the remainder will be represented by a current account with the railways and post office, defraying travelling and postal expenses.

Lower House, elected 1909. Constitutionalists, 420, Radicals, 54, Republicans, 19, and Socialists, 27.

The duration of a Parliament is five years, and it must meet annually, but the King has the power to dissolve the lower House at any time, being bound only to order new elections, and convokes a new meeting within four

<sup>1</sup> The amount of the civil list is in fact 15,850,000 lire, because the King repays to the State the annuity settled on Queen Margherita by law of December 6, 1906.

months. Each of the Chambers has the right of introducing new bills, the same as the Government but all money bills must originate in the House of Deputies. The ministers have the right to attend the debates of both the upper and the lower House, but they have no vote unless they are members. No sitting is valid unless an absolute majority of the members are present.

The executive power is exercised under the King, by a ministry divided into 12 departments. The ministry, constituted March 29, 1911, is as follows —

*President of the Council and Minister of the Interior* — Signor *Giolitti*

*Minister of Foreign Affairs* — The Marquis di San Giuliano

*Minister for the Colonies* — Signor *Bertolini*

*Minister of Justice and of Ecclesiastical Affairs* — Signor *Finochiaro Aprile*

*Minister of the Treasury* — Signor *Tedesco*

*Minister of Finance* — Signor *Facta*

*Minister of War* — General Paolo *Spingardi*, senator

*Minister of Marine* — Contr Admiral *Pasquale Leonardi Cattolica*, senator

*Minister of Public Instruction* — Signor *Credaro*

*Minister of Public Works* — Signor *Sacchi*

*Minister of Agriculture, Industry and Commerce* — Signor *Nitti*

*Minister of Posts and Telegraphs* — Signor *Calissano*

The Minister for the Colonies was established by a law of July 6, 1912.

#### LOCAL GOVERNMENT

The administrative divisions of Italy are provinces, territories (*circondari*), districts, and communes. There are 69 provinces of which 60 are divided into territories (*circondari*), and 9 (the province of Mantua and the 8 provinces of Venetia) into districts. There are 275 territories and 71 districts. The districts have been *de facto* suppressed, though still nominally existing as administrative divisions. The territories and districts are divided into communes.

In 1913 (January 1) there were 8 326 communes. The two principal elective local administrative bodies are the communal councils and the provincial councils. According to the law of May 21, 1908 each commune has a communal council, a municipal council, and a syndic. Both the communal councils and the municipal councils vary according to population, the members of the latter being selected by the former from among themselves. The syndic is the head of the communal administration, and is a Government official, he is elected by the communal council from among its own members, by secret vote. Each province has a provincial council and a provincial commission, the numbers varying according to population. The council elects its president and other officials. The provincial commission is elected by the council from its own members. It conducts the business of the province when the latter is not sitting. Both communal and provincial councillors are elected for 6 years, one half being renewed every 2 years. The communal council meets twice and the provincial once a year in ordinary session, though they may be convened for extraordinary purposes. All communal electors are eligible to the council except those having an official or pecuniary interest in the commune. Electors must be Italian citizens,

resident in the province, twenty-one years of age, able to read and write, be on the Parliamentary electoral list, or pay a direct annual contribution to the commune, of any nature, or comply with other conditions of a very simple character.

In 1911 the number of enrolled administrative electors was 4,011,038 (11·2 per cent. of population)

### Area and Population

The following figures show the increase of the population of the present territory of the Kingdom of Italy from 1816 onwards in round numbers —

Year	Population	Increase per cent. per annum	Year	Population	Increase per cent. per annum
1816	18,583,000	—	1882	25,480,000	0·610
1846	20,618,000	0·74	1901	32,475,000	0·786
1862	25,000,000	0·450	1911	34,671,377	0·608
1872	26,601,000	0·720			

In the following table areas of provinces marked with an asterisk are definitely ascertained by the Government Survey Department, the others are estimated partly by the Military Geographical Institute, partly by the General Statistical Department —

Provinces and Departments	Area in square miles	Population Census 1882	Population Census 1901 Feb 16	Population per square mile 1901	Population Present Census 1911, June 10	Population per square mile 1911

Total	110,550 <sup>1</sup>	28,459,628	32,476,253	293 47	34,671,377	313 7

<sup>1</sup> The Italian survey department determined the total area to be 110,659 square miles; the difference, 109 square miles, is owing to uncertainty as to the exact area of several of the provinces.

The resident population (i.e. having habitual residence in Italy, including persons temporarily absent) on June 10, 1911, numbered 35,845,048.

The number of foreigners in Italy in 1901 was 61,606, 11,616 were Austrians, 10,757 Swiss, 8,958 French, 3,755 English, 10,748 Germans, 1,804 Russians,

2,907 Americans (United States), 784 Greeks, 1,400 Spaniards, and the rest mainly Turks, Belgians, Swedes and Norwegians, Dutch, Egyptians, Argentines, Brazilians.

The population of Italy is in general perfectly homogeneous. According to statistics of 1901, the exceptions are about 80,200 of French origin, 11,400 of Teutonic origin, 90,000 of Albanian origin, 31,200 of Greek origin, 9,800 of Spanish (Catalan) origin, 30,000 Slavs.

The population over 15 years of age in 1901 was 21,318,495, of these 7,534,846 were unmarried, 11,688,715 were married, and 2,097,434 were widowers or widows. Of the whole population, 18,689,103 or 87.15 per cent were unmarried, 11,688,716 or 56.0 per cent were married, and 2,097,434 or 9.85 per cent were widowers or widows.

Population according to occupation in 1901, exclusive of children under 9 years —

Nature of occupation	Male	Female	Total
Agriculture, forestry, cattle rearing	6 411 001	2,200,002	8,611,003

<sup>1</sup> Including 22,000 killed in the earthquakes of December 28, 1908.

*Emigrants* — Total number in 1911, 538,844, of whom 271,065 went to other European countries or those bordering on the Mediterranean, and 267,779 to countries overseas.

The number of Italians who returned to Italy was — In 1910, 161,000 (of whom 92,000 were from the United States), in 1911 219,000 (of whom 140,000 were from the United States).

The number of Italians abroad was officially estimated in 1910 at about 5,558,000. In 1901 a Commission under the Ministry of Foreign Affairs, was established for the direction of the Government service relating to emigration. There is now regular inspection and a medical officer watches over the emigrants while at sea.

#### PRINCIPAL TOWNS

The numbers of inhabitants at the different centres do not in Italian statistics afford a sufficient basis for distinguishing between the urban and rural population. In Northern Italy the population is scattered over the country and there are few centres. In Southern Italy and in the islands the country people live in the towns, coming and going to cultivate their own plots of land, consequently there are many populous centres where, if numbers alone were considered the population would be regarded as urban, though it is, in truth, almost exclusively rural. The following statement gives the classification of communes according to resident population in 1911 —

	Number	Population	Per 1,000
Communes with population over 100,000	18	3,946,574	109.6
from 50,001 to 100,000	30	1,981,928	55.1
„ 30,001 „ 50,000	50	1,925,540	53.6
„ 20,001 „ 30,000	100	2,366,436	65.8
„ 15,001 „ 20,000	98	1,663,751	46.8
others	8,032	24,075,829	669.5
Total	8,322	35,959,077	1,000.0

The communal population of the capitals of provinces was as follows on June 10, 1911 —

## Census 1911

Communes	Popula- tion	Communes	Popula- tion	Communes	Popula- tion
Napoli	678,031	Perugia	65,805	Lecce	36,222

Religion<sup>1</sup>

The Roman Catholic Church is, nominally, the ruling State religion of Italy, but the power of the Church and clergy is subordinated to the civil government, and there is freedom of worship to the adherents of all recognised religions.

The census returns of 1901 were as follows —

Profession	Total	Per cent.
Roman Catholic	31,539,863	97.12
Evangelical Protestant	65,595	0.20
Greek Church	2,472	0.01
Israelite	35,617	0.11
Other professions	398	—
Not professing any religion	36,082	0.11
Not known	796,276	2.45
Total	32,475,253	100.00

Of the Protestants, 22,500 belonged to the Waldensian Church of Piedmont, about 10,000 to the other evangelical Italian Churches, and 30,000 to foreign Protestant bodies.

Under the Roman Pontiff, the Catholic episcopal hierarchy in Italy consists of 50 archbishops and 216 bishops, besides the 6 cardinal bishops.

<sup>1</sup> See also Rome, See and Church of.

near Rome. Of these prelacies, 74 are immediately subject to the Apostolic See, 13 being archbishoprics. Every archbishop or bishop is appointed by the Pope, on the advice of a committee of Cardinals, but the royal *crequatur* is necessary for his installation. In 1901, the number of parishes was 90,707, the secular clergy numbered 68,844, the regulars (monks, lay-brothers, nuns, &c.) 48,043, sacristans, &c., 12,129, persons employed at the Pontifical and Episcopal Courts, &c., 418. There were in 1901, 458 Evangelical pastors and ministers, and 69 Jewish Rabbis.

The suppression of the religious corporations began in 1855, and was completed by the law of June 19, 1878, which extended the measure to the city and province of Rome. The method followed was simply the abolition of the legal status of religious corporations so that they could not hold property. Thus mortmain land was set free for agriculture and for buying and selling, while the State profited by relief from burdens and by direct taxation of the land thus freed from mortmain. Dispossessed monks and nuns received life pensions, houses which had been used for schools or for hospitals, &c. were with restrictions, made over to the communes, in Rome, the hospitals, &c., were assigned to the various charitable institutions, everywhere the churches of the corporations necessary for public worship were preserved, as were monumental, artistic, and other corporation buildings. Of the monastic edifices some were occupied by the State others assigned to communes or provinces. The corporations of Lombardy were privileged by the treaty of Zurich, and their lands and houses were left to the disposal of their individual members. All other immovable corporation property was sold, but the equivalent revenue (after certain deductions, including a 30 per cent. tax) was inscribed in the public debt book. The administration of the revenue from the proceeds of land destined for charity or instruction now belongs to the communes, that from monastic parish church property in Rome, to the parish churches, that from property of foreign religious orders in Rome (400,000 lire) to the Holy See, while the remainder is administered by two institutes which pay the pensions and other dues and provide (1) for beneficent work and for worship in Rome and (2) for worship in the rest of Italy.

### Instruction

The State regulates public instruction, and maintains, either entirely or in conjunction with the communes and provinces, public schools of every grade. Every teacher must have the qualifications required by law.

Schools in Italy may be classified under four heads, according as they provide (1) elementary instruction, (2) secondary instruction—classical (3) secondary instruction—technical (4) higher education.

(1) Schools providing elementary instruction are of two grades. Religious instruction is given to those whose parents request it. Only the lower-grade instruction is compulsory. Every commune must have at least one lower grade school for boys and one for girls, and no school with only one master should have more than seventy pupils. Higher-grade elementary schools are required in communes having normal and secondary schools, and in those with over 4,000 inhabitants. In both grades the instruction is free. The age-limit of 8 to 9 exists for communes where there is no higher elementary school, but where there is such higher school, children are required to attend till they have completed the course of instruction, the compulsory age being thus raised to 13 years. This law provides that illiterate persons shall be under various disabilities.

(2) Secondary instruction—classical—is provided in the *ginnasi* and *licei*, the latter leading to the universities

(3) Secondary instruction—technical This is supplied by the technical schools, technical institutes and institutes for the mercantile marine

(4) Higher education is supplied by the universities, by other higher institutes, and by special higher schools

The total Budget of State funds by the Ministry of Public Instruction in 1912-13 was 5,618,788*l* (of which 27,934*l* was extraordinary), as much more being provided by communes, provinces, foundations, &c

In the last 46 years there has been an increase of 156 per cent in school attendance

Percentage of illiterates —

Year	Over 6 Years		Over 20 Years	
	Male	Female	Male	Female
1862	68.1 <sup>1</sup>	81.3 <sup>1</sup>	65.6	81.5
1872	61.9	75.7	60.2	77.4
1882	54.6	69.3	53.9	72.9
1901	42.5	54.4	43.9	60.4

<sup>1</sup> Over years (1862)

According to the census of 1901 the smallest percentage of illiterates above six years was in Piedmont, 17.7 and the largest in Calabria, 78.7. Since then there has been much improvement, and now there are circondari (arrondissements) e.g. Domodossola, Pallanza and Varallo in the province of Novara, and others in the provinces of Turin, Como, Cuneo, &c, where all young people twenty years of age can read and write.

Statistics of various classes of schools —

There were also, 35 schools of agriculture (1910-11) with 1,781 students 3 schools of mining (1910-11) with 72 students, 85 industrial schools (1908-09) with 18,218 students 206 schools of design and moulding (1910) with 22,196 students 50 commercial schools (1910-11) with 6,303 students 29 professional schools for girls with 6,565 students, 13 Government fine art institutes (1910-11) with 2,559 students and 13 non-Government with 1,162 students 5 Government institutes and conservatories of music with 981 students and 47 non-Government with 4,624 students.

## Justice and Crime

Italy has 5 Courts of Cassation, (4 of which have jurisdiction exclusively in civil matters), and is divided for the administration of justice into 20 appeal court districts, subdivided into 163 tribunal districts and these again into *mandamenti*, each with its own magistracy (*Pretura*), 1,635 in all. In 12 of the principal towns there are also *Procuratori urbani* (14) who have jurisdiction exclusively in penal matters. For civil business, besides the magistracy above-mentioned, *Conciliatori* have jurisdiction in petty plaints.

The *Pretori* have jurisdiction concerning all misdemeanours (*contravvenzioni*) and offences (*delitti*) punishable by imprisonment (reclusion and detention) not exceeding three months, or banishment not exceeding one year, or by fine not exceeding 1,000 lire. The penal Tribunals have jurisdiction in the first instance in offences (*delitti*) for which the Code establishes a minimum penalty not exceeding five years of imprisonment and a maximum not exceeding ten years, or in offences punishable by a fine exceeding 1,000 lire.

The Courts of Appeal, which in all cases have juries, have jurisdiction in all proceedings concerning serious offences punishable by imprisonment for life (*ergastolo*), or by imprisonment (reclusion and detention) exceeding in the maximum five years, and in the maximum ten years. They have exclusive jurisdiction (save that the Cassation, on occasion, a high Court of Justice) concerning offences against the internal and external security of the State, and all penal offences. Appeal is allowed to the penal Tribunals from the sentences of the *Pretori*, and to the Courts of Appeal from those of the penal Tribunals. There is no appeal from sentences of the Courts of Appeal. The Court of Cassation has power to stand, for legality, sentences passed by the inferior magistracy and to decide questions of jurisdiction or competency.

Statistics of persons convicted of offences of all kinds —

Year	Convictions			
	Total	Before the Pretori	Before the Tribunali (first instance)	Before the Corti d'Assise
1906	451,668	876,196	78,069	2,298
1907	345,329	269,572	72,149	2,108
1908	410,876	337,497	70,990	2,389
1909	436,242	410,378	73,663	2,201
1910	436,438	363,277	70,986	2,225

In 1911 (January 1) there were 45,328 males and 3,925 female prisoners. At that date there were 180 central and *arrondissement* prisons, 72 penal establishments, 41 reformatories, and 8 colonies for persons under disciplinary restraint. There were, besides, 1,302 cantonal prisons.

### Pauperism

In Italy legal charity, in the sense of a right in the poor to be supported by the parish or commune, or of an obligation on the commune to relieve the poor, does not exist. Public charity in general is exercised through the permanent charitable foundations, called '*Opere pie*', regulated by the law of July 17 1890. The general results of an inquiry in 1900 were — Leaving out of account institutions intended for lending, or for the encouragement of saving (that is, *monti di pietà*, *monti frumentari*, *casse di prestanze agrarie*), there were 27,078 *opere pie*, with a gross capital of about 2,205,000,000 francs. Their net income amounted to 52,569,000 lire. Added to this net income were casual legacies, contributions from private benefactors, subsidies from communes (for hospitals), &c., all of which receipts are spent annually, and thus the sum at the disposal of the *opere pie* in 1900 (last available data) amounted to 120,765,000 lire.

### Finance

#### *Revenue and Expenditure*

Direct taxes are those on lands, on houses, and on incomes derived from movable capital and labour. The tax on lands, amounts to about 96 million lire. That on houses is at the rate of 12.5 per cent. (with three-tenths additional) of the amount taxable, which is two-thirds of the real annual value in the case of factories, and three-fourths in the case of dwelling houses. The tax on incomes from movable wealth was raised to 20 per cent. of the amount taxable. The amount taxable in the case of incomes varies from the whole income to fifteen fortieths according to various conditions. The communes and provinces also tax lands and buildings. The State grants to the communes one-tenth of the proceeds of the tax on incomes as compensation for other communal revenues made over to the State by various laws.

The principal indirect taxes are — the customs duties, the octroi, the taxes on manufactures, the salt and tobacco monopolies, lotto.

Total revenue and expenditure for five years (25 lire = 1l.) —

Years ending June 30	Total Revenue	Total Expenditure	Difference
	Lira	Lira	Lira
1907-8	2,320,597,699	2,258,720,848	+ 61,876,851

<sup>1</sup> By law of May 1, 1912, the interest on the 3 p c (gross) and 4 p c (net) consolidated debt is reduced from 8 1/2 p c (net) to 8 p c.

2. Former consolidated 44 per cent preserved solely in favour of Public Charitable Institutions.

The capital (nominal) of the consolidated and redeemable debt amounted to 13,041,422,577 lire on July 1, 1911, or 531,656,903*l* sterling, and the interest to 459,284,208 lire, or 18,369,368*l* sterling. The debt per head of population was 15*l* 0*s* 8*d*, and the interest 13*s* 0*d*.

On June 30, 1911 the property of the State was as follows —

	Estimated Value. Lire
Financial assets (Treasury)	1 664 181 407
Property, immovable, movable, loans, and various titles	1 560,339,197
Property of industrial nature	1 871 130 473
Material in use in army and navy	1,503,792 777
Property used in the service of the State	644 820,628
Scientific and artistic material	252,958,763
Gold in depot	18,704,875
Total	7,520,877,920

In the financial year 1910-11 the revenue from State property was — Railways, 39 260 935 lire ecclesiastical, 573 991 lire from fixed capital 8,393,874 lire from the Cavour Canals, 3 901 190 lire various, 4 784 208 lire total 56,914 117

## Defence

### I FRONTIERS

The extent of the land frontier of Italy is as follows — French frontier 300 miles, Swiss 418 Austro-Hungarian 484, frontier of San Marino 24, in all (exclusive of San Marino) 1202 miles. The coast line of the peninsula measures 2,052 miles, of Sicily 630, of Sardinia, 880, of Elba and the small islands, 648 the total length of coast is thus 4160 miles.

On the Continental frontier of Italy the principal passes of the Alps are defended by fortifications. The basin of the Po is also studded with fortified places, the chief strong places in the region are the following — Casale, Piacenza, Verona Mantua (these two belong to the old Austrian Quadrilateral), Venice, Alexandria. On the coast and islands are the following fortified places — Vado, Genoa, Spezia, Monte Argentario, Gaeta, works in the Straits of Messina Taranto. To the north of Sardinia a group of fortified islands form the naval station of Maddalena. Rome is protected by a circle of forts.

### II ARMY

Service in the army (or navy) is compulsory and universal. The total period is 19 years, beginning at the age of twenty and the young men of the year are divided into 3 categories, the first being posted to the permanent army, the second also to the permanent army but with 'unlimited leave', and the third, that is those exempted from active service, to the

territorial militia. The second category men form what is called the 'complementary force'.

The term of service in the ranks of the permanent army is now 2 years for all arms. After passing through the ranks, the men are placed on 'unlimited leave', &c., they are transferred to the reserve, in which they remain until they have completed a total of 8 years' service. From the reserve the soldier passes to the mobile militia, the term of service in which is 4 years. After completing his time in the mobile militia he is transferred to the territorial militia in which he remains 7 years, thus finishing his military service at the age of 39.

The second category recruits are regarded as belonging to the permanent army for the first 8 years of their service. During this period they receive from 2 to 6 months' training, which may be spread over several years. They then pass to the mobile militia, and afterwards to the territorial militia, the periods of service in each being the same as in the case of the first category soldiers. The men allotted to the third category, who are posted at once to the territorial militia, receive 30 days' training.

In Italy each regiment receives recruits from all parts of the country, and the troops change their stations by brigades every four years. On mobilisation regiments would be filled up by reservists from the districts in which they are quartered at the time. Reliefs are so arranged that at least half the reservists shall have previously served in the unit which they would join on mobilisation.

The field army consists of 12 army corps and 3 cavalry divisions. The army corps consist of 2 divisions, except the 15th army corps in the Roman district, which has an additional division. There are two brigades of infantry each consisting of two regiments of three battalions, and a regiment of field artillery (batteries) to each division, which has a war strength of 14,156 officers and men, 1,894 horses, and 30 guns. There is a regiment of field artillery (6 batteries of 6 guns), a cavalry regiment, and a regiment of Bersaglieri, to each army corps. Cavalry divisions each consist of 2 brigades of 2 regiments, and of 2 horse artillery batteries.

Each regiment of Bersaglieri (light infantry) consists of 3 battalions of infantry and 1 battalion of cyclists, the cyclists being intended to supplement the cavalry in the field. The Alpini are frontier troops, specially organised to defend the mountain passes leading into Italy; they consist of 8 regiments (26 battalions) of Alpine infantry, and 2 regiments of 36 mountain artillery batteries. There are furthermore, 1 regiment of horse artillery of 8 batteries, 2 regiments of heavy artillery of 10 batteries each, and 10 regiments of fortress artillery. The engineers are organised as 6 regiments, 2 consist of pioneers, 1 of pontoon troops, 1 of telegraph troops, 1 of sappers and miners, and 1 of railway troops.

The Carabinieri are a force of military police. They are recruited by selection from the army, and they remain in the ranks of the force until they have completed 3 years' service. They then serve in the reserve of the carabinieri for 4 years, after which they are transferred to the territorial militia for the remainder of their service, and are reckoned as a part of the army.

The strength of the field army (12 army corps and independent cavalry) is about 400,000 combatants. The nominal strength of the mobile militia is 326,000, but the numbers put into the field would not perhaps exceed 200,000. The 'complementary troops' should be sufficient to maintain the strength of the first line and mobile militia in the field. The territorial militia is strong numerically but only about half the number, viz.: the

first category men who have passed through the army and mobile militia, could be made use of should its services ever be required.

The arm of the Italian infantry is the Mannlicher Carcano rifle a magazine weapon of 6.5 mm. calibre. The territorial militia has the old Vetterli. The field artillery is being rearmed with Krupp guns, calibre 7.5 cm. model 1906.

The following table gives the *peace* strength of the Italian army in 1911 —

	Officers	Men	Horses & Mules
Administration, staff military schools, etc.	1 548	2,081	2,510
Infantry 389 battalions, and 86 district headquarters	7 827	159 297	6 211
Cavalry 150 squadrons, and 29 depôts	1 006	27 978	25 443
Artillery 263 batteries 110 companies, 51 depôts etc.	2 354	48 961	3,090
Engineers, 80 companies, and 10 companies engineer train	630	11 105	1 300
Medical 12 companies	769	3 712	81
Communicariat 12 companies	412	9 978	120
Carabinieri, 12 legions	704	30 007	374
Total	15 995	287 157	64 424

In consequence of the despatch of an expeditionary force to Tripoli and Cyrenaica, the Italian army has been increased by Royal Decree of December 7 1911 (converted afterwards into the law of June 27, 1912) as follows — *Infantry* 24 battalions of infantry of the line of 4 companies each, 3 battalions of bersagliers of 3 companies each; *Cavalry* 5 squadrons; *Artillery* 2 groups of field artillery of 3 batteries each, 4 groups of mountain artillery of 3 batteries each, 4 groups of fortress artillery of 3 companies each; *Engineers* 2 battalions of 8 companies each.

The cadres have been increased of the following number of officers: 20 for the carabinieri, 342 for infantry, 21 for cavalry, 112 for artillery, 20 for engineers. The same law has provided for the constitution of 1 Flying Corps (1 battalion of 2 companies—*Balvagione Aviatori*).

The military budget of Italy for 1912-13 amounted to 16 966,4711 including 3,214,0001 extraordinary expenditure. In 1908 extra credit of no less than 8,920,0001 was granted to be spread over 9 years. This amount was to be spent on the rearmament of the artillery, guns for permanent works, fortifications, railways, barracks, mobilisation stores, and homes.

The Italians have a special African corps in Erythraea consisting of 3 companies of white infantry and 4 native battalions, also 1 squadron of native cavalry, a local company of artillery (Italians) and a native mountain battery. Its total strength is about 4,600 of all ranks, of whom about 3,800 are natives.

In Italian Somaliland there is a native corps of 4 infantry companies and 1 artillery company with Italian officers, and a body of military police. Total strength about 5,000 of all ranks.

## III. NAVY

The Italian navy estimates for financial years ending June 30 were —

	£		£
1911-12	7,802,488	1909-10	6,685,440
1910-11	6,950,988	1908-09	6,835,860

The naval administration, under the Minister of Marine, is thus organised. An assistant secretary, a vice-admiral as Chief of the Staff, a Superior Board composed of two vice-admirals, the lieutenant general of the *Genio Navale* (naval architect), the major general of engineers corps, a captain as secretary, and a civil member, a general surgeon at the head of the sanitary service, a colonel of the *Genio Militare* (military architect) at the head of a section having charge of the engineering works of the naval stations, a general paymaster directing the sections of account. A rear admiral is chief of a special department administering matters concerning the *personnel* (officers), another rear admiral the *personnel* (navy), a major general of the *Genio Navale* of that dealing with naval construction, and a rear admiral of that devoted to ordnance and equipment. A civil officer administers the department of the merchant marine, which is under the direction of the assistant secretary for the navy. For purposes of local naval administration and defence the Italian littoral is divided into three departments: 1, Spezia, 2, Naples, 3, Venice. The vessels are apportioned for administrative purposes, between the three departments. There are torpedo stations all round the Italian coasts, the head stations being at Genoa, Spezia, Maddalena, Gasta, Messina, Taranto, Brindisi, Ancona, and Venice. Summary of the Italian navy —

	Completed at end of		
	1913	1915	1914
Dreadnoughts	1	4	5
Pre-Dreadnoughts	14	11	11
Armoured cruisers	16	10	11
Protected cruisers	11	12	18
Torpedo gunboats etc.	10	10	10
Destroyers	24	10	10
Torpedo boats	112	111	111
Submarines	15	22	22

Some ships of no fighting value are excluded from the above table.

The tables which follow of the Italian armour-clad fleet and first-class cruisers are arranged chronologically, after the manner of other similar tables in this book, though it should be remembered that in Italian official classification the usual line between battleships and armoured cruisers does not exist.

## BATTLE FLEET

First of class laid down	Name	Displace- ment	Armour		Principal Armament	Torpedo Tubes	Indicated horse-power	Max speed

	S. Marco						20,000	
	Amalfi						19,000	
	Pisa						19,000	

The personnel consists of 1,927 officers (comprising 1 admiral, 25 vice and rear-admirals, 216 captains and commanders, 419 lieutenants, 237 sub-lieutenants and midshipmen, 108 engineer constructors, 312 engineers, 210 sanitary officers, 243 commissariat officers, 157 officers of the *Corpo Reale Equipaggi*) and 27,080 men (sailors, gunners, mechanics &c). Both naval and military officers are attached indifferently to the actual service.

## Production and Industry

### 1. AGRICULTURE

The systems of cultivation in Italy may be reduced to three—1. The system of peasant proprietorship (*coltivazione per economia o a mano propria*). 2. That of partnership (*colonia parziaria*). 3. That of rent (*affitto*). Peasant proprietorship is most common in Piedmont and Liguria, but is found in many other parts of Italy. The system of partnership or *colonia parziaria*, more especially in the form of *mezzadria*, consists in a form of partnership between the proprietor and the cultivator. This system is general in Tuscany, the Marches, and Umbria. It is almost unknown in the Basilicata, little practised in Apulia, Calabria, and Sardinia, and has been entirely abandoned in the two most advanced centres of cultivation in the south, viz.—Bari and the province of Naples. Various modifications of the system exist in different parts of Italy. The system of rent (*affitto*) exists in Lombardy and Venetia.

Large farms (*la grande coltura*) exist in the neighbourhood of Vercelli, Pavia, Milan, Cremona, Chioggia, Ferrara, Grosseto, Rome, Caserta and in

Apulia, the Basilicata, Calabria, and at Gurgenti and Irapanni in Sicily. In Italy generally the land is much subdivided.

In the census of February 10, 1901, there were 6,411,001 males and 2,000,002 females of 9 years of age and upwards described as engaged in agriculture.

The area of Italy comprises 28,868,222 hectares (1 hectare = 2.47 acres). Of this area, 2,298,615 hectares (8 per cent) is sterile and 26,571,607 hectares (92 per cent) productive. In the following table 1 quintal = 5 bushels.

	Area 1911	Produce		
		Total		
		1910	1911	1909
	Hectares	Quintals	Quintals	Quintals
Wheat	4,711,000	41,700,000	38,200,000	47,100,000
Rye	1,640,000	5,300,000	4,790,000	4,900,000
Rice	11,000	4,950,000	4,790,000	—
Barley	1,220,000	1,880,000	1,840,000	1,374,000
Maize	4,480,000	1,880,000	840,000	1,900,000
Wine	514,000	4,140,000	5,147,300	4,075,000
Olives	4,417,000	93,000	4,054,000	—
	1,341,000	1,385,000	2,420,000	—

In 1911 Italy exported 10,052 and imported 154,222 cattle; exported 17,058 and imported 1,128 sheep; exported 264 and imported 1,002 goats; exported 21,763 and imported 1,845 swine.

Silk culture, though flourishing most extensively in Piedmont and Lombardy, is carried on all over Italy. The average annual production of silk cocoons in the five years, 1906-10, is estimated at 52,563,000 kilo grammes and of silk, at 5,654,000 kilogrammes (in 1876 1,298,000 kilos). In 1912 the estimated silk cocoon crop was 47,470,000 kilogrammes, as against 41,951,000 kilogrammes in 1911.

In the year 1898-99 there were only 4 sugar factories with an output of 5,972 metric tons; in 1910-11 there were 35, their output being 173,184 tons.

In 1903 the silk industries employed 191,000 work people (in 1891, 172,000); woollen industries, 38,000 (in 1894 30,000); cotton industries, 140,000 (in 1900, 135,000); hemp, linen &c., 26,000 (in 1876 18,000). Domestic textile industries in 1903 employed 292,000 looms (in 1876, 208,000). The value of the output of industrial chemical products in 1911 was 154,000,000 lire (in 1893, 26,134,000 lire). The motive power of all works employed on January 1, 1904, amounted to 3,000,000 horse power (in 1899 to 1,000,000 horse power).

## II. FORESTRY

The forestry department was re-organised by a law of June 2, 1910, in accordance with which a Director General of Forests was appointed, together with advisory committees, one general and the other technical, and a royal forests corps.

The forest area (exclusive of chestnut plantations) is about 4,000,000 hectares. The yield from the forests is valued as follows:—

	1909	Cubic metres	Lire
Timber		1,696,000	37,500,000
Firewood		4,049,000	4,000,000
		Quintals	
Charcoal		5,004,000	35,400,000
Total			174,180,000
			(1,705,280)
			3 x 2

This total is exclusive of secondary products valued at about 32 millions of lire annually. The forest produce thus amounts to 156 millions of lire (6,240,000*l.*). From 1867 to December 31, 1910, 84,189 hectares were re-planted by or with assistance from the Government.

### III MINES AND MINERALS

Production in metric tons (1 metric ton = 2,204 lbs or 1,016 metric tons = 1,000 English tons) of metallic ores and other minerals in 1911 —

Ores &c	Productive mines	Metric tons	Lire	Workers
Iron	31	373,786	6 767 519	2,055
Iron manganese	1	6 842	58,838	88
Manganese	9	3,515	110,120	163
Copper	9	45 136	1,225,583	797
Zinc	49	144 719	15,368,972	14,318
Lead		15 478	6,540 149	
Lead and zinc		0	24,500	
Silver	1	24	27 700	4
Gold	1	2,050	83 200	37
Antimony, argentiferous	1	141	41,644	304
Mercury	6	87 803	4 664,597	949
Iron and cuprous pyrites	19	100 273	3,141 044	2,142
Mineral [see]		5 7,137	5,021,506	3,061
Sulphur ore	354	2 682 766	31 097,336	10,296
Asphaltic and bituminous substances	18	158,681	3,065 027	1 661
Boric acid	12	2 648	1 006,240	442
Totals (including graphite, petroleum and other minerals)	650	—	82,434,891	47,001 <sup>1</sup>

<sup>1</sup> Exclusive of 1,501 workers in non productive mines. Of the total number of workers, 1,871 were female.

The quarries of Italy employed in 1911 70,767 persons (1 182 females), the output of building and decorative stone being valued at 41,985 959 lire (marble, 24,978,076 lire). The total output was valued at 61 648,203 lire in 1911.

In 1911 there were 98,854 persons employed at lime and brick kilns, whose output was of the value of 173,595,764 lire.

### IV FISHERIES

On December 31, 1910 the number of vessels and boats employed in fishing was 27,422, with an aggregate tonnage of 75,672. These numbers include 50 boats of 457 tons engaged in coral fishing. There were 121 076 fishermen, of whom 8,230 were engaged in deep-sea or foreign fishing. The value of the fish caught in 1909 (excluding foreign fishing) was estimated at 22,407,000 lire, the value obtained from tunny fishing was 3,485,000 lire and from coral fishing 486,000 lire, the quantity being estimated at 50,350 kilograms.

## Commerce

Year	Special trade (in sterling) (exclusive of precious metals)		Precious Metals (in sterling)	
	Imports	Exports	Imports	Exports

For the determination of Customs values see in Italy there is a permanent central commission comprising official members, representatives of commercial corporations, &c. The values recorded are those of the goods at the frontier exclusive of import or export duties. For imports and exports the parties interested declare the value of the goods, their quantity and the country of origin or destination. For imports there is provided the gross weight in the case of goods subject to a duty of 20 francs per quintal (80 1/2 per cent.) or less, the net legal weight (i.e. with deduction of an official tare) in the case of goods subject to duty of 20 or 40 francs per quintal (80 1/2 to 100 1/2 per cent.) the actual net weight in the case of goods taxed at over 40 francs per quintal (100 1/2 per cent.) For exports the gross weight is usually given. Inaccurate declarations are punishable by law. Inaccuracies are prejudicial to the Treasury.

Trade of Italy is regarded either as general or special. The general trade comprises imports from abroad, whether intended for consumption within the kingdom or for transit, and all exports to foreign countries, whether national or foreign. On December 31, 1911, the special trade is restricted to imports for consumption and include 50 brands of nationalised merchandise. National merchandise consists of the fisherman, the manufactures of the kingdom while foreign imports on which the duties have value of the through the kingdom whether directly or after having been temporarily at 27,407,00.

and from 1912 provides for "the most favoured nation" treatment in matters of kilogrammes. The Convention

The principal articles of import into Great Britain from Italy, and British exports to Italy (according to the Board of Trade returns) in the last 2 years were —

Imports into U.K.	1910	1911	Exports to Italy	1910	1911
	£	£		£	£
Fresh fruit	197,855	640,888	Coal	5,347,887	5,688,428

## Internal Communications.

### I RAILWAYS

Length of State railways 8 252 miles (June 30 1912), all the railway lines 10 800 miles.

In 1910-11 the total receipts were 534 461 158 lire in 1911 12, 575,213,000 lire (provisional)

### II POSTS AND TELEGRAPHS

In the year 1911 there were 10,236 post offices. The postal traffic was as follows —

	Internal	External and Transit	Total
Letters	1 000	1 000	1 000
Post cards	266 614	41 524	308 140
Newspapers &c.	147 97	10 507	158 284
Post Office orders &c.	618 448	22 021	640 469
	21 410	471	21 881
Total	1 072 836	74 087	1 146 923

On June 30, 1910, the telegraph lines had a length of 92,328 miles, and the wires, 187,424. There were 7,676 telegraph offices, of which 5,747 were State offices and 1,929 railway offices. There were, in the year, 12,115 048 telegrams sent inland 2 418,878 international telegrams, 2,818,379 official 116,725 in transit, total 17,462,030

The telephone service in 1910 had 46,293 stations. There were 219 urban systems with 8 698 miles of line and 104,763 miles of wire, 363 inter-urban systems with 14,687 miles of line and 39,375 miles of wire. Total number of conversations in the year, 4 404,082. In 1907 the telephone service passed to the direct working of the State.

## Money and Credit.

State notes and bank notes in circulation in lire —

	1907	1908	1909	1910	1911
State notes	487,618,410	485,971,000	483,924,715	443,118,196	445 290 691
Bank notes	1,851,547,950	1,808,557,800	1,867,600,450	2 030,647,300	2,192,321,300

The total coinage from 1862 to the end of 1911 was gold, 428,516,970 lire, silver 589,484,819 lire, nickel 37,247,000 lire bronze, 83,903,949 lire total, 1,139,158,838 lire, exclusive of re-coinage

The nominal value of the money coined (including re-coinage) —

	Gold	Silver	Nickel	Bronze	Total
	Lire	Lire	Lire	Lire	Lire
190	—	10 962,734	—	4 600	10 967 334
1908	—	6 077 358	7 863,000	116,889	9 657 047
1909	—	4 474 800	8 356 000	170 458	7 501 258
1910	—	6 062 013	4 377 400	47 780	11 587 197
1911	1 000 000	3 260 020	784 000	732 448	7 566 868
	1 000 000	31 440 514	13 280 000	600 075	45 879,159

By law of July 22, 1894, gold and silver (5 franc pieces 900 fine) were temporarily withdrawn from circulation being represented by paper. On August 31, 1912, the actual currency consisted of 495 875,895 lire of State notes, 2,148 477,800 lire of bank notes and about 100,000,000 lire of copper and nickel coin.

There is no national bank in Italy. According to the law of August 10 1893, there are only three banks of issue: the Banca d'Italia, the Banco di Napoli and the Banco di Sicilia. Assets and liabilities of those banks on December 31 1911 —

	Assets		Liabilities
	Lire		Lire
Cash and Reserve	1 580 646 364	Capital	360 000 000
Bills	834 868 000	Notes in circulation	1,139 581 520
Anticipations	101 931 007	Accounts current &c.	353,688,026

Deposits	1 500 093 004	deposited	2,750,098 034
Various securities	606 231 887	Various	487 005 761
Total	5 088 218 681	Total	5 088 218 681

<sup>1</sup> Reserve in gold in silver and in equivalent bonds (1 580 062, 75) Gold 1,308,068,968 lire bills of exchange on foreign countries, foreign bank notes, treasury bonds, &c. 1,5 214 890 lire silver (.900 fine), 120 660 270 lire fractional silver 4,373 909 lire.

On March 9 1912 a bill was passed making the business of life insurance in Italy a State monopoly.

On January 30, 1911, there were 862 co-operative credit societies and popular banks, 1,140 rural banks, 207 ordinary credit companies, and 5 agrarian credit institutions, and (January, 1912) 11 credit foncier companies of which 4 were in liquidation, with 874 722,625 lire of 'cartelle fondiarie' in circulation, and with 607,409,177 lire of 'mutui con ammortamento'.

The following table gives statistics of the savings banks at the end of 1911:—

	Offices	Depositors	Total Deposits	Deposits during year	Repayments during year
			Lire	Lire	Lire
Post-office savings-banks	2,408	6,777,403	1 872,712,748	934,619,165	835,142,008
Ordinary "	186	2,807 408	2 402,635,218	1 125,600,472	1 063,512,537

On December 31, 1910, the savings deposited with the co-operative credit societies amounted to 786,987,427, and ordinary credit companies to 111 290 911 lire

On August 12 1912 a Law came into operation establishing life insurance as a State monopoly The existing insurance companies were allowed to continue their operations for 10 years under certain conditions The State activities in connection with life Insurance will be guided by the National Insurance Institute

### Money, Weights, and Measures

The money, weights, and measures of Italy are the same as those of France the names only being altered to the Italian form

The *Lira* of 100 *Centesimi*: intrinsic value 2<sup>5</sup> 22½ to 1<sup>7</sup> sterling

The coin in circulation consists of gold 10 lire and 20 lire pieces, of silver 50 cent, 1 lire, 2 lire, and 5 lire pieces nickel 20 cent pieces, and bronze 1 2 5 and 10 cent pieces Nickel coin is being substituted for bronze to a large amount Bank notes of 50 100 500 and 1,000 lire are in circulation also small notes issued by the State for 5 10 and 25 lire

### Diplomatic Representatives

#### 1 OF ITALY IN GREAT BRITAIN

*Ambassador* —Marquis G Imperiali

*Councillor* —Count Gaetano Manzoni

*First Secretary* —Count Carlo Freschi

*Second Secretary* —Baron Mario de Rosis

*Third Secretary* —Ascanio Colonna and Paolo de Larente

*Military Attaché* —Lt Colonel Ugo Bagmati

*Naval Attaché* —Capitaine de Corvette Count Lovatelli R I N

*Archivist* —Ugo Catani

There are Consular representatives at London (Consul Marquis Alessandro Faa di Bruno) Dublin (C ), Glasgow, Liverpool (C ) A

#### 2 OF GREAT BRITAIN IN ITALY

*Ambassador* —Rt Hon Sir Rennell Rodd, G C I O K I M C appointed December 1, 1908

*Councillor* —H G Dering, M P O

*Secretaries* —( Messrs R H Hoare the Hon C Foster and F C Osborne

*Naval Attaché* —Commander A C Stewart R N

*Military Attaché* —Col F J Grant C I

*Consul General* —Major W P Chapman (at Turin

There are Consular representatives at Brindisi Cagliari, Florence Genoa (C G ), Leghorn (V C ), Messina (V C ), Milan, Naples, Palermo Spezia (V C ) and other towns

### San Marino

Embraced in the area of Italy is the independent Republic of San Marino which claims to be the oldest State in Europe Its legislative power is vested in the Great Council of 60 members elected by popular vote a third of whom are renewable every three years, and two of whom are appointed every six months to act as Regents (Capitani reggenti) The regents exercise executive power A smaller Council consists of 12 members, and is divided into 4 congresses *Congresso Economico di Stato*, *Congresso di Legali*, *Congresso degli Studi*, *Congresso militare* The frontier line is 24 miles in length, area is 36 square miles, and population (April, 1912)

10 701 The annual revenue and expenditure amount to 382,109, and 444 835 lire respectively There is no public debt. The military force contains 88 officers and 950 men The chief exports are wine, cattle and stone A new treaty of friendship with the Kingdom of Italy was concluded June 23, 1907, revised in 1908. The Republic has extradition treaties with England, Belgium, Holland and United States. San Marino has bronze and silver currency coined in Italy 210,000 lire in silver and 118,000 lire in bronze

## FOREIGN DEPENDENCIES

### Colony of Eritrea

The dominion of Italy on the coast of the Red Sea extends from Cape Kasar (18° 2' N) to Cape Dumetrah on the strait of Bab-el Mandeb (12° 30' N) The length of coast is about 670 miles The area is about 45,800 square miles, and the population which is to a great extent nomadic is estimated at 450 000 In 1908 there were 274,944 natives and 2,980 Europeans (inclusive of the military forces), 2,271 of whom were Italians, Massawah having 2,275 inhabitants of whom 524 are European (exclusive of the garrison) and 480 Asiatics Asmara is the seat of government The Italian possessions on the Red Sea are constituted as the Colony of Eritrea, with an autonomous administration and the management of its own finance Military force 127 officers, and 4,484 men (3,740 natives and 496 Italian)

In the Italian dependencies the central government is represented by a civil governor who is nominated by the King and is under the direction of the Minister for the Colonies.

*Governor* -Marquis Giuseppe Salvago Raggi January 1907

For the financial year 1911-12 the revenue and expenditure of the Colony of Eritrea were estimated at Colonial revenue, 3,062,186 lire State contribution 6,350,000 lire, total revenue 9 412,186 lire expenditure, civil administration, 5 418,986 lire military 3,933,200 lire, total expenditure 9 412,186 lire

The tropical climate and the general scarcity of water during the summer months necessitate works for irrigation before crops can be raised with success. Pasture is abundant, but the pastoral population is essentially nomadic. Camels, oxen, sheep, goats are common and the produce, consisting of meat, hides, butter, supplies articles of local trade Pearl fishing is carried on at Massawah and the Dahlak archipelago to the annual value of from 250,000 lire for pearls and 800,000 lire for mother of pearl A very promising trade is being carried out in palm nuts The exportation of these nuts in 1910 over one million lire There are gold mines worked about 6 miles from Asmara, with hopeful results.

At Massawah the imports by land and sea, the exports and the tonnage entered were as follows —

		1908	1909	1910
Imports	Lire	9 133 816	17 225 720	16 872 686
Exports	"	3 821 329	11 841 025	7 277 861
Transit	"	2 800 005	3 122 380	3 873 321
Tonnage entered	Tons	156,850	171 156	163,532

There are 74 miles of railway from Massawah to Asmara (end of 1912), and now the line is being taken to Keren (58 miles) and Agordat

(75 km.) There are 16 post-offices. There is a telegraph line of 319 miles from Massawah to Asseb, and of 82 miles from Asseb to Perim. Other lines bring the length up to about 870 miles. There are 2 telephone lines. A powerful wireless telegraph station has been opened at Massawah. It communicates with the radiotelegraphic system of Italian Somaliland and also with Italy (Caltano). There is, thus through wireless communication between Italy and Italian Somaliland, via Massawah.

The legal currency consists of Italian coins and those of the Latin Union, but in actual circulation are still some Maria Theresa dollars. The Italian mint has issued coin amounting to 19,870 895 lire, under the denominations of Entreat dollars (= 5 lire), and  $\frac{1}{2}$ ,  $\frac{1}{4}$ ,  $\frac{1}{8}$  dollar pieces.

### Italian Somaliland

The Colony and Protectorates of Italian Somaliland have an area of 139 430 sq. miles and a population of about 100 000. They extend along the east coast of Africa from British Somaliland to the course of the Juba and comprise the Protectorates of Northern Somaliland viz. the Sultanate of the Mijertius Osman Mahamud, from Bender Ziade the most northerly point belonging to Italy on the Gulf of Aden to Cape Gabbel on the Indian Ocean (S. 13° N. lat.) the territory of the Nogal from Cape Gabbel to Cape Garul (6° 47' N. lat.), the Sultanate of Obbia (Jusuf Ali) from Cape Garul to the northern boundary of the colony of Benadir determined by a line which ends at the sea near the wells of Fah (about 4° 30' N. lat.) and the Colony formerly called Benadir but now officially known as the 'Somalia Italiana', which extends from 4° 30' N. lat. to the mouth of the Juba and comprises the towns of Merca, Itala, Warsheik, Mogadisho (pop. 10,000; Merca 7 000), Brava (5,000), and Jumbo all on the coast, and Bardera and Isigh inland on the Juba. The colony is administered by a civil governor who resides at Mogadisho. In the Protectorates the Governor is represented by a Civil Commissioner, who up to the present date has been the Italian Consul General at Aden. A royal decree of December 8 1910 provides for the minting of silver coins of 1 rupee  $\frac{1}{2}$  and  $\frac{1}{4}$  rupee for Italian Somaliland of the value of 15 rupees to 11 sterling. The principal occupation of the people is cattle rearing. But the Mijertius rear chiefly camels and sheep. Imports (1910-11) 4 239,058 lire, exports 1,690 652. Imports are yarn, timber, petroleum, rice, sugar, cottons, exports butter, timber, hides, drugs. Animal produce is exported to Zanzibar whence it is shipped to Europe or America. Military force, 70 officers and 8 500 men. The inland boundaries of Italian Somaliland and Benadir are determined under the treaty of May 18 1908, between Italy and Abyssinia, by a line (not yet demarcated) from Dolo on the Juba to the confluence of the Juba with the Daus, thence to the Webi Shebelle and finally to the Anglo-Abyssinian frontier fixed by protocol of May 14 and June 4, 1897.

*Governor*—Senator Nobile Giacomo de Martino (1910)

The budget of Italian Somaliland for the year 1911-12 is as follows: revenue proper of the colony, 622,000 lire, State contribution, 2,979,000 lire, total, 142,040; civil expenditure, 1,558,000 lire, military, 2,048,000 lire.

Seven wireless telegraph stations are working in the Colony connecting the principal coast and inland towns. A big wireless station has just been built at Mogadisho, which communicates with Italy, via Massawah.

There are in the Colony 3 principal post offices (Mogadisho, Merca and Jumbo) but postal business is carried out at every station.

**Concession of Tientsin**—The Italian concession of Tientsin, under the agreement with China of June 7, 1902, lies on the left bank of the Peiho and has an area of about 18 sq miles with a native population of about 17,000. It contains a village and salt pits.

## Tripoli and Cyrenaica

(LIBIA ITALIANA.)

Tripoli fell under Turkish domination in the sixteenth century and though, in 1714, the Arab population secured some measure of independence, the country was in 1835 proclaimed a Turkish vilayet. In September, 1911, a quarrel broke out between Turkey and Italy and the latter invaded Tripoli and established an army there. On November 5, 1911 a decree was issued annexing Tripoli, and on February 28, 1912, the Italian Chamber passed the Bill which ratified the decree of annexation. The war nevertheless, continued until October 18, 1912, when the Treaty of Onchy was signed, by which the Sovereignty of Italy in Tripoli was established. This has now been recognised by the Great Powers. Italy accepted a clause, identical with that contained in the Austro-Hungarian treaty regarding Bosnia-Herzegovina, dealing with the exercise of religious authority by the Caliph.

Tripoli will be administered under the Colonial Ministry.

The entire area of the territory is estimated at about 406,000 square miles. According to a census taken on August 3, 1911 there were 523,176 natives of whom 29,761 were in Tripoli town. The population is mostly Berber, but Jews are numerous. The civil European population numbers 5,000 or 6,000, mostly Maltese and Italians, practically there are no Turkish settlers. Arabic is generally spoken, but Italian is the official language. Until recently the province contained the headquarters (Jerboub) of the Mohammedan sect of the Senusiyyeh. The principal towns are on the coast, Tripoli, the capital of the vilayet, with 29,761 inhabitants, Benghazi with 35,000, Derna and Khoms, inland are the caravan halting places Ghadames, Murzuk, and Ghat.

Tripolitania has four zones, the first of which along the sea, is covered with palm, olive, lemon, and fruit trees. The second is formed by the highlands of Gebel and Tarhuna, the former has olive groves and palm and fig trees, while cereals and saffron are also grown. The country, however, is rather barren. The Tarhuna land is rich in esparto grass. The rest of the second zone, which includes the hills of Mesallata and Bondara, as well as numerous valleys, is most fertile, and olive trees are abundant. The third zone consists chiefly of oases and is rich in palms. The oases (of which Gadames is the most important) are some distance apart. The fourth zone is covered with palms, figs, vines, and almonds.

In Cyrenaica, olives and cypresses predominate. Pasturage is abundant and cattle could be bred on a vast scale. Bananas are grown at Derna. Barley is the chief food of the people.

Cultivation in Tripolitania does not amount to much, though cotton, tobacco, castor beans, saffron, indigo, and henna are grown. Seventeen thousand tons of esparto were exported from the region in 1911.

There is a considerable caravan trade between Benghazi and Wadai and between Tripoli and Central Sudan when the routes are free from raiders. An important article of trade is ostrich feathers which are brought overland from Central Africa, and exported to Paris and London from Tripoli to the value of 10,000*l.* annually, and 6,000*l.* from Benghazi. Turkish money has been withdrawn and a new monetary system is being introduced.

Imports in 1911 amounted to 480,000 (440,188 in 1910), and exports to 190,000 (183,703 in 1910). Sponge fishing was started in 1885. In the season ending September 30 1911, the value of sponges from the waters of Tripoli amounted to 220,000 francs.

There is a plan before the Italian Parliament providing for 3 sailings a week to and from Syracuse, weekly sailings between Palermo and Tripoli, and a line to and from Venice besides the regular services from Genoa.

In 1902, the tonnage cleared at Tripoli amounted to 270,000, in 1909, 353,929 in 1910, 385,796, and in 1911, 360,000.

The principal means of communication inland are the caravans which follow long frequented routes. Tripoli (town) is connected by telegraph cable with Malta, and by land lines with Murzik (Fezzan) and Gabes (Tunis).

There is a British Consul at Benghazi, and a Vice Consul at Khomis.

## Statistical and other Books of Reference concerning Italy

### 1 OFFICIAL PUBLICATIONS

The publications of the various Departments of Government: Agriculture, Industry and Commerce, Credit, Public Works, Treasury, Finance, War, Marine, Interior, Public Instruction, Justice, Foreign Affairs, Post and Telegraphs, Colonies.

The *Annuario Statistico Italiano* (Annual) issued by the General Statistical and Labour Department of the Ministry of Agriculture, Industry and Commerce gives statistical information abt Italy and its colonies.

Census publications are issued by the General Statistical Department of the Ministry of Agriculture, Industry and Commerce.

## JAPAN

(NIPPON)

## Reigning Sovereign

THE Japanese claim that their empire was founded by the first Emperor Jimmu Tennō, 660 B.C., and that the dynasty founded by him still reigns. It was revived in the year 1868 when the now ruling (*de jure*) sovereign overthrew, after a short war, the power of the Shōgun (the *de facto* sovereign), who had held the ruling power in successive families since the twelfth century and in 1871 the feudal system (*Hōken Seiji*) was entirely suppressed. The Emperor bears title of Tenno, but the appellation by which he is called in relation to external affairs is 'Kōtei,' a word of Chinese origin. Only foreigners make use of the poetical title 'Mikado.'

*Emperor of Japan* — *Yoshihito* (Harunomaru), born at Kyoto August 31, 1879, succeeded his father, Mutsuhito, July 30 1912 married May 10, 1900, to Princess Sadako born June 25, 1884, daughter of Prince Kuyō.

*Children of the Mikado* — I, Prince Hirohito born April 29 1901 (Crown Prince) II Prince Yasuhito born June 25, 1902 III, Prince Nobuhito, born January 8, 1905

*Sisters of the Mikado* — I, Princess Masako, born Sept. 30, 1888, married April 30 1908 to Prince Tsunehisa II, Princess Fusako, born Jan. 28, 1890 married April 29, 1909, to Prince Narihisa III, Princess Nobuko, born August 7 1891, married May 6 1910, to Prince Yasuhiko IV, Princess Toshiko, born May 11, 1896

By the Imperial House Law of February 11, 1889 the succession to the throne has been definitely fixed upon the male descendants. In case of failure of direct descendants, the throne devolves upon the nearest Prince and his descendants. The civil list is fixed at 4 500,000 yen.

## Constitution and Government

By the Constitution of February 11, 1889, the Emperor combines in himself the rights of sovereignty and exercises the whole of the executive powers with the advice and assistance of the Cabinet Ministers, who are responsible to him, and are appointed by himself. There is also a Privy Council, who are consulted by the Emperor on important matters of State. The Emperor can declare war, make peace, and conclude treaties. The Emperor exercises the legislative power with the consent of the Imperial Diet. It is his prerogative to give sanction to laws to convoke the Imperial Diet to open, close, and prorogue it, and to dissolve the House of Representatives. The Imperial Diet consists of two Houses, a House of Peers and a House of Representatives. Every law requires the consent of the Imperial Diet. Both Houses may respectively initiate projects of law and make representations to the Government as to laws or upon any other subject, and may present addresses to the Emperor.

The House of Peers (369 members) is composed of (1) male members of the Imperial family of full age, (2) princes and marquises of the age of 25 and upwards (15 princes and 38 marquises); (3) counts, viscounts, and barons of the age of 25 and upwards, and who have been elected by the members of their respective orders, never to exceed one fifth of each order (100

counts, 376 viscounts, 384 barons), (4) persons above the age of 30 years, who have been nominated members by the Emperor for meritorious services to the State or for erudition, (5) persons who shall have been elected in each Fu and Ken from among and by the 15 male inhabitants thereof above the age of 30 years, paying therein the highest amount of direct national taxes on land, industry, or trade, and have been nominated by the Emperor. The term of membership under (3) and (5) is seven years, under (1), (2) and (4) for life. The number of members under (4) and (5) must not exceed the number of other members.

The members of the House of Representatives number 379 a fixed number being returned from each electoral district. The proportion of the number of members to the population is one to about 136 522. Voting is by secret single ballot. Electors are (1) male Japanese subjects of not less than full 25 years of age, (2) permanent and actual residents in the electoral district for not less than a year, (3) and paying land tax to the amount of not less than 10 yen in a year for more than one year or direct taxes other than land tax to the amount of not less than 10 yen in a year for more than two years or of land tax together with other direct national taxes to the amount of not less than 10 yen in a year for more than two years. In general, male Japanese subjects of not less than 30 years of age are eligible to the House of Representatives, without any qualification arising from payment of taxes. Disqualified for membership are the Imperial Household officials, priests, students, teachers of elementary schools, government contractors, election officials. The President and Vice-President of the House of Peers are nominated by the Emperor from among the members, and President and Vice-President of the House of Representatives are nominated by the Emperor from among three candidates, elected by the House. The Presidents of both Houses receive an annual salary of 5,000 yen, Vice Presidents 3,000 yen elected and nominated members of the House of Peers and members of the House of Representatives, 2,000 yen besides travelling expenses. The Imperial Diet, which must meet annually, has control over the finances.

House of Representatives, May 1912 (Constitutional Party (Sayakwan) 217, Popular Party (Kokuminto) 96 (Central Party (Chuoto) 32 Independent (Mushozoku) 37

The Cabinet consists of the following members, (February 20 1913) -

*Prime Minister* — Admiral Gombei Yamamoto  
*Foreign Affairs* — Baron Nobuaki Makino  
*War* — Baron Kikuchi  
*Navy* — Baron Saito  
*Minister of Finance* — Baron Korekiyo Takahashi  
*Agriculture and Commerce* — Mr Tatsuo Yamamoto  
*Justice* — Mr Masahime Matsuda  
*Interior and Railways* — Mr Koi Hara  
*Education* — Mr Sajima Motoda  
*Communications* — Mr Gigen Okuda

The Agreement between the United Kingdom and Japan signed August 12, 1905 (renewed July 15 1911) has for its purpose the maintenance of peace in Eastern Asia and India the preservation of the independence and integrity of China and of the principle of equal opportunities for the commerce and industry of all nations in China and the maintenance of the territorial rights and defence of the special interests of Great Britain and Japan in Eastern Asia and India. It provides for frank inter-communication between the two Governments if their rights or interests are threatened, and for mutual assistance in case of unprovoked attack or aggressive action on the part of any other power. Great Britain recognizes the right of Japan to control and protect Korea, the principle of equal opportunities in Korea for the

## LOCAL GOVERNMENT—AREA AND POPULATION 1911

commerce and industry of all nations, and Japan recognises the right of Great Britain to take such measures in proximity to the Indian frontier as may seem necessary for the safeguarding of her Indian possessions. The Agreement is for ten years (second period 1911-1921), but it is only to terminate at the end of that period if denounced a year beforehand by one or the other of the signatory Powers. If the ten years shall have expired without denunciation of the Agreement, a year's notice by either Power is required for its termination but if, at the date fixed for its expiration, either Power is at war the alliance is to continue till the restoration of peace.

### Local Government

For local administration Japan (except Hokkaido or Yezo, Chosen formerly Korea or Chao pien, Karafuto or Japanese Sakhalin, and Taiwan or Formosa) is divided into prefectures ('Fu' and 'Ken'). The prefectures are subdivided into municipalities ('Shi') and counties ('Gun'), and the counties are again subdivided into towns ('Cho') and villages ('Son'). Okinawa Prefecture and some islands have, however, special organisations. Municipality, town, and village are the units of local government. These administrative divisions form at the same time local corporations of the same names. In each prefecture there are a governor ('chiji') a prefectural assembly ('Fu kwai' or 'Ken kwai'), and a prefectural council ('Fu Sanji kwai' or 'Ken sanjikai'), of which the governor is president. In each county a sheriff, a county assembly and a county council, of which the sheriff is the president. In each municipality a mayor, a municipal assembly, and a municipal council of which the mayor is the president, and in each town or village a chief magistrate and a town or village assembly. Prefectural, county, municipal, town and village assemblies give decision mainly upon financial matters. The prefectural and county councils give decision upon matters delegated by the prefectural and county assemblies respectively, and upon matters of pressing necessity when the respective assemblies are not in actual session.

The qualifications of the prefectural electors are (1) citizenship and residence in the prefecture, (2) payment of the direct national tax to the amount of not less than 3 yen for one year in the prefecture. Persons eligible for election must pay direct national tax to the amount of not less than 10 yen. Citizenship is shared by all male Japanese subjects not less than 25 years of age, who for two years (1) reside in the municipality, or town or village (2) share its burden and (3) pay land tax or not less than 2 yen direct national tax annually in it. The governor and sheriff are appointed by Government, the mayor is that one of three candidates elected by the municipal assembly who has obtained the Emperor's approval, and chief magistrate of town or village is one who has been elected by the town or village assembly and has obtained the governor's approval.

Hokkaido has a governor and a special organisation. Chosen has a Governor General. The peninsula is administered in 13 Do or provinces, these being subdivided into 929 Tund Yon or districts. Taiwan (Formosa) also has a governor general who is invested with very extensive powers. The island is divided into 20 local divisions ('hō'), each of which has a chief magistrate. Karafuto is divided into 5 local divisions ('hō').

### Area and Population

The Empire consists of the five principal islands of Honshu (mainland), Kishuu, Shikoku, Hokkaido (Yezo), and Taiwan (Formosa) besides the Chishima (Kuriles), Sado, Oki, Awaji, Iki, Fushima, Lunkiu, Ogasawarajima (Bonin), Hokotō (Pescadores) islands, the peninsula Chosen and the southern half of the island of Karafuto (Sakhalin). Total area about 175,540 square miles, of which the mainland occupies 87,426 square miles. Taiwan (Formosa) and Hōkoto (the Pescadores) were ceded by China in accordance with the treaty

of Shimoda in 1895, and Japanese Karafuto was ceded by Russia by the Treaty of Portsmouth, N H, in 1905. By the same Treaty of Peace the Russian Government ceded to Japan the lease of Port Arthur, Ta lien, and adjacent territory and waters, and also the railway between Chao Chun and Port Arthur, and the coal mines worked in connection therewith. The Sino-Japanese Treaty of December 22, 1905, provided for the interests of China and Japan with respect to Manchuria. By a treaty between Japan and Korea on Aug. 23, 1910, the Korean Territory was annexed to the Empire of Japan. Administratively there exists a division into 47 prefectures. There is also a division into 637 rural districts, 66 cities, 1,185 towns, and 11,142 villages (1910).

Number of Japanese proper (i.e. excluding natives of Formosa and the Pescadores) residing in Japan or abroad —

Year	Population (Dec. 31)	Annual Increase per cent.	Year	Population (Dec. 31)	Annual Increase per cent.
1909	50,295,279	1.17	1911	51,591,842	1.28
1910	50,489,197	1.16	1912	52,200,679	1.27

Number of Japanese at home and abroad (1908), was as follows —

	sq. m.	Population	Pop. per sq. m.		sq. m.	Population	Pop. per sq. m.
Central Honshu	36,600	10,014,411	519	Shikoku	7,081	3,288,310	468
Northern	30,304	7,490,443	248	Kyushu	16,840	7,125,984	460
Western	20,681	10,029,374	525	Hokkaido	96,299	1,137,407	91
Total Honshu	87,485	27,514,261	428	Grand tot.	147,655	49,088,198	330

There were 26,380,220 males and 25,820,465 females in 1912.

On December 31, 1908, the population was divided as follows — Imperial family, 87 kwazoku, or nobles, 5,642, shizoku, or knights, 2,218,628, common people, 47,382,262 (including Ainus in Hokkaido, 18,017). In 1910 21,889 Japanese emigrated and of these 2,476 went to China, 8,771 to Russia, 1,028 to Australia, 1,921 to Hawaii. In 1910, 8,022 Japanese migrated to the U.S., and in 1911, 4,520. On December 31, 1910, the number of foreigners in Japan (exclusive of Formosa) was 15,154, of whom 8,462 were Chinese, 2,471 English, 1,665 American, 809 German, 547 French, 216 Portuguese, 64 Dutch, 137 Russian, 116 Swiss.

Births, deaths, and marriages of Japanese at home and abroad —

Year	Marriages	Births	Deaths	Excess of Births
1905	351,260	1,599,131	1,044,855	554,276
1906	353,274	1,809,203	961,550	487,653
1907	433,527	1,621,973	1,024,236	597,687
1908	461,940	1,672,627	1,038,110	634,517
1909	458,771	1,705,877	1,099,797	606,080

In 1909 the still births (not included in the above) numbered 161,596 or 8.9 per cent., and the illegitimate, 147,558 (or 9.2 per cent.)

The following is a list of large towns and cities in 1908 —

Tokyo	2,186,079	Kumamoto	61,238	Wakamatsu	39,265
Osaka	1,226,590	Sakai	61,103	Nagano	39,242
Kyoto	442,462	Shimonoseki <sup>1</sup>	58,264	Mito	38,485

Sapporo	70,084	Tsu	41,229	Kokura	31,615
Tokushima	65,561	Himeji	41,028	Yokkaichi	40,704
Kagoshima	63,640	Takasaki	39,961	Onomichi	0,67
Niigata	61,616				

<sup>1</sup> Shimonoseki was formerly called Akamagasaki.

### Religion (excluding Formosa)

There is absolute religious freedom. The chief forms of religion are—(1) Shintoism, with 12 sects, (2) Buddhism, with 12 sects and 33 creeds. There is no State religion, and no State support. In 1909—Shinto priests, 76,149 students, 154 Buddhist temples, 71,880, bonzu, 121,553, students 9,788. There were, besides, 1,966 licensed preachers and 1,219 churches and preaching stations of the Roman Catholic, Greek Catholic, and Protestant churches. Since 1891 the Roman Catholics have had an episcopate of one archbishop and three suffragan bishops. There are shrines dedicated to the eminent ancestors of the Imperial House, and to meritorious subjects, these are independent of any religious sect and some of them are supported by State or local authorities. In 1909 the shrines numbered 147,441, and the ritualists, 14,821.

### Instruction

Elementary education is compulsory. The number of children of school age (6-14) on March 31, 1910 was 6,479,004. The following are the educational statistics for 1910 —

Institutions	Number	Teaching Staff	Students and Pupils
Elementary schools	26,115	144,674	6,479,004
Middle	368	5,344	117,481
High girls	177	2,722	51,440
Normal	78	1,406	28,492
Special & technical schools	5,682	7,619	305,638
Various	8,198	9,558	206,189
Universities	8	940	7,206

The four Universities are Tokyo Imperial University, Kyoto Imperial University, Tohoku Imperial University, and Keio Imperial University. The first consists of a University Hall, Colleges of Law, Medicine, Literature, Science, Engineering, and Agriculture, the second, of a University Hall, Colleges of Law, Medicine, Literature, and Science and Engineering, the third, of Colleges of Agriculture and Science, the fourth of a College of Engineering. They are supported by Government. At Tokyo University in 1910-11 there were 363 professors and teachers (inclusive of 15 foreigners), and 5,098 students. At Kyoto University there were 191 professors and teachers (inclusive of 5 foreigners), and 1,375 students. At Tohoku University there are 86 professors and teachers (inclusive of 2 foreigners) and 793 students. The bulk of other schools are also supported by Government as well as by local rates.

In 1910 there were 281 libraries in Japan with 2,271,935 volumes. In 1910, 84,123 books of various kinds, and 2,768 periodicals, monthly, weekly, daily, were published.

In Formosa, there is a special educational system.

### Justice and Crime

A system of justice founded on modern jurisprudence has been established. Judges are irremovable, except by way of criminal or disciplinary punishment. There are four classes of courts in Japan (exclusive of Formosa), namely sub-district courts, district courts, courts of appeal and court of cassation. In the court of cassation seven judges preside; in the courts of appeal, five judges; in the district courts, three judges; in each case one of them being the chief judge. In the sub-district courts, a single judge presides. A court which deals with disputes respecting administrative affairs is under the direct supervision of the Emperor.

A few judges of high rank are directly appointed by the Emperor, and some are appointed by him on nomination by the Minister of Justice. The following are the criminal statistics for five years —

	1905	1906	1907	1908	1909
Serious crimes	8,211	8,300	8,082	— 1	— 1
Lesser	64,302	67,443	66,010	—	—
Total	72,513	75,743	74,092	70,496	67,464

In 1909 there were 56 prisons, 97 detached prisons and houses of correction. Number of prisoners of all kinds, convicted and accused, and those in houses of correction at the close of 1909 — Men, 53,471, women 3,110, total, 56,581.

For the trial of cases connected with the military and naval services there are courts martial.

### Pauperism

In 1899 new legislation settled that the minimum amount of prefectural funds for the relief of sufferers from extreme calamity shall be 500,000 yen, that funds below that limit are to be made up by the Treasury, and that when the amount of relief exceeds 5 per cent. of the funds at the beginning of the fiscal year, one third of the amount thus granted is to be supplied from the Treasury.

<sup>1</sup> The distinction between serious and lesser crimes was not made in the revised code of October 1, 1906.

The relief statistics for 1909-10 show expenditure as follows (in yen, exclusive of Formosa) Shelter 1,348 food, 38,747 clothing, 2,072, medicine, 153 provisional dwellings, 25,381 expenditure for providing work 14,028, miscellaneous, 522, total, 82,229 Total 1908-9, 435,598 yen

In 1909 the Central Government relieved 3,753 persons to the amount of 62,979 yen (excluding Formosa) At the end of 1909, 1,736 foundlings (excluding Formosa) were being maintained, and the expense in that year was 53,446 yen There are, besides, several workhouses established by local corporations and private persons

## Finance

## I. IMPERIAL.

Revenue and expenditure (excluding Formosa) (the yen = about 24½¢) —

	1909-10	1910-11	1911-12	1912-13	1913-14 <sup>1</sup>
	Yen	Yen	Yen	Yen	Yen

Various receipts	26,878,964		
Total ordinary	402,597,194	Total ordinary	412,073,863
Extraordinary Revenue	78,379,094	Extraordinary expenditure	163,906,132
Total Revenue	575,976,288 (575,976,288)	Total expenditure	575,979,995 (575,979,995)

Public debt, March 31, 1912 — Internal loans (4 to 7 per cent), 1,116,225,770 yen, foreign loans (4 to 5 per cent) 1,437,449,203 yen, total, 2,553,704,973 yen.

## II LOCAL

The revenue of the Departments for the year 1912-1913 was 82,854,168 yen, and expenditure 82,814,784 yen. Of the revenue 64,190,931 yen was from rates. The revenue of the cities in 1911-12 was 84,488,057 yen (20,504,651 yen from rates), and the expenditure was 71,708,681 yen. The revenue of the towns and villages in 1911-12 was 107,381,696 yen (79,058,474 yen from rates) and the expenditure was 107,488,465 yen. The total local debt at the end of 1911 was 184,656,785 yen.

## Defence

## I ARMY

Service in the army (or navy) is universal and compulsory. Liability commences at the age of 17 and extends to the age of 40 but actual service begins at 20. All those physically capable of bearing arms are divided into two classes: the 'fit', and the 'absolutely fit'. The numbers necessary for the first line (or active army) called *Senchi*, are taken solely from the 'absolutely fit'. Service in the ranks is for 2 years in the infantry, 3 in all other arms, then for 5 (or 4) years and 4 months in the reserve (*Yobi*). One year volunteers are admitted. Reservists are called out twice for training during their reserve service, for 60 days on each occasion. Having completed 7 years and 4 months in the first line, including its reserve, the men are transferred to the second line called *Ko*. Service in the *Ko* is for 10 years, with two trainings of 60 days each in the whole period. At the end of their *Ko* service the men are in the 38th year of their age, and they are passed into the *Kokumin*, which is the territorial or home defence army. In this they serve for 2 years and 8 months, to complete their total service of 20 years.

The reserve for making good the waste of war, or *supplementary reserve* is called *Hoju*. It is composed of the balance of the 'absolutely fit' recruits not required for the first line, and of as many of those classed as 'fit' as may be required to make up a certain fixed number. They all serve in the *Hoju* for 7 years and 4 months, during which they have a first training of 90 days, and two subsequent trainings of 60 days each. After completion of this period of their service they are passed to the *Ko*, in which they serve for ten years, like the men who have passed through the first line. Like them also they are finally passed to the *Kokumin* for 2 years and 8 months to complete their army service.

The *Kokumin* is divided into two 'bans'. The first *ban* comprises all the men who have passed, as shown above, through the first line and landwehr, or through the supplementary reserve and landwehr, and who therefore have only 2 years and 8 months to spend in the *Kokumin*. The second *ban* is the levy *en masse* of all those capable of bearing arms. It includes (1) those who though 'fit' are not required for the *Hoju*, (2) those who for various reasons have been exempted from military service, and (3) the young men between 17 and 20 years of age who have not been called up. None of these classes receive any military training, but they can be drawn on in case of national emergency.

The partially trained men who have been passed into the *Ko* from the *Hoju* are not included in the fighting units of the Second Line. They supply the large number of men required for the transport service on mobilisation, and for the expansion of other departmental corps.

The field army of Japan consists of 19 divisions, including the guard,

2 independent cavalry brigades, 3 independent brigades of field artillery (each of 12 batteries of 6 guns), 3 independent divisions of mountain guns, and 4 or more regiments of heavy field artillery, each of 24 guns.

Two infantry regiments form a brigade, and two brigades (12 battalions) a division. But to each division on mobilisation is attached a Kobi brigade making 3 brigades, or 18 battalions in all. The artillery consists of a regiment of field artillery (6 batteries of 6 guns) supplemented by heavy or mountain guns as required (also probably by 4 batteries of Kobi artillery). A regiment of cavalry of 3 squadrons, with 4 machine guns, and a battalion of engineers, complete the division. Four infantry, and 4 artillery, ammunition columns, 6 field hospitals, 4 supply columns, and 1 remount depot, accompany each division in the field. The war strength of a division, excluding its Kobi brigade, is reckoned at 18,700 officers and men, 4,800 horses, 36 guns and 1,674 vehicles.

The strength of an independent brigade of cavalry is 2 regiments, each of 4 squadrons and a battery of 8 machine guns, total about 1,650 men and 1,630 horses. The strength of an independent artillery brigade of 12 batteries is about 2,500 men and 1,000 horses. Divisions are grouped directly into armies, 3 to 5 divisions forming an army of from 80,000 to 130,000 men. The total strength of the field army at the present time may be taken at about 600,000 combatants including Kobi troops detailed for the lines of communication. The war effectives of the new divisions will not be complete before 1916.

The active army consists at present of 80 regiments (240 battalions) of infantry, 27 regiments of cavalry (89 squadrons), 150 field batteries, 9 mountain batteries, 28 battalions of garrison artillery, and 19 battalions of engineers each of 3 companies.

The Kobi comprises 228 battalions, 57 squadrons, 114 field batteries, 12 battalions of garrison artillery, and 19 battalions of engineers.

The Japanese Islands are divided into military districts corresponding to the divisions of the army, and the district is the unit of administration as well as of territorial command. Each division is supplied with recruits from its own district except the Guards whose infantry recruits are selected from the whole country, the other arms of the Guard division are recruited from the large district of the 1st division. Abroad there are the separate division of Formosa, and the small garrisons of Saghalien and Tsushima, also some 25,000 to 30,000 men in Korea and Manchuria.

The Emperor is the head and supreme commander of the army, and also of the navy. He nominates the War Minister (always a general officer of high rank), the Chief of the General Staff, the Director of Military Schools and the Members of the Military Council.

The arm of the Japanese infantry is the improved Arisaka rifle, calibre, 6.5 mm (256"), a Mauser with an altered chamber. The cavalry are armed with a carbine of similar construction. The field gun is a q.f. shielded Krupp of 7.5 cm calibre which fires a shrapnel of 14 lb. The mountain artillery has a gun of the same calibre firing a lighter shell. There are a certain number of field howitzer batteries armed with 4.6 and 5.9" howitzers, firing shells of about 44 lb and 80 lb respectively. A 4" gun for heavy field batteries is being introduced.

No returns of the peace strength of the Japanese army are published, but the total apparently amounts to about 225,000 or 230,000 of all ranks.

The military budget for 1912-13 amounts to about 9,660,000, including extraordinary expenditure.

## II NAVY

The coast of Japan is divided into five maritime districts having their headquarters at Yokosuka, Kure, Sasubo, Maizuru, and Chinkai (the last not established yet).

The personnel of the navy in 1910 included 1 Admiral of the Fleet, 7 Admirals, 19 Vice Admirals, 39 Rear Admirals, 104 Captains, 192 Commanders, 276 Lt. Commanders, 627 Lieutenants, 453 Sub Lieutenants 1st class, 277 Sub Lieutenants 2nd class, 236 Midshipmen, 697 Engineers, 348 Medical Officers, 324 Pay Officers, 74 Constructors, 41 Ordnance Officers, 11 Hydrographic Engineers, 1,533 Warrant Officers, and 43,790 men on the active service.

Japan now builds and equips her own warships. Armour factories are installed at Kure. The *Kongo* is building at Barrow, England.

A statement of the Japanese fleet similar to that given for other navies is —

	Completed at end of		
	1913	1918	1914
Dreadnoughts	1	—	3
Pre Dreadnoughts	14	14	5
Armoured Cruisers	13	19	1
Protected Cruisers	17	20	9
Torpedo Gunboats, Scouts, etc.	6	—	—
Destroyers	61	7	7
Torpedo Boats	50	7	7
Submarines	12	9	7

*Note*—The Pre Dreadnoughts include several captured Russian ships.

The following table includes all the battleships built and building, armoured cruisers and principal protected cruisers. Ships in italics will not be completed at the end of present year.

Laid down	Name	Displacement	Armour		Main Armament	Torpedo Tubes	Indicated Horse power	Designed Speed

Tea (kwan)	7 867 936	7 407 174	7 834 180	8 151 418	8 461 708
Sugar (kwan)	160 444 042	167 748 974	160 973 502	219 970 982	—
Silk cocoons (koku)	3 456 907	8 580 171	8 629 507	8 900 982	4 922 187
raw (kwan)	8 286 602	8 612 965	8 776 712	8 147 810	—

1 chō = 2 4507 acres      2 koku = 4.06 bushels      1 kwan = 8.28 pounds avoirdupois

\* Sugar cane

In 1910 the number of cattle was 1,384,183, of horses, 1,564,648; sheep, 3,867, goats, 91,780, swine, 270,101

The mineral and metal products in two years were —

Minerals &c	1909	1910	Minerals &c	1909	1910
Gold (momme )	1,048 569	1 164 774	Antimony (kin )	298 409	218 105
Silver	34 111 197	87 768 449	Manganese	14 74 502	9 161 081
Copper (kin <sup>2</sup> )	76 402 144	1 701 405	Coal (tons)	1 045 113	15 661 3 4
Lead	5 714 000	1 512 073	Sulphur (kin <sup>2</sup> )	11 490 225	18 078 66
Iron (kwan <sup>3</sup> )	12 638 800	15 120 501	Petroleum (koku <sup>4</sup> )	1 6 7 036	1 608 011
Pyrites	5 730 633	91 241 120			

<sup>1</sup> 190 momme = 1 lb avoirdupois

<sup>3</sup> 1 kwan = 8 23 lbs

<sup>2</sup> kin = 1 323 lb av

<sup>4</sup> koku = 37 7 gal

In the province of Echigo the petroleum industry is being developed. At Wakamatsu there is a large Government foundry turning out pig iron, Siemens steel, and rails and plates. At Nagasaki are important shipbuilding works with the newest machinery under the supervision of skilled European workmen.

In 1910 there were 92 cotton mills employing 17,744 men and 74,475 women, with 1 896 601 spindles and an output of yarn of 58 396,939 kwan. In the same year 35,268 men and 728 041 women with 68 593 machine looms and 683 696 hand looms turned out woven piece goods valued at silk, 108,610,043 yen, mixed silk and cotton, 24,529,852 yen, cotton 121,530,690 yen, hemp, 3,642 020 yen, besides sashes and other articles. Other manufactures in 1910 were Japanese paper worth 19 781 920 yen, European paper, 16,405 637 yen, matches, 12,610,503 yen, earthenware, 13 289 935 yen, lacquered ware 7,865 780 yen, matting 10 099,352 yen, leather, 7,624 717 yen, oil, 11,123,214 yen.

In 1910 the raw marine products amounted to the value of 78,286,336 yen, the manufactured products to the value of 43,736 518 yen.

### Commerce

	1908 <sup>1</sup>	1909	1910	1911	1912

The imports of bullion and specie (gold and silver) in 1911 amounted to 5 168,268 yen, and exports to 24 398,288 yen. In 1912, imports, 11,644,351 yen, exports, 28 325,153 yen.

## SHIPPING AND NAVIGATION—COMMUNICATIONS 1023

The staple articles of import from Japan into Great Britain (Board of Trade returns) in the year 1911 were silk manufactures, 208,841<sup>1</sup>, straw plaiting, 323 116<sup>1</sup>, rice, 44 943<sup>1</sup>, drugs, 41,911<sup>1</sup>, curios, 62 602<sup>1</sup>. The staple articles of British export to Japan consist of cotton goods, of the value of 1 884,181<sup>1</sup>, cotton yarn 55,930<sup>1</sup>, woollen goods, 947 297<sup>1</sup>, iron, wrought and unwrought, 2,279,432<sup>1</sup>, machinery, 1,880 699<sup>1</sup>, chemicals, 412,573<sup>1</sup>, arms and ammunition, 904,065<sup>1</sup>.

Total trade between Japan and U. K. for 5 years in thousands of pounds sterling —

	1908	1909	1910	1911	1912
Imports from Japan to U. K.	240	3,700	4 821	3 851	8 540
Exports to Japan from U. K.	1 894	8 8 8	10 1 1	11 861	12 17

### Shipping and Navigation

	Entered (1911)		Cleared (1910)	
	No	Tonnage	No	Tonnage
Japanese steamships	5 17	19 8 699	407	9 3 5 801
sailing ships and junks	427	54 651	1 761	84 094
Foreign steamships	4 401	19 4 728	34 2	10 7 1 085
sailing ships	6	499	1	11
Total	3 001	20 0 2 607	11 1 5	20 127 01

Of the total foreign ships entered in 1911 1,934 vessels of 1 12 446 tons were British 384 of 1 437 871 tons (German 389 of 666 096 tons Russian 181 of 279 037 tons Norwegian 179 of 1,409 917 tons American 113 of 338 328 tons French

In 1911 the merchant navy (without Formosa) consisted of 1,854 steamers above 20 tons of 1 375 053 tons net 5 586 sailing vessels above 20 tons of 447 307 tons net and 20 635 native craft. The Japanese Government subsidises shipping companies for foreign trade and now Japanese vessels run on four great routes to Europe, America, Australia and Bombay. There are also lines plying between Japanese ports and Korea, Northern China, and nine ports on the Yangtze Kiang.

### Internal Communications

#### RAILWAYS

The following table gives the railway statistics (including, except for revenue and expenditure Formosa) for 1910-11 —

	State Railways, 1910-1911	Railways owned by Private Companies 1910-1911	Total
Length in miles	5 781	511	6,292
Gross income yen	96 881 54	44 817	141 305 169

### Money, Weights, and Measures

The present monetary law came into force from October, 1897 by which gold standard was adopted. The unit of value is 0.75 gramme of pure gold, and is called the yen =  $2s\ 0\frac{1}{2}d$ , which, however, is not coined. The pieces coined are as follows — Gold coins (20, 10, and 5 yen pieces), silver coins (50, 20, and 10 sen pieces), nickel coin (5 sen piece) and bronze coins (1 sen and 5 rin pieces). The sen is the hundredth part of a yen, and the rin is the tenth part of a sen. The gold coins are 900 fine, and the silver coins 800 fine. The gold coins formerly issued (20, 10, 5, 2, and 1 yen pieces) are used at double their face value. The one yen silver coin formerly issued is withdrawn. The old silver 5 sen piece and copper 2, 1  $\frac{1}{2}$  sen pieces, &c., are used as formerly.

The <i>Ken</i>	= 160 <i>monme</i>	= 1 323 lb avoirdupois
„ <i>Kwan</i>	= 1 000 „	= 8 267 lbs „
„ <i>Sen</i>		= 1 193 inch
„ <i>Shaku</i> (10 <i>sun</i> )		= 11 930 inches
„ <i>Ken</i>	= 6 <i>shoku</i>	= 5 965 feet
„ <i>Chō</i>	= 60 <i>ken</i>	= $\frac{1}{8}$ mile 5 4229 chains
„ <i>Ri</i>	= 36 <i>chō</i>	= 2 44 miles
„ <i>Ryō</i>		= 5 9552 sq miles
„ <i>Chō</i> , land measure		= 2 45 acres
„ <i>Koku</i> , liquid		= 39 7033 gallons
„ „ dry		= 4 9629 bushels
„ <i>To</i> , liquid		= 3 9703 gallons
„ „ dry		= 1 9851 per k

Besides the system of weights and measures based on the metric system is acknowledged as legal in the following ratios

metre	= 3 3 <i>shaku</i>
gram	= 0.26667 <i>monme</i> ( $\frac{1}{3}$ <i>monme</i> )

### Diplomatic Representatives

#### 1 OF JAPAN IN GREAT BRITAIN

*ambassador* — Katsunosuki Inouye

*Councillor* — Choro Koike

*Second Secretary* — Isaburo Yoshida and Kenchi Yamazaki

*Third Secretary* — Koki Hirota

*Attaché* — Setsura Sawada

*Military Attaché* — Colonel Saburo Inagaki

*Naval Attaché* — Captain Abo, I J N

*Chancery* — Saizo Masheko and Kuimaku Kishi

*Consul General in London* — Takahashi Nakamura

There are Consuls at Glasgow, Liverpool, and Middlesbrough

#### 2 OF GREAT BRITAIN IN JAPAN

*Ambassador and Consul General* — Sir William Conyngham Greene, K C B, appointed October, 1912

*Councillor* — H. M. Rumbold, M V O

*Secretaries* — D. Crackanthorpe, N. Henderson and Edmund St J Monson

*Naval Attaché* — Captain Sir D. Brownrigg, Bart., R.N.

*Military Attaché* — Lieut. Col. John A. C. Somerville.

*Japanese Secretary* — F. M. Hobart Hamjulen.

*Commercial Attaché* — E. T. F. Crowe, C.M.G.

There are Consular Representatives at Dairen (Dalny), Hakodate, Kobe, Nagasaki, Shimonoseki, and Yokohama, and at Tainan and Tamsui in the Island of Formosa.

## KOREA

(CH'AO HSIEY, OR CHŌSEN, OR DAI HAN.)

**Government.**—The ex-Emperor, whose surname is Yi and name Chok, was born March 25, 1874, and succeeded his father Yi Hwang on his abdication, July 20, 1907. He is reckoned as the thirty-first in succession since the founding of the dynasty in 1392, but four of these so-called kings were Crown Princes who never ascended the throne.

By the treaty of Shimonoseki, May, 1895, China renounced her claim on Korea, and under Japanese influence many reforms were introduced. On February 23, 1904, an agreement was signed at Seoul on behalf of Japan and Korea, the Japanese Government undertaking to ensure the safety of the Korean Imperial House and guaranteeing the independence and territorial integrity of the country, while the Korean Government placing full confidence in the Japanese Government, agreed to adopt Japanese advice with respect to administrative improvements.

Under the Russo-Japanese treaty of peace of September 5, 1905, Russia acknowledged Japan's paramount interests in Korea and engaged not to obstruct nor interfere with the measures of guidance, protection and control which Japan may take in Korea. The Anglo-Japanese agreement of August 12, 1905, contains similar recognition on the part of Great Britain. On November 17, 1905, there was signed between Korea and Japan an agreement placing in the hands of the Japanese Government the control and direction of the foreign relations of Korea. By this agreement it was provided, *inter alia*, that a Japanese Resident General should be stationed in Seoul, and the first Resident General (Marquis Ito) took up his appointment on March 2, 1906. On July 31, 1907, a further agreement was concluded with Japan, by the terms of which all administrative measures and all high official appointments were made subject to the approval of the Resident General, and Japanese subjects were made eligible for official positions in Korea. A new Convention was concluded on July 12, 1909, whereby the Government of Korea delegated to the Government of Japan the administration of justice and prisons in Korea. By a further treaty concluded between Japan and Korea on August 23, 1910, the Korean territory was formally annexed to the Empire of Japan. The Emperor was deprived of all political power, and was accorded the title of Prince Yi, and his father (the former ex-Emperor) that of Prince Yi, Senior. The title of the country was changed to "Chosen" and the office of Japanese Governor General established. Henceforth Korea became an integral part of the Japanese Empire. Members of the Korean Imperial House and the late Korean Cabinet have had Japanese patents of nobility conferred upon them.

*First Governor General* — His Excellency General Count Terauchi.

The Japanese Residents at the treaty ports have been replaced by Prefects through whom official matters concerning foreign subjects are transacted.

**Area and Population**—Estimated area, about 86,000 square miles, population in 1912 was 13,411,299 (7,128,777 males and 6,282,522 females). The capital, Seoul, has 278,958 inhabitants. Ping Yang, about 146,000. The foreign population (excluding Japanese troops) is about 110,000, consisting (1912) of about 210,689 Japanese, 11,837 Chinese, 568 Americans, 183 British, 100 French and 49 Germans. In 1903 over 1,000 Koreans left for Hawaii, and in 1905 some 500 Korean emigrants sailed for Mexico. The language of the people is intermediate between Mongolo-Tartar and Japanese with a large admixture of Chinese words, and an alphabetical system of writing is used. Official correspondence, except with Korean provincial officials, is conducted in Japanese. The written language of the people is a mixture of Chinese characters and native script.

**Religion and Instruction**—The worship of ancestors is observed with as much punctiliousness as in China, but, otherwise, religion holds a low place in the land. In the country there are numerous Buddhist monasteries which, however, are looked upon with scant respect. The knowledge of Chinese classics and of Confucian doctrine, formerly essential to the education of the upper classes, is giving way under Japanese influence to a more practical system of instruction. There is a large number of Christian converts. In 1890 an English Church mission was established with a bishop and 20 other members. A hospital in Chemulpo is attached to the mission with an English doctor and trained nurses. The American missionaries have two hospitals in Seoul, where the Japanese have also established a large Government hospital. The total number of hospitals in the country is about 100 while the Red Cross Society has a numerous membership among both Japanese and Koreans. There are over 200 Protestant missionaries (British and American), and 60 Roman Catholic, also a Russian (Greek church) mission in Seoul. The mission schools have however been made subject to strict supervision and control.

In Seoul there is a Government school for English with 1 English teacher and 100 pupils. There are, besides, numerous Christian Mission schools for boys and girls throughout the country. All these schools are subject to the control of the Education Department. Technical and industrial schools are rapidly springing up. A model farm and agricultural school has been established within fifty miles of the capital.

In Seoul there are two daily Korean newspapers and several Japanese besides others published at Chemulpo. There is a Government owned daily newspaper in English, published at Seoul. The press is entirely in the hands of the Japanese, and a strict censorship is exercised.

**Finance**—The finances of Korea form a special account in the Budget of Japan. The estimated revenue for 1912-13 was ordinary, 26,323,332 yen (2,728,9261), and extraordinary, 26,159,877 yen (2,624,5501), making a total of 52,483,209 yen (5,353,4761). The estimated expenditure was ordinary, 80,232,490 yen (8,040,2961), and extraordinary, 22,659,719 yen (2,313,1801), a total of 102,892,209 yen (10,353,4761). The main sources of revenue are taxes and Public Undertakings. The extraordinary revenue consists of (1) a sum of 12,596,540 yen to be raised by a loan from the Bank of Chosen and (2) 12,350,000 yen, which is really a contribution by the Home Government to make good the deficiency.

**Production**—Korea is entirely an agricultural country, the cultivated area is about 5,600,000 acres, but the methods of cultivation are of a backward and primitive type, and the means of communication few and difficult, though improvement is fast being made in this respect. The chief crops are rice, wheat, beans and grain of all kinds, besides tobacco and cotton. The area under cotton in 1911 was 125 000 acres, and the output for that year estimated at 33 940,000 lbs. Rice, beans, cow hides, and ginseng are exported in large quantities. Whale fishing is carried on on the coast. Live stock is raised as a by-product of agriculture. The cattle are well known for their size and quality.

Gold mining is carried on and promises to be successful. There are four foreign owned gold mines in active operation and others in process of development. Copper, iron, and coal are abundant in Korea, but the development of these resources is impeded by defective means of communication. An anthracite coal mine in the north of Korea is in operation, and considerable extension of the workings are in contemplation. Graphite and mica also are found in considerable quantities.

**Commerce**—As the result of annexation, the Treaties of Korea with foreign countries virtually ceased to exist, though as a matter of fact, neither the German nor the American governments have as yet unreservedly admitted the cessation of consular jurisdiction over their subjects in Korea. The tariff imposed by these treaties is maintained for a period of 10 years from the date of annexation.

The open ports are Chemulpo, Pusan, Wonsan, Chinnampo, Mokpo, Kunsan, Songchiu, Ping Yang (inland city), Wiju, Yong Am Po (1908), Chungjin and Shm wiju. By a Residency General Ordinance published August 29, 1910, Masampo was declared a closed port from January 1 1911, while Shin Wiju (on Yalu River) was opened to trade.

Trade (merchandise only) at the open ports —

	1908	1909	1910	1911	1912
	Yen	Yen	Yen	Yen	Yen
Imports	41,025,523	36,645,770	39,782,756	54,087,682	66,846,980
Exports (excluding gold)	14,113,310	16,248,888	19,913,848	18,556,955	20,901,670

The imports in 1911 included cotton goods, 1,816,984 yen; cotton yarn, 4,123,827 yen; machinery, 1,245,533 yen; silk goods, 983,483 yen; tobacco and cigarettes, 894,942 yen; timber, 1,346,971 yen; kerosene oil, 1,436,133 yen; grass cloth, 1,402,740 yen; sugar, 1,207,903 yen; paper, 995,292 yen; coal, 1,448,809 yen. The principal exports were rice, 5,283,772 yen; beans, 4,630,078 yen; cowhides, 1,068,851 yen; cattle, 703,561 yen. Gold was exported to the value of 11,044,296 yen. Of the imports in 1911 the value of 34,058,474 yen was from Japan; of the exports the value of 13,840,551 yen was to Japan. From China the imports amounted to 5,442,443 yen, to China the exports amounted to 3,009,012 yen. From Great Britain and the United States respectively the imports amounted to 7,928,505 yen and 4,260,903 yen.

**Shipping and Communication.**—The foreign going shipping entered at the open ports numbered in 1911, 6,012 with a tonnage of 8,531,498. Of the vessels, 5,897 with a tonnage of 8,435,977 were Japanese, 28 of 85,608 tons British, and 3 of 1,704 tons German.

Transport in the interior is by porters, pack horses and oxen, and by river. Improvements in road making are being effected. There are about 1 400 miles of road. There is a railway from Seoul to Pusan (275 miles). The Seoul Chemulpo railway (24 miles) is a branch of the line. Another branch running from near Pusan to Masampo is open, and a third branch will run from Taiden to Mokpo. The Seoul Wiju line is 310 miles in length. The construction of a railway from Seoul to Gensan (or Wousan, a port on the East Coast) has been commenced and about 50 miles is already open to traffic. It is expected that the line will be finished by 1914. The Yalu Bridge was completed in the autumn of 1911. The Korean system is now connected with the Siberian and Chinese lines a through express train of the latest type running thrice weekly from Pusan to Chang chon via Seoul, Ping Yang, Antung, and Mukden. From Chang chon a Russian train connects at Harbin with the Trans Siberian express. All these railways belong to the Japanese Government. Total length of line, 767 miles (1911-1912).

A street electric railway in Seoul has been extended in three directions to points three miles outside the city. Number of post offices (1912) 485. There are 1 414 miles of telegraph line open, and the lines connect with the Japanese and the Chinese systems. The telephone has been introduced at Seoul, Chemulpo, and several other towns.

**Money**—Regulations for banking were framed in 1906 and in 1908 there were in Korea 8 ordinary banks organised by Koreans and 4 organised by Japanese. At the same time there were 9 agricultural and industrial banks fostered by Government subsidies.

A central bank, the Bank of Korea, was established in August 1909 and in November it took the place of the First Bank of Japan (Dai ichi Ginko) as the Government Treasury. Notes of this bank are gradually replacing those of the First Bank of Japan now current in the country.

The coinage consists of gold pieces of 10 and 20 yen, silver of 10, 20, and 50 sen, nickel of 1 sen, and bronze of 1 sen and 5 rin. There are also in circulation notes of the Dai ichi Ginko (First Bank) of 1, 5 and 10 yen. The old nickel coin has been practically wholly withdrawn from circulation, and the cash currency is now used only for petty transactions. Under certain regulations bills of exchange and cheques may pass into the currency. In the more important commercial towns there are authorised 'note associations' of merchants for the transaction of business relating to bills.

## FORMOSA (TAIWAN)

The Island of Formosa or Taiwan, was ceded to Japan by China by the treaty which was ratified on May 8 1895 and Japan took formal possession on June 2 of the same year. Japanese civil government in the island began on March 31 1896.

The Island has an area of 13,458 square miles, with a population (1912) of 3,443,679 (1,806,048 males and 1,637,631 females). The chief towns are Tainan City (53,794 inhabitants), Tamsui, and Kelung. At Kelung the old fortifications have been restored and improved.

Many improvements have been effected by the Japanese administration. An educational system has been established for Japanese and natives, for whom there are 169 elementary schools with 892 teachers and 39,012 pupils. There are also normal schools, a medical school and a school for teaching the Japanese language to natives, and native languages to Japanese.

The receipts of the Japanese administration are from inland taxes, customs public undertakings, and also subsidies from Japan ranging from 5 to 9 million yen annually. The expenditure is chiefly for internal administration and the working of public undertakings.

	1906-09	1909-10	1910-11	1911-12	1912-13
	Yen	Yen	Yen	Yen	Yen
Revenue	37,005,764	40,409,107	39,889,212	43,651,651	45,325,508
Expenditure	30,666,455	30,189,383	32,529,338	43,651,651	45,325,508

The agricultural products of Formosa are rice, tea, sugar, sweet potatoes, ramie, jute, turmeric, while camphor is worked in the forests under a government monopoly. There are active fisheries. The industries comprise flour milling, sugar, tobacco, oil, spirits, iron work, glass, bricks, soap, and many other manufactures.

The mining industry was distributed as follows (1911) mines for gold, 9, for gold-copper, 1, for gold dust, 27, for copper, 2, for mercury, 1, for coal, 370, for petroleum, 39, for sulphur, 16. The mining industry employed (1911) 5,047 workers.

The commerce of Formosa is largely with Japan, the chief foreign

countries with which there is traffic being China and the United States. In 1911 the imports amounted to 5 440 412/ (3,444 163/ from Japan), exports, 6,603,147/ (5,268,189/ to Japan). The chief exports in 1911 were tea, 818,558/, camphor, 853 586/.

Roads have been and are being constructed throughout the Island. There are now 290 miles of railway open and over 120 miles of light railway. In 1911 there were 135 post offices, through which passed 28 493,762 packets and 367,055 parcels. The telegraph service has 117 offices, length of line 1,000 miles, of wire 8 000 miles, messages (1912) 1 273 311. Telephone line, 790 miles, wire 4,030 miles calls (1912) 3,704,104.

At the end of 1911 the post office savings bank had 100,819 depositors with 191,886/ to their credit.

The currency current in the Island is that of Japan.

**Hokkō** or the **Pescadores** consist of about 14 islands, with a total area of about 50 square miles.

Japanese **Sakhalin** (or **Karafuto**) consists of that portion of Sakhalin which lies to the south of the parallel of 50 north latitude. It has an area of about 14,500 sq miles and, in 1912 a population of 43,273 (20 783 males and 19,490 females). The most important industry of the island is the herring fishery, but large areas are fit for agriculture and pasturage and Japanese settlers have been provided with seed and domestic animals. There is a vast forest area of larch and fir trees. The minerals found are coal and alluvial gold.

The revenue and expenditure for 1912-13 are estimated to balance at 2 200,345 yen two thirds of that amount being advanced by the Japanese government.

The leased Territory of **Kwantung** the southern part of the Liautung Peninsula, has an area of about 1,256 sq miles and a population (December 31 1911) of 485 089 of whom 446 714 are Chinese and 41,259 Japanese (exclusive of army and navy). The Territory is under a Japanese governor general the seat of administration being at **Dairen** (or **Tairen** formerly called **Hainy**) where there is an elementary school with 800 pupils also an American Presbyterian Mission with a church and an hospital.

The estimates for 1912-13 balanced at 5 246 857 yen.

The chief agricultural products of the Territory are maize, millet, beans, wheat, buckwheat, rice, tobacco, hemp and various vegetables. There is an active fishing industry. The chief manufactured product is salt, which is abundant in the Territory. Since July 1 1907 the Territory forms a Customs district under the Chinese Imperial Customs, **Dairen** being the Customs port with out stations at **Kinkow**, **Pulantien**, **Pitzwo**, and **Port Arthur**. The port is free goods being subject to duty only on crossing the frontier of the leased territory. The trade is mostly with Japan. Imports (1911) 42,274 729 yen, exports, 47,416 017 yen. **Dairen** has a fine harbour ice free all the year, and protected by a breakwater 1 000 yards long. The harbour is provided with sheds and warehouses, under the control of the **Manchuria Railway Company**. The railway connects **Port Arthur** and **Dairen** with **Mukden**, **Kharbin** and the **Eastern Chinese Railway System**.

Gold and silver coin and the notes of the **Yokohama specie bank** are current.

## LIBERIA

**Constitution and Government**—The Liberian Republic had its origin in the efforts of several colonisation societies of Europe and America to make permanent provision for freed American slaves. In 1822 a settlement was formed on the west coast of Africa near the spot where Monrovia now stands. On July 26 1847, the State was constituted as the Free and Independent Republic of Liberia. The new State was first recognised by Great Britain, and ultimately by other Powers. The Constitution of the Republic is on the model of that of the United States with trifling exceptions. The executive is vested in a President, a Vice President, and a Council of 8 Ministers, and the legislative power in a parliament of two houses called the Senate and the House of Representatives. The President and the House of Representatives are elected for four years and the Senate for two years. An Amendment to the Constitution was carried in May 1907, extending these terms to *four and six* years respectively. The President must be thirty-five years of age and have real property to the value of 600 dollars, or 1207. Electors must be of negro blood and owners of land. The natives of the country are not excluded from the franchise, but except in the centres of civilisation they take no part in political life. The official language of the Government is English.

*President of Liberia*—Hon. Daniel Howard assumed office January, 1912.

*Vice President*—Hon. S. C. Hailmon.

The President is assisted in his executive function by the Secretary of State, the Secretary of the Treasury, the Secretary of the Interior, the Attorney General, the Postmaster General and the Secretary for War and Navy.

**Area and Population**—Liberia has about 350 miles of coast line, extending from the British colony of Sierra Leone, on the west, to the French colony of the Ivory Coast on the east, and it stretches inland to a distance in some places, of about 200 miles. The boundaries were determined by the Anglo-Liberian agreement of 1885 and the Franco-Liberian agreements of 1892 and 1907-10. Under the latter agreement Liberia loses about 2,000 square miles of territory which she was unable effectively to administer. Early in 1911 an agreement was concluded between the British and Italian Governments transferring the territory of Kamerun to Sierra Leone in exchange for a strip of undeveloped territory of about the same area on the south side of Morro River, which now becomes the boundary.

The total area is about 40,000 square miles. Of this a strip of land about 20 miles broad along parts of the coast is administered by the Government. The total population is estimated at 1,500,000 to 2,100,000, all of the African race. The Americo-Liberians have not full control or influence over the natives of the interior where there are several powerful aboriginal chiefs. The indigenous natives belong in the main to three principal stocks: (1) the Mandingos (Muhammadan), (2) the Kru, (3) the Gola. (4) the Ipwesi and (5) the Kru negroes and their allies. The Kru tribes preponderate and are absolute negroes, mostly Pagan, a few Christian. The number of American Liberians is estimated at about 12,000. About 50,000 of the coast negroes

(including the Liberians proper) may be considered civilised. All such use English as their language in daily life, and are Christian in religion. There is a British negro colony of about 500 and there are about 160 Europeans, including 60 Englishmen. The coast region is divided into counties, Bassa, Sino, and Maryland each under a Government superintendent, and Montserrado, subdivided into 4 districts, each under a superintendent. Monrovia the capital, has including the town an estimated population of 6,000. It is a port of entry, the others being Cape Mount, Grand Bassa, River Cess (Grand Cestos), Sino (Greenville), Nana Kru, Sesters, Cape Palmas and Half Cavalla also Liberian towns, on the Sierra Leone frontier. Other towns are Robertsport, Royesville, Marshall, Arthington, Careyburg, Millsburg, Whiteplains, Boporo (native) and Rocktown.

The Americo Liberians are all Protestant (Anglican, Presbyterian, Baptist or Methodist). There are several American missions at work and one French Roman Catholic. The government educational system is supplemented by mission schools, instruction being given both to American and to native negroes. In 1910 the government had 113 elementary schools with 122 teachers and 4,100 pupils. There are 37 mission schools and about 3,000 pupils. The mission schools give industrial training. The Methodists have a college at Monrovia, the Protestant Episcopalians a high school at Cape Palmas and 3 other important schools. The government has a college with 12 professors and 120 students. A criminal code was enacted in 1900, the customs laws were codified in 1907.

For defence every citizen from 16 to 50 years of age capable of bearing arms is liable to serve. The organized militia volunteers and police number about 400. There is one gunboat the *Leck*, and one unarmoured Government steamer the *President Benson*.

#### Finance — The revenue and expenditure (in American dollars) —

	1907	1908	1909	1910	1911	1912	1913	1914
	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars
Revenue	810,100	833,154	801,238	846,687	—	945,099	878,806	471,833
Expenditure	818,110	838,431	814,290	898,600	840,036	850,000	—	470,000

The revenue is derived mainly from customs duties (72,632/ in 1909, 81,878/ in 1909, 75,499/ in 1910, 85,000/ in 1911 and 436,822 dollars in 1912), there is a tax on rubber exported (6d per lb), and a tax is imposed on natives emigrating. The expenditure embraces chiefly the cost of the general administration. A debt of 100,000/ at 7 per cent was contracted in 1871, of this the unpaid interest amounted in 1910 to 185,097/. On March 31, 1899, an agreement was concluded for the reduction of the rate of interest, the amortisation of the principal, and the payment of arrears of interest, duties on rubber and other articles being assigned as security for the service of the debt. In January 1906 a loan of £100,000 was obtained through the Liberian Development Company to be employed partly in paying off Customs' creditors and resuming a gold currency at the Customs and partly on road making and internal developments. In 1908 this loan was assumed by the Liberian Government. It is secured on the Customs. There is also an internal debt amounting (Jan 1, 1911) to about 687,040 dollars, making a total (together with some smaller debts) of 1,627,618 dollars.

In 1910 the United States Government intimated its willingness to assist Liberia by taking entire charge of the finances, military organisation, agriculture, and boundary questions of the country. The negotiations reached a satisfactory conclusion, and in January 1911 a scheme was agreed to. In October 1911 the United States, Great Britain, France, and Germany finally approved the details of the scheme. This involves the raising of an international loan of 500,000? secured by the Customs, rubber tax and native head tax which will be administered by an American controller and British, French and German sub-controllers, the American controller also acting as financial adviser to the Government. It is also provided that for the security of the revenue a frontier police force sufficient for the maintenance of peace in Liberia shall be established and that the United States shall designate trained military officers to organise the force.

**Production, Commerce**—The agricultural, mining and industrial development of Liberia has scarcely begun. There are forests unworked, the soil is productive, but cultivation is neglected, cocoa and cotton are produced in small quantities only, and indigenous coffee is the staple product. Piassava fibre, prepared from the ray-hua palm, is largely exported. Palm oil and palm kernels are exported. Kola nuts, hillies, bean seed and annatto seed are produced for local consumption. Beeswax is collected, and gum copal is found but is not collected. Portoroeshell improperly prepared, is sold in small quantities. In the forests there are rubber vines and trees of 22 species. The rubber industry is in the hands of the Liberian Rubber Corporation which holds a concession for the exploitation of this product over 8,000 square miles of Government forests in addition to a considerable plantation area. Iron is worked by the natives. Gold in small quantities, copper, zinc, molybdate, corundum, lead, bitumen or lignite and diamonds have been at different times found in the interior but not as yet in payable form or abundance. Ten diamonds of good quality and Brazilian character were exported in 1909 by the Chartered Company together with a small quantity of gold. About 144 small diamonds were obtained in 1910. A charter has been granted to the Liberian Development Chartered Company (Limited) for prospecting and working minerals, for banking for acquiring land in the country, for agricultural and other undertakings and for the construction of roads, railways, and telegraphs.

The conditions under which trade is carried on were unfavourable, but are now improving. Business houses are permitted in the interior under special conditions. The chief imports are rice, Manchester goods, gin, tobacco, building timber, galvanised roofing iron, ready-made clothing, and dried and preserved fish but the total import trade of the country is comparatively unimportant and does not probably amount to 250,000? in any year. The imports of leaf tobacco for 1910 amounted to 394,686 lbs., valued at 12,319?. Of the total import, Germany furnished 278,221 lbs., the United Kingdom 75,675 lbs., Holland 26,177 lbs., and the United States 14,813 lbs. The chief ports of entry were Cape Palmas with 110,567 lbs., Grand Bassa with 81,826 lbs., and Monrovia with 81,614 lbs. The chief exports are rubber, palm oil, palm kernels, piassava fibre, cocoa, coffee, ivory, ginger, camwood, and annatto. In 1907 the imports amounted to 804,920 dollars and the exports to 796,500, in 1908, imports, 965,826 dollars, exports, 889,569 dollars, in 1909, imports, 1,065,800 dollars, and exports, 970,500 dollars. The trade is chiefly with Great Britain, Germany, and Holland.

According to the 'Annual Statement of Trade' issued by the Board of

## MONEY—REPRESENTATIVES—BOOKS OF REFERENCE 1037

Trade, the value of the trade between the United Kingdom and Liberia was as follows in five years —

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports into U.K. from Liberia	76 210	79 924	68 500	64 440	69 820
Exports of U.K. produce to Liberia	90 207	61 279	57 620	67 845	85 687

The chief articles of import from Liberia to Great Britain in 1910 were palm oil of the value of 14 743*l*, palm kernels, 7,840*l*, coffee 648*l*, rubber, 15 820*l*, piassava fibre 27 399*l*. The British exports to Liberia consisted mainly of cotton manufactures, of the value of 21,807*l*, iron 2 674*l*, wood, 1,116*l*.

Monrovia is visited regularly by 7 lines of steamers, British, German, French and Spanish. In 1911 443 vessels visited Monrovia with a tonnage of 972 737 tons. Of these 176 vessels of 381 618 tons were British, 235 vessels of 543,419 tons German. The total number of ships entered and cleared at all the ports of Liberia in 1911 was 1,056 of 2,077 000 tons. There are no railways or vehicular means of transport in the country, except ox carts and a motor road of about 20 miles recently constructed. The river St. Paul is navigable for 25 miles from the sea northwards (including creeks, for 38 miles), and various Liberians maintain four steam launch or steamers thereon. The Liberian Government has recently acquired a river steamer, besides the gun vessel already mentioned. Direct cable communication with Europe was established by German cable via Feneriffe on March 21 1910, and with New York, by the South American Cable Co., which opened its station at Monrovia on February 14, 1912.

**Money, Weights, and Measures**—The money chiefly used is British gold and silver, but there is a Liberian coinage in silver and copper. Accounts are kept generally in American dollars and cents. The Liberian coins are as follows—Silver, 50, 25, and 10-cent pieces, copper 2 and 1 cent pieces.

Weights and measures are the same as Great Britain and the United States.

### Diplomatic and Consular Representatives

#### 1 OF LIBERIA IN GREAT BRITAIN

*Minister*—F. P. Cromwell.

*Consul General*—C. M. Huggins.

*Consul*—J. Green.

There are Consuls in London, Birmingham, Cardiff, Glasgow, Hull, Liverpool, Manchester, Newcastle, Plymouth, Portsmouth, Sheffield, Southampton, Swansea.

#### 2 OF GREAT BRITAIN IN LIBERIA

*H. B. M. Acting Consul-General at Monrovia*—M. Y. H. Parks (1911).

*Acting Vice Consul*—R. R. Appleby (1912).

## LIECHTENSTEIN

The Principality of Liechtenstein, lying between the Austrian crownland of Vorarlberg and the Swiss cantons of St. Gallen and Graubünden, is a sovereign state consisting of Schellenberg and Vaduz (formerly immediate fiefs of the Roman Empire). The former in 1699 and the latter in 1712 came into the possession of the house of Liechtenstein and, by diploma of January 23 1719 granted by the Emperor Karl VI. the two lordships were constituted as the Principality of Liechtenstein. After the break up of the Empire in 1806 the Principality was incorporated in the Rhine Confederation, from 1815 to 1866 it formed part of the German Confederation since the break up of which it has joined no similar union.

The reigning Prince is John II., born October 5 1840 succeeded his father, November 12 1859. The reigning family originated in the twelfth century, and traces its descent through five barons who in 1608 became princes of Liechtenstein. The monarchy is hereditary in the male line. The constitution provides for a Diet of 15 members appointed for four years (3 by the Prince, and 12 by indirect vote). The capital and seat of Government is Vaduz (pop. 1,206). But the appeal court sits in Vienna and the court of control (financial) at Butschowitz in Moravia. Here too are kept the accounts of the Prince's private property. The directorate of the Prince's private forests is at Olmutz, but the affairs of the reigning house and its private property are managed by the Chancery at Vienna. The Principality is by treaties connected in many ways with the Austro-Hungarian monarchy. Since 1852 it has belonged to the Austrian Customs Union. The annual payments in fact amount to over 100,000 crowns. The postal, telegraph and telephone affairs of the principality are managed by the Austrian authorities, according to an agreement made in 1911.

Area, 65 square miles, population of German origin and nearly all Catholic, 1909, 9 854 (4,814 males and 5,040 females). In 1911 the revenue amounted to 767 707 crowns expenditure, 781,286 crowns. There is no public debt. The Prince has estates in Austria and elsewhere yielding over 100,000 sterling per annum. The inhabitants of Liechtenstein since 1867 have not been liable to military service. The population is in great part agricultural, the chief products of the country being corn, wine, fruit, and timber. The rearing of cattle for which the fine Alpine pastures are well suited is highly developed. The industries of the Principality, especially the textile industries, are not unimportant.

## MEXICO.

(REPUBLICA MEXICANA.)

### Constitution and Government

Mexico was annexed to the Spanish Crown by conquest in 1521, and for three centuries continued to be governed by Spain. In 1810 the rule of the Spanish Viceroy had become so tyrannical that it caused an outbreak headed by the patriot priest Hidalgo, who on September 16, 1810, declared the Independence of Mexico. In 1821 General Augustin Iturbide declared himself Emperor of Mexico, but in 1824 he had to flee, and the Republic was established. Several Presidents ruled the destinies of the country with more or less severity until 1864, when the throne of Mexico was offered to Archduke Ferdinand Maximilian of Austria. He was shot in 1867 and Juárez, who had been President in the northern part of the country, took the reins of government. He was followed by Lerdo de Tejada, who in 1876 fled, and General Porfirio Díaz made his entry into Mexico City. He has ruled the country with the exception of four years (1880-4) General Manuel González until May 1911 when he presented his resignation to Congress. Señor F. de la Barra acted as President *ad interim* until the elections had taken place. Señor Francisco I. Madero assumed office as President on November 6, 1911, and ruled until February 1913, when a *coup d'état* took place, resulting in the President's murder (February 23, 1913) and his replacement by General Victoriano Huerta.

The present Constitution of Mexico bears date February 6, 1857, with subsequent modifications down to May 1904. By its terms Mexico is declared a federative republic, divided into States—19 at the outset, but it present 27 in number, with 3 territories and the Federal District—each of which has a right to manage its own local affairs, while the whole are bound together in one body politic by fundamental and constitutional laws. The powers of the supreme Government are divided into three branches, the legislative, executive, and judicial. The legislative power is vested in a Congress consisting of a House of Representatives (233 members) and a Senate, and the executive in a President. Representatives are elected for two years by the suffrage of all respectable male adults at the rate of one member for 40,000 inhabitants. The qualifications requisite are, to be twenty-five years of age, and a resident in the State. The Senate consists of fifty-six members, two for each State of at least thirty years of age, who are returned in the same manner as the deputies. The members of both Houses receive salaries of 3,000 dollars a year. The President is elected by electors popularly chosen in a general election, holds office for six years, and, according to an amendment of the Constitution in 1887, may be elected for consecutive terms. The election of the Vice President takes place in the same manner and at the same date as that of the President. The Vice President is *ex officio* President of the Senate, with a voice in the discussions but without vote. Failing the President through absence or otherwise, the Vice President discharges the functions of the President. Failing both, Congress shall call for new elections to be held at once. Congress has to meet annually from April 1 to May 31, and from September 16 to December 15, and a permanent committee of both Houses sits during the recesses.

*Provisional President of the Republic*—General Victoriano Huerta, proclaimed himself February 18, 1913.

The administration is carried on, under the direction of the President and a Council, by eight Secretaries of State, heads of the Departments of — 1 Foreign Affairs, 2 Interior, 3 Justice, 4 Public Instruction and Fine Arts, 5 Fomento Colonisation and Industry, 6 Communications and Public Works, 7 Finance and Public Credit, 8 War and Marine

## LOCAL GOVERNMENT

Each separate State has its own internal constitution government and laws, but inter State customs duties are not permitted though State taxes are levied. Each State has its governor legislature and judicial officers popularly elected under rules similar to those of the Federation, and the civil and criminal code in force in the Federal District prevails only in the Federal District and Territories (Tepic, Lower California, and Quintana Roo). All the other States of the Mexican Union have their own special codes based more or less on those of the Federal District, but at the same time they must publish and enforce laws issued by the Federal Government.

## Area and Population

Since 1900 the territory of Quintana Roo has been formed on the S. W. coast of Yucatan

In 1900 there were 6 716,007 males and 6 829,455 females. 19 per cent are of pure, or nearly pure, white race, 43 per cent of mixed race, and 38 per cent of Indian race. Distinctions of race are abolished by the Constitution of 1824. The foreign population in 1900 numbered 57,507 — Spanish, 16,258, United States, 15,265, Guatemalan, 5,804, French, 3,976, British, 2,845, Cuban, 2,721, German, 2,565, Italian, 2,564, Chinese, 2,834.

The chief cities, 1910, are — Mexico (capital) 470,659, Puebla, 101,214, Guadalajara, 118,799, San Luis Potosí, 82,946, León, 63,263, Monterey, 81,006, Pachuca, 38,620, Zacatecas, 25,905, Guanajuato, 35,147, Mérida, 61,999, Querétaro, 35,011, Morelia, 33,116, Oaxaca, 37,469, Orizaba, 32,694, Aguascalientes, 44,800, Saltillo, 35,063, Durango, 34,085, Chihuahua, 39,091, Vera Cruz, 29,164, Toluca, 31,247, Celaya, 25,566.

In 1910-11, 79,484 immigrants entered Mexico.

### Religion, Instruction, and Justice

The prevailing religion is the Roman Catholic, but the Church is independent of the State, and there is toleration of all other religions. No ecclesiastical body can acquire landed property. There are 7 archbishops and 28 suffragan bishops. In 1900, 13,533,013 Roman Catholics, 51,796 Protestants, 3,811 of other faiths, 18 646 of no professed faith.

Education is free and compulsory. In 1905 elementary schools supported by the Federation and States (exclusive of infant schools) 6,098, by municipalities, 2,985, total, 9,083 schools, of which 4,876 were for boys, 2,458 for girls, and 1,749 mixed, 575,972 enrolled pupils (352,333 boys and 223,639 girls). For secondary instruction the Federal and State Governments had 84 schools (37 for boys, 3 for girls, and 4 mixed) with 4,331 pupils (3,793 boys and 438 girls). For professional instruction there were 68 institutions and colleges (34 for men, 17 for women, and 17 mixed), they had (1905) 9,827 enrolled students (5,358 men and 4,069 women). Expenditure on schools 9,836,933 dollars. The private, clerical, and association schools numbered

2,499 with 152,917 pupils (81,947 boys and 70,970 girls) In 1912 the system of primary education was to be extended so as to reach the native population

In 1904 there were the National Library, with 180,000 volumes, and 138 other public libraries There were in that year 34 museums for scientific and educational purposes, and 11 meteorological observatories The number of periodicals published was 459, of which 439 were in Spanish, 12 in English, 5 in Spanish and English, 2 in Italian, 1 in French

The judicial power, which is entirely distinct from and independent of the executive, consists of the Supreme Court, with 15 judges chosen for a period of six years, three Circuit Courts, with 3 judges, and District Courts, with 32 judges

The Ordinary, Civil, Criminal, and Correctional Courts are controlled by the Department of Justice and Public Instruction

### Federal Finance

*The ordinary receipts and expenditure for five years have been —*

	RECEIPTS	EXPENDITURE
	Dollars	Dollars
1907-08	111 771,967	93 177,441
1908-09	98,775,511	92,967,893
1909-10	106 328 485	95 028,650
1910-11	111 142,401	100,913,923
1911-12	108,557,000	103,602,401

The following are the budget estimates of revenue and expenditure for the year 1912-13 (1 dollar = about 2s 0½d.) —

REVENUE		EXPENDITURE	
	Dollars		Dollars
Import duties	47 500 000	Legislative power	1 299,285
Export duties	435 000	Executive	264 749
Dues and fees	2 862,500	Judicial	607 147
Stamps, Excise, &c	42 315 000	Foreign Affairs	2 038,237
Direct taxes	12 590 000	Home Department	15 503 480
Posts and telegraphs	1 250 000	Justice	1,906,268
Various	0 365 000	Instruction	7 825,164
		Ports	4,082,584
		Public Works	12,627,764
		Finance	55,067 576
		War and Marine	28,181,780
Total	109 257,800 (10 925 750L.)		109,245 944 (10 924 604L.)

The estimated revenue for 1913-14 was 129,088,257 dollars, and the expenditure 128 894,980 dollars.

On December 31, 1911, the outstanding gold debt amounted to 30 117,6367, including the City of Mexico loan, silver debt, 136,722,367 dollars; floating debt, 482,574 dollars. Estimated debt charge in 1912-13 was 25,804,616 dollars.

The fiscal value of property in Mexico in 1905 is given as follows.—Urban, 285,922,243 dollars, rural, 511,782,480 dollars, Federal District, 280,368,241 dollars, total, 1,088,072,965 dollars, the fiscal value being taken as one-third less than the actual value.

### Defence.

The Mexican army is recruited by voluntary enlistment (for terms of 3, 4, and 5 years), supplemented by a conscription which falls entirely on the poorest classes.

The army in time of peace consists of 30 battalions of infantry, 18 regiments of cavalry, 1 regiment of horse artillery, 2 regiments of field artillery and 1 of mountain guns (all of 4 batteries), 2 battalions of garrison artillery, 1 of engineers and some units of train, &c. On mobilisation each 4 company battalion (including the engineers) forms a regiment of 2 battalions. The 4 battery regiments of artillery are raised to 6 batteries, and the cavalry regiments to 8 squadrons. There are also about 2,000 gen darmes. The war strength is supposed to be 84,000 of all ranks, but it is doubtful if it would amount at present to more than 50,000.

The total peace strength of the Mexican forces in 1912 was 107 generals, 6,236 officers and 49,332 men. The military budget of Mexico for the year 1910-11 amounted to 2,178,000*l*.

The infantry are armed with the Mauser magazine rifle, model 1901, and the cavalry carry the Mauser carbine, but the reserves have only the Remington rifle of 1893. The field and horse artillery are equipped with Q.F. guns on the Schneider Canet system.

The Navy consists of five gunboats *Bravo*, *Morales*, *Tampico*, *Vera Cruz*, and *Zaragoza*. There are also a couple of armed transports.

### Production and Industry

Cultivated lands, 30,027,560 acres; pastoral lands, 120,444,200 acres; forest lands, 43,933,200 acres. Agriculture is in a very primitive condition. Agricultural products are maize, cotton, henequen, wheat, coffee, beans, cotton is grown in the Laguna districts on the Nexas River, and is dependent on irrigation which is being extended. There is a large output of sugar and molasses, valued at about 2,600,000*l* annually (crop for 1911-12 estimated at 160,000 tons), and the production of spirits in 1910 was 9,338,000 gallons. There are 1,674 alcohol distilleries. There are many colonies, or agricultural settlements, established either by the Government or by companies or persons authorised by the Government.

On June 30, 1902, there were in Mexico 5,142,457 head of cattle, 859,217 horses, 834,435 mules, 287,991 asses, 3,424,430 sheep, 4,205,011 goats, and 616,139 pigs, the whole being valued at 120,523,158 dollars, or about 12,052,316*l*.

Mining is carried on in 24 of the 31 States and Territories, nearly all the mines yielding silver either alone or in combination with other ores.

Mineral products exported in 1908, 1909, and 1910 —

	1909	1910	1911
Gold, kilograms	20,328	31,970	45,790
Silver, kilograms	2,161,249	2,354,186	2,304,308
Copper and ore metric tons	117,484	208,465	151,684
Lead and ore "	122,907	123,890	124,651
Iron and ore "	—	—	—
Antimony "	4,095	4,375	4,194
Zinc ore "	41,307	54,136	40,363
Graphite "	1,690	2,732	2,866
Marble "	892	1,168	784
Wool "	2,345	4,439	2,225
Asphalt "	1,029	3,601	6,173
Sulphur "	2213	3,221	4,863

Value of mineral output for 1911-12 Gold, 48,686,965 dollars, silver, 89,664,665 dollars value of all minerals, 209,781,848 dollars.

The output of coal is estimated at 700,000 tons annually Opals are mined in Querétaro, output not stated

There is a Mint at the Capital, and 18 Assay offices (Federal)

Important metallurgical works are carried on at San Luis Potosí, Monterey, Durango and Aguascalientes

On June 30, 1911, there were 145 (26 not working) cotton factories, employing 82,147 workmen spindles, 726,237, looms, 24,486, stamping machines, 89 The consumption of cotton in 1910-11 was 84,568,212 kilos the output of yarn 2,708,973 kilos and of cotton piece goods and prints 15,090,668 pieces There were 351 tobacco factories, the annual output of which was 498,348,581 parkets of cigarettes, 40,492,084 cheeroots, 35,275,718 cigars and 76,099 kilos of tobacco There were 1,548 distilleries giving an output of 87,127,178 litres of spirits of various sorts

### Shipping and Communications

Mercantile marine, 1911, 32 steamers of 18,648 net tons and 50 sailing vessels of 8,712 net tons. In 1909-10 in the foreign trade there entered 3,160 vessels (steam and sail) of 8,031,296 tons and cleared 2,854 vessels (steam and sail) of 7,275,343 tons. The most important ports are Veracruz and Tampico both on the Gulf of Mexico.

On September 16, 1912, there were 15,804 miles of railway open. The main trunk lines are merged in one corporation ("The National Lines of Mexico") controlled by government. About 6,000 had a gauge of 4 ft 8½ in., and the remainder a gauge of 3 ft or less. Lines under construction 1,116 miles.

On June 30, 1911, the Federal telegraph lines were 46,437 miles. There were other lines belonging to individual States and private persons. There were on June 30, 1911, 526 Federal offices including 8 wireless telegraph offices. 4,581,683 messages were sent on Federal lines from July 1, 1910 to June 30, 1911. The Federal telephone had a length of 919 miles.

In 1911 there were 2,858 post offices. The post, inland and inter national, carried in 1910-11 200,000,000 letters, postcards and packets. Post office receipts 1910-11 4,724,000 pesos; expenditure 3,854,613 pesos.

### Money and Credit

Nominal value of the coinage of Mexican mint —

Years	Silver	Gold	Copper or bronze	Nickel	Total
	£	£	£	£	£
1907-8	755,760	1,094,530	—	—	4,350,300
1908-9	668,400	179,670	—	—	840,070
1909-10	388,400	501,000	550	20,606	810,556
1910-11	392,700	—	19,450	50,751	342,881

There were on June 30, 1910, in Mexico 24 banks with note issue and 8 without note issue. The most important are the Banco Nacional with a capital of 32,000,000 dollars, the Bank of London and Mexico, with capital of 21,500,000 dollars, the Banco Central, capital 30,000,000 dollars, the Mexican Bank of Commerce and Industry, capital 10,000,000 dollars, the Banco Internacional e Hipotecario, capital 5,000,000 dollars, the Banco de Crédito Territorial, capital 5,000,000 dollars, and the Banco Peninsular, capital 16,500,000 dollars. The first 4 of these banks have unitedly received a concession as the 'Caja de Prestamos para obras de irrigacion y Fomento de la Agricultura.'

### Money, Weights, and Measures

By the monetary law of December 9, 1904, and the Presidential Decree of March 25, 1905, the monetary unit is the silver peso or dollar, the legal value of which has been fixed at 75 grammes of pure gold. There are 10 peso and 5 peso gold coins, .900 fine and 100 copper, weighing respectively 8.333 $\frac{1}{3}$  and 4.166 $\frac{2}{3}$  grammes. The silver peso weighs 27.078 grammes, .9027 fine and .0793 copper, and thus contains 24.438 grammes of fine silver. The peso is divided into 100 centavos, 50, 20, and 10-centavo pieces are of silver, 800 fine and 200 copper. Bronze coins are 2- and 1-centavo pieces, 95 parts copper, 4 tin, and 1 zinc. There are 5-centavo nickel coins. The value of the gold peso or dollar is 24.68 pence.

Gold coins and 1 peso silver coins are legal tender to any amount. Fractional coin is legal tender for amounts up to 20 pesos, nickel and bronze coins up to 1 peso. The right of coinage belongs exclusively to the Executive of the Union, consequently the right of private persons to tender gold and silver bullion to the mints for the purpose of being coined is abrogated. The bank notes of the National Bank, the Bank of London and Mexico, and the State banks, are current throughout the Republic at their full nominal values, thus serving the purpose of gold, which is practically never seen in circulation.

The weights and measures of the metric system were introduced in 1884 and their use is enforced by law of June 19, 1895 though the old Spanish measures are still occasionally referred to. The old weights and measures were —

<i>Weight</i>	1 libra = 0.45 kilogramme = 1.014 lb avoirdupois
	1 arroba = 25 libras = 25.357 lbs avoirdupois
<i>For gold and silver</i>	1 marco = $\frac{1}{2}$ libra = 4.608 granos
	1 ochava = $\frac{1}{8}$ tomines.
	1 tomin = 12 granos
	20 granos = 1 French gramme
<i>Length</i>	1 vara = 0.837 metre = 2 ft 8 $\frac{1}{8}$ English in
	1 legua comun = 6,666 $\frac{2}{3}$ varas

### Diplomatic and Consular Representatives.

#### 1. OF MEXICO IN GREAT BRITAIN

*Envoy and Minister* — Señor Don Miguel Covarrubias

*First Secretary* — Señor Don Cayetano Romero

*Second Secretary* — Señor Don Julio W. Baz

There are Consular representatives at Barrow in Furness, Birmingham, Belfast, Bristol, Cardiff, Dover, Dublin, Falmouth, Glasgow, Great Grimsby, Liverpool, Manchester, Maryport, Newcastle, Southampton.

#### 2. OF GREAT BRITAIN IN MEXICO

*Envoy and Minister* — Francis W. Stronge

*Secretary* — Thomas B. Hohler

*Consul-General* — C. E. W. Stringer

*Vice Consul* — S. P. Smith

There are Consuls at Progreso, Salina Cruz, Tampico Vera Cruz, Manzanillo, and Colima, and Vice-Consuls at Acapulco, Chihuahua, Ensenada de Todos Santos, Frontera, Guadalajara, Guaymas and Santa Rosalia, Laguna de Términos, La Paz, Mazatlan, Monterey, Tuxtla Gutierrez, Oaxaca, Saltillo, Socorro, Tuxpan, Payo Obispo, and San Luis Potosí.

## MONACO

Prince Albert, born November 18, 1848, succeeded his father, Prince Charles III, September 10, 1889, married (1) to Lady Mary Douglas Hamilton, September 21, 1869,<sup>1</sup> (2) to Alice Duchess-Dowager de Richelieu. Son by first wife, Prince Louis, born July 12, 1870

Monaco is a small Principality on the Mediterranean, surrounded since 1860 by the French Department of Alpes Maritimes except on the side towards the sea. From 968 it belonged to the house of Grimaldi. In 1715 it passed into the female line, Louise Hippolyte, daughter of Antony I, heiress of Monaco, marrying Jacques de Goyon Matignon, Count of Thorigny, who took the name and arms of Grimaldi. Antony I died in 1781, Louise Hippolyte reigning only ten months and dying in 1782. She was succeeded by her husband under the name of Jacques I, who also succeeded Antony I as Duc de Valentinois, and was in his turn succeeded by his son Honorius III. This Prince was dispossessed by the French Revolution in 1792, and died in 1796. In 1814 the Principality was re-established, but placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna (1815).

In 1848 Mentone and Roccabruna revolted, and declared themselves free towns, in 1861 Charles III ceded his rights over them to France, and the Principality thus became geographically an *enclave* of France, when the Sardinian garrison was withdrawn and the Protectorate came to an end.

The Prince was an absolute ruler, there having been no elective representation within the Principality. But on January 7, 1911, a Constitution was promulgated, which provides for a National Council elected by universal suffrage and *scrutin de liste*. The Government is carried out under the authority of the Prince by a Ministry assisted by a Council of State. The legislative power is exercised by the Prince and the National Council, which consists of 21 members elected for four years. The territory of the Principality is divided into three communes, administered by municipal bodies, in the election of which women are entitled to take part.

In 1819 the Government adopted a code founded upon the French codes and a Court of First Instance, as well as a Juge de Paix Court. The Principality has its own coinage (it issues only 100-franc pieces) which is current since 1876 in all the States of the Latin Union, it also issues its own separate postage stamps.

The area is eight square miles. Population 19,121. Towns Monaco, 2,410, La Condamine, 6,218, Monte Carlo, 3,794.

There has been since 1837 a Roman Catholic bishop. A semi-military police force has taken the place of the 'guard of honour and troops formerly maintained. The value of the commerce of the Principality is not stated. Imports are coal and wine, olive oil, oranges, citrons, and perfumes are exported. The industries and trade are unimportant, and the revenue is mainly derived from the gaming tables. The annual grant for the concession is 70,000*l.*, in 1917 it will be 80,000*l.*, in 1927 90,000*l.*, and in 1937 100,000*l.*

*Consul-General* for Monaco in London —Th. Lamley

*British Consul* —J. W. Keogh (residing at Nice)

*British Vice Consul* —C. J. Sum (residing at Monaco)

## MONTENEGRO

(CENAGORA—KARA DAGE)

**Reigning King**—**Nicholas I**, Petrović Njegoš, born October 7 September 25), 1841, educated at Trieste and Paris, proclaimed Prince of Montenegro, as successor of his uncle, Danilo I., August 14, 1860. Assumed title of King, in virtue of a resolution passed unanimously by the National Skupština, Aug. 28, 1910, on the occasion of the 50th anniversary of his accession. Married, November 8, 1860, to *Milena Petrovna Fuccić*, born May 4, 1847, daughter of Peter Vukotic, senator, and Vice-President of the Council of State. Offspring of the union are three sons, *Danilo Alexander*, heir-apparent, born June 29, 1871, married July 27, 1899, to Princess Jutta (Militta) daughter of the Grand Duke of Mecklenburg Strolitz, *Mirko*, born April 17, 1879, married July 12, 1902, to Natalie Constantinovich, daughter of Colonel Constantinovich, great uncle of the late King Alexander of Serbia, offspring, Prince Michael born September 14, 1908, Paul, born May 16, 1910, *Peter*, born October 10, 1889, and six daughters, *Milica*, born July 26, 1868, married, August 7 1889, to the Russian Grand Duke Peter Nikolaevitch, *Stana*, born January 4, 1868, married August 28, 1889, to George, Duke of Leuchtenberg, and after the dissolution of that marriage, married in 1907 to the Russian Grand Duke Nicolas Nicolaievitch, *Helena*, born January 8, 1873, married October 24 1896, to Victor Emanuel, now King of Italy, *Anna*, born August 18, 1874, married May 18 1897, to Prince Francis Joseph of Battenberg, *Xenia*, born April 22, 1881, *Pera*, born February 22, 1887. In December, 1900, the Prince assumed the style of Royal Highness.

The supreme power has been retained in the family of Petrovic Njegoš, descending collaterally, since the time of Danilo Petrović, who, being proclaimed Vladika, or prince-bishop, of Montenegro in 1697, liberated the country from the Turks, and, having established himself as both spiritual and temporal ruler, entered into a religious and political alliance with Russia. His successors retained the theocratic power till the death of Peter Petrović II (October 31, 1851), last Vladika of Montenegro, a ruler of great wisdom, as well as a widely celebrated poet. He was succeeded by his nephew, Danilo I., who abandoned the title of Vladika, together with the spiritual functions attached to it, and substituted that of Gospodar, or Prince. At the same time Danilo I., to throw off a remnant of nominal dependency upon Turkey, acknowledged by his predecessors, obtained the recognition of his new title from Russia. In 1878 the independence of Montenegro was formally recognized by Turkey and the other Signatory Powers of the Treaty of Berlin. In 1909 the limitations which the Treaty of Berlin had placed on Montenegro's complete sovereignty were removed, except the prohibition to erect fortifications at Antivari or along the Boyana. On October 23, 1909, Antivari was opened as a free port.

The following is the complete list of the Petrović dynasty, with their dates —

*Vladikas or Prince Bishops*

Danilo	1696-1735	Peter I. (St. Peter)	1782-1830
Seva and Vasilii	1735-1782	Peter II (Vladika Rado)	1830-1851
Danilo I. (Kulus and Gospodar)			1851-1860
Nicholas I. (reigning King, nephew of the last)			

King Nicholas's nominal civil list amounts to 240,000 krona, while the two elder princes receive 80,000 krona each. Russia contributes a large sum each year towards the military, educational, and hospital expenditure of Montenegro. The Austrian Government contributes 20,000 krona per annum towards the expense of conveying the mails to and fro between Cetinje and Cattaro.

**Government.**—Under the Constitution granted by the Prince of Montenegro on December 18, 1906, it is now a hereditary Constitutional monarchy with popular representation. The first National Assembly or Skupstina met in 1906 but was dissolved in July 1907.

An electoral law has been framed under which elections took place in September, 1906, and in 1911 for the present Skupstina. That assembly is, in future, to be convoked yearly on October 31, by the King. Its members are elected by universal suffrage for a period of 4 years. Each of the 58 districts or capitanats of Montenegro, and each of the 6 provincial towns, Cetinje, Podgoritz, Niksic, Kolashin, Antivari, and Dulcigno, elect one representative. There are also 12 *ex officio* members, including the Montenegrin Orthodox Metropolitan, the Roman Catholic Archbishop of Antivari, the Montenegrin Mussulman Mufti, 6 high officials of the State, and 3 generals, nominated by the Prince. There are thus 74 members in all.

*Prime Minister*—General Mitar Martinovitch, appointed June 20, 1912.

There are Ministries of the Foreign Affairs, Interior, War, Finance and Public Works, Justice, Worship and Public Instruction.

**Area and Population.**—Area estimated at 3,630 English square miles. Extreme length, from the northernmost point of Piwa to the Boyana, about 100, and width, from Grahevo to the Lim, about 80 English miles. It is bordered on the south or south-east by the Turkish Vilayets of Scutari and Kosovo (North Albania), on the east by the Sanjak of Novi Bazar, and on the north west by Herzegovina. On the west it is separated from the Adriatic by the narrow strip of Austrian territory forming the extremity of Dalmatia (Bocche di Cattaro, Budua, Spizza), excepting in the recently (1878-81) acquired districts of Antivari and Dulcigno, where it possesses a seaboard some 28 miles in length. The total population numbers very roughly about 250,000. The capital is Cetinje, with an estimated population of 4,500; Podgoritz, 10,000; Dulcigno, 5,000; Niksic, 5,000; Antivari, 2,500. The population is mainly pastoral and agricultural. The Montenegrins belong almost entirely to the Servian branch of the Slav race.

**Religion.**—The Church is nominally independent of the State, except that the bishops are appointed by the Prince, but the personal authority of the latter is all pervading. The principal monasteries are possessed of sufficient property for their maintenance. The rural clergy are maintained by a tax paid to the Government by every head of household. Orthodox Montenegro is divided into two dioceses, Cetinje and Ostrog. The former *see* comprises 8 sub-districts, called *proto presbyteries*, with 84 parishes, and the latter into 9 such districts with 75 parishes. The Roman Catholic Archbishopric of Antivari contains 10 parishes, all of which are situated in the districts acquired from Turkey, in which there are likewise 10 Mussulman parishes. The Greek Orthodox church has about 228,500 adherents, the Roman Catholic, 12,500, and the Mohammedan, 14,000.

**Instruction.**—Schools for elementary education are supported by Government, education is compulsory and free. All males are supposed to be able

<sup>1</sup> See note under area of Turkey

to read and write. There is a theological seminary and a gymnasium or college for boys at Cetinje, and a girls' high school with 28 resident pupils maintained at the charge of the Empress of Russia.

**Justice, Crime, and Pauperism.**—A Penal Code based on the Servian Code came into force in 1906, a Civil Code has been in existence for some time.

There are district courts in five of the principal towns. In the 56 rural districts there are courts of first instance over which the heads of the districts preside. The local *Kmets* have only authority to settle trivial disputes and generally act as peace-makers. There are appeal Courts in the five principal towns. The 'Veliki Sud, or supreme court at Cetinje, has jurisdiction, both appellate and concurrent, over the whole principality and from its decision in civil matters there is no appeal. In criminal cases the Prince may pardon. Petitions against judges for undue delay may be lodged with the Minister of Justice. There are no judicial statistics, but crime in general is rare.

There is no regular provision for poor relief. The Government, however, annually undertakes a certain number of public works, such as roads, bridges &c., at which the indigent are invited to labour. Russian charity has also done much.

**Finance.**—The estimated revenue and expenditure in 1912 balanced at 4,021,000 perpers, the chief sources of revenue being land tax, customs and monopolies. Of the expenditure the chief branches are the civil list, 240,000 perpers; justice, 316,040 perpers; interior posts and telegraphs, 325,756 perpers; ministry for foreign affairs 168,860 perpers; ministry of finance and public works, 625,160 perpers; ministry of war, 263,000 perpers; ministry of worship and instruction, 612,840 perpers. Public debt 1912, 890,000!

**Defence.**—The establishment of a parliamentary régime in 1906 was followed in 1910 by the first written law for the administration and instruction of the army.

The military forces of Montenegro are organised on a militia basis. According to the Law of 1910, every Montenegrin subject is liable to military service from the 18th to the 62nd year of his age, i.e., for a total period of 45 years. This period is divided into 2 years in the recruits class, 33 years in the active army and 10 years in the reserve. During their term of service in the active army men are divided into two classes. To the first class are allotted those who are considered fit for active service in any capacity, while to the second are posted men who are only suited for the less arduous duties in the field, such as the transport, supply and medical services.

During the two years recruit service, the recruit is called up for two courses of recruits' training, limited by law to twelve months, but in practice each annual course lasts only three months in the artillery, or two months in the infantry and other services.

Men in the active army are liable to be called up annually for a period of training not exceeding ten days and may be called up in addition for any extensive manoeuvres or for an experimental mobilisation, subject, however, to the proviso that no man shall be called upon to perform more than fifteen days' service in any one year. Men belonging to the reserve are required to attend a muster parade once a year, and they may be called up for manoeuvres or for an experimental mobilisation. Men who, through physical unfitness, or for any other reason, are unable to perform their military service pay a special military tax, the amount of which varies according to their means.

The army consists in time of peace of four divisions, three of which have three brigades, while the fourth has only two. The brigades vary in strength from three to eight battalions, the total number of battalions being 59, of which three are composed of Moslems. The cavalry arm is non-existent in the Montenegrin army.

The infantry are armed with Russian "three line" rifles of the 1898 pattern, the artillery with various guns of not very recent model.

Sufficient time has not yet elapsed since the promulgation of the new Law for all the provisions of that Law to be brought into full effect, and the army must therefore be regarded as still in a period of transition.

The war strength of the Montenegrin army is variously estimated at from 30,000 to 50,000 men.

**Production and Industry.**—Agriculture is of the most primitive kind. The cultivated land is mostly the property of the cultivators, the Croatian system of domestic communism being generally prevalent. In some districts, however, the land is split up into diminutive peasant holdings, while in a few the metayer system is met with, but large estates nowhere exist. The principal crops grown are maize, tobacco, oats, potatoes, barley, and buckwheat. The exclusive right to manufacture, sell, and export tobacco is, since November 14, 1903, in the hands of an Italian syndicate. The vine is cultivated successfully in the Tchernitchka Nahie, and the district of Podgoritz, and the olive about Antivari and Dulcigno. The uncultivable area consists, in the east, of mountain pasturage and forests of beech, oak, &c., which, owing to the want of roads, are valueless, and, in the west, of bare limestone sparsely sprinkled with brushwood and stunted scrub. There are no sea fisheries. Live stock of all kinds are reared: there are 600,000 sheep and goats, 60,000 cattle, 8,000 swine, 3,000 horses. There is some fishery on the Lake of Scutari.

**Commerce.**—Montenegro has a maximum and minimum tariff. The exports for 1910 were valued at about 99,650*l*, the imports at about 840,277*l*. The principal exports are sumach, flea powder (*Pyrethrum roseum*), smoked sardines (*sardines*), smoked mutton, cattle, sheep, goats, cheese, wool, hides, skins, and furs, honey, beeswax, wood for walking sticks, &c., olive oil, wine, tobacco. The imports are salt from Turkey, a Government monopoly yielding over 11,000*l* a year, petroleum from Russia, maize, cottons, hardware, sugar, coffee, rice. According to statistics supplied, merchandise to the value of 182,000*l* was imported from Austria-Hungary in 1910, 55,000*l* from Turkey, 52,000*l* from Italy, and 15,000*l* from Great Britain.

**Communications.**—There are excellent carriage roads from Cattaro to Cetinje, from Cetinje by Rieka, near Lake Scutari, to Podgoritz, and to Nikšić, also from Podgoritz to Plavitz (the Scutari Lake Port of Podgoritz), and from Antivari to Vir Pazar on Lake Scutari, from Vir Pazar to Rieka, from Podgoritz to Kolaschina, and from Antivari to Dulcigno. A carriage road from Kolaschina to the Turkish frontier near Berana has been made. Other roads are contemplated or are begun from the Austrian frontier near Risano to Grahovo and Nikšić, from Cetinje via Cavo to Danilograd, &c. There are public diligences between Cattaro and Cetinje, between Cetinje, Podgoritz, and Nikšić, and between Antivari and Vir Pazar. There are bridle roads over the rest of the principality. Three lake steamers belonging to the Société Monténégroise d'Antivari ply between Rieka, Vir Pazar, Plavitz, and Scutari. A narrow gauge railway (the first Monte-

negrin railway) is now open from Antivari to Vir Pašar. There are 523 miles of telegraph line in the country, with 23 telegraph offices and 2 radio-telegraphic stations. Montenegro forms part of the Postal Union, it has 21 post offices.

**Money.**—Montenegro has a small coinage of gold, silver, nickel and bronze. The perper and para are nominally equal in value to the Austrian krone and heller. The coins in circulation in 1910, struck at the Vienna mint except the five and one perper pieces struck in France, were gold, 300 hundred perper, 30,000 twenty perper and 40,000 ten perper pieces, silver, 60,000 five perper, 300,000 two perper, and 600,000 one perper pieces. French and English gold and Austrian paper and silver circulate freely. There are four banks, the Bank of Montenegro at Cetinje, the Banks of Podgoritz and Nikšić at those places, and the National Bank of Montenegro at Antivari with a branch at Cetinje.

*British Envoy and Minister*—Count de Saha, C V O, C M G

*Consul General in London*—Sir J. Roper Parkington.

## MOROCCO

(MAGHBIB-EL-AKRA — EL GHARB)

### Reigning Sultan

**Mulai Yusef**, son of Mulai Hassan, was proclaimed Sultan on August 18 1912, on the abdication of his brother, Sultan Mulai Abd-el Hafid, who received a lump sum of 400,000 francs and an annual pension of 850,000 francs

The present Sultan of Morocco—known to his subjects under the title of 'Emir-al Mumenin, or Prince of True Believers—is the seventeenth of the dynasty of the Alides, founded by Mulai Ahmed, and the thirty sixth lineal descendant of Ah, uncle and son in law of the Prophet. His five predecessors were —

Sultan	Reign	Sultan	Reign
Mulai Abderrahman	1822-1859	Mulai Abd el Anz	1894-1908
Sidi Mulai Mohamed	1859-1873	Mulai Abd el Hafid	1908-1912
Mulai Hassan	1873-1894		

The Sherifian umbrella is hereditary in the family of the Filal Sherifs of Tafelt. Each Sultan is supposed, prior to death, to indicate the member of the Sherifian family who, according to his conscientious belief, will best replace him. This succession is, however, elective, and all members of the Sherifian family are eligible. Generally the late Sultan's nominee is elected by public acclamation at noonday prayers the Friday after the Sultan's death as the nominee has probably possession of imperial treasure, and is supported by the bodyguard, from among whom the large majority of court officials are selected

### Government

The form of government of the Sultanate, or Empire of Morocco, is in reality an absolute despotism, unrestricted by any laws, civil or religious. The Sultan is chief of the State, as well as head of the religion. As spiritual ruler, the Sultan stands quite alone, his authority not being limited, as in Turkey and other countries following the religion of Mahomet, by the exponents of the Koran, the class of 'Ulama, under the 'Sheik ul Islam.' The Sultan has six ministers, whom he consults if he deems it prudent to do so, otherwise they are merely the executive of his unrestricted will. They are the Grand Visier, the Ministers for Foreign Affairs, Home Affairs, and War, Chief Chamberlain, Chief Treasurer, and Chief Administrator of Customs.

By the Anglo-French Convention of April, 1904, Great Britain recognised that it appertains to France to assist in the administrative, economic, financial, and military reforms in Morocco, but reserves the rights which by treaties or usage she now enjoys. The general agreement was accepted also by Spain in a Franco-Spanish convention. Germany, however, expressed dissatisfaction with the arrangement, and a conference of 18 delegates representing Morocco, the European Powers interested, and the United

States of America, was held at Algeciras for the settlement of disputed matters, from January 16 to April 7, 1906, when an agreement, embodied in a General Act, was signed by all the delegates. The Sultan signed the agreement on June 18, and ratifications of the Agreement were deposited at Madrid by the other Powers, December 31, 1906 (For particulars of the Treaty see STATESMAN'S YEAR BOOK for 1912.)

In 1909 disturbances occurred in the neighbourhood of Melilla arising from an attack by Riffians on Spaniards working on a railroad being laid from that town to some mines a few miles distant. Spain sent a large force and severe fighting ensued, ending in the subjugation of the tribes and the occupation by Spain of a considerable tract of country extending eastwards to Cabo de Agua and southwards to Seluan.

After remaining quiet for some months the tribes near Melilla again attacked the Spaniards in the summer of 1911. In June the Spanish Government despatched vessels of war to Larache and landed a force, which marched to Alcazar to protect the Spaniards at that place. Further contingents of Spanish troops continued to arrive, and occupied all the district between Larache, Alcazar, and Arzila.

In July, 1911 the German Government sent a cruiser to Agadir informing the Sultan and the European powers that their object was to protect German interests in that place. Negotiations were thereupon entered into between France and Germany, and after lasting about three months eventually terminated in the signature of two Agreements (Nov. 4, 1911), under which Germany renounces all political interests in Morocco and practically agrees to the establishment of a French protectorate, receiving in exchange ample guarantees for absolute equality in economic and commercial matters, and the cession of a considerable tract of country in the French Congo. (See map, STATESMAN'S YEAR BOOK for 1912.)

In April, 1912, a treaty was signed at Fez by which the Sultan formally accepted the French Protectorate. This has been recognised by Germany and England.

France is represented in Morocco by a Resident General (an office created April 28, 1912), who exercises civil and military powers, under the sovereignty of the Sultan, in the interest of the French Protectorate, and with due regard for the treaty rights of other powers. The Resident General is assisted by a Deputy Resident and a Secretary General. The new Resident-General is under the direct control of the Foreign Office, where a Special Moroccan Department has been created.

The negotiations between France and Spain as to their respective rights in Morocco came to an end in the Franco-Spanish Treaty of Madrid, signed on November 27, 1912. In this France acknowledges the right of Spain to exercise its protectorate in the Spanish zone, the extent of which is clearly defined. (See map in this issue.) The zones will be administered, under the control of a Spanish High Commissioner, by a Calipha (whose headquarters shall be at Tetuan) chosen by the Sultan from a list of two candidates presented by the Spanish Government. It was further agreed that Tangier and its district should be excluded from the Spanish zone, and become a special international zone, some 140 square miles in extent.

A protocol attached to the Treaty provides for the rapid planning, construction, and exploration of the railway from Tangier to Fez, the first line to be built in the Empire. The capital of the company shall be 60 per cent. French and 40 per cent. Spanish. The line shall comprise three sections, corresponding (1) to the International zone of Tangier, (2) the Spanish Northern zone, and (3) the French zone.

The following are the treaties concerning Morocco from 1860 to 1912 —(1) Treaty of Tetuan between Spain and Morocco, April 26 1860, (2) Supplementary Treaty to last, October 20, 1861 (3) Treaty of Commerce, between Spain and Morocco November 20, 1861 (4) Convention of Madrid, signed by the European Powers, on June 8 1880 relative to the exercise of protection (5) Treaty of Marakesh, between Spain and Morocco March 3, 1894 (6) Additional Convention to last, February 24, 1895 (7) Franco-Spanish Agreement, relative to Spanish possessions of the Sahara and Guinea, June 27 1900 (8) Franco-British Treaty of April 8 1904 (9) Franco-Spanish Agreement of October 3, 1904 (10) Franco-Spanish Agreement of September 1 1905 (11) Act of Algiciras, April 7 1906, (12) France Hispano-British Agreement of 1907 (13) Franco-German Treaty of February, 1899 (14) Franco-Moroccan Agreement of March 11, 1909 (15) Hispano-Moroccan Agreement of November 18, 1910, (16) Franco-German Agreement of November 4 1911 (17) French Protectorate Treaty with Morocco, March 30 1911 (18) Franco-Spanish Treaty of Madrid of November 27, 1912

*French Resident General* —General Lyautey, appointed April 23, 1912

## Area and Population

According to the most recent investigation, the area is about 219,000 English square miles. Population generally considered to be about 5,000 000. A French officer, Captain N. Larras, who has been in the country since 1893, estimates the numbers at from 4,340,000 to 4,580,000. To the Atlantic coast region, Tangier to Mogader, he assigns 2,200,000, to the Atlas-Riff country, 1,500,000, to the Maluya valley, 200,000, to the Sus valley, 200,000, while in the region from the southern slopes of the Atlas stretching into the Sahara, he estimates the numbers thus Wad Draa, 100,000 to 250,000, Wad Ziz with Taflet, 120,000 to 200,000, Wad Gir (with Figig) 20,000 to 30,000. The population consists of Berbers, Tuaregs, Shallah Berbers, Beduin and Mised Arabs, and a considerable number of Jews and Negroes.

An agreement (July 20 1901) makes the valley of the Wad Gir the boundary between France and Algeria, and to the east of this only those who acknowledge French authority will be permitted to dwell. A French and Moroccan Commission is entrusted with the formation of police arrangements in the region. The number of Christians does not exceed 10,000 (7,000 in Tangier). Fez, the capital, has a population of about 140,000, and Tangier about 35,000. Morocco city is the southern capital. The Sultan and his subjects are of the Malekite sect of Sunnite Mohammedans.

## Finance, Defence

Customs revenue estimated at 440,000l. The Moroccan debt consists of French and German loans (1904-08) amounting to 3,040,000l., war expenditure, indemnities, &c., 2,980,000l., and various advances and loans, 2,200,000l., total, 8,200 000l. The French loans amounting to 2,480,000l. should be repaid in half yearly instalments up to 1941. In 1910 a new 5 per cent loan of 101 124 000 francs was obtained from the Moorish State Bank.

The Sherrefian army is to be organised as follows, under command of a French general —

Service is to be compulsory, substitution being allowed, the term of service will be generally 4 years. There is to be a Sherrefian guard of 2 battalions, 2 squadrons and 1 mountain battery, to form the permanent garrison of Fez. The rest of the army is to consist of 9 battalions, 5 squadrons, 4 mountain batteries, 1 engineer battalion, and departmental troops. Companies, squadrons and batteries will be commanded by French officers, with a due proportion of French N C O's. Obligatory service is only to be gradually imposed upon the tribes.

### Industry and Commerce.

The interior of Morocco, although generally open to travellers, is not permanently occupiable as yet on account of lack of security to both life and property. Immigration is confined principally to the so-called French zone of influence along the coast, centring especially in and about Casablanca. Morocco, therefore, is still in the rudimentary stages of both economic and commercial development. Only foreign capital seems available for the development of trade, agriculture, the mooted irrigation projects, railroads, etc. In the coastal regions some progress is being made, but the vast rich interior remains unexploited, with a large section actually unexplored.

In addition to its undoubted agricultural resources, rich mineral deposits of copper, iron, lead, antimony, sulphur, silver, gold, and petroleum are also said to exist in various parts of the Sultanate. The hostility of the interior tribes prevents any extensive European mining enterprises, but several companies have been organized in anticipation of early results.

The natural industries of Morocco have become almost extinct. Formerly richly woven silks, woollens, and embroideries were extensively produced, but the slipper, jillaba, and carpet industries are now all that remain, although there is a constantly decreasing quantity of tiles and pottery still manufactured in the interior.

Imports and exports for 1910 and 1911 —

Ports	Imports		Exports	
	1910	1911	1910	1911
	£	£	£	£
Tangier	406,570	513,070	201,461	305,073
Tetuan	46,225	68,283	30,829	35,482
Larache	856,800	419,542	117,541	181,845
Rabat	227,167	942,202	49,483	51,038
Casablanca	623,821	866,650	839,630	706,028
Marrakech	349,845	806,135	282,102	454,267
Safi	279,395	387,417	187,163	530,432
Mogador	267,411	824,061	277,401	354,862
Total by Ports	2,468,459	3,116,600	1,575,417	2,737,510
Mehilla	1,308,780	1,588,967	114,681	63,897

There are Postal services, under the control of the British, French, German and Spanish Governments. There is a daily service of couriers from Tangier to Fes and Alcazar, to Tetuan, and to the coast towns Larache, Rabat, Dar-el Beida (Casablanca), Maragan, Saffi and Mogador. There are also couriers between Larache and Alcazar, and between Maragan and Marakesh, and between Fes and Mequinez. There are telegraphic submarine

cables from Tangier to Cadix (Eastern Telegraph Co.), Tarifa (Spanish Government), and Oran (French Government) also wireless telegraphic stations belonging to the Moorish Government at Tangier, Rabat, Casablanca, Fez and Mogador. The wireless telegraph station at Rabat is to be transferred to Safi, and land telegraph wires will connect Rabat with Casablanca and Mazagan with Casablanca. Only two towns have a telephone service—Tangier and Casablanca.

### Money, Weights, and Measures

The *Blanket* or *Muzona* = 6 *Floos* Approximate English value = 0.96 at par  
 The *Ounce* or *Okia* = 4 *Blankets* " " " = 384 "  
 The *Milkal* = 10 *Ounces* " " " = 384 "

Spanish dollars and pesetas, as well as Moorish coins minted for the Government in France, Germany and England, are current. The silver coinage comprises dollars,  $\frac{1}{2}$  and  $\frac{1}{4}$  dollars, and dirhems and  $\frac{1}{2}$  dirhems (1 dollar = 10 dirhems). But the values fluctuate and the market values are sometimes only one-third of those adopted by the Government for custom house purposes. At Tangier European goods are paid for in Spanish coin or French coin, French coin is much used at Casablanca (Dar al Baida), in other parts of Morocco Moorish coin is now almost exclusively used.

The *Kintar*, used for the produce of the country sold by weight, contains 100 *Rotals*, and is generally equal to about 168 lbs, but varies in different districts.

The *Kintar* by which is sold the articles of weight of importation is 100 *Rotals*, equal to 112 lb English.

The *Drak*, 8 *tomnis*, about 22 English inches

Grain is sold by measure.

The *Tanger Mudd*, 8 *tomnis*, equal to 14½ English bushel

Oil is sold, wholesale, by the *kula*, that of Tangier actually weighs 28 *rotals*, 47 lb English, and is equal to about 5½ British imperial gallons.

### Diplomatic and Consular Representatives

#### OF GREAT BRITAIN IN MOROCCO

*Envoy Extraordinary and Minister Plenipotentiary*—Vacant

*Consul General, with local rank of 1st Secretary*—H. E. White, C.M.G.

*2nd Secretary*—H. W. Kennard.

*Vice-Consul*—H. B. Johnstone.

There is also a Consul at Dar-al Baida and Fez, Vice-Consuls at Dar al Baida, Larache, Mazagan, Rabat, Safi, Tetuan, Mogador, and Marakesh, and Consular Agent at Alcazar and Arzila.

## NEPÁL

An independent Kingdom in the Himalayas, between  $26^{\circ}25'$  and  $30^{\circ}17'$  N lat., and between  $80^{\circ}6'$  and  $88^{\circ}14'$  of E. long., its greatest length 500 miles, its greatest breadth about 150, bounded on the north by Tibet, on the east by Sikkim, on the south and west by British India.

The sovereign is His Highness Mahárájadhírāja Tribhuvana Śrī Bikram Jang Bahadur Śhah Bahádur Śhamsher Jang, who was born on June 30, 1903, and succeeded his father on December 11 1911. The government of Nepal is a military oligarchy. All power is in the hands of the Prime Minister, to whom it was permanently delegated by the Mahárájadhírāja Surendra Bikram Śhah under pressure of the Bháradára or nobles of the State in 1867. The present Prime Minister is Mahárája Śrī Chandrá Śhamsher Jang, Bahádur Rana, G.O.B., G.C.S.I., G.C.V.O., D.C.L., who was appointed on June 26, 1901. He holds the rank of Major General in the British army.

The Gurkhas, a Rájput race originally from Udaipur in Rajputana, who had settled in the province of Gurkha in Nepal, overran the whole country during the latter half of the eighteenth century, and have maintained their supremacy ever since. About 1790 a Gurkha army invaded Tibet, and to avenge this affront the Chinese Emperor, Kuen Lung, in 1791, sent an army into Nepal, which compelled the Gurkhas to submit to the terms of peace, by which the Nepal Durbar agreed to restore the booty taken from the Tibetans, and to send a deputation to Peking with a petition and presents for the Emperor of China once in five years. A commercial treaty between India and Nepal was signed in 1792, and a British Resident was sent to reside at Katmandu, but was recalled two years later. A frontier outrage, in 1814, compelled the Indian Government to declare war, and a British force advanced to within three marches of the capital. Peace was concluded and the Treaty of Segowlie signed on December 2, 1815. Since then the relations of the British with Nepal have been friendly. In 1854 hostilities broke out between the Nepalese and Tibetans, and in 1856 a Treaty was concluded between the Nepalese and Tibetan Governments by which the Tibetans bound themselves (a) to pay an annual tribute of Rs. 10,000 to Nepal, (b) to encourage trade between the two countries and (c) to receive a Representative of Nepal at Lhasa.

In accordance with the treaty of Segowlie, a British Resident, with a small escort of Indian sepoy, lives at the capital, but he does not interfere in the internal affairs of the State.

Area about 54,000 square miles, population estimated at about 5,000,000. The estimated gross revenue is 15,000,000 Rupees. The races of Nepal, besides the dominant Gurkhas, include earlier inhabitants of Tartar origin such as Magars, Gurungs, Newars, and Bhutias.

Capital, Katmandu; population about 50,000.

Hinduism of an early type is the religion of the Gurkhas, and is gradually but steadily overlaying the Buddhism of the primitive inhabitants. The people are in general prosperous. Charitable hospitals have been built at Katmandu, Bhatgaon, Birganj, Palpa and Bhimphedi, and a dispensary at Doti.

There is a standing regular army of about 30,000, organized in battalions and armed with Martini Henry rifles. An irregular force, nearly as numerous, is armed with old Snider and Enfield rifles. The artillery force has about 250 guns, two batteries being light field pieces, fairly modern, but the rest old

smooth bore muzzle-loading guns. Facilities are given for the recruitment of Gurkhas for the Indian army.

The trade of Nepal with British India during three years ending March 31, 1912, has been as follows (including treasure) —

From or to Nepal	1909-10	1910-11	1911-12
	Rs	Rs.	Rs.
Imports into India	3,28,85,162	3,72,40,486	4,54,14,135
Exports from India	1,61,37,875	1,71,82,847	2,26,06,650

The principal articles of export are cattle, hides and skins, opium and other drugs, gums, resins and dyes, jute, wheat, pulses, rice and other grains, clarified butter, oil seeds, spices, tobacco, timber, saltpetre. The chief imports are cattle, sheep and goats, salt, spices, sugar, tobacco, drugs and dyes, petroleum, leather, brass, iron and copper ware, raw cotton, twist and yarn, silk, cotton and woollen piece goods.

The silver mohar is valued at 6 annas and 3 pies of British Indian currency. Copper pice, of which 50 go to a silver mohar, are also coined. The Indian rupee passes current throughout Nepal.

*British Resident* — Lt. Colonel H. L. Showers, C S I C I E

## NETHERLANDS (THE)

(KONINKRIJK DER NEDERLANDEN)

### Reigning Sovereign

**Wilhelmina Helena Pauline Maria**, born August 31, 1880, daughter of the late King Willem III, and of his second wife, Princess Emma, born August 2, 1858, daughter of Prince George Victor of Waldeck, succeeded to the throne on the death of her father, November 23, 1890, came of age August 31, 1898, and was crowned September 6 of that year, married to Prince Henry of Mecklenburg Schwerin, February 7, 1901. Offspring Princess Juliana Louise Emma Marie Wilhelmina, born April 30, 1909.

The royal family of the Netherlands, known as the House of Orange, descends from a German Count Walram, who lived in the eleventh century. Through the marriage of Count Engelbrecht of the branch of Otto, Count of Nassau, with Jane of Polanen, in 1404, the family acquired the barony of Broda, and thereby became settled in the Netherlands. The alliance with another heiress, only sister of the childless Prince of Orange and Count of Châllons, brought to the house a rich province in the south of France, and a third matrimonial union, that of Prince Willem III of Orange with a daughter of King James II, led to the transfer of the crown of Great Britain to that prince. Previous to this period, the members of the family had acquired great influence in the United Provinces of the Netherlands under the name of 'stadtholders, or governors. The dignity was formally declared to be hereditary in 1747, in Willem IV, but his successor, Willem V, had to fly to England, in 1795, at the invasion of the French republican army. The family did not return till November, 1813, when the fate of the old United Provinces, released from French incorporation, was under discussion at the Congress of Vienna. After various diplomatic negotiations, the Belgian provinces, subject before the French revolution to the House of Austria, were ordered by the Congress to be joined to the Northern Netherlands, and the whole to be erected into a kingdom, with the son of the last stadtholder, Willem V, as hereditary sovereign. In consequence, the latter was proclaimed King of the Netherlands at the Hague on the 16th of March, 1815, and recognised as sovereign by all the Powers of Europe. The union thus established between the northern and southern Netherlands was dissolved by the Belgian revolution of 1830, and their political relations were not readjusted until the signing of the treaty of London, April 19, 1839, which constituted Belgium an independent kingdom. King Willem I abdicated in 1840, bequeathing the crown to his son Willem II, who, after a reign of nine years, left it to his heir, Willem III. This king reigned 41 years, and died in 1890, in default of male heirs, he was succeeded by his only daughter Wilhelmina.

The Sovereign has a civil list of 600,000 guilders. There is also a large revenue from domains, and in addition an allowance of 50,000 guilders for the maintenance of the royal palaces. The family of Orange is, besides, in the possession of a very large private fortune, acquired in greater part by King Willem I. in the prosecution of vast enterprises tending to raise the commerce of the Netherlands.

## Government and Constitution

## I CENTRAL GOVERNMENT

The first Constitution of the Netherlands after its reconstruction as a kingdom was given in 1815, and was revised in 1848 and in 1887. According to this charter the Netherlands form a constitutional and hereditary monarchy. The royal succession is in the direct male line in the order of primogeniture; in default of male heirs, the female line ascends the throne. In default of a legal heir, the successor to the throne is designated by the Sovereign and a joint meeting of both the Houses of Parliament (each containing twice the usual number of members), and by this assembly alone if the case occurs after the Sovereign's death. The age of majority of the Sovereign is 18 years. During his minority the royal power is vested in a Regent—designated by law—and in some cases in the State Council.

The executive power of the State belongs exclusively to the Sovereign, while the whole legislative authority rests conjointly in the Sovereign and Parliament, the latter—called the States General—consisting of two Chambers. The Upper or First Chamber is composed of 50 members, elected by the Provincial States from among the most highly assessed inhabitants of the eleven provinces, or from among some high and important functionaries, mentioned by law. Members of the First Chamber not residing in the Hague, where the Parliament meets, are allowed 10 guilders (16s. 8d.) a day during the Session of the States General. The Second Chamber of the States General numbers 100 deputies, who are elected directly.

First chamber: 18 Catholics, 10 Anti Revolutionists, 4 Protestant Party, 3 old Liberals, 15 Liberal Union.

Second chamber: 4 old Liberals, 21 Liberal Union, 25 Catholics, 21 Anti Revolutionists, 12 Protestant Party, 9 Democrats, 7 Socialists.

According to the electoral reform act, passed in 1896, voters are all male Dutch citizens not under 25 years of age, in possession of certain outward and positive signs of capacity and well being. The chief sign is the fact of payment of one or more direct State taxes (for the land tax an amount of 1 florin is sufficient). Besides these, the Reform Act admits as electors all those who can prove that they are householders, and have paid rent of houses or lodgings during a fixed term, or that they are owners or tenants of boats of not less than 24 tons capacity, or that they have been during a fixed term in employment with an annual wage or salary of at least 22½ 18s. 4d., or possess a certificate of State interest of at least 100 florins, or a savings bank deposit of at least 50 florins, or the legal qualifications for any profession or employment. The mode of voting adopted is based upon the *condors* system. Voting is not compulsory. The electoral body numbered January 1, 1912, 891,279 voters, i.e. 63.4 per cent of the number of male citizens of 25 years and older.

The members of the Second Chamber receive an annual allowance of 2,000 guilders (166l.), besides travelling expenses. They are elected for 4 years, and retire in a body, whereas the First Chamber is elected for 9 years, and every 3 years one third retire by rotation. The Sovereign has the power to dissolve both Chambers of Parliament, or one of them, being bound only to order new elections within 40 days, and to convoke the new meeting within two months.

The Government and the Second Chamber only may introduce new bills, the functions of the Upper Chamber being restricted to approving or rejecting them, without the power of inserting amendments. The meetings of both Chambers are public, though each of them, by the decision of the majority, may form itself into a private committee. The minister

may attend at the meetings of both Chambers, but they have only a deliberative vote unless they are members. Alterations in the Constitution can be made only by a bill declaring that there is reason for introducing those alterations, followed by a dissolution of the Chambers and a second confirmation by the new States-General by two thirds of the votes. Unless it is expressly declared, the laws concern only the realm in Europe, and not the Colonies. The executive authority, belonging to the Sovereign, is exercised by a responsible Council of Ministers. The names of the members of the Ministry are —

1 *The Minister of the Interior* — Dr Th. Heemskerk, appointed February 11, 1908

2 *The Minister of Foreign Affairs* — Jhr Dr R. de Marées van Swinderen, appointed February 12, 1908

3 *The Minister of Finance* — Dr M. J. C. M. Kolkman, appointed February 12, 1908

4 *The Minister of Justice* — Vacant

5 *The Minister of the Colonies* — J. H. de Waal Maleff, appointed August 16, 1909

6 *The Minister of Defence* — H. Colijn, appointed Jan. 1, 1911

7 *The Minister of Public Works (Waterstaat)* — Dr L. H. W. Reijnders, appointed January 21, 1909

8 *The Minister of Agriculture, Commerce and Industry* — A. S. Tasma, appointed February 12, 1908

The Ministries of War and Marine were united in that of Defence in May, 1912.

Each of the above Ministers has an annual salary of 12,000 guilders, or 1,000*l.*

There is a State Council — 'Raad van State' — of 14 members, appointed by the Sovereign, of which the Sovereign is president, and which is consulted on all legislative and a great number of executive matters.

## II LOCAL GOVERNMENT

The territory is divided into 11 provinces and 1,123 communes. Each province has its own representative body, 'the Provincial States'. The members are elected for 6 years, directly from among the male Dutch inhabitants of the province who are 25 years of age, one-half of the number being subject to re-election or renewal every 3 years. Except that they must be inhabitants of the province, the electors, as well as the mode of voting, are the same as for the Second Chamber. The number of members varies according to the population of the province, from 26 for Holland (South) to 35 for Drenthe. The Provincial States are entitled to make ordinances concerning the welfare of the province, and to raise taxes according to legal precepts. All provincial ordinances must be approved by the Crown. The Provincial States exercise a right of control over the municipal politics. They also elect the members of the First Chamber of the States-General. They meet twice a year, as a rule in public. A permanent commission composed of 6 of their members, called the 'Deputed States,' is charged with the executive power in the province and the daily administration of its affairs. This committee has also to see the common law executed in the province. Both the Deputed as well as the Provincial States are presided over by a Commissioner of the Sovereign, who in the former assembly has a deciding vote, but in the latter named only a deliberative vote. He is the chief magistrate in the province. Only the members of the Deputed States receive an allowance.

The communes form each a Corporation with its own interests and rights, subject to the general law. In each commune is a Council, elected for six

years directly, by the same voters as for the Provincial States, provided they inhabit the commune, one third of the Council retiring every two years. All the male Dutch inhabitants 23 years of age are eligible, the number of members varying from 7 to 45 according to the population. The Council has a right of making and enforcing by laws concerning the communal welfare. The Council may raise taxes according to rules prescribed by common law, besides, each commune receives from the State Treasury an allowance proportioned to the total number of its inhabitants and to the share which its non-contributing inhabitants have failed to pay towards local taxes. All by-laws may be vetoed by the Sovereign. The Municipal Budget and the resolutions to alienate municipal property require the approbation of the Deputed States of the province. The Council meets in public as often as may be necessary, and is presided over by a Mayor, appointed by the Sovereign for 6 years. The executive power is vested in a college formed by the Mayor and 2-6 Aldermen (wethouders), elected by and from the Council, this college is also charged with the execution of the public law. The Municipal Police is under the authority of the Mayor, as a State functionary the Mayor supervises the actions of the Council, he may suspend their resolutions for 30 days, but is bound to inform the Deputed States of the province.

### Area and Population

Provinces	Area English square miles	Population		Per sq. mile 1911
		Dec. 31 1911	Dec. 31 1910	
North Brabant	1,480	689 507	638,156	323
Gelderland	1 965	654 819	647 567	332
South Holland	1 106	1 443,867	1 415,097	1 309
North Holland	1 070	1 178 431	1 122 996	1 064
Zeeland	680	235 007	234 191	341
Utrecht	534	244 030	242,131	552
Friesland	1,282	264 415	261,998	204
Overijssel	1 291	391 741	387 861	308
Groningen	790	288 717	251,248	472
Drenthe	1 030	178,601	176 143	178
Limburg	850	348,467	340,668	410
Total	12,648	6 922 452	6,940 165	475

The rate of increase in each year has been:—

In 1830	0.6	In 1900	1.47	In 1908	1.86
" 1890	1.18	1905	1.49	1911	1.29

Of the total population in 1911 there were 2,983,397 males and 3,039 055 females

Year	Population of the principal Towns <sup>1</sup>	Percentage of the whole Population	Rural Population	Percentage of the whole Population
Dec. 31, 1889	1,411,534	31.2	3,099,831	68.7
" " 1899	1,602,032	38.9	3,187,432	61.06
" " 1911	2,444,376	48.02	2,574,189	49.99

<sup>1</sup> The towns with a population of more than 20,000 inhabitants.

The census of Dec. 1909 gives us a population of 5,858,175 —

	Males	Per cent	Females	Per cent.
Unmarried	1 806,388	30.8	1 770 938	30.2
Married	980,961	17.4	992,171	16.9
Widowers and widows	96 369	1.6	186 735	3.2
Divorced and separated	5 324	0.09	8 164	0.14

The Dutch like the Flemish belong to the Low German branch of the Germanic race.

At the census of 1909 there were 69,975 persons of foreign birth living in the Netherlands, 37,532 of them being Germans, 18 336 Belgians, 2,102 English, and 12,005 from other countries. 3,738,775 persons were born in the communes where they lived, 1,249,741 in some other communes in the province, 764,201 in other provinces of the realm, and 15,031 in the Dutch colonies.

## II. MOVEMENT OF THE POPULATION

Years	Total Living Births	Illegitimate	Deaths	Marriages	Surplus of Births over Deaths	Stillborn
Average						
1884-90	140 516	4 703	91 608	50 501	5 804	744
1890-96	132,452	4,868	93,419	52 700	39 047	404
1894-99	169 061	4 067	86 587	56 038	72 673	42
1899-04	164 364	3 983	87 804	59 919	80 401	302
1905-10	171 170	3 682	83 709	61 944	87,990	7 002
1910	163 984	3,614	79 984	62,740	88 910	0,447
1911	166,337	3 527	80 732	63,208	79 740	6 634

The emigration has been as follows mostly to North America. Average to different lands 1892-6 2,991, 1897-1901, 1 352 1902-06, 2,510 1907, 4,398, 1908, 3,080, 1909, 2,989 1910, 3,220, 1911, 2,638

Of the last number 1,426 were males, 604 females, and 608 children

The total number of emigrants, Dutch and foreigners sailed from Dutch ports was, in 1911, 43,838

## III. PRINCIPAL TOWNS

On December 31, 1911 —

Amsterdam	566,960	Dordrecht	47 504	Deventer	28,223
Rotterdam	428,018	Maastricht	38,233	Breda	37,250
The Hague	238 577	Leeuwarden	37 430	Heider	37,150
Utrecht	121,817	Apeldoorn	37,617	Zaandam	25 300
Groningen	77 221	Hilversum	35 137	Gouda	24,820
Haarlem	69,968	Enschede	35,448	Amersfoort	23,990
Arnhem	64,684	Delft	34 485	Visseringen	22,462
Leiden	50,133	Zwolle	32,727	Flushing	21 778
Vlaarwaken	57,116	Schiedam	32,225	Alkmaar	21,374
Tilburg	54,764	Hilversum	32 306	Heerlen	21,263

## Religion.

Entire liberty of conscience and complete social equality are granted to the members of all religious confessions. The royal family and the majority of the inhabitants belong to the Reformed Church. The State Budget contained fixed allowances for the different churches, for Protestant Churches, about 1,876,000 guilders, for Roman Catholics, about 668,000; and for Jews, about 14,000.

The number of adherents of the different churches in the various provinces, according to the census of 1899 and 1909, was as follows —

Provinces	Dutch Reformed	Other Protestant	R. Cath Church	Jansenists	Jews	Other or no creeds
N. Brabant	51,051	16,321	571,573	21	1,84	1,316
Gnelders	889,869	52,170	226,079	861	5,171	16,901
South Holland	749,276	155,800	834,064	220	18,733	10,647
North Holland	441,426	17,371	307,199	5,425	64,428	115,947
Zealand	125,967	31,093	53,974	14	381	16,191
Utrecht	147,704	36,191	92,478	1,989	1,590	8,812
Friesland	192,085	99,645	25,273	6	1,234	46,659
Overijssel	212,730	46,424	102,189	14	4,401	17,182
Groningen	197,655	72,118	20,805	23	5,686	33,298
Drenthe	125,128	28,089	10,654	51	2,186	7,286
Limburg	8,671	2,059	324,158	8	960	953
1899	2,471,621	508,111	1,790,161	8,754	103,888	132,102
1909	2,585,201	746,186	2,053,021	10,032	106,809	358,138

The government of the Reformed Church is Presbyterian. At the end of 1911 the Dutch Reformed, Walloon, English Presbyterian, and Scotch Churches had 1 Synod, 10 provincial districts, 44 classes, and 1,360 parishes. Their clergy numbered about 1,636. Ten other Protestant bodies had about 250 churches and about 260 clergymen. The Roman Catholic Church had one archbishop (of Utrecht), 4 bishops, 1,127 churches and about 2,400 clergy men. The Jansenists had 1 archbishop, 2 bishops, 27 churches, and 28 clergymen. The Jews had about 169 parishes.

### Instruction

Public instruction (primary) is given in all places where needed, religious convictions being respected. Instruction is obligatory the school age is from 6 to 13.

In 1806, and more expressly in 1848, secular instruction was separated from religious or sectarian instruction. By the Act of 1887 public instruction is diminished and a greater share in the education of the youths left to private instruction, which is now largely supported by the State. The cost of public primary instruction is borne jointly by the State and the communes. The State contributing to the salaries of the teachers and being responsible for 25 per cent. to the costs of founding or purchasing schools. The Act is supplemented by Act of 1901 and 1905.

The following table is taken from the Government returns for 1910/11

Institutions	Number	Teaching Staff	Pupils or Students
Universities (public) <sup>1</sup>	4	± 008	4,123 *
Technical University	1	± 70	1,235
Classical schools	30	461	2,818
Schools for the working people	404	973	85,654
Navigation schools	11	101	852
Middle class schools	101	1,567	14,941
Elementary Schools			
Public	3,903	18,878	568,047
Private	2,060	11,878	355,647
Infant Schools			
Public	168	—	23,165
Private	1,080	—	105,479

<sup>1</sup> Leiden, Utrecht, Groningen, Amsterdam.

<sup>2</sup> Under which 666 female students.

Besides the schools named in the table, there is a great number of special schools. Since 1880 there is also a private university, with 158 students in 1910-11, and since 1908 a government school to train functionaries of the colonial service for superior posts.

In 1910 the State spent on instruction 2,493,186<sup>l</sup>, the Communes, 1,483,666<sup>l</sup>.

Of the conscripts called out in 1911, 0.8 per cent. could neither read nor write, the percentage being highest in Drenthe, 8.6. In 1875 the total percentage was 12.3. Of the total number of children from 7 to 18 years (school age) on 15 January 1911, 4.92 per cent. received no elementary instruction.

### Justice and Crime

Justice is administered by the High Court of the Netherlands (Court of Cassation), by 5 courts of justice (Courts of Appeal), by 23 district tribunals, and by 106 cantonal courts, trial by jury is unknown in Holland. The Cantonal Court, which deals with minor offences, is formed by a single judge, the more serious cases are tried by the district tribunals, formed as a rule by 3 judges (in some cases one judge is sufficient), the courts are constituted of 3 and the High Court of 5 judges. All Judges are appointed for life by the Sovereign (the Judges of the High Court from a list prepared by the Second Chamber). They can be removed only by a decision of the High Court.

The number of persons convicted was —

	By the Cantonal Courts		By the District Tribunals	
	Male	Female	Male	Female
1906	128 187	18 968	11 834	1 178
1907	135 986	14 822	11,478	1 186
1908	145,079	16,959	12,820	1 187
1909	166,803	14,770	12,982	1 128
1910	148 167	13 851	11,400	1,230

The number of inmates in the 28 prisons during 1910 was 10,124 males and 568 females, in the houses of detention, 27,029 males and 1,577 females (persons convicted). There are also 5 State work-establishments specially for drunkards, beggars and vagabonds. The number of inmates was, during the year 1910, 3,973 males and 90 females. Children under 16 years, placed in the 5 State reformatories, numbered in 1910 708 boys and 70 girls. In 1904 an act was passed, establishing several (6) disciplinary schools for the education of children, gravely neglected by their parents. There are both State and communal police. The State police consists of field constables and cavalry. The former are spread over the country, the latter guard the frontiers (eastern and southern). The cavalry police (*maréchaussée*) numbers about 20 officers and 1,000 men. There are about 960—appointed and paid by the Government—field constables, divided into numerous brigades. Besides each commune has its own field-constables or police force.

### Pauperism.

The relief of the poor is largely effected by the religious societies and organised private charity. The State does not interfere, except when no relief is to be obtained from private charity, in that case the pauper must be supported by the commune where he is living. There is no poor rate in the Netherlands. Mendicity and vagabondage are treated as a crime, and persons so convicted can be placed in a State-work establishment. Workhouses for the poor are found in very few communes.

The number of poor relieved, either temporarily or continuously, during the year 1909 was 311,626, in asylums, 41,438, insane in hospitals, 10,152.

### Finance

The revenue and expenditure in five years were (12 guilders = £1) —

#### REVENUE

Year	Ordinary	Extraord. (loans &c.)	Total
	Guilders	Guilders	Guilders
1907	183 016 000	519,533	183,535,533
1908	183 49 19	508,788	183 490 983
1909	189 170 000	1 128 600	191 808 600
1910	193 630 497	1 461,827	195 092 324
1911	208,812,872	1 919 954	210 732,826

#### EXPENDITURE

Year	Defence	Debt	Public Works	General	Total
	Guilders	Guilders	Guilders	Guilders	Guilders
1907	42 855 325	83 067 267	18 604,060	90,486 821	134,918 720
1908	40 301 039	80,008,151	18 650 431	98 082,242	136,041 863
1909	46 737 506	38,858,520	18 069 867	101 068 318	144,734 211
1910	47 572,752	85,579 047	18 082 779	106 717 619	158 952 197
1911	49 360,705	86 410 323	18 044 026	110,134 410	163 949 464

Budget estimates for the years 1912 and 1913, were as follows

Branches of Expenditure	1912	1913	Sources of Revenue	1912	1913
	Guilders	Guilders		Guilders	Guilders
Civil list	945 000	945,000	Direct taxes —		
Legislative body			Land tax	15,970,000	15,890 000
and Royal cabinet	768 000	786 614	Personal	12,185 000	12,635 000
Department of Foreign Affairs	1,254,048	1 370 668	Tax on capital	10,100,000	10,890 000
Department of Justice	10 963,524	11,202,070	Tax on incomes from trades, professions, &c.	10,078,000	10 807,000
Department of Interior	87 187 811	38 822 481	Excise duties	59,650,000	60,220 000
Department of Marine	20 834 610	20,129 704	Indirect taxes	29,550 000	29,876 000
Department of Finance	20 080,714	30 670,868	Import duties	18,534,750	18,822 800
Department of War	30,329 059	23,368 978	Tax on gold & silver	470,500	500,500
Public Works, &c.	39,711,844	41 068,359	Domains	1 652,000	1,471 000
Department of Agriculture, etc.	10,876,419	11 992,064	Post office	16,688,000	17 555,000
Department of Colonies	2,712,887	2,680,698	Telegraph service	4 572,000	5,237 000
Public Debt	37 843,878	38,027,430	State lottery	554,500	664,500
Contingencies	60,000	50,000	Pilot dues	2,300,000	2,460,000
			Dues on mines	8,500	30 000
			State railways	4 108,140	4 158,140
			Part paid by the West Indies in the interest and sinking fund of public debt	8 668,000	8,000,000
			Share in the profits of the Bank of the Netherlands	2,392,000	2,495,000
			Miscellaneous receipts	18,590,635	18,907,619
Total expenditure	223,017,902	233,319,068	Total revenue	207,898,212	208,561,459
	(110,000,000)	(110,000,000)		(110,000,000)	(110,000,000)

The amount of the chief taxes per head of the population was, in 1911, 25.21 guilders (2l. 8s. 8d.)

The expenditure of the 'Department for the Colonies' entered in the budget estimates only refers to the central administration. There is a separate budget for the great colonial possessions in the East Indies, voted as such by the States-General. The financial estimates for the year 1913 are distributed between the colonies and the mother country in the following proportions —

Expenditure in the colonies.	Guilders
Rece Government expenditure	227 381 32.
	47,125 688
Total expenditure	294 457 014
Revenues in the mother country	37 218 500
" " colonies	222 000 608
Total revenue	254 219,208

In the budget for 1913 the national debt is given as follows —

	Nominal Capital	Annual Interest
Funded Debt	Guilders	Guilders
3½ per cent. debt	587 704 400	14 002,610
5 " debt of 1896, 1898, 1899 and 1900	518 633,150	15,301 065
4 " debt of 1910	51 917,600	1 817 420
Total	1 158 255 150	32,011 221
Floating debt	—	400 000
Annuities	—	88 100
Sinking fund	—	4, 22 000
Total debt	1 158 255 150 (26 304,8711)	38 092,480 (8,160 8691)

For 1912 the interest of the funded debt was 32,214,450 guilders, and the sinking fund 5,381 000 guilders.

During the years 1850-1912 359 775 427 guilders have been devoted to the redemption of the public debt. The total debt (1912) amounts to 1,158,257,708 gld or 16l 4s per head and the annual charge to 32,214,454 or 8s. 11d. per head.

The rateable annual value of buildings was given at 187,172,851 guilders in 1911, and of land, 97,801,505 guilders.

The various provinces and communes have their own separate budgets, the provincial expenditure for 1909 was 10,642,566 guilders, the revenue at 11,417,927 guilders, the communal expenses in 1909 amounted to 176,606,600 guilders, whereof 41,877,000 guilders for debt. The communal revenues were, in the same year, 181 553,000 guilders.

## Defence

### I. FRONTIER.

The Netherlands are bordered on the south by Belgium, on the east by Germany. On the former side the country is quite level, on the latter more hilly, the land frontier is open all round. The frontiers are defended by few fortresses. The scheme of defence adopted in 1874 contemplates concentration of the defensive forces in a restricted area, known as the "Holland Fortress." This comprises the provinces of North and South Holland, with parts of Zealand and Utrecht. Two-thirds of the area is

surrounded by the sea. On the land side, to the East and South, are lines of more or less permanent works, which can be rendered very difficult of attack by inundations. There are also strong works on the coast, notably the Helder group, barring access to the Zuiderzee, and the Hollandsch Diep and Volkerak position, while the entrances to the Amsterdam and Rotterdam ship canals are defended by powerful forts. The citadel of the whole is Amsterdam, which is well fortified. Here also inundations would almost preclude a successful attack. The coast defences are in good order and are to be further strengthened, but the defences on the land side have of late years been neglected. Moreover, the control of the inundations is not entirely in military hands.

Apart from the Holland Fortress are the works on the Western Schelde. These have hitherto been unimportant, but it is now proposed to augment them by entirely new works at Flushing, apparently with the idea of closing the Schelde, which has long been regarded as practically a neutral river.

## II ARMY

According to an Act of 1912, service in the army is partly voluntary and partly compulsory. The voluntary enlistments bear a small proportion to the compulsory. Every Dutch citizen is liable to personal service in the army (or navy) from the age of 19. Actual service in the ranks is determined by lot, but substitution is not permitted. The maximum strength of the annual contingent is fixed at 23,000 (including 600 for the sea service).

The engagement of voluntarily enlisted men is for 10 years, of which only 2 or 3 years (according to the arm of the service) are with the colours, but many re-engage to become non-commissioned officers. The conscripted militiamen belong to the active army for 6 years for the unmounted corps, and 8 years for the mounted corps (sea service 5 years). The 'full training' time is 8½ months in the infantry, engineers, and garrison artillery (under certain circumstances 6½ months), and 24 months in the cavalry, horse and field artillery. A certain proportion of the full course men of the infantry and garrison artillery (between 3,800 and 4,500 men, designed by lot) are retained for an additional 4½ months. The full course men are called up in two batches, half in January (March), half in October.

With regard to further training, men belonging to mounted corps are liable to be called out once in their army service for 4 weeks, the others once for 4 and the second time for 3 weeks.

After having fulfilled their active service the militiamen pass to the 'landweer' for 7 years, they can be called out twice in their 7 years, but for 3 days only on each occasion. Men of mounted corps and of the navy are excused from landweer service.

The landweer forces are organised in units corresponding to those of the first line, except that there are no mounted troops. Cadres are maintained in time of peace for the landweer formations.

The field army consists of 4 divisions and an independent cavalry brigade. A division contains 3 regiments (15 battalions), a field artillery regiment (6 batteries, 72 guns), a squadron of hussars, a company of cyclists, 8 machine guns, and a company of engineers. The total strength of a division in the field, with staff, would be about 19,000 officers and men. The cavalry brigade has 4 regiments, each of 2 squadrons and two batteries of horse artillery. There are also 44 fortress artillery companies. The landweer troops, with the fortress artillery of the active army, would hold the fortresses.

The peace strength of the Netherlands army, that is the permanent staffs of all the units of the first line, amounted in 1912 to 1,668 officers, and 22,686 non-commissioned officers and men. The total strength of the field army is approximately 126,000 men, with 152 guns. Military expenditure budgeted in 1912, 2,622,918. Colonial military budget, 2,068,533. It is proposed to spend about two millions sterling on the coast defences, including armament. A reorganisation of the army is pending.

The Netherlands infantry is armed with the Mannlicher magazine rifle, model 95. Cavalry and engineers carry the Mannlicher carbine. The field artillery, including the horse batteries, has lately been re-armed with a shielded Q.F. Krupp gun of 7.5 cm.

### III NAVY

The Navy is maintained for a double purpose—viz the protection of the Dutch waters and coast, and the defence of the East Indian possessions. These latter contribute to the maintenance of that division of it known as the Indian Marine.

Following is a list of the fighting ships of the Dutch Navy

Name	Displacement, Tons	Armour water line	Max Armour on gun	Principal Armament	Torpedo Tubes	Indicated Horse-power	Normal Speed, Knots	Designed
<b>BATTLESHIPS</b>								
Piet Hein	8,520	6	10½	3 8-in., 2 6-in.	2	4,800	16	'93
Beaubean								
Kortenaar								
Herwig Hendrik								
Koninklijke Begroetes	5,000	6	10	2 8 4-in., 4 6-in.	3	7,000	17	'96

There are also a small river monitor, *Reinier Oomsen*, a number of gunboats, 47 torpedo boats, and 6 submarines. Eight destroyers were added in 1911-12. Four destroyers building, also 3 gunboats.

The new programme contemplated four large battleships, besides lesser craft.

The navy was officered in 1911 by 3 vice-admirals, 4 rear admirals ('schouten-bijzucht'), 49 captains, 86 commanders, and about 580 lieutenants and midshipmen, besides engineers, surgeons, &c., and about 8,500 seamen. The marine infantry consists of about 48 officers, and about 2,600 non-commissioned officers and privates. Both seamen and marines are recruited by enlistment, conscription being allowed, but not actually in force.

# Production and Industry

## I AGRICULTURE

The surface of the Netherlands was divided in 1911 as follows (in hectares 1 hectare=2.47 acres) —Uncultivated land (heath), 533,807, water and moorss, 123,853, dykes and roads, 53,050, untaxed land 78,064 building land, houses, &c 47,766 Total, 836,680 ha Cultivated land arable land, 872,171, pasture, 1 213,073, gardens and orchards, 78,097, forest, 260,923 Total, 2,424 284 ha

Large estates prevail in the provinces of Zealand, South Holland, Groningen, and North Holland small estates in North Brabant, Guelders, Lamburg, and Overijssel.

The number of estates was in 1910 —5 hectares and less, 109,605; from 5 to 10 hectares, 41,439, from 10 to 20 hectares, 30,821, from 20 to 50 hectares, 23,797, from 50 to 100 hectares 3,278, above 100 hectares, 216 49.2 per cent. of all estates being held by farmers, and 50.8 per cent. by the owners. In 1899 the percentage was 48.6 and 51.4.

The areas under the principal crops, in acres, were as follows —

Products.	1910	1911	1912	Products	1910	1911	1912
	Acres	Acres	Acres		Acres	Acres	Acres
Winter wheat	120 707	183 083	183 065	Potato seed	652	1 000	1 007
Summer wheat	10 167	10 182	9 140	Flax	70 370	89 277	87 155

Fruits	1 166 000	2 138 000	4 846 000	2 546 000

## II MINING AND MANUFACTURES

A few coal mines are found in the province of Limburg, most of them belong to the State. The quantity of coal extracted in 1911 was 1,478,580 metric tons, valued at 9,488 000 gl., clear revenue of the State mines, 218,487 gl.

There are no official returns of all the manufacturing industries. According to the last reports there were, in 1911 434 distilleries, 11 sugar refineries, 27 beet sugar refineries, 31 salt works, 437 breweries and 69 vinegar manufacturing factories.

## III FISHERIES

In 1910, 5,370 vessels of all kinds were engaged in the fisheries, with crews numbering about 20,461. The produce of the herring fishery in the North Sea was valued at 11,049,893 guilders in 1911. The quantity of oysters produced in 1911 amounted to 3,256,691 kilos.

## Commerce

The Netherlands is a free trading country. A few duties are levied but they have only a fiscal, not a protectionist character.

Treaties of commerce and navigation between the Netherlands and Great Britain (some of them having special reference to the colonies) were signed in 1824 1857, 1861 1866, and 1888 providing amongst other matters, for the most favoured nation treatment, for minimum on a year's notice.

No official returns are kept of the value of the general trade, but only of the weight of the goods. In 1872 the total imports were estimated at 6,451 million kilogrammes, and the exports at 2,956 millions, while in 1911 the former were 50,865 million kilogrammes, and the latter 38,872 millions, exclusive of goods in transit.

The following are the estimates of the imports for home consumption and the exports of home produce for five years —

Year	Imports	Exports	Transit trade
	Guilders	Guilders	Kilogrammes
1907	2,582,000,000	2 212,000 000	9 606,000,000
1908	2,534,000,000	2,191,000 000	9 273,000,000
1909	2,187,000,000	2,465,000,000	10 773,000,000
1910	2,164,000,000	2,622,000,000	12,664,000,000
1911	2,883,000,000	2,724,000,000	17,699,000,000

The values of the leading articles of import and export in the last two years were (in thousands of guilders, 12 guilders = 11) —

	Imports		Exports	
	1910	1911	1910	1911
Iron and steel of all kinds	869 406	402 484	264 808	296 040
Textiles raw and manufactured	118,748	128 788	128 703	123,190

France	39 0	1 2	Italy	22 0	0 4
Hamburg	56 0	1 7	Russia	1 4	0 0

In the Netherlands the statistics give sometimes the real, sometimes the official, value of goods. For goods liable to an *ad valorem* import duty and for some articles duty-free the importer has to declare the real value according to the current prices of the day, in case of disagreement, the fiscal authorities may acquire the goods at the declared value increased 10, 11, or 12 per cent. To other goods the official value, unchanged since 1902, are applied. Every declaration of imports and of exports is, in principle, subject to verification, but in fact only those relating to goods subject to duty are checked. Returns are made out in gross weight, in net weight (with deduction of an official tare), in number or in value according to the nature of each case. When goods are imported or exported by river the neighbouring country is always regarded as the country of origin or of destination, thus imports really from France are attributed to Belgium. When transport is by sea, generally the real country of origin is given, thus Spanish wines are set down as from Spain, unless they have been imported first into some other country, in which case they are attributed to that country.

The principal articles of trade between the United Kingdom and the Netherlands (Board of Trade Returns) in two years were —

Imports into U K from Netherlands	1910	1911	Exports of produce and manuf. of U K. to Netherlands	1910	1911
	£	£		£	£
Peas	115,912	166,640	Cottons	1,117,063	1,178,862
Rice	435,046	481,700	Cotton yarn	1,768,981	1,975,784
Eggs	250,770	282,606	Coal	1,161,288	1,064,127
Fish	230,085	194,787	Iron	1,251,180	1,414,140
Cheese	66,360	636,037	Machinery	479,224	589,770
Butter	843,818	686,479	New ships, &c	223,957	248,819
Margarine	2,782,636	2,331,068			
Paper &c.	1,018,661	1,064,040			
Sugar	2,048,734	2,868,534			
Hides	151,130	112,917			
Oil seed	721,266	622,626			
Condensed milk	796,937	1,908,068			

Much of the trade here entered as with the Netherlands consists of goods on transit from and to Germany, notably the imports of silk goods and metal goods.

Total trade between the Netherlands and the United Kingdom (in thousands of pounds sterling) for 5 years —

	1906	1907	1910	1911	1912
	£	£	£	£	£
Imports from Netherlands to U K	10,119	16,830	14,827	18,065	21,440
Exports to Netherlands from U K	11,407	11,718	12,400	13,112	14,305

### Shipping and Navigation

The number of vessels belonging to the mercantile navy at the end of 1911 was —

Sailing vessels 428, of 42,480 English tons, steamers 347, of 524,274 English tons.

The following table gives the number and tonnage (in English measure ment) of vessels which entered and cleared the ports of the Netherlands —

Year	With Cargo		In Ballast		Total	
	No.	Tonnage	No.	Tonnage	No.	Tonnage
1907	18,507	13,463,782	713	546,124	19,220	14,009,906
1908	17,000	12,071,430	813	602,438	17,813	12,673,868
1909	17,545	12,866,966	1,181	682,080	18,726	13,549,046
1910	18,366	13,427,935	1,515	881,800	19,881	14,309,735
1911	18,507	14,761,978	1,780	716,404	20,287	15,478,382
<i>Cleared.</i>						
1907	8,326	7,186,814	6,577	5,820,445	14,903	13,007,259
1908	8,000	7,143,364	6,961	5,796,304	14,961	12,939,668
1909	8,169	7,869,754	6,936	6,042,424	15,105	13,912,178
1910	10,000	8,974,904	6,862	6,251,114	16,862	15,226,018
1911	10,507	9,581,864	6,228	6,174,396	16,735	15,756,260

Of the total number in 1911, 4,523 Dutch vessels entered with a tonnage of 4,082,328 and 11,105 foreign vessels with a tonnage of 11,416,500. 4,702 Dutch vessels cleared, with a tonnage of 4,127,994, and 11,208 foreign vessels with a tonnage of 11,277,378.

The vessels with cargoes which entered at the chief ports were as follows —

Port	Entered					
	1910			1911		
	Number	Tons	per cent.	Number	Tons	per cent.
Rotterdam	7,718	8,914,428	68.4	401	10,231,908	71.3
Amsterdam	1,902	1,961,514	14.8	1,987	1,942,752	13.5
Flushing	782	796,006	7.7	791	795,792	5.6

  

Port	Cleared					
	1910			1911		
	Number	Tons	per cent.	Number	Tons	per cent.
Rotterdam	5,867	5,909,876	59.8	854	5,658,880	65.7
Amsterdam	1,425	1,424,830	14.4	1,447	1,468,746	17.1
Flushing	801	811,803	8.1	800	788,112	9.2

A great number of Dutch vessels is engaged in the carrying trade between foreign ports. The coasting trade is of no importance.

## Internal Communications

### I CANALS AND RAILWAYS

The total extent of the canals was in 1879 1,907 miles, of roads, 2,843 miles. In 1910 the total length of the principal tramway lines was 1,477 miles, 169,345,000 passengers were carried, and 1,420,792,000 kilogrammes of goods. Their revenue amounts to 19,900,000 guilders.

In 1911 the railways had a length of 1,984 miles. The breadth of the railway gauge is 1.50 metre, or 4 ft. 11 in.

The results of the railway companies in the last five years were —

Year	Passengers carried	Goods carried (metric tons)	Revenue (guilders)	Expenditure (guilders)
1907	40,972,000	15,208,000	54,106,000	47,935,000
1908	42,005,000	15,479,000	55,940,000	49,289,000
1909	43,156,000	15,494,000	57,539,000	50,804,000
1910	46,221,000	16,051,000	60,242,000	51,711,000
1911	44,674,000	17,739,000	64,679,000	54,418,000

All railway companies are private, there is a State railway company, only so named because the road is owned by the State.

### II POST AND TELEGRAPHS

The postal traffic was as follows in 2 years. —

	Letters	Post Cards	Newspapers and Printed Matter	Parcels	Letters with Money Orders
1910					
Internal	112,293,000	89,525,904	240,770,000	5,802,658	500,966
Foreign	51,846,000	16,568,451	26,957,000	1,619,810	118,385
1911					
Internal	115,083,000	90,540,632	257,608,546	6,053,689	497,742
Foreign	50,205,000	17,039,307	37,738,609	1,702,967	121,132

The average number of letters and post-cards per inhabitant was 45.8 in 1911.

The receipts of the Post Office in 1911 were 16,685,000 guilders, the expenditure 14,018,000 guilders.

There are several private telegraph lines, but most of the lines are owned by the State. The length of State lines on Dec. 31, 1911 was 4,729 miles, the length of wires 23,534 miles. The number of State offices was, on December 31, 1911, 1,072. The number of paid messages by State lines in 1911 was 6,404,000. The receipts of the State amounted in the same year to 2,582,000 guilders, and the ordinary expenses to 4,365,000 guilders.

In 1911 the interurban telephone system had 1,909 miles of line and 46,654 miles of wire, and is administered by the State. 4,901,342 interurban and 633,573 international conversations were held. The receipts were in the same year for interurban and international intercourse 2,074,000 guilders, the total expenses 1,763,000 guilders.

### Money and Credit.

The money in general circulation is chiefly silver. Before 1875 the Netherlands had the silver standard, but a bill which passed the States General in the session of 1875 allowed an unrestricted coinage of ten guilder pieces in gold, whereas the coinage of silver was suspended for an unlimited time.

The total circulation, except the metal stock of the Bank, was valued as follows in thousands of guilders —

Jan. 1	Silver, &c.	Gold	Paper money	Total	Gold, or covered by gold at the Bank was in total
1907	66,529	17,551	274,448	358,628	66,427
1908	120,852	47,807	232,468	451,127	91,790
1909	108,587	47,807	237,918	444,312	101,052
1910	104,225	47,807	280,553	432,585	120,980
1911	87,162	47,807	288,270	418,239	124,771

Value of money minted during the following years (in thousands of guilders) —

Year	Gold	Silver	Copper and Nickel	For the East India Colonies	Total value	Total number of pieces
1881-90	4,030	1,433	846	2,660	8,956	111,768,000
1891-1900	4,540	12,235	470	7,496	24,791	340,574,099
1901-10	990	24,990	1,305	15,035	52,097	404,679,000
1909	—	2,790	25	2,255	5,980	47,980,000
1910	—	2,445	—	8,000	6,445	29,130,000
1911	7,750	2,800	25	2,000	12,570	22,275,000

The Bank of the Netherlands is a private institution, but it is the only one which has the right of issuing bank notes. This right was granted in 1808 for 25 years, in 1838 prolonged for 15 years, and prolonged again for the same term in 1903, with some alterations in the conditions, e.g. all the paper money is to be issued by the Bank. The Bank does the same business as other banks only with more guarantees. Two fifths of the paper money in circulation must be covered. It has agencies in all places of importance.

Year	Notes in Circulation March 31	Total Exchanges March 31	Stock of Gold in July	Stock of Silver in July
	1 000 guilders	1 000 guilders	1,000 guilders	1,000 guilders
1908	265 947 760	658 854 720	22,500	50,500
1909	273,578,470	680,060 202	121,420	42,270
1910	280,552,730	706 277,050	109,770	27,080
1911	283,270,075	752,832 075	139,690	22,240
1912	298,964 980	783,720,425	145 070	11 380

The capital amounts to 20 000 000 guilders, the reserve fund to 5,500,000 guilders. The Bank keeps the State Treasury and the cash of the State Postal Savings-Bank and of other institutions. It receives  $3\frac{1}{2}$  per cent. of the clear gains, the remainder is divided between the State and the Bank in proportion of 2 : 1.

There are many savings-banks, all private. Besides these there is a State postal savings bank, established in 1881. The following table gives some particulars of both —

Year	Number of Savings Banks	Amount deposited (in 1 000 guilds.)	Amount withdrawn (in 1 000 guilds.)	Total Deposits at end of year (in 1 000 guilds.)	Number of Depositors at end of year	Amount per inhabitant. Guilds.
1907	—	—	—	—	—	—
State P. S. B.	—	59,208	68 190	145,404	1 334 846	25.82

State P. S. B.	—	81 268	79 065	170 901	1 550 950	28.29

The reserve fund of the private savings banks amounted in 1910 to 15,878,000 guilders, of the State P. S. B. 848,314 guilders in 1911.

### Money, Weights, and Measures

#### MONEY

The standard coin is the 10 florin piece weighing 6 720 grammes, .900 fine, and thus containing 6 048 grammes of fine gold. The unit of the silver coinage is the guilder or florin, weighing 10 grammes, .845 fine and containing 9.45 grammes of fine silver.

Gold is legal tender, and the silver coins issued before 1875

The principal coins are —

The *guilder*, *guilder*, or *florin* of 100 cents. = 1 sh 8d ; or 12 g = £1

The *ryksdaalder* = 2½ guilders.

The gold-piece of ten guilders and of five guilders

½ guilder, ¼ guilder (*kwartje*), ⅓ guilder (*dubbeltje*)

Coinage are of nickel, 5 cents, of bronze, 1 cent, ½ cent, and 2½ cents

#### WEIGHTS AND MEASURES

The metric system of weights and measures, and, with trifling changes, the metric denominations are adopted in the Netherlands

### Diplomatic and Consular Representatives

#### 1 OF THE NETHERLANDS IN GREAT BRITAIN

*Envoy and Minister* — Baron Dr. H. W. P. F. Gericke van Herwynen (on leave)

*Counsellor of Legation*. — Jonkheer A. van der Goes (Chargé d'affaires)

*Chancellor* — H. N. Brouwer

*Agricultural Commissioner* — Dr. J. J. L. van Eyn.

*Consul General in London* — H. S. J. Mass, appointed 1897

Netherlands Consular representatives are at the following places in the United Kingdom —

Aberdeen	Covea.	Hull	Newcastle
Alloa.	Dartmouth	Invergorlon	Newport
Belfast.	Dover	Jersey	Plymouth
Blyth.	Dublin	Leeds	Portsmouth
Borrowstanes.	Dundee	Leith.	(Southampton)
Birmingham.	Falmouth	Lerwick	Ramsgate
Bradford.	Glasgow	Limerick	Sally Isles.
Bristol	Gloucester	Liverpool	Sheffield
Barnsteland	Goole	London	Stockton
Gardiff	Grimsby	Londonderry	Sunderland.
Carlisle.	Graugemouth	Lowestoft	Swansea
Charlestown	Guernsey	Manchester	Weymouth
Chatham.	Hartlepool	Methil	Yarmouth.
Cork.	Harwich	Middlesbrough	

#### 2 OF GREAT BRITAIN IN THE NETHERLANDS

*Envoy and Minister* — Hon. Sir Alan Johnstone, G. C. V. O., accredited December, 1910

*Secretary* — Count C. H. Bentinck

*Naval Attaché*. — Captain H. D. R. Watson

*Military Attaché*. — Lieut. Col. Hon. G. T. M. Bridges.

*British Consul at Amsterdam*. — W. A. Churchill

British Consular representatives are placed in the following places in the Netherlands. —

Amsterdam (C.)	The Hague	Rotterdam (C.).
Bouwerhaven.	Harlingen	Terneuzen.
Dordrecht.	Helder	Tiel
Flushing	Hellevaetstun.	Utrecht.
Groningen.	Meerwijk.	Ymuiden

### Colonies

The colonial possessions of the Netherlands, situated in the East Indies and the West Indies, embrace an area of about 788,000 English square miles. The total population, according to the last returns, was, approximately, 38,000,000, or about seven times as large as that of the mother-country.

## DUTCH EAST INDIES

The Dutch possessions in Asia, forming the territory of Dutch East India (Nederlandsch Oost Indië), are situated between 6° N and 11° S latitude, and between 95 and 141° E. longitude.

In 1602 the Dutch created their East India Company. This Company conquered successively the Dutch East Indies, and ruled them during nearly two centuries. After the dissolution of the Company in 1795 the Dutch possessions were governed by the mother country.

## Government and Constitution

Politically, the territory, which is under the sovereignty of the Netherlands, is divided in (1) Lands under direct government, (2) Vassal lands, (3) Confederated lands.

With regard to administration, the Dutch possessions in the East Indies are divided into *residences*, *divisions*, *regencies*, *districts*, and *decesses* (vilages). They are also very often divided into (1) Java and Madura, (2) the Outposts—Sumatra, Borneo, Riau Lingga Archipelago, Banca, Billiton, Celebes, Molucca Archipelago, the small Sunda Islands, and a part of New Guinea.

Java, the most important of the colonial possessions of the Netherlands, was formerly administered, politically and socially, on a system established by General Johannes Graaf Van den Bosch in 1832, and known as the *culture system*. It was based in principle on the officially superintended labour of the natives, directed so as to produce not only a sufficiency of food for themselves, but a large quantity of colonial produce best suited for the European market. At present, the labour of the natives is only required for the produce of coffee, which is sold by the Government partly in the colonies, but mostly in the Netherlands.

The whole of Java—including the neighbouring island of Madura—is divided into seventeen residences each governed by a Resident, assisted by several Assistant Residents and a number of subordinate officials called *Contrôleurs*. The Resident and his assistants exercise almost absolute control over the provinces in their charge, not, however, directly but by means of a vast hierarchy of native officials. The native officials receive either salaries or percentages on the amount of the taxes gathered from the natives. In the 'Outposts' the 'culture' system has never been introduced, except in the province of Sumatra, west coast, and in the *Residency of Menado* (island of Celebes), where also the labour of the natives is required for the produce of coffee. These Outposts are administered by *functionaries* with the titles of 'Governor', 'Resident', 'Assistant Resident', 'Contrôleur', &c.

The superior administration and executive authority of Dutch India rests in the hands of a Governor General. He is assisted by a Council of five members, partly of a legislative partly of an advisory character. The members of the Council, however, have no share in the executive. The Governor General and the members of the Council are nominated by the Queen.

**Governor General.**—A. W. F. Idenburg, appointed August 20, 1909.

The Governor-General represents not only the executive power of government, but he has a right of passing laws and regulations for the administration of the colony, so far as this power is not reserved to the legislature of the mother-country. However, he is bound to adhere to the constitutional principles on which the Dutch Indies are governed, and which are laid down in the 'Regulations for the Government of Netherlands India,' passed by the King and States-General of the mother-country in 1854, and altered in 1909.

## Area and Population

	Area English square miles	Population 31 Dec. 1906
Java and Madura	50,554	80,098,008
Sumatra, West Coast	31,649	1,721,772 <sup>1</sup>
Sumatra, East Coast	35,812	568,417 <sup>2</sup>
Island of Benkulen	9,399	204,269 <sup>2</sup>
Sumatra Lainpangs	11,284	156,518 <sup>1</sup>
Palembang	58,497	796,852 <sup>1</sup>
Atjeh	20,471	582,175 <sup>2</sup>
Riau-Lingga Archipelago	16,801	112,216 <sup>2</sup>

Billiton	1,868	36,858 <sup>1</sup>
Borneo, West Coast	55,825	450,929 <sup>2</sup>
Borneo, South and East Districts	155,912	782,726 <sup>1</sup>
Island of Celebes	49,390	415,499 <sup>2</sup>
Celebes Menado	22,080	438,408
Molucca Islands	43,864	407,908 <sup>2</sup>
Timor Archipelago	17,698	808,600 <sup>2</sup>
Bali and Lombok	4,063	523,435
New Guinea to 141° E long <sup>4</sup>	151,789	200,000 <sup>3</sup>
Total	786,400	± 38,000,000 <sup>5</sup>

<sup>1</sup> Tolerably accurate.<sup>2</sup> Approximately<sup>3</sup> Mere conjecture<sup>4</sup> New Guinea belongs to the residency of Ternate, Molucca Islands.<sup>5</sup> Approximate total. The population of several unexplored countries is not included in the official records the population is given every five years.

The total number of Europeans and persons assimilated to them was, in 1906, 80,916; of these 58,812 males and 34,982 females were Dutch, of whom 82,026 males and 52,288 females were born in the East Indies, of the remainder, 1,406 were German, 184 French, 812 English, 197 Swiss, 312 Belgians; the remainder being mostly Austrians and Armenians. Of the remaining population about 563,000 were Chinese, 22,000 Arabs, and 23,000 other Orientals, and about 37,000,000 natives.

Marriages, births, and deaths among Europeans and persons assimilated to them —

	Marriages	Births	Deaths
1905 { Java and Madura	758	2,131	1,363
Outposts	141	594	843
1906 { Java and Madura	827	2,083	1,435
Outposts	170	576	877
1907 { Java and Madura	856	2,131	1,270
Outposts	107	684	836
1908 { Java and Madura	756	2,372	1,447
Outposts	105	669	854
1909 { Java and Madura	779	2,475	1,439
Outposts	122	739	862

The population of the four principal towns of Java was —

1905 <sup>1</sup>	Europeans	Natives	Chinese,	Arabs	Other Orientals.	Total.
Batavia	8,777	99,820	28,150	2,058	246	138,551
Samarang	5,162	76,413	13,686	698	787	96,600
Soerabaya	8,068	124,473	14,843	2,482	837	150,198
Soerakarta	1,573	108,524	6,532	337	413	118,373

<sup>1</sup> No later statistics are given.

The whole population of Java is legally divided into Europeans and persons assimilated with them, and natives and persons assimilated with these. The former are generally living under the same laws as the inhabitants of the mother-country, while in the jurisdiction of the latter the Indian customs and institutions are considered. The Governor General, however, is in agreement with the Council, authorized to make individual exceptions to this rule.

### Religion.

Entire liberty is granted to all religious confessions. The Reformed Church counted in 1911 41 ministers and 26 assistants, the Roman Catholic 23 curates and 13 priests, not salaried out of the public funds. The number of Christians among the natives and foreign Orientals was —

In Java and Madura in 1878 5,673, and in 1905 ± 26,000  
 „ the Outposts „ „ 143,672 „ „ ± 434,000

In 1910, about 250 missionaries of various societies were at work

### Instruction

For the education of Europeans and persons assimilated with them there were in 1910 10 public middle class schools, with 2 537 pupils and 208 teachers. The cost to the Government in 1910 was 1 135,812 guilders.

In 1910 there were for Europeans 178 mixed public elementary schools, and 30 for girls only with 34 private schools, a total of 242. The 208 public schools had a teaching staff of 832, and an attendance of 24,514 pupils (6,988 natives), and the 34 private schools a teaching staff of 221, and an attendance of 5,001 pupils. The cost of the public elementary schools was, in 1910, 3,202,790 guilders. There are two normal schools for Europeans.

The following statement relates to schools for natives —

In 1910 Dutch India had 6 normal schools, with 42 teachers and 538 pupils. The elementary schools for natives were, for Java and Madura, in 1910, 613 Government schools with 26,550 pupils, and 549 private schools with 58,666 pupils. In the Outposts in 1909, 896 Government schools with 64,231 pupils, and 1,436 private schools with 83 871 pupils. Besides, there were 7 schools for sons of native chiefs with 541 pupils, and 3 trades-schools with 277 pupils.

In 1910 the Government spent 5,898,417 guilders for the education of natives.

### Justice and Crime

The administration of justice for Europeans is entrusted to European judges, while for natives their own chiefs have a large share in the trial of cases. There is a High Court of Justice at Batavia—courts of justice at

Batavia, Samarang, Soerabaya, Padang, and Makassar—Resident and Regent courts, courts of circuit, district courts, and courts of priests.

The State contributes about 160,000 guilders yearly to Protestant and Catholic orphan houses.

### Finance

The local revenue is derived from land, taxes on houses and estates, from Moences' customs duties, personal imposts, and a number of indirect taxes, from the Government monopolies of salt and opium, railways, and from the sale of Government products.

Revenue and expenditure —

Year	Revenue	Expenditure	Surplus or Deficit
	Guilders	Guilders	Guilders
1908	190 050,215	191,821,216	- 1,271,001
1909	197,287,032	201,278,892	- 4,041,860
1910	220,884,112	226,894,203	- 6,080,091
1911	212,568,075	228,788,102	- 16,150,027
1912	234,075,845	267,504,873	- 33,429,028

Percentage of the different sources of revenue —

Year	Taxes	Monopolies <sup>1</sup>	Products <sup>2</sup>	Other Receipts	Total
1908	41.1	23.5	17.4	18.0	100
1909	41.9	24.6	14.1	19.4	100
1910	40.7	24.0	18.4	21.9	100
1911	41.1	25.5	18.4	20.0	100
1912	46.5	25.1	14.1	24.8	100

<sup>1</sup> Opium and salt

<sup>2</sup> Coffee, cinchona, tin, coal, rubber, etc.

The budget estimates for 1912 are —

	Guilders	
Home government expenditure	47,125,689	
Expenditure in the Colonies	237,331,325	
		284,457,014
Revenues in the mother country	33,318,540	
„ „ Colonies	222,600,658	
		254,919,208
Deficit		29,537,806

The sources of revenue are stated as follows (in guilders):

Receipts in the Netherlands from sales of Government coffee, 1,326,622, cinchona, 227,000; rubber, 1,242,500, tin, 25,884,427; railways, 816,000, share of the State in the profits of the Bliton Company, 1,000,000, various, 1,714,400. Receipts in India from sales of opium, 29,828,200, import, export, and excise duties, 23,701,000; land revenues, 33,178,500, sales of coffee, 365,000, sales of salt, 14,320,000; forests, 7,408,000; railways, 81,264,000, tax on trades, 6,200,000; coal, 4,022,000; income-tax, 2,200,000, from all other sources, 65,425,252.

### Defence.

The Dutch forces in the East Indies constitute a colonial army which is entirely separate from the home army. The colonial army consists of about one third Europeans to two thirds Natives and comprises 29 battalions of infantry and 4 depot battalions, 4 squadrons, 4 field batteries, 4 mountain batteries, 15 fortress companies of artillery, and 5 engineer companies. In most battalions there are 8 companies of Natives and one of Europeans. In the Native companies, the officers, and a proportion of the non commissioned officers, are Europeans. The artillery has European gunners and Native drivers. The Europeans are recruited by volunteers from the home army. The strength of the colonial army in 1912 was 1,315 officers and 31,898 men, of whom 10,133 were Europeans. There is also a small colonial reserve of both Europeans and natives.

The expenditure for defence in 1912 amounted to 4,563,854*l.*, of which about 1,000,000*l.* was disbursed in Holland.

### Production and Industry

The greater part of the soil of Java is claimed as Government property, and it is principally in the residences in the western part of Java that there are private estates, chiefly owned by Europeans and by Chinese. The bulk of the people are agricultural labourers. Formerly the Government or private landowners could enforce one day's gratuitous work out of seven, or more, from all the labourers on their estates, in 1882 the greater part of these enforced services for the Government was abolished, in return for the payment of one guilder per head yearly.

Area in Java and Madura cultivated by natives, 1910, 8,226,587 acres. The various cultures were as follows, in acres, in 1910: Rice, 5,729,982; Maize, Arachis, Cotton, and various plants, 5,624,896; Sugar cane, 374,248; Tobacco, 873,681; Indigo 31,395; Total, 12,133,682.

Owing to the 'agrarian law' (1870), which has afforded opportunity to private energy for obtaining waste lands on hereditary lease (emphyteusis) for seventy five years, private agriculture has greatly increased, as well in Java as in the Outposts. In 1910 were ceded on lease in Java by the Government to 869 Companies and Europeans, 1,096,320 acres, to 89 Chinese, 53,455 acres, to 5 natives, 962 acres—total, 1,150,737 acres. In 1910, the lands, now the property of Europeans, had an extent of about 2,423,860 acres, of Chinese, about 306,160 acres, and of other foreign Orientals, about 21,969 acres.

In 1909 the number of sugar estates was 187. The yield of sugar in 1910 was as follows, in lbs. Lands hired from natives, 2,126,877,600. Lands on Emphyteusis from Government and native princes, 402,928,583. Private properties, 49,082,668. Total, 2,578,834,799.

The production of coffee in Dutch India was, in lbs. —

Year	Government Lands	Free Cultivation by natives	Lands on Emphyteusis and on Lease	Private Lands	Total
1906	10,978,455	15,481,839	30,224,708	5,180,571	61,865,573
1909	4,333,033	15,087,800	24,683,666	6,223,466	50,328,965
1910	4,275,650	16,555,200	26,430,666	6,307,733	47,569,249

The production of cinchona, in kilogrammes, in Java was as follows —

Year	Government		Lands on Emphyteusis		Private Lands	
	Plantations	Production	Plantations	Production	Plantations	Production
1906	7	920 087	36	6 676 968	5	434,118
1909	7	893,905	37	1 901 234	1	554,414
1910	7	830,568	38	9 004 576	1	436,409

The production of tobacco, in kilogrammes, was as follows:—

Year	In Java		In Sumatra (Delit, etc.)	
	Plantations	Production	Plantations	Production
1908	130	30,514,487	116	23,841,833
1909	155	26,483 908	115	21 821,851
1910	164	38,974,768	116	19,480,771

The production of tea in Java, in kilogrammes, was as follows. 1906 11 728 623 1907 11,961,710 1907 11,494,658 1908 15 196 894 1909 12,736 678 1910 15 055 082.

The production of opium in Java was (in kilogrammes) 1906 618 803, 1907 1,436 285 1907 1 882,149 1908 2,066 611 1909 1 433 883 1910 1 180 549

The tin mines of Banca are worked by the Government, those of Biliton and Rionw by private enterprises. Their total yield was, in tons 1906-06 12,995 1906-07 15 429 1907-08 15,897 1908-9 16,632 1909-10 20,072 1910-11 20 583

The yield of the principal coal mines in Java Sumatra and Borneo was in tons 1905 237 196, 1906 306,168 1907 413,264 1908 437 75 1909 498 672, 1910 544 947

The production of the principal mineral oil enterprises was in thousands of litres 1907, 1,328,892, 1908 1 209,114, 1909, 1,410,086, 1910, 1,491,882

### Commerce.

No difference is made between Dutch and foreign imports and vessels. There is a tariff of 6 per cent. on certain goods, on some articles there is a small export duty, including tobacco.

Imports and exports in guilders (12 guilders = £1) —

Imports							
Year	Government			Private			Grand Total
	Merchandise	Specie	Total	Merchandise	Specie	Total	
1907	7 054 789	7 808 000	14 024 709	231 841,572	11 904,431	232 645,998	247 770,702

The principal exports are sugar, coffee, tea, rice, indigo, cinchona, tobacco,

coprah, and tin With the exception of rice, about one-half of which goes to Borneo and China, nearly four fifths of these exports go to the Netherlands

### Shipping and Communications

Year	—	Entered		Whereof, from England	
		Number	Tons	Number	Tons
1910	Steamers	6,486	4,164,102	684	1,566,892
	Sailing vessels	96	50,976	8	9,912

At the end of 1910 the total length of railways (State and private) was about 1,686 miles (1,386 in Java and 200 in Sumatra) the gross receipts (1910) 26,458,000 guilders, working expenses, 15,688,000 guilders, number of passengers, 82,049,786

There are about 349 post offices internal letters carried in 1910 19,686,654 while there were 14,585,568 newspapers, &c., for the interior, 2,916,118 letters were carried for foreign postal intercourse

Telegraph lines in 1910, 10,695 miles, 564 offices, messages, 1,250,504

### Money and Credit

The 'Java Bank, established in 1828, has a capital of 6,000,000 guilders, and a reserve of about 1,800,000 guilders The Government has a control over the administration Two fifths of the amount of the notes, assignats and credits must be covered by specie or bullion In March, 1911, the value of the notes in circulation was 90,892,000 guilders, and of the bank operations 68,368,000 There are some other Dutch banks, besides branches of British banks

In the savings banks, including the Postal savings bank, there were in 1910 89,600 depositors, with a deposited amount of 14,082,450 guilders

### Money, Weights, and Measures

#### WEIGHTS AND MEASURES

The <i>Amsterdamsch Pond</i>	= 1 09 lb avoirdupois
„ <i>Pirol</i>	= 133½ „ „
„ <i>Catty</i>	= 1½ „ „
„ <i>Tjenglal</i>	= 4 yards

The only legal coins, as well as the weights and measures, of Dutch India are those of the Netherlands

### Consular Representatives

<i>British Consul at Batavia</i>	—J W Stewart
<i>Vice Consul at Samarang</i>	—D M Campbell
<i>Vice Consul at Sourabaya</i>	—R W E. Dalrymple
<i>Vice Consul at Makassar</i>	—S P Stephens
<i>Vice Consul at Medan</i>	—A L. Mathewson
<i>Vice Consul at Balikpapan (Borneo)</i>	—F E. Jago

### DUTCH WEST INDIES

The Dutch possessions in the West Indies are (a) *Surinam*, or *Dutch Guiana*, and (b) the colony *Curaçao*

### Surinam or Dutch Guiana.

Dutch Guiana or Surinam is situated on the north coast of S. America between 2 and 6° N latitude, and 53° 50' and 58° 20' E longitude, and bounded on the north by the Atlantic Ocean, on the east by the river Marowijne, which separates it from French Guiana, on the west by the river Corantyn, which separates it from British Guiana, and on the south by inaccessible forests and savannas to the Turichumee Mountains.

At the peace of Breda, in 1667, between England and the United Netherlands, Surinam was assured to the Netherlands in exchange for the colony of New Netherlands in North America, and this was confirmed by the treaty of Westminster of February 1674. Since then Surinam has been twice in the power of England, 1799 till 1802, when it was restored at the peace of Amiens, and in 1804 to 1816, when it was returned according to the Convention of London of August 18, 1814, confirmed at the peace of Paris of November 20, 1815, with the other Dutch colonies, except Berbice, Demerara, Essequibo, and the Cape of Good Hope.

The superior administration and executive authority is in the hands of a governor (W. D. H. Baron van Asbeek), assisted by a council consisting of the governor as president, a vice president and three members, all nominated by the Queen. The Colonial States form the representative body of the colony. The members are chosen for 6 years by electors in proportion of one in 200 electors.

Dutch Guiana is divided into sixteen districts and numerous communes.

Area, 46,000 English square miles, population (January 1, 1911) 86,238, exclusive of the negroes living in the forests. Capital, Paramaribo, 35,846 inhabitants.

There is entire religious liberty. At the end of 1911 there were Reformed and Lutheran, 9,520, Moravian Brethren, 26,238, Roman Catholic, 17,328, Jews, 933, Mohammedans, 10,584, Hindus, 17,018, &c.

There were, in 1910 25 public schools with 2,889 pupils, and 39 private schools with 6,016 pupils. There are Moravian and Roman Catholic normal schools and a central school.

There is a court of justice whose members are nominated by the Sovereign. There are three cantonal courts and two circuit courts.

The relations of Government to pauperism are limited to subventions to orphan houses and other religious or philanthropical institutions.

The local revenue is derived from import, export, and excise duties, taxes on houses and estates, personal imposts, and some indirect taxes.

	Expenditure	Local Revenue	Subvention
1908	5,081,000	4,130,000	951,000
1909	5,148,000	4,230,000	918,000
1910	6,738,174	5,815,588	922,586
1911	7,308,191	5,489,141	919,050
1912	6,992,637	6,105,000	888,000

The estimates for 1913 are Expenditure, 7,312,515 gl. Revenue, 6,474,962 gl. Subvention, 837,553 gl.

The Dutch forces in the West Indies consist of a civic guard and infantry, the latter containing, in 1910, 14 officers and 274 non-commissioned officers and men. There are a few armed ships, with some vessels of the royal navy.

In 1910 sugar was produced to the amount of 12,015,100 kilogrammes, cacao, 1,683,000 kilogrammes, bananas, 462,200 bunches, coffee, 202,200

kilogrammes, rice, 1,998,700 kilogrammes, maize, 1,323,300 kilogrammes, rum, 797,800 litres, and molasses, 164,100 litres.

In 1910 the export of gold, mostly alluvial was 1,055,528 grammes, valued at 1 448,073 guilders. Several companies have been started for crushing operations.

In 1910 there entered 240 vessels of 210,998 tons, and cleared 243 ships of 215,391 tons Imports and exports —

Year	Imports	Exports
1907	8,903 808 <i>guilders</i>	5 288 567 <i>guilders</i>
1908	7 036 847	6 033 369
1909	7 215 932	6 269,470
1910	7 424 693	8 24,447

The communication between several districts of the colony is carried on by vessels and small steamers

*British Consul at Paramaribo and Cayenne* —G Hewett

*Vice Consul at Nickerie* —Chr Spence

### Curacao

The colony of Curacao consists of the following islands —

	Square Miles	Population Dec. 31 1910
Curacao	110	32,685
Bonaire	97	6 388
Aruba	69	9 257
St. Martin <sup>1</sup>	17	3 811
St. Eustache		1 825
Saba	5	1 043
	403	54,469

<sup>1</sup> Only the southern part belongs to the Netherlands, the northern to France.

There is a Governor, assisted by a Council composed of a vice president and three members, nominated by the Sovereign. There is also a Colonial Council consisting of thirteen members nominated by the Sovereign. The different islands, except Curacao, are under officials called 'gezaghebbers', nominated by the Sovereign. In 1909 there were 45,578 Roman Catholics, 6 483 Protestants, 670 Jews. Schools in 1910 about 35 with about 5 621 pupils.

The revenue is derived from import, export, and excise duties, taxes on land, and some indirect taxes. In the Budget for 1913 the revenue is estimated at 677,752 guilders, and the expenditure at 1,017,901 guilders, the difference is supplied by the mother-country.

The militia (Schutterij) of the Isle of Curacao consisted at the end of 1910 of 20 officers and 240 men, the garrison of 8 officers and 178 men. A vessel of the royal navy is always cruising and visiting the different islands. In Aruba gold and phosphate of lime are being worked under concessions.

The imports of Curacao in 1910 were valued at 3,162,310 guilders, the exports of Curacao and the other islands at 1,716,885 guilders. The chief products are maize, beans, pulses, cattle, salt, and phosphate of lime.

There entered the ports of the different islands in 1910, 8,478 vessels of 812,812 English tons.

*British Consul at Curacao*.—J Jorrum

## NICARAGUA

(REPUBLICA DE NICARAGUA)

### Constitution and Government

THE Constitution of the Republic of Nicaragua is that which came into operation on March 1, 1912. Previous constitution was that of March 30, 1905. It vests the legislative power in a Congress of one House consisting of 36 members elected for 6 years by universal suffrage. The executive power is with a President appointed for 6 years.

*President*—Senor Adolfo Diaz (Inaugurated May 11, 1911. Term of office expires December 31, 1916.)

The President exercises his functions through a council of responsible ministers, composed of the heads of the departments of Foreign Affairs and Public Instruction, Finance, Interior, Justice, and Police, War and Marine, Public Works.

The Republic is divided into 13 departments and 2 comarcas, each of which is under a political head who has supervision of finance, instruction and other matters, and is also military commandant. The Mosquito Reserve now forms a department named Zelaya. The Indians in this region were long under the protection of Great Britain, but under the treaty of April 19, 1906 (ratified August 24, 1906), the treaty of 1860 was abrogated and Great Britain agreed to recognize the absolute sovereignty of Nicaragua over the territory.

The judicial power is vested in a supreme Court of Justice, three chambers of second instance and judges of inferior tribunals.

The active army consists of 4,000 men, in war it may rise to 40,000. Military service is obligatory between 17 and 55 years of age. The period of active service is a year. The marine consists of 10 small steamboats, of which 4 are on the lakes, 3 on the Atlantic, and 3 on the Pacific coast.

For Central American Arbitration Treaty see under *Costa Rica*.

### Area and Population.

Area estimated at 49,200 English square miles and an estimated population (1910) 600,000, giving about 12.2 inhabitants per square mile. The movement of population during the year 1908 is given as follows: Births, 23,828, deaths, 9,598, marriages, 1,907, 1,281 (that is, 2,522 persons were married). The great mass of the population consists of aboriginal Indians, mulattoes, negroes, and mixed races, and the number of Europeans and their descendants is very small (about 1,200) but on the increase. There are with in the Republic 165 municipalities of which 28 have from 2,000 to 30,000 inhabitants. The capital of the Republic and seat of government is the town of Managua, situated on the southern border of the great lake of the same name, with 34,872 inhabitants. Leon, formerly the capital, has a population of 62,569, Granada, 17,092, Matagalpa, 15,749, Masaya, 13,028, Jinotega, 13,899, Chinandega, 10,342, Esteli, 8,281, Mutapa, 8,279, Somoto, 8,182, Bosco, 10,581, Jinotega, 9,317, Bluefields, 4,706. Other towns are Corinto, and San Juan del Sur on the Pacific.

## BELIGION, ETC—FINANCE—INDUSTRY AND COMMERCE 1095

### Religion and Instruction

The prevailing form of religion is Roman Catholic. The Bishop of Leon, whose diocese is the whole Republic, is a suffragan of the Archbishop of Guatemala. There are about 856 elementary schools, ten colleges and two universities (*facultades*). Also two schools of telegraphy, at Managua and Granada.

A national Industrial, Commercial, and scientific Museum has been established at Managua.

### Finance

#### Revenue and expenditure in paper pesos —

	1907	1908	1909	1910	1911
	Pesos	Pesos	Pesos	Pesos	Pesos
Revenue	1814,800	13,119,503	12,994,275	1,182,852	24,000,000
Expenditure	10,286,514	12,502,593	15,639,308	34,578,124 <sup>1</sup>	24,000,000

<sup>1</sup> Ordinary expenditure 12,049,845 pesos extraordinary on account of revolution of 1909, 22,520,277 pesos

A six per cent loan for 1,250,000L was issued in 1909 for the construction of railways, &c and for conversion purposes. There is a French debt of 1905 of 12,500,000 francs at 5 per cent. The internal debt amounted to 59,417,187 pesos in March, 1912.

On June 6, 1911 a convention was signed at Washington between the United States and Nicaragua by which it is intended to establish the latter on a sound financial basis by raising a loan to refund the existing foreign debt.

### Industry and Commerce

The agricultural, timber and mining industries are the principal sources of national wealth. The area of cultivation in Nicaragua has extended in recent years and would probably extend still further but for the scarcity of labour. The chief product is coffee, of which the exports for 1910 amounted to 12,023 tons. The coffee estates (largely in American and German hands) lie in the western districts. Bananas are grown in large quantities in the Bluefields region and are all shipped to New Orleans. Cocoa of good quality is grown chiefly in the south of the Pacific coast region, the greater part of the produce is consumed in the country. Sugar is widely cultivated, there are several large and many small sugar factories, the export of sugar in 1910 was 230 tons. The sale of native spirits was a government monopoly, abolished in June, 1910. Tobacco is grown in several districts, the best is produced in Omotepe, a volcanic island in Lake Nicaragua. The leaf is good but not well-cured, it is not exported. The fiscal revenues on tobacco, domestic and foreign, are leased to a syndicate which pays an annual rent of 500,000 pesos. Rubber is collected in the mountain forests, and there are young rubber plantations on the Atlantic and Pacific coasts. The forests contain, besides mahogany and cedar which are largely exported, many valuable timber trees, dyewoods, gums, and medicinal plants. They are worked both from the Atlantic and Pacific, but statistics of the timber cut are incomplete.

There are 1,200,000 cattle in Nicaragua.

There are several gold mines, worked by American and British companies, one having also silver. The gold export from the Atlantic coast amounted in 1910 to 1,000,000 dollars. The mines towards the east coast in Mico,

Tunkey, Chinamina and Pisapaz districts are showing increased activity. Copper, coal, oil, and precious stones are also found.

The foreign trade of Nicaragua was as follows in 5 years —

—	1905	1906	1908	1909	1910
Imports	Gold pesos 3 407 204	Gold pesos 2,406,830	Gold pesos 2,953,678	Gold pesos 2 563,257	Gold pesos 2 856 805
Exports	3 41 815	4 331 048	3,647 984	3 687,428	4,646,076

The customs receipts (1911-1912) were 1,010,835 dollars.

The principal exports in 1910 were coffee (576,198 $\frac{1}{2}$ ), mahogany (11,859 $\frac{1}{2}$ ) gold (104,637 $\frac{1}{2}$ ), rubber, bananas (22,090 $\frac{1}{2}$ ), hides (49,922 $\frac{1}{2}$ ). Of the imports, more than half are from the United States and the remainder mostly from Great Britain, Germany, and France. Of the exports, about a third go to the United States, and the rest chiefly to Great Britain, Germany, and France.

A treaty of commerce between Great Britain and Nicaragua, signed at Managua in July 1905, and ratified at London on August 14, 1906, provides mutually for the most favoured nation treatment, except that Nicaragua may accord certain advantages to other Central American States.

Total trade between Nicaragua and United Kingdom (in thousands of pounds sterling) for 5 years —

—	1907	1908	1909	1910	1911
Imports from Nicaragua to U K	£ 84	£ 110	£ 108	£ 123	£ 56
Exports to Nicaragua from U K	108	104	104	127	378

### Shipping and Communications

Most of the trade of Nicaragua passes through Corinto. The tonnage is mostly that of the steamers of 4 shipping companies (2 American and 2 German) which regularly visit the port. Greytown is now a free port.

There are few good roads in the country, but contrails have recently been made for roads and transport from Monotombo to Matagalpa, 79 miles, and for 3 roads leading respectively from Matagalpa, from New Segovia, and from the Pis Pis mines in the Cape Gracias district to the head of steamboat navigation on the Cuco Wanks river, about 160 miles from its mouth. For the repairing and making of roads a tax varying from 1 peso (about 22d.) to 10 pesos is imposed on all male inhabitants over 13 years of age. The national railroad of Nicaragua is the only line in the republic, having a total length of 171 miles, in connection with which steamers ply on the Lakes. The line runs from Corinto to Leon, Managua, Granada, and Diriamba, with branches to El Viejo and Monotombo. Various other railways have been contracted for. There are 20 miles of private railway on the Atlantic coast near the Rio Grande, and, on the west side of Lake Nicaragua, 3 private steam tramways aggregating 3 miles in length. The steamers running on the San Juan river and on the lakes now belong to the Government, as well as steamers for traffic on the Atlantic and Pacific coasts. The national railways have been leased to a company for 15 years and the steamers for 25 years from January 1, 1905.

There are 185 post offices. In 1908 the correspondence by post comprised 3,851,481 postal packets sent out and 5,037,794 received, telegrams received numbered 577,693, and transmitted 615,258, conversations by telephone numbered 47,537. There are 3 637 miles of telegraph wire, and 180 offices, also 805 miles of telephone wire and 29 telephone stations.

The Government has contracted for the installation of wireless telegraph stations at Managua, Granada, San Carlos, San Juan del Norte and Castillo.

### Money, Weights, and Measures.

The National Bank of Nicaragua with a capital of over 2,000,000 dollars, was established in Managua in 1912.

In 1912 a new monetary unit was introduced, the gold *cordoba*, containing 1 672 gr. of gold nine-tenths fine, and divided into 100 equal parts. Other gold coins are 10 5 and 2½ *cordobas*.

The silver coins are the silver *cordoba*, containing 25 grammes of silver nine tenths fine the half and quarter *cordoba*, 10 cents. a coin containing 2½ grammes of silver eight tenths fine, 5 cents. a coin three quarters of copper and one of nickel. 1 cent, ninety five parts of copper and 5 of zinc, ½ cent., in same proportion.

Since January 7 1893, the metric system of weights and measures has been in use.

### Diplomatic and Consular Representatives

#### 1 OF NICARAGUA IN GREAT BRITAIN

*Envoy and Minister* —

*Consul General* —Don Felipe E. Martinez

There are Consular Representatives at Manchester, Liverpool, Glasgow, Cardiff.

#### 2 OF GREAT BRITAIN IN NICARAGUA

*Minister and Consul General* —Sir Lionel E. G. Carden, K C M G

*Consul at Bluefields* —Dr Joseph Johnstone

*Consul at Managua* —H. C. Venables

There are Vice Consuls at Managua and Matagalpa.

## NORWAY

(NORW.)

### Reigning King

**Haakon VII**, born August 3 1872, the second son Carl, of Frederik, King of Denmark, elected King of Norway by the Storting, November 18, 1905, accepted the crown through his grandfather, the late King Christian of Denmark, November 20, 1895 landed in Norway November 25, 1905, married, July 22, 1896, to Princess *Maud*, born November 26 1869, the third daughter of the late Edward VII, King of Great Britain and Ireland

*Son* — Prince *Olav*, Crown Prince, born July 2, 1908

According to the Constitution, Norway is a constitutional and hereditary monarchy. The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose a successor to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal.

By Treaty of January 14, 1814, Norway was ceded to the King of Sweden by the King of Denmark, but the Norwegian people declared themselves independent and elected Prince Christian Frederick of Denmark as their King. The foreign powers refused to recognise this election, and on August 14 a convention was made proclaiming the independence of Norway in union with Sweden. This was followed on November 4 by the election of Karl XIII. as King of Norway. Norway declared this union dissolved, June 7, 1905, and after some months negotiation, a mutual agreement for the repeal of the union was signed, October 26, 1905. The throne of Norway was offered to a prince of the reigning house of Sweden but declined, and, after a *plébiscite* Prince Carl of Denmark was formally elected King. In October, 1907 a treaty guaranteeing the integrity of Norwegian territory was signed at Kristiania by the representatives of Norway, Great Britain, France, Germany, and Russia, and on January 8, 1908, received the unanimous approval of the Storting.

The following is a list of the Sovereigns of Norway since the year 1204, with the date of their accession.

Haga Brandurson	1204	Erik af Pommern	1380
Haakon Haakonsson	1217	Kristofer af Bayern	1448
Magnus Lagabøter	1263	Karl Knutsen	1440
Erik Magnusen	1280	Same Sovereigns as in Denmark	
Haakon V Magnusen	1299		1450-1814
Magnus Eriksson	1319	Kristian Fredrik	1614
Haakon VI Magnusen	1356	Same Sovereigns as in Sweden	
Olav Haakonsson	1381		1814-1906
Margrete	1384	Haakon VII	1906

The King has a civil list of 700,000 kroner, or 38,548*l*.

### Constitution and Government.

The Constitution of Norway, called the *Grundlov*, bears date May 17, 1814, with several modifications passed at various times. It vests the legislative power of the realm in the Storting, the representative of the sovereign people. The royal veto may be exercised twice; but if the same bill pass three Stortings formed by separate and subsequent elections, it

becomes the law of the land without the assent of the sovereign. The King has the command of the land and sea forces, and makes all appointments, but, except in a few cases, is not allowed to nominate any but Norwegians to public offices under the crown.

The Storting assembles every year. The meetings take place *ex jure*, and not by any writ from the king or the executive. They begin on the first weekday after January 10 each year, and must receive the sanction of the King to sit longer than two months. Every Norwegian citizen of twenty five years of age (provided that he resides and has resided for five years in the country) is entitled to elect, unless he is disqualified from a special cause, for instance, actual receiving of parish relief. Women are under the same conditions since 1907 entitled to vote if they (or the husband, when the couple have the property in common) have paid income tax on an annual income of 400 kroner in the towns, 300 kroner in the country districts, including 'Ladesteder' (some of the smaller towns). The mode of election is direct. Every third year the people choose their representatives, the total number being 128 (forty-one from towns, and eighty two from rural districts). The country is divided into districts, each electing one representative. Representatives must not be less than thirty years of age, must have resided in Norway for ten years, and be voters in the district from which they are chosen. Former members of the Council of State can be elected representatives of any district of the Kingdom without regard to their residence. At the election in 1909 the number of electors was 785 358, or 33.28 per cent. of total population, while 487,193 votes, or 62.04 per cent. of the whole number, were recorded.

Storting (1912) Liberals 24, Conservatives 75 Socialists 24, Independents 2

The Storting, when assembled, divides itself into two houses, the 'Lagting' and the 'Odelsting'. The former is composed of one fourth of the members of the Storting, and the other of the remaining three fourths. The Ting nominates its own presidents. Questions relating to laws must be considered by each house separately. The inspection of public accounts and the revision of the Government, and impeachment before the Riksrret, belong exclusively to the Odelsting. All other matters are settled by both houses in common sitting. The Storting elects five delegates, whose duty it is to revise the public accounts. All new laws must first be laid before the Odelsting, from which they pass into the Lagting to be either accepted or rejected. If the Odelsting and Lagting do not agree, the two houses assemble in common sitting to deliberate, and the final decision is given by a majority of two-thirds of the voters. The same majority is required for alterations of the Constitution. The Lagting and the ordinary members of the supreme court of justice (*Højesteret*) form a high court of justice (the *Riksrret*) for the impeachment and trial of Ministers, members of the *Højesteret*, and members of the Storting. Every member of the Storting has a salary of three thousand kroner per annum, besides travelling expenses.

The executive is represented by the King, who exercises his authority through a Council of State, composed of one Minister of State and at least seven Councillors. Minister and Councillors of State are entitled to be present in the Storting and to take part in the discussions, when public, but without a vote. The following are the members of the Council of State, appointed January 29, 1913

#### MINISTERS OF STATE

President of the Council.—Gunnar Knudsen.

## COUNCILLORS OF STATE.

*Ministry for Foreign Affairs.*—M. Flen.*Ministry for Worship and Instruction.*—M. Bryggjesen*Ministry for Justice.*—M. Abrahamson*Ministry for Commerce, Navigation, and Industry.*—M. Gamlberg*Ministry for Agriculture.*—The President of the Council*Ministry for Labour.*—M. Urbye.*Ministry for Finance.*—M. Omholt*Ministry for Defence.*—General Keilhau.

## II LOCAL GOVERNMENT

The administrative division of the country is into twenty districts, each governed by a chief executive functionary (Amtmand), viz., the town of Kristiania and Bergen, and 18 'Amt' (counties). There are 41 towns, 22 'Ladesteder,' and 602 rural communes (Herreder), mostly parishes or sub-parishes (wards). The government of the Herred is vested in a body of representatives (from 12 to 48), and a council (Formænd), elected by and from among the representatives, who are four times the number of the 'Formænd'. The representatives elect conjointly every third year from among the 'Formænd' a chairman and a deputy chairman. All the chairmen of the rural communes of an Amt form with the Amtmand the 'Amtsting' (county diet), which meets yearly to settle the budget of the Amt. The towns and the parishes form 61 communes, also governed by a council (5 to 21), and representatives (four times the size of the council). The members of the local governing bodies are elected under the same conditions as the Storting. Since 1910 women are entitled to vote and to be elected, under the same conditions as men.

## Area and Population

## I PROGRESS AND PRESENT CONDITION

Amt	Area English square miles	Population Dec. 3 1900	Population Dec. 1 1910	Pop. per square mile 1910

## II MOVEMENT OF THE POPULATION

### 1 Births, Deaths, and Marriages

Year	Marriages	Births (exc. still born)	Stillborn	Illegitimate, living	Deaths (exc. still-born)	Excess of Births
1907	12,063	60,721	1,429	4,109	53,739	27 932
1908	14,153	60,896	1,420	4,154	53,181	37,698
1909	14,090	61,407	1,429	4,108	51,503	30,904
1910	14,896	61,681	1,429	4,940	51 255	38,608
1911	14 360	61 400	1,600	4,958	51,309	36,100

2. *Emigration.*

Place of Destination	1901	1906	1907	1908	1909	1910	1911
United States	19,638	20,449	20,615	7,850	13,297	17,961	11,123
British North America	1,896	1,476	1,490	610	880	1,513	1,804
Other countries	35	42	80	57	85	88	61
Total	21,569	21,967	22,185	8,517	14,162	19,562	12,977

## III PRINCIPAL TOWNS

At the census taken December 1, 1910, the number of towns with a population of above 100,000 was one, above 20,000 four above 10,000 ten, above 5,000 seven. The population of the principal towns, December 1, 1910, was—

Kristiania	241,834	Kristiansund	10,891	Ålesund	12,858
Bergen	76,567	Fredrikstad	16,697	Skien	11,856
Trondhjem	45,835	Kristiansund	18,301	Sarpsborg	10,642
Stavanger	37,961	Haugesund	12,967	Arendal	10,311
Drammen	24,685	Fredrikshald	11,692	Larvik	10,106

## Religion and Instruction.

The evangelical Lutheran religion is the national Church and the only one endowed by the State. Its clergy are nominated by the King. All religions (except Jesuits) are tolerated. Ecclesiastically Norway is divided into 8 *Stifter* (bishopsrics), 84 *Prostier* (provostships, or archdeaconries), 498 *Prestegjeld* (clerical districts). In 1910 there were 62,553 dissenters, including 3,046 Roman Catholics, 10,986 Methodists, 7,659 Baptists, 714 Mormons, 143 Quakers. The Roman Catholics are under a Vicar Apostolic resident at Kristiania.

Education is compulsory, the school age being from six and a half in towns and seven in the country to fourteen. In 1909 (the latest date for which there are statistics) there were in the country 5,941 public elementary schools with 278,823 pupils, and in towns 2,978 classes with 94,609 pupils, the amount expended on both being 18,669,857 kroner, of which 4,557,498 kroner was granted by the State, the rest being provided locally. There are 90 secondary schools: 14 public, 50 communal, 26 private, with 17,861 pupils, in 1909-10. Most of the secondary schools are mixed, 12 are for girls alone, all private. Besides these, 98 communal and private schools have 3,788 pupils. There were in 1909, 6 public normal schools and 4 private, with 1,045 students. Kristiania has a University, attended in 1911 by 1,550 students. In the financial year 1910-11 it had its own income, 112,374 kroner, and a State subsidy of 1,207,852 kroner.

There are 10 schools for abnormal children, deaf, blind, and feeble minded. There are 9 reformatory schools for neglected children; two receive only children who require rigorous treatment, the others, children against whom there have been no serious charges. In the stricter reformatories children may be kept from the age of 12 to that of 21 years, in the more lenient, from their 6th to their 18th year of age. The number of children in reformatories on September 30, 1911, was 341 boys and 87 girls. There

are, besides, 5 communal compulsory schools, established mainly for children neglecting the ordinary school

### Justice and Crime

For civil justice Norway is divided into 104 districts, each with an inferior court. There are 3 superior courts, having each one chief justice and two other justices, and one supreme court for the whole kingdom (*Højesteret*), consisting of 1 president and at least 6 other justices. There is a court of mediation (*Forsiklingskommission*) in each town and *Herred* (district), consisting of two men chosen by the electors, before which, as a rule, civil cases must first be brought.

According to the law of criminal procedure of July 1, 1887, all criminal cases (not military, or coming under the *Rigset*—the court for impeachments) shall be tried either by jury (*Lagmændet*), or *Maddommet*. The *Lagmændet* consists of three judges and 10 jurors. The Kingdom is divided into 4 jury districts (*Lagdømmer*), each having its chief judge. Each district is divided into circuits, in which courts are held at fixed times. The *Maddommet* consists of the judge and is held in the district of the inferior court, and 2 assistant judges (not professional) summoned for each case. The *Lagmændet* takes cognisance of the higher classes of offences. The *Maddommet* is for the trial of other offences, and is also a court of first instance.

There are four convict prisons, inmates, June 30, 1912, 385 males and 40 females. There are 148 local prisons, in which were detained, June 30, 1912, 416 males and 84 females.

### Pauperism

The relief of the poor is mostly provided for by local taxation by the State. The number of persons receiving relief amounted to 79,690 in 1910.

### Finance.

Revenue and expenditure in thousands of kroner (18 kroner = 1 £) —

<sup>1</sup> Vide note 1 to table I.<sup>2</sup> Including Kr. 22,000,000 placed in the reserve fund of the Norwegian State, as provided in credit negotiations with other foreign countries.

The taxation for communal purposes amounted for the rural communes to 21,183,876 kroner, and for the towns to 24,668,348 kroner in 1910

### Defence

The most important fortresses of Norway are Oscarsborg and the new fortresses near Agdenes, Bergen, Tonsberg and Kristiansand, the other fortresses, Karljohansvaern, Akershus in Kristiania, Bergenhus in Bergen, Munkholmen near Trondhjem, and Vardohus, are of little importance

### ARMY

The army of Norway is a *national militia*. Service is universal and compulsory, liability commencing at the age of 18, and continuing till the age of 55. The men are called out at 23, and for the first 12 years belong to the line, then for 8 years to the landvarn. Afterwards they pass to the landstorm, in which they remain until they have attained 55 years of age. The initial training is carried out in recruits schools: it lasts for 43 days only in the infantry and garrison artillery, 62 days in the mountain batteries, 72 in the engineers, 92 in the field artillery, and 102 in the cavalry. As soon as their courses are finished the men are passed to the units to which they will permanently belong, and with them go through a further training of 24 days. Subsequent training consists of 24 days in the second, third and seventh years of service.

The line is now organised in 8 brigades of all arms, besides which there is the garrison artillery. There are 49 battalions of infantry, 5 companies of cyclists (skiers), 3 regiments of cavalry, 27 four gun field batteries, 3 batteries of mountain artillery and 1 regiment of engineers. The brigades are of unequal strength, according to the importance of the district in which they are recruited. In event of war, each brigade would mobilize 2 or 3 regiments of infantry (of 3 battalions), 3 or 4 squadrons of cavalry, a battalion of field artillery (of 4 or 5 batteries), a sapper company, a telegraph company, a medical company and a company of train. Each regimental (3 battalion) district also forms one battalion of landvarn of 6 companies, and the other arms would form landvarn units in the same proportion. The total strength of the line, on a war footing is 80,000 of all ranks, which would be increased by means of the landvarn to 110,000.

The Norwegian infantry is armed with the King Jorgensen rifle of 6.5 mm. The field artillery has Erhardt Q. F. guns of 7.5 cm.

The military budget for 1913-18 is 854,000!

### NAVY

The principal vessels of the Norwegian navy are —

Laid down	Name	Displacement	Armour		Principal Armament	H. P.	Max. Speed
			Belt	Big Guns			
1898	H. Haafagre (Tordenskjold)	8,500	7	6	2 8 in., 10 7 in.	4,500	17
1898	Morpe (Bidsvold)	4,200	7	8	2 8 in., 6 6 in.	5,300	17

There are also 2 old coast service monitors, 8 gunboats, 3 destroyers, 37

torpedo boats, and one submarine. Building: 3 coast defence battleships, 1 destroyer, 1 torpedo boat, and 4 submarines.

The navy numbers about 130 officers on active service and about 160 in the reserve, and about 1,000 petty officers and seamen on permanent engagement. All seafaring men between the ages of twenty two and forty one are enrolled on the lists of the active fleet, and are liable to the maritime conscription. The conscripts (about 1,000) have to go through a training of at least 6 months.

## Production and Industry

### I AGRICULTURE

Of the total area, 75 per cent. is unproductive, 21.5 per cent. forest, and 3.5 per cent. under cultivation. On September 30, 1907, there were 188,866 real estates separately registered, and the number of farms was 246,634. The 246,634 farms were classified as follows according to their cultivated area —

Without cultivated area (not including gardens)	20,839
Up to 2 hectares „	142,930
2.01-10 „	65,904
10.01-50 „	16,690
Above 50 „	871
	<hr/> 246,634

The 38,557 farms without cultivated area are most of them special estates of gardens, and not cultivated meadow land.

The average annual produce in hectolitres per hectare for 1908-1910 was: wheat, 22.4; rye, 24.9; barley, 29.4; mixed corn, 35.5; oats, 35.6; peas, 21.6; potatoes 230.1 hectolitres.

The products of the harvests for 3 years were as follows —

	1910	1911	1912
Wheat, qrs	85,833	52,818	38,977
Barley,	9,1808	408,850	362,621
Oats,	1,270,426	1,069,447	1,863,458
Rye	108,634	114,877	123,408
Mixed Corn qrs	76,784	65,099	77,590
Potatoes bushels	21,700,469	21,846,496	28,908,279
Hay tons	2,716,202	2,466,512	3,129,768

On September 30, 1907 there were — Horses, 172,488; cattle, 1,094,101; sheep, 1,393,488; goats, 296,442; swine, 318,566; reindeer, 142,628.

The value of cereals imported (including flour) was 66,649,400 kroner in 1911; the principal article being rye. The imports of animal products amounted to 13,141,006, and their exports to 103,978,800 kroner.

### II. FORESTRY

The total area covered with forests is estimated at 26,685 square miles, of which 75 per cent. is under pine trees. The State forests occupy about 5,644 square miles, administered by a forest staff under the supervision of the Ministry of Agriculture. The value of unwrought or partly wrought timber exported from Norway in 1911 was 24,135,300 kroner, and of wrought timber (mostly wood pulp) 48,879,400 kroner.

## III. MINES AND MINERALS

The total value of mineral products in 1910 was 11,220,000 kroner (5,572,000 in 1900), of furnace products, 2,470,000 kroner (1,942,000 in 1900). The chief mineral products are silver, 480,000 kroner in 1910 (330,000 in 1900), copper ore, 1,841,000 kroner, pyrites, 6,945,000 kroner, iron ore, 1,025,000 kroner, apatite, 85,000 kroner, feldspar 581,000 kroner (115,000 in 1900). Of the smelting products in 1910, silver was valued at 460,000 kroner, copper, 1,753,000 kroner. At the end of 1910 there existed about 60 mining establishments employing 6,248 workpeople, and 5 smelting furnaces with 278 workpeople.

## IV. FISHERIES

The number of persons in 1910 engaged in cod fishery was 88,144, in summer herring fishery, 27,024, and in mackerel fishery, 5,400.

The value of the fisheries in kroner in 1910 was cod, 19,203,100, herring, 12,624,700; mackerel, 2,864,500, salmon and sea trout, 1,018,900, other fisheries, 9,908,700, lobsters, 928,200, oysters, 10,200, total, 46,558,300.

Other fisheries are the cod and herring fisheries on the coast of Island, and the whale, walrus, seal, and shark fisheries which in 1910 produced a total of about 18,700,900 kroner.

## Commerce

Total imports and exports in the last five years —

	1907	1908	1909	1910	1911
	Kroner	Kroner	Kroner	Kroner	Kroner

Portugal & Madeira	1,471,100	8,603,700			
Spain	4,198,200	10,872,800	Total	495,740,100	525,406,900
				(27,542,717 <sup>1</sup> )	(18,629,872 <sup>1</sup> )

The total amount of the import duties collected in 1911 was 56 millions

of kroner The value of imports subject to duty (1911) was 281,318,000 kroner and of duty-free 237,377,000 kroner

Under the treaty of 1836 there is ' the most favoured nation ' treatment between the United Kingdom and Norway

The recorded values are calculated according to information supplied by Exchange Committees and merchants. Those of imports include the invoice price freight, packing, and insurance, but not duty those of exports give the price free on board in Norwegian port, excluding freight and insurance, but including packing and Norwegian commercial profit. The returns of quantities are compiled from the officially controlled declarations of importers and exporters. These declarations stated prior to 1909 the countries from which the articles were *directly* imported and to which they were *directly* exported. An article coming for example from the East Indies via London was recorded as coming from England. From January 1 1909, the declarations state the countries from which the articles are bought and to which they are sold. The recorded imports include all articles imported whether for consumption inland or for re-exportation. The exports are divided into exports of Norwegian articles (special trade) exports of foreign articles. A considerable part of the export trade on railway over the land frontier from Norway to Sweden escaped the statistical control in the past, but from January 1 1909, it has been recorded.

Values of imports and exports, divided into classes, for 1911 —

Classes of Goods	1911		Classes of Goods	1911	
	Imports of Foreign Goods	Exports Norwegian Goods		Imports of Foreign Goods	Exports Norwegian Goods
	Kroner	Kroner		Kroner	Kroner
Animals, living	2 818 200	213 800	Minerals, un wrought	41 000 100	12,775,800
Animal produce (malty food)	13 141,000	103 978,800	Minerals, manu factured	5 454 000	18 274 000
Brandsatt	66,649,400	3,690 400	Metals un wrought or partly wrought	37 300 000	10 657,500

### Internal Communications

The length of State Railways in 1912 was 1,635 miles, companies 283 miles, total 1,917 miles. 1,177 miles have a gauge of 4ft. 8½ in., 664 miles, 3ft. 6 in., 16 miles, 3ft. 3½ in., 60 miles, 2ft. 5½ in. Total receipts year ending June 30, 1911 State railways, 21,274,825 kroner, companies, 4,884,846 kroner Total expenses State railways, 15,886,948 kroner; companies, 3,181,504 kroner Goods carried State railways, 4,854,570 tons (of 1,000 kilograms), companies, 1,461,887 Passengers carried State railways, 12,746,648, companies, 3,097,791 The State railways have been constructed partly by subscription in the districts interested and partly at the expense of Government. The receipts, expenses and traffic refer to the year July 1, 1910, to June 30, 1911

The following are the postal statistics:—

	1907	1908	1909	1910	1911
Letters	75 487 800	80,734 400	82,337,800	72,704 450	71,040 552
Post-cards	15,331,400	16,111 600	16 808,600	17,040 110	17 708,750
Letters with declaration of value	3 623,000	4,304,400	4,382,000	4 552,000	4 810 730
Registered letters	1 301 700	1 030,000	1 038 960	1,782,084	1,649,971
Journals	90 150 300	84,550 000	91 623 360	91,747,475	100,237 800
Other printed matter	11 084,500	10 790 300	11 348,600	13 743,849	14,881 109
Samples and parcels	1 738,100	1 944 300	2 160 500	2 536,194	2,018,005

Length of telegraph and telephone lines and wires, June 30, 1912 13,222 miles of line, 104,995 miles of wires. Number of paid messages on the State lines, 2,616,251 Number of telephone conversations on trunk lines, 4,989 912. State telegraph offices, 1,805, receipts, 6,615,809 kroner, expenses, 4,702,049 kroner

The Government's first land wireless telegraphy stations were the two built in Lofoten in 1905 and 1906. In 1905 the navy, after equipping its ships with wireless apparatus, established two stations, the *Tjøme* and the *Flekkerø* and operated them until a couple of years ago, when they were transferred to the Telegraph Board. In the autumn of 1910 the *Vang* station at Lofoten was opened, and there are now (1913) five coast stations in operation besides three large stations.

### Money and Credit.

On June 30, 1911, the Norwegian coins in circulation (the coinage after the monetary reform deducting the coins melted down) were Gold coin 22,640,000 kroner, silver coin, 13,308,000 kroner, bronze coin, 1,055,000 kroner, total 36,998,000 kroner

There exists no Government paper money

The value of income and property assessed for taxes in 1911 was —

	Income		Property	
The towns	302 1	millions of kroner	965 0	millions of kroner
The rural districts	307 1	" "	1 728 4	" "
The whole kingdom	609 2	" "	2,693 4	" "

The 'Norges Bank' is a joint-stock bank, of which, however, a considerable part is owned by the State. The bank is, besides, governed by laws enacted by the State, and its directors are elected by the Storting except the president and vice president of the head office, who are nominated by the King. It is the only bank in Norway that is authorised to issue bank notes for circulation. The balance-sheets of the bank for 1911 show the following figures—Assets at the end of the year—bullion, 60 835,623 kroner; out standing capital, mortgaged estates, foreign bills, &c., 76,944,992 kroner total, 137,835,615 kroner. Liabilities—notes in circulation, 92,873,497 kroner; the issues of notes allowed was 95,885,623 kroner, deposits, cheques, unclaimed dividends, unvested losses, &c., 12 858,701 kroner (of which the deposits amounted to 2,843,000 kroner), dividends payable for the year, 1,600,000 kroner, 16 per cent.; total, 108,899,657, balance, 28,435,958.

The 'Kongelige Norges Hypothekbank' was established in 1868 by the State to meet the demand for loans on mortgage. The capital of the bank is mostly furnished by the State, and amounted to 26,500,000 kroner in 1911. The bank has besides a reserve fund amounting in 1911 to 1,100,000 kroner, and the same year a dividend fund of 21,890 kroner. At the end of 1911 the total amount of bonds issued was 300,314,120 kroner. The loans on mortgage amounted to 121,125,494 kroner.

There were, at the end of 1911, 198 private joint-stock banks reported, with a collective subscribed capital of 94,442,000 kroner and a paid up capital of 50 488 000. The reserve funds amounted to 87,887,000. The deposits and withdrawals in the course of the year amounted to 1,267 823 000 kroner and 1,176,222,000 kroner respectively. Deposits at the end of the year 480,814,000 kroner, of which 21,584,000 kroner deposits on demand, and 459,230,000 kroner on other accounts.

All savings-banks must be chartered by royal permission. Their operations are regulated, to a considerable extent, by the law, and controlled by the Ministry of Finance. In 1911 their number was 498, depositors 1,030,620, with 589 822,381 kroner to their credit at the end of the year. In 1910 their number was 487, depositors 1,001,810, with 507,039,020 kroner to their credit at the end of the year.

### Money, Weights, and Measures.

By a treaty signed October 16, 1875, Norway adopted the same monetary system as Sweden and Denmark. The Norwegian krone, of 100 ore, is of the value of 1s 1½d, or about 18 kroner to the pound sterling. The gold 20 kroner piece weighs 8.989572 grammes, .900 fine containing 8.0645 grammes of fine gold, and the silver krone weighs 7.5 grammes .800 fine, containing 6 grammes of fine silver. The standard of value is gold. National Bank notes for 5, 10, 50, 100, 500, and 1,000 kroner are legal means of payment, and the Bank is bound to exchange them for gold on presentation.

The metric system of weights and measures is obligatory.

### Diplomatic Representatives

#### 1. OF NORWAY IN GREAT BRITAIN

*Envoy and Minister in London* — Paul Benjamin Vogt.

*Secretary of Legation*. — O. Skybak.

*Consul General in London*. — W. Eckell.

*Vice Consul*. — H. L. Braekstad.

There are Consular representatives at Amble, Barrow, Berwick, Birmingham, Blyth, Boston, Bradford, Bristol, Cardiff, Dartmouth, Douglas, Dover, Falmouth, Fleetwood, Goole, Grimsby, Hartlepool, Harwich, Hull, Ipswich, Jersey, King's Lynn, Leeds, Liverpool, Lowestoft, Manchester, Middlesbrough, Newhaven, Newport, Nottingham, Plymouth, Portsmouth, Sheffield, Shoreham, Southampton, Sunderland, Swansea, Weymouth, Great Yarmouth, Newcastle-on-Tyne, South Shields, Edinburgh — Leith, Aberdeen, Allos, Ardrossan, Ayr, Br'nese, Burntisland, Dundee, Glasgow, Grangemouth, Greenock, Kirkwall, Lerwick, Methil, Peterhead, Stornoway, Troon, Wick, Dublin, Belfast, Cork, Limerick, Londonderry.

#### 2. OF GREAT BRITAIN IN NORWAY

*Envoy and Minister* — Mansfeldt de Cardonnel Findlay, C. B., C. M. G.

*Secretary* — Hon. F. O. Lindley.

*Naval Attaché* — Captain Montagu W. W. P. Consett.

*Military Attaché* — Lieutenant Colonel G. T. M. Bridges, D. S. O.

*Commercial Attaché* — Sir Francis Oppenheimer.

*Consul at Kristiania*. — Edward F. Gray.

There are Consular representatives at Arendal, Bergen, Bodø, Kristiania, Drammen, Flekkefjord, Fredrikshald, Fredrikstad, Hammerfest, Haugesund, Kragerø, Kristiansand, Kristiansund, Lørvik, Mandal, Molde, Moss, Namsos, Porsgrund, Risør, Skien, Stavanger, Svolvær, Tromsø, Trondhjem, Tönsberg, Vadsø, Vardo.

## OMAN.

AN independent State in South eastern Arabia extending along a coast line—S E and S W—of almost 1,000 miles from the Gulf of Ormuz and inland to the deserts. Area, 82,000 square miles, population, estimated at 500,000, chiefly Arabs. The capital, Maskat and the adjacent town of Matra have together about 24,000 inhabitants. Maskat was occupied by the Portuguese from 1508 to the middle of the seventeenth century. After various vicissitudes it was recovered in the eighteenth century by Ahmed bin Sa'ed, of Yemenite origin, who was elected Imam in 1741, and whose family have since ruled. The present Sultan is Seyyid Fayl bin Turki, second son of the late Seyyid Turki bin Sa'ed bin Sultan, who succeeded his father June 4, 1888, and was formally recognised by the British Government. In the beginning of last century the power of the Imam of Oman extended over a large area of Arabia, the islands in the Persian Gulf, a strip of the Persian coast, and a long strip of the African coast south of Cape Guardafui, including Socotra and Zanzibar. On the death of Sultan Sa'ed in 1856, one son proclaimed himself Sultan in Zanzibar and another in Maskat. Eventually the rivals agreed to submit their claims to the arbitration of Lord Canning, Viceroy of India, who formally separated the two Sultanates. Subsequent troubles curtailed the area of the state in Asia. The island of Kishm or Tawilah, near the entrance of the Persian Gulf, formerly belonging to the Imam of Oman, is now under Persian government and is ruled by a Sheikh, but the port of Basda at the western extremity of the island is British. Further south on the Persian coast of the Gulf of Oman is the Port of Jask formerly belonging to Oman, but now British. The closest relations have for years existed between the Government of India and Oman and a British Consul and Political Agent resides at Maskat.

The revenue of the Sultan amounts to about 300,000 dollars. The population is poor, inland the Sultan's authority is merely nominal and there is little security for life and property. In some coast regions there is the possibility of considerable agricultural development. As to the mineral resources of the country little is known.

Commerce is mostly by sea, statistics being given only for the port of Maskat, but large caravans under protection carry on traffic with the interior.

Total exports 1911-12, Rs. 43,55,806, chiefly dates Rs. 17,48,016, fruit, Rs. 77,774, fish Rs. 14,088, limes, Rs. 87,990, pearls, Rs. 44,960, mother o' pearl Rs. 54,800, cotton goods, Rs. 1,87,930, hides and skins, Rs. 36,105. Total imports for 1911-12 Rs. 60,19,800, chiefly rice, Rs. 11,24,698, coffee, Rs. 2,54,496, sugar, Rs. 1,56,588, piece goods, Rs. 7,17,910, silk and silk goods, Rs. 39,050, twist and yarn, Rs. 2,16,550, wheat and other grain, Rs. 54,691, arms and ammunition, Rs. 17,91,829.

Total imports from United Kingdom Rs. 2,61,218, India, Rs. 31,55,176, Persia, Rs. 84,106, America, Rs. 1,07,435, France, Rs. 13,788, Turkey in Asia, Rs. 21,440, Belgium Rs. 9,27,450, Germany, Rs. 4,67,474. Trade is mainly in the hands of British Indians, and the imports and the exports are mostly from and to India. All imports are subject to 5 per cent. *ad valorem* duty. There are no export duties, imports for re-export by the importer within 6 months are not subject to transit duty.<sup>1</sup>

<sup>1</sup> Some of the above figures of imports and exports include trade carried on by sailing vessels.

The number of vessels that cleared at the port of Maskat in 1911-12 excluding the native craft, was 235, of 359,660 tons, of which 242 of 319 689 tons were British. The Arabs of Bar, near Ras el Hadd, maintain a large coasting trade, and also traffic in native craft with India, and the east African coast and islands.

There is a mail weekly from and to Bombay, and Maskat is connected by cable with the Indo-European telegraph system.

The common medium of exchange is the Maria Theresa dollar. On the coast, but not in the interior, the rupee circulates (rupee exchange 100 dollars equal to from Rs. 136/2/0 to Rs. 142/12/0 in 1911-12). There is one Omani copper coin, which fluctuates in value. The mahmûdi of 20 *god* (1 dollar = 11½ mahmûdi) is only money of account. The weights in use are the Maskat *man* which contains 237 tolas and is equal to one third of a Delhi *man*, 24 *kias* = 1 Maskat *man*, 10 Maskat *mans* = 1 *frasila*, 200 Maskat *mans* = 1 *bar*. There is also a *basar* *man* equal in weight to 136 dollars.

*Political Agent and H.B.M.'s Consul* — Major S. G. Knox, C.I.E.

## PANAMA.

**Government.**—Panama, formerly a department of the Republic of Colombia, asserted its independence on November 4, 1903, and the *de facto* Government was on November 13 recognised by the Government of the United States, and soon afterwards by the other Powers. The Constitution, adopted February 12, 1904, for a period of 90 days, provides for a Chamber of Deputies of 28 members (one for every 10,000 inhabitants), which meets biennially on September 1 and for a President of the Republic, elected for 4 years, and not eligible for the succeeding term.

*President of the Republic.*—Dr. Belisario Porras (October 1, 1912)

There are three Vice-Presidents, and a Cabinet of five Ministers. The Republic is divided into seven provinces, each under a Governor.

On November 18, 1903, a treaty between the United States and Panama was signed, providing facilities for the construction and maintenance of the inter-oceanic Canal. In this treaty, Panama grants in perpetuity the use of a zone (Canal Zone) five miles wide on each side of the Canal route, and within this zone the exclusive control for police, judicial, sanitary and other purposes. For subsidiary canals other territory is ceded and, for the defence of the Canal, the coastline of the zone and the islands in Panama Bay are also ceded. The cities of Panama and Colon remain under the authority of the new State, but complete jurisdiction is granted to the United States in both the cities and in their harbours in all that relates to sanitation and quarantine. In return for these grants the United States paid 10,000,000 dollars on the ratification of the treaty, and will pay 250,000 dollars yearly, beginning after nine years. The treaty was ratified on February 23, 1904, and in July, 1904, the provisional delimitation of the boundaries of the United States territory on the Isthmus was signed. According to this agreement the city of Panama is, for all practical purposes, left without a seaport for foreign commerce, as the anchorage of vessels at Flamenco Island and the wharf at Balboa, now called 'Port Ancon', so far as ocean going vessels are concerned, both lie within the territory of the zone. Moreover, a similar port has been opened on the Atlantic entrance to the Canal, called Cristobal.

A treaty for the demarcation of the boundary line between Panama and Costa Rica was signed on behalf of the respective Governments on March 17, 1910, and has been ratified by the congresses of both countries. By this treaty the question of what is the true boundary line will be submitted to the arbitration of the Chief Justice of the Supreme Court of the United States.

**Area and Population.**—Extreme length is about 480 miles, breadth between 37 and 110 miles. Total area is 82,880 square miles, population according to the census of 1912 (including the Canal Zone), 428,928. Population of the Canal Zone, 62,810 or 12½ per square mile. The inhabitants are of a mixed race, comprising Spanish, Indian, and Negro elements, with a small number of temporary immigrants from the United States and European countries. Chinese subjects are estimated at 3,500. There are 34,458 British subjects in the Republic, including 30,659 in the Canal Zone, chiefly from the West Indies. There are 7 provinces. The capital, Panama, founded in 1518, on the Pacific coast, has (1912) 37,605 inhabitants, and Colon or Aspinwall on the Atlantic coast, 17,748. Smaller ports on the Pacific are Agua Dulce, Pedregal, Montijo, and Puerto Mudia, on the Atlantic, Bocas del Toro and Puerto Ballo.

**Education.**—The Government maintains 294 public schools throughout the seven provinces, and 18,848 children (excluding 1,731 children enrolled

in the Canal Zone public schools) received free instruction in 1910, from 315 teachers. A University (Instituto Nacional) has been opened in fine large buildings constructed at a cost of about 300,000\$, and the principal teachers are foreigners. In addition there are about a dozen private institutions and 47 young men and 15 young women are being educated in Europe and the United States at the cost of the Panama Government.

**Finance.**—All the revenue collected on importations into the Republic or zone belongs to the Panama Government, but the United States reserve the right to import supplies of all descriptions required for canal construction and for the use of their employees free of all taxes.

The national revenue from all sources for the year 1911 was 672,957\$, and the expenditure 670,839\$. The budget estimates for 1911-12 were 1,440,000\$. The Republic has 1,260,000\$ and 150,000\$ capital in the National Bank total, 1,410,000\$, with an interior debt of about 60,000\$. It has no army or navy to support.

**Production.**—The soil of Panama is of great fertility. Of the whole area about five-eighths are unoccupied and of the remainder only a small part is properly cultivated. Immigration is encouraged, and land is offered to small farmers on favourable terms. The most important product is the banana. The United Fruit Company (a United States company) has large plantations and exports annually, from Bocas del Toro, about 2½ million bunches of bananas worth about 125,000\$. Caoutchouc (about 130 tons annually) is collected by the Indians of the Cordillera, or is obtained from trees planted by Europeans near the coast. Coffee (about 500,000 bushes) is grown in the province of Chiriquí, near the Costa Rican frontier. In the province of Coclé (Atlantic coast) there is one large agricultural undertaking, begun in 1894 with German capital. Here about 75,000 cocoa trees, 50,000 coffee bushes, and 25,000 caoutchouc trees have been planted and are now beginning to yield returns. Other products of the soil of Panama are coconuts, mahogany and other woods, copaliba, sarsaparilla and ipecacuanha. Sugar and tobacco growing are assuming importance. Cattle rearing is carried on successfully, and hides form an important article of export. In 1905 the live stock was estimated at 65,000 head of cattle, 17,000 horses, 1,500 mules, 28,000 pigs, and 3,000 goats.

Pearl fishing is carried on at the Pearl Islands in the Gulf of Panama, and at Coiba Island to the west. Turtle-shell is also exported to a considerable amount. It is claimed that Panama possesses nearly every common mineral except coal, and recently a number of mining concessions have been granted.

**Commerce, Shipping, Communications.**—The imports into the Republic in 1911 amounted to 1,858,625\$, of which the value of 1,020,848\$ came from the United States (exclusive of canal materials), 458,080\$ from Great Britain, 223,247\$ from Germany, 77,316\$ from France, 36,538\$ from Italy, 23,209\$ from Belgium, 29,598\$ from Spain, 25,454\$ from China and Japan, and 53,663\$ from Spanish America. The exports for 1911 amounted to 573,635\$.

The Isthmus on both sides is in communication with European and American countries by several lines of steamers. In 1911 there entered at the ports of the Republic and the Canal Zone 769 vessels of 1,504,353 tons, and cleared 8,306,428 tons. In 1909 the British vessels entered were 304, and tonnage 672,797 tons; German, 142 vessels and 558,868 tons; United States, 151 vessels and 597,582 tons; Belgian, 77 ships and 226,788 tons, and French, 34 ships and 174,509 tons. Of this tonnage entered, 743 ships and 2,843,022 tons entered Colon and Cristobal.

A railway, 47 miles, connects the ports of Colon and Panama. It

belongs to the Panama Railroad Company (United States Government). Its construction cost was 7,500,000 dollars. In the Province of Bocas del Toro the United Fruit Company (American) owns about 140 miles of track with branches, which is used to transport bananas and passengers to the port of Almirante in the Chiriqui lagoon. At present the line extends into Costa Rica for a distance of about 80 miles. This line is being extended towards Port Limon (Costa Rica) and its terminal is now distant from that port 80 miles. A national line from Panama City to David, in the province of Chiriqui, 271 miles in length has been surveyed and work will probably be commenced next year. There are telegraph cables from Panama to North American and South American ports, and from Colon to the United States and Europe. Roads are being constructed throughout the country. There are 96 post offices and 37 telegraph offices.

The monetary unit is the gold *Balboa* weighing 1.672 gramme .900 fine, to which the United States gold dollar is legally equivalent. Silver coins are the peso (of 25 grammes .900 fine), and the half, fifth, tenth and twentieth peso pieces and nickel coins of 2½ cents. There is no paper money. Two silver pesos of Panama currency are taken as equivalent to one U.S. gold dollar. Altogether four millions of silver dollars of the new currency have been coined and placed in circulation.

Part of the 10,000,000 dollars (canal money) paid by the United States has been applied to the establishment of a real estate loan bank, part to public improvements in the several provinces, and 6,000,000 dollars have been invested in the United States.

**Panama Canal.**—Progress is being made with the canal across the Isthmus under the treaty between the United States and Panama signed on November 18, 1903. This treaty is closely associated with the separate existence of the Panama Republic and its general terms are given above under the head of "Government."

The (Hay-Pauncefote) treaty between Great Britain and the United States signed November 18, and ratified by the United States Senate December 16, 1901, provides for its use on equal terms by vessels of all nations. In the summer of 1912 the United States Congress passed the Panama Canal Act whereby privileges were given to certain classes of American shipping using the canal. The British Government lodged a protest against some of the provisions which it regarded as involving violation of the Hay-Pauncefote treaty. The British Government asked that the controversy be referred to the Hague Tribunal but by March, 1913, no definite decision had been come to in the matter.

The number of employees of the Canal Commission and the Panama Railway Company in September 1912 was 34,008. It has been officially announced that the canal will be opened in the autumn of 1915. The original date was January 1, 1914. In 1911 Colonel Goethals was appointed Civil Governor of the Canal Zone to hold office from April 1913.

## PARAGUAY.

(REPUBLICA DEL PARAGUAY)

### Constitution and Government.

THE Republic of Paraguay gained its independence from Spanish rule in 1811, and after a short government by two consuls, the supreme power was seized, in 1815, by Dr. José Gaspar Rodríguez Francia, who exercised autocratic sway as dictator till his death, September 20, 1840. Dr. Francia's reign was followed by an interregnum, which lasted till 1842, when a National Congress, meeting at the capital Asunción, elected Don Mariano Roque Alonso and Don Carlos Antonio López, joint consuls of the Republic. Another Congress voted, March 13, 1844, a new Constitution, and, March 14, elected Don Carlos Antonio López sole President, he was continued by another election, March 14, 1857. At the death of Don Carlos, September 10, 1862, his son, Don Francisco Solano López, born 1827, succeeded to the supreme power. President López, in 1864, began a dispute with the Government of Brazil, the consequence of which was the entry of a Brazilian army, united with forces of the Argentine Confederation and Uruguay, into the Republic, June 1865. After a struggle of 8½ years, in which Paraguay lost probably 500,000 men, López was defeated and killed at the battle of Cerro Corá, March 1, 1870.

A new Constitution was proclaimed on November 25, 1870. The legislative authority is vested in a Congress of two Houses, a Senate and a Chamber of Deputies, the executive being entrusted to a President, elected for the term

of four years, with a non-active Vice-President, who is also President of the Senate. The Senate and Chamber of Deputies are elected directly by the people, the former in the ratio of one representative to 12,000 inhabitants, and the latter one to 6,000 inhabitants, though in the case of the sparsely populated divisions a greater ratio is permitted. The Constitution provides for this proportion, but in practice the original number of 13 Senators and 26 Deputies is still adhered to. The Senators and Deputies receive each 2,000 dollars per month (24000 per annum).

*President of the Republic*—Eduardo Schaerer, elected for years from August 15, 1912.

*Vice President*.—Dr Pedro Bobadilla

The President exercises his functions through a cabinet of responsible ministers, five in number presiding over the departments of the Interior, of Finance, of Worship Justice and Public Instruction, of War, and of Foreign Affairs. The President receives a salary of 10 000 dollars per month (120 000 per annum), and each of the ministers 4,000 dollars per month (48 000 per annum), but the total administrative expenses are stated not to exceed 700,000.

The country is divided into 20 districts, which are governed by chiefs, who are the civil authorities, and by justices of the peace, assisted by municipal councils.

### Area and Population.

The approximate area of Paraguay is 171,770 square miles, including the Paraguayan Chaco, which is estimated at 108,922 square miles. There is an unsettled boundary dispute with Bolivia. In 1911 the population was estimated at 700 000, not including 100,000 Indians. The population is a mixture of Spanish Guarani Indian, and Negro races. Of foreigners in Paraguay, in 1910, there were 20,000, including 9,800 Argentines, 10 000 Italians, 1,400 Brazilians, 1 100 Spanish, 2,500 German, 800 French, 600 Uruguayans, 400 English. In 1911 the population of the capital, Asunción, founded 1536, was 80 000. Other towns are Villa Rica, 36,000. Concepcion 15,000, San Pedro, 8,700. Luque 15,000, Carapegua 15 000, Paraguari 16,000, Villa del Pilar, 10 000. In 1908 there were 1,774 immigrants, 1909, 830, in 1910, 578, and in 1911, 389. Nearly three-fourths of the territory was national property, but in recent years most of it has been transferred to private ownership, much of it in very large tracts.

### Religion, Instruction, and Justice

The Roman Catholic Church is the established religion of the State, but the free exercise of other religions is permitted. Asunción, Suffragan to Buenos Aires, is the only Paraguayan Episcopal See. The law of civil marriage was introduced in 1898. Education is free and compulsory, but schools are not everywhere available. In 1911 there were 800 schools with some 80,000 pupils. Private schools are subsidised by the Council of Education. There are a few private Protestant schools for boys and girls. Near Asunción there is an agricultural school with a model farm doing good work (temporarily closed in 1912, to be reopened in 1913 or 1914). At Asunción there is a National College, with 15 professors and 180 students. Under a law of July, 1903, the State maintains 42 pupils in Europe and the United States. Besides contributions from general taxes, there is a special

Government fund for education consisting of a proportion of the proceeds of land sales, customs dues, &c.

A High Court of Justice, and various inferior tribunals, with local magistrates, exercise judicial functions. The High Court is composed of 3 justices, appointed by the president with the consent of the Senate, for a term of 4 years. There are also 2 courts of appeal.

### Finance

The revenue is derived from customs, internal consumption, stamps and other dues. The estimated revenue and expenditure for four years are given as follows (gold dollar = 4s, paper dollar = about 3½d.) —

—	Revenue		Expenditure	
	Gold pesos	Paper pesos	Gold pesos	Paper pesos
1907	2,812,894	6,829,401	561,963	28,577,110
1909	1,771,680	6,291,026	567,688	28,827,337
1910	496,000	2,636,000	710,552	27,094,948
1911 <sup>1</sup>	2,738,000	9,190,500	999,411	32,687,223
1912 <sup>1</sup>				

<sup>1</sup> Estimates

On March 31, 1912, the outstanding external debt amounted to 821 017½ and the internal debt, 1,383,753½ (including 65,000 000 dollars of paper currency in circulation). The war debt to the Argentine and Brazil (the portion due to Uruguay was condoned) exists only as a political weapon in the hands of these countries, and is by some considered an effective guarantee of the independence of Paraguay.

### Defence.

The small army of Paraguay is drilled and trained on the German model. Owing to recent and present changes it is impossible to say of what the army consists. Formerly it had 4 battalions of infantry, 6 squadrons of cavalry, 5 field batteries, and a coast defence battery. Total about 100 officers and 2,500 men. There is also a National Guard which would be called out for the defence of the country in time of war.

The navy consists at present of a flotilla of small merchant vessels armed with modern guns. The largest is about 1,000 tons.

### Production and Industry

Excellent grazing land is abundant in Paraguay, especially in the Chaco region, which is now being taken up by cattle-raisers. The estimated number of horned cattle in 1912 was about 3,000,000; horses 182,790, mules and asses 7,926, sheep 214,060, goats 31,334, pigs 23,900. The saladero industry is encouraged by Government; hides, jerked beef, and other animal products are exported. The growing of yerba mate, or Paraguay tea, is now in the hands of capitalists and companies, though some colonists also grow it. Tobacco is grown in large quantities and exported (59,424 bales weighing 127,325 cwt. in 1911) for consumption in Europe, mainly to Hamburg and Bremen. The principal industries are cattle-breeding and timber-cutting. Fruit-growing (especially oranges) is considerable. But agriculture is

primitive and hardly as yet remunerative. The mamee forests contain valuable timber, both hard and soft, which now finds a market in neighbouring countries and in Europe. The New Australia Colony, with 100 colonists (chiefly British subjects), makes an income from cattle and horses which live on the grazing lands. The colony is 30 miles from any river or railway, and has no market for the maize, cassava, beans, sweet potatoes, sugar-cane, bananas, oranges, and peaches which are grown. Still, the enterprise makes progress, having a steam saw mill, five stores, a grain distillery, and two rum stills. There is another (smaller) English Colony, "Cosma."

## Commerce

The following is the value of the imports and exports in gold dollar, (5 dollars = £1) —

	1907	1908	1909	1910	1911
	\$	\$	\$	\$	\$
Imports	1 672 255	814 691	757 690	1 198 709	1 295 699
Exports	647 222	773 419	1 027 338	950 239	966 782

Import duties in 1909, 597 656; in 1910, 840,867; in 1911, 878,857.

The chief imports are textiles, provisions, hardware, spirits, drugs, and haberdashery. The chief exports are hides, yerba, oranges, tobacco, timber, and quebracho extract. Of the imports in 1911, textiles were the most important, 342,533; then foodstuffs, 80,524. The British imports are considerable, but the exports to Great Britain are of little account.

The British trade passes to some extent through the territories of Brazil and the Argentine Republic. There are no direct imports into the United Kingdom from Paraguay, the British exports (mostly cottons and iron-work) direct to Paraguay amounted to 147 391 in 1911 (according to the Board of Trade statistics). The "most favoured nation treaty" of 1884 between Great Britain and Paraguay is in force.

## Communications

In 1910 380 vessels, chiefly Argentine and Brazilian, with 48,207 tons, entered at the port of Asuncion, and 525 with a tonnage of 57,614 cleared. The steamers are mostly liners regularly visiting the port. Paraguay is served by sundry steamship companies, the most important of which is that of Nicholas Mihanovich, Ltd., of Buenos Aires.

There is a railway from Asuncion to Encarnacion, on the Rio Alto Paraná, a distance of 232 miles. The change of gauge on the Paraguay Central Railway from 5½ ft. to the standard 4 ft. 8½ ins. was effected in 1910 and the line was opened in July, 1911. A through train service from Asuncion to Buenos Aires has recently (early 1913) been opened. Opposite Encarnacion is Posadas, to which an Argentine line is extended, and the two lines are connected by a ferry. The country roads are in general mere bullock tracks, and transport is difficult and costly. There is a line of telegraph at the side of the railway, the national telegraph connects Asuncion with Corrientes in the Argentine Republic, and thus with the outside world, there are altogether 1,900 miles of telegraph line and 64 telegraph offices. The telephone is in operation at Asuncion.

joined the postal union in 1881; in 1910 the number of post offices was 385. In 1909-1910 total number of pieces of mail matter handled was 5,456,776, and the number of packages received by parcel post 10,518, number of telegraph messages, 191,871.

### Money and Credit.

The banks in Paraguay are the Bank of the Republic, opened in June, 1908 (capital, 6,000,000 dollars gold), the Agricultural Bank, with a capital of 14,531,238 currency dollars advanced by Government, the Territorial Bank, the Mercantile Bank, with a capital of 20,000,000 dollars paper. A Conversion Fund has been accumulating for some four years, and is deposited at the Bank of the Republic. The deposit was (Dec. 31, 1912) 996,855 dollars gold (199 2711).

There is no gold and silver current and paper is the only circulating medium with the exception of a few small nickel coins. The average rate of exchange in 1912 has been 75 dollars to 11. The exchange fluctuates greatly and consequently transactions are frequently made in dollars *gold* at the nominal fixed rate of 5 04 dollars to the 11. for gold coin and 5 dollars per 11 for cheques or drafts.

### Money, Weights, and Measures

<b>MONEY</b> —The <i>Peso</i> , or <i>Dollar</i> = 100 <i>Centavos</i>	Nominal value 4s
The <i>Quintal</i>	= 101 40 lbs avoirdupois.
„ <i>Arroba</i>	= 25 86 „
„ <i>Picula</i>	= 1½ imperial bushel
„ <i>Seno</i> (land measure)	= 69½ Engl. sq. yards
„ <i>Legua cuadrada</i>	= 12½ Engl. sq. miles

The weights and measures of the metric system are also in general use.

### Diplomatic and Consular Representatives

#### 1. OF PARAGUAY IN GREAT BRITAIN

*Consul General in Great Britain*.—Alfred James. Appointed 1897.

There are Consuls at Glasgow, Birmingham, Manchester, Cardiff, Liverpool, and Southampton.

#### 2. OF GREAT BRITAIN IN PARAGUAY

*Envoy and Minister*.—Sir R. T. Tower, KCMG, CVO (residing at Buenos Aires).

*Consul at Asuncion* (Local rank of *Secretary of Legation and Chargé d'Affaires in absence of Minister*).—Francis A. Oliver.

## PERSIA.

(Iran)

### Reigning Shah.

**Sultan Ahmad Shah**, born January 20, 1898 (27th Shaban 1316), succeeded his father, Muhammad Ali Shah (who abdicated) July 16, 1909, under regency of Ali Reza Khan, Azad el Mulk, chief of the Kajar tribe. Azad el Mulk, the Regent, died September 23, 1910, and on the 25th of the same month the National Council elected Abu'l Kasim Khan, Nasser el Mulk, who was then in Europe, as his successor. The Regent arrived in Teheran on February 8, 1911, and definitely assumed the functions of Regent by taking the oath before the National Council on March 4.

*Brothers of the Shah* — I Itzad es Saltaneh. II Muhammad Hassan Mirza, Valiahd (heir apparent), born February 19, 1899 (9th Shaban 1316). III Muhammad Mehdi Mirza. IV Mahmud Mirza.

*Uncles of the Shah* — I Malik Mansur Mirza, Shua es Saltaneh, born 1830. II Abul Fath Mirza, Salar el Dowleh, born 1831. III Abul Fath Mirza, Azad es Sultan, born 1833. IV Hussein Kuli Mirza, born 1894. V Nasr ed din Mirza, born 1896.

The Royal Family is very numerous; there are some thousands of princes and princesses, but the last official year book only mentioned about a hundred.

The Shah of Persia—by his official title, 'Shāhshāh' (a corruption of Shāhān Shāh), or King of Kings—was until 1906 absolute ruler within his dominions, and master of the lives and goods of all his subjects. The whole revenue of the country being at their disposal, recent sovereigns of Persia were able to amass a large private fortune, but that of the present occupant of the throne is reported to amount to barely two millions sterling, most of it represented by diamonds, the largest, the Deryā i Nūr, of 186 carats, and the Taj i Mäh, of 146 carats, and other precious stones, forming the crown jewels.

The present sovereign of Persia is the seventh of the dynasty of the Kajars, which took possession of the crown after a civil war extending over fifteen years, from 1779 to 1794. The date of accession of each of the sovereigns of the dynasty was as follows:—

1. Agha Muhammad	1794	5. Muzaffar-ed-din, son of Nasr	
2. Fath Ali, nephew of Agha Muhammad	1797	ed-din	1886
3. Muhammad, grandson of Fath Ali	1835	6. Muhammad Ali, son of Muzaffar-ed-din	1907
4. Nasr-ed-din, son of Muhammad	1848	7. Sultan Ahmed, son of Muhammad Ali	1909

\* According to the Constitution the Shah must belong to the Sh'ah faith and his successor must be his eldest son, or next male heir in succession, whose mother was a Kajar princess.

### Constitution and Government

The form of government in Persia up to the year 1906 was, in its most important features, similar to that of Turkey. The Shāh, within the limitations imposed by the Mohammedan religion, was an absolute ruler, generally regarded by the people as the vice-regent of the Prophet. In 1905, however, the Persian people demanded representative institutions, and in January,

1906, the Government announced that the Shâh had given his consent to the establishment of a National Council (Majlis i Shorâ i Milli). Under the rescript of August 5, 1906, it was decided that the National Council should consist of and be elected by members of the reigning dynasty (princes and kâjârs), clergy, chiefs, nobles, landowners, merchants, and tradesmen. An ordinance of September 10, 1906, fixed the number of members at 156 (60 for Teheran and 96 for the provinces), and early in October elections were held. On October 7, the National Council (or as many of its members as could be got together) met, chose a president, and was welcomed by the Shâh, whose speech was read before it. A further rescript dated December 30, 1906, signed by Muzaffar-ed-din, and countersigned by the Vali Ahd, and by the Grand Vizier, dealt with the decrees of August 5, 1906, and stated the powers and duties of the National Council, besides making provision for the regulation of its general procedure by the National Council itself. The number of members was limited to 156, but could be raised to 200; members were to be elected for 2 years, would meet annually on October 8 (14th Mizan), and have immunity from prosecution, except with the knowledge of the National Council. The publicity of their proceedings (except under conditions accepted by the National Council) was secured. Ministers (or their delegates) could appear and speak in the National Council, and would be responsible to that body which had special control of financial affairs and internal administration. Its sanction would be required for all territorial changes, for alienation of State property, for the granting of concessions, for the contracting of loans, for the construction of roads and railways, and for the ratification of all treaties, except such as in the interest of the State require secrecy.

There was to be a Senate of 60 members, 30 to be appointed by the Shâh, and 30 to be elected on behalf of the National Council, 15 of each class being from Teheran, and 15 from the provinces. Provision was made as to procedure in case of difference of opinion between the National Council and the Senate. But no Senate was actually ever elected.

By a rescript of February 11, Muhammad Ali Shah confirmed that of December 30 which he had signed as heir apparent, on October 8, 1907, he signed the final Constitution, and on November 12 before the House took the prescribed oath.

The National Council was not completed until the end of 1907, the first Parliament was dissolved on June 23, 1908, the Parliament building partly demolished and sacked by military, and decrees were issued announcing the abolition of the National Council. Insurrections broke out in many places, but only in June 1909, when Nationalist forces were marching upon Teheran, the Shah re-confirmed the Constitution of 1906 and (July 1) signed a revised ordinance concerning elections. The nationalists entered Teheran July 13, when the Shah fled to the Russian legation and abdicated (July 16). A provisional government was then formed and a council of nationalists constituted to advise the Cabinet. The Vali-Ahd was proclaimed Shah, Asud el Mulk Regent. Under the revised electoral law the number of members of the Majlis is fixed at 120 (15 for Teheran). Elections began in August. Three months later (November 15, 1909) the new Parliament was opened by the Shah, but only 67 members were present. On December 24th, 1911, the Nasr-el Mulk issued a Rescript declaring the Session ended, but no mention was made of elections in the near future. H. H. left Persia for Europe on June 11, 1912, nominally on short leave of absence. In August, 1912, a Committee of former Deputies and notables was formed to consider the question of new elections for the Majlis, but as they were unable to agree on the manner in which these elections were to be held the question of forming a new Majlis has since

were been dropped (November, 1912). The executive government is carried on under a Cabinet composed of eight members (January 16, 1913) —

*President* — Ala-es-Sultaneh

*Minister for Foreign Affairs* — Vozukh-ed Dowleh.

*Minister of Interior* — Fin-ed Dowleh

*Minister of Education* — Mushir-ed Dowleh.

*Minister of Posts and Telegraphs* — Musteshar-ed Dowleh

*Minister of Justice* — Momtaz-ed Dowleh

*Minister of War* — Mustafil Mamalik.

*Minister of Finance* — Kavamo Sultaneh

The country is divided into thirty three provinces, which are governed by governors-general, who are directly responsible to the central Government, and can nominate the lieutenant governors of the districts composed in their own governments-general. Some of the governments-general are very small, and do not bear subdivision into districts, &c., others are very large, and comprise several provinces. Governors-general and lieutenant governors are generally called Hâkim, the former also often have the title of Wâli, Fermân Fermâ, &c. A lieutenant-governor is sometimes called Nâib el Hukûmah, one of a small district is a Zâbit. Every town has a mayor or chief magistrate called Kalântar or Darogha, or Beglerbegi. Every quarter of a town or parish, and every village, has a chief who is called Kodkhodâ. These officers, whose chief duty is the collection of the revenues, are generally appointed by the lieutenant-governors, but sometimes elected by the citizens. Most of the governors have a vizir or a plahkâr, a man of experience, to whom are entrusted the accounts and the details of the government. The chiefs of nomad tribes are called Kikhâni, Ilbegi, Wâli, Bêrdâr, Shaikh, Tushmâl, they are responsible for the collection of the revenues to the governors of the province in which their tribe resides.

A law of May, 1907 provides for the election of rural and town councils. In these elections practically all subjects have a right to vote, and the councils will be in direct communication with the National Council.

On August 31, 1907, Great Britain and Russia agreed between themselves to limit the spheres of their respective interests in Persia to the Persian provinces adjoining the Russian frontier on the one hand and the British frontier on the other. The two Powers respect the integrity and independence of Persia, but, at the same time, contemplate the possible necessity of financial control in conformity with the principles of the agreement. The approximate area, population, and customs revenue of each of the three spheres are given as follows —

	Area sq miles	Population	Net Revenue Customs
British sphere	137 000	620 000	50 000
Russian sphere	265 000	4,700,000	368 000
Neutral sphere	128,000	1 910 000	180 000

### Area and Population.

According to the latest and most trustworthy estimates, the country—extending for about 700 miles from north to south, and for 900 miles from east to west—contains an area of 623,000 square miles. A vast portion of this area is an absolute desert, and the population is everywhere so scanty as not to exceed, on the average, fifteen inhabitants to the square mile.

The population now is estimated at about  $9\frac{1}{2}$  millions.

The number of Europeans residing in Persia does not exceed 1,200. There are just over 600 British subjects resident in Persia (exclusive of British Indians).

The principal cities of Persia are—Teheran, with 280,000, Tabriz, with 200,000, Isfahān, with 80,000, Meshed and Kermān, with 60,000, Yazd, with 45,000, Bārfurdāh and Shirāz, with 50,000, Hamadān, Kāvin, Kom, Kashān, Rosh, each with 30,000 to 40,000 inhabitants. Of the nomads 280,000 are Arabs, 720,000 Turks, 675,000 Kurds and Leks, 20,700 Balūchis and Gipsies, 284,000 Lurs.

### Religion.

Of the population about  $8\frac{1}{2}$  millions are Mahometans of the Shiāh sect, and 850,000 of the Sunni sect. 10,000 are Parsis (Guebres), 40,000 Jews, 50,000 Armenians, and 30,000 Nestorians.

The Mahometans of the sect called Shiāh differ to some extent in religious doctrine, and more in historical belief, from the Moslems of the Turkish Empire, who are called Sunni. The Persian priesthood (ulemā) is very powerful, and works steadily against all progress coming from Europe. Any person capable of reading the Koran and interpreting its laws may act as a priest (mullā). As soon as such a priest becomes known for his just interpretation of the divine law, and for his knowledge of the traditions and articles of faith, he is called a mujtahid, or chief priest. There are many mujtahids in Persia, sometimes several in one town. There are, however, only four or five whose decisions are accepted as final. The highest authority, the chief priest of all, is the mujtahid<sup>1</sup> who resides at Kerbela, near Baghdād, and some consider him the viceroy of the Prophet, the representative of the Imām. The Shah and the Government have no voice in the matter of appointing the mujtahids, but the Sheikh ul Islām, chief judge, and the Imām i-Jum'ah, chief of the great mosque (Masjed-i-Jam'ah) of a city, are appointed by Government. Under the Imām i-Jum'ah are the pish namāz or khatib (leader of public prayers and reader of the Khutbeh, the Friday oration), the mu'azzin (caller for prayers), and sometimes the mutavali (guardian of the mosque), this latter, as well as the mu'azzin, need not necessarily be a priest. All mosques and shrines have some endowments (wakf), and out of the proceeds of these are provided the funds for the salaries of the priests attached to them. The shrines of some favourite saints are so richly endowed as to be able to keep an immense staff of priests, servants, and hangers-on.

The Gregorian National Armenians form two dioceses, each under a bishop. One bishop resides at Tabriz, the other at Isfahān. There are also a few thousand Roman Catholic Armenians in Persia who have a bishop of their own rite at Isfahān, the bishop of the Latin rite residing at Urumiah. There is a wide tolerance exercised towards Armenians and Nestorians, Jews, and Parsis in cities where Europeans reside, in other places, however, they occasionally suffer oppression from Mussulmans belonging to the lower classes.

### Instruction

In recent years the educational question has played a prominent part in Persia. Many schools of various degrees, entirely on European lines, have been established, the Ministry of Education has undergone radical reforms,

<sup>1</sup> The last holder of this office died on February 20 1895. No successor has yet been elected and four or five high functionaries conduct affairs, each one striving to gain supremacy. The one who was on the point of acquiring supremacy died in November, 1911.

the Educational Council recently created is doing very useful work; female education has been greatly advanced. It is said that there are now some 180 schools in Persia with an aggregate of 10,000 pupils of both sexes.

There are many colleges (*medresseh*), supported by public funds, in which students are instructed in religion and Persian and Arabic literature, as well as in a certain amount of scientific knowledge, and many schools for children, while private tutors are very common, being employed by all families who have the means. A polytechnic school with a number of European professors, opened in Teheran in 1849, has done much towards introducing the knowledge of Western languages and science into Persia, and four French professors were recently engaged for work at the college. There are also military colleges at Teheran and Tabriz. A German school, with an annual subsidy of 2,400*l* from the Persian Government and 1,000*l* from Germany, was opened in 1907. Private subscriptions raised in Germany paid for the erection of a fine building with class-rooms for 700 pupils, and suitable quarters for five German teachers and their families. There are also ten or twelve Persian teachers. It has now about 200 pupils. There is also a French school supported by the *Alliance Française*. But the bulk of the population are taught only to read the Koran. A 'political college,' *Medresseh i Siass*, now having 80 pupils, was opened in 1909, and prepares candidates for service in the Foreign Office, which pays 75,000 *krans* per annum for its maintenance.

It has been decided to send Government students to various European countries, the students are chosen from the ablest Persian young men, who must be advanced in their studies in Persia, and have to pass a competitive examination so as to be accepted as Government students. Each one learns a profession designated by the Government, and an official is sent with them to look after them and watch their progress and make reports. Thirty Government students have already arrived in France, and there are several in England. These students cost the Government 550 *tomans* each per annum and are looked after by the 'Union Franco-Persan' in Paris.

### Justice.

Justice is administered by the governors and their representatives, and by the *Sheikhs-ul-Islam* and the priesthood. The former administer justice according to the *Urf*, the unwritten or common law, the latter according to the *Shari*, the written or divine law.

The dispensation of justice is always summary. In May, 1885, the Shah published a proclamation stating that henceforth no subject would be punished except by operation of law, and that all subjects had full liberty as to life and property. But another proclamation published in June annulled the first as far as regards liberty of property.

### Finance.

In May, 1911, Mr Morgan Shuster, accompanied by several American assistants, who had been loaned to Persia by the United States Government to reorganise the financial administration of the country, arrived in Teheran and took up the office of *Treasurer-General*. He resigned this position and left Persia on January 8, 1912. In June, 1912, the Belgian Administrator General of Customs, M. Mornard, was appointed to fill the vacant post, and was given a five years' contract as *Treasurer-General*. Every important centre now has a Belgian controller of finances, while the lesser important towns have a native.

The revenue of Persia has been affected by fluctuations in the value of silver. The revenue for 1910-11 has been estimated at 140,000,000 *krans*.

equivalent to 2,600,000*l* at the current exchange. Of this by far the largest item is the *malyak*, or proceeds of crown lands and land tax, which is over 64 million *krāna*. The net receipts for passports was 2,873,687 *krāna*.

The expenditure since November, 1903, has been greatly reduced, and the new Customs tariff, which came in force February 14, 1903, together with an improved system of administration and control, having increased the revenue by a considerable amount, estimated at 150,000*l*. to 200,000*l*. per annum, it was thought the expenditure would not exceed the receipts, but disorders and revolution have upset all arrangements, and expenditure still exceeds income. The Foreign Office now costs about 2,600,000 *krāna*, but of other expenditures there are no data.

More than half of the revenue consists of payments in cash or kind raised by assessments upon towns, villages, and districts, each of which has to contribute a fixed sum, the amount of which is changed from time to time by tax-assessors (*mumayiz*) appointed by the Government. Almost the entire burthen of taxation lies upon the labouring classes. The amount collected from Christians, Jews, and Parsis is very small. The other half of the revenue is from customs, posts, telegraphs, fisheries, mines, and other concessions.

Approximate Gross Customs Receipts during year 1911-12 compared with years 1909-10 and 1910-11 —

	1909-10	1910-11	1911-12
	£	£	£
Aserbaigan (Tabriz)	123 537	129 896	142,669
Caspian ports —			
Astara	42,080	33,403	31 843
Obfian (Bassah)	135 523	142 105	226,934

Total	728 733	768 271	961,843

The debt of Persia amounts to about 6½ millions made up thus To Russian Government, 3,800,000*l*, to British Government, 320,000*l*, to Russian Bank, 1,160,000*l*, to English Bank, 690,000*l*. Another loan, 1,250,000*l*. at 5 per cent., was floated in London, July, 1911 issued at 96½ In 1912 further loans of 250,000*l* were granted by England and Russia (half the total amount each), which are payable from the excess customs receipts of the South and North respectively. This is exclusive of compensation claimed by Russian, British, and French subjects for losses sustained, which amounts approximately to 340,000*l* (November, 1912)

## Defence.

### ARMY

The Persian army is of Oriental type, and is irregularly recruited. European officers of various nationalities have been employed from time to time, but have not been able to effect much. Certain districts are supposed

to furnish battalions, and each of the provinces several battalions. Where the tribal system prevails, the tribe furnishes 1, or sometimes 2, battalions, usually under their own chiefs. Christians and Jews pay a tax, and cannot be called on to serve. The *mazra*, or regular troops, consist, according to the official lists, of 79 battalions of infantry, 23 batteries of field artillery, and a battalion of pioneers, but whether all these units actually exist is uncertain. The strength of battalions is, nominally, from 600 to 800, and the batteries have from 4 to 8 guns. The total strength of the *nizam* troops does not, it is believed, exceed 60,000 men, of whom only about one half are present with the colours, though the official lists indicate a much larger number. The irregular troops amount to about 50,000 district and tribal horse, and an uncertain number of footmen, all badly, or indifferently, armed, and of little value.

There is also at the capital the "Cossack Brigade," consisting of 8 squadrons, 1 small battalion of infantry and a horse battery of 6 (Krupp) guns. The total strength does not exceed 2,000 of all ranks. The men are Persians, organized and trained by Russian officers.

In July, 1912, Russia obtained the formal consent of the Persian Government to the formation of a similar Cossack Brigade at Tabriz under Russian officers. The consent of the Persian Government was given as a condition for the withdrawal of Russian troops in Azerbaijan.

In 1905 the *nizam* was formed into 12 divisions under *sardars* (generals) directly responsible to the Shâh. The strength of the divisions varies from 5,000 to 10,000 men.

During his stay in Persia Mr. Shuster formed the nucleus of a *gendarmerie* force, to assist in the recovery of taxes. This force was subsequently taken over by a body of Swedish officers under Colonel Hjalmarson, lent to the Persian Government by the Swedish Government. There are at present (November, 1912) 19 Swedish officers in Persia and about 2,500 men.

#### NAVY

The navy consists of eight vessels, all doing service for the customs department, two built at Bremerhaven in 1884—the *Persepolis*, screw steamship, 600 tons, 450 h. p., armed with four 3 inch Krupp guns, the *Susa*, on the Karun, 80 h. p., one old Belgian steam yacht, the *Muzaffar*, purchased 1908, armed with two Hotchkiss guns five launches of 75 h. p., built at the Royal Indian Marine Dockyard, Bombay. Each has one French machine gun and cost 60,000 rupees (4,000 £).

#### Production and Industry

Besides great quantities of wheat, barley, rice, fruits, gums, drugs, wool, cotton, &c., Persia produces much silk.

In 1908-09 the value of silk exports was 279,157 £. In 1909-10 it rose to 358,255 £ while in 1910-11 it has fallen to 352,021 £, rising again in 1911-12 to 380,375 £. The opium industry was steadily increasing, and the export of the drug was valued at 450,014 £ in 1911-12. In 1909-10 exports were valued at 351,907 £, and in 1910-11 at 263,399 £. The production of gums, chiefly tragacanth, is increasing. The export of tobacco is decreasing. Raw cotton was exported to the value of 347,550 £ in 1908-09, in 1909-10, to 1,400,372 £, in 1910-11, to 1,407,608 £, and 1,479,278 £ in 1911-12. Wool was exported to the value of 190,319 £ in 1909-10, 1910-11, to 209,670 £, and in 1911-12 to 290,460 £. The wool of Khorassân is the best, and much of it reaches Bradford and Bata. Persian carpets, of which there are many kinds, are all made by hand. The export of carpets amounted to 848,812 £,

in 1909-10, 902,727 in 1910-11, and 977,429 in 1911-12. The principal centres of the industry are Tabriz, Hamadan, Sultanabad, and Kermān.

The mineral deposits of Persia are considerable, but great distances from shipping ports or markets, want of good roads, and in many parts scarcity of fuel and water, have prevented any development on a large scale. Mines of lead and copper exist in nearly all the provinces, and have been worked from ancient times, but there are many considerable deposits yet untouched. Some of the lead ores are argentiferous, but the precious metal is not extracted. Tin ore has been found in Azerbaijan, antimony, nickel, cobalt, in the desert region near Yezd, zinc near Tehrān, manganese and borax near Kermān, and there are enormous deposits of rich iron ore in several places, iron ochre is obtained on some islands in the Persian Gulf, principally at Hormuz, and coal of good quality near Tehrān, great seams of the latter in South Eastern Persia are not worked. Salt pits are abundant. A naphtha-bearing zone extends along the western frontier from Kurdistan to the Persian Gulf, and traces of the oil have also been discovered in Northern Persia near Resht, a concession for working the former was granted to a British subject in June, 1901, and boring operations undertaken in 1902 and 1903 having proved the existence of oil, large works have been erected and pipes are being laid from the wells to Muhamrah the nearest Persian Gulf port. The turquoise has been mined near Nishāpūr from an early age. The total revenues to the Government under the head of royalties and rents from mines are less than 16,000*l* per annum.

### Commerce

The principal centres of commerce are Tabriz, Teheran, Hamadan, and Isfahān, the principal ports, Bender Abbas, Lūnah, and Bushire on the Persian Gulf, and Astara, Enzeli, Meshed, Sar, and Bender Gex on the Caspian. On March 21, 1899, the Government abolished the farm system in Azerbaijan and Kermānshāh, and one year later in all other provinces, establishing at the same time a uniform duty of 5 per cent. *ad valorem* on imports and exports. However, the districts of Muhamrah (with imports and exports valued at about 800,000*l* per annum), of the Karūn River and of Kurdistan on the western frontier, that of Sistan on the eastern frontier, and some of the smaller ports on the Persian Gulf, were then not interfered with, and the greater part of the Persian Gulf pearl trade also escaped the authorities until the following year.

The commercial treaty with Great Britain made in 1857 provided for the 'most favoured nation treatment.' In October, 1901, a treaty between Persia and Russia was concluded, fixing a new tariff, but this treaty expressly reserved 'the most favoured nation treatment for the countries already enjoying it. The treaty was ratified in December, 1902, and the new tariff came into force February 14, 1903. A few days before, a new treaty (ratified in May) was made with Great Britain, under which the duties levied on British imports will be the same as on Russian imports.

According to the statistics published by the Minister of Customs the values of the imports and exports for the four years 1908-12 were as follows —

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1908-09	7,449,881	6,554,240	1910-11	9,890,153	7,568,532
1909-10	8,248,545	7,689,519	1911-12	11,494,169	8,415,094

The following table shows (in thousands of krāns) the values of the chief imports into, and exports from, Persia in 1910-11 and 1911-12 —

Imports	1910-11		Exports	1910-11	
	1900 Krāns	1900 Krāns		1900 Krāns	1900 Krāns
Oilseeds	129,078	178,764	Fruits	52,507	57,799
Sugar	131,806	135,016	Woolen carpets	45,183	43,571
Tin	24,822	33,048	Cotton	50,850	73,943
Gold and silver bars	42,467	72,123	Fish	5,831	6,788

Manufactured iron & steel	5,465	8,963	Tobacco	2,879	1,864
Timber	2,030	2,318	Dyes	1,463	1,547
Eggs of silkworm	2,687	2,401	Eggs	1,790	1,632
Wheat and barley	1,464	3,913			
Alcohol, Wine and Beer	—	1,291			

In the years ending March 20, 1911 and 1912, the distribution of the trade of Persia was mainly as follows —

From or to	Imports		Exports	
	1910-11	1911-12	1910-11	1911-12
	£	£	£	£
Afghanistan	82,512	118,144	49,236	64,782
Germany	279,549	332,592	41,770	96,607
Austria-Hungary	216,956	180,739	978	1,604
Belgium	162,126	198,954	9,28	13,491
China	5,068	11,760	44,740	121,480
United States	5,848	14,090	100,804	122,120
British Empire	2,793,808	4,414,079	748,267	1,107,407
France and Colonies	273,476	229,798	262,099	81,818
Italy	56,687	43,046	79,499	207,653
Netherlands and Colonies	30,260	39,638	163	6,177
Russia	4,391,164	5,245,905	5,244,533	5,663,896
Switzerland	24,876	16,083	325	414
Turkey	865,363	428,316	606,084	727,071
Moscow	3,676	2,716	4,318	8,848
Oman	47,513	27,016	95,601	119,687

Tonnage entered at Bushire, Lingah, Bender Abbas, Muhammah, and several smaller ports was in 1910-11, 1,443,588 tons (1,151,822 British), in 1911-12, 1,647,314 tons (1,309,119 British). At Caspian ports in 1910-11, 518,431 tons, all Russian; in 1911-12, 825,966 tons, all Russian.

There are trade routes through Trebizond, through Reht and Meshed

to Russia, through Khorassan and Sistan to Afghanistan and India, and through Kermanshah to Baghdad

Total trade between Persia and United Kingdom (in thousands of pounds) for 5 years —

	1907	1908	1909	1910	1911
Imports from Persia to U K	£ 696	£ 450	£ 298	£ 443	£ 878
Exports to Persia from U K	690	477	351	744	828

### Money and Credit.

The Shah in 1889 granted a concession to Baron Julius de Reuter for the formation of a State Bank of Persia, with head office at Teheran and branches in the chief cities. The bank was formed in the autumn of the same year, with the title "The Imperial Bank of Persia," and incorporated by Royal Charter granted by H M the late Queen, and dated September 2, 1889. The authorised capital is 4 millions sterling, which may be increased. The bank started with a capital of one million sterling, of which the greater part was remitted to Persia at the then reigning exchange of 32-34. In consequence of the great fall in silver and the rise in the exchange, to 50 or more, the capital was reduced in December, 1894, to 650,000*l*. The bank has the exclusive right of issuing bank notes—not exceeding 600,000*l* without the assent of the Persian Government. The issue of notes is on the basis of the silver *krân*. In virtue of one of the articles of the concession the cash reserve for the first two years was 50 per cent, and afterwards 33 per cent. The bank had the exclusive right of working throughout the Empire the iron, copper, lead, mercury, coal, petroleum, manganese, borax, and asbestos mines, not already conceded. It started business in Persia in October, 1889, in April, 1890, took over the Persian business of the New Oriental Bank Corporation (London), which had established branches and agencies in Persia in the summer of 1888, and now has branches at Tabriz, Resht, Kazvin, Meshed, Isfahan, Yazd, Shiraz, Kerman, Hamadan, Sistan, Kermanshah, Bushire, Muhamrah, Abvaz, Sultanabad, and Bombay, and agencies at several other towns. The mining rights were ceded to the Persian Bank Mining Rights Corporation, Limited, which was formed in April, 1890, and went into liquidation in January, 1894. There is also established at Teheran the Russian 'Banque d'Escompte,' formerly 'Banque des Prêts de Perse' (which is connected with the Russian State Bank and floated the loans of 1900 and 1902 to Persia), and a highly paid official permanently resides at Teheran as Russian 'Financial Agent in Persia.' A concession for a National Bank was signed, February 6, 1907. The capital of this bank will be 15,000,000 *tomans*. It will have the right to issue notes after the Imperial Bank a right has expired. It has not yet (January, 1913) been established. In July, 1907 a concession was granted for a German Bank for a period of 30 years. The capital is fixed at 200,000*l*. It has not yet (January, 1913) been established.

### Communications.

A small railway from Teheran to Shah Abdul-azim (six miles) was opened in July, 1888, and is in the hands of a Belgian company, 'Société des chemins de fer et tramways de Perse.' The river Kärün at the head of the

Persian Gulf has been opened to foreign navigation as far as Ahwáz, and Messrs. Lynch Brothers are running a steamer on it once a fortnight, with a subsidy from the British Government.

Until 1903 the only carriageable roads in Persia were Teherán Kom and Teherán-Resht, the former 81 miles, the latter about 230 miles, and on both mails and travellers were conveyed by carts. Since then good roads have been made from Tabriz to Julfa (Russian frontier), Kazvin to Hamadán, Meshed to Askabad, Kom to Sultanabad, and others. Mails and passengers are now conveyed by carts on them and some other roads, but the latter, only slightly improved and being practically as nature made them, are somewhat difficult for wheeled traffic. A concession for the construction of a cart road with the option of changing it later for a "chaussée," or macadamized road, from Kazvin to Enzeli on the Caspian was granted to a Russian firm in 1893, and the Russian Government having aided with capital and guarantee, construction was begun in 1897 and the road opened for traffic in August, 1899. The concession includes the road from Kazvin to Teherán, which has been open for wheeled traffic since 1880, and a branch from Kazvin to Hamadán. All these are in good working order now.

In 1898 Messrs. Lynch took over a concession granted to a Persian subject for a caravan road between Ahwáz and Ispahan, with rights of levying tolls, and opened the road for traffic in the autumn of 1900. In 1903 Messrs. Lynch acquired the concessionary rights of the Imperial Bank of Persia for the roads Teherán Kom Ispahan, Kom Muhamrah, and formed the "Persian Road and Transport Company," which started construction on the Kom Ispahan section in the summer of 1904.

In virtue of another concession a Russian company has constructed a carriageable road from Julfa (Perso-Russian frontier) to Tabriz, with a view of extending it to Kazvin.

Persia has a system of telegraphs consisting of 6,312 miles of line, with 10,754 miles of wire, and 131 stations.

(a) 1,706 miles of line with 5,318 miles of wire are worked by an English staff, and form the 'Indo-European Telegraph Department in Persia,' a British Government department, established in virtue of a number of conventions from 1843 to 1901 between the British and Persian Governments. The last convention was for the construction and working by the British Government of a three wire line from Kashan to British Beluchistan via Yazd, Kerman, and Bam. Telegraphic communication with India was effected in May, 1904. (b) 457 miles of line with three wires, 1,871 miles of wire between Teherán and Julfa on the Russo-Persian frontier, are worked by the Indo-European Telegraph Company, Limited, according to its concession of 1868. (c) About 3,600 miles of single wire lines belong to the Persian Government, and are worked by a Persian staff.

The first regular postal service, established by an Austrian official in Persian employ, was opened January, 1877. Under it mails are regularly conveyed to and from the principal cities in Persia. There is a service twice a week to and from Europe via Resht or Tabriz and Tiflis (letters to be marked 'via Russia') and a weekly service to India via Bushire. There are 318 post offices. In 1902 the post office was joined to the Customs Department worked by Belgian officials. In August, 1900, posts and telegraphs were placed in charge of a Minister of Posts and Telegraphs, who is a member of the Cabinet, but as to the number of letters, postcards, parcels, &c., conveyed, and telegrams transmitted, very few statistics are obtainable. During the year 1911-12, 354,894,999 letters, post-cards and newspapers, of which 2,926,300 were registered, were delivered in Persia, and there were 229,009 parcels delivered from Europe via Russia.

## Money, Weights, and Measures

The monetary unit is the *krân*, a silver coin, formerly weighing 28 *nakhods* (88 grains), then reduced to 26 *nakhods* (77 grains), now weighing only 24 *nakhods* (71 grains) or somewhat less. The proportion of pure silver was before the new coinage (commenced 1877) 92 to 95 per cent., it was then fixed at 90 but occasionally coins with only 89½ have been turned out from the Mint. In 1874 a *krân* had the value of a franc, 25 being equal to 1. The value of a *krân* is at present (January, 1912) about 4½d., a 1l bill on London being worth 56 *krâns*.

The coins in circulation, with their values calculated at exchange 1l = 50 *krâns*, are —

Copper		Silver	
<i>Pał</i>	0 12d	Five <i>Shâhts</i> = 10 <i>Pał</i> = ½ <i>Krân</i>	1 20d
<i>Shâht</i> = 2 <i>Pał</i>	0 24d	Ten <i>Shâhts</i> = ½ <i>Krân</i>	2 40d
Two <i>Shâhts</i> = 4 <i>Pał</i>	0 48d	One <i>Krân</i> = 20 <i>Shâhts</i>	4 80d
Four <i>Shâhts</i> = (1 <i>Abdast</i> )	0 96d	Two <i>Krâns</i>	9 60d
		Five <i>Krâns</i>	2s 0 00d

In consequence of an excess of coinage by a former mint master the copper money greatly depreciated in value since 1896 and was circulating at less than its price of copper, viz 80 to 83 copper shahis (weighing about ½ lb) to one silver *krân* (4½d). The Government then decided to introduce a nickel coinage instead, great quantities of five and ten centimes pieces, of same size and weight as those current in Belgium, and of the nominal value of ½ and 1 *krân*, were coined at Brussels and put into circulation in the Autumn of 1900, the copper coinage being withdrawn, and of these nickel pieces nearly five million *krâns* face value are now (January 1911) in circulation.

Gold coins are ½ *Toman*, ¼ *Toman*, 1 *Toman*, 2 5 and 10 *Tomans*, but they are not in circulation as current money, because of their ever varying value in *Krâns* (silver) and no coins of the higher values have been struck for some years. A *Toman* in silver is the equivalent of 10 *Krâns* (now worth 3s 4d), but a gold *Toman* has a value of 22 *Krâns* (7s 4d).

Accounts are reckoned in *dinârs*, an imaginary coin, the ten thousandth part of a *toman* of ten *krâns*. A *krân* therefore = 1,000 *dinârs*, one *shâht* = 50 *dinârs*.

The unit of weight is the *miskâl* (71 grains), subdivided into 24 *nakhods* (2 96 grains) of 4 gandum (74 grain) each. Sixteen *miskâls* make a *sir*, and 5 *sir* make an *abbâssi*, also called *wakkah*, *kervânkeh*. Most articles are bought and sold by a weight called *batman* or *man*. The *mans* most frequently in use are —

<i>Man-i-Tabrîz</i> = 8 <i>Abdasts</i>	= 640 <i>Miskâls</i> = 6 49 lbs.
<i>Man-i-Nah Abdast</i> = 9 <i>Abdasts</i>	= 720 " = 7 30 "
<i>Man-i-Kahmah</i> (the old <i>man</i> )	= 1,000 " = 10 14 "
<i>Man-i-Shâh</i> = 2 <i>Tabrîz Mans</i>	= 1,280 " = 12 98 "
<i>Man-i-Ray</i> = 4 "	= 2,560 " = 25 76 "
<i>Man-i-Bender Abdast</i>	= 840 " = 8 52 "
<i>Man-i-Hâshemi</i> = 16 <i>Mans</i> of 720 "	= 116 80 "
Corn, straw, coal, &c., are sold by <i>Kâsredr</i> = 100 <i>Tabrîz Mans</i> = 619 142,,	

The unit of measure is the *zar* or *gaz*, of this standard several are in use. The most common is the one of 40 95 inches; another, used in *Azerbâijân*,

equals 44.09 inches. A farsakh theoretically = 4,000 zar of 40.98 inches = 8.87 miles. Some calculate the farsakh at 6,000 zar of 44.09 inches = 4.17 miles.

The measure of surface is jerib = 1,000 to 1,066 square zar of 40.98 inches = 1,394 to 1,579 square yards.

## Diplomatic Representatives.

### 1. OF PERSIA IN GREAT BRITAIN

*Envoy Extraordinary and Minister Plenipotentiary* — Mirza Mehdi Khan Mushir el Mulk.

*Councillor* — Mirza Abdul Ghaffar Khan

*First Secretary* — Mohamed Ali Khan Ebtisam Homayoun

*Third Secretary* — Mirza Gholam Ali Khan Ardalan

*Consul General* — H. S. Foster

### 2. OF GREAT BRITAIN IN PERSIA

*Teheran Envoy, Minister, and Consul-General* — Sir W. B. Townley K. C. M. G. (1912)

*Councillor* — C. Alban Young, M. V. O.

*Secretaries* — W. Garnett and Sir Coleridge A. F. Kennard, Bart.

*Military Attaché* — Captain William Fordham

There are Consular representatives at Teheran, Tabriz (C.), Resht, Bushire (C. G.), Bunder Abbas, Meshed (C. G.), Isfahan (C. G.), Sistan, Kerman, Mahanrah, Shiraz, Kermanshah, Hamadan (native agency), Yazd, Ahwaz, Turbat-i-Haidari, Sultanabad.

## Statistical and other Books of Reference concerning Persia

### 1. OFFICIAL PUBLICATIONS

*Blue Books*.—Affairs of Persia December 1906, to November 1908. Persia, No. 1 1909.—Continuation of Persia, No. 1 Persia, No. 2, 1909.—Continuation of Persia, No. 2 Persia, No. 1, 1910

## PERU

(REPÚBLICA DEL PERÚ)

## Constitution and Government.

THE Republic of Peru, formerly the most important of the Spanish Viceroyalties in South America, issued its declaration of independence July 28, 1821, but it was not till after a war, protracted till 1824, that the country gained its actual freedom from Spanish rule. The Republic is politically divided into departments, and the departments into provinces. According to the Constitution proclaimed on November 10, 1860, the legislative power is vested in a Senate (52 members) and a House of Representatives, (116 members) the latter composed of deputies of the provinces, in the proportion of one for every 30,000 inhabitants or fraction exceeding 15 000 and the former of representatives in the proportion of four senators for each department which has more than eight provinces, three for each department which has less than eight provinces and more than four, two for each department which has less than five and more than one, one for a department having only one province, and one for the littoral province of Callao. Senators must have an income of 1,000 soles (100L.) a year, or belong to a scientific profession and deputies 500 soles (50L.) a year, or belong to a scientific profession. Both senators and deputies are elected by a direct vote. Every two years one-third of the members of each chamber, as decided by lot, retire. Congress meets annually on July 28, and sits for 90 days only. It may be summoned as often as necessary, but no extraordinary session may last more than 45 days.

The executive power is entrusted to a President, elected for 4 years and not re-eligible till after another 4 years. He receives 30,000 soles (3,000L.) a year and 18,000 soles (1,800L.) for expenses. There are two Vice-Presidents, who take the place of the President only in case of his death or incapacity, and they are elected for four years. The Vice-Presidents receive no salary as such. The President and Vice Presidents are elected by direct vote.

*President of the Republic.*—Señor Guillermo Billinghurst, installed September 24, 1912 until 1916

The President exercises his executive functions through a Cabinet of six ministers, holding office at his pleasure. The ministers are those of the Interior, War and Marine, Foreign Affairs, Justice, with Worship and Instruction, Finance and Public Works. Each minister receives 6,000 soles (600L.) a year. None of the President's acts has any value without the signature of a minister.

The departments are divided into provinces (95 in all), and these are subdivided into districts (801 in all). Each department is administered by a Prefect, and each province by a Sub Prefect. Municipal councillors are elected by direct vote, and foreigners are eligible.

## Area and Population.

There has been no enumeration of the population in recent years. The census returns of 1876 put the number of inhabitants at 2,660,881, of whom about 15·8 per cent. were white, 1·8 per cent. negroes, 57·6 per cent. Indian, 24·8 per cent. mestizos (Cholos and Zambos), and 1·2 per cent. Asiatic, chiefly Chinese. An estimate in 1908 gives the population in that year as 4,590,000. The population of the capital, Lima, according to the municipal

census of 1908, is 140,884, Callao 81,000, Arequipa 35,000 to 40,000, Cuzco 10,000 to 15,000, Iquitos district 12,000, Ayacucho 14,348, Huara 7,446, Huacho 6,288.

The Republic (including Tacna) is divided into 18 departments and 2 provinces (Callao and Moquegua), the areas of which, according to estimates supplied by the Lima Geographical Society, are given below with the population, according to the census returns of 1876 (the latest official one) and an estimate for 1896. The estimate, however, is not to be accepted as satisfactory, grave doubts being entertained whether the population is increasing. The Peruvian Government are of opinion that the population is under 3,000,000, the London Stock Exchange has taken 4,000,000 as a basis for computation —

Departments	Area English square miles	Population		Pop per square mile, 1896
		1876	1896	
Piura	16,325	135,615	313,909	12.7
Cajamarca	12,338	212,743	442,422	35.2

Lambayeque	4,614	66,788	124,091	26.9
Tacna	12,590	36,609	50,449	4.0
Total	695,723	2,566,681	4,609,999	6.6

<sup>1</sup> Province of Lima, pop. (1896) 179,927. <sup>2</sup> Callao and Moquegua are provinces, not departments.

In 1912 a new political and geographical department was created—Madre de Dios.

There are, besides, many uncivilized Indians, but their numbers are absolutely unknown. The Peruvian Government encourages immigration of properly qualified persons, but would be settlers entirely destitute of capital are mentioned as undesirable.

As a result of the war with Chile, the latter country has annexed the province of Tarapacá. The Chileans have also, under the treaty signed in 1883 and ratified in 1884, occupied the provinces of Tacna and Arica since 1883. A popular vote should in 1894 have decided to which country they are to belong, but owing to the failure of negotiations for arriving at a *modus vivendi*, the decision was deferred. In 1913, however, an agreement between the two countries was accepted, and a Treaty of Commerce and Navigation signed.

As to the boundary dispute with Bolivia an arrangement has been come to by direct negotiations between Bolivia and Peru. The frontier line

between them was fixed from the mouth of the Heath to that of the Yaverija. Those with Colombia and Ecuador were referred to the King of Spain. The question at issue concerned the possession of over 100,000 square miles of land rich in rubber timber, and probably gold lying about the head waters of the Amazon. The King, on the evident unwillingness of Ecuador to decide the dispute by arbitration, renounced his functions as arbitrator in November, 1910. The United States then intervened, and hostilities were for the moment averted by the agreement of the disputants to accept the mediation of the United States, Argentina, and Brazil. A definite arrangement has been made with Brazil as to boundary, favourable, on the whole, to Peru.

The region north of the Marañon from the Pongo de Manseriche is claimed by Ecuador and Colombia and Peru. This region formed in the Spanish Colonial days the Comandancia de Maynas, and was allocated to the Virreynato of Santa Fé, then to the Audiencia of Quito, and for religious and ecclesiastical purposes subject to the Archbishop of Lima. It has been occupied by Peru since 1840.

### Religion

There is a Roman Catholic archbishopric (Lima, dating from 1545), 8 suffragan bishoprics and 3 Apostolic Prefectures. By the terms of the Constitution there exists absolute political, but not religious freedom, the charter prohibiting the public exercise of any other religion than the Roman Catholic, which is declared the religion of the State. But practically there is a certain amount of tolerance there being Anglican churches and missionary schools in Callao, Lima, Arequipa, and Cuzco. The churches and convents are the property of the State. The State pays 16,000l. annually for the purposes of public worship, including 300l. for missions, (though this sum has not been paid since 1907). In 1897 an Act was passed enabling non-Catholics to contract civil marriages. In 1903 an Act was passed giving still greater facilities for the marriage of non Catholics.

### Instruction, Justice

Elementary education is by law compulsory for both sexes, but the law is not enforced. It is free in the public schools that are maintained by the municipalities. In 1911, there were in Peru 2 152 primary schools with an attendance of 146,400, the number of children who ought to have attended was 407,987. There were 2,750 teachers. There were (1912) 27 colleges in the republic, with 4 674 pupils. For elementary education (1912) 245,810l. were appropriated, and for secondary education 80,523l. High schools are maintained by the Government in the capitals of the departments, the pupils paying a moderate fee. There is in Lima a central university, called 'Universidad de San Marcos,' founded by Charles V in 1551, it has faculties of jurisprudence, literature, medicine, political science, and theology. There are also universities at Arequipa, Cuzco, and Trujillo. Lima possesses a school of mines and civil engineering, created in 1874, with good collections and laboratories, a national agricultural school, and a school of arts and trades recently established. There are in the capital and in some of the principal towns private high schools under the direction of English, German, and Italian staffs. There is also a military and a naval school. Lima has also a public library, besides that of the university and school of mines.

Justice is administered in the Supreme Court at Lima composed of 11 judges and 2 fiscal, and in Superior and Minor Courts at Lima and 8 other judicial districts. The judges of the Supreme Court are chosen by Congress

from lists of names presented by the Government, those of the Superior Courts and of the Minor Courts are chosen by the Government from lists of names presented by the Supreme and Superior Courts, respectively

### Finance

For the collection of the dues on alcohol, opium, tobacco, and stamps, a contract was made in 1900 with a syndicate formed for the purpose (Compañía Nacional de Recaudación). The syndicate retains 60,000% for expenses of collection, and also 8 per cent. of the profits, and hands over the remaining 94 per cent. to the Government. The contract with the Company expired December 31, 1911. In March, 1912, negotiations were entered on with a new company, the contract with the old company remaining in force until its functions are taken over by the new organisation. The old company collected 1,623,433% in 1911.

In 1896 salt was declared to be a Government monopoly, the proceeds from which were to be devoted exclusively to the ransom of Tacna and Arica, but the money thus obtained has been, and is to be henceforth, used for the guarantee of loans raised by the Government. The administration of this branch of revenue has also been farmed to a company (Compañía Salinera Nacional). This company collected 181,630%.

The revenue and expenditure for 5 years (ended May 31) were as follows in soles (10 soles = 1%)

	1909	1910	1911	1912 <sup>1</sup>	1913 <sup>1</sup>
	£	£	£	£	£
Revenue	8,046,386	2,795,775	3,892,115	5,209,337	5,209,337
Expenditure	3,749,990	2,685,822	3,378,647	2,679,924	2,679,924

<sup>1</sup> Estimate identical for 2 years.

The foreign debt of Peru was made up of two loans, contracted in England in 1870 and 1872, amounting to 31,579,080%. In 1889 the debt, including arrears of interest, amounted to 22,998,651%. In January, 1890, by the final ratification of the Grace-Donoughmore contract, Peru was released of all responsibility for the two loans, and the bondholders had ceded to them all the State railways, and certain rights over guano deposits, mines, and lands in Peru for 66 years.

The terms of this contract were not carried out either by the Government or the Peruvian Corporation, and after long negotiations the agreement of April 2, 1907, was signed. The Peruvian Corporation is a foreign company with headquarters in London, formed in 1890 to take over one half of the then existing Peruvian foreign debt of some 42,000,000%. Under it, the obligations created on either side by the contract of 1890 are annulled, certain matters being, however, reserved for arbitration or for future contracts. The Government is to pay the Corporation annually for 80 years the sum of 80,000% in monthly instalments, beginning in July, 1907. The Corporation will proceed with the work of railway construction, taking in hand the continuation of the Oroya-Huancayo and Sicuan-Cusco lines, and apparently the construction of the Yonan Chiletta line (not yet begun). It will repay to Government the sums it has received on account of these lines, and will take over the Government contracts and liabilities for work on the Huarí-Huancayo and Chicla-Cusco lines. The Corporation lease is to be extended by 17 years, during which the Government will receive 50 per cent. of the net receipts (the service of railway obligations up to 6,000,000% being deducted), and the rates of the taxation of the Corporation railways are fixed for 80 years. The Mollendo port works, the Chura canal, the Cerro de Pasco mines, and debt of 250,000% due to Chile are the chief subjects reserved.

The Government extended the contract with the Peruvian Corporation for 10 years from September 11, 1911.

The Foreign debt of Peru is stated to amount to 5,353,782%, of which 2,160,000% represents the capitalised value of annuities of 80,000% and the

remainder the debt for wharves and docks, 80,000*l.*, and loans of 1905 and 1906 amounting to 900,000*l.* at 6 per cent. interest. The internal liabilities of Peru consist of a debt amounting to 2,868,645*l.* at 1 per cent. interest, and a non interest-bearing debt of 471,855*l.* In 1912 it was estimated the Government owed tradesmen and merchants in Lima approximately 2,500,000*l.*

### Defence

Military service in Peru is compulsory and universal. The terms are 3 years in the active army (4 in the cavalry), 7 years (or 6) in the first reserve, 5 in the second reserve, and 15 years in the National Guard. In peace, the army consists of 5 battalions, 7 squadrons, 6 batteries, &c. Total establishment about 6,500 of all ranks. The infantry are armed with the Mauser rifle, model of 1891, and the cavalry have the Mauser carbine. The country is divided into five military districts. Total strength of police force, 5,408 (2,413 civil guards, 1,900 mounted police, 1,905 foot police).

The Peruvian navy now consists of 6 vessels the *Lima*, a cruiser of 1,700 tons displacement, which has been re-boilered and is to be re-armed, the *Iquitos*, transport (used also as a training ship for boys), the *Chalaco*, a small steamer used as transport or dispatch boat. Two cruisers, the *Abasco* and the *Coronel Bolognesi*, 3,200 tons and 24 knots speed were launched at Barrow in April 1906. In 1911 the old French armoured cruiser *Dupuy de Lôme* was purchased, and renamed *Alfonso de Ugarde*. She is of 6,400 tons displacement, armament, 2 7 6 inch, 6 6 4 inch, armour 4 inches. The horse power is 13,000 and in 1904 when the ship was re-boilered she made 22 knots speed.

### Agriculture and Industry

The chief agricultural productions of Peru are cotton, coffee, and sugar. For the extension of cotton-growing, irrigation works are in progress. The chief coffee-growing districts are those of Chanchamayo, Perené and Paucartambo in Central Peru, where the Peruvian Corporation has done much useful colonising work. Coffee is also grown in the Huanuco district. The concession to the Corporation comprises about 2,750,000 acres, but the labour and transport difficulties in the tropical forest region are serious, much less than half the area conceded for colonisation is as yet occupied. The sugar industry is carried on chiefly in the coast region. The total area devoted to sugar cultivation is about 200,000 acres, of which about half is planted with cane. In 1911 123,786 tons were exported. Cocoa cultivation is extending about 300,000 cocoa trees having been recently planted in the Perené region. Rice is extensively grown, the annual production being about 30,000 tons. There are about 20 rice mills in the country. Tobacco, wines and spirits, wheat, olives, ramie, and maize, are also produced. In 1909 the Government created a tobacco monopoly for the manufacture, importation and sale of tobacco. Total annual output about 2,300,000 pounds. Silk culture is being tried in the coast region. The most important coca growing district is in the province of Otasco in the department of La Libertad, where there are several coca estates. Cocaine is manufactured in Lima, Otisco, and several other towns. Besides, there are in the country dyes, cinchona, and other medicinal plants. There is a large export of alpaca, sheep, and llama wool. Thousands of square miles of healthy and fertile land of unsurpassed beauty on the eastern slopes of the Andes are available for colonisation, and no doubt will soon be opened up. Rubber is collected in large quantities and shipped down the Amazon from Iquitos.

The guano deposits on Huanillos, Punta Lobos, and Paballon de Pica, which had been delivered over to the Peruvian Corporation, reverted to the Chilean Government on February 2, 1901, they contained 40 or 50 thousand tons of guano, but those on the island of Lobos de Afuera, and at some places on the coast, still remain in possession of the Corporation. In 1910 the Corporation exported 61,575 tons, in 1911, 69,587 tons.

The mineral resources of Peru comprise gold, silver, copper, lead, zinc, nickel, iron, quicksilver, cobalt, bismuth, molybdenum, vanadium, borax, coal, salt, sulphur, and petroleum, besides gypsum, kaolin, ochre, and other valuable earths. Gold, silver, and copper are worked chiefly in the Cerro de Pasco region. The most active mining companies are American, but Peruvian, English, and Franco-Peruvian companies are also at work. The mineral output for 1910 amounted to the value of 3,378,212<sup>1</sup>/<sub>2</sub>. For 1910 the gold output was valued at 86,612<sup>1</sup>/<sub>2</sub>. Value of metal exports in 1911, 1,860 189<sup>1</sup>/<sub>2</sub>.

There are over 1,000 looms employed in cotton factories consuming 1,600,000 kilos of cotton and turning out about 15 million yards of cloth annually.

### Commerce

The value of the trade of Peru in 5 years (exclusive of Department of Loreto) has been as follows (10 soles = 1<sup>1</sup>/<sub>2</sub>) —

	1907	1908	1909	1910	1911
Imports	£ 5,614,787	£ 5,225,635	£ 4,353,330	£ 4,631,280	£ 5,371,368
Exports	£ 6,747,782	£ 5,375,712	£ 6,184,870	£ 6,408,38 <sup>1</sup> / <sub>2</sub>	£ 7,432,937

The values of the total exports of the principal articles from Peru in 1910 and 1911 are shown by the following table —

Articles	1910	1911	Articles	1910	1911
	£	£		£	£
Coca	19,768	55,000	Minerals	6,868,661	1,067,709
Cocaine	87,215	78,291	Petroleum	114,049	288,077
Coffee	22,378	49,408	Rice	44,889	30,101
Cotton	956,407	999,463	Rubber	1,334,851	623,044
Guano	176,498	270,523	Sugar	1,243,451	1,416,566
Hats Panama	117,500	173,063	Wool	460,835	363,940
Hides and skins	88,300	104,808			

The distribution of the trade was mainly as follows (10 soles = 1<sup>1</sup>/<sub>2</sub>) —

From or to	Imports		Exports	
	1910	1911	1910	1911
	£	£	£	£
United Kingdom	1,678,701	1,719,831	2,446,834	2,306,640
Germany	780,710	940,306	843,176	842,307
U.S.American	779,432	1,166,003	1,974,865	2,007,589
France	463,903	289,530	760,113	800,473
Chile	181,188	76,769	906,508	1,274,083
Italy	167,790	199,450	1,007	—
Belgium	240,505	338,083	108,837	99,323
Australasia	11,239	8,767	2,014	—

Maritime custom receipts in 1911 amounted to 2,221,660<sup>1</sup>/<sub>2</sub>.

Under the treaty of 1850 there is reciprocal freedom of commerce and navigation between the United Kingdom and Peru.

Total trade between Peru and United Kingdom in thousands of pounds for 5 years —

	1906	1909	1910	1911	1912
Imports from Peru to United Kingdom	£ 2 990	£ 3 043	£ 3 638	£ 3 150	£ 3,298
Exports to Peru to United Kingdom	£ 1 337	£ 1 380	£ 1 315	£ 1,392	£ 1 474

### Shipping and Navigation.

At Callao there entered, in the foreign trade, in 1911, 762 vessels of 1,574,213 tons, and cleared 575 of 1,373 372 tons. The following steamship lines trade to Peruvian ports — Pacific Steam Navigation Company, Compañia Sud Americana de Vapores, Lamport and Holt Line, Gulf Line, Merchants Line (the New York and Pacific Steamship Company), Kosmos Line, Boland Line, Toyo Kisen Kaisha (the Oriental Steamship Company), Lee Chai Line, Barber and Co., Inc. Line, Hamburg Amerika Line, Compañia Peruana de Vapores y Dique del Callao (Peruvian Steamship and Dock Company of Callao). Since 1886, foreign sailing vessels may not engage in Peruvian coasting trade, but foreign steamers, with special authorisation, may.

The merchant navy of Peru in 1911 consisted of 11 steamers of 12,673 tons, and 60 sailing vessels (over 50 tons) of 31 454 tons.

### Internal Communications

Good roads and bridges are required all over the country, and great efforts are being made for their construction. There is a carriage road from Rimani to Cusco, 90 miles.

In 1911 the total working length of the Peruvian railways was 1,656 miles, of which 1,120 miles was worked by the Peruvian Corporation. The Peruvian Corporation owns and operates the Central Railway of Peru, the Southern Railway of Peru, the Guayaquil La Paz Railway, the Trujillo Railway, the Paita Railway, the Pacasmayo Railway, the Pisco and Ica Railway, the Lake Titicaca steamers, and the River Desaguadero Navigation. It also operates for the Government the section of the Chimbote Recuay Railway from Chimbote to Tablonces. On May 22 1911, the Peruvian Corporation leased for a term of 30 years, from June 30, 1911, the Ilo-Moquegua Railway, which runs for about 60 miles through an agricultural district, together with its rolling stock and the mole at Ilo, the Corporation having the option of terminating the lease at the end of the first twenty years. In consideration of this lease the Corporation is to spend about 10,000 on the water surface at Ilo and to supply the inhabitants of Ilo with water at an improved rate. The capital outlay by the Corporation is to bear interest at 6 per cent. per annum and is to be amortised from the net receipts of the mole and railway. The gauge of the railways is 4ft. 8½in. except that of the Chimbote and Trujillo line which is 3ft. Electric railways connect Lima with Chorrillos and with Callao. The Peruvian Corporation is building a breakwater at Mollendo.

There were 226 telegraph offices (576 belonging to the State) in 1911. The length of State telegraph lines in 1911 was 2,500 miles, and of wire, 7,794 miles. Miles under construction (1911) 225. Still to be built, 1,072

miles Number of telegrams (1911) 1,678,857 Three submarine telegraph cables connect Peru and Chile, and one connects Peru and the Republic to the north A telephone system has a network of 3,000 miles Wireless telegraph lines between Iquitos and Masisa, and between Iquitos and Puerto Bermudez were inaugurated July 8, 1908 In 1912 wireless offices at Callao and Lima were opened Total length of telephone wire (1911), 10,500 miles

In 1911 there were 1,057 post offices, letters and packets transmitted, 28,621,788

### Money and Credit

A decree was issued by the President of the Republic on January 10, 1898, to give effect to the law of December 29, 1897, establishing a gold currency By Act of December 14, 1901, gold became the only standard The national gold coin, the *libra*, is of the same standard and weight as the pound sterling, which is also legal tender, 10 soles = 1/2 sterling Silver is legal tender up to 100 soles Peru has no paper currency of any kind, and the use of cheques on deposit accounts is very restricted

In 1911 the National Mint coined 42,246 Peruvian gold pounds and 62,444 five sol pieces The value of imported bullion in 1911 was 10,200 On September 16, 1912, the Government, in order to meet an increased demand for small coins, authorized the bank of the Republic to coin gold pieces of the value of one fifth of a Peruvian pound

In Peru the commercial banks are the Bank of Peru and London (Capital, 500,000) the Italian Bank, the International Bank of Peru, and the Banco Popular, the Caja de Depósitos y Consignaciones, the Banco Alemán Transatlántico, and the Caja de Ahorros de la Beneficencia de Lima, a Savings Bank with deposits amounting to over 200,000

### Money, Weights, and Measures.

The gold coin is the *Libra*—the English sovereign. The coinage of gold 5 sol pieces (equivalent to half sovereigns) has been authorized. Silver coins are the *Sol* (10 soles = 1 libra),  $\frac{1}{2}$  sol,  $\frac{1}{4}$  sol,  $\frac{1}{8}$  sol,  $\frac{1}{16}$  sol. Bronze coins are 1 and 2 centavo pieces (100 centavos = 1 sol)

The Ounce	=	1 014 ounce avoirdupois.
„ <i>Libra</i>	=	1 014 lb „
„ <i>Quintal</i>	=	101 44 lbs. „
„ <i>Arroba</i> { of 25 pounds	=	25 86 „ „
„ { of wine or spirits	=	6 70 imperial gallons.
„ <i>Gallon</i>	=	0 74 „ gallon.
„ <i>Vara</i>	=	0 927 yard.
„ <i>Square Vara</i>	=	0 825 square yard.

The French metric system of weights and measures was established by law in 1860, and is coming into general use, except for the customs tariff

### Diplomatic Representatives

#### 1 OF PERU IN GREAT BRITAIN

*Envoy and Minister* — Don Carlos G Candamo (resident in Paris).

*Chargé d'Affaires and Consul-General* (London). — Edward Lembecke

*Secretaries* — Ricardo E Lembecke and Enrique G Swayne

*Attaches*. — Pablo E. Caballero and Adolfo Perez Palacios.

There are Consular representatives at Belfast, Cardiff, Dublin, Dundee, Glasgow, Liverpool, Queenstown, Southampton, and other places

## 2. OF GREAT BRITAIN IN PERU

*Envoy, Minister and Consul-General*—Charles Louis des Graz.

*Consul-General at Callao*.—L. J. Jerome

There are a Vice-Consul at Callao, a Consul at Iquitos. Vice-Consuls at Lima, Arequipa, Mollendo, Trujillo and Salaverry, Pírené and Chanchamayo districts, and a Consular Agent at Cerro de Pasco

## PORTUGAL.

(REPÚBLICA DE PORTUGAL E ALGARVE)

Portugal is an independent State since the twelfth century, until 1910 it was a monarchy. The last King was Manoel II of the house of Braganza-Coburg, born November 15, 1889, younger son of King Carlos I and Queen Mary Amélia, daughter of Philippe Duc d'Orléans. Manoel II succeeded to the throne on the assassination of his father and elder brother, Prince Luiz Phillip, February 1, 1908. On October 5, 1910, the republic was proclaimed, after a short revolution, and a provisional government established. On August 20th, 1911, a new constitution was adopted. This provides that there shall be two Chambers. In the first, which is called the National Council, the members (164) shall be elected by direct suffrage for three years. The Second or Upper Chamber (71 members) shall be elected by all the Municipal Councils, and shall be renewable half at a time every three years.

The President of the Republic is elected by both Chambers with a mandate for four years, but he cannot be re-elected. The President must be at least 35 years of age. He appoints Ministers, but these are responsible to Parliament. The President may not be present in the Chambers at debates. He is to receive a yearly salary of 2,600\$, with 1,300\$ for allowances, or a total of 3,900\$ yearly. The Constitution may be revised every ten years.

The Powers formally recognised the Republic on September 11, 1911.

*President of the Republic* — Dr. Manoel Arriaga (elected August 24, 1911)

The Cabinet, which was formed on January 8, 1913, is as follows —

*Premier and Minister of Finance* — Dr. Affonso Costa

*Minister of the Interior* — Senhor Rodrigo Rodrigues

*Minister of Justice* — Senhor Alvaro de Castro

*Minister of War* — Major Pereira Bastos

*Minister of Marine* — Senhor Freitas Ribeiro

*Minister for Foreign Affairs* — Senhor Antonio Macieira

*Minister of Public Works* — Senhor Antonio Maria da Silva

*Minister for the Colonies* — Senhor Almeida Ribeiro

## Area and Population

The Azores (3 districts) and Madeira (1 district), are regarded as an integral part of the Republic

Provinces and Districts	Area in sq miles	Population		Per sq mile 1911
		1900	1911

Domestic occupation	91,182	66,304	7,292	56,912	24,900	12
Unproductive and un- classified	75,318	75,318	20,086	45,230	—	—
<b>Total</b>	5,423,122	3,466,806	1,756,244	690,561	2,670,066	108,974

In 1911 the population consisted of 2,827,461 males and 3,130,524 females, or 110 females to every hundred males. In 1900 the continental urban population was 1,627,476 or 82.4 per cent., and the rural 3,383,791 or 67.6 per cent.

In 1911 the foreign population of Portugal numbered 41,263

Distribution with respect to conjugal condition (15 years and upwards) in 1911 —

	Total	Males	Females
Unmarried	3,824,960	1,764,754	1,860,206
Married	1,968,159	981,687	1,006,472
Widowed	357,484	97,515	259,919
Separated	7,482	3,505	3,927
Total	5,957,985	3,827,461	3,130,524

The chief towns with their population in 1900 were Lisbon, 326,008, Oporto, 167,955, Braga, 24,202, Setúbal, 22,074, Funchal (Madeira), 20,844, Coimbra, 18,144, Ponta Delgada (Azores), 17,620, Évora, 16,020, Covilhã, 15,469, Elvas, 13,881, Tavira, 12,175, Portalegre, 11,820, Faro, 11,789, Angra (Azores), 10,788

#### MOVEMENT OF THE POPULATION

Births, deaths, and marriages (including the Azores and Madeira) —

Years	Births	Deaths	Marriages
1905	179,746	112,756	37,600
1906	182,920	125,248	36,485
1907	176,417	113,254	35,857
1908	177,231	116,430	34,135
1909	176,707	111,895	34,150

Of the births in 1907, 14,569, and of the deaths, 10,730 were in the islands. The total population at July 1 of that year being estimated at 5,668,954, the birth, death, and marriage rates were respectively of 31.12, 19.98 and 6.23 per 1,000 of the population. In 1907 the illegitimate births numbered 19,977, or 11.82 per 100 of total births.

The number of emigrants from Portugal were 38,223 in 1909, 39,515 in 1910, and 59,661 in 1911. Portuguese emigration is chiefly to Brazil and the United States.

#### Religion.

The Roman Catholic faith was the State religion, now all forms of worship are tolerated. Portugal, including the Azores and Madeira, is divided into three ecclesiastical provinces, with their sees severally at Lisbon, Braga and Évora. Archbishop of Lisbon (Patriarch since 1716) has seven

suffragans, of whom only two are on the European mainland, while the Archbishop of Braga (the oldest see in Portugal) has five, and the Archbishop of Evora two. The Azores, Madeira, and the Portuguese colonial possessions of West Africa, continental and insular, with five episcopal sees, constitute part of the ecclesiastical provinces of Lisbon. In East Africa there is also the province of Mozambique. In Asia there is a province of Goa with four suffragan sees (Macao included).

The total income of the upper hierarchy of the Church is calculated to amount to 300,000 milreis. In 1900 the number of Protestants in Portugal was 4,481 and that of Jews 481. The Republican government has separated the Church from the State, and State payments for the maintenance and expenses of worship have now ceased. The conventual establishments of Portugal were suppressed by decree of May 28 1884, and their property confiscated for the benefit of the State. Notwithstanding, several establishments of this nature were formed in later years, they were suppressed by the provisional government, which enforced the law of 1834.

### Instruction.

Education in Portugal is of three kinds—primary, secondary, higher and special. Primary education is compulsory, and is rigorously enforced by a decree of the Provisional Government of March 29, 1911. In 1911 there were 7,120 elementary schools (6,320 public and 800 private), 32 secondary schools, the teachers for which are trained in the normal departments attached to the Universities of Lisbon and Coimbra. For higher education (which was re-organised in 1911) there are now 3 Universities, at Lisbon, Coimbra (founded 1290), and Oporto, which have various faculties. The Technical School at Lisbon provides instruction in engineering, chemistry, etc. There are also special colleges for music, art (Lisbon and Oporto), commercial schools, a military academy at Lisbon, and a naval school.

The number of pupils at the secondary schools in the session 1910-11 was 9,749, in 1911-12, 10,621. The number of students at the Universities in 1910-11 was 2,955, in 1911-12, 2,673. The number of students at the Schools of Fine Arts in 1910-11 was 894, in 1911-12, 963, and at the Military Academy in 1911-12, 352.

### Justice and Crime

The Republic is divided for judicial purposes into 193 comarcas, in every comarca there is a court of first instance. There are two courts of appeal (*Tribunais de Relação*) at Lisbon and Oporto, and a Supreme Court in Lisbon.

The number of persons convicted of crime in the year 1905 was 18,266 (8,743 females); 1906, 18,090 (8,841 females); 1907, 17,814 (8,582 females); 1908, 18,232 (8,822 females); 1909, 18,823 (4,068 females).

### Finance

The revenue (exclusive of loans) and expenditure, ordinary and extra ordinary, for six years were (milreis = 4s 6d. or  $\frac{1}{4}$  of a pound sterling) —

Years	Revenue	Expenditure	Years	Revenue	Expenditure
	Milreis	Milreis		Milreis	Milreis
1906-07	66,943,000	66,386,000	1908-10	66,962,337	74,606,880
1907-08	71,039,000	77,137,000	1910-11	66,979,000	70,373,000
1908-09	70,180,000	76,374,000	1911-12	71,873,000	76,447,000

The following were the estimates for 1912-13 —

Revenue	Milreis	Expenditure	Milreis
Direct taxes	17,135,250	Public Debt	35,184,125
Registration and Stamps	8,163,000	Ministry of Finance	4,389,076
Indirect taxes	22,379,750	" Interior	5,967,979
Port dues	29,580	" Justice	1,258,409
National property	8,427,923	" War	10,222,156
Income on investments	5,968,506	" Marine	4,543,496
Revenue from, administration, &c.	10,425,587	" Colonies	859,082
		" Foreign Affairs	552,346
		" Public Works	10,639,075
		General Treasury of deposits	690,913
Total ordinary	72,429,898	Total ordinary	74,337,356
Extraordinary	8,185,050	Extraordinary	5,110,967
Grand Total	76,614,443 (17,012,249)	Grand Total	79,447,822 (17,875,047)

On September 31, 1912, the outstanding nominal debt of Portugal was as follows —

	Total outstanding	In possession of Government
	milreis	milreis
External 3 per cent	129,018,970	6,806,822
4 per cent. Municipal Loan	10,677,610	888,320
4½ per cent. Tobacco Loan	27,971,100	—
Total external	177,665,680	7,175,092
Internal 3 per cent. (consolidated)	564,996,076	236,262,788
3 per cent. (of 1905)	2,654,040	190
4 per cent.	3,418,697	24,647
4½ per cent.	28,818,190	4,060
5 per cent.	4,561,190	—
Total internal	591,448,103	236,291,675
Total	769,004,783	243,466,967

The floating debt on August 31, 1912, was 87,427,012 milreis.

## Defence

The Army of Portugal is a militia raised by conscription. It is in three categories, the active army, the reserve and the territorial army. All adult males are liable to be called out from the age of 17 to 45, but, practically, service only begins at the age of 20. 10 years are passed in the active army, 10 in the reserve, and 5 in the territorial army, which latter also includes surplus men from other categories. In the active army, recruits undergo from 15 to 20 weeks' preliminary training, according to the arm of the service; afterwards there is a fortnight's training during the annual mobilisation. The country is divided into 3 territorial districts, each supposed to produce a division. The active army consists of 35 regiments of 3 battalions, 11 cavalry regiments of 4 squadrons, 8 field artillery regiments, comprising 63 batteries, 2 horn batteries, 2 horse batteries, 9 mountain batteries, 24 garrison batteries, and engineer units. Batteries have 4 guns.

The peace establishment of the active army has been fixed of late years at 20,000 men. There are about 2,500 officers, all told.

The reserve army is to consist of 35 regiments of infantry, 8 squadrons of cavalry, and 24 field batteries, with other units.

The territorial army has no cadres.

The Republican Guard, and the Fiscal Guard, are civil corps recruited from the army, the men of which can be employed in the field in war time. The Republican Guard is a military police, numbering about 5,000 men, of whom about 800 are mounted. The Fiscal Guard is a preventive service about 5,200 strong.

The arm of the Portuguese infantry is the Mauser Vergueiro, a magazine weapon, calibre 6.5 mm. The field artillery is being re-armed with 7.5 cm Schneider Canon guns.

With regard to overseas garrisons, 2 line regiments of infantry (of 2 battalions) are permanently stationed in the Azores, and 1 at Madeira. The latter has also a battalion of garrison artillery, and there are 2 in the Azores. Besides these troops, the Portuguese have a separate Colonial Army, partly European and partly Native, which garrisons their possessions on the West Coast of Africa, in Mozambique, India, &c. The force consists of about 650 officers (partly of the home army), about 2,600 European non-commissioned officers and men, and 7,000 natives, the Europeans being enlisted voluntarily, the natives compulsorily.

The military budget of Portugal for 1912-18 is 2,075,000.

The navy of Portugal comprises—1 old battleship, *Vasco da Gama*, (3,030 tons), 5 protected cruisers, *Almirante Reis* (4,253 tons), *São Gabriel* (1,840 tons), *Adamastor* (1,757 tons), and *República* (1,655 tons), a variety of old gunboats, 4 old torpedo boats, 4 transports, 3 training ships, the former royal yacht, 5 *de Olubro* (1,355 tons), 3 destroyers, 4 torpedo boats, 3 submarines, 1 steamer for torpedo and mine service.

The new programme contemplates 3 Dreadnoughts, 3 cruisers, 12 large destroyers, and 6 submarines.

In 1910 there were 420 naval officers, besides surgeons, engineers, &c., and 5,687 men.

## Production and Industry

Of the whole area of continental Portugal 26.2 per cent. is annually cultivated under cereals, pulse, pasture, etc., 3.5 per cent. is under vineyards, 3.9 per cent. under fruit trees, 17.3 per cent. under forest, 43.1 per cent. is waste. In Alentejo and Estremadura and the mountainous districts of other provinces are wide tracts of waste lands, and it is ascertained that many hectares, now uncultivated, are susceptible of cultivation.

There are four modes of land tenure commonly in use—Peasant proprietorship, tenant farming, *métayage*, and *emphyteusis*. In the north half of Portugal, peasant proprietorship and *emphyteusis* prevail, where land is much subdivided and the 'petite culture' practised. In the south large properties and tenant farming are common. In the peculiar system called *foramento* or *emphyteusis* the contract arises whenever the owner of any real property transfers the *dominium utile* to another person who binds himself to pay to the owner a certain fixed rent called *foro* or *canon*. The landlord, retaining only the *dominium directum* of the land, parts with all his rights in the holding except that of receiving quit-rent, the right to distrain if the quit-rent be withheld, and the right of eviction if the *foro* be unpaid for more than five years. Subject to these rights of the landlord, the tenant is master of the holding, which he can cultivate, improve, exchange, or sell; but in case of sale the landlord has a right of pre-emption, compensated by a corresponding right in the tenant.

should the quit-rant be offered for sale. This system is very old—modifications having been introduced by the civil code in 1868.

The chief cereal and animal produce of the country are —In the north, maize and oxen, in the mountainous region, rye and sheep and goats, in the central region, wheat and maize, and in the south, wheat and swine, which fatten in the vast acorn woods. Throughout Portugal wine is produced in large and increasing quantities. Olive oil, figs, tomatoes are largely produced, as are oranges, onions, and potatoes.

Portugal possesses considerable mineral wealth, but coal is scarce, and, for want of fuel and cheap transport, valuable mines remain unworked. In 1909, 4,086 persons worked underground and 3 667 (including 899 females) worked at the mines above ground.

The quantity and value of the mineral produce in 1911 was —

Minerals	Metric Tons	Value at the Mines	Minerals	Metric Tons	Value at the Mines
		£			£
Antimony ore	—	—	Gold	—	538
Arsenic	837	7 883	Lead ore	—	—
Coal (anthracite)	10 610	5 837	Silver ore	3 637	21 483
Copper pyrites	10 427	3 235	Ore for Sulphur	273 062	157 879
Copper	811	—	Tin ore	86	12 960
Copper precipitate	3 958	100,472	Uranium	814	6,065
Lead	—	—	Wolfram	992	97 484
Iron	19 641	5 784			

Common salt, gypsum, lime, and marble are exported. In 1903 there were in force 490 concessions of mines, embracing an area of 75,528 acres. Of the concessions, 463 were of mines yielding metallic ores, 22 yielding coal, 4 coal and iron, 2 asphalt and phosphorite. In 1903 several tin mines in Bragança were transferred to a Belgian company.

The population engaged in industries of various kinds, exclusive of agriculture, in 1900 was 455,296.

Portugal has in 1910, 26,894 persons and 3,289 vessels of 39,408 tons engaged in fishing. The exports of sardines and tunny fish are considerable. The value of the fisheries in 1910 was 5,919 842 milreis, including sardines 2,843,778 milreis and tunny fish 322,696 milreis, besides whale fisheries in the Azores, 23,790 milreis, and cod fisheries, 446,018.

## Commerce

Imports for consumption and exports (exclusive of corn and bullion) for five years —

Years	Imports	Exports
	Milreis	Milreis
1907	61,453,143	30,409,964
1908	67,247,956	28,377,119
1909	64,761,864	30,970,688
1910	69,504,843	35,794,073
1911	68,128,841	34,055,250

## Various classes of imports and exports (special trade) —

	Imports		Exports	
	1910	1911	1910	1911
Living animals	Milreis 3,466,636	Milreis 2,031,516	Milreis 3,324,396	Milreis 3,464,844
Raw materials	50,267,314	33,486,244	3,344,349	7,140,220
Fertilisers	7,826,742	7,032,152	5,034,067	1,622,209
Food substances	10,063,032	12,950,429	19,188,298	19,645,840
Machinery &c.	5,566,517	7,977,473	166,443	123,086
Various manufactures	5,853,046	5,969,796	3,666,327	2,274,782
Packing	147,778	127,310	—	—
	69,360,943	68,126,841	35,724,072	34,066,250
Coin and bullion	616,764	964,416	618,516	417,843
Total	70,123,807 (15,777,811L.)	69,081,257 (15,345,689L.)	36,342,587 (8,175,957L.)	34,483,593 (7,723,362L.)

The exports of colonial produce through the ports of the Republic, not included in this table, amounted in 1911 to 13,823,398 milreis, the most important articles being cacao, 7,083,848 milreis, and rubber, 4,052,058 milreis.

## Values of the leading special imports and exports in 1901-11 —

Imports			Exports		
	1910	1911		1910	1911
Wheat	Milreis 4,653,306	Milreis 382,418	Wine	Milreis 12,416,928	Milreis 11,623,478
Cotton	5,658,472	6,104,997	Cork	3,696,711	3,493,207
Iron and steel, and manuf.	4,894,211	5,103,592	Manufactured	968,202	974,176
Cord	4,329,943	4,083,067	Cottons and yarn	2,046,218	1,134,587
Cashew	4,126,333	3,872,729	Fish, preserved	1,827,084	2,860,602
Cottons and Yarn	3,697,663	3,466,281	Fruits, vegetables	1,667,380	1,669,610
Industrial machinery	3,346,553	3,305,416	Timber	968,216	614,834
Sugar	2,337,396	2,873,928	Copper ore	842,214	868,867

Rice	1,669,212	1,772,677	Hides and skins	801,472	228,019
Chemical products	1,455,297	1,754,324			
Wool	837,226	387,377			
Silk, tresses & yarn	1,345,017	1,286,600			
Oil seed.	1,468,287	1,908,582			

Wine is the most important product; this export in 1911 consisted of common wine, to the value of 5,896,952 milreis; Madeira, 801,618 milreis; port, 5,877,808 milreis; other liqueur wine, 247,100 milreis. More than a half is sent to Brazil and England, considerable quantities being exported also to the Portuguese colonies.

Wine is the chief article of import from Portugal into the United Kingdom, the value amounting in 1911 to £55,000.

Total trade between Portugal and the United Kingdom in thousands of pounds for five years —

	1908	1909	1910	1911	1912
Imports from Portugal into U Kingdom	£ 2,770	£ 2,278	£ 2,696	£ 2,874	£ 2,884
Exports to Portugal from U Kingdom	£ 2,184	£ 2,320	£ 2,776	£ 2,808	£ 3,080

### Shipping, Navigation, and Internal Communications

The commercial navy of Portugal on January 1, 1911, contained 86 steamers of 70,198 tons in the aggregate, and 258 sailing vessels of 43,844 tons.

In 1911, 10,370 vessels of 19,154,239 tons, entered the ports of Portugal.

The length of railways open for traffic on December 31, 1911, was 1,780 miles, of which 665 miles belonged to the State. The railways have a gauge of 5ft. 6½in., except two lines, one of which has a 3ft 3½in gauge, and the other a 2ft 11¼in. gauge.

The number of post-offices at the end of 1910 was 4,044 the number of letters, newspapers, &c., carried in the same year was internal, 87,437,641, international and colonial, 24,888,458. The number of telegraph offices at the end of 1910 was 336. There were at the same date 5,946 miles of line and 18,415 miles of wire. The number of telegrams in 1910 was internal, 1,258,840, international, 623,888, transit, 2,798,789, service, 160,806, total 4,836,823.

### Money, Weights, and Measures.

On December 30, 1911, the situation of the Bank of Portugal was as follows—Metallic stock, 12,700,924 milreis, note circulation, 82,421,472 milreis, deposits, 3,818,119 milreis, commercial account, 23,182,913 milreis, advances, 1,586,083 milreis, balance against Treasury 26,590,689 milreis. The capital of the bank is 18,600,000 milreis, and the reserve fund 3,378,400 milreis.

On December 31, 1911, the Monte Pio Geral had deposits amounting to 21,830,895 milreis. The monthly average of deposits in the banks of Lisbon and Oporto in 1909 was 23,658,000 milreis.

The gold coinage of Portugal issued since 1854 amounts to the nominal value of 7,967,003, and the silver coinage to 37,934,523.

The Decree of the Provisional Government of May 22, 1911, established a new monetary system, but the new coins are not yet in circulation. The unit is the gold *escudo*, of 100 centavos which is equivalent to the 1 milreis gold piece. Gold coins are 2, 5, and 10-escudo pieces, silver coins are 1-escudo, and 50, 20, and 10 centavos pieces, there are bronze and nickel coins of 4, 2, 1, and ½-centavo. The gold coins and the silver escudos are 900 fine, the other silver coins are 835 fine. The English sovereign and half sovereign shall be legal tender for 4½ and 2½ escudos respectively.

On January 1st, 1912, the legal time for Portugal was in accordance with the Greenwich meridian.

The metric system of weights and measures is the legal standard. The chief old measures still in use are—

The <i>Libra</i>		≈ 1.612 lb avoirdupois.
" <i>Almude</i>	of Lisbon	≈ 3.7 imperial gallons.
" <i>Alqueire</i>		≈ 8.6 " "
" <i>Alqueire</i>	" Oporto	≈ 8.76 " bushel.
" <i>Moto</i>		≈ 2.78 " quarters.

## Diplomatic Representatives

## 1 OF PORTUGAL IN GREAT BRITAIN

*Envoy and Minister* — Senhor Manoel Teixeira Gomes

*First Secretary* — Pedro de Tovar

*Commercial Attaché & Consul-General in London* — Demetrio Cinatti

There are Consular representatives at Cardiff, Newcastle, Liverpool, and Consular agents at Cork, Dublin, Dundee, Leith, Glasgow, Hull, Southampton

## 2 OF GREAT BRITAIN IN PORTUGAL

*Envoy and Minister* — Sir Arthur Hardinge, G.C.M.G., K.C.B., appointed, September, 1911

*Secretary* — W. Seeda.

*Council* — P. A. Somers Cocks, C.M.G.

*Naval Attaché* — Captain William A. H. Kelly, R.N.

*Military Attaché* — Col. W. E. Fairholme, C.M.G., M.V.O.

There are Consular representatives at Lisbon, Belem, Faro, Setubal, Figueira, Leixões, Oporto, &c., Funchal (Madeira), St. Michael's (Azores), St. Vincent (Cape Verde).

*Consul to Portuguese Possessions in West Africa south of the Gulf of Guinea* — F. Drummond Hay, M.V.O. residing at Loanda.

*Consul at Lourenço Marques* —

There are Consuls or Vice Consuls at Bissau (Guinea), Chinde, Inhambane, Mozambique, Tete, Quilimane, Lobito and São Thomé, Consul at Marmagao (Goa), Vice Consul at Macao (China).

## Dependencies

The colonial possessions of Portugal, situated in Africa and Asia, are as follows —

Colonial Possessions	Area English sq. miles	Popula- tion	Colonial Possessions	Area English sq. miles	Popula- tion
Possessions in Africa.			Possessions in Asia.		
Cape Verde Islands (1910)	1,480	142,500	In India—Goa (1900)	1,480	475,518
Guinea	12,949	230,000	Damão Diu (1900)	169	56,280
Príncipe and St. Thomas' Islands (1907)	840	42,100	Indian Archipelago (Tramor &c.)	7,830	300,000
Angola	484,800	4,119,000	China Macao, &c. (1900)	4	68,201
Mozambique	253,400	3,120,000			
Total Africa	792,960	8,265,650	Total, Asia	8,973	863,799
			Total Colonies	892,933	9,129,449

Portuguese India consists of *Goa*, containing the capital, Panjim, on the Malabar coast; *Damão*, on the coast about 100 miles north of Bombay, and *Diu*, a small island about 140 miles west of *Damão*. In *Goa* there are 501 salt works employing 1,000 men, the annual production amounting to about 12,000 tons. In *Damão* there are 11 salt works, and in *Diu* 5. In 1906 deposits of manganese were discovered near Mormugão and about 6 concussions

with about 20 mines are already at work. The military force consists of not less than 1,082 men (788 natives). The Mormugão railway (61 miles) connects this port with the lines of British India. The estimated revenue of Goa, &c., in 1910-11 was 1,165,239 milreis, expenditure 1,093,379 milreis. The trade is largely transit. In 1910 the imports by sea and land amounted to 6,704,848 rupees, the exports to 2,565,395 rupees, and the transit trade (to and from British India) to 5,336,999 and 30,587,738 rupees respectively. Chief exports, 1910: cocoa-nuts, 1,292,564 rupees, fresh fruit, 180,817 rupees, fish, fresh and salted, 170,664 rupees, spices, 168,133 rupees, cashu nuts, 144,607 rupees, salt, 113,112 rupees, copra, 105,666 rupees, manganese, 51,468 rupees. The ports were visited in 1910 by 8,524 merchant vessels of 488,298 tons (Mormugão by 1,736 vessels of 427,913 tons), besides coasting trade. There are in Portuguese India 18 telegraph offices and 167 miles of telegraph line.

**Macao**, in China, situated on an island of the same name at the mouth of the Canton River, forms with the two small adjacent islands of Taipa and Coloane, a province, the city being divided into two wards: one inhabited by Chinese and the other by non-Chinese each having its own administrator. The population, according to the census of 31 December, 1898, is 63,991 (38,083 males and 25,908 females), of which 12,894 in Taipa and Coloane. The whites are 3,919. There are 3,780 Portuguese, 80,057 Chinese and 154 of various nationalities. Estimated revenue, 1910-11 636,450 milreis; expenditure, 636,450 milreis. The military force contains at least 488 men (164 natives). The trade mostly transit, is in the hands of Chinese. Imports (1909) 16,632,102 Mexican dollars of which 6,591,964 in junks. Exports (1909) 15,091,555 Mexican dollars, of which 7,624,177 in junks. The port of Macao was visited in 1909 by 1,486 merchant steamers of 897,469 tons and 6,437 junks of 6,056,710 piculs.

Portuguese **Timor** consists of the eastern portion of the island of that name in the Malay Archipelago with the territory of Ambeno and the neighbouring isle of Pulo Cambing. By treaty of 1859 the island was divided between Portugal and Holland, by convention of October 1, 1904, ratified in 1908, a boundary arrangement was made between the two governments, certain *enclaves* being exchanged and the possession of other territories settled. This possession, formerly administratively joined to Macao, was in 1896 made an independent district. Estimated revenue, 1910-11, 200,000 milreis, expenditure 200,000 milreis. Military force not less than 323 men (212 natives). Imports (1910) 441,128 milreis, exports, 404,887 milreis. Chief exports (1910): coffee 239,289 milreis, sandal wood, 55,965 milreis, sandal root, 57,533 milreis, copra, 37,093 milreis, wax, 21,091 milreis. The port of Dilly was visited in 1910 by 410 merchant vessels of 165,496 tons.

The **Cape Verde Islands**, fourteen in number, are administered by a Governor, whose seat is at Praia, the capital. The population according to the census of December 31, 1910, is 142,552 (65,495 males and 77,057 females), including 290 foreigners, and its distribution is as follows: whites, 4,718; coloured, 37,249; negroes, 50,585. Military force not less than 264 men (168 natives). The chief products are coffee, medicinal produce, and millet. The estimated revenue in 1910-11, 448,328 milreis; expenditure, 439,533 milreis, imports (January to October, 1911), 1,648,876 milreis, exports, (January to October, 1911), 270,125 milreis. The ports of the Archipelago were visited in 1910 by 1,907 merchant vessels of 5,326,512 tons, besides coasting trade.

**Portuguese Guinea**, on the coast of Senegambia, is bounded by the limits fixed by the convention of May 12, 1884, with France, and is entirely enclosed on the land side by French possessions. It includes the adjacent archipelago of Bijagos, with the island of Bolama, in which the capital of the same name is situated. The chief commercial products are rubber, wax, oil seeds, ivory, hides. Estimated revenue, 1910-11, 309,900 milreis, expenditure, 309,900 milreis. Military force not less than 247 (145 natives). Imports in 1908, 857,155 milreis, exports, 493,288 milreis. The chief port is Bissau. The ports were visited in 1909 by 114 vessels of 130,426 tons, besides coasting trade. There are 100 miles of telegraph lines.

The islands of **S. Thomé** and **Príncipe** constitute a province under a Governor. According to the census of November 12, 1900, the population is 42,103 (including 597 foreigners), 37,776 in S. Thomé and 4,327 in Príncipe, and its distribution is as follows: whites, 1,185 (1,095 males and 90 females), coloured 279 (145 males and 134 females), and negroes 40,639 (21,831 males and 18,758 females). The islands are hilly, the soil volcanic, and the vegetation rich and various. The chief commercial products are cacao, coffee, rubber and cinchona. Estimated revenue, 1910-11, 930,429 milreis, expenditure, 703,815 milreis. Military force, at least 240 men (181 natives). Imports at S. Thomé (1911), 3,197,820 milreis, exports 9,896,000 milreis. The ports were visited in 1909 by 281 merchant vessels of 583,605 tons. On S. Thomé a railway of 9 miles is open for traffic.

**Angola**, with a coast-line of over 1,000 miles, is separated from French Congo by the boundaries assigned by the convention of May 12, 1886, from the Congo by those fixed by the convention of May 25, 1891, from British South Africa in accordance with the convention of June 11, 1891, and from German South west Africa in accordance with that of December 30, 1886. This possession is under a Governor-General who resides at Loanda. It is divided into six districts: Congo, Loanda, Benguela, Moçamedes, Huilla, and Lunda. The capital is S. Paulo de Loanda, other important towns being Cabinda, Ambriz, Novo Redondo, Benguela, Moçamedes, and Port Alexander. There are said to be 52 Government schools, and 7 municipal and 2 private schools, with altogether about 2,410 pupils. Various missions are at work in the country. The military force varies between 2,721 men (1,976 natives) and 4,781 (3,602 natives). Estimated revenue in 1910-11, 2,821,378 milreis, expenditure, 3,171,378 milreis. The chief products are coffee, rubber, wax, sugar (for rum distillation), vegetable oils, coco-nuts, ivory, oxen, and fish. Rubber supplies are now becoming exhausted, cotton growing, formerly remunerative, has been neglected but is now increasing, tobacco is grown and manufactured for local consumption, petroleum and asphalt are worked by a British syndicate. The province contains large quantities of malachite and copper, iron, petroleum, and salt. Gold has also been found. Imports, exclusive of Congo (1909), 5,474,061 milreis; exports, exclusive of Congo, 5,483,085 milreis. The imports and exports by the rivers-Ochilongo, Lualla, and Lucalla, in 1909, were respectively 104,862 milreis and 131,467 milreis. The chief imports of the province are textiles, and the chief exports are coffee and rubber. Dried fish are exported in considerable quantities. The trade is largely with Portugal. In 1910 there entered the ports of Ambriz, Loanda, Benguela, Moçamedes and Luanda 479 vessels of 841,285 tons. The Portuguese National Navigation Company has most of the carrying trade to and from Europe; the steamers of S. British lines and one German line visit ports of the Colony. The length of

railways open for traffic, is 642 miles, the concession of a line from Lobito Bay was granted in 1902, the line to be of about 1,200 miles (3 ft. 6 in. gauge), to link with the Central African system. The construction is proceeding, 284 miles being open for traffic. Other railways run inland from Loanda and Moçamedes. In 1911, there were 2,838 miles of telegraph line, 69 telegraph offices. Angola is connected by cable with East, West, and South African telegraph systems.

**Mozambique** is separated from British Central and South Africa by the limits of the arrangement between Great Britain and Portugal in June, 1891. It is separated from German East Africa according to agreements of October and December, 1888, and July, 1890, by a line running from Cape Delgado at 10° 40' S lat. till it meets the course of the Rovuma, which it follows to the point of its confluence with the Manje, the boundary thence to Lake Nyasa being the parallel of latitude of this point. The province comprises territories directly administered by the State and others under the administration of the Mozambique and Nyasa Companies. The first are divided into 6 districts: Lourenço Marques, Inhambane, Quillimane, Tete and Mozambique. The districts are divided in *concelhos*, *circunscripções civis* and *exclaves*, the last comprising the territories not yet entirely pacified and occupied. The municipal institutions are the *Camara Municipal*, the *Commissão Municipal*, and the *edilidade*, according to the development of the respective centres of population. Lourenço Marques is the Capital of the Province. There is a Government Council composed of officials and elected representatives of the commercial, industrial and agricultural classes, and a Provincial Council with the attributions of an administrative and account tribunal. In each district there is a District Council. The existing organisation of the province is that which was established by decree of May 23, 1907, with some modifications. The Manje and Sofala region is administered by the Mozambique Company, which has a royal charter granting sovereign rights for 50 years from 1891. Under the Company's administration the country on the Zambezi has become settled there is convenient transport by river, and facilities are granted for securing titles and working mines. The Nyasa Company, with a royal charter, administers the region between the Rovuma, Lake Nyasa, and the Lurio. The military force of the Colony varies between 2,250 men (1,379 natives) and 3,904 men (2,468 natives). For 1910-11 the estimated revenue was 5,418,682 milreis, expenditure, 5,118,833 milreis.

The chief products of the Colony are rubber, sugar, cocoa nuts, bees-wax, and mining products. In 1908 the export of rubber from the State Territories amounted to 104 tons, and from the Mozambique Territories in 1910 to 61 tons. Important gold-bearing reefs have been discovered on the Upper Zambezi, and extensive coal deposits in the Tete region.

The trade of the Province in 1910 was as follows:—

	Imports	Exports	Re-exports	Transit
State territories (January to November)	Milreis 6,023,294	Milreis 8,511,962	Milreis 8,660,964	Milreis 29,943,877
Mozambique Company	2,747,576	2,842,444	1,111,160	6,618,717
Nyasa Company	687,235	209,594	95,607	164

The principal ports are Mozambique (population, 1910, 472 Europeans, 335 Asiatics, and about 361,357 natives), Ibo, Quillimane, Chimoio (population 1,396,

of whom 216 European), Beira (population, 8,420, of whom 728 white), Inhambane (population, 3,330, of whom 100 European and 250 Asiatic), and Lourenço Marques, (9,849, of whom 4,691 European)

The trade registered at the following ports in 1910 (from January to November for all ports except Ibo) is given below —

—	Imports	Exports	Re-exports	Transit
	Milreis	Milreis	Milreis	Milreis
Lourenço Marques	1,665 164	1,861,904	2,817,970	22,811,853
Inhambane	494,742	850,429	817	—
Chinde	344,617	812,827	851,809	197,125
Quilimane	488,064	273,911	1 199	—
Mozambique	811,862	261 162	69 532	—
Ibo	411 17	858 470	79,462	—

In 1911 the Imports at Lourenço Marques amounted to 942,554l, and exports to 512,056l, at Beira, imports 585,789l, exports, 540 066l, at Chinde, imports, 124 960l, exports, 84,570l

The chief articles imported into the colony are cottons, iron work, spirits, beer, and wine. The exports are mainly rubber, various ores, wax, and ivory. The ports are visited regularly by the steamers of the German East Africa line, and on the Zambezi and Shire rivers there are plying 21 small steamers of, in all, 1,125 tons, and 103 barges of 3 676 tons. The Zambezi is navigable for stern wheelers as far as Tete. The port of Lourenço Marques was visited in 1911 by 688 vessels of 2,241,866 tons; the port of Beira by 502 vessels of 991,783 tons.

The Delagoa Bay railway has a length of 57 miles in the colony, and is continued for 290 miles to Pretoria. The commercial relations and transit of goods by this railway between the Portuguese and British possessions are regulated by the agreement signed April 1, 1909. A new line from Lourenço Marques to the Swaziland border is under construction, 42 miles being open for traffic, including the Umbeluzi branch. The Gaza railway from Chai-Chai to Manjacaze has 82 miles open for traffic, and the line from Muzamba to Inharrim 25 miles. The Beira railway has a length of 204 miles in the colony, and is continued from the British frontier to Bulawayo. Beira is connected by telegraph with Salisbury in Mashonaland, and Lourenço Marques with the Transvaal system. Quilimane has telegraphic communication with Chirromo. In 1911 there were 2,959 miles of telegraph line.

The Portuguese coinage is little used, the official value of the milreis is 4s. 6d., or 4 5 milreis to the £. At Mozambique the currency is chiefly British-Indian rupees, on which an import duty of 10 per cent. is levied. At Lourenço Marques English gold and silver coins are chiefly used.

## ROME, SEE AND CHURCH OF

For many ages until Pius IX's reign, with some comparatively short breaks, the Popes or Roman Pontiffs have temporal sway over a territory stretching across Mid Italy from sea to sea and comprising an area of some 16,000 square miles, with a population finally of some 3,125,000 souls. Of this dominion the whole has been incorporated piecemeal with the Italian Kingdom (*viz.*, Romagna, Umbria, and the Marches in 1860, and the residue, including Rome itself, in 1870). Furthermore, by an Italian law dated May 18, 1871, there was guaranteed to His Holiness and his successors for ever, besides possession of the Vatican and Lateran palaces and the villa of Castel Gandolfo, a yearly income of 3,225,000 lire or 129,000*l.*, which allowance (whose arrears would in 1813 amount to 133,675,000 lire or 5,547,000*l.*, without interest) still remains unclaimed and unpaid.

**Supreme Pontiff**—Pius X (Giuseppe Sarto), born at Riese, diocese of Treviso, June 2, 1855, Bishop of Mantua, November 10, 1884, Cardinal, June 12, 1893, Patriarch of Venice, June 16, 1893, elected Supreme Pontiff, as successor of Leo XIII., August 4, 1903, crowned, August 9 following.

The election of a Pope ordinarily is by *scrutiny*. Each Cardinal in conclave writes on a ticket his own name with that of the Cardinal whom he chooses. These tickets, folded and sealed, are laid in a chalice which stands on the conclave altar, and each elector approaching the altar repeats a prescribed form of oath. Thereupon the tickets are taken from the chalice by scrutators appointed *ad hoc* from the electing body: the tickets are compared with the number of Cardinals present, and when it is found that any Cardinal has two-thirds of the votes in his favour he is declared elected.

Reckoning the validly chosen Roman Pontiffs as 256 in number<sup>1</sup> there have been altogether 106 Popes who were Roman, 99 Italian other than Roman, and 52 Transalpine, or (save from Sicily or Sardinia) Transmarine. From the accession of Innocent IX., 231st in the usual list of Roman Pontiffs, to Pius X., 258th, the Popes (all Italian) have been as follows—

Name and Family of Pontiff	Year of Election	Name and Family of Pontiff	Year of Election
Innocent IX. ( <i>Farchinetti</i> )	1691	Innocent XIII. ( <i>Conti</i> )	1721
Clement VIII. ( <i>Aldobrandini</i> )	1692	Benedict XIII. ( <i>Orsini</i> )	1724
Leo XI. ( <i>Medici</i> )	1605	Clement XII. ( <i>Corrini</i> )	1730
Paul V. ( <i>Borghese</i> )	1606	Benedict XIV. ( <i>Lavaterani</i> )	1740
Gregory XV. ( <i>Ludovisi</i> )	1621	Clement XIII. ( <i>Rezzonico</i> )	1758
Urban VIII. ( <i>Barberini</i> )	1623	Clement XIV. ( <i>Ganganelli</i> )	1769
Innocent X. ( <i>Pamphili</i> )	1644	Pius VI. ( <i>Braschi</i> )	1775
Alexander VII. ( <i>Chigi</i> )	1655	Pius VII. ( <i>Chiaramonte</i> )	1800
Clement IX. ( <i>Boisignosi</i> )	1667	Leo XII. ( <i>della Genga</i> )	1823
Clement X. ( <i>Albani</i> )	1670	Pius VIII. ( <i>Casignoli</i> )	1829
Innocent XI. ( <i>Oddo Colonna</i> )	1676	Gregory XVI. ( <i>Cappellari</i> )	1831
Alexander VIII. ( <i>Orsini</i> )	1689	Pius IX. ( <i>Mastai-Perrotti</i> )	1846
Innocent XII. ( <i>Spinadelli</i> )	1691	Leo XIII. ( <i>Piovi</i> )	1878
Clement XI. ( <i>Albani</i> )	1700	Pius X. ( <i>Sarto</i> )	1903

<sup>1</sup> The papal possessions of Avignon and the Comtat-Venaisien were joined on to France in 1791; Decauville and Portofranco, papal enclaves in the Neapolitan kingdom, went the way of that kingdom in 1806.

<sup>2</sup> That is, counting but once the thrice elected Pope Benedict IX. and omitting the two Pius, Popes of the Great Britain. The only Englishman to be chosen Pope was Adrian IV., reigning from 1154 to 1159; the last Transmarine to be so chosen was Martin VI., Pope from 1392 to 1431.

The Roman Pontiff (in order a Bishop, but in jurisdiction held to be, by divine right, the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting, when complete, of 70 members, namely, 6 Cardinal Bishops (holders of the suburbicary sees), 50 Cardinal-Priests, and 14 Cardinal-Deacons, but hardly ever comprising the full number. In February, 1913, the Sacred College consisted of 6 Cardinal Bishops, 46 Cardinal Priests, and 8 Cardinal Deacons.<sup>1</sup> The following list gives the names, dates, and offices of these 60 Cardinals —

Name	Office or Dignity	Nationality	Year of Birth	Year of Creation
<b>Cardinal Bishops —</b>				
Luigi Oreglia di Santo Stefano	Bp of Ostia & Velletri Dean Sacred College, Camerlango of Holy Roman Church, Prefect Congr. Ceremonial	Italian	1838	1874
Serafino Vannutelli	Bp. of Porto and Santa Rufina, Subdean of the Sacred College, Great Penitentiary		1834	1887
Antonio Agliardi	Bishop of Albano Chancellor of Holy Roman Church		1832	1890
Vincenzo Vannutelli	Bishop of Palestrina, Archbishop of the Lateran Basilica, Prefect of the Apostolic Signature		1836	1890
Francesco di Paola Cassetta	Bishop of Frascati		1841	1899
Gastone de Lai	Sabina		1853	1901
<b>Cardinal Priests —</b>				
João Sebastião Neto	Former Patriarch of Lisbon	Portuguese	1841	1884
James Gibbons	Archbishop of Baltimore	American	1824	1890
Mariano Rampolla del Tindaro	Archpriest of the Vatican Basilica, Librarian of Holy Roman Church	Sicilian	1843	1887
Angelo di Pietre	Datary of His Holiness	Italian	1838	1888
Michael Logue	Archbp of Armagh	Irish	1840	1898
Olaudian Veaux	Former Archbishop of Easternom (Gran)	Hungarian	1833	1898
Georg Kopp	Bishop of Breslau	German	1837	1893
Andrea Ferrari	Archbishop of Milan	Italian	1850	1894
Giosuè Maria Gotti	Prefect of the Congregation de Propaganda Fide	"	1834	1896
Domenico Ferraz	Prefect of the Congregation of the Sacraments	"	1847	1896
Giosuè Prisco	Archbishop of Naples	"	1836	1896
José María Martín de Herrera y de la Iglecia	Archbishop of Santiago de Compostela	Spanish	1836	1897
Giosuè Francesco Mava di Boutifé	Archbishop of Catania	Sicilian	1846	1899
Pietro Respighi	Vicar General of His Holiness, Archbishop of the Lateran Arch-Basilica	Italian	1843	1899

<sup>1</sup> The terms Cardinal Priest and Cardinal-Deacon have for centuries ceased to imply severally the particular orders of priest or deacon. Nowadays in the Sacred College a presbyterial title is freely given to one in episcopal or diaconal orders, and a deaconry to a priest or even to a simple clerk.

Name	Office or Dignity	Nationality	Year of Birth	Year of Creation
<i>Cardinal-Primates—cont.</i>				
Agostino Richelmy	Archbishop of Turin	Italian	1850	1899
Sebastiano Martinelli	Prefect of the Congregation of Rites		1848	1901
Casimiro Gennari	Prefect Congr. of the Council		1839	1901
Leo von Sirkbonaky	Archbishop of Prag	Austrian	1838	1891
Gualdo Boschi	Ferrara	Italian	1838	1901
Bartolomeo Badlieri	Bishop of Verona		1842	1901
Johann Katschthaler	Archbishop of Salzburg	Austrian	1832	1903
Rafael Merry del Val	Pontifical Secretary of State	Spanish	1865	1908
Joaquín Arcovads de Albuquerque Cavalcanti	Archbishop of Rio de Janeiro	Brazilian	1850	1905
Aristide Cavallani	Patriarch of Venice	Italian	1849	1907
Gregorio Maria Aguirre y Garza	Archbishop of Toledo	Spanish	1835	1907
Aristide Rinaldini	—	Italian	1844	1907
Benedetto Lorenzelli	—		1853	1907
Pietro Maffi	Archbishop of Pisa		1858	1907
Alessandro Lunaldi	Palermo		1855	1907
Désiré Merlier	Mechlin	Belgian	1851	1907
Pietro Gasparri	—	Italian	1852	1907
Louis Henri Lucien	Archbishop of Reims	French	1842	1907
Paulin Pierre Andrien	Bordeaux		1849	1907
José María Cos y Machó	Valladolid	Spanish	1838	1911
Dionede Falconio	—	Italian	1842	1911
Antonio Vico	—		1847	1911
Gennaro Granito Pl. natelli di Belmonte	—		1851	1911
John Farley	Archbishop of New York	American	1842	1911
Francis Bourne	Westminster	English	1861	1911
Frans Bauer	Olmutz	Austrian	1841	1911
Léon Adolphe Amette	Paris	French	1850	1911
William O'Connell	Boston	American	1890	1911
Henrique Almaraz y Santos	Seville	Spanish	1847	1911
François Virgile Dubillard	Chambéry	French	1845	1911
François Marie Anatole Robert de Calvrières	Bishop of Montpellier	French	1830	1911
Charles de Hornig	Veszprem	Hungarian	1840	1911
<i>Cardinal-Deacons —</i>				
Francesco Salasio della Volpe	Prefect of the Congregation of the Index	Italian	1844	1899
José Calasanz Vives y Tuto	Prefect of the Congregation for the Affairs of Religious	Spanish	1854	1899
Ottavio Cagiano de Assevedo	—	Italian	1845	1903
Gaetano Bisleti	—		1850	1911
Giovanni Battista Lugari	—		1846	1911
Basilio Pompili	—		1853	1911
Louis Billot	—	French	1846	1911
Willem van Rossum	—	Dutch	1854	1911

Of these Cardinals 1 was nominated by Pope Pius IX, 27 by Leo XIII., and 82 by Pius X, 83 are Italian (peninsular or insular), and 27 not, 3 are British subjects. Under the present Roman Pontiff there have hitherto died 89 Cardinals, of whom 4 were of his own creation.

Though primarily belonging to the local Roman Church, the Cardinals

drawn from every nation of Christendom, are now regarded as Princes of the Church at large.<sup>1</sup> Originally they were simply the parish rectors of Rome, or the deacons of Roman deaneries. In 1586 their number was finally settled by Sixtus V. at seventy. The Cardinals compose the Pope's Senate or Council and the various Sacred Congregations, govern the Church while the Apostolic See is vacant, and elect the deceased Pontiff's successor.<sup>2</sup> They received the distinction of the red hat under Innocent IV., during the first General Council of Lyons, in 1246, and the title of Eminence from Urban VIII., in 1630.

In February, 1913, besides the Pope and the College of Cardinals, the upper Catholic Hierarchy throughout the world comprised 8 patriarchates of the Latin and 6 of the Oriental Rite, 190 archbishoprics of the Latin and 20 of the Oriental Rite, and 789 bishoprics of the Latin and 58 of the Oriental Rite. The list (during the present pontificate increased by 10 promotions of bishoprics to archbishoprics, and 38 bishoprics) was as follows —

### I Patriarchates.

*Latin Rite* — 1 Constantinople, 2 Alexandria, 3 Antioch, 4 Jerusalem, 5 Venice, 6 Lisbon, 7 West Indies, 8 East Indies.

*Oriental Rite* — 1 Antioch, of the Maronites, 2 Antioch, of the Melchites, 3 Antioch, of the Syrians, 4 Babylon, of the Chaldeans, 5 Cilicia, of the Armenians, 6 Alexandria, of the Copts.

### II Archbishoprics

<i>Latin Rite</i> —		Under Patriarchs	
With Ecclesiastical Provinces	168	Armenian Rite.	3
Without Provinces	22	Græco-Melchite Rite	3
<i>Oriental Rite</i> —		Syriac Rite	3
With Ecclesiastical Provinces		Syro-Chaldaic Rite	2
Armenian Rite	1	Syro-Maronite Rite	6
Græco-Rumanian Rite	1		
Græco-Ruthenian Rite	1		210

### III Bishoprics

<i>Latin Rite</i> —		Under Patriarchs	
Immediately subject to the Holy See	85	Armenian Rite	15
Suffragan	684	Coptic Rite	2
<i>Oriental Rite</i> —		Græco-Melchite Rite	9
Immediately subject to the Holy See		Syriac Rite	5
Græco-Ruthenian Rite	1	Syro-Chaldaic Rite	10
Suffragan		Syro-Maronite Rite	2
Græco-Rumanian Rite	3		
Græco-Ruthenian Rite	6		823

Besides the above 1044 sees, 611 titular sees, and 24 abbeys and prelatures 'nullius diocesis,' there are now 11 apostolic delegations, 155

<sup>1</sup> The relative standing and precedence of a Roman Cardinal was a thing of gradual growth. In England, John Henry, Archbishop of York, created Cardinal in 1590, was the first Cardinal who, though at once and without being a legate, later, took precedence of the Archbishop of Canterbury.

<sup>2</sup> Though any clerk, whether in or out of the College of Cardinals, is eligible to the supreme pontificate, yet from the times of Pope Urban VI., who died in 1383, only Cardinals have been so elected. With him, moreover, with but one short exception, began the mysterious series of Italian Popes.

apostolic vicariates, and 68 apostolic prefectures, most of them held by titular archbishops or bishops (until 1884 called 'in partibus infidelium').<sup>1</sup>

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, composed of Cardinals, with Consultors and Officials. There are now eleven Sacred Congregations, viz., Holy Office, Consistorial, Discipline of the Sacraments, Council, Religious, Propaganda Fide, Index, States, Ceremonial, Extraordinary Ecclesiastical Affairs, Studies. Besides these there are several permanent Commissions, for example, one for Biblical Studies, another for Historical Studies, another for Preservation of the Faith in Rome, another for Codification of Canon Law. Furthermore, the Roman Curia contains three tribunals, to wit, the Apostolic Penitentiary, the Supreme Tribunal of the Apostolic Signature, and the Sacred Roman Rota, and, lastly, various offices, as the Apostolic Chancery, the Apostolic Datar, the Apostolic Chamber, the Secretariate of State, etc.

The States wherewith the Holy See maintains diplomatic relations are Austria-Hungary, Bavaria, Belgium, Luxemburg, Monaco, the Netherlands, Portugal, Prussia, Russia, Spain and Switzerland, together with nearly all the American Republics, except the United States and Mexico.

## RUMANIA.

### Reigning King.

Carol I. King of Rumania, born April 20, 1839, son of the late Prince Karl of Hohenzollern-Sigmaringen, elected 'Demn', or Lord, of Rumania, April 20 (N S.), 1866, entered Bucharest May 22 (N S.), 1869. Proclaimed King of Rumania March 28 (N S.), 1881. Married, November 15, 1869, to Princess Elizabeth von Wied, born Dec. 27, 1843.

The King has, in addition to revenues from certain Crown lands, an annual allowance of 1,185,185 lei, or 47,400*l*. The heir to the crown has an annual demotion of 208,000 lei (12,000*l*.)

The succession to the throne of Rumania, in the event of the King remaining childless, was settled, by Art. 83 of the Constitution, upon his elder brother, Prince Leopold of Hohenzollern-Sigmaringen, who renounced his rights in favour of his son Prince Wilhelm, the act having been registered by the Senate in October 1880. Prince Wilhelm on November 22, 1888, renounced his rights to the throne in favour of his brother, Prince Ferdinand, born August 24, 1865, who, by a decree of the King, dated March 18, 1889, was created 'Prince of Rumania.' Prince Ferdinand was married, January 10, 1893, to Princess Marie, daughter of the Duke of Saxo-Coburg and Gotha, offspring of the union are Carol, born October 15, 1893, Elizabeth, born October 11, 1894, Marie, born January 6, 1900, Nicholas, born August 18, 1903, and Ileana, born January 8 1909.

The union of the two Principalities of Wallachia and Moldavia was publicly proclaimed at Bucharest and Jassy on Dec. 23, 1861, the present name being given to the united provinces. The first ruler of Rumania was Colonel Cuza, who had been elected 'Hospodar,' or Lord, of Wallachia and of Moldavia in 1858, and who assumed the government under the title of Prince Alexandru Ioan I. A revolution which broke out in February 1866 forced Prince Alexandru Ioan to abdicate, and led to the election of Prince Carol I. The representatives of the people, assembled at Bucharest, proclaimed Rumania's independence from Turkey, May 21, 1877, which was confirmed by Art. 48 of the Congress of Berlin, signed July 18, 1878.

### Constitution and Government.

The Constitution now in force in Rumania was voted by a Constituent Assembly, elected by universal suffrage, in the summer of 1866. It has twice been modified—viz., in 1879, and again in 1884. The Senate consists of 120 members, elected for 8 years, including 2 for the Universities, and 8 bishops. The heir to the crown is also a Senator. The Chamber of Deputies consists of 183 members, elected for 4 years. A Senator must be 40 years of age, and a Deputy 25. Members of either House must be Rumanians by birth or naturalisation, in full enjoyment of civil and political rights, and domiciled in the country. For the Senate an assured income of 7,450 lei (\$767) is required. All citizens of full age, paying taxes, are electors, and are divided into three Electoral Colleges. For the Chamber of Deputies, electors who are in possession of property bringing in 50*l*. or upwards per annum vote in the first College. Those having their domicile and residence in an urban community, and paying direct taxes to the State of 20 lei or upwards annually, or being persons exercising the liberal professions, retired officers, or State pensioners, or who have been through the primary course of education, vote in the second College. The third College is composed of those who, paying any tax, however small, to the State, belong to neither of the other colleges; those of them who can read and write and have an income of 208 lei (12*l*.) from rural land, vote directly, as do also the village priests and schoolmasters, the rest vote indirectly. For each

election every fifty indirect electors choose a delegate, and the delegates vote along with the direct electors of the Colleges. For the Senate there are only two Colleges. The first consists of those electors having property yielding annually at least 80% ; the second, of those persons whose income from property is from \$21 to \$300 per annum. Both Senators and Deputies receive 20 lei for each day of actual attendance, besides free railway passes. The King has a suspensive veto over all laws passed by the Chamber of Deputies and the Senate. The executive is vested in a council of eight ministers, the President of which is Prime Minister, and may or may not have a special department.

Senate (1912): Conservatives, 88; Liberals, 24

Chamber of Deputies (1912): Liberals 85, Conservatives 146, Conservative Democrats 10, 2 Independents

Prime Minister and Minister of Finance — M. Majoresco, Oct. 27, 1912

#### LOCAL GOVERNMENT

For purposes of local government Wallachia is divided into seventeen, Moldavia into thirteen, and the Dobruja into two districts, each of which has a prefect, a receiver of taxes, and a civil tribunal. (The chief difference between the Dobruja and the other districts is that it does not elect senators or deputies.) In Rumania there are (1909) 872 arrondissements (plăși) and 2,554 communes, 71 urban and 2,593 rural. In the rural communes there are 3,487 villages, and 1,048 hamlets. The appellations 'urban' and 'rural' do not depend on the number of inhabitants but are given by law.

#### Area and Population

Departments	Area in sq miles	Population	
		Census 19 Dec. 1912	Census Dec. 1909
Bacău	1 540	253 148	195,104
Botoșani	1 220	187,118	171 457

Argeș	1 110	240,346	207,656
Brașov	1 680	181 083	145,234
Buzău	1 080	277 68	221,284
Dâmbovitza	1 340	204 597	131 669
Ialomița	2,620	242 611	187 889
Ifov	2,250	678 700	541 180
Mehedința	3,140	185,630	115 190
Olteni	1 050	171 2	148,843
Prahova	1 500	269 780	207,502
Românch-Barab	1,200	164 140	136,910
Teleorman	1,810	200 750	133,623
Vâlcea	1,780	250,489	202,759
Bacău	2,640	431 517	305 679
Giurgiu	1 810	200,660	171,500
Mănești	1,910	295 548	240,653
Stăruț	1,770	248 401	203,773
Vâlcea	1,440	231 572	190,000
Constanța	2,070	317,160	141,666
Tulcea	2,340	172,406	136,759
Total	59,720	7,243,091	5,944,990

The four historic divisions of the country were populated (1912) as follows —Moldavia, 2,145,464, Grand Wallachia (Muntenia), 3,288,594, Oltenia, 1,418,897, Dobrogea, 890,808

The population in 1899 consisted of 2,026,689 males and 2,980,951 females. The density varied from 88 inhabitants per square mile in Tulcea to 243 per square mile in Ilfov, the average for the whole country having been 117 per square mile. With respect to nationality the population of Rumania in 1899 was classified as follows —Rumanians, 5,489,296 (92·3 per cent.), subjects of foreign States, 182,875 (3·1 per cent.), foreign Jews, 5,859 (0·1 per cent.), Jews under Rumanian protection, 256,588 (4·3 per cent.), others under Rumanian protection. Of foreigners, the Austro-Hungarians numbered 104,108, Turks, 22,989, Greeks, 20,057. Among Rumanians there are racial differences of which the census returns take no account. In Central Moldavia there are thousands of Magyar descent (Changai and Szeklers) the communes along the Danube have many inhabitants of Bulgarian and Servian origin, scattered over the country are hordes of Gipsies most of whom have settled in Rumanian villages. In Dobrudja the foreign element is strong, Turkish, Tartar, Bulgar, Russian, and German Rumanians are spread extensively in the neighbouring countries—Transylvania, Hungary, Bukowina, Bessarabia, Servia, Bulgaria, Macedonia, their total number probably is between 10 and 12 millions.

The number of births, deaths, and marriages, with surplus of births over deaths, was as follows in each of the last five years —

Years	Births	Deaths	Marriages	Surplus of Births over Deaths
1906	392,488	157,303	64,868	10,234
1907	374,487	170,734	70,268	98,603
1908	373,850	185,898	71,490	87,477
1909	392,842	188,620	63,211	54,017
1910	373,106	172,848	64,246	100,268
1911	309,570	79,076	74,641	120,704

Not included in the births and deaths are the still born, 8,144 (2·7 per cent. of the total births in 1911). The illegitimate births in 1911 were about 8·4 per cent. of the total number. In 1904 there were 1,800 divorces, in 1905, 1,718, in 1906, 1,737, in 1907, 2,167, in 1908, 2,384, in 1909, 2,661, in 1910, 2,847, in 1911, 3,029.

The principal towns are (population 1912) —Bucharest, the capital and seat of Government, 388,109, Jassy, 75,882, Galatz, 71,719, Braila, 64,780, Ploesti, 58,594, Craiova, 51,973, Botosani, 32,818, Buzan, 28,781, Constantza, 26,628, Berlad, 25,881, Focșani, 25,155.

### Religion, Instruction, Justice, &c.

Of the total population of Rumania in 1900, 5,408,748 belonged to the Orthodox Church, 168,176 were Catholics or Protestants, 16,598 were Armenians, 269,015 were Jews, and 43,470 were Mahometans. The government of the Orthodox Church rests with two archbishops, the first of them styled the Primate of Rumania, and the second the Archbishop of Moldavia. There are, besides, six bishops of the National Church, and a Roman Catholic archbishop and bishop.<sup>1</sup> Only the clergy of the National Orthodox

<sup>1</sup> In Hungary there is a United metropolitan with 5 suffragans, all of the Græco-Rumanian rite.

Church are recognised and paid by the State. In 1908 there were 6,666 Churches, 168 monasteries for either sex, and 11 mosques.

Education is free and compulsory wherever there are schools, and it is improving from year to year. In 1909, according to a special census return, 60.16 per cent. of the population over 7 years of age could neither read nor write, in 1909, 43.12 per cent., and in 1910, 41 per cent. of the army recruits could neither read nor write. Following figures are statistics of public primary schools —

	Schools		Teachers		Pupils		School population (7—14 years)	
	1906-07	1909-10	1904-05	1909-10	1906-07	1909-10	1908	1909
Rural primary	4,521	4,095	6,286	6,460	48,040	504,297	813,207	827,882
Urban „	879	879	1,881	1,924	78,603	80,656	103,499	110,673
Total	4,900	5,074	7,667	7,780	55,043	584,953	916,706	938,456

The secondary schools in 1906-07 were, for boys, 20 lycées, 23 gymnasia and 4 seminaries; these 47 institutions having 873 teachers and 14,016 pupils; for girls 10 high schools with 161 teachers and 1,615 pupils; 5 normal schools for men with 80 teachers and 1,136 students, and 2 for women with 34 teachers and 283 students; 45 professional schools for boys with 209 teachers and 2,235 students, and 23 for girls with 283 teachers; 12 commercial schools with 169 teachers and 1,431 pupils; 17 agricultural schools with 26 teachers and 432 pupils; 6 schools of domestic economy for girls with 17 teachers and 118 pupils; total pupils at boys' schools 19,280; at girls' schools 6,016. There are 2 universities with faculties in law, philosophy, science and medicine, and theology, at Bucarest (120 professors and 8,422 students) and Jassy (60 professors and 534 students). In 1907-8 there were 122 high schools for boys and 46 for girls.

Justice is administered by a court of cassation, 4 appeal courts, 34 tribunals, and 266 justices of the peace. The total number of prisoners in custody during 1907 in the central prisons was 23,068, of whom 1,302 remained in prison on December 31. Assistance is given to the sick in 168 hospitals and *Aspices* (departmental, communal, rural, and private).

### Finance

The following table shows the revenue and expenditure (estimates for last 3 years) for years ending March 31 (old style) —

	1906-07 <sup>1</sup>	1909-10 <sup>1</sup>	1910-11	1911-12	1912-13
	Lei	Lei	Lei	Lei	Lei
Revenue	411,011,055	485,655,823	461,079,842	474,391,230	503,046,980
Expenditure	468,741,268	428,648,945	461,074,848	478,840,230	506,646,999

<sup>1</sup> Including railway budgets and other budgets not formerly incorporated in the State budget.

For the year 1912-13 the budget estimates (in lei or francs) were —

REVENUE.	Lei	EXPENDITURE.	Lei
Direct taxes	49,860,000	Ministries —	
Indirect taxes	65,100,000	War	74,490,096
Registration and Stamps	29,461,000	Finance	207,410,678
State monopolies	72,380,000	Worship and Public In-	
Public Services	183,460,000	struction	48,218,619
State Domains	88,875,000	Interior	47,416,212
Subventions	23,272,000	Public Works	65,879,000
Ministries —		Justice	11,029,102
Finance	69,945,650	Agriculture and Domains	9,620,671
Industry	4,200,000	Commerce and Industry	3,761,702
Justice	1,868,000	Foreign Affairs	3,141,774
Foreign Affairs	180,000	Council of Ministers	88,570
Domains	188,000	Supplementary credits	1,099,721
War	596,750		
Public Works	84,800		
Worship and Instruction	5,364,700		
Commerce and Industry	1,468,000		
Total	506,046,930	Total	506,616,930
	(20,725,878L.)		(20,725,878L.)

The public debt of Rumania amounted on March 31, 1912, to 62,632,164L. For 1911-12 the service of the debt (interest, amortization, penalties, &c.,) was estimated at 3,518,080L.

### Defence

Military service in Rumania is compulsory and universal. The young men from 19 to 21 years of age receive a certain amount of preliminary training in their homes. At 21 they enter the ranks, serving for 2 years in the infantry, and 3 years in the other arms, followed by 5, or 4, years in the reserve of the first line. The men then pass to the second line, or reserve force, for 10 years, after which they are transferred to the territorial force at the age of 38, and remain in it 4 years, thus completing 31 years service. Young men exempted from service in the ranks and those surplus to the annual contingent, are posted to a supplementary reserve, in which they will, in future, receive a certain amount of instruction.

The Rumanian field army consists of 5 army corps and 2 cavalry divisions. Army corps are composed of 2 divisions, and a reserve brigade, and to each is attached a brigade of cavalry of 2 regiments. A division consists of 2 brigades, each of 2 regiments of 3 battalions; a battalion of chasseurs (13 battalions in all), an artillery brigade of 2 regiments (12 batteries), 3 squadrons of cavalry, and a company of pioneers. A cavalry division consists of 2 brigades of 2 regiments each (24 squadrons) and 2 batteries of horse artillery. There are altogether 36 infantry regiments of 3 battalions, 9 rifle battalions, 20 cavalry regiments, 20 regiments of field artillery each of 6 batteries, 4 horse artillery batteries, 19 companies of fortress artillery, 7 engineer battalions, and a railway battalion. Batteries have 4 guns each. The strength of the field army of 5 army corps and 2 cavalry divisions would amount to about 220,000 men.

The second line, or reserve, troops at present consist of 36 battalions, and 9 batteries. The formation of reserve divisions is contemplated.

The peace strength of the Rumanian army in 1911 was 4,496 officers and officials, 23,644 non-commissioned officers and men, and 20,339 horses.

The Rumanian infantry is armed with the Mannlicher magazine rifle, calibre .266. The cavalry carry the Mannlicher carbine. The horse and field batteries are armed with the Krupp Q F gun of 75 mm (1903).

The war budget of Rumania for 1911-12 amounted to 2,977,000L. Considerable sums are being spent on the rearmament of the artillery, &c.

At Galatz on the Danube, at the mouth of the Sereth, are 3 lines of fortifications, and at Nemolass on the Sereth are 3 lines. Again at Focseani to the north west, near the Sereth, are extensive works in 3 lines. All these fortifications are in the nature of entrenched camps, and are armed with numerous Krupp and Gruson guns. Around Bucharest are 18 forts and many batteries.

Rumania has in the navy the *Elisabeta*, launched at Elswick in 1887 a protected cruiser of 1,820 tons displacement and 4,800 horse power, 3½ inch armour at the belt, 4 6 inch and 8 machine guns, the *Mircea*, training ship a composite brig of 350 tons, 7 gunboats, 6 coast guard vessels, a screw despatch vessel (240 tons); 6 first class and 2 second class torpedo-boats. On October 4, 1907, twelve vessels for naval police were launched at Galatz, with eight vedettes. A floating dock has been purchased in Scotland. There are four river monitors, lightly armoured, of 600 tons each. It has been proposed to order 4 destroyers and 12 torpedo boats. At Galatz there is a marine arsenal.

### Production and Industry

According to an estimate by Dr Colesco, the distribution of the soil of Rumania with respect to agriculture in 1905 was as follows —

	Acres		Acres
Ploughed lands	13,923,100	Forests (less clearings)	1,627,800
Fallow lands	1,497,401	Water	1,994,000
Vineyards and orchards	1,456,500	Other lands	1,534,700
Meadows	1,218,000		
Pastures	9,504,600	Total	32,148,800

Of the cultivable land (arable, meadow, plantation, and orchard land) the distribution with respect to ownership is as follows —

Size of Properties	Proprietors	Area	Per cent. of area
Acres	Number	Acres	
24 7 and under	1,015,302	8,199,047	41.76
Over 27 4	86,818	1,719,104	8.73
125	2,381	408,076	2.08
24"	4,471	2,354,364	4.73
Total	1,068,172	19,681,791	100.00

In the last two years the chief agricultural crops were as follows —

Crop	Area cultivated		Production	
	1911	1912	1911	1912
	Acres	Acres	Bushels	Bushels
Wheat	4,625,410	5,112,467	90,827,780	86,308,480
Rye	280,480	264,998	4,835,140	3,472,800
Barley	1,264,002	1,236,914	25,846,748	26,644,129
Oats	1,066,537	848,378	35,411,729	20,140,800
Maize	3,212,127	3,120,867	107,321,680	—
			Gallons	
Wine	214,600	216,846	21,865,000	—
			Cwt.	
Pineapples	132,865	183,208	2,073,345	—
Tabacco	24,980	22,940	185,121	—

The forests of Rumania have an aggregate area of 6,985,120 acres, of which 2,712,582 are State owned and 4,222,539 acres are privately owned. The principal forests are oak (712,430 acres), beech, oak, &c., (692,620 acres), beech (543,640 acres), pine and fir (311,120 acres), larch, maple, elm, willow, walnut. The export of wood in 1909 was 48,327 tons.

In December 1900 Rumania had 864,824 horses, 2,589,526 cattle, 5,655,444 sheep, 232,515 goats, and 1,709,205 swine.

Coal and petroleum are worked and the latter is now exported in considerable quantities. Petroleum springs, both government and private, are worked at Prahova, Dambovitza, Bacau, and Buzau. The total output reached in 1900, 250,000 metric tons, in 1909, 1,296,403, in 1910, 1,352,299; in 1911, 1,544,072. Of the total exported, 26.5 per cent went to the United Kingdom, 17.5 per cent. to France, and 8 per cent. to Germany.

### Commerce

The values of the imports into and exports from Rumania, exclusive of gold and silver (in sterling) were —

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1905	13,510,500	18,284,100	1908	16,562,600	15,157,900
1906	16,894,600	19,624,400	1909	14,722,902	18,602,225
1907	17,220,400	22,151,100	1910	16,888,628	24,680,196

A Treaty of Commerce and Navigation providing for the most favoured nation treatment between Rumania and Great Britain was signed at Bucharest on October 31, 1906.

Imports and exports are estimated in accordance with values settled by a Commission appointed from time to time.

The import duties amounted in 1905 to 1,068,870*l.* in 1906 to 1,642,500*l.*, in 1907 to 1,829,180*l.*, in 1908 to 1,990,271*l.*

In 1910 the chief imports and exports were as follows (in all or France) —

Imports		Exports	
Merchandise	1910	Merchandise	1910
	Lei		Lei
Metals and manufactures	93,071,773	Cereals and products	489,821,906
Vegetable textiles & manuf.	66,185,245	Wood and timber	26,192,207
Ready-made clothing	20,719,788	Petroleum, &c.	23,667,169
Wool, hair and manuf.	88,345,679	Animal products	4,826,201
Machinery	99,219,229	Vegetables, &c.	24,780,967
Vegetables, seed, &c.	7,258,346	Hides, &c.	1,977,694
Hides, &c.	14,919,473	Living animals	6,961,725
Fruits	12,687,970	Wool, hair, &c.	2,432,482
Trees, timber and manuf.	18,447,280	Fruits	2,430,107
Sticks and manuf.	14,663,406	Mineral waters	1,325,199
Rubber goods-percha, &c.	7,547,799		
Chemicals	8,250,825		

In two years the trade was mainly distributed as follows —

Countries	Imports from (1900)	Imports from (1910)	Exports to (1900)	Exports to (1910)
	Let	Let	Let	Let
Austria-Hungary	86,780 683	97 989,077	11,030 010	87 984,189
Germany	194 629 082	138,837,977	25 683,878	84,291,193
Great Britain	57 775,825	56,775,808	84,635 906	28,569,068
France	23,677 078	23 637 410	27 502,308	46,874,315
Belgium	11 619 680	13 983 065	121 295 787	926,941 076
Italy	17 878 649	11 744 144	53,998 007	68,671 877
Russia	10,790,168	11 771 107	4 128 992	8 361 849
Switzerland	6 894 076	8,432,096	79 914	113,666
Turkey	11,007,149	18,881,138	21 473,090	18,640,171
Greece	1,884,776	7 787,480	666 015	895 838
Bulgaria	831 715	1,883,917	4,390 710	5,891,121

Total trade between Roumania and United Kingdom in thousands of pounds for five years —

	1908	1909	1910	1911	1912
Imports from Roumania to U Kingdom	2 989	2 922	3 184	6 588	8 262
Exports to Roumania from U Kingdom	1 984	1 713	1 828	2 700	2 981

### Shipping and Communications

In 1912 the merchant navy of Rumania consisted of 593 vessels of 172,988 tons, including of 94 steamers 22,893 tons.

Vessels which left the Danube 1908, 1909 and 1910 —

	1908		1909		1910	
	Vessels	Tonnage	Vessels	Tonnage	Vessels	Tonnage
British	296	647 803	248	548 235	461	1 089,498
Austro-Hungarian	119	249 527	137	271 654	153	849 000
All Nationalities	1 010	1,607,827	929	1 474 933	1 307	2 274 498

The European Commission of the Danube, called into being in 1856 now consists of 8 delegates, one representing each of the following powers Austria-Hungary France Germany Great Britain, Italy Rumania, Russia, and Turkey. It has its seat at Galatz. Since November 24 1904, it has existed or will exist, for successive periods of 3 years unless denounced by one of the contracting powers a year before the conclusion of any such period. By the operations of the Commission the Danube below Braila and along the Sulina branch has been deepened and corrected so that at Sulina the depth has been increased from 9 ft. to 24 ft. and of the Sulina branch the minimum depth has been increased from 5 ft. to 18½ ft., while by canalisation and other works the navigation has been shortened from 64½ to 33½ nautical miles. The Commission has a revenue of about 60,000, a year derived entirely from taxes levied on shipping leaving the river.

General shipping (1911) entered, 87,958 vessels of 11,707,681 tons, cleared, 87,849 vessels of 11,733,833 tons.

In 1912 Rumania had 2,828 miles of railway, of which 2,287 miles belonged to the State. In 1911 the receipts from traffic amounted to 97,345,831 lei, and the working expenses to 60,418,007 lei. The State has the working of all the lines, and has, besides, under the general railway direction, a commercial navigation service on the Danube and Black Sea. Within Rumania there are 1,898,580 miles of national roads.

In 1910-11 there were 2,970 post-offices, through which there passed 45,021,000 letters, 35,815,000 post-cards, and 81,894,000 newspapers, samples, &c. In 1910-11 there were 4,539 miles of telegraph lines, and 12,921 miles of wire, on which 3,681,401 messages were forwarded. The number of offices was 3,127. In 1910-11 there were 7 urban telephone systems with 1,904 miles of line and 8,402 miles of wire, and 5,525 interurban systems with 18,630 miles of line and 23,426 miles of wire. On the urban systems during the year there were 12,725,226 conversations, and on the interurban 1,366,776.

### Money, Weights, and Measures

The National Bank of Rumania, with capital and reserves of 39,065,000 lei, had, on December 24, 1911, a circulation of notes and cash bonds amounting to 443,337,890 lei, cash in hand amounting to 219,166,497 lei. Other public credit institutions are Savings Bank, a Deposit and Consignment Bank, an Agricultural Loan Bank, 1,849 Popular Banks, a Rural *Crédit Foncier*, 2 Urban *Crédit Foncier* (at Bucarest and Yassi), an Agricultural Bank, and a *Casa Rurala*, an institution whose purpose is to buy properties and sell them in lots to peasants. There are also three private banking institutions.

In 1911 the following coins were in circulation—gold, to the value of 10,725,000 lei, silver coins, 5 lei, to the value of 28,660,400 lei, 3 lei to the value of 16,098,710 lei, 1 lei, to the value of 17,784,465 lei, 7½ lei to the value of 7,745,490, total 65,269,074 lei. There were also nickel coins in circulation to the value of 10,500,000 lei, and copper coins to the value of 895,000 lei.

The decimal system was introduced into Rumanian in 1876, the unit of the monetary system being the *leu*, equivalent to the franc. The gold *leu* is the monetary unit. Silver is legal tender up to 50 lei only. Gold coins are 20, 10, and 5 lei pieces. Nickel is coined in 5, 10 and 20 centimes (*banii*) pieces.

The metric system has been introduced but Turkish weights and measures are, to some extent, in use by the people.

### Diplomatic and Consular Representatives

#### 1 OF ROMANIA IN GREAT BRITAIN

*Envoy and Minister*—M. Mishu (appointed December 18, 1912)

*Secretaries*—Prince Antoine Bibesco and M. Michel B. Boerescu.

*Chancellor*—N. E. Constantinesco

*Attaché*—Captain Matila Costienco Ghysa

*Commercial Attaché*—Michel G. Holban.

*Consul-General in London*—Alfred Stead.

*Vice Consul*—G. N. Gologan.

#### 2 OF GREAT BRITAIN IN ROMANIA

*Envoy and Minister*—Sir G. H. Barclay, K.C.S.I., K.C.M.G., C.V.O. (1913).

*Secretary*—J. Vaughan, M.V.O.

*Consul*—Major J. G. Baldwin, O.B. (at Galatz).

*Deputy Commissioner*—Hamilton E. Browne.

There are Vice-Consuls at Bucharest, Braila, Constantza, and Sulina.

## RUSSIA.

(EMPIRE OF ALL THE RUSSIAS)

## Reigning Emperor

**Nicholas II.**, Emperor of All the Russias, born May 6 (18), 1868, the eldest son of the Emperor Alexander III and of Princess Dagmar (*Maria Feodorovna*), daughter of the late King Christian IX of Denmark, ascended the throne at the death of his father October 20 (November 1), 1894, married, November 14 (26), 1894, to Princess Alexandra Alix (*Alexandra Feodorovna*), daughter of Ludwig IV, Grand Duke of Hesse, born May 25 (June 6), 1872.

*Son and Daughters of the Emperor*

Grand duchess *Olga*, born November 3 (15), 1895  
 Grand-duchess *Tatiana*, born May 29 (June 10), 1897  
 Grand duchess *Maria*, born June 14 (26), 1899  
 Grand duchess *Anastasia*, born June 5 (18), 1901  
 Grand-duke *Alexis* (heir apparent) born July 30 (August 12) 1904

*Mother of the Emperor*

Empress *Maria* (*Dagmar*), widow of Emperor Alexander III born November 14 (26) 1847

*Brother and Sisters of the Emperor*

I Grand-duchess *Lexia*, born March 2, (April 6), 1875 married to Grand-duke Alexander Mikhailovich  
 II Grand-duke *Michael* born November 22 (December 4) 1876.  
 III Grand-duchess *Olga*, born June 1 (13), 1882 married July 27 (August 9), 1901 to Peter Alexandrovich Duke of Oldenburg

*Uncles and Aunts of the Emperor*

I The children of the late Grand-duke Vladimir — 1 Cyril born September 20 (October 12), 1870 married October 8 (21) 1905 to Princess Victoria Feodorovna of Saxe-Coburg and Gotha (divorced Grand-Duchess of Hesse) Offspring: *Maria*, born January 20 (February 3) 1907 and *Kira*, born April 26 (May 9), 1909 2 Boris born November 12 (24), 1877 3 Andreas born May 2 (14), 1879 4 Helene born January 17 (29), 1882 married August 16 (29), 1902, to Prince Nikolaos of Greece (*see Greece*).

II Grand-duchess *Maria*, born October 6 (17), 1858 married January 23, 1874 to the Duke of Edinburgh son of Queen Victoria of Great Britain who died July 30 1900

III Grand-duke *Paul*, born September 21 (October 3), 1860 married (1) June 6 (17), 1889 to Princess Alexandra, daughter of the King of Greece who died September 12 (24), 1891 (2)morganatically, September 27 (October 10), 1902, to Olga Valerianovna Karnovitch, Countess von Hohenhausen. Offspring of the first marriage *Maria*, born April 6 (18), 1890 married, April 30 (May 3), 1908 to Prince Wilhelm Duke of Södermanland (Sweden), *Demetri*, born September 6 (18), 1901

The reigning family of Russia descend, in the female line, from Michael Romanof, elected Tsar in 1613, after the extinction of the House of Rurik; and in the male line from the Duke Karl Friedrich of Holstein-Gottorp, born in

1700, when of a younger branch of the princely family of Oldenburg. The union of his daughter Anne with Duke Karl Friedrich of Holstein-Gottorp formed part of the great reform projects of Peter I intended to bring Russia into closer contact with the Western States of Europe. Peter I was succeeded by his second wife, Catherine, the daughter of a Livonian peasant, and she by Peter II, the grandson of Peter, with whom the male line of the Romanoffs terminated, in the year 1730. The reign of the next three sovereigns of Russia, Anne, Ivan VI., and Elizabeth, of the female line of Romanoff, formed a transition period, which came to an end with the accession of Peter III., of the house of Holstein-Gottorp. All the subsequent emperors, without exception, connected themselves by marriage with German families. The wife and successor of Peter III., Catherine II., daughter of the Prince of Anhalt-Zerbst, general in the Prussian army, left the crown to her only son, Paul, who became the father of two emperors, Alexander I and Nicholas, and the grandfather of a third, Alexander II. All these sovereigns married German princesses, creating intimate family alliances, among others, with the reigning houses of Wurttemberg, Baden, and Prussia.

The Emperor is in possession of the revenue from the Crown domains, consisting of more than a million of square miles of cultivated land and forests besides gold and other mines in Siberia, and producing a vast revenue, the actual amount of which is, however, unknown, as no reference to the subject is made in the budgets or finance accounts, the Crown domains being considered the private property of the imperial family.

The following have been the Tsars and Emperors of Russia, from the time of election of Michael Romanoff. Tsar Peter I. was the first ruler who adopted, in the year 1721, the title of Emperor.

<i>House of Romanoff—Male Line</i>		Ivan VI.	1740
Michael	1613	Elizabeth	1741
Alexis	1645	<i>House of Romanoff Holstein</i>	
Fedor	1676	Peter III.	1762
Ivan and Peter I.	1682	Catherine II.	1762
Peter I.	1689	Paul	1796
Catherine I.	1725	Alexander I.	1801
Peter II.	1727	Nicholas I.	1825
		Alexander II.	1855
<i>House of Romanoff—Female Line</i>		Alexander III.	1881
Anne	1730	Nicholas II.	1894

### Constitution and Government

The Government of Russia is a constitutional hereditary monarchy but, in fact, the whole legislative, executive, and judicial power is united in the Emperor, whose will alone is law, and the monarch continues to bear the title of Autocrat. On August 6 (19) 1905, however an elective State Council (*Gosudarstvennaya Duma*) was created, and on October 17 (30), a law was promulgated granting to the population the firm foundations of public liberty, based on the principles of the real inviolability of the person, and of freedom of conscience, speech, assembly, and association, and establishing as an unalterable rule that no law shall come into effect without the approval of the Duma, and that to the elected of the people shall be guaranteed the possibility of a real participation in the control of the legality of the acts of such authorities as are appointed by the Emperor.

The Duma consists of members elected for five years and representing the governments or provinces and the greatest cities: St. Petersburg, Moscow, Warsaw, Kiev, Lodz, Odessa, and Riga (law of June 8 (16), 1907).

The election of the Deputies is indirect, and is made by electoral bodies of the chief towns of governments or provinces and of the greatest cities, composed of delegates chosen by the district or town elective assemblies. In towns all lodgers occupying for 12 months lodgings let to them, they vote in these assemblies, also salaried clerks of State, or of municipal or railway administration, in the country, all owners of a determinate area of land, different in different districts, or of non industrial estate more than 50,000 roubles in value, are electors; the owners of peasant communities and manufactories with more than 50 workpeople are represented in the electoral assemblies by delegates, two for each voice, and one for each thousand workmen. Students, soldiers, governors of provinces (in provinces governed by them), and police-officers (in the localities for which they act) may not vote. Members of the Duma are paid 10 roubles per day during session, and once a year travelling expenses to and from St. Petersburg.

Under a Manifesto and Ukase published on March 6, 1906 (N 8), the Council of the Empire consists of an equal number of elected members and members nominated by the Emperor, and will be convoked and prorogued annually by Imperial Ukase. The elective members of the Council will be eligible for nine years, a third of the number being elected every three years. Each assembly of the Zemstvo of each government will elect one member. Six members will be returned by the Synod of the Orthodox Church, six by the representatives of the Academy of Sciences and the Universities, 12 by the representatives of the bureaux of commerce and of industry, 18 by the representatives of the nobility, and six by the representatives of the landed proprietors of Poland, assembled in congress at Warsaw. The congress of the representatives of the Academy of Sciences, the nobility, and the commercial and industrial communities for the election of their members to the Council of the Empire will meet in St. Petersburg. In those provinces of European Russia which have no Zemstvo, a congress of the representatives of the landed proprietors will assemble in the chief town of their province to elect one member for each province to the Council of the Empire. All members of the Council must have attained their 40th year and have an academical degree. The President and Vice-President will be appointed by the Tsar. The elective members of the Council will receive an honorarium of 25 roubles (2½ 13s.) a day during the session.

The Council of the Empire and the Duma have equal legislative powers and the same right of initiative in legislation and of addressing questions to Ministers. Every measure before being submitted for the Imperial sanction must be passed by both the Duma and the Council of the Empire, and all such as are rejected by one of the two legislative institutions will not be laid before the Tsar at all. Both the Duma and the Council have the right to annul the election of any of their members. The sittings of both the Duma and the Council of the Empire will be public. The closure of a debate may be voted by a simple majority. Neither the Council of the Empire nor the Duma is empowered to receive deputations or petitions. Ministers will be eligible for the Duma and, in the capacity of elected members, qualified to vote.

Laws voted by the two Houses will be submitted for the Imperial

sanction by the President of the Council of the Empire. The members of both institutions will have the privilege of personal immunity during the session. They will only be liable to arrest with the permission of the Duma or the Council of the Empire, as the case may be, except in cases of flagrant offences or offences committed in the exercise of their duties. The Ukases further provide that bills rejected by the Tsar cannot be brought forward again in the course of the same session, while Bills rejected by one of the legislative bodies cannot be brought forward again without the Imperial consent. The first Duma, after sitting from April 27 (May 10) 1906, was dissolved on July 9 (22), 1906. The second Duma, after sitting from February 26 (March 8), 1907, was dissolved on June 8 (16), 1907. The third Duma, after sitting from November 1 (14), 1907, arrived at the term of the legislation in 1912. The fourth Duma has been sitting since November, 1912.

Duma Right, 63, Nationalists, 124, Octobrists, 95, Progressives, 15, Constitutional Democrats, 59, Travallistes 10, Social Democrats, 16, Poles, 16, Independents, 16.

The administration of the Empire is still entrusted to great boards, or councils, possessing separate functions.

One of the great colleges or boards of government is the Ruling Senate or 'Pravitelstvuyushchiy Senat,' established by Peter I in the year 1711. The functions of the Senate are partly of a deliberative and partly of an executive character. To be valid a law must be promulgated by the Senate. It is also the high court of justice for the Empire. The Senate is divided into six departments or sections, which all sit at St. Petersburg, two of them being Courts of Cassation. Each department is authorized to decide in the last resort upon certain descriptions of cases. The senators are mostly persons of high rank, or who fill high stations; but a lawyer of eminence presides over each department, who represents the emperor, and without whose signature its decisions would have no force in the *plenam*, or general meeting of several sections, the Minister of justice takes the chair. A special department is entrusted with disciplinary judgments against officials of the crown.

Another is the college, established by Peter I in the year 1721, the *Holy Synod*, and to it is committed the superintendence of the religious affairs of the Empire. It is composed of the three metropolitans (St. Petersburg, Moscow, and Kiev), the archbishop of Georgia (Caucasus) and several bishops sitting in turn. All its decisions run in the emperor's name, and have no force till approved by him. The President of the Holy Synod is the Metropolitan of St. Petersburg, Vladimir. The General Procurator Actual Privy Councillor *Sahler*.

A third board of government is the *Committee of Ministers*, reorganized by a decree of October 19 (November 1), 1905.

The fourth board of government, the most important since the decree for its reorganization issued October 19 (November 1), 1905, is the *Council of Ministers*. It consists of all the ministers, and of the general directors of the most important administrations.

The president of the committee and of the Council of Ministers, Actual Privy Councillor, Minister of Finance, *Koktzeff*, appointed President, September 24, 1911.

The ministries and the most important administrations are —

1. *Ministry of the Imperial House and Imperial Domains* — Minister General W. *Fredericks*, aide-de-camp of the Emperor; appointed 1896.

2 *Ministry of Foreign Affairs*—Minister Actual State Councillor *Sazonoff*, appointed 1910

3 *Ministry of War*—Minister General *Sukhomlinoff*, appointed 1909

4 *Ministry of the Navy*—Minister Vice-Admiral *Grigorovich*, appointed 1911

5 *Ministry of the Interior*—Minister Privy Councillor *Maklakoff*, appointed 1911

6 *Ministry of Public Instruction*.—Minister Privy Councillor *Casso*, appointed 1910

7 *Ministry of Finance*.—Minister Actual Privy Councillor *Kokovtseff*, appointed Minister, 1906

8 *Ministry of Justice*—Minister Privy Councillor *Sacheglovitoff*, appointed 1906

9 *General Direction of Land Organization and Agriculture*—General Director Actual Privy Councillor *Krievskoin*, appointed 1908

10 *Ministry of Ways of Communications*—Minister Privy Councillor *Bukhloff*, appointed 1909

11 *Ministry of Commerce and of Industry*—Minister Privy Councillor *Tsimasskoff*, appointed 1909

12 *Department of General Control*—Controller General Privy Councillor *Kharitonoff*, appointed 1907

13 *Holy Synod*.—Procurator General Actual State Councillor *Sabler*

14 *General Direction of State Studs*—General *Zdanovitch*

The Emperor has two Private Cabinets, one of which is occupied with charitable affairs, and the other is devoted to public instruction of girls and to the administration of the institutions established by the late Empress Maria, mother of the Emperor Nicholas I. Besides, there is the Imperial Head Quarters (*Glavnaya Kvartira*), and a Cabinet, which is entrusted also with the reception of petitions presented to the Emperor, formerly received by a special Court of Requests (abolished in 1884). According to a law of May 19, 1888, a special Imperial Cabinet having three sections (Economy, Mines and Manufactures and Legislation) has been created, instead of the same departments in the Ministry of Imperial Household.

#### LOCAL GOVERNMENT

The Empire is divided into governments and provinces (*oblast*), the subdivisions of which are districts or circuits (*uyezd* in the governments and *okrug* in the provinces). There are 78 governments (49 in European Russia proper, 10 in Poland, 8 in Finland, 7 in Caucasus, 4 in Siberia), 81 provinces (1 in European Russia, 5 in Caucasus, 9 in Central Asia, 6 in Siberia, and 2 circuits, those of Sukhnum and Zakataly in Caucasus). Some of the governments or provinces are united into general governments. At the head of each general government is a governor general, the representative of the emperor, who as such has the supreme control and direction

of all affairs, whether civil or military. In Siberia the governors-general are each assisted by a council, which has a deliberative voice. A civil governor assisted by a council of regency, to which all measures must be submitted, is established in each government, and a military governor in twenty-one provinces. A vice governor is appointed to fill the place of the civil governor when the latter is absent or unwell. There is also, in each government, a council of control under the presidency of a special officer, depending directly on the Department of Control. Each government or province is divided into from 5 to 15 districts (816 in all Russian Empire), having each several administrative institutions. The townships (*gradonachalstvo*) of St. Petersburg, Moscow, Sebastopol, Odessa, Kerch, Nikolayev, Baku and Rostov-on-Don, are administered by special governors (*gradonachalnik*). Kronstadt is under a separate military governor.

In European Russia the government of the parish in so far as the lands of the peasantry are concerned, and part of the local administration, is entrusted to the people. For this purpose the whole country is divided into 17,075 cantons (*volosts* among the Russian population *gminas* in Poland, *starostias* in Cossack Lands, *ulus* in territories peopled by natives, &c.) which are presided over by an elder (*volostnoi starshina* in the *volosts*), elected at the cantonal assemblies, which are composed of the delegates of the village communities in the proportion of one man to every ten houses. The village communities elect an elder (*starosta*) or executive officer of a commune, and also a tax collector. All these officers are elected at communal assemblies ('Mir') by the peasants and from among themselves. The communal assemblies are constituted by all the householders in the village who discuss and decide all communal affairs. These communal assemblies are held as business requires. The canton assemblies decide the same class of affairs as do the communal assemblies but concerning each its respective canton. The peasants have thus special institutions of their own, which are submitted also to special colleges 'for peasants affairs, instituted in each government. In Poland the 'Volost' is replaced by the 'Gmina, the assemblies of which are constituted of all landholders—nobility included, the clergy and the police excluded—who have each but one voice, whatever the area of land possessed. The 'Gmina' has, however, less autonomy than the 'Volost', being subject directly to the 'Chief of the District.

The administration of the economical affairs of the district and province are, to some extent, in the hands of *zemstvos*, or the district and provincial assemblies (law of January 1, 1864), composed of representatives elected by the peasantry, the householders in the towns, and the landed proprietors. Their executive power is entrusted to provincial and district *Upravas*. The president of the nobility of the district, or of the province, presides *ex officio* over the *zemstvos* of the district, or of the province, and, in his default, the president of the local tribunal presides. Important modifications, increasing the powers of noble landowners in the affairs of the *zemstvos*, suppressing the right of peasants to elect deputies to the *zemstvo* (they present candidates out of which the governor of province name a deputy), reducing the numbers of representatives, and limiting their powers, were introduced by the law of June 12, 1890.

The towns and cities have municipal institutions of their own organized on nearly the same principles as the *zemstvos* (law of June 16, 1870). All house-owners are divided into three classes, each of which represents an equal amount of real property, and each class elects an equal number of representatives to the *Duma*, the latter elect their executive the *Uprava*. The law of June 11, 1892, reduces the powers of the Municipal Government

and places it almost entirely under the Governors nominated by the Emperor. In 1894, municipal institutions, with still more limited powers, were introduced in several towns of Siberia, and in 1895 in Caucasus. The institutions of the *zemstvo* are in force in 34 provinces (361 districts) of European Russia.

**Finland**<sup>1</sup> —The Grand-duchy of Finland, ceded to the Emperor of Russia by the treaty of Fredrikhamn September 17, 1809, has preserved, by special grant of Alexander I (renewed by his successors), the Swedish Constitution, dating from the year 1772, reformed in 1789, slightly modified in 1809 and 1862, and reformed in 1906. The decrees issued in the years 1829-1863 were all abolished by the Imperial Ukase of November 4, 1905, which gave authority for the reform of the Legislative body. The national parliament, which formerly consisted of four estates, the nobles, the clergy, the burghers, and the peasants, now consists of one Chamber of 200 members chosen by direct and proportional election, in which all who are entitled to vote have an equal vote. The suffrage is possessed, with the usual exceptions, by every Finnish citizen (man or woman) who has reached his or her 24th year. There are 16 electoral districts with a representation proportioned to the population, a re-arrangement being required every 10 years. Each district is divided into voting circuits. The voting system, devised with a view to proportional representation, provides for the formation of voters' associations which prepare three name lists of candidates, the votes for whom are in a falling scale according to the order in which the voter has placed them. There may, within limits, be compacts between associations, and joint candidates may be entered in competing lists, while any voter may either support an association list or vote for any candidate he pleases. Every citizen entitled to vote is eligible to the Diet, the members of which receive 1,400 marks (58*l.*) for each session of about 80 days. The Diet lasts for 3 years unless sooner dissolved. The Grand Duke summons and may dissolve the Diet, certain legislative measures are brought forward by the ministers as propositions from him, and the Government is responsible to him as well as to the Diet. But the Diet can decide on any motion not affecting fundamental laws or the organisation of land and sea defence.

**Poland** —Poland, which had a Constitution of its own from 1815 to 1830, and a separate government till 1864, was deprived at the latter date of the last remnant of its administrative independence. Finally, by ukase of the Emperor, dated Feb. 23, 1868, the government of Poland was absolutely incorporated with that of Russia, and the use of Polish language in public places and for public purposes (railways, signboards, wills, &c.), was prohibited.

**Baltic Provinces** —The Baltic Provinces have had some institutions for self government of their own. They have, however, been gradually curtailed, and the privileges of the provinces in police and school matters, chiefly vested in the nobility, have been taken away by a law of June 21, 1888, the judicial and police rights of the landlords having been transferred to functionaries nominated by the State. By a law of July 21, 1889, the last vestiges of manorial justice and of tribunals under the German speaking nobility have been abolished, but the Law of Justice of 1864, which is in force in Russia, has been but partially applied to the provinces, so as to maintain the administration of justice under the central Government. The Russian language has been rendered obligatory in the official correspondence

<sup>1</sup> For further details on Finland, see end of Russia.

of all parish, municipal, and provincial administration; so also in the Dorpat University, which was deprived in December 1889 of its privileges of self government, and the gymnasia in 1890. The town of Dorpat has received the name of Yuriev, and the seat of the administration of the Baltic Educational District has been transferred to Riga. In April, 1893, new Committees for peasants' affairs were introduced, with the same powers as in Russian Governments.

## Area and Population

### I. PROGRESS AND PRESENT CONDITION

The Russian Empire comprises one-seventh of the land surface of the globe. Its area, without internal waters, is, since the treaty of Portsmouth, 8,417,118 English square miles (19,155,587 7 square verstes).

Until 1897 there have been but various enumerations of the population called *revizions*. On January 28 (February 9) 1897 a census was taken over the whole of the Empire (with the exception of the Grand Duchy of Finland). Comparing the items of the census with the figures of the 1856-59, it appears that the population of the Empire has increased by 74 per cent. The largest increases took place in the capitals (270 p.c. in St. Petersburg), South Russia comes next (207 p.c. in Kherson, 170 p.c. in Yekaterinoslav, 137 p.c. in Taurida). The increase in other parts of the Empire appears as follows:—North West Russia, from 56 to 73 p.c.; Baltic Provinces, 25 to 58 p.c.; White Russia and Lithuania, 77 (Kovno) to 130 (Minsk) p.c.; Poland 117 p.c.; Caucasus (without annexations) 95 p.c.; Siberia, 130 p.c.

The rapidity of growth of the population of the Empire (its acquisition being included in the figures of population) is seen from the following:—

Year	Population	Year	Population
1722	14,000,000	1856	60,000,000
1762	19,000,000	1859	74,000,000
1796	36,000,000	1897	129,209,297
1815	45,000,000	1911	167,008,400

The population of 1911 was estimated as follows by the Central Statistical Committee on the basis of the census of 1897 and the yearly increase of the population:—

European Russia	120,588,000
Poland	12,467,300
Caucasus	12,087,200
Siberia	8,719,200
Central Asian Provinces	10,107,300
Finland	3,084,400
<b>Total Russian Empire</b>	<b>167,008,400</b>

The following table exhibits the area and population according to the last issue of the Russian Central Statistical Committee (1912)

Governments and Provinces	Area English square miles	Population on January 1, 1911	Density per sq mile	Governments and Provinces	Area English square miles	Population on January 1, 1911	Density per sq mile
<b>1 European Russia—</b>	(1)	(2)		<b>2 Poland—</b>	(1)	(3)

<sup>1</sup> In proportion to the area from which the inner waters are excluded.

<sup>2</sup> In proportion to the total area.

The proportion of women in the population varies, in the Russian provinces, from 133.8 per each 100 men (Yaroslavl) to 87.4 (St Petersburg)—this disproportion being due to the male population temporarily moving to the capitals or to the shipbuilding centres during the winter. The average proportions of women to 100 men are: Russian Provinces, 102.9, Poland, 98.6, Caucasus, 88.9, Siberia, 93.7, The Steppes, 89.4, Turkestan and Transcaspians, 88.0, Russian Empire (exclusive of Finland), 99.9.

The ethnical composition of the population shown by the last census is set forth in the following table —

	European Russia	Poland	Caucasus	Siberia	Central Asia	Total
Aryans	51,513,580	8,121,607	4,901,418	4,711,679	1,083,245	100,231,516
Slavs	76,130 173	7 294 712	8 188 870	4,668,782	709,197	92,089 733

## II MOVEMENT OF THE POPULATION

The movement of population in European Russia, exclusive of Finland, is seen from the following statement for 1909 and 1910 —

	1909	1910
<b>Births</b>	5,545,901	5,680,480
<b>Deaths</b>	3,661,808	3,916,612
<b>Increase</b>	1,884,093	1,763,868

The births and deaths rates in European Russia for five years and per 1,000 inhabitants are seen from the following statements —

	1906	1907	1908	1909	1910
<b>Births</b>	45.9	46.3	44.1	49.8	44.2
<b>Deaths</b>	29.1	27.8	27.7	28.5	30.6
<b>Increase</b>	16.7	18.5	16.4	14.9	13.7

The movement of population from and into the Russian Empire in five years was as follows —

	From Russia			Into Russia		
	Russians	Foreigners	Total	Russians	Foreigners	Total
1906	236 853	266 480	503 333	202,798	838 902	566,700
1907	204,019	277 838	481 857	207 886	857 991	565 787
1908	245 890	285 040	530 786	209 835	840 846	547 706
1909	272,521	399 467	571 988	213 42	870 776	684,218
1910	266 441	358 159	719,600	292,080	430,967	719 077

The Russians, especially Jews and Poles, contributed a large part to the flow of emigrants into the United States. The number of immigrants from the Russian Empire into the United States during the years 1873 to 1910 was 2,527,457 (839,364 from 1873 to 1900). The emigration for the last ten years was as follows —

1901	85,257	1906	215 685
1902	107,347	1907	253 943
1903	136,093	1908	166,711
1904	145 141	1909	120,460
1905	184 887	1910	186,792

### III PRINCIPAL TOWNS

The great majority of the population of Russia being agriculturists, they dwell in villages. The number of towns and villages in the Russian Empire (exclusive of Finland), grouped according to population, is given as follows —

Towns with population	Number	Villages with population	Number
Over 100,000	19	1,000—3,000	17,724
50,000—100,000	38	100—1 000	185,157
20,000— 50,000	118	Under 100	521,754
10,000— 20,000	315		
3,000— 10,000	3,032	Towns and villages	725,157

In European Russia there is an average of one town or village to every 4 7 sq miles, the average varying from 1 to every 0 43 sq miles in Courland to 1 for every 148 sq miles in the government of Archangel. In Poland there is 1 for every 1 38 sq miles, in the Caucasus 1 for every 9 sq miles. In Asiatic Russia the average varies between 1 to 14 miles in Samarcand, and 1 to every 2,760 sq miles in the province of Yakutsk. It will thus be understood that the distinction between the population of towns and of country on January 1, 1911, given in the following table, and based on the census of 1897, and the yearly increase of the population, is not to be closely pressed —

Population of	In Towns	In the Country	Males	Females
European Russia	15 787,900	104 790 100	59 697 080	68,981,000
Poland	2,907,300	9,540,100	4,274,300	5 192,600
Caucasus	1,577,500	10,489 700	6,821,800	5,715,900
Siberia	1,650,800	7,868,600	4,481,300	4,387,300
Central Asia	1 863,500	3,721 800	5 419 000	4 668,500
Total	22,718 700	141,200,300	82,168,400	81,813,600

The following are the populations of the chief towns of governments or provinces, and of the other towns having more than 40,000 inhabitants —

<b>European Russia proper</b> (chiefly in 1910) —	<b>Brest-Litovsk (10)</b> 59,300	* <b>Nicolaistad</b> 30,898

## Religion.

The established religion of the Empire is the Greek Russian, officially called the Orthodox Faith. It has its own independent synod, but maintains the relations of a sister Church with the four Orthodox patriarchates of Constantinople, Alexandria, Antioch, and Jerusalem. The Holy Synod, the board of government of the Russian Church, was established in 1721.

The Emperor is head of the Church, he appoints to every office therein, and is restricted only so far as to leave to the bishops and prelates the privilege of proposing candidates, and he transfers and dismisses persons from their offices in certain cases. But he has never claimed the right of

deciding theological and dogmatic questions. Practically, the Procurator of the Holy Synod enjoys wide powers in Church matters.

With the exception of the restraints laid on the Jews, all religions may be freely professed in the Empire. The dissenters have been and are still, however, severely persecuted, though recently some liberty has been extended to those of the 'United Church'. It is estimated that there are more than 12,000,000 dissenters in Great Russia alone. The affairs of the Roman Catholic Church are entrusted to a Collegium, and those of the Lutheran Church to a Consistory both settled at St. Petersburg. Roman Catholics are most numerous in the former Polish provinces, Lutherans in those of the Baltic, and Mohammedans in Eastern and Southern Russia, while the Jews are almost entirely settled in the towns and larger villages of the western and south western provinces.

There are no trustworthy figures as to the numbers of adherents of different creeds—many dissenters being inscribed under the head of Greek Orthodox. The numbers, however, according to census returns of 1897, published in 1905 are given as follows—

Orthodox Greek and		Anglicans	4,188
United Church	87,123,604	Other Christians	8,952
Dissidents	2,204,596	Karamas	12,894
Armenian Gregorians	1,179,241	Jews	5,215,805
" Catholic	38,840	Mohammedans	13,906,972
Roman Catholic	11,467,994	Buddhists	433,863
Lutheran	8,572,653	Other non Christians	285,821
Reformed	85,400		
Baptists	38,139	Total	125,640,021
Mennonites	66,664		

The Russian Empire is divided into 66 bishoprics (*eparchiya*), which were under 3 metropolitans, 14 archbishops, and 50 bishops the latter had under them 37 vicars, all of them are of the monastic clergy. There were, in 1910, 52,869 churches both public and private with 49,642 priests and 14,670 deacons. The monasteries on December 31, 1910 numbered 942, 524 for men and 418 for women, with 9,987 monks and 9,532 aspirants and 14,008 nuns and 46,811 aspirants. The management of Church affairs is in the hands of 62 'consistories'. For Roman Catholics there is an Archbishop of Warsaw and another of Mohilev each with six suffragan bishoprics. Of the suffragans of Mohilev one is of the Graeco Ruthenian rite of which rite there is another bishop immediately subject to Rome.

The expenditure of the Synod in the budget of 1912 is 40,129,979 roubles contributed by the Imperial budget. The expenditure for other churches is about 1,500,000 roubles contributed chiefly by the Ministry of Interior.

### Instruction

Most of the schools in the Empire are under the Ministry of Public Instruction, and the Empire is divided into 16 educational districts (St. Petersburg, Moscow, Kazan, Orenburg, Kharkov, Odessa, Kiev, Vilna, Warsaw, Riga, Caucasus, Turkestan, West Siberia, East Siberia, and Amur). However, many special schools are under separate Ministries.

There are universities at St. Petersburg (8,746 students), Moscow (10,399), Kharkov (4,062), Kiev (5,302), Kazan (2,447), Odessa (2,756), Yuriev or Dorpat (2,668), Tomsk (1,371), Warsaw (2,002) and Saratov (200). Total number of students, 39,853, (January 1, 1911). A Popular University bearing the name of General Alphonse Dumas, who has given the funds necessary for its creation, has existed at Moscow since autumn, 1903. Finland has a university at Helsinki, with 2,778 students.

on January 1, 1911 (see Finland). Nearly 4,000 students in Russia are either supported by bursaries or dispensed from paying fees.

Besides the universities there are a number of institutions for special education—theological, medical, legal, technical, and Oriental languages—distributed among the larger towns of the Empire.

The nature and number of the middle schools, and the number of pupils attending them are as follows (exclusive of Finland) —

Middle Schools in 1910-11	Number	Pupils	Middle Schools in 1910-11	Number	Pupils
Gymnasias	320	119,039	Gymnasias of Cosack Volakas	89	8,792
Progyrnasias	30	5,016	Progyrnasias	88	
Realschools	235	67,320	Girls' gymnasias	80	4,352
Normal schools (Teachers Institutes)	17	1,221	Girls' Progyrnasias	14	
Normal seminaries and practical schools (Teachers Seminaries)	94	8,922	Gymnasias of Empress Marie	32	14,780
Girls' gymnasias	674	243,636	Institutes of E. Marie	37	9,118
Girls' progyrnasias	106	16,443	Seminaries	67	80,468
Cadet corps (1908)	29	12,308			

The nature and numbers of the special schools, middle and primary and the number of pupils attending them are as follows (exclusive of Finland) —

Special Schools in 1910-11	Number	Pupils	Special Schools in 1910-11	Number	Pupils
Theological	470	77,788	Fine Arts	75	10,605
Pedagogical	328	21,742	Topographical	8	612
Medical	72	9,132	Strange Languages	66	582
Military	84	12,079	Professional	48	2,729
Nautical	80	1,180	Various	60	2,375
Forestry and Agriculture	128	6,619			
Technical	627	40,299	Total	2,107	225,206
Commercial and Industrial	178	57,627			

The expenses for the middle schools are contributed by the State Exchequer, by fees and by donations of the *zemstvos*, the municipalities and so on. The Cosack schools are maintained by the separate *voiskos*, which, moreover, maintain a number of their pupils in the governmental schools.

According to the Census of January 18 (31), 1911, concerning the elementary schools, the numbers of schools, teachers, and pupils in the Russian Empire were on that day as follows —

	Schools	Teachers	Pupils
Ministry of Public Instruction	59,682	180,019	4,186,078
Holy Synod	57,922	68,525	1,798,429
Other zemstries and various foundations	2,691	6,729	201,002
Total	100,295	255,273	6,185,510

According to the last issue (1912) of the "Year Book of Russia," published by the Central Statistical Committee, the numbers of all kinds of schools and of children attending them, on January 1, 1910, were as follows <sup>1</sup>

	Number of schools	Students or pupils attending the schools				
		High schools	Middle schools	Special schools <sup>2</sup>	Primary schools	Total
European Russia	87 484	57 470	886 634	184 628	5 044 135	6,222,867
Poland	6 850	2 663	18 356	16 127	284,862	321,519
Caucasasia	2 610	—	8 778	3,898	172,675	188,251
Transcaucasia	2,838	416	12 451	8 519	107 205	128 589
Siberia	5 278	2 094	16 583	9 054	250 685	282 219
Central Asia	9,882	—	11 807	6 900	64,006	111,595
Total	114 837	63 242	406 904	228 205	5 956 011	6 649,462

<sup>1</sup> Exclusive of the cities of St. Petersburg, Kronstadt, and Baku, the governments of Warsaw and Tiflis and the province of Kamchatka.

<sup>2</sup> Middle and primary

To the total number of 6,649 462 students or pupils must be added 165,180 pupils of private schools, lay or religious of Christian creeds, 1,106 pupils of schools for blind, and deaf and dumb, 288,274 pupils of religious schools of non Christian creeds, and 203,061 not classed in the above categories. Total number of persons attending the schools of the Russian Empire (exclusive of Finland) 7,307,082.

Number of pupils attending the schools per 1,000 inhabitants of both sexes —

	Males	Females	Of both sexes
European Russia	71.2	32.3	51.3
Poland	80.0	32.1	41.8
Caucasasia	61.4	29.7	45.6
Transcaucasia	48.6	16.8	37.3
Siberia	46.7	22.7	35.0
Central Asia	30.7	10.1	21.8
Russian Empire	65.7	31.0	46.9

The less illiterate provinces of European Russia are —Esthonia, 20.1 illiterates per 100 of population, Livonia, 22.3, Curland, 29.1, St. Petersburg, 44.9; other provinces, more than 50 per 100

The contributions of the Ministry of Public Instruction, of the Holy Synod, and of the different ministries for educational purposes in the budget estimates for 1912 appear as follows Ministry of Instruction, 98,800,000 roubles; Holy Synod, 20,247,000, Ministry of War and of Navy, 17 904,000, General Direction of Land Organization and Agriculture, 4,297,000, Ministry of Commerce and Industry, 3 384 000, Ministry of Finances, 232,000, other ministries, 2,951,575 Total, 142,805,000 roubles.

## Justice and Crime

The administration of justice was reformed by law of November 1864, which instituted scribe courts with juries, elective justices of peace with functions similar to those of English magistrates, assemblies of justices of peace, before which appeals from judgments of individual magistrates might be brought, appeal courts for re-hearing cases not tried by jury Above all

these courts was the Court of Cassation, which formed part of the Senate. This system never became general throughout the Empire, a reaction having soon begun. The examining magistrates, who ought on principle to have been irremovable were very rarely confirmed in their office and the investigation of criminal cases was entrusted to magistrates temporarily appointed. By law of May 20, 1886, the principle of irremovability was restricted, by laws of May 9, 1878, and July 7, 1889, the assistance of a jury in certain cases was suppressed. A law of July 12, 1889, abolished elective justices of peace putting in their places, in the country districts, the country chiefs (*sennetsy nachalniki*), nominated by the administration from among candidates taken from the nobility, recommended by the nobility, and endowed with wide disciplinary powers against the peasants, and, in the towns, the urban justices (*gorodskoi sudia*), nominated in the same way, in both cases the appointments being made by the Minister of Justice. Justices of peace have been retained only in the two capitals and in six of the largest towns of the Empire.

Reformed tribunals, but without juries, were introduced in Poland in 1875, in the Baltic Provinces in 1889, in the Governments of Ufa, Orenburg, Astrakhan, and Olonets in 1894, and in Siberia in 1897. The reformed system of justice was extended over Turkestan, the Provinces of the Steppes, the north-eastern districts of Vologda, and the Transcaspiian Province in 1898 and 1899. The tribunals of the days anterior to 1864 have thus everywhere disappeared.

In conjunction with the assemblies of the Volost and Gmina (see Local Government), are cantonal tribunals, consisting of from four to twelve judges elected at cantonal assemblies. Injuries and offences of every kind, as well as disputes relating to property between the peasants, not involving more than a hundred roubles, come under the jurisdiction of these popular tribunals. Affairs of more importance, up to 300 roubles, are judged by the County Chiefs.

The appeal courts are fourteen. 11 in European Russia and Caucasus (at St. Petersburg, Moscow, Kharkov, Odessa, Kazan, Saratov, Kiev, Novocherkassk, Vilna, Warsaw, and Tiflis), and 3 in Asiatic Russia (at Tashkent, Irkutsk, and Omsk). There are 104 assize courts. 88 in European Russia and 16 in Asiatic Russia.

Since 1906 nearly two thirds of the Empire having been placed in a state of siege, the great number of crimes have been judged by the tribunals of exception: courts martial and from August, 1906, to April, 1907, held courts martial. Before 1905 the executions were unusual. 281 in 34 years, from 1856 to 1890, 126 from 1891 to 1900. The numbers of death sentences and of executions, from November, 1905 to November, 1908, were 4,812 and 2,298, the number of executions without trial was 1,331. Total of executions in 3 years, 8,629. In 1908 131,914 persons were judged by normal tribunals, 56,514 of them were acquitted, and 81,127 condemned to various punishments.

The prison population on January 1 of each of the last six years was as follows:—

Years	Number of prisoners	Years	Number of prisoners
1906	95,452	1909	180,906
1907	123,298	1910	174,498
1908	160,623	1911	174,789

The expenditure for prisons is estimated in the budget for 1912 at the sum of 32,746,259 as against 31,597,277 roubles for 1911.

## Finance.

## I STATE FINANCE

The following table gives the total actual *ordinary* and *extraordinary* revenue and expenditure for each of the five years —

Year	Ordinary		Balance	Extraordinary	
	Revenue	Expenditure		Revenue	Expenditure
	Roubles	Roubles	Roubles	Roubles	Roubles
1907	2 842,474 585	2 105 865 445	+ 146,506 140	149 043,173	288 640 082
1908	2 417 807 828	2 387 790 695	+ 30 067 238	200 960,077	268,982,206
1909	2 626 340 888	2 401 423 768	+ 74 917 120	182,744 206	156,127 871
1910	2 740 986 891	2 473 167 193	+ 307 809 798	21 090 628	123,505 048
1911	2 951 782 684	2 535 805 778	415 976 906	2,567 906	309 604 696

The actual *ordinary* and *extraordinary* revenue and expenditure for 1911, given in the last Report of the State's Control, the estimated revenue and expenditure for 1912, according to the budget estimates voted by the Duma and the Council of the Empire and sanctioned by the Emperor June 5 (18) 1912 and the project of the Budget for 1913 presented to the Parliament by the Minister of Finance, are as follows —

Revenue	Actual 1911	Estimated 1912	Proposed 1913

Grand total	2,745 690,451	2,901 919,261	2,908,406,951

The fluctuations of the Russian national debt are seen from the following —

January 1	Roubles	January 1	Roubles
1889	1 870 480,117	1909	8,800,761 679
1892	4 356,638,149	1910	9,038,758,488
1902	6,430 851 061	1911	9 014 141 796
1907	8 635 600 215	1912	8,841,640 620
1908	8 725 628,210	1913	8 845 717 768

The payments of interest and capital for the State and railway debts in the budget estimates for 1911 and 1912 and in the project of the budget for 1913 appear as follows —

	1911	1912	1913
	Roubles.	Roubles	Roubles
1. Interest	378,996 825	375,661 670	371 060 020
2. Capital	27 059 519	27 898 826	30 784 616
3. Banking and miscellaneous expenses	1 110 860	966 550	1 112 449
Total payment of loans	407 166,704	404 521 546	402,957 085

## Defence

### I FRONTIER

Russia has an extensive frontier both by sea and land, protected by numerous fortifications of various classes. On the west, Poland is defended by a system of four strongholds, sometimes called the Polish Quadrilateral—Novogeorgievsk on the right bank of the Vistula, Warsaw and Ivangorod each on both banks of the Vistula, Brest Litovsk on the Bug. There are numerous other fortified places, mostly neglected, on the Vistula and Bug.

The more important fortresses and forts are divided into three classes as follows —In the first class are Warsaw, Novogeorgievsk, and Brest Litovsk in the Warsaw district, and Kovna in the Vilna district. The second class consists of Kronstadt and Sveaborg in the St Petersburg and Finland district, Ivangorod in the Warsaw district, Kereh in the Odessa district, Libau in the Vilna district, and Vladivostok in the Amur district. In the third class are Viborg in the Finland district; Ossovets and Ust Dvinsk (previously Dünabund) in the Vilna district, Sevastopol and Ochakov in the Odessa district and Kara and Batum in the Caucasus district. There are also forty six places unclassified, many of them being mere fortified posts.

### II ARMY

Military service in Russia is universal and compulsory. Service begins at the age of 21 and extends to completion of the 43rd year. Owing to the extent of the Empire, there are 3 armies in Russia, known as the army of European Russia, the army of the Caucasus, and the Asiatic army. These armies are practically distinct from each other, and the terms of service in each are slightly different.

Speaking generally, service in the first line, or active army, is for 3 years

in the infantry, field, and foot, artillery, and for 4 years in the other arms. The soldier is then transferred to the reserve (*Zapas*), in which he serves for 15 or 14 years, undergoing during this period 2 trainings of 6 weeks each. Having completed 16 years in the first line and its reserve, the soldier passes to the 'Opolchénié'. Service in the Opolchénié is for 5 years, that is to the completion of the 43rd year of the soldier's age.

The Cossacks, occupying the S W portion of European Russia, hold their lands by military tenure, and are liable to service for life. The Cossack troops are almost entirely mounted, they provide their own horses and equipment. The young Cossacks from the age of 19 are trained for two years at their homes. They then enter the 'first category' regiment of their district, in which they remain for four years. These regiments are permanently embodied and may be employed in any part of the Empire. The men then pass to the 'second category' regiment for another four years, and to the 'third category' regiment for a similar period. The men of the second category regiments live at their homes, but retain their equipment and horses, in the third category, the men have their equipment, but no horses, they are called out for three weeks training every year. Finally there is a period of five years in the reserve, which fills casualties in time of war. Besides this, every Cossack up to any age can be called out in time of emergency to assist in the national defence.

The Opolchénié, or territorial army, is divided into 2 classes, or 'bans'. The first ban includes not only the trained men who have passed through the first line and reserve, but the young men surplus to the annual contingent, and all are liable to embodiment in the active army in time of war. This part of the Opolchénié therefore serves the purpose of a supplementary reserve. But provision is also said to have been made for the formation of a large number of units, which are to be organised in 40 divisions, each consisting of 16 battalions, 2 batteries, and a cavalry regiment of 4 squadrons, these are for home defence. The second ban of the Opolchénié is the *levy en masse* containing all those exempted from actual service, whether as students, only sons, &c., or as not quite up to the physical standards of the army, and also the older classes of the surplus men who have all had a certain amount of training.

There is a modified system of one year volunteers in Russia, which furnishes the majority of the officers required for the reserve troops on mobilisation.

A Russian division consists of 2 brigades of 2 regiments of 4 battalions. To each division is attached an artillery brigade of 6 or 8 batteries, with its ammunition columns, an engineer battalion and 2 or 3 *sotnias* (squadrons) of Cossacks. The normal army corps consists of 2 divisions, a howitzer division, a sapper battalion, and, in the case of several army corps, a cavalry division. A cavalry division ordinarily consists of 2 brigades of 2 regiments (one brigade of uhlans and hussars, the other of dragoons and Cossacks), and 2 batteries of horse artillery. Field batteries have 8 guns each, horse artillery batteries have 6 guns each. The fighting strength of an army corps may be taken as 86,000 men, without a cavalry division, and 40,000, if a cavalry division is included. In European Russia, including Finland, rifles are organised in regiments of 3 battalions, and form permanent brigades of 4 regiments (8 battalions). These rifle brigades have their own artillery (8 batteries), and they are not included in army corps, they are considered special troops, and are supplied with a better stamp of recruits than the line.

The field army of European Russia consists of 27 army corps, viz. — the Guard and Grenadier Corps, and 25 line army corps. The cavalry

comprises 2 guard divisions and a guard brigade, 15 line divisions, 2 'mixed' divisions (half dragoons and half Cossacks), a Don Cossack division, and 3 independent cavalry brigades. Of the 20 cavalry divisions, 15 are permanently attached to army corps, and 4 are formed into two cavalry corps. The second mixed division and the separate brigades are independent. All told, the army in Europe comprises 1,636 battalions, 642 squadrons, and 497 batteries.

The field army in the Caucasus consists of 3 army corps each of 2 divisions (one division is of Caucasian grenadiers), and 4 cavalry divisions, 1 of line cavalry (dragoons) and 3 divisions of Caucasian Cossacks (Kuban and Terek), a brigade of Cossack (Kuban) infantry of 6 battalions, and 2 brigades of Caucasian rifles, each of 4 battalions. The second rifle brigade is recruited from Christian natives of the Caucasus.

In the Asiatic army the men are Russians, with the exception of a few Turkoman irregular horse (jugtis). In Siberia the troops are mainly, if not entirely, recruited from military colonists. In Western and Central Asia there are 5 rifle brigades, each of 4 battalions in peace, and 8 in war. There is also a Turkestan Cossack Division, and a Transcasian Cossack brigade. The 5 brigades mobilise as the first and second Turkestan Army Corps. Each army corps has a Turkestan artillery brigade, one of 6 and one of 9 batteries.

But the largest part of the Asiatic army is in East Siberia, which now possesses a strong and complete army of its own. Since the Russo-Japanese war the East Siberian forces have been increased and reorganised. There are 11 divisions of Siberian rifles, each with a corresponding artillery brigade of 4 batteries of 8 guns. Mounted troops are supplied by the Trans-Baikal, Amur, and Ussuri Cossacks, and the Primorsk Dragoons, who collectively furnish 36 sotnias and squadrons in peace, and over 90 in war, also 2 Cossack H.A. batteries, expanding to 4 in war. The whole would mobilise as 5 Siberian army corps (instead of 3, as formerly), and from 2 to 4 Cossack cavalry divisions.

The troops of the Russian Empire are so far territorialised that each corps draws its recruits from a particular district, and is as a rule permanently quartered in the same garrisons. But in European Russia the bulk of the army is stationed west of a line drawn north and south through Moscow, consequently recruits and reservists have in the majority of cases to travel long distances to join their corps. Moreover, a number of recruits from 'Great Russia' are sent to corps outside. All this makes mobilisation a slower and more difficult process than in Germany or France. The peace strength of the armies of Russia is upwards of 1,200,000 of all ranks. The field armies of European Russia and the Caucasus, with the first category reserve divisions, and the second category regiments of the Don and Caucasian Cossacks may amount to 1,500,000 or 1,600,000 men. The Asiatic army might at present mobilise for field operations about 300,000 men altogether. The grand total of the Russian armies may, therefore, be taken at 1,850,000 of which, under favourable circumstances, 1,200,000 might perhaps be assembled in a single theatre.

The Russian infantry is armed with the '3 line' rifle, model 1891. It is a magazine arm, calibre .299in., muzzle velocity 2,025 f.s., sighted to 3,000 paces. The magazine holds 5 cartridges. The cavalry and Cossacks have a similar rifle, 2½ inches shorter in barrel, but taking the same cartridge. The Russian artillery is armed with a Q.F. shielded gun, model 1902, firing a shell of 13½lb with a muzzle velocity of 1,950 f.s.

The military budget of Russia for 1911 amounted to about 51,350,000£ ordinary expenditure, and 5,000,000£ extraordinary. Total 56,350,000£ sterling.

## III. NAVY

## Estimates —

1910	£10,212,000	1908	£8,345,000	1906	£10,648,169	1904	£11,949,906
1909	£ 9,581,195	1907	£8,457,662	1905	£12,292,684	1903	£12,840,567

The Russian Navy is subject to special conditions such as do not affect the navies of other Powers. Owing to the geographical situation of the Empire, and the widely separated seas which wash its coasts, Russia is obliged to maintain four distinct fleets or flotillas, each with its own organization. Of these the most important in regard to Western relations is the Baltic Fleet. The chief base of the Baltic Fleet is Kronstadt, which is heavily fortified, as are Danabünde (Ust-Dvinsk), Viborg, Sveaborg, and other Baltic ports. The Gulf of Finland is usually blocked by ice from November to April, whereby the operations of the fleet are impeded, but a new ice-free port at Libau, in Courland, has now been made ready for the fleet. It is further in contemplation to establish a naval port on the Arctic coast of Russian Lapland, which is free from ice throughout the year, and thus to open up the possibility of creating a naval force with free access to the Atlantic Ocean, but the advantages of this would be very slight, since such a force would be too distant from any scene of operations to effect much. Considerable progress has lately been made in the construction of ice-breaking vessels, and Kronstadt can no longer be considered ice bound.

In the Black Sea, Sevastopol, headquarters of the Euxine fleet, has been strongly fortified, Nikolaiev, Kinburn, and Ochakov have received important defensive works, Kertch and Yenikale have been made very strong, and Azov, Poti, and Batum have been strengthened. There is a flotilla also in the Caspian Sea, which ensures the communications of the Trans-Caspian railway between Baku and Krasnovodak, and would have its purpose in operations against Persia.

State dockyards are at Nevsky, New Admiralty and Galerny; Ostrov, St Petersburg, Kronstadt, Libau, Revel, Sevastopol, Nikolaiev, and Vladivostok. Semi-private yards exist at the Baltic works, St. Petersburg; Ishra Abo, and Nikolaiev.

In the war with Japan disaster befell the Russian fleet. Damaged in the torpedo attack of February 8-9, it issued out later only to lose the *Petropavlovsk* with Admiral Makaroff on board. In August it again issued from Port Arthur, and after a naval battle retreated again to its base, less its best battleship, the *Tsesarevitch*, interned at Kiao Chiao, and three cruisers. Captain Wirén, of the *Bayan*, who alone had earned distinction on the Russian side in the war, was then made Admiral, but with a battered fleet and crews used by General Stoessel to man forts, he could accomplish nothing. In December the Japanese guns reached the warships, which were all sunk by this fire, or by the Russians when the surrender took place.

Subsequently the Baltic Fleet was sent out under Admiral Rojdestvensky. It consisted of five first-class battleships, six old battleships, some ancient armoured cruisers, some protected cruisers, and about ten destroyers, together with a multitude of store ships. This heterogeneous armada encountered the Japanese fleet in the Straits of Tsushima, and was there completely annihilated by gun and torpedo without loss to Japan. One first-class and three old battleships were captured. A few protected cruisers escaped—all the rest were sunk.

The chief of the Russian Navy is the General Admiral, Commander-in-Chief. There are 10 admirals, 25 vice and 37 rear-admirals, 102 captains,

252 commanders, 1,542 (including staff-commanders and subalterns of marine artillery) junior officers, 503 engineers, 702 medical and civil officers, and 162 naval yard officers. There are 20 'equipages in the Baltic, a half equipage at Revel, and a company at Sveaborg, an equipage of the Imperial Guard at St Petersburg, 10 equipages in the Black Sea, one at Baku, one at Vladivostok, each including the complements of one battleship and of a number of smaller vessels. There is also a training school for gunners and a torpedo school, a naval cadets' training squadron of full rigged cruisers and sloops, and a divers' school hulk. The total number of officers and men is about 60 000, but many of the men are raw recruits.

The following is a statement of the strength of the Russian Fleet, including ships building and provided for, but excluding training ships, transports, and non effective vessels

## BALTIC FLEET

	At the end of		
	1912	1913	1914
Dreadnoughts	—	4	4
'Pre-Dreadnought' battleships	4	4	4
armoured cruisers	6	6	6
Protected cruisers	6	6	6
Torpedo gunboats &c.	3	?	?
Armoured gunboats	2	2	2
Destroyers	22	?	?
Torpedo boats	38	?	?
Submarines	29	?	?

There is also a special Black Sea fleet, reorganised in 1911

## BLACK SEA FLEET

	At the end of		
	1912	1913	1914
Dreadnoughts	—	—	2
"Pre-Dreadnought" battleships	6	6	6?
Armoured cruisers	—	—	—
Protected cruisers	2	2	11
Destroyers	22	25	?
Torpedo boats	16	16	?
Submarines	8	14	?

In both fleets there are also a number of gunboats, &c.

There are also two armoured gunboats, and various very old torpedo boats.

The Caspian flotilla, which is not included in the above statement, consist of a few small gunboats and steamships.

The tables which follow of the Russian armour-clad fleet and principal cruisers are arranged in chronological order. Ships in italics are not yet completed

## II FORESTS

Of the total area of the Empire under forest, only that of European Russia proper, the Kingdom of Poland and the Caucasus can be estimated with some degree of certitude. In European Russia forests cover a territory of 474 millions of acres, in Finland, 50.5 millions, in Poland, 6.7 millions, in the Caucasus, 18.7 millions, reaching a total for the regions named of 550 millions of acres, 39 per cent. of total area. In the two Ural mountain provinces, forests cover 70 per cent. of total area, in the two northern provinces, 68 per cent., in Finland, 63 per cent., in the four lake provinces, 57 per cent.

The State forests of the Empire are distributed as follows (January 1, 1911) —

	Total area acres	Area in exploitation acres
European Russia	226,329,596	48,063,337
Poland	2,101,299	1,282,397
Caucasus	13,311,084	1,226,097
Siberia	586,850 409	5,341,541
Central Asia	50,308,746	1,177 963
Total	941,913,527	56,211,235

The revenues and expenses of the State forests during six years are given in the following table (in 1,000 roubles) —

Years	Revenue	Expenses	Net profit	Years	Revenue	Expenses	Net profit
1906	58 191	10 326	42,965	1908	61 712	19,064	42,648
1908	58 208	10 751	47 452	1909	66,687	20 761	45 926
1907	59,845	12,856	47,489	1910	74,778	22,852	51 926

### III MINING AND METALS

The soil of Russia is rich in ores of all kinds, and mining industry is steadily increasing. The statistics during five years are given in the following table —

Year	Gold <sup>1</sup>	Platinum <sup>2</sup>	Silver <sup>3</sup>	Lead	Zinc	Copper	Pig Iron	Iron and Steel <sup>4</sup>	Coal	Naphtha	Salt
	Kilogrammes			Tons			Thousands of tons				
1906	28 411	5 685	1 564	997	9 925	9 162	2,648	2,931	21,459	7 229	1 703
1907	31,118	5,901	2 141	512	9 953	13 037	2 778	2 864	24,587	7 675	1 686
1908	49,890	4 885	9 596	5 3	9 960	17 1 5	2 820	2,407	25,886	8 737	1,890
1909	56,796	5 118	15 413	794	9 606	18 482	2 885	2,398	26,786	9,304	2 276
1910	63 646	5 479	14 547	1 235	10 667	20 579	2,935	2,969	25 094	9 474	2,085

<sup>1</sup> Unrefined (schlich gold) on the average it produces about 88 per cent. fine gold.  
<sup>2</sup> Unrefined silver extracted from argentiferous lead ores on the average it produces about 92 per cent. fine silver.  
<sup>3</sup> Unrefined silver extracted from argentiferous lead ores on the average it produces about 92 per cent. fine silver.  
<sup>4</sup> Rolled of all kinds.

The following table gives the production of pig iron in the different regions of Russia for five years, in thousands of pounds<sup>1</sup> —

	1907	1908	1909	1910	1911
South Russia	111 075	117,415	132,879	136 835	147 747
Ural and Siberia	58,511	35 830	54 914	39 071	44,867
Central Russia	4 808	4 908	4 226	4,694	5 238
N & N W Russia	214	120	110	145	77
Poland	17 387	12 798	13 166	15 800	21 161
Total	171 995	171,673	175 285	185,505	219 978

<sup>1</sup> 1 000 pounds = 16 121 tons.

The quantities of iron and steel worked in the above-mentioned regions of Russia for five years, in thousands of pounds, were :

	1907	1908	1909	1910	1911
South Russia	73 161	75,511	88 979	98,885	112,748
Ural	30,807	31 041	33 588	30,962	37 172

The number of persons engaged in the making and working of metals was 580,165 in 1910

## IV MANUFACTURES

According to the last statistics published by the Department of Industry of the Ministry of Finance, the number of all kinds of industrial establishments under the inspectors of manufactories in European Russia proper, Poland and four governments of the Caucasus (Baku, Kutais, Tiflis, and Black Sea), was, on January 1, 1911, 15 721, employing 1,951,955 work people 1 227,300 men 521,236 women, and 203,359 children (118,007 males, and 85,352 females)

Alcohol production of the last five years (ending June 30) —

—	1907-08	1908-09	1909-10	1910-11	1911-12
Number of distilleries	2,610	2 625	2,804	2 881	2,916
Production of alcohol in 1 000 gallons	115 106	128 211	114 278	133,454	131 088

Sugar production of the last five years (ending June 30) —

—	1907-08	1908-09	1909-10	1910-11	1911-12
Number of sugar works	278	274	277	275	282
Area under beetroot in acres	1 017 083	1 389,643	1 166 108	1 025 830	1 922,018
Sugar production in 1 000 pounds	76 046	68 836	85 566	92,596	121,340

The share capital of various financial, manufacturing, industrial, steam ship and other enterprises in operation in Russia, numbering 1411, was estimated, in 1905, at 2,156 986 021 roubles (Nearly 20 per cent. represented the capital of foreign companies)

## V FISHERIES

Russia ranks third among the fish and deep sea food producing countries of the world. The total yield of fish amounts to about 1,206,000,000 pounds per annum. This is, however, by no means sufficient for the population of the vast Empire. The shortage is made up by imports of all kinds of low priced fish, especially cod fish and herrings, Russia's purchases of the former aggregate 90,000,000 pounds and of the latter 396,000,000 pounds.

A steady falling off in the catch of all the various species of fish is noticed in European Russia. According to official data, the yield of fish in European

Russian dropped from 1,587,600,000 pounds in 1898 to 1,044,000,000 pounds in 1907

### Commerce

The trade of the Russian Empire is carried on chiefly through its European frontier, through the Black Sea frontier of the Caucasus, and with Finland. The custom duties levied at these three frontiers form 90 per cent. of all custom duties.

The following table gives the average yearly exports and imports of Russia for 1900-1904, and 1905-1909 and the exports and imports for the years 1909 and 1910 in the trade with Europe, Asia, and Finland (bullion not included, nor the external trade of Finland) —

Years	Exports	Imports	Customs duties
	Millions of roubles	Millions of roubles	Millions of roubles
1900-1904	860.2	630.4	228.6
1905-1909	1,160.2	820.4	282.6
1909	1,427.7	908.3	281.3
1910	1,449.1	1,084.4	318.6

The exports and imports from and to the different frontiers for the last five years are given in the following table —

	1904	1907	1908	1909	1910
	Millions of roubles	Millions of roubles	Millions of roubles	Millions of roubles	Millions of roubles

## Internal Communications

### I RIVERS AND CANALS

In European Russia (exclusive of Finland) there are 153,782 miles of rivers, canals and lakes, 20,670 miles being navigable for steamers, 7,482 for small sailing vessels, 88 739 for rafts. In Asiatic Russia there are 86,422 miles of rivers, canals, and lakes, 21,421 miles being navigable for steamers, 8,678 for small sailing vessels, 88,224 for rafts.

The following tables give the results of the census of river fleet of European Russia in 1900, compared with those of 1890 and 1895, and the provisional data of the census of 1906, as regard the number of vessels

Number of vessels and their crew —

	1890		1895		1900		1906
	Number	Crew	Number	Crew	Number	Crew	Number
Steamers	1,824	25,814	2,539	32,689	3,295	40,603	3,696
Other vessels	20,125	90 356	20,530	95,608	22,859	98,269	22,930
Total	21,949	116,170	23,119	128,297	26,154	138,872	26,626

The horse power of the river steam fleet in 1890 was 103,206, in 1895, 129,769, in 1900, 185,004. The tonnage of vessels not provided with steam power—in 1890, was 6,453,836 tons, in 1895, 8,496,218, in 1900, 10,869,588, in 1906, 13,000,600.

The naphtha flotilla of the Caspian Sea numbers 57 steamers and 263 sailing vessels, which have transported above 30,000,000 cwt of naphtha.

## II RAILWAYS.

The railway net open for traffic on January 1, 1912, had a length of 46 025 miles, of which 35,447 miles were in European Russia, 10,578 miles in Asiatic Russia. The length of the lines belonging to and worked by the Government is 33,828 miles, that of the lines belonging to public companies is 10,787 miles, short local lines, 1,410.

The progress of the railways of Russian Empire (exclusive of Finland) for ten years (in English miles) is seen from the following table —

Years	European Russia	Asiatic Russia	Total	Years	European Russia	Asiatic Russia	Total
1902	30,451	5,147	35 598	1907	33,048	8,128	41,176
1903	31,299	5,153	36,452	1908	34,108	10,472	44,580
1904	31,785	6,373	38,157	1909	34,465	10 485	44,950
1905	32,168	7,478	39,646	1910	34,531	10,497	45,028
1906	32,748	8,005	40,753	1911	35,447	10,578	46,025

Gross receipts, number of passengers, and weight of goods carried for two years —

	Passengers		Goods		Gross receipts	
	1910	1911	1910	1911	1910	1911
	1,000 persons	1,000 persons	million pounds	million pounds	1,000 roubles	1,000 roubles
State railways	184 025	144 982	7 912	8,860	534,991	609,457
Public companies	45,119	51 897	3,368	3,663	291,323	300 919
Short local lines	12,862	14,363	150	163	7,438	8,694
Total	194,966	211 032	11,420	12,786	833 806	919,070

The number of men employed on the Russian railways was 515,884 in 1901, 525,216 in 1903, 536,034 in 1907, and 544,218 in 1908.

The cost of construction of the railways of Russia, without Finland, was estimated in 1909 at 6,723,780,998 roubles.

## III. POSTS, TELEGRAPHS, AND TELEPHONE.

The following are the postal and telegraphic statistics for five years —

## INTERNAL AND EXTERNAL COMMUNICATIONS

	Letters and postcards	Book post, periodicals and parcels	Letters with money and postal orders
1906	886 035 900	518 767 768	21 911,644
1907	907,990,000	558 065 000	37 582,000
1908	1 061 918 000	571 291,000	38 628,000
1909	1 209 656,000	610 926,000	41 828,000
1910	1 251,966 000	677,653 000	46 055 000

	Telegraphs		
	Lines	Wire	Telegrams Carried
	Miles	Miles	Number
1906	106,146	399,743	156 766,533
1907	106 238	415,897	161,667,733
1908	119,117	415,004	163,363,094
1909	120,865	425 969	181 748 546
1910	126,483	453,580	—

	1906	1907	1908	1909	1910
Revenue	74,321 198	77 092,269	80 807 884	83 840,475	93,887,928
Expenditure	46,079 264	48 520 111	50 861 680	56 246,914	62 285 645

## Money and Credit.

By an Imperial decree, dated January 3 (15), 1897, it was ordered that the State Bank should accept paper money and exchange it for gold money.

A regular value of the paper currency having thus been introduced, a law was passed on August 29, 1897, to the effect that paper currency may be issued by the State Bank, when necessity occurs, but on the following conditions. If the amount of paper currency does not exceed 600,000,000 roubles, it must be guaranteed by half that sum, while every issue above 600,000,000 roubles must be guaranteed to the full amount in gold deposited at the bank. The growth of the paper currency and the fluctuations of the guarantee fund on January 1 (14), of the last five years are represented as follows in millions of roubles —

	1906	1909	1910	1911	1912
Paper currency	1 280-0	1,200-0	1,500-0	1,594	1,450
Guarantee fund (in gold) at the Bank and Treasury.	1,166-2	1,229-0	—	—	—
Cash and gold at the Bank	1,328-9	1,402 5	1,411-2	1,637-2	1,696 7

*The Bank of Russia* acts in a double capacity—of State Bank and of commercial bank. It has 134 branches. The situation of the bank in 1911, was as follows (in 1,000 of roubles) —

Assets		Liabilities	
Cash and credit notes	1,809,900	Capital and reserve	55,000
Portfolio	671,700	Note circulation	1,858,600
Advances, loans	112,300	Deposits, &c	237,300
Various	30,700	Treas. acc current	724,200
		Various	54,500
Total	2,424,600	Total	2,424,600

*The Savings Banks* —The number of banks and of depositors and the amount of deposits on January 1 (14) of three years were as follows —

	1910	1911	1912
Number of savings banks	7 681	7 835	7 692
depositors	6 939 700	7 449,000	7 979 842
Sums deposited	1 28 900 000	1 898 100 000	1 502,427 000

*Mortgage Banks* —On January 1 1912, there were in European Russia, Poland, and Caucasus, 53 mortgage banks. State Mortgage Bank for the nobility a section of this bank, State Mortgage Bank for the peasantry and 50 private banks, out of which 10 are shareholders banks and 40 town and land banks.

The number of properties mortgaged, their area and value, and the sums advanced, on January 1 of the last five years by the State Mortgage Bank for the nobility and its section, State Mortgage Bank for the peasantry, Land Bank of the Government of Kherson and 10 shareholders banks are seen from the following —

	1907	1908	1909	1910	1911
Number of properties	144,078	150,478	174 931	—	908,188
Acres mortgaged	149 116 744	149 608 692	147 269 656	—	151 890,454
Value (in roubles)	3,435,990,867	3,705 744,100	3 917 701,778	—	4,361,199,962
Sums advanced (in roubles)	2,047,870 925	2 000 090 542	2,21, 258,782	—	3,617 200 086

The most important of the mortgage banks are —

a. *State Bank for mortgage loans to the nobility* —Number of properties mortgaged on January 1, 1911 26 560 acres mortgaged, 82,455,028, value (in roubles), 1 197,747,871 sums advanced, 689,350,800 roubles—Loans granted in 1906 82,578,000 roubles, in 1907, 26,164,000 roubles, in 1908, 81,657,900 roubles, in 1909, 49,701,600 roubles, in 1910, 87,125,400 roubles.

b. *Land Bank for the purchase of land by the peasants.* —

	1907	1908	1909	1910
Acres bought with the aid of the bank	2,818,480	2,751 032	2,812,664	4,188,810
Value in roubles	120 504 964	134,067,878	172,455,504	204,834,402
Sums lent by the bank	107 831,578	116,228 114	144 497 534	162,633,326
Acres bought by the bank	6,802,861	1,544 480	456,090	464,620
Value in roubles	169,142,584	34,804,441	12,554,798	18,723,263

Russia has consuls at Belfast, Hull, Liverpool, Newcastle, and Plymouth, vice consuls at Aberdeen, Birmingham, Bristol, Cardiff and Newport, Chatham and Sheerness, Cowes, Dover, Dublin, Dundee, Exeter, Falmouth, Glasgow, Gloucester, Goole, Grimsby, Guernsey and Jersey, Harwich, King's Lynn, Leeds, Leith, Lerwick, Londonderry, Lowestoft, Manchester, Milford, Peterhead, Portland, Portsmouth, Queenstown and Cork, Ramsgate, Rochester, Southampton, Sunderland, Swansea and Llanelli, and Yarmouth.

## 2. OF GREAT BRITAIN IN RUSSIA

*Ambassador*—Right Hon Sir George Buchanan, G C V O, K C M G C B, appointed 1910

*Counsellor*—H J O Beirne, C V O, C B

*Secretaries*—E. Phipps Neville Henderson, and Hon T Spring Rice

*Military Attaché*—Lt-Col A. W. Fortescue Knox.

*Naval Attaché*—Commr A C H Smith, R. N., M V O

*Council*—A. W. W. Woodhouse

There are also British Consuls-General (O G), Consuls (C), or Vice Consuls at Abo, Archangel, Baku, Batûm (C) Berdiansk, Fredricksharan, Cronstadt, Helsingfors, Kiev (O), Kerch, Libau, Mariupol, Moscow (C), Narva Nicolaiev, Novorossisk, Odessa (O G), Pernaù, Poti, Revel, Riga, Rostov, Sebastopol, Taganrog, Theodosia, Warsaw (C), Windau

## FINLAND.

The Government of Finland and her relations to the Empire have been described under the heading of Local Government, and its area and population are given with the area and population of the Russian provinces. Of the total area 10.88 per cent is under lakes. In 1890 the postal administration of Finland was subjected to the Russian Ministry of Interior

## Population.

Years	In Towns	In Country	Total	Men	Women
1906	410,807	2,523,049	2,933,856	1,456,478	1,477,378
1907	425,087	2,549,717	2,974,804	1,477,231	1,497,573
1908	438,564	2,574,285	3,012,849	1,498,938	1,513,916
1909	445,998	2,626,254	3,071,242	1,524,236	1,547,007
1910	456,873	2,658,324	3,115,197	1,546,694	1,568,503

In 1910 the present population consisted of 2,565,742 Finns, 344,364 Swedes, 7,389 Russians, 1,764 Germans, 1,860 Laps, etc

Of the total population there were at end of 1910 —Lutherans, 3,057,627, Greek Orthodox and raskolniki, 52,004, Roman Catholics, 423, Baptists, etc., 2,143

The chief towns, with population, of Finland are (1910) —Helsingfors (with Sveaborg), 147,212; Abo, 42,691; Tammerfors, 45,442, Viborg, 37,563; Oskoborg, 19,929; Björnsborg, 18,321, Nicolaistad (Wasa), 21,813, Espoo, 15,845.

The movement of the population in five years was as follows —

Years	Marriages	Births	Deaths	Excess of Births
1906	19,937	91,401	50,857	40,544
1907	20,266	92,457	53,028	39,429
1908	16,551	92,145	55,305	36,841
1909	19,418	95,005	50,577	44,428
1910	18,781	92,984	51,007	41,977

The births and deaths are exclusive of still births, numbering, in 1910 2,379 or 2.49 per cent. of total births

Emigration, 1904, 10,952, 1905, 17,427, 1906, 17,517, 1907 16,296, 1908, 5,812, 1909, 19,144, 1910, 18,007, 1911, 9,372

### Instruction

In 1912 Finland had 1 university, with 3,080 students (780 ladies) in 1912, 1 technical high school, 438 students (15 ladies), 1 commercial high school with 44 students, 1911, 69 lyceums (26 State), 15,765 pupils (5,143 girls) 15 continuation classes for boys and girls, 642 pupils, 29 elementary schools for boys and girls, 2,999 pupils, 25 girls schools, 5,048 pupils, 43 preliminary schools, 2,427 pupils, in the country 47 popular high schools with 1,686 pupils, in the country 2,903 primary schools (of higher grade) with 135,168 pupils, and primary schools (of lower grade) with 64,014 pupils, in 36 towns, primary schools with 1,828 teachers and 87,981 pupils, 8 training colleges for primary (popular) school teachers, with 1,089 pupils, 6 for preliminary schools with 209 pupils. There are besides 6 navigation schools, with 132 pupils (1912), 21 commercial schools with 1,730 pupils, 36 primary trade schools, with 1,872 (1910) pupils, 19 higher trade schools, with 1,774 (1910) pupils, 10 technical schools, with 1,032 (1911) pupils, 108 schools for arts and crafts ("elöyd") with 1,891 pupils (1910), 37 agricultural, 8 dairy schools, 39 cattle managers schools, and 21 horticultural schools with together 2,257 pupils, 6 forester schools with 133 pupils. The school age in the primary schools is from 7 to 15 years.

In 1911 were published 258 newspapers and reviews in Finnish, 100 in Swedish, 6 in Swedish and Finnish, 3 in German 2 in Russian and 2 in English.

### Pauperism and Crime.

The number of paupers in 1910 supported by the towns and the village communities was 86,350 (2.77 per cent. of the population), and the total cost was 6,276,421 marks

The prison population, at the end of 1910, was 8,236 men and 516 women, while the number of sentences pronounced, in the first instance, for crimes was 32,144, and for subjects of contention 44,803

### Finance.

The receipts for 1911 were 6,374,868*l*. (25,133*l* being extraordinary revenue, 23,520*l* taken from the funds, and 8,466*l* being accidental revenue), and expenditure 6,341,864*l*. (718,265*l* extraordinary expenditure, and 5,623,600*l* disposed for the funds and 29,801*l* being accidental extra expenditures) Of the revenue, 358,030*l*. came from direct taxes, 2,506,406*l* indirect taxes, 2,786,571*l*. from the railways, forests, domains, and other

fortunes of the State, and 783,987½ other revenues. The chief items of expenditure are government, 117,878½, justices and prisons, 205,667½ military affairs, 487,157½, civil administration 541,044½, religion and education, 687,203½, communications, 1,886,724½ public debt, 838,947½, construction of railways, 528,428½, commerce and industries, 266,652½, agriculture, 281,699½, pensions and grants, 212,485½ &c

On January 1, 1911, the public liabilities of the Grand Duchy contracted entirely for railways, amounted to 7,053 589½.

### Industry

The land was divided in 1901 into 271,154 farms and the landed property was distributed as follows — Less than 3 hectares cultivated, number of farms, 106,462, ½ hectares farms 78 778 ½ hectares, farms 56,790, ¾ hectares, farms 27,289 over 100 hectares, farms 1 856

The crop of 1910 was in hectolitres — Wheat, 43,738 (1910), rye, 4,350,000 (1911, 3 577,800), barley, 2,380 000 (1911, 2,336,700), oats, 9,830,000 (1911, 7,979,100), potatoes, 8,270,000 (1911, 7,996,100), flax and hemp, 22,910 (1910).

Of domestic animals Finland had in the country at the end of 1910 — Horses, 3 years of age 289,553, horned cattle 2 years of age, 1 188,800

The crown forests cover January, 1912, 12,576 000 hectares. Their maintenance cost (1911) 5,066 906 marks, and the income derived from them was 15 694,479 marks. In 1909 there were 162 saw mills with water motors and 508 steam and 59 motor mills. They give occupation to 23,595 workers, and their aggregate production was 3 615,000 cubic metres of timber, as against 2,809,000 cubic metres in 1900

The annual produce of pig iron and iron, in metric tons, for five years was —

Years	Ore	Pig iron	Bar Iron
1906	35,820	15,865	22,531
1907	33,108	15,100	23 136
1908	9,393	11,712	19,760
1909	5,008	8,579	21,756
1910	5,193	8,288	33,409

Finland had in 1910, 4,040 large manufactures, employing an aggregate of 92,928 workers, and yielding an aggregate product (exclusive of flour mills) of 628,655,800 marks (250,662,120½) The chief were —

	No of Establishments	No of Workers	Production Marks
Iron and mechanical works	143	16 806	49 075 000
Textiles	94	13 376	68,498,100
Wood industries	635	28,354	141,234,700
Distilleries and breweries	92	1,201	10 923,800
Paper	120	11,871	91 652,700
Leather	58	2,241	25 142,700
Chemicals	87	1 007	3 687,900
Graphic arts	144	3,371	12,096,300
Tobacco	26	3,777	35 023,100
Electricity, gas and water	47	1 082	6,077,800

The total number of steam engines was in 1910, 1,485, horse-power 100,153; 1,324 electric engines; and 880 other engines.

### Commerce

The exterior trade of Finland appears as follows, in thousands of marks (francs):—

	1900		1910		1911	
	Imports from	Exports to	Imports from	Exports to	Imports from	Exports to
Russia	117,229	71,808	106,676	70,496	137,616	69,043
Sweden and Norway	16,229	9,057	25,099	12,065	21,590	14,839
Denmark	19,326	8,610	20,838	9,963	26,071	11,668

Various	18,896	28,747	19,890	33,442	18,587	24,082
Total	257,137 (14,825,1084.)	247,054 (10,382,3004.)	334,089 (18,803,5004.)	290,142 (11,605,8804.)	444,504 (17,780,0004.)	319,569 (12,783,0004.)

The chief articles of export are timber (167,037,000 marks in 1911, as against 91,303,000 in 1898), butter (34,028,000), paper, paper mass, and cardboard (32,163,000), iron and iron goods (23,114,000), textiles, leather, hides, tar, pitch and fish.

The chief imports were cereals (101,010,000 marks), coffee and chicory (23,374,000), sugar (19,859,000), iron and ironware (23,113,000), cotton (14,001,000), cottons (7,795,000) machinery (23,687,000), chemicals, leather ware, tobacco, colours, oils, leather and hides.

### Shipping and Navigation

Number of vessels entered and cleared in 1911 —

	Entered		Cleared	
	No.	Tons	No.	Tons
Finnish	5,016	1,065,090	5,970	1,083,417
Russian	1,031	182,418	608	181,166
Foreign	2,552	1,428,063	2,640	1,428,792
Total	8,599	2,675,571	9,218	2,693,375

The Finnish commercial navy numbered on January 1, 1912, 2,959 sailing vessels of 327,625 tons, and 487 steamers, 72,013 tons, total, 3,446 vessels of 399,638 tons.

### Internal Communications.

For internal communications Finland has a remarkable system of lakes connected with each other and with the Gulf of Finland by canals. The

number of vessels which passed along the canals in 1911 was 18,588, the receipts from vessels, 1,045,822 marks; and expenditure, 887,946 marks.

In 1910, there were 2,363 miles (1911, 2,332 miles) of railways, all but 182 miles (1911, 211 miles) belonging to the State. The traffic upon the State railways in 1910 was 14,462,769 passengers and 3,840,000 tons of goods. The total cost of the State railways to the end of 1910 was 402,701,000 marks. The total revenue of the same in 1910 was 44,261,432 marks (1911, 50,052,543), and the total expenditure 36,496,150 marks (1911, 36,747,043).

Finland had 2,188 post-offices in 1911, and revenue and expenses were respectively 7,423,820 and 6,426,295 marks, united letters and post-cards, 45,183,652, samples, and printed packets, 9,359,248, newspapers, 60,576,109.

The 382 savings-banks had on December 31, 1911, 808,939 depositors, with aggregate deposits of 10,087,5912.

### Money, Weights, &c

The *markka* of 100 *pennä* is of the value of a franc, 94d. The standard is gold, and the *markka*, though not coined in gold, is the unit.

Gold coins are 20 and 10 *markka* pieces. They contain 2003225 grammes of fine gold to the *markka*.

Silver coins are 2, 1,  $\frac{1}{2}$ , and  $\frac{1}{4}$  *markka* pieces.

Copper coins are 10, 5, and 1 *pennä* pieces.

The paper currency is exchangeable at par against gold.

The metric system of weights and measures is universally employed in Finland.

### RUSSIAN DEPENDENCIES IN ASIA.

The following two States in Central Asia are under the suzerainty of Russia —

#### BOKHARA.

A Russian vassal State in Central Asia, lying between N latitude 41° 30' and 36° 40', and between E longitude 61° 40' and 73°, bounded on the north by the Russian provinces of Syr-Daria and Samarkand, on the east by the province of Ferghana, on the south by Afghanistan, and on the south west by the Russian Trans Caspian province and the Khanat of Khiva.

The reigning sovereign is Sayid Mir-Alim Khan, son of the late Amir Sayid Abdul Ahad; born January 8, 1880, succeeded his father on January 6th, 1911. The heir is his son, Sayid Mir Ibrahim, born December 27, 1903.

The modern State of Bokhara was founded by the Usbeks in the fifteenth century, after the power of the Golden Hords had been crushed by Tamerlane. The dynasty of Manguts, to which the present ruler belongs, dates from the end of the 18th century. Mir Muzaffer-ed-din in 1866 proclaimed a holy war against the Russians, who thereupon invaded his dominions, and forced him to sign a treaty ceding the territory now forming the Russian district of Syz Daria, to consent to the demand for a war indemnity, and to permit Russian trade. In 1873 a further treaty was signed, in virtue of which no foreigner was to be admitted to Bokhara without a Russian passport, and the State became practically a Russian dependency.

*Amirs of Bokhara.*—Sayid Ameer Hyder, 1799-1826, Mir Hussein, 1826, Mir Omir, 1826-27, Mir Nasrulla, 1827-60, Muzaffer ed din, 1860-85, Amir Sayid Abdul Ahad, 1885-1911.

Area 83,000 square miles, population about 250,000. Chief towns —Bokhara, about 75,000, Karshi, 25,000, Khuzar, Shahr-i Zabz, Hissar, 10,000, Charjui, Karakul, Kermina.

The religion is Mahomedan. The Amir is stated to have given 20,000 roubles for the foundation of a school.

The Amir has 11,000 troops, of which 4,000 are quartered in the city. A proportion of the troops are armed with Russian rifles and have been taught the Russian drill.

Bokhara produces corn, fruit, silk, tobacco, cotton, and hemp, and breeds goats, sheep, horses, and camels. Gold, salt alum, and sulphur are the chief minerals found in the country.

The yearly imports of green tea, mostly from India, are said to amount to 1,125 tons. The imports from India also include indigo, Dacca muslins, drugs, shawls, and kincobs. Bokhara exports raw silk to India, the quantity exported in one year being estimated at 34 tons. By the treaty of 1873 all merchandise belonging to Russian traders, whether imported or exported, pays a duty of 2½ per cent *ad valorem*. No other tax or import duty can be levied on Russian goods, which are also exempt from all transit duty. The Ameer has forbidden the import of spirituous liquors except for the use of the Russian Embassy.

The Russian Trans Caspian Railway now runs through Bokhara from Charjui, on the Oxus, to a station within a few miles of the capital, and thence to Tashkent, the distance from Charjui to the Russian frontier station of Katty Kurghan being about 186 miles. There is steam navigation on the Oxus.

There is a telegraph line from Tashkent to Bokhara, the capital.

Russian paper roubles are current everywhere. The Bokhara silver tenga is valued at 5d.

There is a Russian Political Agent at Bokhara.

## KHIVA

A Russian vassal State in Central Asia, lying between N latitude 43° 40' and 40°, and E longitude 57° and 62° 20'. Bounded on the north by the Aral Sea, on the east by the river Oxus, on the south and west by the Russian Trans Caspian province.

Seyid Asfendiar Khan succeeded his father in 1910 as reigning sovereign, born about 1871. The heir-apparent, accepted by Russia, is Nasyr Tyouara, son of Asfendiar.

Russian relations with the Khanate of Khiva—an Usbeg State, founded, like that of Bokhara, on the ruins of Tamerlane's Central Asian Empire—date from the beginning of the 18th century, when, according to Russian writers, the Khivan Khans first acknowledged the Tsar's supremacy. In 1872, on the pretext that the Khivans had aided the rebellious Kirghiz, an expedition advanced to the capital, bombarded the fortifications, and compelled the Khan to sign a treaty which puts the Khanate under Russian control. A war indemnity of about 274,000*r* was also exacted. This heavy obligation still being liquidated by yearly instalments, has frequently involved the Khan in disputes with his subjects, and Russian troops have more than once crossed the frontier to afford him aid and support.

The Khans of Khiva have been Mohamed Rahim Khan, 1806-25, Alla Kuli Khan, 1825-42, Rahim Kuli Khan, 1842-45, Mohamed Arzun Khan, 1845-55, Abdulla Khan, 1855-56, Kutlugh Murad Khan, 1856, Seyid Mohamed Khan, 1856-65, Seyid Mohamed Rahim Khan, 1865.

Area, 24,000 square miles, population estimated at 800,000, including 400,000 nomad Turcomans. Chief towns—Khiva, 4 000-5,000, New Urgenj 3 000, Hazar Asp, and Kungrad.

The religion is Mahomedan. Army, about 2,000 men.

The chief commercial products are cotton and silk.

## SALVADOR

(REPUBLICA DEL SALVADOR.)

**Constitution and Government**—In 1839 the Central American Federation, which had comprised the States of Guatemala, Salvador, Honduras, Nicaragua, and Costa Rica, was dissolved, and Salvador became an independent Republic. The Constitution, proclaimed in 1824 under the Federation, and modified in 1859, 1864, 1871, 1872, 1880, 1883, and 1886, vests the legislative power in a Congress of 42 Deputies, 3 for each department. The election is for one year, and by universal suffrage. The executive is in the hands of a President, whose tenure of office is limited to four years.

*President of the Republic*—Dr Manuel E. Araya. Inaugurated March 1, 1911, for four years.

*Vice President*—Señor Onofre Duran.

The administrative affairs of the Republic are carried on, under the President, by a ministry of four members, having charge of the departments of—The Exterior, Justice, Worship, and Instruction, War and Marine, Interior and Government, Finance, Public Work, and Beneficence.

The army may be divided into three parts: (1) available force, 78 officers, 512 petty officers, and 15,554 men; (2) forces that can be made available at short notice, 49 officers, 356 petty officers and 11,176 men; (3) reserve force, 251 officers, 1,743 petty officers, and 15,554 men. Total, 878 officers, 2,611 petty officers, and 82,881 men. In case of war, military service is compulsory from 18 to 50 years of age. There is one custom-house cruiser.

**Area and Population**.—The area of the Republic is estimated at 7,225 English square miles, divided into 14 departments. Population (1 Jan 1912) 1,161,426. The number of foreigners in the Republic is estimated at 200,000. Aboriginal and mixed races constitute the bulk of the population, Ladinos or Mestizos being returned as numbering 772,200 and Indians 234,648. The capital is San Salvador, with 59,640 inhabitants. Other towns are Santa Ana, population 48,120; San Miguel, 24,768; Nueva San Salvador, 18,770; San Vicente, 17,832; Sonsonate, 17,016.

The number of births in 1911 was 49,179 (46,866 in 1910), the number of deaths 26,472 (27,358 in 1910). Of the births in 1911, 25,028 were males, and 24,151 were females.

**Instruction and Justice**—Education is free and obligatory. There are in Salvador 486 primary schools, with 868 teachers and 21,569 enrolled pupils (11,633 boys and 9,936 girls). There are also 20 higher schools (including 3 normal and 8 technical schools) and special schools for jurisprudence, and for medicine, pharmacy, and dentistry.

Justice is administered by the Supreme Court of Justice, one court of third instance (in the capital) and several courts of first and second instance, besides a number of minor courts. All judges of second and third instances are elected by the National Assembly for a term of 2 years, while the judges of first instance are appointed by the Supreme Court for a similar period.

**Finance**.—Revenue and expenditure (in silver dollars) for five years:—

	1909	1910	1911	1912	1913
	Dollars	Dollars	Dollars	Dollars	Dollars
Revenues	13,063,739	12,361,628	13,477,078	12,129,756	12,746,415
Expenditure	11,372,664	11,806,343	12,041,191	12,296,769	12,693,181

The outstanding foreign debt of the Republic in 1911 amounted to 1,461,552.

The total outstanding debt on December 31, 1911, was 1,407,815 dollars.

**Production and Commerce.**—The population of Salvador is largely engaged in agriculture. The chief produce is coffee, under which there are about 166,039 acres, with some 95 000,000 trees. The estimated crop for 1911-12 was 70,000,000 pounds. Of this 65,000,000 pounds were exported. Other agricultural products are cheese, cacao, rubber tobacco, sugar. The Government is encouraging cotton growing by bounties on exports. Efforts are made towards wheat cultivation. Tree planting is also encouraged. In 1908 there were 284,013 head of cattle, 74,396 horses, 21,457 sheep and 422,980 pigs. The mineral wealth of the Republic includes gold, silver, copper, iron, mercury. Mining operations are growing in importance. Operations are carried on by Salvadorian, United States, and British companies.

The imports subject to duty and the exports have been as follows (imports in gold dollars, exports in silver dollars) in five years —

	1907	1908	1909	1910	1911
	Dollars	Dollars	Dollars	Dollars	Dollars
Imports (Gold)	2,449,721	4,340,560	4,176 931	3 745 849	6 118,118
Exports (Silver)	15,166 460	15 423,810	3,487 787	9,132,546	8,688,861

The trade is chiefly with the United States, Germany and France. The chief imports are cottons (1,757,950 dollars), hardware (335,817 dollars), flour (263,702 dollars), silk goods and yarn. The chief exports in 1911 were coffee (\$77,422 quintals, valued at 1,432,850 dollars), indigo, balsam, 28,840, gold, 910,372, silver, 482 694, lead, sugar 4,725

The treaty of commerce of 1882 between the United Kingdom and the Republic of Salvador provides for "the most favoured nation" treatment in respect of trade navigation, manufactures, mining and the holding of property.

Total trade between Salvador and the U. K. in thousands of pounds for 5 years. —

	1907	1908	1909	1910	1911
Imports from Salvador into U. K.	38	62	79	67	68
Exports to Salvador from U. K.	287	350	270	264	288

**Shipping and Communications.**—In 1909, 463 steamers entered at the ports of the Republic, and as many cleared.

A railway connects the port of Acajutla with Santa Anna and La Ceiba, with this system San Salvador, the capital, is connected—a distance of 65 miles. Another railway connects the capital with Santa Tecla. Total length of railway open (1911), 180 miles, all of narrow gauge. A steam or electric tramway line is to connect La Libertad and Nueva San Salvador. There are over 2,000 miles of good road in the Republic. In 1911 there were 62 post offices which handled 2,140,683 pieces of mail matter. In 1911 there were 143 telegraph offices and 2,455 miles of telegraph wire, over which passed 1,540,440 telegrams. There are 160 telephone stations

and 2,106 miles of telephone line. A wireless station is in operation at Las Lomas de Candelaria.

## Money, Weights, and Measures.

### MONEY

There are 4 banks of issue, the principal of which are the Banco Salvadoreño (paid-up capital, 2,126,000 pesos silver), Banco Occidental (paid-up capital 1,000,000 pesos silver) and Banco Agrícola Commercial (paid-up capital, 922,500 pesos silver). On December 31, 1910, they had notes in circulation to the value of 1,858,636 pesos.

The *Dollar*, of 100 centavos, nominal value 4s, real value about 19d.

In August, 1897, a law was passed adopting the gold standard. The import of debased silver coin is prohibited. In October, 1899, the Salvador mint formerly the property of a company, was transferred to the Government.

In 1911, the Government of Salvador contracted with the four banks of San Salvador for the coinage abroad and the introduction of silver pieces of 5, 10, and 25 centavos, aggregating 300,000 pesos. These coins will be 0.885 fine. Those of 5 centavos will weigh 125 centigrams each, those of 10 centavos, 250 centigrams, and those of 25 centavos, 625 centigrams.

The fractional currency in circulation in Salvador now consists of silver reales (12½ centavos) ½ real pieces (6¼ centavos), and quartillos (½ real or 3½ centavos). The decimal coins now in existence are not accepted in the native stores or in the markets, but the Government offices and the banks take them.

### WEIGHTS AND MEASURES

<i>Libra</i>	= 1.048 lb av	<i>Arroba</i>	= 25.35 lb av
<i>Quintal</i>	= 104.3 lbs av	<i>Fanega</i>	= 1.5745 bushel

In 1885 the metrical system of weights and measures was introduced.

## Diplomatic Representatives

### 1 OF SALVADOR IN GREAT BRITAIN

*Consul-General*.—Dr. Arturo R. Avila.

There are consular agents at London, Manchester, Liverpool, Glasgow, Southampton and Birmingham.

### 2 OF GREAT BRITAIN IN SALVADOR.

*Minister and Consul-General*.—Sir Lionel E. G. Carrion, K.C.M.G.

*Consul*.—W. E. Coldwell.

*Vice-Consul at San Salvador and La Unión*

## SANTO DOMINGO

(REPUBLICA DOMINICANA)

**Constitution and Government**—The Republic of Santo Domingo, founded in 1844, is governed under a Constitution bearing date November 18, 1844 re proclaimed with changes at various dates in 1879, 1880, 1881, 1887, 1896, and 1908. By the Constitution of 1908 the legislative power of the Republic is vested in a National Congress, consisting of a Senate of 12 senators and a Chamber of Deputies of 24 members. These representatives are remunerated at the rate of \$300 per annum each. There is one senator for each province, and the deputies are elected by the provinces in proportion to the number of their inhabitants. The members are chosen by indirect vote in the ratio of two for each province for the term of four years. But the powers of the National Congress only embrace the general affairs of the Republic.

The President is chosen by an electoral college for the term of six years, and receives a salary of \$2,600 dollars per annum. There is no Vice President. In case of death or disability of the President Congress designates a person to take charge of the executive office.

*President ad interim of the Republic*—Dr. Adolfo A. Nouel (elected by Congress in November, 1912 on the resignation of President Victoria). Term of office 1912-14.

The executive of the Republic is vested in a Cabinet composed of the President and seven Ministers who are the heads of the departments of the Interior and Police, Finance and Commerce, Justice and Public Instruction, War and Marine, Agriculture and Immigration, Foreign Affairs, and Public Works and Communications.

The Republic is divided into twelve provinces. Each province is administered by a governor appointed by the President of the Republic and they have all the same political, administrative and judicial rights and powers. The various communes, cantons, and sections are provided over by prefects or magistrates appointed by the governors. The communes have municipal corporations elected by the inhabitants.

**Area and Population**—The area of Santo Domingo, which embraces the eastern portion of the island of Quisqueya or Sto Domingo—the western division forming the Republic of Haiti—is estimated at 19,325 English square miles, with a population estimated (in 1911) at 768,000 inhabitants.

The population is mainly composed of creoles of pure Spanish descent, and a mixed race of European, African and Indian blood, there are however, many Turks and Syrians especially in Santo Domingo city, where the dry goods trade is almost exclusively in their hands. The language used by the populace is Spanish, but on the Samana Peninsula there are a few hundred farmers, some of whom (descended from American negro immigrants of 1828) speak corrupt English, and others Haitian patois. The capital, Santo Domingo, founded 1496 by Bartolomeo Colombo, brother of the discoverer, on the left bank of the river Ozama, was destroyed in 1547 by a hurricane and subsequently rebuilt on the right bank of the same river. It has in 1912, 22,000 inhabitants. Santiago, 20,000, Puerto Plata the chief port and Macoris have between 15,000 and 16,000 each; Samana, Sanchez, Azua, and Monte Cristi have from 4,000 to 5,000 each.

In 1911 there were 27,407 births, 2,442 marriages, and 6,803 deaths.

**Religion and Instruction**—The religion of the State is Roman Catholic, other forms of religion being permitted. There is a Catholic arch

bishopric with one suffragan see, viz., Porto Rico, now belonging to the United States

**Primary instruction** is gratuitous and obligatory, being supported by the communes and by central aid. The public or state schools are primary superior, technical schools, normal schools, and a professional school with the character of a university. In 1911 there were 590 schools in the Republic with 20 453 children (10 422 boys and 10 031 girls)

**Justice**—The chief judicial power resides in the Supreme Court of Justice which consists of a president and 6 justices chosen by Congress, and 1 (ministro fiscal) appointed by the executive. All these appointments are only for 4 years, but may be prolonged indefinitely. The territory of the Republic is divided into 12 judicial districts each having its own civil and criminal tribunal and court of first instance, and these districts are subdivided into communes, each with a local justice (alcalde), a secretary and bailiff (alguacil). There are two appeal courts: one at Santiago de los Caballeros, and the other at Santo Domingo City.

**Finance**—The revenue is derived chiefly from customs. There are besides, sugar and liquor taxes and stamp taxes, and considerable receipts from posts, telegraphs, and telephones, and also from civil registration. The receipts and disbursements for 4 years were (estimates for 1912) in United States dollars:—

Fiscal years	Receipts		Disbursements Total
	Customs	Total	
	Dollars	Dollars	Dollars
1910	\$ 110 000	4 700 788	4 645 287
1911	3 001 400	3 991 500	3 941 500
1912	3 873 400	4 834 000	4 805 877
1913	3 500 000	4 208 400	4 208 400

Under the Convention signed on the part of the United States and Dominican Governments an American citizen is General Receiver of Customs with authority to deposit 100,000 dollars each month towards interest (5 per cent) and Sinking Fund, in trust for all the national creditors. In addition half the Customs Receipts in excess of 3 000 000 dollars is applied to the same end.

**Defence**—The regular army provided for by law consists of 6 companies of artillery (648 officers and men), the greater part of the force being usually kept at Santo Domingo, but Puerto Plata and Santiago are also military posts. The Government has about 1 300 men under pay. The Rural Guard is provided for in the budget to the extent of 906 officers and men, but only about half that number have been embodied and equipped. There is also a force on the Haitian frontier under the direction of American officers and dependent on the Receivership of Customs, but paid from the Dominican budget.

The navy consists of six vessels. For the customs service 4 large, light draught motor cutters have been built in the United States and are now in commission.

**Production and Industry**—Of the total area, about 15,500 square miles is cultivable. Sugar growing is a flourishing industry, shipments in 1911, 193,487,946 lbs. to the value of 4 767,533 dollars, being an increase of 15,780,772 lbs and 1,095,600 dollars over those of 1910. Cocoa was exported to the extent of 42,344,741 lbs, valued at 3,506,377 dollars. The exports

of tobacco leaf in 1911 amounted to 80 441,476 lbs. value 1,822,800 dollars. Cotton exported in 1911 was 319 374 lbs. valued at 45,800 dollars. Coffee shows marked improvements in quality and a decrease in the quantity shipped in 1911 (4,575,440 lbs., valued at 310,888 dollars).

**Commerce.**—The total imports into and exports from the Dominican Republic in 4 years were valued as follows in U S dollars —

	1908	1909	1910	1911
	Dollars	Dollars	Dollars	Dollars
Imports	5 205 27	4 563 003	6 462 233	7 120 877
Exports	9 713 136	8 625 017	10 945 045	11 032,368

The foreign trade in 1911 was as follows —

Countries	Imports	Exports
United States	4 228 708	6 654 246
Germany	1 263 977	129 678
France	284 868	1 040 114
United Kingdom	601,222	230 451
Other countries	14 02	942 566
	120 877	11 075 058

In 1911 the chief imports were cotton goods 1,601,803 dollars iron and steel manufactures 601,233 dollars, provisions 2,179,735 dollars manufactured vegetable fibres (bags sacks, &c) 210 085 dollars, chemical products (including soap, perfumes and drugs) 444 570 dollars machinery, 598 322 dollars, leather and manufactures 267,240 dollars agriculture implements, 334 600 dollars. The bulk of the sugar and cacao are shipped for order to the U S A and included in the trade with the United States. The greater part (more than 75% of the sugar) is re-shipped to Canada and Europe. In 1911 the United Kingdom actually received nearly 50% of the entire sugar export, and Canada nearly 25%.

**Shipping and Communications.**—In 1911 313 vessels of 969,226 tons entered the ports of the Republic, and 916 of 986,591 tons cleared in the foreign trade. The port is served by regular liners under the German, French, American, and Cuban flags, but by no British vessels. Of the value of total foreign trade U S A vessels carried 46%, German vessels 22% Norwegian (chartered for U S A) 22%, French 6%, British (exports only) 3%. In 1910 a jetty and sea wall was constructed at the entrance of Santo Domingo harbour. A concrete wharf 1,400 feet long with 20 feet depth will probably be completed at San Domingo by the beginning of 1913.

The interior is not well supplied with roads though good roads are in course of construction between the principal northern cities and in the south from the ports to the neighbouring agricultural districts.

There are two railway lines in the Republic. (1) Samaná Santiago line, belonging to an English company, runs from Sanchez on the Bay of Samaná to La Vega (73 miles), it has two branch lines (under the same management, but different ownership) from La Jina to San Francisco de Macoris (8½ miles), and from Las Carballas to Salcedo (8 miles). A Government line, the Central Dominican railway, runs from Puerto Plata to Santiago and Moca (60 miles). A railway route from Santo Domingo City to La Vega has been surveyed by Government engineers, and negotiations for its construction and management by some foreign company have been in progress for some time. Its length will be approximately 70 miles. A short line will also be con-

structed uniting the two existing lines. Total length of line (1911) 150 miles. There are, besides, 225 miles of private lines on the large estates.

Number of post offices (1911-12) 105. Number of telegraph offices, 16, and of telephone offices 45. Total pieces of mail handled, 5,530,506.

The telegraph, in the hands of a French Telegraphic Company, is in operation between Santo Domingo, Puerto Plata, and Santiago, from Santiago to Monte Cristi, and along the railway from Sanchez to La Vega, total length, 852 miles. Several other inland lines are in project. The foreign telegraphic system in operation is that of the French Submarine Telegraphic Company, total length of telephone lines 719 miles. Negotiations are proceeding with the Marconi Company to link Santo Domingo with the Marconi system. It is hoped to erect (in 1913) a powerful station at the Capital with various sub stations throughout the Republic.

**Money, Weights, and Measures** — On July 1st, 1897, the United States gold dollar was adopted as the standard of value. A small amount of debased silver coin circulates as small change at the ratio of 5 to 1.

In 1912 the National Bank of Santo Domingo was established with a capital of 2,500,000 dollars. The Royal Bank of Canada has opened branches at Santo Domingo City, San Pedro de Macoris, and Santiago.

Quintal = 4 arrobes = 100 lbs. (of 16 oz.) = 46 kilograms.

For liquids the arroba = 82 cuartillas = 25.498 litros = 4.110 gallons.

## SERVIA

(КРАЛЈЕВИНА СРБИЈА)

### Reigning Sovereign and Family

**Peter I**, born June 29 (O S), 1844 son of Alexander Kara Georgevitch married, July 30 (O S) 1883 to Princess Zorka daughter of Prince Nikola of Montenegro widower March 4 (O S), 1890 ascended the throne June 3 (O S), 1903 The children of the King are Princess Helene born October 23 (O S) 1884 Prince George born August 27 (O S) 1887 on March 27 (N S) 1909 Prince George renounced his right of succession to the throne to which Prince Alexander will succeed Prince Alexander now heir apparent, born December 4 (O S), 1888

The King has one brother, Prince Arsène born April 4, 1859 married, April 15, 1892 to Aurora Demidoff (divorced in 1896), offspring Prince Paul born April 15, 1893

The founder of the dynasty was Kara George (i.e. Black George) Petrovitch, who in 1804 was proclaimed Commander in Chief in Serbia, but was murdered in 1817 leaving two sons—Alexis born 1801 and Alexander born 1806 In 1842 Alexander was chosen reigning Prince by the Skupshchina, and the title was confirmed by the Porte but the dignity was not hereditary In 1858 Alexander had to abdicate and was banished, and in 1885 he died in exile King Peter is thus the third of his house who have ruled in Serbia He succeeded to the throne on the murder of King Alexander of the Obrenovitch dynasty, was elected King by the Skupshchina June 2 (O S), and assumed royal rights and duties June 12 (O S), 1903

The independence of Serbia from Turkey was established by article 34 of the Treaty of Berlin, signed July 13, 1878, and was solemnly proclaimed by Prince (afterwards King) Milan at his capital, August 22 1878 The King's civil list amounts to 1 200 000 dinars

### Constitution and Government

The Constitution voted by the Great National Assembly, January 2, 1889 (December 22, 1888, old style) continued in force till May, 1894, when it was repealed, and the constitution of July 1869, revived On the 6/19 April, 1901 a new Constitution was granted by King Alexander entailing the succession to the throne of Serbia upon his direct descendants of either sex On June 15 1903 after the murder of King Alexander the Constitution of 1901 was abolished, and that of 1889 was revived The executive power is vested in the King, assisted by a council of eight Ministers, who are, individually and collectively, responsible to the King and the National Assembly The legislative authority is exercised by the King in conjunction with the National Assembly or 'Narodna Skupshchina' The State Council consists of members appointed partly by the King and partly by the Assembly It decides complaints of injury to private rights resulting from Royal and Ministerial decrees questions of administrative competence and obligations matters relative to departmental and communal surtaxes and loans, and the transfer of their real property, the expropriation of private property for public purposes, the final settlement of debts due to the State, and which cannot be collected, the outpayment of extraordinary sums sanctioned by the Budget and exceptional admissions to the privilege of Serbian citizenship This body is always sitting The National Assembly is composed of 166 deputies elected by the people Every male Serbian (with the exception of officers and soldiers under the colours) 21 years of age paying 15 dinars in

direct taxes, is entitled to vote, Servians 30 years of age, paying 30 dinars in direct taxes, are eligible to the Assembly provided they reside permanently in Servia. Government employees, except ministers, state councillors, judges, professors (of middle schools and universities), and Communal Mayors are not eligible. The Assembly meets each year on October 14, and elections take place every fourth year on September 21. The deputies receive travelling expenses and a salary of 15 dinars (12s.) a day.

*Prime Minister* — M. Pašitch (September 1912)

Other ministries are for Foreign Affairs, Instruction and Worship, the Interior, War, Finance, Public Works, Commerce, Agriculture and Industry and Justice.

Counties, districts and municipalities have their own administrative assemblies. For administrative purposes Servia is divided into 17 provinces or counties, 1,407 communes which include 4,267 villages and 85 towns or cities (1905).

### Area and Population<sup>1</sup>

Departments	Area sq. m.	Population 1910		Total 1910	Total 1911	Pop per sq. m.

In 1910, 382,882 lived in towns, and 2,526,819 lived in the country, 2,890,602 were Servian subjects and 21,086 were foreigners of whom 6,518 were Hungarian, 6,060 Turkish and 6,605 Austrian subjects, 2,778,706 speak Servian, 32,556 Servian and Rumanian, 7,494 German, 2,151 Albanian, and 1,966 Hungarian, other languages in use being Greek, Bulgarian, Turkish, Bohemian &c. Of the Jews, 2,636 spoke Servian or other Slav languages, 462 German, 40 Hungarian and 1,544 Spanish, other languages 1,047 (5,729). Of the Gipsies 27,816 could speak Servian, 4,709 Rumanian, 181 Turkish, and 13,412 Gipsy. Of the whole population in 1910, 2,098,947 were dependent on agriculture, 6,440 on other primary production, 166,599 on the industries, 109,998 on commerce and 116,568 on public offices or liberal professions.

The principal towns (1911) are Belgrade (Beograd) (the capital) with 90,890 inhabitants, Nish, 24,949, Kragujevatz, 18,462, Leskovatz, 14,266, Pozarevatz, 13,411, Vranje, 11,439, Pirot, 10,737.

<sup>1</sup> See note Population and Area under Turkey.

## MOVEMENT OF POPULATION

Year	Marriages	Births	Deaths	Surplus
1900	27,978	115,378	55,851	47,195
1907	29,485	109,490	42,481	47,009
1908	25,809	101,903	56,924	38,979
1909	26,641	110,286	53,850	36,370
1910	22,093	112,325	54,450	47,785
1911	20,433	107,329	54,475	42,814

There are no trustworthy statistics of emigration and immigration

## Religion.

The State religion of Serbia is Greek-Orthodox. According to the census of 1910 there were of the total population —Greek Orthodox, 2,881,220, Roman Catholics, 8,435, Protestants, 799, Jews, 5,997, Mohammedan Turks and Gipsies, 14,435, other religions, 915

The Church is governed by the Synod of five Bishops, the Archbishop of Belgrade as Metropolitan of Serbia being president, but all the ecclesiastical officials are under the control of the Minister of Education and Public Worship. There is unrestricted liberty of conscience. In 1910 there were 771 churches and chapels, and 51 monasteries, the clergy numbered 1,043, and the monks, 77. The property of the churches was valued (1910) at 18,701,114 dinars, and of the monasteries at 8,435,089 dinars; the revenue of the churches was 728,216 dinars, and of the monasteries, 300,302 dinars, the expenditure of the churches, 611,082 dinars, and of the monasteries, 250,156 dinars.

## Instruction.

Elementary education in Serbia is compulsory, and, in all the primary schools under the Ministry of Education, it is free. Of the total population in 1900, 423,438 (18.99 per cent) could read and write. In 1909 there were 1,296 elementary schools with 2,584 teachers and 138,434 pupils (109,433 boys and 29,001 girls). There were, of a higher grade, 20 secondary schools with 393 teachers and 7,317 pupils, 1 theological school with 24 teachers and 3.5 students, 5 normal schools with 56 teachers and 454 students, 4 special schools with 34 teachers and 321 pupils, 3 superior schools for girls with 68 teachers and 1,001 pupils. Belgrade University, founded in 1838, had 78 professors and 1,023 (Winter). For 1912 the expenditure on the elementary schools was 4,228,032 dinars, on the secondary schools, 2,455,454, on the theological school, 267,049 dinars, on the University, 710,671 dinars.

The Government has a Military Academy. There are several private schools, elementary and other, and an orphanage supported by voluntary contributions.

For elementary schools the State pays the teachers' salaries, and the municipalities provide for all other expenditure. The cost of the other public schools is borne entirely by the State.

## Justice, Crime, and Pauperism.

The judges are appointed by the king. There are 27 courts of first instance in Serbia, a court of appeal, a court of cassation, and a tribunal of commerce.

In all the courts of first instance there were in 1904, 3,973 convictions. At the end of 1907 the 8 penal establishments contained 3,471 prisoners (3,344 males and 127 females).

There is no pauperism in Serbia in the sense in which it is understood in the West, the poorest have some sort of freehold property. There are a few poor people in Belgrade, but neither their poverty nor their number has necessitated an institution like a workhouse. There is a free town hospital.

### Finance

State receipts and expenditure (estimated for 1911) as follows —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1906	3,600,870	3,495,430	1909	4,305,232	4,153,254
1907	3,844,500	3,472,888	1910	4,688,245	4,474,461
1908	3,832,950	3,830,490	1911	4,805,458	4,805,262

For 1912 the estimates were in 1,000 dinars —

Sources of Revenue	1,000 dinars	Branches of Expenditure	1,000 dinars
Direct taxes	30,615	Civil list	1,449
Duties	14,500	Debt charge	32,394
Excise	9,007	National Assembly	668
Taxes	8,492	Prisoners and citations	4,807
Monopolies	31,655	Ministries	
Domains	2,729	Justice	3,043
Posts and Telegraphs	4,100	Foreign Affairs	3,929
Railways (State)	18,000	Finance	4,586
Various	2,708	War	30,116
Extraordinary revenue	3,941	Instruction workshop	9,630
		Interior	6,802
		Public Works	18,125
		Commerce and Agriculture	6,489
		Miscellaneous	1,406
Grand Total	137,900 (£5,118,000)	Total	117,700 (£4,708,340)

On January 1, 1913, the public debt of Serbia amounted to 26,362,240*l.*, debt charge in 1912, 1,295,782*l.*

### Defence

In Serbia military service is compulsory and universal. Liability is from 18 to 50 years of age, but recruits join at 21, and complete their military service at 45. The National Army has three 'bans'. The first is the active army and its reserve, constituting the first line. The second 'ban' is supposed to provide reserve troops. The third is the territorial army. There is also the *levée en masse*, which contains all those who have passed through the National Army, and all other males between 18 and 50.

Continuous service for the infantry is for 1½ year only, for artillery and cavalry 3 years. Service in the reserve is for 2½ or 3 years (to complete 10 years in the first 'Ban'). After this the Serbian soldier passes successively to the Second 'Ban,' in which he remains 6 years, and to the Third 'Ban' for 3 years.

The Kingdom of Serbia is divided into 5 divisional areas, each supplying a division of 3 infantry brigades of 2 regiments of 4 battalions, a field artillery regiment of 3 batteries of 4 guns, and a regiment of divisional cavalry. The

latter resemble our yeomanry, and are not embodied in time of peace. In war, the field army, consisting of 5 divisions, a cavalry division of 4 regiments and 2 horse batteries, one regiment of mountain artillery, and one of howitzers, would amount to about 110,000 combatants. If the reserve troops of the Second Ban are fit to take the field, they would raise the total strength to about 175,000. The reservists of the First and Second Bans not required to form first line and reserve troops, and therefore available to make good losses in the field, would amount to some 95,000 men.

The units of the Second Ban exist in peace as cadres only. In war it will provide 15 regiments, each of 3 battalions, 5 regiments of divisional cavalry, and some engineers. The Third Ban has at present no organization, but it is hoped that if necessary, 15 regiments, and a few squadrons, may be formed for home defence.

The Servian infantry is armed with the Mauser rifle, model 98, calibre 7 mm. The field gun is a quick firer on the Schneider Canet system.

The peace strength of the Servian army, according to the Budget of 1911, amounts to 381,747 all ranks.

The military budget for 1912 amounted to 30,116,312 dinars (about 1,204,652*l.*), of which 1,541,960 dinars (about 61,678*l.*) is for the Gendarmerie and Frontier Guards.

At Nish a series of forts is being built, some are ready to receive their armament. At Zajechar, near the Bulgarian frontier, are 5 forts, and Pirot is also provided with works.

### Production and Industry

Servia is an agricultural country, where almost every peasant cultivates his own freehold. The holdings vary in size from 10 to 80 acres mostly of the total area (11,630,740 acres), 4,607,520 acres were cultivated in 1904, and 3,818,620 acres were under woods and forests. The area and produce of the principal crops for 5 years was as follows —

Crops	Area in acres			Produce in cwts.		
	1900	1910	1911	1900	1910	1911
Wheat	938,799	932,235	964,671	6,686,679	6,846,761	8,200,442
Barley	281,860	285,918	264,598	2,706,231	1,776,250	1,974,050
Oats	267,778	267,049	258,708	1,659,492	1,237,979	1,442,585
Rye	121,533	124,765	122,318	876,859	689,798	865,199
Malts	1,446,306	1,439,578	1,442,538	17,223,015	14,546,359	18,261,896
Beetroot sugar	7,077	7,420	11,263	1,471,600	1,549,180	1,804,646

Plum marmalade and also fresh plums are exported in large quantities, spirits are distilled in large quantities from plums, and various fruits are grown. Silk culture employs a large number of persons (\$1,523 in 1910) and the export of cocoons was (in 1910) valued at 85,224*l.*

There is a school of agriculture at Kraljevo and one of wine-culture at Negotin.

On December 31, 1910, there were in Servia 152,617 horses; 957,918 head of cattle; 3,606,615 sheep, 863,544 pigs, and 627,427 goats.

The State forests have an area, 1910, of 1,875,000 acres, parish forests, 1,625,000, church and monastery, 42,500, private, 750,000. The forests consist largely of beech, oak and fir, but are less profitable than, with proper management, they might be. Oak staves are exported to Austria and France in great quantities.

Servia has considerable mineral resources, including coal and lignite, worked by Government, by Belgian companies, and by private enterprise. In 1911 the output of the various sorts was valued at 15,415,945 dinars. The production of copper ore amounted to 7,023 metric tons, value 8,165,781 dinars, and of coal to 235,058 metric tons, value 8,775,776 dinars. In addition to this 422 kilogrammes of gold were mined, estimated value 1,433,608 dinars, and 1,693 waggon loads of cement produced, value 759,841 dinars.

Of Servian industries, flour milling is one of the most important, in 1911 there were 17 large flour mills in the country, brewing and distilling are extensively carried on, sugar works and a celluloid factory are in German hands, weaving, tanning bootmaking pottery, and iron working are also carried on. Carpet weaving is one of the oldest industries in Servia. The product is manufactured principally at Pirot, in south eastern Servia, and the carpets are named after that place. The chief characteristics of these carpets are that they are made of pure wool, dyed with natural colours by local dyers, who pride themselves that the process of dyeing and colour mixing is a secret transmitted by father to son and is known only to the inhabitants of Pirot. Meat packing is also becoming important. The total value of the products of all Servian industries in 1911 was 4,872,620.

### Commerce

The following table shows the value (25 dinars = £1) of the imports and exports of Servia for five years —

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1906	1 772,160	2 864,160	1909	2,941 000	3,719 000
1907	2,323 900	3 269 650	1910	3,337 896	3,935,921
1908	3,045 400	3 019 980	1911	4 455,421	4,515,971

The following table shows the chief imports and exports in two years —

Imports	1910	1911	Exports	1910	1911
	£	£		£	£
Cotton tissues	252 765	330,094	Prunes	430 452	636,668
Cotton yarn	252,163	243 484	Molts	576,214	557,940
Hides	221 215	241,038	Wheat	499 251	612,304
Woollen tissues	164 668	73 779	Poultry	3,231	143,968
Paper	114,458	98,968	Barley	161 935	115,142
Common salt	77,354	177,668	Meat	104 498	637,103
Milk	64,578	61,025	Raw hides	141 654	127,382
Machinery	107,811	128,331	Animals	327 843	265 782
Iron bars	104,839	108,960	Cordage	34,836	22,313
Wines	14,741	31,330	Fruits, fresh	102,09	179,662

The following table shows the value of the trade with different countries for two years —

Countries	Imports from		Exports to	
	1910	1911	1910	1911
	£	£	£	£
Austria Hungary	645,990	1,831,492	712,675	1,874,947
Belgium	25,894	80,314	645,489	237,069
France	144,144	221,784	47,644	144,370
Germany	1,398,835	1,309,893	875,504	1,716,811
Italy	145,795	187,627	42,786	100,419
Bulgaria	19,812	26,919	165,282	166,140
Romania	47,310	59,421	272,820	237,627
Turkey	237,382	147,206	938,837	462,380
United Kingdom	456,997	867,437	68,893	2,140

The treaty of June, 1898, provides for "the most favoured nation" treatment in commerce and navigation between the United Kingdom and Servia. A new treaty, signed February 17, 1907 (for 10 years) provides for tariff reductions and for "most favoured nation" treatment as regards commercial travellers, the acquisition and possession of property, and other matters.

Total trade between Servia and the United Kingdom for 5 years —

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports from Servia into United Kingdom	22,086	4,420	4,594	154,113	89,309
Exports to Servia from United Kingdom	159,584	242,362	204,818	341,074	318,694

### Communications

Servia has two principal railway lines, Belgrade Nish Vranje, and Nish Caribrod, also several secondary branches, Smederevo-Vehka Plans, Lapovo-Kraguyevatz, total (June 1912) 606 miles.

Of highways there are 3,495 miles, many of them in a ruinous condition. Of rivers only those bordering on Servia are navigable, viz Danube, 198 miles, Save, 90 miles, and Drina 106 miles. The navigation on the Danube and Save is in the hands of the Servian Steamboat Company, and several foreign companies, Austrian, Hungarian, Rumanian, and Russian.

There were 2,184 miles of telegraph line and 6,421 miles of wire, with 217 State telegraph offices, at the end of 1911. In 1911, 1,078,303 messages were transmitted.

In 1911 there were 26 urban telephone systems with 412 miles of line and 4,460 miles of wire, and 38 inter urban systems with 987 miles of line and 2,000 miles of wire. Total number of conversations in 1911 urban, 4,406,171; inter-urban, 195,489.

There were 1,539 post-offices in 1911. In 1911 the letters transmitted were: internal, 54,223,000, international, 10,634,600. The post and telegraph receipts for 1911 amounted to 2,566,334 dinars (francs), and expenditure to 2,177,037 dinars.

### Money and Credit.

The principal bank is the National Bank of Servia in Belgrade, with the nominal capital of 20,000,000 dinars, of which 7,500,000 has been paid up. Its note circulation, December 31, 1910, amounted to 35,823,120 dinars, and cash on hand to 24,516,424 dinars in gold and 6,331,879 dinars in silver. The Export Bank, with agencies abroad, assists in the exportation of Servian

produce. The Uprava Fondova or Mortgage Bank, the only large State institution of the kind in Serbia, makes advances to a large amount for agricultural operations.

### Money, Weights, and Measures

Serbia accepted, by the law of June 20, 1875, the French decimal system for its moneys, weights, and measures. The Serbian dinar is equal to one franc. In circulation are gold coins of 10 and 20 dinars (milles d'or), silver coins of 5, 2, 1, and 0.5 dinar, bronze of 2, and nickel of 20, 10, and 5 paras.

The decimal weights and measures (kilogram, metre, &c.) have been in practical use since the commencement of 1883.

### Diplomatic and Consular Representatives

#### 1. OF SERBIA IN GREAT BRITAIN

*Chargé d'Affaires*—Slavko Y. Gromitch.

*First Secretary*—Alex V. Georkevitch.

*Consul-General for London*—Alexander Tucker.

There are Consular representatives in Glasgow, Manchester, Liverpool, Bristol, and Sheffield.

#### 2. OF GREAT BRITAIN IN SERBIA

*Envoy Extraordinary and Minister Plenipotentiary*—Sir Ralph Paget, K C M G, C V O, appointed 1910.

*Secretary*—D. Crackanthorpe.

*Vice-Consul*—C. L. Blakeney.

## SIAM.

(SAYAM, OR MUANG-THAI)

## Reigning King.

**Chowfa Maha Vajiravudh**, born January 1, 1880, eldest son of the late King Chulalongkorn I, succeeded to the throne on the death of his father, October 23, 1910, and was crowned on December 2, 1911. The royal dignity is nominally hereditary, but does not descend always from the father to the eldest son, each sovereign being invested with the privilege of nominating his own successor. On November 24, 1910, it was officially announced that until the new King has male issue, the succession will pass presumptively through the line of the Queen Mother's sons. Therefore Prince Chowfa Chakrapongee Poowanarth, born March 3, 1881, is the Heir Presumptive.

*Brothers of the King*

- I Prince Chowfa Chakrapongee Poowanarth, March 3, 1881
- II Prince Chowfa Asadang Dajarvoot, May 1889, and others

## Government.

The executive power is exercised by the King advised by a Cabinet consisting of the heads of the various departments of the Government: Foreign Affairs, Interior, Justice, Finance, Public Instruction, Public Works, War, Marine, Local Government, &c. Many of the portfolios are held by the King's half brothers and uncles. The law of May 8, 1874, constituting a Council of State, has now been superseded by the Royal Decree of January 10, 1895, creating a Legislative Council. The latter is composed of the Ministers of State (Senabodi) and others, not less than 12 in number, appointed by the Crown. The total membership is now 40. In the preamble of the Royal Decree it is stated that the object of this body is to revise, amend, and complete the legislation of the kingdom. It is to meet at least once a week, and it may appoint committees of 3 or 4 members, with the addition of competent outsiders who must not outnumber the members. An important article gives the Legislative Council power to promulgate laws without the Royal assent in the event of any temporary disability of the Crown. At other times the Royal signature is indispensable. This Council has shown considerable legislative activity.

The Siamese Malay States are administered by the Rajahs under the control of Commissioners sent from Bangkok.

The trans-Mekong portion of the State of Luang Prabang is now under French protection. The remainder is still Siamese.

The Siamese dominions are divided into 18 provincial circles (Monthon), of which 17 have each a High Commissioner, deriving authority direct from the King, and having under him subordinate governors over the various parts of his district. Until 1895 the administration of the country was divided between the Ministers of the North, South, and Foreign Affairs. With the exception of the Metropolitan Monthon of Bangkok, it was then brought under the single authority of Prince Damrong, as Minister of the Interior, under whose administration great improvements have been already made. Official buildings, such as court-houses and jails, are being erected all over the country, and the system of provincial gendarmerie is being extended. There is, however, an insufficient supply of suitable officials to carry out reforms. Several of the tributary districts are administered by their own chiefs, but of late years centralisation has greatly increased. Commissioners, chosen by the King, are now regularly sent from Bangkok to all of these tributary provinces, both to those in the north, as Chiangmai,

and those in the south, as Singora, and others, with very full powers. The *Monthon of Bangkok* is under the control of the Minister of Local Government.

### Area and Population

The limits of the Kingdom of Siam have varied much at different periods of its history most of the border lands being occupied by tribes more or less independent. The boundary between Burma and N W Siam was delimited in 1891. By the Anglo-French Convention of April, 1904, the agreement of 1896 was confirmed, and its provisions more clearly defined, the territories to the west of the Menam and the Gulf of Siam being recognised as in the British sphere, and those to the east in the French. Various changes have recently been made in the Franco-Siamese frontier line. In 1904, the Luang Prabang territory to the west of the Mekong was acknowledged by Siam to belong to France, and the provinces of Malaprey and Barsak (west of the Mekong) were also transferred to French rule, so that an area of about 7,800 square miles passed from Siamese possession. On March 23, 1907, a new boundary in this region was accepted by Siam whereby the provinces of Battambang, Siam Reap, and Sisophon are ceded to France while the strip of coast to the south with the port of Krat returns to Siam. At the same time a rectification of the boundary was made in the Luang Prabang region, whereby a tract of the Laos country was restored to Siam. It was agreed also that four ports on the Mekong are to be held by France on perpetual lease. By these arrangements the territory of Cambodia is increased by about 7,000 square miles. The treaty also provides for the future jurisdiction of the Siamese courts over all French Asiatic subjects and protégés in Siam, under certain conditions.

A treaty for a modification of British extra territorial rights in Siam and for the cession of the Siamese tributary States of Kelantan, Trengganu and Kota to Great Britain was signed at Bangkok on March 10, 1909. The three states have an area of about 15,000 square miles, and a population estimated at over 800,000, of whom about 300,000 are in Kelantan.

The area of Siam is now about 195,000 square miles, about 45,000 being in the Malay Peninsula. The numbers of the population have hitherto been even more imperfectly known than the extent of territory, and the difficulty of any correct result is the greater on account of the Oriental custom of numbering only the men. The work of taking the first detailed census in Siam was, however, completed in 1904. Unfortunately, this census included only 12 of the provincial circles, or Monthons. In November, 1910, full statistics were issued for the whole kingdom. According to these figures the total population of the country is given as 8,117,953. The number of Siamese in the Bangkok Monthon is 639,920, and in the remaining Monthons, with the exception of Payap and Isaru (now Abou and Rouet) where no details are given, there are 3,779,536 of the Siamese or Thai race. The population of Monthon Phuket is put at 222,802. The town of Bangkok includes 428,675 inhabitants. The population of Phuket is put at 179,400. Siam is called by its inhabitants Thai, or Muang Thai, which means 'free,' or 'the kingdom of the free.' The word Siam is probably identical with Shan, applied in Burma to the Lao race, as well as to the Shan proper and the Siamese.

In recent years the results of Western civilisation have to a considerable extent been introduced. Much excellent work has been done by a General Adviser of American nationality, and with the assistance of a British Judicial Adviser, a French Legislative Adviser and Legal Advisers of various nationalities important progress has been made in the administration of

justice in the native courts and in the International Court which tries suits of foreigners against Siamese. The Penal Code has been completed, and came into force on September 21, 1908, work on other codes is being proceeded with. The Consular Courts exercise jurisdiction over their nationals, subject, in the case of Great Britain and France, to the Treaty modifications. A great improvement has taken place in the metropolitan police force under the superintendence of several English police officers lent by the Government of India. The police administration of the Provinces is entrusted to the Provincial Gendarmerie, a force which includes a Danish inspector general and a body of Danish instructors.

### Religion and Instruction

The prevailing religion is Buddhism, and throughout the country education is chiefly in the hands of the priests of whose services the Government intend to make more effective use. In the whole country there are some 13,000 temples, containing over 98,000 priests, with a total of over 157,000 pupils. The Siamese language is now firmly established as the official language over the whole country. The Minister of Public Instruction and Ecclesiastical Affairs has also under his charge several Government hospitals, which have been established by the King, besides a public museum, and all the royal monasteries in the capital.

The capital possesses the following Government schools: 138 lower and middle primary schools, with 10,088 pupils, 4 upper primary schools with 420 pupils, 2 secondary schools, with 184 pupils, 6 English schools, with 549 pupils, 1 medical college, with 108 pupils, 1 training college for teachers, with 68 pupils, 1 Civil Service college, with 70 pupils, and 1 midwifery school, with 32 pupils. Schools not under the Education Department are military, naval, and survey residential colleges, and Law, Gendarmerie, and Police non residential schools. Sericulture and railway schools have been formed, and the establishment of a University at Bangkok (with 8 faculties—medicine, law, engineering, agriculture, commerce, pedagogy, and political science) is in progress.

### Finance

Revenues and Expenditure for the years 1909-10, 1910-11, 1911-12 --

	1910-11.	1911-12 (Estimate)	1912-13 (Estimate)
	£	£	£
Revenue	4,025,851	4,783,361	4,738,462
Expenditure against Revenue	4,825,911	4,766,905	4,787,680
Extraordinary Expenditure against Capital Account	710,823	802,352	1,321,580

\* Including Expenditure from Loans.

The principal sources of revenue for 1911-12 were: customs duties, 461,555; other taxes, 1,763,671; state lands and forests, 284,171; railways, 230,412; post, telegraphs, and telephones, 66,300; other sources (including revenue from lottery and gambling, farms &c., 607,354).

In March, 1905, a loan of 1,000,000*l.* was contracted, and in February 1907, a loan of 2,000,000*l.* The proceeds are being devoted mainly to railway construction. In 1909 a further loan of 4,000,000*l.*, bearing interest at 4 per cent. was negotiated, the money to be gradually advanced to the Siamese Government by the Government of the Federated Malay States. It

is stipulated that the sums thus received shall be devoted to the construction and operation of railways in the Siamese dominions of the Malay Peninsula.

A British officer occupies the position of Financial Adviser, and there are numerous other British officers holding high positions under the Government, more especially in the Finance and Audit, Revenue, Forests, Survey, Police, Justice Customs, Mining, Mint, and Education departments. There are also several Europeans of other nationalities in various Departments. The financial position of the kingdom is extremely favourable, the revenue is steadily increasing, and the expenditure is less than the revenue, and well under control. Some revenue is derived from gambling, for the abolition of which measures are being taken throughout the country. There remain now to be abolished only the gambling houses in the Capital. The suppression of these awaits the consent of the Treaty Powers to a revision of the existing Customs Tariff, whereby it is hoped to make up the loss in revenue occasioned by the extinction of the gambling farm.

### Defence

Universal liability to military service on the European model is now in force in all the provinces including Bangkok. The legal exemptions are, however, rather numerous, and personal service is not enforced in the case of the uncivilised tribes. Chinese settlers pay a tax in lieu. The period of continuous service in the ranks is 2 or 3 years. The army is organised in 10 mixed brigades, each comprising 2 battalions of infantry, a regiment of cavalry of 2 squadrons, a battalion of artillery, a company of engineers, &c. The total peace strength is about 25,000 of all non-commissioned ranks, with 1,200 officers. The troops are armed with modern weapons. Considerable reliance is now placed upon the newly constituted force of marine infantry mentioned below.

The navy consists nominally of 21 vessels, all of small size and no fighting value. The largest is the royal yacht *Maha Chakrtra*, of 3,000 tons. The rest are very small gun boats. There are 5,000 men available for service afloat, besides a reserve of 20,000. A destroyer and three torpedo boats, obtained from Japan, were added to the Siamese navy in August, 1908, and a second destroyer also built in Japan, was added in June, 1912.

The marine infantry, recruited from the inhabitants of the maritime provinces, between 18 and 40 years of age numbers 15,000 in six shifts, besides a 1st and 2nd reserve of 3,000 and 2,000 respectively.

At the mouth of the Menam River are the Paknam forts. The bar prevents ships of more than 13 feet draught from ascending to Bangkok. The naval arsenal dock has recently been reconstructed.

### Production and Industry

The economic development of the country has been retarded by the institutions of forced labour and slavery, but these hindrances are now being removed by the substitution of a poll tax for the *corvée* and by the gradual abolition of slavery, hastened by royal decree of 1900 which liberated all slaves born after December 16, 1897, and reduced the redemption fee of all others. The cost of labour is probably higher than in any other Oriental country. Chinese coolies do the chief part of both skilled and unskilled labour in the south, especially in the mills and in mining, while in the north forest work is confined almost entirely to Burmese, Karens, and Khams. To the north of Bangkok, large tracts of land, formerly lying waste, have been opened up by an Irrigation Company, which has connected by a canal the Menam and Bangpakong rivers, and has constructed numbers of smaller canals. The chief produce of the country is rice, which forms the

national food and the staple article of export. For the Siamese Year, 130 (April 1, 1911, to March 31, 1912), the rice export amounted to 627,467 tons valued at 4,989,458. In Siam there are 67 large rice mills, of which 2 are British, 2 German, and 63 Chinese, 6 of these Chinese firms being nominally British, i.e. from Hong Kong or the Straits Settlements. Other produce is pepper, salt, dried fish, cattle, and sesame, while, for local consumption only, hemp, tobacco, cotton and coffee are grown. Fruits are abundant, including the durian, mangosteen and mango. Much of Upper Siam is dense forest, and the cutting of teak is an important industry, almost entirely in British hands. In 1910-11 (Siamese year 129) 89,154 tons were exported, in 1911-12, the exports amounted to 75,080 tons, valued at 483,180. The forests are under the control of an English conservator, aided by several English officers. The export of rubber is now negligible, but planting of rubber trees is proceeding in the Malay Peninsula. Gold is found in many of the provinces, and concessions have been granted to mining companies. The small mineral resources of Siam are extensive and varied including tin, coal and iron, zinc, manganese, antimony, probably quicksilver. Tin mining on a considerable scale is pursued on the island of Tongkah (or Junk Ceylon) and the ore is found in other parts of the Siamese portion of the Malay Peninsula where also wolfram is now being extracted in considerable quantity. From Phuket (the port of Junk Ceylon) in 1911-12, 2,022 tons of tin and 4,369 tons of ore were exported.

### Commerce

Nearly the whole of the trade is in the hands of foreigners, and in recent years many Chinese have settled in the country. The foreign trade of Siam centres in Bangkok, the capital.

For the year 1911-12 the value of the articles imported and exported were

Imports	—	Exports	—
	£		£
Cotton goods	1,040,958	Rice	4,489,458
Provisions	504,816	Teak	468,182
Treasure	573,699	Marine products	168,750
Iron, steel and machinery	226,388	Hides	114,780
Silk goods	287,944	Silk piece goods	77,765
Opium	237,662	Pepper	69,808
Sugar	209,458	Treasure	65,120
Jewellery	180,706	Bullocks	43,810
Petroleum	184,435	Wood other than Teak	28,676
Cotton yarn	115,079	Raw silk	28,569
Beer, wine and spirits	109,218	1 inapples	21,498
Oils, other than petroleum	95,301	Horns	18,080
Gunny bags	91,044	Swine	14,725
Tobacco	90,765	Other articles	108,770
Chemical products	88,667		
Hardware and cutlery	88,963	Total	6,206,810
Carriages, cars, cycles and parts thereof	83,120	Articles re-exported	
Coal and coke	17,240	Jewellery	147,447
Other articles	1,456,692	Other articles	61,721
Total	5,542,648	Total	6,415,941

The imports in 1911-12 (in order of value) were chiefly from the United Kingdom (24.5 per cent.), Singapore (15.5 per cent.), China (14 per cent.), Hong Kong (12 per cent.). The exports (in order of value) were chiefly to Singapore, Hong Kong, Germany, United Kingdom, India, and Holland.

Into Northern Siam from Burma in 1912 the imports (chiefly treasure, cottons, silk, apparel, hardware, and jewellery) amounted to 193,593/ in value, and the exports from Northern Siam to Burma (chiefly treasure, teak, cattle, elephants, and silks) to 227,332/. There is a considerable trade on the northern frontiers with the British Shan states and Yunnan, carried on by hawkers.

Total trade between Siam and United Kingdom for 5 years —

—	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports from Siam into U. Kingdom	631,433	677,831	581,930	599,930	431,638
Exports to Siam from U. Kingdom	551,291	877,20	1,41,055	1,067,841	1,088,238

### Shipping and Communications

In 1911, 758 vessels of 647,390 tons (69 of 65,107 tons British) entered and 767 vessels of 682,884 tons (70 of 68,157 tons British) cleared from the port of Bangkok. About half the tonnage visiting Bangkok is German (266 vessels of 271,915 tons in 1911), Norwegian vessels have the second place (257 of 207,873 tons in 1911), and British the third. In 1909, a Siamese Company instituted a regular service between Bangkok, Hong Kong and the Southern China Ports, in competition with the North German Lloyd Orient Line. The Company at present charts 2 vessels, 7 Norwegian and 2 German.

The railway from Bangkok to Paknam (14 miles) was opened in April 1893, a railway from Bangkok to Korat (165 miles) was opened for regular traffic on November 1, 1900. A further line to Lopburi was opened in January, 1901, and has been extended northwards beyond Paknampho and Utaradit to Me Puak, which is the terminus for the present. A branch line from Sawankalok to Ban Dara on the main Northern railway was opened in August, 1909. The total length of the Northern line amounts to some 327 miles. A line from Bangkok to Petriou on the East (39 miles) was opened early in 1908, whilst a line to Petchaburi, 95 miles from Bangkok, was inaugurated in June, 1903. This latter railway is being continued southwards, and is now open as far as Hua Hin, about 36 miles south of Petchaburi, and thus forms the initial portion of the projected trunk line down the Malay Peninsula, which will in course of time connect Bangkok with Singapore. A railway across the peninsula, starting from Trang on the west coast, and joining the Bangkok-Singapore line at Singapore, is under construction (38 miles completed). A line to Tachin, 20 miles from Bangkok, was opened by a private company in January, 1905, and has been extended to Meklong, about 20 miles farther. The total length of railway open, State and private, is about 680 miles. All the lines except the Korat and Northern lines have a gauge of a metre.

Telegraph lines have been completed to the total length of 2,900 miles, and Bangkok is now in communication with Korat, Nong Khai, Sisophon, Chantabun, Bangtaphan, and Chiangmai, with Moulmein, and Tavoy in

Lower Burma, and with Saigon in Anam, the overland telegraph line to Penang has now been completed.

Estimates for three wireless stations and installations on three vessels of the fleet have been placed in the budget for Siam for the fiscal year 1912-1913. An experimental station of the Telefunken system was erected on the island of Kohsichang some years ago, and this system will be used for the new installations. The sites for the land stations will be at Pratoomawan, at Kohsichang, and on the top of the hill at Singora.

There is a postal service in Bangkok and in 1885 Siam joined the International Postal Union. The mail service down the Malay Peninsula, and also towards the north of Siam, has been largely developed. In 1890 a parcel post service was established having connection with Singapore and the international system.

### Money, Weights, and Measures

In Bangkok there are branches of the Hong Kong and Shanghai Bank, the Chartered Bank of India, and the Banque de l'Indo-Chine, all of these issue notes, bank note issue is in nowise regulated by the Siamese Government. A native bank, with a German manager for its Foreign Department, has recently been established under Royal Charter and with the name of the Commercial Bank of Siam, Limited. The Government in 1903 began to issue currency notes which have driven the bank notes out of circulation. At the end of July, 1912, there was 1,903,343/ worth of currency notes in circulation against which the Treasury held 1,289,392/ in bullion, Indian stock, 108,609/., British consols 1,244,041/., German Imperial bonds, 57,295/., Siam stock, 193,164/., Japanese bonds 93,314/., and Egyptian United stock, 97,162/.

The unit of the monetary system is the silver tical weighing 15 grams 900 fine. Its value (formerly varying with the price of silver) has, by the Gold Standard Act of 1908, been fixed at 1s. 6½d. or 13 ticals = 17, the gold value of the tical being equal to that of 55.8 centigrams of pure gold. There will be a 10 tical gold piece or *Dos* weighing 6.2 grams 900 fine and thus containing 5.58 grams of pure gold. In addition to the tical, the following coins are now actually in use—the *Salung*, = ½ tical, the 10 *Salung* piece, = ½ of a tical, the 5 *Salung* piece, = ¼ of a tical, and the *Salung*, = ⅓ of a tical. The *Salung* is of silver 800 fine. The 10-*Salung* and 5-*Salung* pieces are of nickel, whilst the *Salung* is of bronze.

The measures of weight are—1 *Tical* = 15 grams or approximately 53 grs., 4 *Ticals* = 1 *Tamlung*, (60 grams or 2.1 oz.), 20 *Tamlungs* = 1 *Chang* (1.2 kilograms or 2 lbs. 10.3 oz.), and 50 *Chang* = 1 *Hap* (60 kilograms or slightly over 132½ lbs.)

The measures of length are, 1 *Arm* = 83 inches, 12 *Arm* = 1 *Keng* (10 inches), 3 *Kengs*, = 1 *Sok*, (20 inches), 4 *Sok*, = 1 *Wa* (80 inches) 20 *Wa* = 1 *Sen* (133 feet); 400 *Sen* = 1 *Yot* (10 miles, roughly)

### Diplomatic and Consular Representatives

#### 1 OF SIAM IN GREAT BRITAIN

*Envoy and Minister*—Phya Sudham Maitri.  
*Councillor of Legation*—W. J. Archer, O.M.G.  
*First Secretary*—Luang Sanpakitch.  
*Secretary Interpreter*—Lewis C. Beteman.  
*Attache*.—Nai Tiem.

2 OF GREAT BRITAIN IN SIAM

*Envoy Extraordinary and Minister Plenipotentiary and Consul General —*  
A. R. Peel

BANGKOK — *First Secretary of Legation and Consul —* W. R. D. Beckett,  
C. M. G.

There are consular representatives at Chiangmai, Senggora, and Nakawn  
Lampang and Phuket

## SPAIN

(ESPAÑA)

## Reigning Sovereign

**Alphonso XIII.**, son of the late King Alphonso XII and Maria Christina, daughter of the late Karl Ferdinand, Archduke of Austria, born after his father's death May 17, 1886 succeeding by his birth, being a male, his eldest sister, married May 31, 1906, to Princess Victoria Eugénie daughter of the late Prince Henry of Battenburg and Princess Beatrice (daughter of the late Queen Victoria) of Great Britain and Ireland offspring Prince *Alphonso*, born May 10, 1907, Prince *Jaime*, born June 23, 1908, Princess *Beatrice*, born June 22, 1909, Princess *Maria Cristina*, born December 12, 1911

*Sisters of the King* — I *Maria-de las-Mercedes* Queen till the birth of her brother, born September 11, 1880 married February 14, 1901 to Prince Carlos of Bourbon, son of the Count of Caserta, died October 17, 1904 offspring, Alfonso born November 30, 1901, Isabel born October 16, 1904 II *Maria Teresa*, born November 12, 1882, married January 12, 1906 to Prince Ferdinand of Bavaria, died September 23, 1912, offspring Luis Alfonso, born December 12, 1906 José Eugenio, born March 26th, 1909, Pilar born September 5, 1912.

*Aunts of the King* — I Infanta *Isabel*, born December 20, 1851, married, May 13, 1868, to Gaetan Count de Gergenti, widow, November 26, 1871 II Infanta *Maria-de-la Paz*, born June 23, 1862, married, April 3, 1883, to Prince Ludwig, eldest son of the late Prince Adalbert of Bavaria, offspring, Fernando Maria, born May 10, 1884, married January 12, 1906, the Infanta Maria Teresa (*see above*); Alberto Alfonso, born June 3, 1886 Maria del Pilar, born March 13, 1891 III Infanta *Eulalia*, born February 12, 1864, married to Prince Antoine, son of Prince Antoine d'Orléans, Duc de Montpensier, March 6, 1886, the marriage was dissolved July 1900, offspring, Alfonso Marie, born November 12, 1886, married July 16, 1909 Princess Beatrice of Saxe-Coburg Gotha, Luis Fernando Maria born November 5, 1888 (All sisters of the late King)

*Cousins of the late King* — Infante Don *Jaime*, son of the late Don Carlos and Margaret of Parma, Princess of Bourbon, born June 27, 1870 He has four sisters.

The King, Alfonso XIII has a civil list, fixed by the Cortes, 1886, of 7,000,000 pesetas, or 280,000*l.*, exclusive of allowances to members of the royal family. The annual grant to the Queen is fixed at 450,000 pesetas (15,000*l.*), and, should the King predecease her, 250,000 pesetas (10,000*l.*) during widowhood. The annual grant to the mother of the King was fixed at 250,000 pesetas. To the Prince of Asturias, heir to the throne, 500,000 pesetas have been assigned, and 250,000 to the second sister of the King. The Infantas, his aunts, receive 550,000 pesetas.

The following is a list of the sovereigns and rulers of Spain, with dates of their accession, since the foundation of the Spanish Monarchy by the union of the crowns of Aragon and Castile —

<i>House of Aragon</i>		<i>House of Bonaparte</i>	
Fernando V, 'The Catholic	1479	Joseph Bonaparte	1809
<i>House of Habsburg</i>		<i>House of Bourbon</i>	
Carlos I	1516	Fernando VII, restored	1814
Felipe II	1566	Isabel II	1833
Felipe III	1598	Provisional Government	1868
Felipe IV	1621	Marshal Serrano, Regent	1869
Carlos II	1685	<i>House of Savoy</i>	
<i>House of Bourbon</i>		Amadeo	1870
Felipe V	1700	<i>Republic 1873-75</i>	
Fernando VI	1746	<i>House of Bourbon</i>	
Carlos III	1759	Alfonso XII	1875
Carlos IV	1788	María ( <i>pro tem</i> )	1886
Fernando VII	1808	Alfonso XIII	1886

## Government and Constitution

### 1 CENTRAL GOVERNMENT

The present Constitution of Spain, drawn up by the Government and laid before a Cortes Constituyente, elected for its ratification March 27, 1876, was proclaimed June 30, 1876. It enacts that Spain shall be a constitutional monarchy, the executive resting in the King and the power to make laws in the Cortes with the King. The Cortes are composed of a Senate and Congress equal in authority. There are three classes of senators—first senators by their own right or *Senadores de derecho propio*; secondly 100 life senators nominated by the Crown—three in two categories not to exceed 180, and thirdly, 180 senators, elected by the Corporations of State—that is, the communal and provincial states, the church, the universities, academies, &c.—and by the largest payers of contributions. Senators in their own right are the sons, if any, of the King and of the immediate heir to the throne, who have attained their majority, Graceros who are so in their own right and who can prove an annual *renta* of 60 000 pesetas, or 2,400 £, captains generals of the army, admirals of the navy, the patriarch of the Indies and the archbishops, the presidents of the Council of State of the Supreme Tribunal, of the Tribunal of Cuentas del Reino, and of the Supreme Council of War and of the Navy after two years of office. The elective senators must be renewed by one half every five years, and by totality every time the Monarch dissolves that part of the Cortes. The Congress is formed by deputies named in the electoral Juntas in the form the law determines, in the proportion of one to every 50 000 souls of the population. According to a law of August 8, 1907, voting is compulsory for all males over the age of 25 with a few unimportant exceptions. This law further enacts that all such voters must be registered on the voting list, possess full civil rights, and must have been members of a Municipality for at least 2 years. Members of Congress must be 25 years of age, they are re-eligible indefinitely, the elections being for five years. Deputies to the number of 98 are elected by *scrutin de liste* in 28 large districts in which minorities may be duly represented. There are in all 406 deputies. The deputies cannot take State office, pensions, and salaries; but the ministers are exempted from this law. Neither senators nor deputies are paid for their services. Both Congress and Senate meet every year. The Monarch has the power of convoking them, suspending

them, or dissolving them, but in the latter case a new Cortes must sit within three months. The Monarch appoints the president and vice-presidents of the Senate from members of the Senate only, the Congress elects its own officials. The Monarch and each of the legislative chambers can take the initiative in the laws. The Congress has the right of impeaching the ministers before the Senate.

The Constitution of June 30, 1876, further enacts that the Monarch is inviolable, but his ministers are responsible, and that all his decrees must be countersigned by one of them. The Cortes must approve his marriage before he can contract it, and the King cannot marry any one excluded by law from the succession to the crown. Should the lines of the legitimate descendants of the late Alphonso XII become extinct, the succession shall be in this order—first, to his sisters, next to his aunt and her legitimate descendants, and next to those of his uncles, the brothers of Fernando VII, 'unless they have been excluded. If all the lines become extinct, 'the nation will elect its Monarch.

The executive is vested, under the Monarch, in a Council of Ministers, constituted (December 31, 1912) as follows —

*President of the Council* —Count Romanones  
*Minister of Foreign Affairs*.—Señor Navarro Reverter  
*Minister of Public Instruction*.—Señor Lopez Muñoz  
*Minister of War* —General Laguna  
*Minister of Marine* —Señor Amalia Gimeno  
*Minister of Finance* —Señor Suarez Inclan  
*Minister of the Interior* —Señor Alba  
*Minister of Public Works* —Señor Villanueva  
*Minister of Justice* —Señor Barroso

## II. LOCAL GOVERNMENT

The various provinces and communes of Spain are governed by the provincial and municipal laws. Every commune has its own elected Ayuntamiento, consisting of from five to fifty Regidores, or Concejales, and presided over by the Alcalde, at whose side stand, in the larger towns, several Tenientes Alcaldes. The entire municipal government, with power of taxation, is vested in the Ayuntamientos. Half the members are elected every two years, and they appoint the Alcalde, the executive functionary, from their own body. In the larger towns he may be appointed by the King. Members cannot be re-elected until after two years. Each province of Spain has its own Parliament, the Diputación Provincial, the members of which are elected by the constituencies. The Diputaciones Provinciales meet in annual session and are permanently represented by the Comisión Provincial, a committee elected every year. The Constitution of 1876 secures to the Diputaciones Provinciales and the Ayuntamientos the government and administration of the respective provinces and communes. Neither the national executive nor the Cortes have the right to interfere in the established municipal and provincial administration, except in the case of the action of the Diputaciones Provinciales and Ayuntamientos going beyond the locally limited sphere to the injury of general and permanent interests. In the Basque provinces self government has been almost abolished since the last civil war, and they are ruled as the rest of Spain. Notwithstanding the provisions of the Constitution, pressure is too frequently brought to bear upon the local elections by the Central Government.

## Area and Population.

Continental Spain has an area of 180,050 square miles, but including the Balearic and Canary Islands and the Spanish possessions on the north and west coast of Africa, the total area is 194,783 square miles. The growth of the population has been as follows —

Census year	Population	Increase	Rate of annual increase
1857	15,464,840	—	—
1860	15,673,481	209,141	0.39
1877	16,634,845	960,864	0.86
1887	17,565,682	931,287	0.56
1897	18,132,475	566,843	0.32
1900	18,618,086	485,611	0.89
1910	19,588,688	970,602	0.88

## Area and population of the forty nine provinces —

Provinces	Area in square miles	Population Census 1910	Pop per sq mile	Province	Area in square miles	Population Census 1910	Pop per sq mile

Lérida	4,690	285,495	60.4	Total	194,783	19,588,688	106.5

The population of Ceuta (18,000) is included in that of Cádiz. Besides Ceuta, Spain has, on the African Coast, the Alhucema isles (pop 363), the Chaferinas (652), Melilla (8,256), Peñon de la Gomera (321), and Rio de Oro (186). The North African possessions are no longer used as convict stations, the centuries old "Presidios" having been suppressed by a recent Decree and the prisoners brought back to the Peninsula. The Basques in the North, numbering 440,000, differ in race and language from the rest of Spain, there are 80,000 Moroccans in the South, 50,000 gipsies, and a small number of Jews.

The following were the populations of the principal towns (Census 1910), viz. :—

Town	Pop	Town	Pop	Town	Pop
Madrid	571 559	Palma	68 369	Linares	86,410
Barcelona	559 090	Jerez	62 638	San Sebastian	47 894
Valencia	284,348	Córdoba	65 169	Alcoy	53 729
Sevilla	165 856	Santander	65 209	Badajoz	68,160
Málaga	183 045	Alicante	51 185	Vitoria	39 877
Murcia	124,963	Oviedo	52,874	Burgos	21 489
Cartagena	96 963	Gijón	52 325	Castellón	20,588
Zaragoza	105 788	Almería	45 198	Navarra	28 759
Bilbao	92 514	Las Palmas	59 894	Huelva	27 699
Granada	77 425	Coruña	45 650	Jaén	26 894
Ádiz	67 174	S. Cruz (Canaries)	63 408	Salamanca	26 295
Valladolid	67 743				

The movement of population in 5 years was as follows —

Years	Marriages	Births	Deaths	Surplus of births
1907	185 355	645 986	472 964	173 03
1908	141 046	657 091	460 942	196 759
1909	129 528	650 415	460 675	189 740
1910	135 170	648 787	456 177	192 660
1911	142 119	625 177	468 178	157 494

Emigration in 1906, 126,771, in 1907 130 640 in 1908, 157,556 in 1909, 111,058, in 1910, 160,136 in 1911, 189,683 (99,709 men and 89 974 women), Emigration from Spain is chiefly to Argentina (99 090) Cuba (28,860) and Brazil (6,831)

### Religion

The national Church of Spain is the Roman Catholic, and the whole population of the kingdom adhere to that faith, except about 30 000, Protestants (about 7,000), Jews (about 4,000), Rationalists, etc. Within the Peninsula, apart from Portugal, there are 9 metropolitan sees and 47 suffragan sees, the chief being Toledo, whose archbishop bears likewise the title of Patriarch of the West Indies. The Constitution requires the nation to support the clergy and the buildings, &c., of the Church, and for this purpose the State expends annually about 41,000,000 pesetas. Efforts are being made for a reduction of the Church estimates. The relations between Church and State, are in accordance with the Concordat of May 6, 1851, and although it is laid down in this that only the orders of San Vicente de Paul, and Felipe Neri with one other to be subsequently named, should be permitted in Spain, many other orders have been allowed to establish themselves. The third order referred to above, has never been named, and the conditions of this Concordat have never been rigidly adhered to. The present Government is working to enforce the law above referred to, and no fundamental changes are contemplated at present. A law known as the "Padlock Bill" was passed in December 1910, prohibiting the establishment of any more religious houses, without the consent of the Government. This is only a temporary measure, a more comprehensive Act is being drafted, which will be discussed shortly. Liberty of worship is now allowed to Protestants. The communities of the religious orders are numerous and influential in Spain. Many of them have schools, and about 5,200 of their members are engaged in teaching

boys of the upper and middle classes while, within many of their establishments, industries of all kinds are carried on. The number of religious houses in Spain is about 3,801, of which 794 are for men and 3,007 for women. Of those for men 447 are devoted to education, 34 to charity, and 313 to the training of priests. The total number of monks is about 12,801 (including 1,294 foreigners). The orders for women comprise 1,308 for education, 887 for charity, and 802 for a contemplative life. The number of nuns is about 43,237 (including 2,418 foreign women).

### Instruction

The latest census returns show that a large proportion of the inhabitants are illiterate. In 1860 20·0 per cent. of the population could read and write, 4·6 per cent. could read only, and 75·3 per cent. could neither read nor write. In 1910 33·4 per cent. could read and write, 2·6 per cent. could read only, and 63·7 per cent. could neither read nor write.

By a law of 1857 an elaborate system of primary education was ordained. Education was to be compulsory, there was to be a primary school for every 500 inhabitants, and instruction was to be on a rigidly uniform plan. This system has not been rigidly enforced, but various improvements have been effected, especially by a law of June 9 1909 which made education obligatory. There is now a Minister of Education, with a council, there are ten educational districts, with the universities as centres, 43 primary inspectors, and numerous local educational authorities. The public and primary schools are since 1902 supported by Government, the total sum spent in 1911 being 91,061,746 pesetas. Most of the children are educated free. The Royal Decree of July 1, 1902, regulates all schools whether belonging to corporations or private persons, whether self supporting or in receipt of Government or municipal subventions. It requires schools to be authorised by Government authority, and provides for their periodical inspection, for the enforcement of rules respecting sanitation and discipline, and for the appointment of properly qualified teachers.

There are 24,861 public schools, and 5,212 private schools, the total number of pupils being 2,052,153. Secondary education is conducted in institutions, or middle class schools, somewhat like universities in their organisation: there must be one of them in every province. In 1910 there were 58 institutions with 36,514 pupils. These institutions prepare for the universities of which there are ten, attended by about 16,000 students. The universities are at Barcelona, Granada, Madrid, Oviedo, Salamanca, Santiago, Sevilla, Valencia, Valladolid, and Zaragoza. Each university has two or more of the faculties of philosophy, law, mathematics and physics, medicine, and pharmacy. There are, besides, a medical faculty at Cadix. Government also supports various special schools—engineering, agriculture, architecture, fine arts, music, &c. In 1911 the total sum expended on education and the fine arts was 58,524,586 pesetas.

### Finance

Revenue and expenditure for five years —

	1908	1909	1910	1911	1912
	1,000	1,000	1,000	1,000	1,000
	Pesetas	Pesetas	Pesetas	Pesetas	Pesetas

		Interior	78,309 477
		Instruction	42,711,578
		Public Works, &c	90 840 879
		Finance	17 964 825
		Tax collecting	40 790,240
		Spanish possessions in Gulf of Guinea	1 900 000
		Action in Morocco	51,886 905
Total	1 165 804 472	Total	1,142 736 861

The National Debt of Spain on January 1, 1913 (last official figures available) amounted to 2,399,440,855 pesetas, composed as follows —

External Debt —	Pesetas
4 per cent. perpetual exterior debt—sealed bonds	1 028,500,000
Internal Debt —	
4 per cent. perpetual internal debt	6 626,880,254
4 per cent. redeemable debt	1,590,427,500
4 per cent. redeemable debt (1906)	155 832,600
Non interest bearing debt due to officials	1 000 000
Pagars of the Ministry of the Colonies	100 000 000

## Defence.

### ARMY

Military service in Spain is compulsory (Law of June 29, 1911) The total term of service is for 18 years, 3 are spent in the active army (generally reduced to 2), 3 are spent in the first reserve, 6 are spent in the second reserve, and the rest in the 'territorial reserve.' The second reserve forms second line, or reserve troops on, mobilisation, and the men not required for these formations are available for supplying casualties on field service. There is at present no organisation for the 'territorial reserve'

The country is divided up into 8 territorial districts, each under a 'Captain-General' The 1st to 6th inclusive each furnish to the field army 2 divisions, the remaining two, 1 division A division consists of 2 Infantry brigades, each consisting of 2 regiments of 3 battalions, but the third battalion is only a cadre in peace time, 1 regiment of cavalry, 1 regiment of field artillery of 5 batteries, 1 regiment of engineers. There are also 3 independent brigades of chasseurs, each of 3 battalions, 4 regiments of mountain artillery, making 14 batteries, and 1 regiment of horse artillery of 5 batteries. Batteries have 4 guns. There is 1 permanent cavalry

division of 2 brigades, and there are 8 permanent cavalry brigades. The total strength of the field army would probably be about 220 000 combatants.

For the units of the second line, or reserve troops, there are at present 116 battalion cadres, 14 squadron, and 14 battery, cadres. The second line troops are apparently intended to provide 7 divisions of about 13 000 combatants each. Total about 90,000.

There are also the Guardia Civil and the Carabineros. The former is a constabulary, and the latter a military police used as Customs guard on frontier. Both are recruited from the army and under military discipline. The total strength of the Guardia Civil is somewhat less than 20,000 (2,000 mounted), and of the Carabineros nearly 15,000 (500 mounted).

Outside the Spanish peninsula, there are the 2 military commands of Melilla and Ceuta on the coast of Morocco, also the Balearic Islands and the Canary Islands, each of which forms a military district. The troops in the Balearic and Canary Islands are mostly recruited from the islanders. In Africa they are Spanish, and are supposed to be always on a war footing. Melilla has now been raised to a Captain General's command. The corps of occupation recently consisted of 4 regiments of Infantry of 3 battalions and 3 battalions of Chasseurs (all battalions have 6 companies), a regiment of cavalry of 6 squadrons, 3 field batteries, 3 or 4 mountain batteries, a howitzer battery, a regiment of engineers and the necessary subsidiary services. A native battalion of infantry and squadron of cavalry have been raised at Melilla, and 8 companies of native infantry and a "mixed" company (horse and foot) have been raised to perform the duties of military police. The total strength of the corps of occupation is 12,000 to 15,000 combatants. The troops in the Ceuta district have also been strengthened as also the garrison of Larache and Alcazar. The native troops in that district comprise a squadron of cavalry, a company of marines, and 2 companies of Tirailleurs. The following table shows the distribution of troops in Spain and in the overseas garrisons, the battalions which are only cadres being shown as battalions —

	Infantry		Cavalry Regiments	Artillery		Engineer Battalions.
	Line Regiments	Chasseur Battalions.		Regiments Field, Mountain & Siege	Garrison Troops.	
Spain	38	14	18	18	—	6
Africa	4	2	1	1	2	1
Balearic Islands	4	2	—	—	2	—
Canary Islands	4	3	—	—	2	—
Totals	70	23	29	29	13	7

The Spanish infantry is armed with the Mauser rifle, model 1893 Calibre 275. The cavalry have the Mauser carbine. The field artillery gun is a Schneider Canon 14½ pr of 19 105.

The peace establishment of the Spanish army including Guardia Civil and Carabineros amounts to 12,405 officers and 114,668 men. The budget for 1911 showed a total of 188,356,697 pesetas (about 7,580,000).

Spain has numerous fortresses which guard the passes of the Pyrenees and the Portuguese frontier. On the north and north west coasts are the fortified ports of Pasajes, Santona and Santander, Ferrol, Coruña, and Vigo. On the Straits of Gibraltar are Tarifa and Algeciras, with Cádiz at its entrance.

There are 7 destroyers and 24 modern torpedo boats, and a number of gunboats.

A new programme has been projected to consist of 3 Dreadnoughts, 2 scouts, 8 destroyers, various torpedo boats, and submarines.

The Spanish dockyard at Ferrol is now worked by a British syndicate, employing Spanish workmen.

## Production and Industry

Of the soil of Spain 79.65 per cent. is classed as productive, of this 83.8 per cent. is devoted to agriculture and gardens, 3.7 vineyards, 1.6 olive culture, 19.7 natural grass, 20.8 fruits.

The soil is subdivided among a very large number of proprietors. Of 3,428,083 recorded assessments to the property tax, there are 824,920 properties which pay from 1 to 10 reales, 511,666 from 10 to 20 reales, 442,377 from 20 to 40 reales, 785,184 from 40 to 100 reales, 416,546 from 100 to 200 reales, 165,292 from 200 to 500 reales, while the rest, to the number of 279,188, are larger estates, charged from 500 to 10,000 reales and upwards. The subdivision of the soil is partly the work of recent years, for in 1800 the number of farms amounted only to 677,520, in the hands of 373,740 proprietors and 403,760 farmers.

The area under the principal crops and the yield (for 8 years) were as follows —

	Area.			Yield.		
	1909	1910	1911	1909	1910	1911
	Acres.	Acres	Acres	Cwts.	Cwts.	Cwts.

In 1912, 8 022 092 acres under vines produced 2,413,455 tons of grapes, yielding ordinary red and white wines. Sherry, malaga, and generous wines were exported. 3,560 532 acres (1912) under olives yielded 1,274,656,680 pounds of olives and 226 068,920 pounds of oil. Other products are esparto, flax, hemp, pulse, and hazel nuts are largely exported, and Spain has important industries connected with the preparation of wine and fruits. Silk culture is carried on in Valencia, Murcia, and other provinces.

The number of farm animals in 1911 was estimated as follows—Horses, 546,035; mules, 904,725; asses, 836,741; cows, 2,541,112; sheep, 15 725,882; goats, 3,369,624; pigs, 2 472,416; camels (Canary Islands), 3,898.

Spain is rich in minerals. Iron is abundant in the provinces of Vizcaya, Santander, Oviedo, Huelva, and Seville, coal is found in Oviedo, Leon, Valencia, and Córdoba, zinc in Santander, Guipuzcoa, and Vizcaya, cobalt in Oviedo, lead in Murcia, Jaen, and Almería, quicksilver in Ciudad Real, silver in Guadalajara, sulphate of soda in Burgos, salt in Guadalajara, sulphur in Murcia and Almería, phosphorus in Cáceres and Huelva.

In 1909 workers employed in connection with the mining industries were as follows: 119,358 men, 2,508 women, of which 19,484 boys under 18, and 1,140 girls under 18. The total value of the mineral output in 1909 was 200,553,171 pesetas. The quantities and values of the more important minerals in 1910 were as follows—

Minerals	Metric tons	Value, Pesetas	Minerals	Metric tons	Value, Pesetas
Anthracite	211 538	8 819,124	Iron pyrites	294,184	1 784,590
Arsenic (pyrites)	1 461	25 273	Coal	8,000,056	54,411 581
Asphalt	7,785	94 065	Lignite	245 518	2,614,791
Mercury	22,714	8 791 867	Manganese	8,507	98,740
Sulphur	80 113	232 016	Silver	367	998,377
Zinc	156 118	7 048,461	Lead	216 783	20,200 467
Copper	8 231 418	3,054 004	Argentiferous lead	150,691	25,726,558
Tin	85	17,500	Salt	24,335	452,577
Phosphorite	2,860	85,110	Wolfram	163	83 490
Iron	8 606 796	43 800 055			

Spain has considerable manufactures of cotton goods, principally in Catalonia. In 1910 there were 742 undertakings employing about 68,800 looms, with 2,614,500 spindles, in woollen manufactures there are 8 800 looms with 662,000 spindles. There are in Spain about 144 paper mills (likewise in Catalonia) making writing, printing, packing and cigarette paper. There are 84 glass-making factories. Corks are manufactured to a large extent, in 1910, 21,457 tons, in 1911, 28,019 tons.

In the Spanish fisheries the total number of boats employed is about 14,000, fishermen, 71,500, and the value caught annually about 60,000,000 pesetas. The most important catches are those of sardines, tunny fish, and cod. In Spain there are 580 factories, with 16,500 workmen, for the preparation of sardines. The value of their output is about 600,000 annually.

### Commerce

Imports and exports in pounds sterling —

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1907	86,939 000	88 789,000	1910	89 781 000	84 234,000
1908	86,356 000	83 194,000	1911	89 668 000	83,479 000
1909	85 443 000	84 298,000	1912	41 774 000	41 786 000

The following table shows the various classes of imports and exports for two years —

Description	Imports		Exports	
	1910	1911	1910	1911
	£	£	£	£
Stone, minerals, glassware and pottery	4 000 900	3 795 087	6,100 309	5 738 694

Packing	130,217	70,546	—	—
<b>Totals</b>	<b>34,329 290</b>	<b>36 891,780</b>	<b>25 644,398</b>	<b>26,487,259</b>

In 1911 the total value of wine exported was 4,008,251/

The following table shows the distribution of the commerce of Spain (general and special imports, and general exports) in 1910 and 1911, in pesetas —

Country	Imports from		Exports to	
	1910	1911	1910	1911
	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas
United Kingdom	203 883	168 432	262 735	286,512
France	196 555	164 581	259 867	280 707
Germany	115,693	129 531	55 948	61 044
United States	110 245	129 622	66 101	67,312
Cuba	4 100	1,788	55 669	54,447
Porto Rico	6 594	6 000	8 503	8 657
Philippine Islands	18,190	14 825	8 384	6 720
Morocco	6 510	6 181	1 806	4 821
Other countries	442 894	461 651	361 187	395 560

The customs receipts and post dues in 1911 amounted to 5,557,079l., in 1910, 5 329 827l.

There is no formal treaty providing for "most favoured nation treatment" between Great Britain and Spain, but under an Act passed by the Spanish Cortes in 1894, imports from the United Kingdom into Spain are subject to the minimum tariff, and British merchants have all the advantages conceded to those of any European State, except Portugal. Under notes exchanged in December, 1894 there is an understanding that commercial relations between the two countries will continue on this basis, subject to six months' notice on either side.

The quantities and value of wine imported into the United Kingdom from Spain were as follows in each of the last five years (Board of Trade) returns:—

	1907	1908	1909	1910	1911
Quantities (gallons)	3 286 447	2 707,004	3 251 222	3 362 008	3 173,281
Value (£)	464 545	416 607	449 455	448 781	451 518

Besides wine, the following were the leading imports from Spain into the United Kingdom in the two years:—

	1910	1911		1910	1911
	£	£		£	£
Iron ore	4 163,424	3 439 200	Oranges	1 857 617	1 922,897
Lead and ore	1 067 750	1 027 186	Other fruits	1 587 918	1 706 975
Pisties	932 098	1 034 605	Esparto, &c.	208 766	169 974
Copper ore, &c.	1 080,612	591 291	Onions	5 9 896	817,182
Quicksilver	829 853	872 587	Cork	806 929	331 414

The chief British exports to Spain in 1911 were linen yarn and linens, of the value of 110,671l., iron, wrought and unwrought, 561,825l., coal, 1,447,505l., machinery, 633,439l., cotton goods, 239,731l., woollen goods, 109,913l., wool, 113,341l., new ships and boats, 32,970l.

Total trade between Spain and the United Kingdom in thousands of pounds for 5 years:—

	1906	1909	1910	1911	1912
	£	£	£	£	£
Imports from Spain into U Kingdom	75,423	78,441	73,938	73,003	74,558
Exports to Spain from U Kingdom	5,790	4 818	4,892	5,680	5,694

### Shipping and Navigation

The merchant navy of the Kingdom contained on January 1, 1912, 582 steamers of 750,081 tons net, and 301 sailing vessels of 44,825 tons net, and in 1911, 577 steamers of 744,517 tons net, and 302 sailing vessels of 44,940 tons.

Bilbao is the chief maritime centre, Barcelona comes second.

The shipping entered and cleared at Spanish ports in two years was as follows —

—	1910		1911	
	No	Tons	No	Tons
Entered	10 919	9 844 131	10 606	9 648 870
With cargoes	10 726	11 644 328	10 100	11,251 971
In ballast				
Total	21 645	21 488,654	20 706	20 900,840
Cleared				
With cargoes	16 242	16 748,806	16 927	16 822,089
In ballast	2 099	8 878 318	2,380	3,618,441
Total	18 341	20,127 310	18 107	20 838 480

Of the vessels entered in 1910, 6,492 of 5,491,208 tons, and of those cleared 7,919 of 6,824 201 tons, were Spanish and in 1911, 11,358 vessels of 7,948,393 tons (entered) and 9,069 vessels of 7,475,300 tons (cleared) were Spanish. Shipping under the British flag, formed 39.8 per cent of the whole.

### Internal Communications

The length of railways in Spain in 1912 was 9,179 miles open for traffic. The whole of the Spanish railways belong to private companies, but nearly all have obtained guarantees or subventions from the Government. The law of March 14, 1908, sanctioned the construction of secondary and strategical railways, of the former 8,336 miles, of the latter 2,900. Interest at 4 per cent to be guaranteed by the State. The first of these lines, a railway 18 miles in the Province of Palencia, was opened in 1912.

The Post Office carried in 1911, in the inland service, 114,118,566 letters and post-cards, and 189,615,236 printed papers and samples in the international service 35 688,198 letters and post-cards, and 48,636,192 printed papers and samples. There were 5,573 post-offices. Receipts, 38,747,097 pesetas, expenses, 15,054,889.

The length of lines of telegraphs in Spain in 1911 was 57,858 miles, the total number of interior messages sent and received was 4,247,642. International messages sent 764,983, received 846,929, transit 187,945. The number of telegraph offices was 1 944.

In 1911 there were 67 urban telephone systems and 41 interurban circuits, the total number of telephone stations was 22,101.

A company holding a concession from the Government have opened for the public service 4 wireless stations, Marconi system. These stations have a range of 1,000 miles, and are situated at or near Las Palmas and Tenerife in the Canary Islands and at Cadix and Barcelona on the Peninsula. This system is completed by short-range stations (500 miles) at Vigo, Soller (in the Balearic Islands) and Aranjuez (Madrid).

A royal decree was recently promulgated in accordance with which all Spanish merchant vessels carrying passengers or mails must be fitted with wireless telegraphy.

### Money and Credit.

The note issue of the Bank of Spain is regulated by law of May 13, 1902. On January 27, 1913, the position of the Bank was as follows —

	1 000 Pesetas
Cash in hand { gold	640 445
{ silver	73 57
{ bronze	3 087
Portfolio	775,609
Public Treasury	105 188
Advances to Treasury	160 000
Property	18,100
Capital and reserve	170 000
Notes in circulation	1 855 884
Deposits and Accounts current	480 968
Discounts	280 930

Savings bank deposits in Spain, December 31, 1911, 448,803,000 pesetas, distributed over 661,839 accounts.

The nominal value of the money coined in Spain from 1868 to 1907 was gold, 920,618,935 pesetas, silver, 1,330 589,807 pesetas. In 1906-07 no gold was coined, in 1906-07, no silver was coined. No coinage was struck during the years 1908 and 1909. In 1910, money coined to the value of 1,976,180 pesetas in 50 centime pieces (silver) to replace money retired from circulation. In 1911, 268 023 pesetas of 50 centime pieces were coined, as well as 60,286 pesetas of bronze centime pieces.

### Money, Weights, and Measures

The *Peseta* of 100 *Céntimos* is of the value of a franc, 9½d, or 27 to 28 pesetas to the pound sterling, but the actual value is about 8½d to 8¾.

Gold coins in use are 25, 20, 10, and 5 peseta pieces. Silver coins are 5 peseta, 2 peseta, 1 peseta, and 50 centime pieces.

Both gold and silver coins are of the same weight and fineness as the corresponding French coins. Under a law of July 29, 1903, the Government is withdrawing from circulation the spurious 5 peseta pieces which had become common. Gold coinage is not in general circulation.

Theoretically, there is a double standard of value, gold and silver the ratio being 16½ to 1. But of silver coins only the 5 peseta piece is legal tender, and the coinage of this is restricted.

On January 1, 1859, the metric system of weights and measures was introduced in Spain. But, besides these the old weights and measures are still largely used. They are —The *Quintal* = 220 4 lbs. avoirdupois, the *Libra* = 1 014 lbs. avoirdupois, the *Arroba*, for wine = 3½ imperial gallons, for oil = 2½ imperial gallons, the *Square Vara* = 1 09 vara = 1 yard, the *Fanega* = 1½ imperial bushel.

### Diplomatic and Consular Representatives

#### 1 OF SPAIN IN GREAT BRITAIN

*Ambassador* —Don Wenceslao Ramures de Villa Urrutia, G C V O

*Minister and Counsellor* —Don Conde de Velle

*Second Secretary* —Don Carlos de la Huerta

*Attachés* —Marqués de los Arcos, Don Manuel Casulleras, Don F. Carlos Silvela, Don Esteban Martínez, Don Eduardo M. Peña, Señor Marqués de Mós

*Military Attaché* —Major Julio Vicens

*Consul-General in London* —Don Jose Congusto (appointed March 1913).

There are Consular representatives at Cardiff, Dublin, Glasgow, Liverpool, Newcastle, Aberdeen, Newport, Swansea

## 2. OF GREAT BRITAIN IN SPAIN

*Ambassador*—Rt. Hon. Sir Maurice de Bunsen, G. C. M. G. G. C. V. O., O. B. appointed Feb. 1906

*Councillor*—E. A. Rennie M. V. O.

*Secretaries*.—Cland Russell, Hon. Mervyn Herbert, and C. F. Ramsden.

*Naval Attaché*.—Captain W. Kelly, R. N.

*Military Attaché*.—Lieut. Col. Hon. Henry Yarde Buller, M. V. O., D. S. O.

*Consul-General* (at Barcelona).—J. F. Roberts, C. M. G.

There are Consular representatives at Bilbao, Cadix, Coruña, Madrid, and other places

## Colonies.

The area and population of the colonial possessions of Spain are approximately as follows—

Colonial Possessions	Area square miles	Population
<i>Possessions in Africa</i>		
Rio de Oro and Adrar	78,000	11,000
Spanish Guinea	12,000	200,000
Fernando Po, Annabou, Corisco, Great Elobey, Little Elobey	814	23,844
<b>Total Africa</b>	<b>85,814</b>	<b>235,844</b>

For administrative purposes the Canary Islands are considered part of Spain. Rio de Oro and Adrar, stretching southwards along the Sahara coast from the south western frontier of Morocco, are under the governorship of the Canary Islands, with a sub-governor resident at Rio de Oro. The Spanish territory on the Gulf of Guinea, extends from the Muni to the Campo river and the German Kamerun, its eastern boundary being on the meridian of 11° 20' E. of Greenwich. The coast region is low and marshy and contains vast forests. The vegetation is luxuriant and at places along the coast there are Spanish, French and English factories. But there are no harbours and the rivers are all inaccessible to vessels. The population comprises about 300 Europeans. There are Catholic and American Presbyterian missions at work among the natives. Spain has given to France the right of pre-emption in case of the sale of any of these African colonies or the adjacent islands.

The budget for 1911 estimates the revenue and expenditure of the colonies each at 2,755,943 pesetas.

## Books of Reference concerning Spain and Colonies

# SWEDEN.

(SVERIGE.)

## R reigning King

**Gustaf V.** born June 16, 1858 Succeeded to the throne on the death of his father Oscar II, December 8, 1907 Married, Sept. 20 1881, to Princess Victoria, born August 7, 1862, daughter of Friedrich Grand Duke of Baden

### Children of the King

I The Crown Prince *Gustaf Adolf*, Duke of Scania, born Nov 11 1882, married, June 15, 1905 to Princess Margaret Victoria, born January 15, 1882, daughter of Prince Arthur, Duke of Connaught offspring, Prince *Gustaf Adolf*, born April 22, 1906, Prince *Sigvard*, born June 7, 1907, Princess *Ingrid* born March 28, 1910, Prince *Bertil* born Feb. 28, 1912.

II Prince *Wilhelm*, Duke of Södermanland born June 17 1884, married May 8, 1908, to Grand Duchess Maria Pavlovna, born April 18, 1890, daughter of Grand Duke Paul Alexandrovitch of Russia. Issue, Prince *Lennart*, born May 8, 1909

III Prince *Eric* Duke of Västmanland, born April 20, 1889

### Brothers of the King

I Prince *Oscar Bernadotte* Count of Wisborg born Nov 15 1859 Renounced his succession to the throne and married, March 15, 1888, Elba Munk of Fulkila born Oct. 24 1858.

II Prince *Carl* Duke of Västergötland born Feb. 27 1861 Married August 27 1897 to Princess *Ingeborg* born Aug. 2 1878, daughter of King *Frederik* of Denmark Issue, Princess *Margaretha* born June 2, 1899 Princess *Martha* born March 28 1901 Princess *Astrid*, born Nov. 17 190 and Prince *Carl* born Jan. 10 1911

III Prince *Enges* Duke of Närke born Aug. 1 1865

King *Gustaf V* is the fifth sovereign of the House of *Ponte Corvo* and great grandson of Marshal *Bernadotte*, Prince of *Ponte Corvo*, who was elected heir apparent of the crown of Sweden by the Parliament of the Kingdom, Aug. 21 1810, and ascended the throne Feb. 5, 1818, under the name of *Carl XIV Johan*. He was succeeded at his death March 8, 1844, by his only son *Oscar*. The latter died July 8, 1859, and was succeeded by his eldest son *Carl XV*, at whose premature death without male children the crown fell to his next surviving brother, the late King

The royal family of Sweden have a civil list of 1,493,000 kronor, or 82,2132 The sovereign, besides, has an annuity of 800,000 kronor, or 12,5201, voted to King *Carl XIV Johan* and his successors on the throne of Sweden

As to the dissolution of the Union with Norway see under *Norway*

The following is a list of the kings and queens of Sweden, with the dates of their accession from the accession of the House of *Vasa* —

<i>House of Vasa</i>		<i>House of Hesse</i>	
<i>Gustaf I.</i>	1521	<i>Fredrik I</i>	1720
<i>Eric XIV</i>	1560	<i>House of Holstein Gottorp</i>	
<i>Johan III</i>	1568	<i>Adolf Fredrik</i>	1751
<i>Rigsmund</i>	1592	<i>Gustaf III</i>	1771
<i>Carl IX</i>	1599	<i>Gustaf IV Adolf</i>	1792
<i>Gustaf II Adolf</i>	1611	<i>Carl XIII</i>	1809
<i>Christina</i>	1632	<i>House of Ponte Corvo</i>	
<i>House of Pfalz</i>		<i>Carl XIV Johan</i>	1818
<i>Carl X.</i>	1654	<i>Oscar I</i>	1844
<i>Carl XI</i>	1660	<i>Carl XV</i>	1859
<i>Carl XII.</i>	1697	<i>Oscar II</i>	1872
<i>Ulrika Eleonora</i>	1718	<i>Gustaf V</i>	1907

### Constitution and Government

The fundamental laws of the Kingdom of Sweden are —1 The Constitution or *Regeringsformen* of June 6, 1809, 2. The amended regulations for the formation of the Diet of June 22, 1863 (modified under an act passed in 1909), 3. The law of royal succession of September 26, 1810, and 4. The law on the liberty of the press of July 16, 1812. The King must be a member of the Lutheran Church. His Constitutional power is exercised in conjunction with the Council of State or (in legislation) in concert with the Diet, and every new law must have the assent of the crown. The right of imposing taxes is, however, vested in the Diet. This Diet, or Parliament of the realm, consists of two Chambers, both elected by the people. The First Chamber consists of 150 members. The election of the members takes place by the 'Landstings, or provincial representations, 25 in number, and the municipal corporations of the towns, not already represented in the 'Landstings, Stockholm, Göteborg, Malmö, Norrköping and Gäddede. The Constituencies are arranged in 6 groups in one of which an election takes place in September every year. The manner of the election is proportional and regulated by a special election law. All members of the First Chamber must be above 35 years of age, and must have possessed for at least three years previous to the election either real property to the taxed value of 50,000 kronor or 2,777 $\frac{1}{2}$  or an annual income of 3,000 kronor or 186 $\frac{1}{2}$  l. They are elected for the term of six years. The Second Chamber consists of 230 members elected for 3 years by universal suffrage every Swede over 24 years of age, and not under any legal disability, having the right to vote. The country is divided into 56 constituencies, in each of which one member is elected for every 230th part of the population of the Kingdom it contains, the number to be elected in each constituency being ascertained prior to every 3 year period. The method of election is proportional, and the voter may (or may not) indicate on the ballot paper the party to which the candidates he votes for belong. On the voting paper the names of the candidates must appear in vertical succession, and these names may not exceed in number the number to be elected by more than 2. In the counting of votes, papers with the indication of party are grouped according to parties and the order of candidates within each group determined. Papers with no party indication are counted separately in a 'free group. The places to be given to the different groups of voting papers are decided according to the d'Hondt rule. Representatives and their substitutes are chosen in the same election. The members of both Chambers obtain salaries, free of income tax, for their services, at the rate of 1,200 kronor, or 66 $\frac{1}{2}$  l. for each session of four months, or, in the case of an extra session, 10 kronor (1 $\frac{1}{2}$  l.) a day, besides travelling expenses. The salaries and travelling expenses of the deputies are paid out of the public purse.

The executive power is in the hands of the King, who acts under the advice of a Council of State, the head of which is the Minister of State. The Ministry, appointed October 7, 1911, is composed as follows —

*Premier and Minister of State* — Karl Staaff  
*Minister for Foreign Affairs* — Count Albert Baronsvärd  
*Minister of Justice* — Gustaf Sandström  
*Minister of War* — David Bergström  
*Minister of Marine* — Jacob Larsson  
*Minister of the Interior* — Axel Schotte  
*Minister of Finance* — Baron Theodor Adelswärd

*Minister of Education and Ecclesiastical Affairs*—Fridtjuf Berg

*Minister of Agriculture*—Alfred Petersson.

*Ministers without Portfolio*—Bror Petrus and Karl Stenström.

All the members of the Council of State are responsible for the acts of the Government.

The second chamber, elected Sept., 1911 101 Liberals, 63 Socialists, 64 Conservatives, 2 Independent Liberals.

The provincial administration is entrusted in Stockholm to a High Governor, and in each of the 24 governments to a prefect, who is nominated by the King. As executive officers of the prefects there are 118 bailiffs (Krono fogdar) and 519 sub-officers (Lansman). The right of the people to regulate their own local affairs is based on the communal laws of March 21, 1862. Each rural parish, and each town, forms a commune or municipality in which all who pay the local taxes are voters, forming the communal assembly. The communal assembly in the country, and an elected town council in the towns, decide on all questions of administration, police and communal economy. Ecclesiastical affairs and questions relating to primary schools are dealt with by the parish assemblies, presided over by the pastor of the parish. Each government has a county council (Landsting) which regulates the internal affairs of the government. The council meets annually for a few days in September under a president appointed by the king from among its members. The members are elected by the towns and provincial districts. Towns having a population of at least 1/150th of the total population of the realm and towns already separated from the 'Landstings,' and where the number of inhabitants is not fallen below that which caused their separation, are administered separately by their municipal councils. These towns are Stockholm, Göteborg, Malmö, Norrköping, and Gälle. As in elections for the Diet, so in the communal elections of municipal representatives, of members of the 'Landstings,' &c the method of election is proportional. Women possessing the right to the communal vote are also eligible to communal positions, except to be members of the 'Landstings.'

### Area and Population

#### I. PROGRESS AND PRESENT CONDITION

The first census took place in 1749 and it was repeated at first every third year, and subsequently, after 1775, every fifth year. At present, a general census is taken every ten years, besides which there are annual enumerations of the people.

The area and population of Sweden, according to the census taken on December 31, 1910 and estimate for December 31, 1911 are as follows—

Governments (Län)	Area English square miles	Population Dec. 31 1910	Population Dec. 31 1911	Pop per square mile 1911
Stockholm (city)	18	542,828	546,500	23,661.6
Stockholm (rural district)	8,015	280,181	324,873	77.0
Uppsala	2,482	128,171	138,404	83.1
Södermanland	4,681	178,568	179,840	68.2
Östergötland	4,207	204,179	206,745	69.3
Norrköping	4,447	214,454	216,309	49.4
Kronoberg	3,325	157,965	167,580	41.2
Kalmar	4,448	225,129	228,873	51.4
Gotland	1,819	55,217	58,373	45.4
Blekinge	1,164	148,254	147,784	128.7
Kristianstad	2,486	228,807	230,042	93.6
Malmöhus	1,006	487,214	489,335	246.7
Hälsås	1,000	147,234	147,185	77.4
Göteborg and Bohus	1,948	861,379	868,758	196.0

# AREA AND POPULATION

1273

Governments (Län)	Area English square miles	Population Dec. 31, 1910	Population Dec 31 1911	Pop per square mile 1911

Lakes Vänern Vattern, Mälaren Hjälmarén	9 516	—	—	—
Total	172,870	5 522 408	5 561 740	82.2

In 1911 there were 2,718,638 males and 2,843,161 females  
The growth of the population has been as follows —

Year	Population	Increase per ct per annum	Year	Population	Increase per ct per annum
1840	2 188 887	—	1900	5 188 441	0.71
1880	4 506 668	0.95	1910	5 522 408	0.72

With the exception of (1900) 22,138 Finns, 6,983 Lapps, and some thousands others, the Swedish population is entirely of the Scandinavian branch of the Aryan family

In 1900 the foreign born population numbered 85,627, of whom 5,107 were born in Germany, 6 874 in Denmark, 7,978 in Norway, 6 644 in Finland, 1,506 in Russia, 779 in the United Kingdom, and 5,130 in the United States.

The population was divided as follows in 1900 —

	Male	Female		Male	Female
Unmarried	1 505 868	1 505 663	Widowed	93,647	212,401
Married	338 999	847,222	Divorced	1 922	3 624

Leading occupations in 1900, including families and dependents —

Agriculture, &c.	1,179,062	Timber works	150,865
Landed and farm proprietors	275,148	Various manufactures	740,152
Farmers, overseers, &c.	352,905	Trade and locomotion	414,148
Fishers, &c.	495 655	Officials and military	196,937
Crafters, cobblers, &c.	18,839	Learning and literature	49 266
Dairy-keepers	19,107	Medicine, &c.	26,063
Gardeners	38,944	Owners, pensioners, &c.	236,821
Fisheries	319,683	Mechanics servants, &c.	467,696
Mining and metal works		Various	65,877

## I MOVEMENT OF THE POPULATION

## 1 Births, Deaths, and Marriage.

Year	Total living Births	Of which Illegitimate	Stillborn	Marriages	Deaths exclusive of Stillborn	Surplus of Births over Deaths
1906	136,690	17,657	3,440	82,388	76,686	60,264
1907	136,793	17,943	3,587	83,751	78,149	58,644
1908	138,674	18,590	3,430	88,084	80,508	58,006
1909	139,567	19,406	3,482	92,640	74,688	64,967
1910	139,025	19,802	3,301	93,162	77,212	58,413
1911 <sup>1</sup>	131,997	—	—	93,683	76,254	56,643

<sup>1</sup> Provisional

## 2. Emigration

Year	Immigrants	Total Emigrants	To U. S. of America	Year	Immigrants	Total Emigrants	To U. S. of America
1906	9,681	24,704	21,242	1909	8,071	1,992	18,881
1907	8,913	22,878	19,425	1910	8,142	816	23,529
1908	9,518	12,490	8,873	1911	7,742	19,907	15,571

## III PRINCIPAL TOWNS

In 1870 the town population numbered only 539,649 and in 1911, 1,412,524, showing an increase of 162 per cent., or nearly five times the rate of the general average of the Kingdom.

Towns over 10,000 inhabitants at the end of 1911 —

Stockholm	346,649	Uppsala	26,096	Uddevalla	12,737
Göteborg	170,608	Linköping	23,021	Kristianstad	11,704
Malmö	89,719	Borås	21,997	Falun	11,081
Norrköping	46,629	Lund	36,340	Ystad	11,459
Gävle	35,710	Västerås	19,608	Södertälje	11,436
Hälsingborg	33,223	Halmstad	18,297	Södertälje	11,271
Örebro	31,066	Karlstad	17,728	Västervik	10,171
Bäckströms	28,486	Bundsvall	16,694	Trälleborg	10,185
Karlskrona	27,490	Landakrona	16,265	Vyköping	10,131
Jönköping	27,320	Kalmar	15,721	Väby	10,079

## Religion and Instruction

The mass of the population adhere to the Lutheran Protestant Church, recognised as the State religion. There are 13 bishoprics (Uppsala being the metropolitan see), and 2,573 parishes in 1911. At the census of 1900, the number of 'Evangelical Lutherans' was returned at 6,072,792, the Protestant Dissenters, Baptists, Methodists, and others numbering 56,844. Of other creeds, there were 2,378 Roman Catholics (under a Vicar Apostolic resident at Stockholm), 44 Greek-Catholics, 365 Irvingites, 3,912 Jews, and 51 Mormons. No civil disabilities attach to those not of the national religion. The clergy are chiefly supported from the parishes and the proceeds of the Church lands.

The Kingdom has two universities, at Uppsala and Lund, the former frequented by 2,295 and the latter by 1,233 students in the autumn of 1911. There are also a state faculty of medicine in Stockholm (380 students) and private universities in Stockholm (philosophical and law faculties

with 664 students and 79 auditors) and Goteborg (philosophical faculty with 237 students). In 1911 there were 77 public high schools, with 23,018 pupils, 44 people's high schools, 2,418 pupils, 15 normal schools for elementary school teachers, 1,685 pupils, 2 high and 7 elementary technical schools, about 8,606 pupils, 10 navigation schools, 638 pupils besides institutions and schools for deaf mutes and the blind, medical schools, military schools, veterinary and other special schools. Public elementary instruction is gratuitous and compulsory, and children not attending schools under the supervision of the Government must furnish proofs of having been privately educated. In 1910 there were 14,894 elementary schools, with 21,585 teachers and 791,545 pupils. In 1910 the expenditure on elementary education was 41,600,768 kronor, of which about one fourth came from the national funds. Among the recruits (Bevaring) of 1910 only 0.28 per cent were unlettered, only 0.43 per cent unable to write.

### Justice and Crime

The administration of justice is entirely independent of the Government. Two functionaries, the Justitie kansler, or Chancellor of Justice, and the Justitie Ombudsman or Attorney General, exercise a control over the administration. The former appointed by the King, acts also as a counsel for the Crown, while the latter, who is appointed by the Diet, has to extend a general supervision over all the courts of law. The kingdom which possesses one Supreme Court of Judicature, is divided (beginning of 1911) into 3 high court districts and 212 district courts divisions of which 91 are urban districts and 121 country districts.

In town these district courts (or courts of first instance) are held by the burgomaster and his assessors in the country by a judge and 12 jurors—peasant proprietors—the judge alone deciding unless the jurors unanimously differ from him, when their decision prevails. In Sweden trial by jury only exists for affairs of the press.

In 1910 2,476 men and 251 women were sentenced for serious crimes, at the end of 1910 there were 1,473 hard labour prisoners.

### Pauperism

Each commune is bound to assist children under 15 years of age, if their circumstances require it, and all who from age or disease are unable to support themselves. In other cases the communal poor board decides what course to take. Each commune and each town (which may be divided) constitutes a poor district and in each is a board of public assistance. In 1910 these districts possessed workhouses and similar establishments to the number of 1,964, capable of lodging 62,661 people.

The number of paupers assisted was in 1903, 295,277, of whom 78,596 were in the towns, in 1904, 284,639, of whom 78,633 were in the towns, in 1905, 284,602, of whom 79,455 were in the towns, in 1906, 283,896, of whom 82,090 were in the towns, in 1907, 228,698, of whom 82,439 were in the towns, in 1908, 233,530, of whom 87,209 were in the towns, in 1909, 235,955, of whom 89,615 were in the towns, in 1910, 236,918, of whom 90,912 were in the towns.

### Finance

The budget of revenue and expenditure for the year 1913 was as follows (18.16 kronor = 11.) —

REVENUE		EXPENDITURE			
			Ordinary expenses	Extra ordinary expenses	Total
(a) State revenues	Kronor	(a) Actual	Kronor	Kronor	Kronor
Taxes		Expenses			
Capitation tax	125 000	Royal Household	1 408 000	124 000	1,617 000
Tax on incomes and property &c	34 706 800	Justice	5,135 969	68 341	5,908,200
Succession duty	6,600 800	Foreign Affairs	1 650 080	406 070	1 956,700
Other stamp-duties	11,000 000	Army	45,550 280	6 774 820	66 125 100
Customs	62,000,000	Navy	30,322 425	2 822,065	36 048 400
Excise on spirits, malt and sugar	48 000 000	Interior	12 074 040	7 085 254	19 157 800
Miscellaneous	5 566 700	Education and Ecclesiastical Affairs	14,682 949	3 129 101	17 512 100
(b) Net receipts from production funds of the State		Finance	26,200,560	4 314 050	30 764 600
Business of the State Railways	18 500 000	Agriculture	5,812,061	4 549 289	9 763,300
Posts and telegraphs	7 109,700	Pensions	5,576 108	3 050,497	8 626,600
Waterfall works	1 000 000	Expenses for the Diet, &c	—	—	1 450 000
Domains	9 207 000	Interest on the national debt	—	—	23 681,000
Interest on shares in the Locomotives, Kärnabana Co Ltd.	1,400 000		To be paid with		
Interest on out-standing loans	8 781 500	(b) Improvement of State property and reduction of debt	loans	other revenues	
Interest on the fund for insurance of workmen	1 340 000	Business of the State	Kronor	Kronor	
(c) Of the profit of the National Bank	6 311 000	Loans to private railways, ship owners &c	23 147 800	6 962 000	40 111 000
(d) Employment of property	1,218 000	Fund for insurance of workmen	11 065 000	—	11 065 000
(e) Loans	44 805 500	Amortisation of the national debt	—	2 600 000	2 600 000
			—	6,305 000	8 555 000
Total revenue	321,027 300 (14,483 871)	Total expenditure	—	—	323,027 300 (14,488,871)

The value of the land and house property of Sweden is thus returned for 1911 —

		Kronor
Taxed	Agricultural land in the country	2,969,849,800
	in the towns	(4,558,500)
	Other real estate in the country	1,194 902,100
	in the towns	8,078,586 900
	Total (1911)	7,226,997,300
Un taxed	National	
	in the country	285 250,000
	in the towns	174,502,700
	Belonging to communities, academies &c.	197 590,500
	in the towns	221,070,500
	Total (1911)	1,880,403,500
	Grand total (1911)	9,107,390,800

The expenditure for the Church is chiefly defrayed by the parishes and out of the revenue of landed estates belonging to the Church, and the amounts do not appear in the budget estimates. The expenses for public instruction are in great part defrayed by the parishes.

On January 1, 1912, the public liabilities of the Kingdom, contracted entirely for productive purposes (railways &c.), were as follows —

Funded railway loan of 1890 with 8½ interest	Kronor
1890	18 253 9.1
1893	56 888 111
1897	84 757 9.0
1898	24,191 111
1899	27 840 000
1894	17,508 200
1899	38 266 880
1900	26 830,000
1904	36,000 000
1906	48 900,000
1907	44 800 000
1908	54 428 000
1911	79 006 006
Total	606,006 173 (58 875 440L)

All the loans are paid off gradually by means of sinking funds. The debt amounts to about 6L per head of the population, and the interest to about 4s, but as the receipts from railways and outstanding loans, &c., amount to about the whole interest, the charge per head is nominal. The total assets of the State on January 1, 1912, amounted to 1,565,168,378 kronor, thus the financial situation of the State shows a surplus of assets of 859 072,288 kronor.

The income of the communes in 1910 was 178,630,252 kronor, and the expenditure 192,857 032 kronor. Their assets amounted to 825,957,178 kronor, and their debts to 598,144,686 kronor. The revenue of the provincial representative bodies was 11,207,989 kronor, and expenditure 12,428,481 kronor, their assets 38,428,157 kronor and debts 16,103,911 kronor.

## Defence

### ARMY

The military forces are a militia recruited on the principle of universal service, but aided by a voluntarily enlisted personnel which forms the permanent cadres for training purposes.

Liability to service commences at the age of 21, and lasts till the end of the 40th year. The men belong to the first 'ban' of the active army or *Beväring* for 8 years, then for 4 years to the second 'ban', and finally for 8 years to the *Landstorm*. The initial period of training is 150 days for the infantry, garrison artillery, heavy field artillery, and train. It is 281 days for cavalry, horse and field artillery, and engineers. The infantry, &c., are called up for exercise 3 times in the first period of their service, for 30 days each time. The cavalry and artillery have 2 trainings, each of 48 days.

The field army is likely to consist, in the first instance, of 6 divisions, each of 2 brigades of 2 regiments (12 battalions), with a regiment of cavalry (4 squadrons), a regiment of field artillery (11 batteries of 4 guns each), a company of engineers, a pontoon train, a telegraph detachment, a supply company, a bearer company, ammunition column and train. There would be also a cavalry division of 4 battalions and the horse artillery division (16 squadrons and 3 batteries). The total would amount to about 100,000 combatants. The first ban of the *Beväring* would be able (as far as numbers go) to furnish a nearly equal number of reserve troops, while

the second ban would provide a sufficient reserve to make good the losses on field service, but it is not known at present what is to be the organisation of the considerable reserves which will be available.

The table below shows the peace strength in 1912 —

Troops	Officers	Non-Com Officers	Rank and File		Total
			Cadres (Voluntary Enlistment)	Conscripts (Contingent on the Barpel) (Non exercise 1912)	
Army-Staff, &c.	65	12	—	—	70
Infantry, 38 regiments (82 battalions)	1,202	1,845	8,831	45,917	57,407
Cavalry 3 regiments (50 squadrons)	270	202	3,068	3,629	6,899
Field Artillery 6 regiments and 1 corps (69 batteries)	—	—	—	—	—
Horse Artillery 1 division (3 batteries)	—	—	—	—	—
Position Artillery 1 regiment and 1 battery (7 batteries)	401	458	2,917	5,808	9,684
Garrison Artillery 1 regiment (10 companies)	—	—	—	—	—
Engineers, 4 corps (16 companies)	128	120	826	1	1,075
Train and Medical Service 6 corps and 1 company (18 companies)	90	120	400	3,388	4,070
Military Officials (Judge Advocates, Army Surgeons, Commissaries, &c.)	440	357	5	3,153	1,455
Total Peace Strength about	2,745	2,604	16,194	60,111	81,654

<sup>1</sup> Moreover 3,023 indella.

Moreover 262 indella.

<sup>2</sup> Army CONSERVATION Troops

The total war strength is about 485,000

The strength of the reserve of officers and voluntarily enlisted men amounts to about 26,250 that of the Bevaring to about 275,000

The landstorm is supposed to amount to about 170,000 of all ranks.

The Swedish infantry are armed with the Mauser rifle (calibre 6.5 mm.), the horse and field artillery have the Krupp 7.5 cm. Q.F. gun. The military budget for 1912 amounted to 3,150,938*l*, of which 370,518*l* was for extra ordinary expenditure

#### NAVY

The following is a list of the principal ships —

Laid down	Name	Displacement tons	Maximum armament		Armament	Torpedo tubes	Indicated horse power	Maximum speed knots
			On belt	On guns				
1884	Braa	3,300	11½	7½	18.2-in., 7.6-in.	1	4,750	16
1886	Göta	3,300						
1891	Thula	3,300						
1886	Oden	3,700	10	16	210-in., 6.4-7-in.	1	5,500	17
1897	Thor							
1897	Wödd							
1898	Dristigsholm	3,600	7½	8	28.2-in., 6.6-in.	2	5,800	17
1900	Vasa	3,750	7	7½	28.2-in., 6.6-in.	2	5,500	17
	Tappersteden							
1901	Manhagsten	4,800	8	7½	28.2-in., 8.6-in.	2	9,000	18
1904	Oscar II.							
1904	Fylgia							
1912	New ship (P)	7,000	8	8	41.1-in., 8.6-in.	2	20,000	22.5

*Fylgia* is an armoured sea-going cruiser, the other ships are coast-defence battleships. These battleships are all of, or have been converted into, one type, low on the water with big guns at bow and stern, lesser guns amidships. The latest of them are sea-going vessels. There are 5 torpedo gunboats, 8 destroyers of about 31 knots, about 58 torpedo boats, and 5 submarines. There are also several gunboats and training ships, and 10 monitors for coast service, carrying one or two 8 in. or 4 7 in. guns each. A parliamentary defence committee (December, 1910) presented a report to the government, in which they expressed the necessity of building four coast defence battleships of greater fighting power than the *Oscar II*, and proposed a type (*P*) of 6,800 tons with four 11 in. and eight 6 in. guns. It has been found necessary to enlarge the naval station in Stockholm, and the committee has proposed its removal to a place outside the capital. It is proposed to extend obligatory military service in the navy from 300 to 365 days. A new Defence Committee (1911) has replaced the one appointed in 1910. This decided not to proceed with the battleship '*P*'. The necessary amount was, however, collected by public subscription, and the ship is now building.

The personnel of the Royal Navy is divided into three classes, viz. 1 The Active List, 2 The Reserve, 3 The *Bevöring*. On the active list are 4 flag-officers, 8 commodores, 17 captains, 18 commanders, 96 lieutenant commanders, 101 lieutenants, 59 sub lieutenants, 686 warrant officers, and 4,000 petty officers and men, while about 250 commissioned officers belong to the Reserve.

On the active list of the Royal Coast Artillery are 1 general, 2 colonels, 2 lieutenant-colonels, 6 majors, 39 captains, 37 lieutenants, 19 sub lieutenants, 166 warrant officers and 1,361 petty officers and men.

## Production and Industry

### I AGRICULTURE

The number of farms in cultivation in 1911 was 359,871, of these there were of 2 hectares and under, 88,967, 2 to 20 hectares, 280,477, 20 to 100 hectares, 33,189, above 100, 3,163. Of the total land area of Sweden 8.2 per cent is under cultivation, 3.2 per cent under natural meadows, and 52.1 per cent under forests, the products of which form a staple export.

The following table shows, in thousands of hectares (2.47 acres), the area under the chief crops in 1911, and, in thousands of hectolitres (2.75 bushels), the yield in 1911 —

	Wheat	Rye	Barley	Oats	Mixed Grain	Pulse	Potatoes
Area	101.5	400.1	180.5	789.9	163.4	40.8	153.8
Yield	2,796.7	8,890	4,686.6	22,854	5,833.1	722.9	18,060.6

The value of the cereal crops in 1911 was estimated at 321.1 million kronor, and all crops at 867.4 million kronor. At the end of 1911 Sweden had Number of horses, 588,485, head of cattle, 2,882,609, sheep and lambs, 245,709, pigs, 951,164.

## II MINES AND MINERALS

Mining is one of the most important departments of Swedish industry, and the working of the iron mines in particular is making constant progress by the introduction of new machinery. There were raised in the year 1911, throughout the Kingdom, 6,153,772 tons of iron ore. The pig iron produced amounted to 444,392 tons, the bar iron to 422,176 tons. Of iron ore in 1908 3,196,453, in 1910 4,412,600 tons, in 1911 5,086,898 tons were exported, of pig-iron, 105,654 in 1909, 132,592 in 1910, 150,444 in 1911, of bar iron, 125,996 in 1909, 168,044 in 1910, 158,600 in 1911. There were also raised in 1911 2,999 tons of silver and lead ore, 1,623 tons of copper ore, 51,342 tons of zinc ore, 4,377 tons of manganese ore, and 30,096 tons of sulphur pyrites. The gold produced amounted to 11 020 kilogramms, the silver to 1 289 4, the lead to 1,134,221, the copper to 3,221,193, the zinc to 2,122,841. There are not inconsiderable veins of coal in the southern parts of Sweden, giving 311,809 tons of coal in 1911. In 1911 there were 30,579 persons engaged in mining.

## III INDUSTRIES

The timber and wood work industries of Sweden are of great importance. The public forests (mostly on crown lands), have an area of 8,948,111·24 hectares (not including settlement and crown-farm forests amounting in 1900 to an area of over 1 100,000), and yielded, in 1910, 3,030,546 cubic metres of timber. In 1910 there were in Sweden 1 232 saw mills and planing mills with 39,665 workpeople who turned out sawn or planed timber to the value of 182,456,197 kronor, 519 factories for joinery and furniture with 10,108 work people, the output for the year being valued at 27,058 674 kronor, 166 factories for wood pulp with 13,178 workpeople, output 95,670,173 kronor, and 70 paper and pasteboard mills with 8,100 workpeople, output 53,885,555 kronor. The extent of some other Swedish industries in 1910 is shown in the following table —

Nature of work	Factories	Workpeople	Value of output
			Kronor
Iron and steel, smelting, &c.	658	22,014	94,148,726
Machinery	459	22,210	82,528,521
Flour Mills, &c.	1,384	3,975	106,292,547
Raw-sugar mills	31	6,341	46,290,521
Sugar refineries	10	2 823	65 989 561
Typhoeo factories	192	4,908	22,234,563
Margarine factories	7	452	14,921,952
Brandy distilling	139	424	23 579,896
Factories for the rectifying of brandy	17	219	32,212,062
Breweries	673	5 685	38,973,828
Spinning, cotton	31	5 348	29,983,972
weel	117	3,707	96,352,977
Weaving, cotton	49	6,436	22 012,564
weel	94	3,065	47,459,045
Metal works (other than iron & steel)	237	4,271	27,224,142
Tanneries	245	2,064	23,877,561
Shoe factories	87	6,776	54,119 831

## Commerce.

The total customs duties levied in 1908 amounted to 59,239,293 kronor in 1910 to 61,659,456 kronor, and in 1911 to 61,781,486 kronor.

The treaty of peace and commerce between England and Sweden of 1864 provides for the most favoured nation treatment between the two countries and that of 1826 provides for similar treatment between the United Kingdom on the one hand, and Sweden and Norway on the other.

The imports and exports of Sweden have been as follows (18 16 kroner = £1):—

	1906	1907	1908	1909	1910	1911
Imports	Kronor 644,327,886	Kronor 682,104,918	Kronor 668,932,257	Kronor 616,806,838	Kronor 671,632,596	Kronor 666,616,938
Exports	504,284,818	524,862,247	482,017,467	472,960,132	502,864,140	608,575,618

The following were the values of the leading imports and exports for two years:—

	Imports 1910	Exports 1910	Imports 1911	Exports 1911
	Kronor	Kronor	Kronor	Kronor
Textile manufactures	59,494,880	1,079,047	63,107,270	2,728,426
Corn and flour	55,291,820	1,098,459	78,100,431	6,514,814
Coloured wares	47,678,949	461,788	69,479,382	988,452
Raw textile material and yarn	66,768,816	1,267,966	68,927,089	2,424,791
Minerals, of imports mostly coal	57,920,180	58,028,161	89,409,894	89,044,906
Metal goods, machinery, &c.	67,492,187	59,067,402	74,458,671	70,612,967
Live animals and animal food	24,088,090	76,028,100	22,999,872	67,678,648
Hair, hides, and other animal products	40,414,044	10,697,426	40,808,072	15,640,080
Metals, raw and partly wrought	86,444,440	58,600,983	36,792,719	56,986,746
Timber, wrought and unwrought	16,124,118	964,786,479	16,098,908	274,187,988
Paper and paper manufactures	3,678,087	32,227,798	4,198,426	52,671,881
Other articles	107,383,417	88,299,084	178,652,812	41,690,838
Total	671,632,596 (36,964,1734)	502,864,140 (32,646,7041)	696,616,938 (38,659,9682)	666,616,938 (36,540,6022)

The values of imports and exports are calculated according to average prices in Swedish port, exclusive of Customs duties. For most of these average prices merchants are consulted by the Board of Trade (Kommers-Kollegium), and the values thus obtained are published in the Board's annual report on commerce. The quantities in the Customs returns are most exactly given for imports. For the quantities of exports the statements of exporters are relied on. Imports are recorded as from the country of origin and exports as to the country of ultimate destination.

A new Swedish tariff law came into effect December 1, 1911. It provides for a single tariff instead of the maximum and minimum tariffs now in effect, and authorizes the Government to retaliate for discrimination against Swedish products by imposing surcharges up to 100 per cent. of duty on dutiable goods, and up to the full value of the goods in the case of articles admitted free of duty under the tariff.

A national Swedish trade-mark was introduced (1911) by Sveriges Allmänna Handelsförbund (General Commercial Association of Sweden). The upper half of the mark shows the three royal Swedish crowns on a light-blue ground, and the words "Svensk Tillverkning" (Swedish manufacture) are shown on a light-yellow ground below.

The following table shows the value of the trade with the principal countries with which Sweden deals:—

Country	Imports from (1910)	Exports to (1910)	Imports from (1911)	Exports to (1911)
	Kronor	Kronor	Kronor	Kronor
Great Britain	164,461,933	187,852,051	160,805,218	192,768,287
Germany	281,086,380	124,482,840	244,109,916	138,517,937
Denmark	45,086,501	55,146,264	46,778,811	66,135,728
Norway	21,140,707	28,764,600	20,190,852	37,558,949
Russia (including Finland)	47,252,550	27,744,602	46,096,380	34,346,545
France	28,094,659	42,852,467	32,230,874	48,509,758
Spain	2,725,596	7,562,068	3,667,094	9,580,569
Netherlands	18,378,929	16,091,671	19,394,883	23,926,880
Belgium	9,745,190	16,770,416	9,939,409	18,276,209
United States	53,402,081 <sup>1</sup>	23,636,106 <sup>1</sup>	54,926,884 <sup>1</sup>	25,818,361 <sup>1</sup>
Other countries	50,806,090	62,460,760	58,477,213	73,641,295
Total	671,632,596	592,864,140	696,616,933	663,575,518

<sup>1</sup> Including trade with Canada and Greenland

The following table shows (according to the Board of Trade returns) the chief articles of import into the United Kingdom from Sweden —

	1906	1907	1908	1909	1910	1911
	£	£	£	£	£	£
Wood and timber	4,958,168	4,508,540	8,902,188	3,001,049	4,050,778	3,491,960
Iron, pig and puddled	356,925	427,408	300,961	333,621	859,247	888,844
Bar	833,786	823,437	290,498	254,061	864,533	842,968
Steel ingots, &c.	190,018	186,494	164,929	152,707	175,864	192,295
Other iron and steel	754,959	281,051	27,165	371,440	382,861	420,300
Butter	1,086,638	1,269,870	1,480,769	1,901,085	2,022,398	1,887,770
Paper and board	1,066,465	1,134,538	1,101,765	594,181	958,488	1,225,959
Wood pulp	1,188,924	1,808,216	1,538,974	1,441,425	1,901,490	1,984,819

Total trade between Sweden and U.K. (in thousands of pounds) for 5 years —

	1908	1909	1910	1911	1912
Imports from Sweden to U.K.	36,764	9,724	11,825	11,988	13,231
Exports to Sweden from U.K.	6,859	6,187	6,697	6,847	7,132

### Shipping and Navigation

The Swedish mercantile marine engaged both in the home and foreign trade on January 1, 1911, was as follows —

1910	Sailing		Steam		Total	
	No.	Tonnage	No.	Tonnage	No.	Tonnage
20-100 tons	1,097	68,808	350	15,092	1,347	79,498
100-500 "	496	106,867	501	112,443	996	216,790
500-1,000 "	86	25,006	145	104,132	181	139,180
Above 1,000 tons	7	9,456	318	610,304	325	619,660
Total	1,686	304,624	1,314	842,440	2,849	1,047,064

## INTERNAL COMMUNICATIONS—MONEY AND CREDIT 1283

The port of Göteborg had the largest shipping in the beginning of 1911—namely, 296 vessels of 200,683 tons, and next to it came Stockholm, possessing 259 vessels of a total burthen of 136,677 tons

Vessels entered and cleared with cargoes and in ballast in 1910, as follows —

1909	With Cargoes		In Ballast		Total	
	No	Tonnage	No	Tonnage	No	Tonnage
Entered						
Swedish	1 027	8 771 110	8 771	1 765 998	17 798	5 587 109
Foreign	1 470	262 803	11 967	8 281 070	17 687	5 468 870
Total entered	14 697	6 184 011	20 738	4 997 063	35 435	11 081,979
Cleared						
Swedish	11 647	4 111 908	6 140	1 177 800	17 710	5 289 106
Foreign	9 108	3 648 380	8 689	1 076 311	17 697	5 523 041
Total cleared	20,675	7 560 588	14 787	3 434 811	35 407	11 064,149
Total entered & cleared 1910	35 372	13 603 599	35 470	8 431 379	70 542	22 095 228

### Internal Communications

In 1910 133,498 ships and boats passed through the canals of Sweden

At the end of 1911 the total length of railways in Sweden was 8,877 miles of which 2 770 miles belonged to the State The receipts in 1909 were 126,544,718 kronor and expenses 100,185,869 kronor The total cost of construction for the State railways to the end of 1909 was 502 705,727 kronor, and for private railways 535,239,454 kronor The total number of passengers on the State railways in 1909 was 18,173 613, weight of goods carried on State railways, 10 969,250 tons, private railways, 20,164,840 tons of goods, and 35,612,240 passengers

The length of the telegraph and telephone lines at the end of 1911 was 24,502 miles, 6,560 miles of which belonged to the railways The wires of the State telephone had a length of 177,114 miles, the wires of the private telephone lines a length of 84,827 miles There were 2,904 telegraph offices The number of despatches sent in the year 1911 was 4,380,997 including 980,551 in transit In 1911 there were about 201,500 instruments employed in the telephone service, including 68 700 private telephones

The Swedish Post Office earned 460,123,748 letters, post cards, journals, &c., in the year 1911 The number of post-offices at the end of the year was 3,790 The total receipts of the Post Office in 1911 amounted to 23,260,148 kronor, and the total expenditure to 20,395,816 kronor, leaving a surplus of 2,864,332 kronor

### Money and Credit

The Riksbank, or National Bank of Sweden, belongs entirely to the State and is managed by directors elected for three years by the Diet, except one, the president, who is designated by the King It is a bank of exchange to regulate financial relations with foreign countries, it accepts deposits of money, and on sufficient security it lends money for purposes in which there is no speculative element The Bank is under the guarantee of the Diet, its capital and reserve capital are fixed by its constitution and its note circulation is limited by the value of its metallic stock and its assets in current accounts

at home and abroad, but its actual circulation is kept far within this limit.

The following table gives statistics of the National Bank, private banks, and joint-stock banks in Sweden for January 1, 1912 (16 16 kronor = 1 l). There are fifteen conjointly responsible private banks and sixty-one joint-stock banks (beginning of 1912). Since December 31, 1903, only the Riksbank has the right to issue notes —

Assets	National Bank	Private Banks	Joint-Stock Banks
	Kronor	Kronor	Kronor
Real estate	—	12 03,232	45,374,128
Coins and bullion	89 887 027	15 870 414	34,608 041
Accounts with other banks	68 065,912	51 367,321	51 184,262
State notes and bills	16,066,830	57 348 258	102,861 541

The savings-banks statistics (exclusive of Post Office) are as follows:—

	1908	1909	1910	1911
Number of depositors at end of year	1 508,871	1,530,057	1,578,711	1,681,869
Deposits at end of year, kronor	719,177,673	767,017 769	816,815,819	864,670 668
Capital and reserve fund, ditto.	90,996,512	94,906,256	99,306,137	73 271,869

At the end of 1911 the Post Office Savings Bank had 565,749 depositors and 47,186,406 kronor of deposits.

The Private and Joint-Stock Banks also act as Savings Banks. Their statistics of depositors and deposits are as follows:—

	1908	1909	1910	1911
Number of depositors at end of year	681,512	730,063	784,046	863,345
Deposits at end of year, kronor	261,002,468	361,036,740	378,678,375	364,766,357

## Money, Weights, and Measures

By a treaty signed May 27, 1873, with additional treaty of October 16, 1875, Sweden, Norway, and Denmark adopted the same monetary system.

The Swedish Krona, of 100 ore, is of the value of 1s. 1½d., or about 18 kronor to the pound sterling.

The gold 20 kronor piece weighs 8.960572 grammes, 900 fine containing 8.0846 grammes of fine gold, and the silver krona weighs 7.5 grammes, 900 fine, containing 6 grammes of fine silver.

The standard of value is gold. National Bank notes for 5, 10, 50, 100, and 1000 kronor are legal means of payment and the Bank is bound to exchange them for gold on presentation.

The metric system of weights and measures is obligatory.

## Diplomatic Representatives

### 1 OF SWEDEN IN GREAT BRITAIN

*Envoy and Minister*—Count H. Wrangel

*Councillor*—Baron C. E. Åkerhielm

*Attaché*—Baron C. Hamilton

*Naval Attaché*—Lieut. Comm. E. de Peyron

*Military Attaché*—Capt. E. de Linder

*Chancellors*—J. Stille and J. Kihlman

*Consul-General in London*—Daniel Danielsson

There are Consular representatives at the following places—Belfast, Birmingham, Bradford, Bristol, Cardiff, Cork, Dublin, Dundee, Glasgow, Hartlepool, Hull, Leith, Liverpool, Manchester, Newcastle, Southampton, and many other places.

### 2. OF GREAT BRITAIN IN SWEDEN

*Envoy and Minister*—Esmé W. Howard CVO, CMG (April 15 1913)

*Secretary*—Hon. W. Erskine, MVO

*Honorary Attaché*—Viscount Campden

*Naval Attaché*—Commander W. P. Montague R.N.

*Military Attaché*—Lt. Colonel Hon. A. V. F. Russell, MVO

*Consul at Stockholm*—H. M. Villiers MVO

There are also Consular representatives at Gothenburg, Borgholm, Giflæ, Kalmar, Soderhamn, Visby, Varberg, &c.

## SWITZERLAND

(SCHWEIZ — SUISSE — SVIZZERA )

### Constitution and Government

#### I CENTRAL

On August 1, 1291 the men of Uri, Schwyz, and Lower Unterwalden, entered into a defensive League. In 1353 the League included eight members, and in 1513 thirteen. Various allied and subject territories were acquired either by single cantons or by several in common, and in 1648 the League became formally independent of the Holy Roman Empire, but no addition was made to the number of cantons till 1798. In that year, under the influence of France, the unified Helvetic Republic was formed. This failed to satisfy the Swiss and in 1803 Napoleon Bonaparte, in the Act of Mediation, gave a new constitution and out of the lands formerly allied or subject increased the number of cantons to nineteen. In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, Great Britain, Portugal, Prussia, and Russia, and the Federal Pact which had been drawn up at Zurich, and which included three new cantons was accepted by the Congress of Vienna. The Pact remained in force till 1848, when a new constitution, prepared without foreign interference was accepted by general consent. This in turn was, on May 29 1874 superseded by the constitution which is now in force.

The constitution of the Swiss Confederation may be revised either in the ordinary forms of Federal legislation with compulsory *referendum* or by direct popular vote a majority both of the citizens voting and of the cantons being required and the latter method may be adopted on the demand (called the *popular initiative*) of 50,000 citizens with the right to vote. The Federal Government is supreme in matters of peace, war, and treaties, it regulates the army, the postal and telegraph system, the coming of money, the issue and repayment of bank notes, and the weights and measures of the Republic. It provides for the revenue in general and especially decides on the import and export duties in accordance with principles embodied in the constitution. It legislates on matters of civil capacity, copyright, bankruptcy, patents, sanitary police in dangerous epidemics, and it may create and subsidize, besides the Polytechnic School at Zurich, a Federal University and other higher educational institutions. There has also been entrusted to it the authority to decide concerning public works for the whole or great part of Switzerland, such as those relating to rivers, forests, and the construction of railways.

The supreme legislative and executive authority are vested in a parliament of two chambers, a 'Ständerath, or State Council, and a 'Nationalrath, or National Council. The first is composed of forty-four members, chosen and paid by the twenty-two cantons of the Confederation, two for each canton. Their remuneration depends on the wealth and liberality of the cantons, the average being about 20 francs (16s) per day, representatives from the canton of Geneva receive 30 francs (25s), from Uri and from Unterwalden 15 francs (12s 6d) per day. The mode of their election and the term of membership depend

entirely on the canton. Three of the cantons are politically divided—Basel into Stadt and Land, Appenzell into Auser Rhoden and Inner Rhoden, and Unterwald into Obwald and Nidwald. Each of these parts of cantons sends one member to the State Council, so that there are two members to the divided as well as to the undivided cantons. The 'Nationalrath' consists of 167 representatives of the Swiss people, chosen in direct election, at the rate of one deputy for every 20 000 souls. The members are paid from Federal funds at the rate of 20 francs for each day on which they are present, with travelling expenses, at the rate of 20 centimes (2d.) per kilometre, to and from the capital. Members employed on commissions receive additional pay at the same rate. On the basis of the general census 1910, the cantons are represented in the National Council as follows —

Canton	Number of Representatives	Canton	Number of Representatives
Zürich (Zurich)	25	Appenzell—Exterior and Interior	4
Bern (Berne)	32	St. Gallen (St. Gall)	15
Lucern (Lucerne)	8	Graubünden (Grisons)	6
Uri	1	Aargau (Argovie)	12
Schwyz	3	Thurgau (Thurgovie)	7
Unterwald—Upper and Lower	2	Ticino (Tessin)	8
Glarus (Glaris)	2	Vaud (Waadt)	16
Zug (Zoug)	1	Valais (Wallis)	6
Fribourg (Freiburg)	7	Neuchâtel (Neuenburg)	7
Solothurn (Soleure)	6	Genève (Genf)	8
Basel (Bâle)—town and country	11	Total	169
Schaffhausen (Schaffhouse)	2		

A general election of representatives takes place by ballot every three years. Every citizen of the Republic who has entered on his twenty-first year is entitled to a vote; and any voter, not a clergyman, may be elected a deputy. Both chambers united are called the 'Bundesversammlung,' or Federal Assembly, and as such represent the supreme Government of the Republic. The first step towards legislative action may be taken by means of the popular initiative, and laws passed by the Federal Assembly may be vetoed by the popular voice. Whenever a petition demanding the revision or annulment of a measure passed by the Legislature is presented by 30,000 citizens, or the alteration is demanded by eight cantons, the law in question must be submitted to the direct vote of the nation. For the decision of the question submitted a majority both of the cantons and of the voters is required. This principle, called the *referendum*, is frequently acted on. The chief executive authority is devolved to a 'Bundesrath,' or Federal Council, consisting of seven members, elected for three years by the Federal Assembly. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. It is only through this executive body that legislative measures are introduced in the deliberative councils, and its members are present at, and take part in their proceedings, but

do not vote. Every citizen who has a vote for the National Council is eligible for becoming a member of the executive.

The President of the Confederation and the Vice President of the Federal Council are the first magistrates of the Confederation. Both are elected by the Federal Assembly in joint session of the National and State councils for the term of one year, January 1 to December 31, and are not re-eligible to the same offices till after the expiration of another year. The Vice-President, however, may be and usually is, elected to succeed the outgoing President.

*President for 1913*—M. Edouard Müller (Bern) Born 1848

*Vice President*.—Arthur Hoffmann (St. Gall) Born, 1857

The seven members of the Federal Council—each of whom has a salary of 480*l.* per annum, while the President has 540*l.*—act as ministers, or chiefs of the seven administrative departments of the Republic. These departments are—1 Foreign Affairs 2 Interior 3 Justice and Police 4 Military 5 Finance and Customs. 6 Agriculture and Industry 7 Posts and Railways. The city of Bern is the seat of the Federal Council and the central administrative authorities.

## II LOCAL GOVERNMENT

Each of the cantons and demi cantons of Switzerland is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution; each has its local government, different in its organisation in most instances, but all based on the principle of absolute sovereignty of the people. In a few of the smallest cantons, the people exercise their powers direct, without the intervention of any parliamentary machinery, all male citizens of full age assembling together in the open air, at stated periods, making laws and appointing their administrators. Such assemblies, known as the Landsgemeinden, exist in Appenzell, Glarus, Unterwald, and Uri. In all the larger cantons, there is a body chosen by universal suffrage, called der Grosse Rath, which exercises all the functions of the Landsgemeinden. In all the cantonal constitutions, however except that of Freiburg and those of the cantons which have a Landsgemeinde, the referendum has a place. This principle is most fully developed in Zurich, where all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revision of the constitution, must be submitted to the popular vote. In many of the cantons, the popular initiative has also been introduced. The members of the cantonal councils, as well as most of the magistrates, are either honorary servants of their fellow citizens, or receive a merely nominal salary. In each canton there are districts (Amtsbezirke) consisting of a number of communes grouped together, each district having a Prefect (Regierungsrath) representing the canton. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, maire or syndic, and not less than 4 other members. In the smaller communes there is a council only, with its proper officials.

## Area and Population

### I. PROGRESS AND PRESENT CONDITION

Area and population, December 1, 1900, and population December 1, 1910. The cantons are given in the official order, and the year of the entrance of each into the league or confederation is stated. —

Canton	Area sq miles	Population		Pop per square mile, 1910
		Dec. 1, 1900	Dec. 1 1910	
Zurich (Zurich) (1851)	668	481,086	500,679	751.7
Bern (Berne) (1854)	2,657	589,438	642,744	241.9
Lucerne (Lucerne) (1832)	579	146,159	166,782	288.0
Uri (1291)	416	19,700	22,055	58.1
Schwyz (1291)	351	55,385	58,347	166.2
Obwalden (Unterwalden le Haut) (1291)	183	15,260	17,118	93.5
Nidwalden (Unterwalden le Bas) (1291)	112	13,070	13,796	123.1
Glarus (Glarus) (1352)	267	32,349	33,211	124.3
Zug (Zoug) (1352)	92	25,093	28,013	304.5
Fribourg (Freiburg) (1481)	644	127,951	139,200	216.1
Solothurn (Soleure) (1481)	302	100,762	116,728	386.6
Basel-Stadt (Bâle V ) (1501)	14	112,227	135,546	9,681.9
Basel Land (Bâle C ) (1501)	163	63,497	76,241	467.7
Schaffhausen (Schaffhouse) (1501)	114	41,514	45,943	408.0
Appenzell A. Rh. (Ext ) (1513)	101	55,281	57,723	572.0
Appenzell I. Rh. (Int.) (1513)	61	13,499	14,631	239.8
St. Gallen (St. Gall) (1803)	779	250,285	301,141	385.0
Graubünden (Grisons) (1803)	2,778	104,520	118,262	42.6
Aargau (Argovie) (1803)	542	206,498	229,850	424.0
Thurgau (Thurgovie) (1803)	881	113,221	134,055	351.8
Ticino (Tessin) (1803)	1,088	138,638	158,556	145.7
Vaud (Waadt) (1803)	1,244	281,379	316,428	253.5
Valais (Wallis) (1815)	2,027	114,438	129,579	63.9
Neuchâtel (Neuenburg) (1815)	312	126,279	132,184	423.6
Genève (Genf) (1815)	108	132,609	154,159	1,427.3
Total	15,976	3,315,443	3,741,971	234.8

The German language is spoken by the majority of inhabitants in 15 of the 22 cantons, the French in five, the Italian in one (Ticino), and the Romansch and Italian together in one (Graubünden). In 1910 2,599,154 spoke German, 796,244 French, 301,325 Italian, and 89,834 Romansch. The number of foreigners resident in Switzerland in 1910 was 565,296.

The following statistics show the preliminary results of the Swiss Federal census of 1911 regarding Swiss factory enterprises —

Trades	Factories	Employees		
		Male	Female	Total
Cotton trades	226	11,617	17,992	29,609
Silk industry	215	735	28,892	31,537
Woollen industry	87	2,190	3,185	5,375
Linen industry	24	440	567	1,007
Embroidery	266	11,787	16,322	28,109
Other textile trades	172	1,517	2,682	4,199
Clothing and outfitting	669	5,789	16,061	21,850
Provisions and alimentary trades	694	13,440	12,694	26,134

Trades	Factories	Employees		
		Male	Female	Total
Chemical industry	198	6 907	1 725	8,692
Centrals for power, gas, and water	268	4 254	1	4 255
Paper and graphic trades	826	13,927	4,980	18 187
Woodworking trades	1,288	28 838	432	29 270
Metal working	823	1 895	1 480	23 825
Machinery apparatus etc.	640	46 213	1 722	46 485
Jewellery and watchmaking	846	21 445	19 638	34 983
Clay and stone trades	441	17 160	1 000	18 160

Of the persons exercising a profession in 1900, 187,446 (140,939 men and 46,507 women) were foreigners, having 168 729 foreigners (47,876 male and 118,853 female) dependent on them, total foreigners dependent on occupation, 354,175

## II MOVEMENT OF POPULATION

Years	Total Births	Stillbirths	Marriages	Deaths and Stillbirths	Surplus of Births over Deaths
1906	98 971	3 306	98 220	62 571	86 400
1907	97 892	3 195	27 660	62 445	85 247
1908	99 464	3 228	27 687	60 920	88 544
1909	97 296	3 184	27 390	6 600	84 700
1910	96 669	3 154	97 344	59 678	86 991

In 1910 the illegitimate births numbered 4,417 or 4.6 per cent. The number of divorces was 1,527

The number of emigrants in five years was —1907 5,710 1908, 3,656 1909 4,918, 1910 5,178, in 1911, 5,512 in 1912 5 871

## III PRINCIPAL TOWNS.

On December 1, 1910, the population of the principal towns was as follows —Zurich, 189,088, Basel 181,914 Geneva, 125 520, Bern, 85,264, Lausanne, 68,926, St. Gallen, 37,657 Chaux de Fonds 37,656, Luzern, 39,152, Biel, 23,583 Winterthur 25 036 Neuchâtel, 23,505

## Religion.

There is complete and absolute liberty of conscience and of creed. No one is bound to pay taxes specially appropriated to defraying the expenses of a creed to which he does not belong. No bishoprics can be created on Swiss territory without the approbation of the Confederation. The order of Jesuits and its affiliated societies cannot be received in any part of Switzerland, all functions clerical and scholastic are forbidden to its members, and the interdiction can be extended to any other religious orders whose action is dangerous to the State, or interferes with the peace of different creeds. The foundation of new convents or religious orders is forbidden.

According to the census of December 1, 1910 the number of Protestants amounted to 2,108,590, of Roman Catholics to 1,590,792, and of Jews to 19,088. Protestants are in a majority in 12 of the cantons, and Catholics in 10. Of the more populous cantons, Zürich, Bern, Vaud, Neuchâtel, and

Basel (town and land) are mainly Protestant, while Luzern, Fribourg, Ticino, Valais and the Forest Cantons are mainly Catholic. The Roman Catholic priests are much more numerous than the Protestant clergy, the former comprising more than 6,000 regular and secular priests. They are under five bishops, viz., of Basel and Lugano (resident at Solothurn) Chur, St Gallen, Lausanne and Geneva (resident at Freiburg), and Sitten (Sion), all of them immediately subject to the Holy See. The government of the Protestant Church, Calvinistic in doctrine and Presbyterian in form, is under the supervision of the magistrates of the various cantons, to whom is also entrusted, in the Protestant districts, the superintendence of public instruction.

### Instruction.

In the educational administration of Switzerland there is no centralization. Before the year 1848 most of the cantons had organized a system of primary schools, and since that year elementary education has steadily advanced. In 1874 it was made obligatory (the school age varying in the different cantons), and placed under the civil authority. In some cantons the cost falls almost entirely on the communes, in others it is divided between the canton and communes. In all the cantons primary instruction is free. In the north-eastern cantons, where the inhabitants are mostly Protestant, the proportion of the school attending children to the whole population is as one to five, while in the half Protestant and half Roman Catholic cantons it is as one to seven, and in the entirely Roman Catholic cantons as one to nine. The compulsory law has hitherto not always been enforced in the Roman Catholic cantons, but is rigidly carried out in those where the Protestants form the majority of inhabitants. In every district there are primary schools, and secondary schools for youths of from twelve to fifteen. Of the contingent for military service in 1910 1 per cent. could not read, and 3 per cent. could not write.

The following are the statistics of the various classes of educational institutions for 1910-11 —

	Schools	Teachers	Pupils
Infant schools	1,153	1,505	8,448
Primary schools	4,812	12,485	544,152
Secondary schools	656	2,118	67,570
Middle schools (preparatory)	43	1,128	14,798
Normal schools (private and public)	49	584	8,859

There were also improvement schools with 41,464 pupils, schools for girls with 1,847, gymnasia with 7,847. In 1911-12 there were commercial schools with altogether 3,987 pupils, industrial schools with 4,951 pupils, technical schools with 1,355 pupils, 448 schools for the instruction of girls in domestic economy and other subjects, agricultural schools with 1,161 pupils, schools for horticulture, for viticulture, for arboriculture, and for dairy management. In 1910, 8 institutions for the blind had 326 inmates, 15 for the deaf and dumb had 738. 25 for the feeble minded had 1,381. In the 87 reformatories of Switzerland in 1910, there were 1,627 children under instruction. The expenditure on instruction in 1911 was by the State, 41,800,000 francs, by the communes, 44,000,000 francs, total, 85,800,000 francs.

There are seven universities in Switzerland. These universities are organized on the model of those of Germany, governed by a rector and a senate, and divided into four 'faculties' of theology, jurisprudence, philo-

sophy, and medicine. There is a Polytechnic School, maintained by the Federal Government, at Zurich, with a teaching staff of 185 and 1,386 matriculated students, in 1909. The academy of Neuchâtel was transformed into a university in May, 1909, but without the faculty of medicine. The following table shows the year of foundation of each university, the number of teaching staff and of matriculated students in the various branches of study in each of the seven universities in the winter of 1912-13 —

	Theology	Law	Medicine	Philosophy	Total	Teaching Staff
Basel (1480)	81	74	230	414	799	179
Zurich (1332)	88	289	404	610	1,383	158
Bern (1854)	86	412	473	680	1,453	146
Geneva (1669 & 1878)	30	280	76	566	1,501	158
Lausanne (1867 & 1869)	16	758	293	489	1,056	131
Fribourg (1889)	244	111	—	44	608	92
Neuchâtel (1864 & 1909)	10	67	—	109	286	57

<sup>1</sup> As an Academy

- As a University

These numbers are exclusive of 'hearers' but inclusive of over 1,100 women students

## Justice and Crime

The 'Bundes-Gericht, or Federal Tribunal, which sits at Lausanne, consists of 19 members, with 9 supplementary judges, appointed by the Federal Assembly for six years, the President and Vice President, as such, for two years. The President has a salary of 13,000 francs a year and the other members 12,000 francs. The Tribunal has two sections, to each of which is assigned the trial of suits in accordance with regulations framed by the Tribunal itself. It has original and final jurisdiction in suits between the Confederation and cantons, between cantons and cantons, between the Confederation or cantons and corporations or individuals, the value in dispute being not less than 3,000 francs, between parties who refer their case to it, the value in dispute being at least 3,000 francs, and also in such suits as the constitution or legislation of cantons places within its authority. There are also many classes of railway suits which it is called on to decide. It is a Court of Appeal against decisions of other Federal authorities, and of cantonal authorities applying Federal laws. The Tribunal also tries persons accused of treason or other offences against the Confederation. For this purpose it is divided into four chambers: the Chamber of Accusation, the Criminal Chamber (Cour d'Assises), the Federal Penal Court, and the Court of Cassation. The jurors who serve in the Assize Courts are elected by the people, and are paid ten francs a day when serving.

Each canton has its own judicial system for ordinary civil and criminal trials.

On December 31, 1910, the prison population (condemned) of Switzerland consisted of 4,210, of whom 511 were women.

Capital punishment exists in Appenzell A. Rh., Obwalden, Uri, Schwyz, Zug, St. Gallen, Lucerne, Valais, Schaffhausen, and Freiburg.

## Social Insurance

The Swiss Federal Insurance Law (insurance against illness and accident), as passed by both Chambers on June 13, 1911, was accepted by the electors of the Republic with a small majority. The total number of votes cast was 533,781 of which 285,937 were for and 247,844 against the measure.

All Swiss citizens are entitled to insurance against illness, and foreigners also may be admitted to the benefits of the law. Compulsory insurance against illness does not exist as yet, but cantons and communities are entitled under the act to declare obligatory insurance for certain classes or in general, to establish public benefit (sick fund) associations, and to make employers responsible for the payment of the premiums of their employees.

Insurance against accident is compulsory for all officials, employees, and workmen of all the factories, trades, &c. which are under the Federal liability law. Every person above the age of 14 can insure voluntarily at the Federal insurance administration (or at any insurance corporation).

## Finance

The entire net proceeds of the Federal alcohol monopoly (259,600*L.* in 1913) are divided among the cantons, and they have to expend one tenth of the amount received in combating alcoholism in its causes and effects. Of the proceeds of the tax for exemption from military service, levied through the cantons, one half goes to the Confederation and the other to the cantons.

Revenue and expenditure for six years —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	<i>S.</i>	<i>S.</i>		<i>S.</i>	<i>L.</i>
1907	5 896 570	5 872 400	1910	6 674,008	5 458 221
1908	5 895 640	6 035 170	1911	3 911 764	5 081 847
1909	6 327 140	7 858 710	1912	8 710 400	8 838 300

The following table gives the budget estimates for 1913 —

Source of Revenue	Francs	Branch of Expenditure	Francs
Real Property	1 994 714	Debt, Total Charge	8,076 000
Capital invested	4,659,972	General administration	1 008,400
General administration	129,800	Departments —	
Departments —		Political	1 162 297
Political	22,000	Interior	17 118 547
Interior	119 350	Justice and Police	2,844 500
Justice and Police	1 008,000	Military	44,286 277
Military	8 746,100	Finance and Customs	9,618 830
Financial —		Commerce, Industry, and	
Finance and Customs	83,754 000	Agriculture	16,804,430
Commerce, Industry, and		Ports and Railways	679,000
Agriculture	1,063,000	Miscellaneous	2 066 299
Ports and Railways	2,216 060		
Miscellaneous	13 014		
Total	98,725 000 (8,949 000 <i>L.</i> )	Total	108 155,000 (4,126,300 <i>L.</i> )

The public debt of the Confederation amounted, on January 1, 1910, to 4,977,200*L.*, mostly at 3½ per cent. The debt charge for 1909 amounted

to 251,885*l* (of which 188,000*l* was for redemption of debt) At the same date the 'Federal Fortune' or State property, was real property, 2,695,295*l*, stock, &c, 1,309,460*l*, works producing interest, 1,868,990*l*, stores not producing interest, 938,580*l*, various debts, 78,670*l*, inventory, 2,145,740*l*, Swiss National Bank 425,740*l*, cash, 15,820*l*, total, 9,465,310*l*, the net Fortune being thus 4,977,190*l*

## Defence

There are fortifications on the south frontier for the defence of the St Gothard pass others have been constructed at St Maurice and Martigny in the Rhone Valley

Switzerland depends for defence upon a *national militia* Service in this force is compulsory and universal, with few exemptions except for physical disability Those excused or rejected pay certain taxes in lieu Liability extends from the 17th to the end of the 48th year, actual service commencing at the age of 20 The first 12 years are spent in the first line, called the 'Auszug,' or 'Élite', the next 8 in the Landwehr, and the remaining 8 in the Landsturm For cavalry, however service is 11 years in the Auszug and 12 in the Landwehr The Landsturm only includes men who have undergone some training The unarmed Landsturm comprises all other males between 20 and 50 whose services can be made available for non combatant duties of any description

The initial training of the Swiss militia soldier is carried out in recruits schools, and the periods are 65 days for infantry, engineers, and foot artillery 75 days for field artillery, and 90 days for cavalry The subsequent trainings, called 'repetition courses, are 11 days *annually* but after going through seven courses (8 in the case of the cavalry) further attendance is excused for all under the rank of sergeant The Landwehr men are only called out once for training, also for 11 days

The country is divided into 6 divisional districts The field army formed of the *Élite*, is to consist of 6 divisions, 3 cavalry brigades, and 8 mountain brigades A division consists of 3 brigades each of 2 regiments consisting of 2 or 3 battalions 1 cyclist company, 6 batteries of field artillery, 2 howitzer batteries, 2 squadrons of guides, and 1 battalion of sappers A cavalry brigade consists of 2 regiments A mountain brigade consists of 2 or 3 battalions, 2 mountain batteries, and 1 company of sappers Altogether there are 108 battalions 40 field batteries, 12 howitzer batteries, 6 mountain batteries, and 8 cavalry regiments (each of 3 squadrons) besides 12 squadrons of guides There is a staff organisation on paper for three army corps There are the usual departmental troops, pontoon and railway corps, telegraph troops, &c

The total number of combatants in the field army may be taken at 140,000 There are also *separate* forces, mostly Landwehr, for manning the fortifications which close the St Gothard Pass and the Rhone Valley to a possible invader from the south They amount to about 21,000 men The Landwehr is organised in 60 battalions and 24 squadrons Altogether Switzerland can mobilise nearly 200,000 men (combatants), irrespective of the organised Landsturm, who may amount to another 60,000

The administration of the Swiss army is partly in the hands of the Cantonal authorities, who promote officers up to the rank of captain. But the Federal Government is concerned with all general questions, and makes all the higher appointments.

The following table shows the strength of the Swiss troops (Aussug and Landwehr) in 1912

Troops		Aussug or SRs	Landwehr	Total
Staffs				1 233
Infantry	Aussug 106 battalions	96 180		147 100
	Landwehr 37 battalions	—	50 974	
Cavalry	Aussug, 86 squadrons and 4 maxim detachments	5 369		9,920
	Landwehr 36 squadrons		4 377	
Artillery	Aussug, 78 field and mountain batteries	26 304		85,800
	19 position companies			
	18 fortress companies (partly Landwehr)			
	Landwehr, 15 position companies			
	Parks and ammunition companies		9 400	
Engineers	Aussug, altogether 28 companies	5,875		7 406
	Landwehr altogether 24 companies		1 531	
Medical and other subsidiary services		9,196	3 301	12 497
Total		143,230	60,660	214 082

The Swiss infantry are armed with the Swiss repeating rifle. The field artillery has now been completely rearmed with a Q. F. shielded gun 7.5 cm calibre. The position artillery has batteries of 8.4 and 12 cm. guns.

The total expenditure on the army now amounts to not less than 43 million francs (1,720 000 l.) yearly, a sum relatively large, being nearly one third of the total Federal budget. A sum of 220,000 l. was granted in 1910 for the fortifications of the St. Gothard Pass and St. Maurice.

### Production and Industry

The soil of the country is very equally divided among the population, it being estimated that there are nearly 300,000 peasant proprietors, representing a population of about 2,000,000.

Of the total area 23.4 per cent. is unproductive, of the productive area 35.3 per cent. is under grass and meadows, 29 per cent. under forest, 18.7 per cent. under fruit, 16.4 per cent. under crops and gardens. Rye, oats, and potatoes are the chief crops, but the bulk of food crops consumed in the country is imported. The area and yield of the principal crops for 5 years were as follows:—

	Area			Yield		
	1908	1910	1911	1909	1910	1911
Wheat	Acres 185,983	Acres 104,728	Acres 104,042	Cwts. 1,910,780	Cwts. 1,475,893	Cwts. 1,337,668
Barley	11,544	13,543	12,800	307,669	166 394	194,433
Oats	80,789	83,632	84,031	1,372,222	1,232,760	1,253,771
Rye	26 266	20,321	20,307	297 798	304,321	212,717
Maize	2 371	2,311	2,234	62 971	47,225	60,410
Vines	68,473	68,670	52,339	2,963,968 <sup>1</sup>	6,803,313 <sup>1</sup>	12,804,990 <sup>1</sup>

<sup>1</sup> Gallons of wine.

The chief agricultural industries are the manufacture of cheese and condensed milk. Wine is produced in five of the cantons, tobacco in three. In 1911 (last census) there were in Switzerland, 143,723 horses, 1,448,871 cattle, 159,727 sheep, 669,268 pigs, 339,997 goats, beehives, 228,983.

The Swiss Confederation has the right of supervision over the police of the forests, and of framing regulations for their maintenance. The entire forest area of Switzerland is 3,290 square miles, or 2,105,214 acres in extent (comprising 91,587 acres of cantonal forest, 1,403,772 acres belonging to municipalities and other corporations, and 609,855 acres of private forests). The district over which the Federal supervision extends lies to the south and east of a tolerably straight line from the eastern end of the Lake of Geneva to the northern end of the Lake of Constance. It comprises about 1,119,270 acres, and the Federal forest laws apply to all cantonal, communal, and municipal forests within this area, those belonging to private persons being exempt, except when from their position they are necessary for protection against climatic influences. In 1878 it was enacted that this forest area should never be reduced, servitudes over it, such as rights of way of gathering firewood, &c., should be bought up, public forests should be surveyed, and new wood planted where required, subventions for the purpose being sanctioned. In the year 1912, 20,958,196 trees (chiefly coniferous) were planted, while timber amounting to 2,061,644 cubic metres was cut. The free forest districts comprise 1,477 square miles.

There were, in 1912, 192 establishments for pisciculture, which produced fry of various species to the number of 82,104,650.

Switzerland though in the main an agricultural country, has a strong tendency to manufacturing industry. There are 5 salt mining districts, that at Bex (Vaud) belongs to the Canton but is worked by a private company, that at Schweizerhalle (Basel) is worked by the Glenck family, those at Rheinfelden, Ryburg, and Kaiseraugst (Aargau) are worked by a joint-stock company, in virtue of a concession from the Canton. The output of salt of all kinds in 1910 reached 621,491 quintals. From the various cement works the output in 1910 amounted to 757,503 metric tons. In 1912 there were 8,098 factories in Switzerland (7,907 in 1911). The number of persons employed (1911) was 328,841 (211,077 males and 117,764 females), the motive machinery had 515,859 horse power. In 1910, 146 breweries produced 2,507,222 hectolitres of beer.

## Commerce

The special commerce, including precious metals, was as follows in five years —

	1908	1909	1910	1911	1912
Imports	£ 61,359,064	£ 65,017,381	£ 69,801,000	£ 72,094,859	£ 78,549,418
Exports	£ 42,392,115	£ 45,502,806	£ 47,835,000	£ 50,392,874	£ 54,803,066

The following table shows the value of special commerce in 1911 and 1912:—

Merchandise	Imports (1912)	Exports (1912)	Imports (1911)	Exports (1911)
	Francs	Francs	Francs	Francs
Cereals	231,062,966	0 508 641	219 706 718	0 125,463
Fruits and vegetables	41 708 835	6 482,155	41 606 480	2,451 498
Colonial produce	107 828,794	85,487,293	94,850 155	47 844,621
Animal food substances	110 236 922	118,717 470	106,729 481	108 184 400
Tobacco	18,471 542	4,207 186	21 857 845	6,102,813
Beverages	87 732,948	2,912,526	55 517 959	8,017 687
Animals, living	78 668,774	15 259 901	78 402 552	12,674 784
Hides and skins	54 712,555	39 843 447	48 624 919	34,119,810
Timber	60 977 092	7 467 518	49 847 804	7,561 144
Cotton goods	184 306 934	270 906 448	121 955 776	206 087 276
Linen, hemp, &c. goods	24 184 846	8,658 585	21,808 975	8 774,862
Silk goods	180 010 947	0 18,257 683	168 840 244	258,641 682
Woolen goods	77 507 859	24 630 759	76 799 308	28 215 049
Clothing ready made	90 702,674	20 726 089	54 658,548	18 686,409
Mineral substances	117 754,562	18 904 789	111,558 010	12 021,998
Iron work	111,489 293	31,378 244	98 702 844	26 781 182
Copper work	31 946 092	10 205 290	28 183 778	6,478 468
Gold and silver bullion	3 892,824	9 795	8 102,565	12,559
Machinery	54 454 176	92 089 829	43,950 280	68 361 128
Clocks	1,212,430	160 603,035	1 421,825	152,242 781
Chemicals	45 711 27	19,174 121	41 072 889	16 379 656
Groceries, oils, &c.	97 138 702	2,427 871	26 592,229	1 649 794
Total incl. other merchandise	1 003 730 412	1 837 696 070	1 806 358 995	1 937 300 404

In Switzerland for the majority of imports, the values are fixed by a commission on Exports nominated by the Customs department. Up to 1891 a single value was fixed for each class of goods, but the Commission now takes into account the difference of prices in different countries of origin. For values of exports declarations are, in general considered sufficient. Returns show the net weight, though the gross weight also is declared. It is sought to record as the country of origin the country of production and as the country of destination that where the goods are to be consumed. When exact information is not available the most distant known points of transit are recorded. In accordance with this system, Swiss returns show as far as can be ascertained the trade between the Confederation and Great Britain, though, since direct commercial intercourse is impossible the name of Switzerland does not occur in the trade returns of the United Kingdom. The treaty of 1865 provides for the most favoured nation treatment in respect of commerce residence and other matters affecting Swiss and British interests.

The customs duties amounted in 1909 to 74,222 011 francs 1910 to 80 660,289 francs in 1911 86 929 346 francs in 1912, to 86 979,258 francs

The following table, in thousands of francs, shows the distribution of the special trade of Switzerland (including bullion but not coin). Much of the trade with the frontier countries is really of the nature of transit trade —

	Imports from (1910)	Imports from (1911)	Exports to (1910)	Exports to (1911)
	1 000 Francs	1 000 Francs	1,000 Francs	1,000 Francs
Germany	565,729	531,806	270 166	274,879
France	548,561	529 688	180,046	152,627
Italy	208,068	190 629	65,893	85,284
Austria-Hungary	110,748	112,824	80,073	85 945
Great Britain	112,677	99,887	200,255	212 990
Belgium	16,961	88,620	22,911	25,327
Russia	63,616	69 580	41,812	45,064
Holland	15,729	28,983	8,677	9,871
United States	—	75,085	—	141,228

Total trade between Switzerland and the United Kingdom (in thousands of pounds) for five years —

	1907	1908	1909	1910	1911
Imports from Switzerland into U K	3,401	7,914	8,501	9,812	10,085
Exports to Switzerland from U K.	2,618	2,814	2,861	3,871	3,934

### Internal Communications

In 1912 the State railways of Switzerland had a length of 2,238 miles, and the privately owned railways 1,176. There are also 42 miles of foreign railways within the Confederation. The cost of construction of the railways up to the end of 1911 was 1,935,969,869 francs (77,438,794*l*). There were carried (1912) 18,257,031 tons of goods and 105,675,536 passengers. The receipts from traffic of all the Swiss railways amounted to 214,319,713 francs (8,572,788*l*). The working expenses amounted to 128,406,969 francs (5,136,278*l*). Five of the principal Swiss railways have been acquired by the Confederation. The traffic on the Swiss waters in 1912 was carried on by 285 boats or barges belonging to 19 companies.

In 1912 there were in Switzerland 2,093 post offices and 1,926 letter boxes. By the internal service there were forwarded 175,435,129 letters, 87,100,792 post-cards, 68,780,150 packets of printed matter, 1,206,206 samples, 200,682,733 newspapers, and 6,540,498 registered parcels, &c. In the international service there were forwarded 29,217,052 letters, 22,291,841 post-cards, 16,558,195 packets of printed matter, 1,686,603 samples, 2,374,285 newspapers and 2,312,453 registered parcels, &c. Internal post-office orders were sent to the amount of 815,538,418 francs, and international sent and received to the amount of 167,155,241 francs. Receipts, 1912, 64,867,567 francs (2,574,702*l*), expenditure, 61,853,678 francs (2,474,147*l*).

Switzerland has a very complete system of telegraphs, consisting (1912) of 2,186 miles of line with 16,449 miles of wire. There were transmitted 1,706,507 inland telegrams, 3,155,773 international, and 1,438,809 in transit through Switzerland. Number of offices, 2,291. There were 442 telephone systems with 11,349 miles of line and 198,399 miles of wire, conversations, 55,474,572. The telegraph and telephone receipts in 1912 amounted to 18,541,804 francs (741,672*l*), the expenditure to 17,532,229 francs (701,288*l*).

### Money and Credit

In 1912 the issue of coin was of the nominal value of 18,740,000 francs (gold, 11,000,000 francs, fractional silver, 2,000,000, nickel and bronze, 740,000).

There were in Switzerland in 1912, 42 banks with an aggregate paid up capital of 244,750,000 francs. Note circulation amounted to 6,818,000 francs.

Banks of issue are subject to Federal inspection. The new National Bank, with headquarters divided between Bern and Zurich, opened its doors on June 20, 1907. It will ultimately have the exclusive right to issue bank notes in Switzerland, the existing banks being allowed 3 years to withdraw their note issue. On December 31, 1912, there were notes of the bank in circulation to the extent of 371,813,000 francs.

### Money, Weights, and Measures

The *Franc* of 10 *Batsen*, and 100 *Rappen* or *Centimes*

Average rate of exchange, 25·22½ francs = £1 sterling

The 20-franc piece is 900 fine, the 5 franc silver piece is 900 fine, the silver 2 franc, franc, and half franc are 835 fine. Switzerland belongs to the Latin Monetary Union, but since Italy is exonerated from taking back its exported fractional coin in case of the dissolution of the Union, the importation into Switzerland of 2 franc, 1 franc, and ½ franc pieces is prohibited by decree of February 21, 1899, on pain of confiscation. By a Convention of November 15 1902, with the other States within the Union, Switzerland may coin, exceptionally, 12,000,000 francs in fractional silver pieces, but the issues must be spread over at least 6 years.

The *Centner*, of 50 *Kilogrammes* and 100 *Pfund* = 110 lbs. avoirdupois. The *Quintal* = 100 *Kilogrammes* = 220 lbs. avoirdupois. The *Arpent* (Land) = 8 9ths of an acre.

The *Pfund*, or pound, chief unit of weight, is legally divided into decimal *Grammes*, but the people generally prefer the use of the old halves and quarters, named *Halbpfund*, and *Vierthelfund*

### Diplomatic and Consular Representatives.

#### 1 OF SWITZERLAND IN GREAT BRITAIN.

*Envoy and Minister* —M. Gaston Carlin

*Secretary* —Ch. Paravicini,

*Councillor of Legation*.—M. Theo Ritter

#### 2. OF GREAT BRITAIN IN SWITZERLAND

*Envoy Extraordinary and Minister Plenipotentiary* —

*Secretary* —Robert H. Chve

*Military Attaché*.—Colonel Edward John Granet, C B

*Commercial Attaché*.—Sir H Austin Lee, b C M G C B (also at Paris)

*Consul General at Zurich* —Sir H Angat, K C M G

There are Consuls at Bern, Geneva, Lausanne, Lucerne, Davos, and St. Moritz. Vice Consuls at Zurich, Montreux, Bale, St. Gall, Lugano, and Neuchâtel.

## TURKEY AND TRIBUTARY STATES

(OTTOMAN EMPIRE.)

### Reigning Sultan

**Mohammed V.**, born November 3, 1844 (21 Shavval 1260), son of Sultan Abdul Medjid succeeded to the throne on the deposition of his elder brother, Sultan Abdul Hamid II, April 27, 1909

#### *Children of the Sultan*

I. *Zev Ed-din* Effendi, born 1877 II. *Avdyun-ed Din* Effendi, born 1881 III. *Rumer Hilas* Effendi, born February 18, 1883 IV. *Rafia* Sultana, born 1887

#### *Brothers and Sisters of the Sultan*

Besides the deposed Sultan Abdul Hamid there are two surviving brothers and three sisters of the reigning Sultan

I. *Djemile* Sultana, born August 18, 1843 married June 2, 1858, to Mahmoud-Djial Eddin Pasha, son of Ahmet Veli Pasha widow 1892

II. *Seniha* Sultana, born November 21, 1851 widow of the late Mahmoud Pasha, son of Halil Pasha.

III. *Mediha* Sultana, born 1837, married (1) 1859 to Nedlib Pasha widow 1886 (2) April 30 1886 to Ferid Pasha.

IV. *Sultana* Effendi born 1860

V. *Wahide-Eddin* Effendi, born January 12, 1861

The present sovereign of Turkey is the thirty fifth, in male descent, of the house of Othman, the founder of the Empire, and the twenty ninth Sultan since the conquest of Constantinople. By the law of succession obeyed in the reigning family the crown is inherited according to seniority by the male descendants of Othman sprung from the Imperial Harem. The Harem is considered a permanent State institution. All children born in the Harem, whether offspring of free women or of slaves, are legitimate and of equal lineage. The Sultan is succeeded by his eldest son, but only in case there are no uncles or cousins of greater age.

It has not been the custom of the Sultans of Turkey for some centuries to contract regular marriages. The inmates of the Harem come, by purchase or free will, mostly from districts beyond the limits of the empire, the majority from Circassia. From among these inmates the Sultan designates a certain number, generally seven, to be 'Kadein,' or Ladies of the Palace, the rest, called 'Odalik,' remaining under them as servants. The superintendent of the Harem, always an aged Lady of the Palace, and bearing the title of 'Hasnadar Kadın, has to keep up intercourse with the outer world through the Guard of Eunuchs, whose chief, called 'Kizlar Aghasi,' has the same rank as the Grand Vizier but has the precedence if present on state occasions.

The following is a list of the names, with date of accession, of the thirty-four sovereigns who have ruled Turkey since the foundation of the empire and of the reigning house —

#### *House of Othman.*

Othman	1299	Bajaset II	1481
Orchan	1326	Selim I	1512
Murad I	1359	Solyman I, 'The Magni	
Bajaset I, 'The Thunder		Scout	1520
bolt'	1359	Selim II	1566
Interregnum	1402	Murad III.	1574
Mohammed I	1413	Mohammed III	1595
Murad II.	1481	Ahmet I	1603
Mohammed II., Conqueror		Mustapha I.	1617
of Constantinople	1451	Othman II.	1618

Murad IV, 'The Intrepid	1623	Abdul Hamid I	1773
Ibrahim	1640	Selim III	1789
Mohammed IV	1648	Mustapha IV	1807
Solyman II	1687	Mahmoud II	1808
Ahmet II	1691	Abdul Medjid	1839
Mustapha II	1696	Abdul Aziz	1861
Ahmet III	1708	Murad V (May 30)	1876
Mahmoud I	1780	Abdul Hamid II (Aug 31)	1876
Othman III	1754	Mohammed V (April 27)	1909
Mustapha III	1757		

The civil list of the Sultan is variously reported at from one to two millions sterling. To the Imperial family belong a great number of crown domains, the income from which contributes to the revenue. The amount charged to the Budget of 1911-12 is £T493,260.

### Constitution and Government.

The fundamental laws of the Empire are based on the precepts of the Korân. Next to the Korân the laws of the 'Hadith,' a code formed of the supposed sayings and opinions of Mahomet, and the sentences and decisions of his immediate successors, are binding upon the Sovereign as well as his subjects. Another code of laws, the 'Canon Nameh,' formed by Sultan Solyman the Magnificent from a collection of 'hatt-i-sheriffs,' or decrees, issued by him and his predecessors is held in general obedience, but merely as an emanation of human authority. After the promulgation of the Hatt-i-Sherif of 1839, complete codes of law (Civil, Criminal, and Commercial) were drawn up and form the laws in force, being largely based on the Code Napoléon. These codes are administered by the 'Nizamiye Courts.' The Civil Code is administered by the Sheri Courts, dealing with questions of real property and with all matters relating to the personal status of Moslems.

Forms of constitution, after the model of the West European States, were drawn up at various periods by successive Ottoman Governments: the first of them embodied in the 'Hatti Humayoun' of Sultan Abdul Medjid, proclaimed February 18, 1856, and the most recent in a decree of Sultan Abdul Hamid II, of November 1876. The latter provided for the security of personal liberty and property for the administration of justice by irremovable judges, the abolition of torture, the freedom of the Press, and the equality of all Ottoman subjects. Islam was declared to be the religion of the State but freedom of worship was secured to all creeds, and all persons, irrespective of religion, were declared eligible to public office. Parliament should consist of two Houses, a Chamber of Deputies and a Senate. Senators should be at least 40 years of age and would be appointed by the Sultan from among those who have rendered distinguished service to the State. For the election of deputies one electoral delegate has to be chosen for every 600 electors, and these electoral delegates choose one deputy for every 6,000 electors. Electors must be Ottoman subjects of at least 25 years of age, without distinction of race or creed, while delegates must be at least 30 years of age. Civil or military officials may offer themselves for election, but must immediately resign their posts on being returned. In consequence of the prevailing discontent, especially in the army, caused by corruption and misgovernment an Imperial decree was issued for the convocation of a Parliament, and constitutional government was restored July 24, 1908. Martial law was proclaimed at Constantinople in April, 1909, for a period of one year from that date, the proclamation was renewed in April, 1910, and again in

March, 1911, for one year. On January 15, 1912, the first Turkish Parliament was dissolved.

The Turkish Cabinet, which came to power on January 24, 1913, after a coup d'état, consists of the following members —

*Grand Viceroy and Minister of War* — Marshal Mahmud Shevket Pasha.

*Minister of Justice* — Ibrahim Pasha.

*President of the Council of State and Foreign Minister* — Prince Said Halim of Egypt.

*Minister of Marine* — General Tevhrik Sula Mahmud.

*Minister of Public Instruction* — Shukri Bey.

*Minister of the Interior* — Halil Adil Bey.

*Minister of Finance* — Rifaat Bey.

*Minister of Public Works and Commerce* — Baltazari Effendi.

*Minister of Mines, Forests and Agriculture* — Djelal Bey.

*Minister of Posts and Telegraphs* — Onkian.

*Minister of Pious Foundations* — Hani Bey.

*Sheik-ul-Islam* — Musa Kazim Effendi.

The whole of the empire is divided into Vilayets, or governments, these subdivided into Sanjaks, or minor provinces, these into Kazas, or districts, with occasional subdivision into Nahies, or sub districts. At the bottom of the list is the ' Karié ' or village, having at its head a ' Mouktar ' A Vali, or governor general, representing the Sultan, and assisted by a provincial council, is placed at the head of each Vilayet. The minor provinces, districts, &c., are subjected to inferior authorities (Mutesarrifs, Kaimakams, Mudirs and Mukters) under the superintendence of the Vali. The division of the country into Vilayets has been frequently modified of late for political reasons. For similar reasons six of the Sanjaks of the empire are governed by Mutesarrifs appointed directly by the Sultan, and are known as Mutesarrifats reporting direct to the Ministry of the Interior. All subjects, however humble their origin, are eligible to, and may fill, the highest offices in the State.

### Area and Population.

The Ottoman Empire is made up of (1) Turkey in Europe<sup>1</sup> (the archipelago and the Balkan Peninsula), (2) Turkey in Asia (Anatolia, Arabia, Syria, Palestine, Mesopotamia, and Kurdistan) and (3) Provinces of the Isles of Crete, Samos, and Cyprus. The total area (including States nominally subject) may be estimated at 941 416 square miles, and its total population at about 39,600,000, viz. —

	Square miles	Population
Immediate possessions —		
Europe	104,924	5,000,000
Asia	479,272	21,000,000
	584,196	26,000,000
Crete	3,400	370,000
Cyprus	3,680	271,000
Samos—tributary principality	180	68,400
Egypt	400,000	10,000,000
	407,160	10,660,000
Total	941,416	36,660,000

<sup>1</sup> At the conclusion of the war which commenced on September 22, 1912, the Turkish possessions in Europe will be considerably lessened, Turkey in Europe being in part divided among the Allied States (Bulgaria, Rumania, Servia, Montenegro, and Greece), and in part created into an independent state of Albania.

The area and population by Vilayets, according to an earlier estimate, were as follows —

Vilayets	Area Sq. Miles	Population	Population per Sq. Mile
<b>Europe —</b>			
Constantinople	1 505	1 208,000	798
Chatalja (Mutessarifat)	788	60 000	82
Adrianople	14,892	1 078,200	69
Balkanica	18,510	1 180,800	84
Monastir	11 006	848 900	77
Kosovo	12 700	1 688,100	82
Soutari (Albania)	4 170	294,100	70
Yanina	6 919	527 100	76
Total	65 850	6 130 200	98
<b>Asia Minor —</b>			
Ismid (Mutessarifat)	8 180	222 700	71
Brussa	25 400	1 626 800	64
Bigha (Mutessarifat)	2,500	129 600	61
Archipelago	2,600	822 800	121
Smyrna or Aidin	9,901	9,500 000	64
Kastamuni	19 570	951 200	49
Angora	27 370	982 800	84
Konia	84 410	1 069 000	27
Adana	15 400	429 400	27
Sivas	28 970	1 051,600	44
Trebizond	10 871	1 265 000	76
Total	157,111	10 509 200	47
<b>Armenia and Kurdistan —</b>			
Erzerum	19 180	645 700	84
Mamurat-ul Aziz	12 700	575 900	46
Diarbekr	14 480	471 500	32
Bitlis	10 460	398 700	38
Van	16 170	379 800	25
Total	71 990	2 470 900	34
<b>Mesopotamia —</b>			
Mosul	83 180	500 000	10
Baghdad	54 540	900 000	11
Basra	63,580	700 000	8
Total	143 290	2,000 000	9
<b>Syria —</b>			
Aleppo	83 430	1 500 000	40
Zor (Mutessarifat)	30 118	100,000	3

Total	175 480	1,550 000	9
<b>Grand Total</b>	768 950	23,818 400	30

In the European provinces under immediate Turkish rule, Turks (of Finno-Tataric race), Greeks, and Albanians are almost equally numerous, and constitute 70 per cent. of the population. Other races represented are Serbs, Bulgarians, Rumanians, Armenians, Magyars, Gipsies, Jews, Circassians. In Asiatic Turkey there is a large Turkish element, with some four million Arabs,

besides Greeks, Syrians, Kurds, Circassians, Armenians, Jews, and numerous other races.

The population of the chief towns is approximately as follows —

Constantinople	1,200,000	Medineh	40,000
Salonica	174,000	Homs	70,000
Adrianople (Edirneh)	83,000	Hama	60,000
Smyrna (Ismir)	373,000	Konia	45,000
Bagdad	225,000	Sivas (Sebastia)	66,000
Damascus	350,000	Jerusalem	80,000
Aleppo	210,000	Jaffa	45,000
Beirut	150,000	Rodosto	42,000
Brüssa	110,000	Gaza	40,000
Kaisariéh	54,000	Erzerüm	30,000
Kerbela	65,000	Bitlis	40,000
Mosül	70,000	Trebizond	51,000
Mecca	80,000	Diarbekr	58,000
Basra	55,000		

The Lebanon is governed by a Mutesarrif (Christian), and has a special government, the constitution of which was modified in December 1912, with a view to making it more liberal than before.

### Religion and Education

Mahometans form the vast majority of the population in Asiatic Turkey but only one-half of the population in European Turkey. Recognized by the Turkish Government are the adherents of nine non-Mahometan creeds—namely 1 Latins, Franks or Catholics, who use the Roman Liturgy, consisting of the descendants of the Genoese and Venetian settlers in the Empire and proselytes among Armenians, Bulgarians, and others 2 Orthodox Greeks 3 Bulgarians under their Exarch at Constantinople 4 Armenians, under their Patriarch at Constantinople, but under the supreme spiritual control of a Catholicos at Echmiadzin, in the Russian Caucasus. In 1903, the old dignity of Catholicos of Sia, in Cilicia, was restored and a new appointment made. There still remains in abeyance the seat of the Catholicos of Akhtomar (Van), an ancient dignity, 5 Syrians and United Chaldeans, under their Patriarch at Mosül 6 Maronites, under their Patriarch at Kanoubin in Mount Lebanon, 7 Protestants, consisting of converts chiefly among the Armenians 8 Jews, 9 Nestorians, or Assyrian Christians under the Patriarch Mar Shimun of Kochannoe. These religious denominations are invested with the privilege of possessing their own ecclesiastical rule. The Patriarchs of the Greeks and Armenians, the Bulgarian Exarch, and the 'Chacham Baschi,' or high rabbi of the Jews, possess, in consequence of these functions, considerable power and influence, especially the Greek Patriarch.

In Constantinople about half the settled inhabitants are Mussulman the other half being made up mostly of Orthodox Greeks, Armenians, Roman Catholics, and Greek Uniates, and Jews. There is, besides, a very large foreign population of various professions. In the Turkish Islands of the Aegean Sea the population is mostly Christian 296,800 Christians to 37,200 Mussulmans. In various parts of Asiatic Turkey the estimates are Asia Minor, Mussulmans, 7,179,900, Armenians, 576,300, other Christians, 972,800; Jews, &c., 184,600, Armenia, Mussulmans 1,795,800, Armenians, 480,700, other Christians, 165,200, Jews &c.,

80,700, Aleppo, Mussulmans, 792,500, Armenians, 49,000, other Christians, 184,800, Jews, &c., 20,000, Beyrūt, Mussulmans, 280,800, Armenians, 6,100, other Christians, 160,400, Jews, &c., 136,900, Lebanon, Mussulmans, 30,400, Christians, 319,800, Jews, &c., 49,800. The Mahometan clergy are subordinate to the Sheik ul Islam. Their offices are hereditary, and they can only be removed by Imperial iradé. A priesthood, however, in the strict sense of a separate class, to whom alone the right of officiating in religious services belongs, cannot be said to exist in Turkey.

The number of mosques in the Turkish Empire is 2,120, of which 379 are in Constantinople. The number of the clergy is 11,600. Connected with the mosques are 1,780 elementary schools, where education is supplied gratis. The private revenue of the Evkaf (Church), previous to the war of 1878, was 30,200,000 piastres (251,000*l.*) per annum, but they have now been reduced to 20,000,000 piastres (166,000*l.*). The expenses are reckoned at 15,000,000 piastres (125,000*l.*). The stipend of the Sheik ul Islam, 7,081,520 piastres (58,000*l.*), and those of the Naibs and Muftis, 7,376,648 piastres (60,000*l.*), are paid by the State. The principal revenues of the Evkaf are derived from the sale of landed property which has been bequeathed it, and which is known under the name of Vacuf. Three-fourths of the urban property of the Empire is supposed to belong to the Vacuf. Purchasers of property of this description pay a nominal annual rent to the Evkaf, but should they die without direct heirs the property reverts to the Church.

In Turkey, elementary education is nominally obligatory for boys from 6 to 11 years of age, and for girls from 6 to 10 years of age. Education is free, all schools are under Government control, but there is no interference with the religious education of the different communities. Elementary instruction includes the Turkish language, the Korān, arithmetic, history, geography, and hand work of various kinds, but as secular as well as religious instruction is entrusted to the Mussulman clergy it is of little value. There are middle-class schools for boys from 11 to 16 years of age, who, in addition to elementary subjects, learn French, geometry and various branches of physical and natural science. In Aleppo there are 710 Moslem 250 Christian, and 80 Jewish schools, with respectively, 19,000, 8,000, and 2,000 pupils. Besides the ordinary instruction (mostly religious), in a few schools French is taught and, in fewer English. The schools of various descriptions within the empire number about 36,230, and contain about 1,331,200 pupils, or one to twenty four of population.

The university which was nonnally founded at Constantinople in 1900, with 14 professors to teach theology (Mussulman), mathematics, philosophy, law, and medicine, has not yet (1907) got beyond the paper stage. The Imperial School of Medicine occupies an imposing site on the Scutari shore of the Bosphorus. There are an Imperial art school, a Great National School (Greek) of old foundation with 400 students, and a Greek theological seminary with 80 students.

### Finance.

The revenue is derived from tithes, land and property taxes, Customs, monopolies, and other sources, the largest portions of the expenditure are for military purposes and for debt charges.

The Estimates presented to the Chamber in November 1911, show for the year 1893 (1912-1913), revenue amounting to £T39,680,901, and expenditure amounting to £T33,244,941. Deficit, £T6,436,040.

The Ottoman Government, when unable to meet its liabilities, made an arrangement with its creditors, confirmed by the Iradé of December 8/30, 1861.

supplemented and modified by that of September 1, 1909. A Council of Administration at Constantinople was appointed, and to it were handed over for distribution among the bondholders the funds derived from the excise duties, from the Bulgarian, Eastern Rumanian, and Cyprus tribute, and from the tax on Persian tobacco. The net revenue in 1911-12 available for the service of the debt was £T4,126,598, compared with £T4,066,312 in 1910-11.

The condition of the Turkish debt was as follows on March 14, 1912 —

	£T
Secured on Egyptian tribute	17,342,890
Secured on administered revenues	86,174,931
Various loans	24,062,808
Total	127,580,729

The following loans have been authorised by the Government but had not been issued up to the end of 1912 — Four per cent. loan of 1910 from German and Austrian banks (second portion, for £T3,960,000), Four per cent. loan of 1911 from Banque Française for £T2,500,000, and Four per cent. loan of 1912 from the Ottoman Bank, for £T10,000,320. Total, £T16,460,320.

## Defence

### I. FORTRESSES.

The principal fortress in European Turkey is the entrenched camp of Adrianople. Constantinople is defended by the lines of Chekmedje. The Bosphorus and Dardanelles are strongly fortified, although the guns are out of date. Salonika and Smyrna are defended by batteries. Erzerum, in Armenia, is an entrenched camp.

### II. ARMY

Until recently military service had been theoretically compulsory on all Moslems, but Christians had not been allowed to serve. As the Christians in European Turkey exceed in number the Moslems (by 2,500,000 to 2,500,000), and there are also nearly 3½ millions of Christians in Turkey in Asia, this religious distinction has cramped the Ottoman Empire in the development of its military strength. Further, compulsory service cannot be enforced in Arabia, while the Kurdish and Arab tribes in Asia Minor are exempt, so also is the district of Constantinople and that of Skodra (Skutari), in Albania. The burden of defence has therefore fallen on about 11 million Moslems out of a total population of about 25 millions of all creeds and races.

Under the new régime the advisability of incorporating Christians in the army has been recognized, and in August, 1909, a decree was promulgated extending the obligation of military service to non-Muslims, but the practical difficulty of fully reforming the recruiting law has been found very considerable.

Liability commences at the age of 20 and lasts for 20 years. Service in the first line, or active army, called the *Nizam*, is for 9 years, viz. — in the case of the infantry, 3 in the ranks and 6 in the reserve, for cavalry and artillery, 4 in the ranks and 5 in the reserve, but in practice the men are often kept for longer periods with the colours. The soldier next passes to the *Keshik*, or second line, and remains in it for another 9 years. Finally he completes his service with 3 years in the *Mustaak*. The reservists are

liable to be summoned annually for 6 weeks' training, and the Redif for one month in alternate years, but the trainings are not regularly carried out. The recruits of the annual contingent, surplus to the requirements of the first line, are passed into a separate reserve. They undergo from 6 to 9 months training in the first year of their service, and are afterwards supposed to receive an annual training of 30 days.

The Redif is in two classes, the first class representing men of the first five years of Redif service, and the second class representing men of the remaining four years' Redif service. The Redif infantry exists in time of peace in the form of small cadres, but the units can be, and frequently are, embodied. They are used, in common with the Nizam, for the suppression of disturbances, and are sometimes retained in service for considerable periods. There is no Redif cavalry, except 12 small cadres, on which it is intended to build regiments in event of war. There are, however, irregular cavalry in Asia Minor, raised from the Kurdish and Arab tribes, and called the *Hamidiéh* cavalry. There are no Redif artillery or engineers. When Redif divisions are mobilized they are supplied with these arms from the Nizam.

The *Mustafaz* has no organisation.

The Empire is divided into 4 *Nizam* and 5 Redif inspection areas of very unequal size and military importance. Of the *Nizam* Inspections the 1st covers Rumelia and Anatolia and produces 4 army corps the 2nd covers Macedonia and Albania, Epirus and Syria, and produces 4 army corps and 3 independent divisions, the 3rd covers Armenia and Kurdistan and produces 2 army corps and 2 independent divisions, the 4th covers Mesopotamia, Arabia, and Tripoli, and includes 2 army corps and 5 independent divisions. The 1st Redif Inspection coincides with the 1st *Nizam* Inspection, and produces 17 divisions, the 2nd also coincides with the 2nd *Nizam* Inspection and produces 22 divisions, the 3rd and 4th correspond to the *Nizam* areas, and produce 8 and 4 divisions respectively, the 5th comprises Syria and produces 7 divisions. Altogether there are on paper 43 *Nizam* divisions and 57 Redif divisions. The troops in Yemen and the Hedjaz (4th Inspection) are a force in occupation, as were also those in Tripoli.

*Nizam* divisions normally have 3 line regiments, a rifle battalion, and 6 to 9 field batteries, each line regiment consisting of two battalions and a cadre in peace, and of 3 battalions in war, thus the division has 7 battalions in peace and 10 in war. The artillery is being reorganised in 4 gun batteries. An army corps consists of 2 or 3 divisions, a cavalry brigade, 3 howitzer batteries, 6 mountain batteries, an engineer battalion and telegraph company. There are 40 regiments of *Nizam* cavalry of 5 squadrons each, besides these, there are 24 regiments of irregular Kurdish (*Hamidiéh*) cavalry. Redif divisions have from 7 to 12 battalions, usually 9.

It is proposed to form 22 companies of frontier guards to relieve the numerous small detachments of regular troops scattered along the European frontier.

The approximate peace strength of the Turkish army (not the peace establishment) has been, of late years, about 230,000 of all arms and ranks. Of these about 20,000 are in Yemen, 10,000 in Hedjaz, and 10,000 in Tripoli.

*The Gendarmerie.*—The extent of the Turkish Empire, its many subject races and turbulent elements, have necessitated the formation of large forces of Gendarmerie, amounting altogether to about 42,000 men, of whom 16,000 to 17,000 are mounted. Of these, 11,000, roughly speaking, are (or were) in European Turkey, 29,000 in Asia Minor, 1,500 in Arabia, and 900 in Tripoli. The Gendarmerie is recruited partly from the reserve of the *Nizam*, and partly by direct enlistment, it, however, is being reorganised.

*The Tripoli and Lebanon Militia.*—Since 1902 there has been in Tripoli a local militia force consisting on paper of 8 battalions and 6 cavalry regiments, service in which is compulsory, and it was hoped that a complete Redif division might be organised eventually. There is also a *Lebanon militia*, consisting of 2 battalions and 1 squadron.

The War Minister is responsible for the administration and efficiency of the army. Under him there is a Chief of the General Staff at the head of a General Staff Department of 8 sections. The Master-General of the Ordnance, who is responsible for war material, is also under the War Minister, formerly he was independent.

The Turkish budget for 1910-11 showed an expenditure of £6,971,012 in the estimates of the Minister of War, and of £300,000 in those of the Grand Master of the Ordnance, total £7,231,012. The provision made for the Gendarmerie was £1,427,014.

The Turkish infantry in the first three 'Inspections' both Nizam and Redif, have the 7.65 mm. Mauser magazine rifle, model 1890. Elsewhere they often have older weapons. The Turkish field artillery is now being rearmed with Q. F. Krupp guns of the latest patterns. All horse and field batteries are to have the 7.5 cm. The mountain batteries have the light 7.5 cm. Krupp and howitzer batteries a 15 cm. (6 inch) piece. Three batteries of 10.5 cm. (4.3 inch) position guns have also been ordered.

### III. NAVY

For the navy of Turkey the crews are raised in the same manner as the land forces, partly by conscription, and partly by voluntary enlistment. The time of service in the navy is twelve years, five in active service, three in the reserve, and four in the Redif. The nominal strength of the navy is 6 vice-admirals, 11 rear-admirals, 208 captains, 289 commanders, 228 lieutenants, 187 ensigns, and 30,000 sailors, besides about 9,000 marines.

The principal ships are as follows.

Launched	Name	Displacement	Armour		Main Armament	Torpedo Tubes	Horse-power	Maximum speed
			Belt	Gun				
<i>Dreadnoughts</i>								
Bldg. Bldg. Pre.	<i>Sultan Mehmet V</i> <i>Pr.</i> <i>Pr.</i>	Tons 33,000	Inch 12	Inch 12	10 12 5, 16 5in	5	31,000	21

<sup>1</sup> Ex-German battleships. <sup>2</sup> Reported seized by Italy. <sup>(?)</sup> Reported sunk and salvaged.

The Ottoman Navy has been in the course of reorganization for the last two years under two British Admirals and a British staff of navigating, torpedo and gunnery officers. When the war with Italy broke out (1911) there were 8 effective destroyers and 14 torpedo-boats, all under ten years old.

There are also torpedo gunboats, *Peik-i-Sheket* and *Berk-i-Saifet* (1906), of 22 knots, *Pelenkideria* (1890), of 19 knots, and a variety of small gunboats. Two scouts, nine 900 ton destroyers and some submarines are on order or projected.

### Production and Industry

Land in Turkey is held under four different forms of tenure—namely, 1st, as 'Miri, or Crown lands, 2nd, as 'Vakuf,' or pious foundations, 3rd, as 'Mulikaneh,' or Crown grants, and 4th, as 'Mulk,' or freehold property. The first description, the 'miri,' or Crown lands, which form the largest portion of the territory of the Sultan, are held direct from the Crown. The Government grants the right to cultivate an unoccupied tract on the payment of certain fees, but continues to exercise the rights of seigniorry over the land in question, as is implied in the condition that if the owner neglects to cultivate it for a period of three years it is forfeited to the Crown. The second form of tenure, the 'Vakuf,' was instituted originally to provide for the religion of the State and the education of the people, by the erection of mosques and schools, but this object has been set aside or neglected, for several generations, and the 'Vakuf' lands have mostly been seized by Government officials. The third class of landed property the 'mulikaneh,' was granted to the spahis, the old feudal troops, in recompense for the military service required of them, and is hereditary, and exempt from tithes. The fourth form of tenure, the 'mulk,' or freehold property, does not exist to a great extent. Some house property in the towns, and of the land in the neighbourhood of villages, is 'mulk,' which the peasants purchase from time to time from the Government.

The system of levying a tithe on all produce leaves no inducement to the farmer to grow more than is required for his own use, or in his immediate proximity. The agricultural development of the country is further crippled by custom dues for the exportation of produce from one province to another.

Agriculture is most primitive. The soil for the most part is very fertile, the principal products are tobacco cereals of all kinds, cotton, figs, nuts, almonds, grapes, olives, all varieties of fruits. Coffee, madder, opium, gums are largely exported. In 1911, the produce of wheat was 164,979,000 bushels, barley, 119,903,600 bushels, oats, 20,995,400 bushels, rye, 17,939,000 bushels, corn, 83,839,700 bushels. Of these amounts Turkey in Asia produced 145,519,000 bushels of wheat, 106,271,000 bushels of barley, 14,456,000 bushels of oats, 12,093,700 bushels of rye, and 18,856,200 bushels of corn. Flour milling in Smyrna is being unproved and extended. Coffee is grown in the Hodeida region, opium is an important crop in Konia. Tobacco is grown both in European and Asiatic Turkey, the 1911 crop having been the largest gathered since 1903. The abolition of the monopoly in 1914 will increase the production still more. In 1911, 54,468,031 pounds were exported. The forest laws of the empire are based on those of France, but restrictive regulations are not enforced, and the country is being rapidly deprived of its timber. About 21 million acres are under forest, of which 8½ million acres are in European Turkey. The forests consist of pine, fir, larch, oak, cedar and other timber trees. Extensive mulberry plantations have been founded both in European and Asiatic Turkey, and about 250,000 plants are annually distributed to the

peasants. The production of oil of roses is encouraged by the Government, who supply stocks of rose plants to the peasantry. In cotton growing regions the Government distribute also cotton seed of good quality. The cotton crop of this Province of Adana amounted to 72,000 bales in 1910, of which about 3,000 bales consisted of long fibre (American) cotton and the balance of short fibre (native) cotton.

In Asiatic Turkey, 18,567,775 acres are under cultivation as follows — 13,489,474 acres under cereals, fruit and vegetables, 473,085 acres, industrial products (cotton, flax etc.), 779,982 acres, and vines, 1,213,630 acres.

In Palestine an interesting feature in agricultural development is the establishment of Jewish and German colonies, of the former near Jaffa there are 26 with a total population of about 7,885, cultivating more than 94,900 acres, the chief produce being cereals, cotton, and various fruits. These colonies consist mainly of Russian Jews, some being maintained by private enterprise, others by the Chevraé Zion Association, and others again (originally founded by Baron E. de Rothschild) by the Jewish Colonization Association. The 4 German colonies in the Jaffa region are also mainly agricultural. A very comprehensive survey has been in the course of execution during the last two years in Mesopotamia with a view to the irrigation of huge tracts of land which have lain waste for centuries but which bear clear evidence of having been artificially irrigated in ancient times. The irrigation scheme is almost complete.

The Turkish provinces, especially those in Asia, are rich in minerals, which are little worked. In 1908 a new mining law came into force. Chrome ore is exported from Turkish ports, mostly from Europe and Marmora, there are 8 chrome mines near Merana worked by primitive methods, the Government silver mines at Bulgar Maden, Konia, produce annually about 2,600 kilos of silver and 400 tons of silver lead, Zinc is found at Karasu on the Black Sea and in Aidin, manganese ore (3,000 tons) at Salonica, in Konia and Aidin, antimony ore, 308 tons, copper ore is found in the Armenian Taurus, at Terebol, near Trebizond, at Arghana Maden near Diarbekr, said to be one of the largest and most productive mines in the world and in the Xanthi district on the Dodecanatch-Salonica railway, borax from 6,000 to 8,000 tons exported annually from Marmora, meerschaum at Eskiahehr, argentiferous pyrites, at Salonica, chrome at Merana, emery at Smyrna, in Aidin, Konia, Adana, and the Archipelago, asphalt, at Vanina, in Syria, and on the Euphrates, coal and lignite (400,000 tons annually) at Heracles on the Black Sea, also in the Smyrna district, petroleum in the Middle Tigris valley and various isolated places in Asia Minor, also on the north coast of the Sea of Marmora. The salt mines at Balif in the Yemen yield a large output. In 1911-12 the quantity sold amounted to 346,625 metric tons, of which 261,947 tons were sold in Turkey and the rest abroad. There are salt works also at Aleppo, Erzeroum, Samos, Crete, and other places. Both gold and silver are found in the Smyrna sanjak; gold and silver and argentiferous lead at Bulgar Maden (Konia), mercury near Smyrna and at Siama near Konia, kaolin in the island of Rhodes, arsenic in Aidin, iron in Aleppo and in Kosaro (not worked), in Adana (output 40,000 tons a year). Many of these minerals are scarcely worked. Near Brusa quarries of lithographic stone are now extensively worked. There is a good deal of brass-turning and beating of copper into utensils for household purposes.

The fisheries of Turkey are important, the fisheries of the Bosphorus alone represent a value of upwards of £50,000, though the fishery methods

are antiquated. The coast of the Mediterranean produces excellent sponges, the Red Sea mother-of-pearl, and the Persian Gulf pearls.

Industries in Turkey are mostly quite primitive. There is a tendency to start factories on a small scale, but the supply of labour seems likely to prove a difficulty. A glass factory on the Golden Horn, belonging to the Civil List Department, has been leased and is now being worked under British management. It employs 250 hands, and turns out about 2,000/ worth of glass bottles, etc., per month. There is one other glass factory working in Constantinople at Pasha Bagtche, on the Bosphorus. It employs 350 hands, and produces about 3,000/ worth of glass monthly. An Ottoman company has been formed, under British management, to manufacture soap. The works are on the Golden Horn, and produce about 50 tons of soap per month.

A brick and tile factory has started work at Pasha Bagtche, on the Bosphorus, on a small scale, and is to be considerably extended. A company has been formed for starting a floating dock at Stenai, on the Bosphorus. Two cement factories have been established with local capital at Gushch, on the Gulf of Ismidt, and the cement is on the market at the price of 12 piastres per sack of 50 kilos.

The Turkish Government cloth mills at Kara Mursal and Ismidt have been equipped with new machinery, and manufacture the khaki woollen cloth required by the army. At Panderma there is a woollen yarn spinning mill belonging to the Oriental Carpet Manufacturers' Company which produces 2,750,000 lbs. annually and employs 140 hands. At Smyrna a weaving mill has been opened with a producing capacity of 500,000 metres (about 546,000 yards) which will be increased this year to 1,200,000 metres (about 1,312,000 yards). It will employ 300 to 400 hands.

### Commerce

In 1675 the commercial privileges granted under Capitulations to several foreign nations were extended to the English, and in 1809 these were confirmed by treaty. The 8 per cent *ad valorem* duty has been increased to 11 per cent. The total trade of Turkey in various years ending February 28 has been as follows (£T1 of 100 piastres = 18 shillings, or £T10 = 9/ or 10/ = £T11) —

Years	Imports	Exports	Years	Imports	Exports
	£T	£T		£T	£T
1890	22,018,180	12,062,900	1900	21,432,221	18,439,071
1900	22,045,380	14,032,225	1910	22,323,556	13,190,447
1906	24,672,619	19,212,031	1911	27,774,918	22,474,818

The chief imports and exports in 1910-11 were —

	Imports	Exports		Imports	Exports
	£T	£T		£T	£T
Cattle	544,082	630,000	Metals & Manufactures	2,864,311	505,326
Animal products	572,356	1,012,618	Timber	861,424	371,973
Cereals	4,310,522	1,901,892	Hides and skins	1,404,524	780,628
Fruit	212,422	4,345,351	Textiles	12,864,750	5,425,222
Coffee, tea, spices	1,115,234	722,643	Tobacco	—	2,704,274
Sugar	2,320,111	96,636	Machinery	684,494	5,371
Oil and Fats	1,920,967	939,090	Drugs	243,291	1,207,443
Chemicals	572,278	704,756	Jewellery	534,327	12,550

The trade of Turkey is largely with Great Britain, Austria, France, Germany, Italy and Russia. In 1910-11 it was distributed as follows:—

	Imports	Exports		Imports	Exports
	£T	£T		£T	£T
Great Britain	7,304,153	4,752,490	Italy	3,233,001	1,906,182
Austria-Hungary	6,772,497	1,941,437	Russia	3,475,922	894,477
France	2,477,704	2,686,841	All other countries	10,752,537	5,974,063
Germany	2,443,947	1,156,654	Total	27,669,156	19,830,364

Tobacco imported and exported is not included in this table

The value of the commercial intercourse between the whole of the Turkish Empire, in Europe and Asia (including Crete), and Great Britain during the last five years, according to the Board of Trade Returns, is shown in the following table:—

	1906	1907	1910	1911	1912
Imports into U K from Turkey	£ 5,158,149	£ 5,145,765	£ 4,903,076	£ 5,041,125	£ 5,417,000
Exports of British produce to Turkey	7,010,158	7,611,054	5,055,664	9,458,840	8,160,000

The principal imports from Turkey into the United Kingdom and export to Turkey from the United Kingdom (according to Board of Trade Returns in two years were:—

Imports from Turkey	1910	1911	Exports to Turkey	1910	1911
	£	£		£	£
Barley	491,481	1,297,445	Coal, coke	574,687	553,708
Rabbits	323,763	536,739	Cotton yarn	208,324	437,341
Angora Goats' hair	784,590	444,318	Onions	5,360,883	5,791,096
Wool	237,006	327,878	Woolen	940,478	704,150
Woolen goods	370,643	206,811	Iron goods	201,686	274,147
Opium	221,702	274,140	Machinery	254,917	275,274

### Shipping and Navigation.

The mercantile navy of the Turkish Empire in 1911 consisted of 120 steamers of 66,878 tons, and 963 sailing vessels of 205,641 tons. At Constantinople in 1911 there entered and cleared 31,323 vessels of an aggregate tonnage of 70,171,065 tons. This number comprised, in the foreign trade, 2,787 visits of sailing vessels of, in the aggregate, 254,684 tons, 1,664 steamers of 2,791,220 tons sailing regularly, and 10,681 steamers of 78,791,577 tons not sailing regularly, in the coasting trade, 2,980 sailing vessels of 22,244 tons, and 2,256 steamers of 350,571 tons. The lines of 28 navigation companies visit Constantinople (German, Russian, Austrian, Italian, Turkish, French, Greek and Egyptian, the last named under the British flag). Of the total tonnage entered in 1911, 2,046,189 was British, 1,205,743 Greek, 2,194,545 Austro-Hungarian, 990,833 Italian, 1,254,745 Russian, 678,263 French, 844,575 Turkish, and 770,563 German.

## Internal Communications.

The length of railway line in European and Asiatic Turkey in 1912 was as follows—

	Miles open		Miles open
<b>European—</b>		<b>Smyrna-Aidin</b>	<b>330</b>
Salonica Monastir <sup>1</sup>	138	Konia-Eregli Persian Gulf <sup>1</sup>	135
Constantinople-Salonica <sup>1</sup>	317	Mersina Adana	42
Oriental Railways	786	Beirût-Damascus	96
		Rayak Aleppo <sup>1</sup>	295
<b>Total European</b>	<b>1,239</b>	Damascus-Medina	812
		Jaffa-Jerusalem	54
<b>Asiatic—</b>		Haifa Deraa	106
Haider Pasha-Angora <sup>1</sup>	358		
Kahki Shekar Konia <sup>1</sup>	283	<b>Total Asiatic</b>	<b>2,836</b>
Midania Brusa	25		
Smyrna-Cassaba <sup>1</sup>	166	<b>Total Ottoman Empire</b>	<b>4,075</b>
Alasheir Afion Karahissar	158		

<sup>1</sup> These railways have a kilometric guarantee. The guarantee paid by the debt council amounted to £7523,918 in 1911 £7420 141 in 1911

The German concession of the Baghdad Railway is to extend the Anatolian line from Konia to Adana, Mosul, Baghdad, and Basra, with many branch lines and an extension to a port on the Persian Gulf. It has been constructed as far as Bulgurlu about 15 miles beyond Eregli, and a company has been formed to carry it 840 km (520 miles) further. The Haifa railway has been extended to Deraa, where it joins the Mecca Railway.

Schemes are under consideration for the construction of 628 miles of railway and 440 miles of junction lines in Europe, and 4,940 miles of railway in Asia, total, 6,008 miles in the Turkish Empire.

Electric tramways are working in Smyrna, Damascus, Beyrouth, and Salonica.

There are 929 Turkish post-offices in the Empire. In the year 1910-11 the inland service transmitted 30,731,000 letters and 1,709,000 post-cards, and 15,876,000 samples and printed papers, the international service transmitted 14,069,000 letters and 3,062,000 post-cards, and 4,327,000 samples and printed papers. A parcel post system has been introduced into Turkey, and works fairly well.

Foreign post-offices are maintained in most of the large coast towns by nations commercially interested.

The length of telegraph lines in Turkey is about 28,590 miles, and the length of wire about 49,200 miles. There are 1,017 telegraph offices. Messages in the year 1910-11, 7,145,138.

## Money, Weights, and Measures of Turkey

The Imperial Ottoman Bank, with a capital of £710,000,000, had, on Nov. 30, 1910, a note circulation of £7941,250, and cash on hand amounting to £73,566,834.

The nominal value of the coinage (including recoinage) of Turkey since 1844 is: Gold, £742,122,331; silver, £710,521,565; copper (in 1904), £7148,015. In 1907 silver pieces were coined to the nominal value of 80,110,000 piastres. Nickel notes of 20 paras and 10 paras have been introduced into the coinage during 1911.

	£	s.	d.
The Turkish Lira, or gold Medjidit	4	18	0-84
Piastre, 1/80 to the Lira	0	0	2-16
or £111=£10 approximately			

Large accounts are frequently, as in the official budget estimates, set down in 'purses' of 500 Medjidîé piastres, or 5 Turkish liras. The 'purse' is calculated as worth 4l. 10s. sterling. The gold *Lira* weighs 7·216 grammes ·916 fine, and thus contains 6·6147 grammes of fine gold. The silver 20-piastre piece weighs 24·055 grammes ·830 fine, and therefore contains 19·865 grammes of fine silver.

The <i>Oké</i> , of 400 drams	= 2 3326 lbs. avoirdupois.
„ <i>Ainud</i>	= 1 151 imperial gallon.
„ <i>Kelch</i>	= 0 9120 imperial bushel
44 <i>Okas</i> = 1 <i>Cantar</i> or <i>Kintal</i>	= 125 lbs. avoirdupois
39 44 <i>Okas</i>	= 1 cwt
180 <i>Okas</i> = 1 <i>Chaka</i>	= 511 880 pounds.
1 <i>Kile</i> = 20 <i>Okas</i>	= 0 36 imperial quarter
816 <i>Kelchs</i>	= 100 imperial quarters.
The <i>Endaze</i> (cloth measure)	= 27 inches.
„ <i>Arakts</i> (land measure)	= 30 inches.
„ <i>Donum</i> (land measure)	= 40 square paces.

The *kile* is the chief measure for grain, the lower measures being definite weights rather than measures. 100 *kiles* are equal to 12 128 British imperial quarters, or 85·266 hectolitres.

In 1889 the metric system of weights was made obligatory for cereals, metric weights were decreed obligatory in January 1892, but the decree is not yet enforced.

## Diplomatic and Consular Representatives.

### 1 OF TURKEY IN GREAT BRITAIN

*Ambassador* — Ahmed Riza Bey (1912)

*Counsellor of Embassy* — H. Djavad Bey

*First Secretary* — Réouf Ahmed Bey

*Second Secretary* — Serkis Bey

*Third Secretary* — H. Chefik Bey

*Honorary Attaché* — L. Moral Bey

*Naval Attaché* — Commander Hussein Bey

*Counsellor* — Djavad Bey

*Consul-General* in London, Muudji Bey

There are Consular representatives of Turkey at the following places —

Birmingham, Bradford, Cardiff, Dublin, Jersey, Liverpool (C. G.), Newcastle-on-Tyne, Glasgow, Hartlepool, Hull, Leith, Manchester, Southampton, Sunderland, Swansea, &c.

### 2. OF GREAT BRITAIN IN TURKEY

*Ambassador* — Rt. Hon. Sir G. A. Lowther, G.C.M.G., C.B.

*Counsellor* — C. M. Marling, C.B., C.M.G.

*Chief Dragoman* — G. H. Fitzmaurice, C.B., C.M.G.

*Secretaries* — G. Kidston, E. Ovey, E. Hope-Vern, Lord G. Walsley,

H. Wilson, E. A. Keeling (acting)

*Attaches* — E. Smith-Barry and Hon. Richard Legh

*Military Attaché* — Major G. E. Tyrrell, R.A.

*Judge* — R. B. P. Carter

*Assistant Judge* — Peter Grain

*Commercial Attaché* — E. Wankley, C.M.G.

*Consul-General* — H. C. A. Eyres.

There are also British Consular Representatives at the following places —

*Consuls General* — Baghdad, Beirut, Salonica, Smyrna.

*Consuls or Vice-Consuls* — Aleppo, Benghazi, Adrianople, Bassora, Bitlis, Damascus, Jaffa, Jeddah, Jerusalem, Erzerum, Samos Smyrna, Trebizond, Brüssa, Darianelles, Gallipoli, Scutari, Adana, Antioch, Van, Rhodes, Scala Nuova, Kharpüt, Sivás, Diarbekr, Konia, Ukub, Monastir, Derna, Mosul, and Karbala.

## TRIBUTARY STATES

## CRETE.

The Island of Crete was under Venetian rule from 1211 to 1669, when it fell beneath the Ottoman power. Thenceforth (with the exception of about 10 years, 1830-40, when it was ruled by the Viceroy of Egypt) it was governed as a Turkish vilayet. After more than 70 years of almost continuous insurrection, the 4 Powers—Great Britain, Russia, France, and Italy—intervened, and in 1898 constituted the Island, with the adjacent islets, an autonomous State under a High Commissioner of the Powers, subject to the suzerainty of the Porte, paying, however, no tribute. Since August 14, 1906, the right of the King of the Hellenes to propose the High Commissioner has been recognised by the protecting Powers, under whose sanction Greek officers have taken over the direction of the Gendarmerie and Militia.

The events of September and October, 1908, in the Balkans having fostered agitation in Crete for annexation to Greece, the Powers have declared that the administration of the island will be entrusted to the "constituted authorities" until the question can be settled with the consent of Turkey. In September, 1911, the signatory powers decided not to fill the post of High Commissioner, nor in any way to change the *status quo* of the island. This leaves the Government of the island in the hands of a Commission and an Assembly acting like all other authorities in the island, in the name of the King of the Hellenes.

In October, 1912, the Cretan deputies were admitted into the Greek Parliament at Athens, and the proclamation of the annexation (Oct., 1908) with the kingdom were sanctioned by the Greek Government. Stephen Dragoumis, a late premier of Greece, was appointed Governor of the Island.

For the present, however (March, 1913), the Greek annexation has not been recognised by the Powers, but in all probability the recognition will be forthcoming when the peace between Turkey and the Balkan allies is signed.

## Area and Population.

The Island is about 160 miles in length and from 5 to 35 miles in breadth, the total area being 2,855 square miles. It is divided into 5 departments, 80 cantons, and 77 parishes. According to the results of the census of June 5, 1911, the inhabitants, at that date, numbered 242,151, of whom 207,812 were Christian, 27,852 Musulman, and 437 Jewish, and 6,000 foreigners. Besides this there are 11,055 persons who were temporarily abroad during the last census, thus making the total population 253,206. Between 1900 and 1910 the total population had increased by 43,021, the Greek element had increased by 37,964, the Musulman element had decreased by 5,644. All the inhabitants of the Island, even the Musulmans, speak Greek. The chief towns are Canes, the Capital, with (1911) 24,309 inhabitants, Rethyma, 9,686, Candia, 25,185.

## Religion and Education.

In the Island there are about 2,500 Greek churches and chapels and 4 Roman Catholic churches, 3 Jewish synagogues, and 20 Mohamedan mosques, then 15 Greek monasteries, and 3 penitentes. The affairs of the Church are directed by the Synod, consisting of the metropolitan and seven bishops of the Island, sitting at Heraklion (Candia). Education is nominally compulsory from 5 to 10 years of age. There are 627

Christian primary schools, with 862 teachers and 38,642 pupils (27,378 boys and 10,764 girls), 19 Mohomedan primary schools, with 71 teachers and, 1,917 pupils (1,420 boys and 497 girls). The secondary schools (7 progymnasias, 4 high schools for girls, and 4 gymnasia), all Christian, numbered (1910) 15, with 45 teachers and 2,378 pupils (1,928 boys and 452 girls). The school enrolment averages about 1 pupil for 10 inhabitants. For Education Government grants (1910) about 1,056,086 drachmai annually. The judicial system, organised on the Greek pattern, comprises 2 courts of appeal, 5 courts of assize, 26 justice of peace courts. There is a police force of about 1,300 and 36 officers, and the militia 1,000 men, both commanded by 41 Greek officers.

### Finance

The revenue and expenditure for five years, ending August 31 (O S.), were in drachmai or francs as follows —

	1906-07	1907-08	1908-09	1909-10	1910-11
Revenue	5,020,806	5,930,383	5,500,330	6,083,297	6,063,297
Expenditure	4,379,184	5,906,930	5,906,980	5,576,337	6,567,221

Revenue is derived from customs receipts (averaging about 2,600,000 drachmai per annum) from excise tobacco, and salt monopolies, stamps, court fees, fines, and from taxes on articles of consumption. The expenditure in 1910-11 comprised for public instruction 1,329,432 drachmai, for justice 798,660 for the home department 673,251, for finance 1,044,718, and for public security and public works 4,721,190.

The public debt in 1911 amounted to 5,317,236 francs, most of which was advanced by the four Powers at an annual interest and sinking fund (at 5 per cent.) of 200,000 drachmai, the service of which has been postponed until 1911. The Government has been authorized to contract a loan of 9,800,000 drachmai, mostly for public works. In 1901, Turkey conceded to the island her rights in the salt monopoly for a sum of 1,500,000 drachmai, of which, in September 1905, the amount outstanding was 1,810,599 drachmai.

### Agriculture and Commerce

Crete is mainly agricultural, and its chief product is olive oil, used partly in the manufacture of soap (annual produce about 3,155,000 kilos., worth about 17,600,000 drachmai), for which there are 18 factories. The annual yield of oil averages at about 38,000 tons, but good and bad years alternate. Other products are carob beans (1,560,000 dr.), valonia, dry and fresh fruits, wine (1,110,000 dr. exported to Malta), chestnuts, hides and leather (from 10 tanneries), cheese, silk. There are about 400,000 sheep and 120,000 goats, besides horses (10,000), asses (40,000), oxen (70,000), and pigs (80,000) in the islands.

The commerce of the island is mainly with Greece and Turkey. In the last 5 years, the value of the imports and exports was as follows, in pounds sterling —

	1907	1908	1909	1910	1911
Imports	750,001	642,423	696,007	780,012	852,286
Exports	478,000	784,926	526,970	865,371	624,449

The chief exports in 1911 were olive oil, valued at 194,636*l.*, carob-beans, 72,451*l.*, soap, 45,523*l.*, raisins, 95,687*l.*, wine, 50,507*l.*; oranges, 13,544*l.*; sheep and goat skins, 11,603*l.*

In 1911 there entered and cleared at the ports of the island 2,414 vessels of 1,811,886 tons. One-third the tonnage was Austro-Hungarian, and the remainder mostly Italian, Russian, and French.

Crete has entered the Postal Union. There are 28 Cretan post-offices, besides Austrian, French, and Italian offices in the island. In 1910-11, 1,881,210 inland and 592,292 international letters passed through the Cretan post-offices. Receipts 281 065 dr., expenditure 221,797. There are (in 1909) 368 miles of telegraph line, and 15,646 inland telegrams and 45,143 foreign telegrams.

The Bank of Crete, founded in 1899, with a capital of 5,000,000 gold drachmai, has obtained for 30 years the exclusive right of issuing notes. The Cretan money is similar to that of Greece. There are silver coins of 5 and 2 drachmai, and of the drachma and  $\frac{1}{2}$  drachma (50 lepta), and copper and nickel coins of 1, 2, 5, 10, 20 lepta. The drachma is equivalent to the franc, or 25-225 dr. = £1. The old Turkish *piastre*, however, still lingers. The metric system of weights and measures is in general use, but the *ots* (2-3 lbs.), and the *pisas* ( $\frac{1}{2}$  yard) are also in vogue. The circulation of foreign money is prohibited, except European gold coins.

There is an Agricultural Bank, founded in 1869. It has a capital of 3,980,941 drachmai, and makes small advances to farmers at 6 per cent. interest.

*British Consul-General at Candia*—A. C. Wratishaw, C.B., C.M.G.

There are vice-consuls at Candia, Candia, and Rethymio.

## SAMOS

An island off the coast of Asia Minor, forming a principality under the sovereignty of Turkey, under the guarantee of France, Great Britain, and Russia, December 11, 1832.

*Governor*—*Eglety Effendi* (appointed 1912).

Area 180 square miles, population (1902) 53,424. There are besides, 15,000 natives living on the coast of Asia Minor. There are 1,336 foreigners, of whom 1,221 are Greeks. In 1905 there were 824 marriages, 1,545 births, 808 deaths. The religion is the Greek Orthodox.

The estimated revenue for 1910 was 3,716,968 piastres, and expenditure 3,627,496. Public debt, 2,570,500 piastres.

The most active industries are the manufacture of wine, oil, cigarette leather, and brandy. Tobacco, wine and olive oil are produced.

Samos is known to contain deposits of various minerals including antimony, silver lead manganese, copper, zinc, and marble, but there is little or no mining.

The imports for 1911 amounted to 19,741,212 piastres, and the exports to 37,036,252. The chief exports were wine, raisins, leather, oil, cigarettes, spirits, and carob beans.

In 1910, 1,338 vessels of 436,076 tons entered the ports of the island. They were mostly Austrian, Turkish, French, and Greek.

In 1910, 146,540 letters passed through the Post Office. The number of telegraphic despatches was 11,962.

## EGYPT

(MISR.)

### Reigning Khedive.

**Abbas Hilmi**, born July 14, 1874, son of Mohamed Tawfik, succeeded to the throne on the death of his father, January 8, 1892; married Princess Ikbal Hanem, offspring Princess Emīna Hanem, born February 12, 1895. Princess Athiatou Rah Hanem, born June 9, 1896, Princess Fathieh Hanem, born November 27, 1897, Prince Mohammed Abdul Monem, heir-apparent, born February 20, 1899, Princess Loufat Hanem, born September 29, 1900; Prince Abdul Kader, born February 4, 1902. He has one brother, Mohamed Ali, born October 28, 1875, and two sisters, Khadijah Hanem, born May 2, 1879, married January 31, 1895 to Abbas Pasha Helim, and Nimet Hanem, born November 6, 1881, married (1) January 5, 1898, to Djemil Tassou Pasha, divorced (2) in 1904, to Hussein Kemal-ed Din Pasha.

The present sovereign of Egypt is the seventh ruler of the dynasty of Mehmet Ali, appointed Governor of Egypt in 1806, who made himself, in 1811, absolute master of the country by force of arms. The position of the Khedive's grandfather, Ismail I.—forced to abdicate, under pressure of the British and French Governments, in 1876—was recognised by the Imperial Hatti

Shériff of February 18, 1841, issued under the guarantee of the five great European Powers, which established the hereditary succession to the throne of Egypt under the same rules and regulations as those to the throne of Turkey. The title given to Mehemet Ali and his immediate successors was the Turkish one of 'Vali' or Viceroy, but this was changed by an Imperial firman of May 21, 1866 into the Persian Arabic of 'Khidāwi Mīr', or, as more commonly called, Khedive. By the same firman of May 27, 1866, obtained on the condition of the sovereign of Egypt raising his annual tribute to the Sultan's civil list from 375,000*l.* to 720,000*l.*, the succession to the throne of Egypt was made direct from father to son, instead of descending, after the Turkish law, to the eldest heir. By a firman issued June 8, 1873 the Sultan granted to Ismail I. the hitherto withheld rights of concluding commercial treaties with foreign Powers, and of maintaining armies.

The predecessors of the present ruler of Egypt were—

	Born	Died	Reigned
Mehemet Ali, founder of the dynasty	1769	1849	1811-48
Ibrahim, step-son of Mehemet	1789	1848	June—Nov 1848
Abbas, grandson of Mehemet.	1813	1854	1848-54
Said, son of Mehemet	1822	1863	1854-63
Ismail, son of Ibrahim	1830	1895	1863-79
Mohamed Tewfik, son of Ismail	1852	1892	1879-92

The present Khedive of Egypt has an annual allowance of ££100,000

### Government and Constitution

The administration of Egypt is carried on by native Ministers, subject to the ruling of the Khedive. From 1879 to 1883 two Controllers General, appointed by France and England, had considerable powers in the direction of the affairs of the country (Khedivial Decree, November 10, 1879). In the summer of 1882, in consequence of a military rebellion, England intervened, subdued the rising, and restored the authority of the Khedive. In this intervention England was not joined by France and as a result, on January 19, 1883, the Khedive signed a decree abolishing the joint control of England and France. In the place of the Control, the Khedive, on the recommendation of England, appointed an English financial adviser, without whose concurrence no financial decision can be taken. The financial adviser has a right to a seat in the Council of Ministers, but he is not an executive officer. The Khedivial Decree appended to and approved by the Anglo-French Convention of April 4, 1904, has removed most of the restrictions which encumber the management of Egyptian Finance. No modification may be introduced into the terms of the Decree without the assent of the signatory powers to the Convention of London of 1885.

The Egyptian Ministry is at present composed of six members, among whom the departmental work is distributed as follows —1. President—Interior, 2. Finances, 3. Foreign Affairs, 4. Justice, 5. Public Works, War and Marine, 6. Education.

On May 1, 1883, an organic law was promulgated by the Khedive creating a number of representative institutions, including a Legislative Council, a General Assembly, and Provincial Councils. The Legislative Council is a consultative body, consisting of 80 members, of whom 14 are nominated by the Government. The Council meets on Nov. 15 each year, and continues its session till the end of May, the following year. It might be summoned to hold extraordinary meetings by decree. Its session is not closed until

It informs the Government of its opinion on all questions submitted to it. It examines the budget and all proposed administrative laws, but it cannot initiate legislation and the Government is not obliged to act on its advice. Of its members, 18 residing in Cairo receive an allowance of 100*l.* a year for carriage expenses, and 17, having their residences in provincial towns, receive allowances varying between 285*l.* to 316*l.* a year for residential expenses in Cairo. The General Assembly, which consists of the members of the Legislative Council with the addition of the 6 ministers and 46 members popularly elected, has no legislative functions, but no new direct personal or land tax can be imposed, and no public loan can be contracted, without its consent. It has to be summoned at least once every two years. The members, when convoked, receive an allowance of 1*l.* a day, with railway expenses. The Council of Ministers, with the Khedive, is the ultimate legislative authority. Since 1887 an Ottoman High Commissioner has resided in Cairo. The Provincial Councils have been reorganised and in 1910 were endowed with the powers of applying bye laws, authorising public markets, fixing the number and pay of ghaffirs (village watchmen), authorising the creation of *erhehs* (hamlets) and they are created local authorities in connection with elementary vernacular education and trade schools. They consist of two elected representatives from each *Markaz*. The *Mudir* is the *ex officio* President of the Council.

Egypt Proper is administratively divided into 5 governorships (*mohafzas*) of principal towns, and 14 *mudrias* or provinces, subdivided into districts or *Markaz*. In 1890 the Powers consented to a decree constituting a Municipality in Alexandria, with power to impose local taxes.<sup>1</sup>

In thirteen towns (Mansoura, Medinet el Fayum, Tanta, Zagazig, Dammanhour, Beni Suef, Mahala el Kubra, Minia, Mit Ghamr, Zifta, Rafr el Zayat, Hebouan, and Port Said) Mixed Commissions have been formed with power to impose taxes on residents who have given an express consent to be taxed for municipal purposes.

In 30 other towns a third class of town council (Local Commissions) exists, but there is no power to impose local taxes, the revenue being derived from grants from the central Government and receipts from water supply, slaughter houses, &c.

#### Governorships

1. Cairo
2. Alexandria
3. Suez Canal (Port Said —  
Ismailia)
4. Suez
5. Damietta

#### Mudrias

Bisal and El Arish (administered by the War Office).

A new district of Behera Province has been established at Marsa Matruh on the coast, near the Tripoli frontier, where increased port-accommodation has been provided.

### Area and Population.

The total area of Egypt proper, including the Oases in the Libyan Desert, the region between the Nile and the Red Sea, and El Arish in Syria, but excluding the Sudan, is about 400,000 square miles; but the cultivated

<sup>1</sup> In Egypt no foreigner can be taxed without the consent of his Government.

# 1884 TURKEY AND TURKISH STATES.—EGYPT

and settled area, that is, the Nile Valley and Delta, covers only 12,812 square miles. Canals, roads, date plantations, &c., cover 1,900 square miles. 2,650 square miles are comprised in the surface of the Nile, marshes, lakes, and desert. Egypt is divided into two great districts—'Mae-el-Bahr', or Lower Egypt, and 'El-Said', or Upper Egypt.

The following table gives the area of the settled land surface, and the results of the census of 1907 :—

Administrative Division	Area in sq. miles	Egyptians		Foreigners	Total	Population per sq. mile
		Sedentary	Nomads			
<b>Governorates</b>						
Cairo	45	545,538	4,548	103,009	653,105	15,230

<b>Estimated Sudan population*</b>	—	—	—	—	97,531	—

\* Including Damietta. \* Excluding Sinai and El-Arish. \* The Nomads scattered over desert areas were estimated only and not directly enumerated.

Of the total population, 5,667,074 were males and 5,620,285 females. A population consisting of 3,854 persons was enumerated in the Oasis of Siwa.

The foreign population, 131,414 in all, comprised 52,973 Greeks, 84,923 Italians, 30,655 British, 12,591 French, 7,704 Austro-Hungarians, 2,410 Russians, 1,347 Germans, 1,335 Persians, and 4,925 of other nationalities.

The growth of the general population of the country is exhibited by the following figures :—

1800 (French estimate)	2,490,300	1852 (Census)	5,331,181
1831 (Mohammed Ali)	2,538,200	1897 (Census)	7,734,455
1846 (Census)	4,474,440	1907 (Census)	11,287,559

The average annual increase from 1846 to 1897 was 1.25 per cent.; from 1897 to 1907, 1.79 per cent.; 1897-1902, 1.5 per cent.

The distribution of the population according to occupation in 1907, was as follows :—

Nature of occupation	Male	Female	Total
Agriculture	2,252,008	57,144	2,315,148
Manufactures	256,425	19,916	276,341
Transport	101,876	110	101,986
Trade	153,645	7,565	161,210
Public force	57,037	7	57,044
Public administrations	48,584	253	48,837
Liberal arts	183,738	2,240	184,978
Persons living solely on their incomes	99,522	13,300	112,822
Domestics	67,255	2,291,251	2,358,506
General designation without indication of a determinate occupation	92,544	5,781	106,325
Unproductive and unknown occupation	2,308,680	2,109,496	5,378,076
Fresh-water fish and game	27,421	69	27,490
Moored population	50,454	40,947	97,401
Extraction of minerals	4,112	—	4,112
<b>Total</b>	<b>5,667,074</b>	<b>5,620,235</b>	<b>11,287,309</b>

Of the Egyptian population over 10 years of age, 62.65 per cent. were employed in agriculture, of the foreign population, less than 1 per cent. Of the Egyptian population, 18.27 per cent. were employed in various industries and trades; of the foreign population, 47.85 per cent. Of the total number employed in the liberal professions, 48 per cent. were foreigners.

The principal towns, with their populations in 1907, are — Cairo, 854,476, Alexandria, 522,246, Tanta, 54,437, Port Said, 49,884, Mehalla el Kobra, 47,955, Mansura, 40,279, Assiut, 39,442, Dammanhour, 33,752, Fayum, 37,329, Zagazig, 34,999, Damietta, 29,354, Minia, 27,221, Sherbien, 25,472, Akhmim, 23,795, Beni-Suef, 23,357, Mansuf, 22,316, Shobin el Koum, 21,576, Mellawi, 20,249, Qena, 20,069.

### Religion and Instruction.

In 1907 the population consisted of 10,866,826 Moslems, 703,323 Copts, 22,635 Jews, Christians 12,736 Protestants, 57,744 Roman Catholics, 76,963 Greek Orthodox, 27,937 Eastern Christians, 206 others. Thus Moslems formed 91.84 per cent. of the population, Christians, 7.81 per cent., Jews, 0.24 per cent., others, 0.01 per cent. The highest religious and judicial authorities among the Moslems are the Sheikh ul Islam appointed by the Khedive and chosen from among the learned class of Ulema, and the Grand Oedi nominated by the Sultan, and chosen from amongst the learned Ulema of Stamboul. The principal seat of Koranic learning is the Mosque and University of El Azhar at Cairo, founded year 861 of the Hegira, 972 of the Christian era. In 1908 it had 329 professors and 9,940 students of Islam and subjects connected therewith. The Mosque of El Ahmadi at Tanta had 69 professors and 3,607 students.

There are in Egypt large numbers of native Christians connected with the various Oriental churches; of these, the largest and most influential are the Copts, the descendants of the ancient Egyptians; their creed is Orthodox (Jacobite), and was adopted in the first century of the Christian era. Its head is the Patriarch of Alexandria on the successor of St. Mark. There are three metropolitans and twelve bishops in Egypt, one metropolitan and two bishops in Abyssinia, and one bishop for Khartoum; there are also arch-priests, priests, deacons, and monks. Priests must be married before ordination, but celibacy is imposed on monks and high dignitaries. The Copts use the Diocletian (or Martyr's) calendar, which differs by 284 years from the Gregorian calendar.

# 1328 TURKEY AND TRIBUTARY STATES:--EGYPT

The following table shows the proportion of illiterates in the various religious communities (1907 census).—

Religion	Population	Number illiterate per 1000		
		Males	Females	Total
Muslims	10 389 445	822	998	900
Coptic	700,323	812	984	897
Jews	88,635	441	677	552
Others	175,578	281	523	392
Total	11 189 978	802	939	945

Subject to certain adjustments for purposes of comparison, it appears that the proportion of the native Egyptian population able to read and write in 1907, as compared with the returns of the previous census in 1897 is as follows —

1907		1897	
Males	Females	Males	Females
85 per 1000	3 per 1000	80 per 1000	9 per 1000

Until 1897, Government initiative in the matter of education was limited to supplying a Europeanised course of education designed to fit Egyptians for various branches of the public service and for professional careers. This system of schools, which owes its origin to the Europeanising zeal of Mohamed Ali Pasha, the first viceroy, consists of Primary Schools, Secondary Schools, and Professional Colleges (Law, Medicine, Engineering, Veterinary, Military, Teaching), in addition to a number of special schools (Accountancy and Commerce, Agriculture, Technical, Police, and Housewifery).

Scattered throughout the country there have existed from time immemorial a number of indigenous schools called 'Kuttabs'. In 1897, the Ministry of Education endeavoured to bring these independent 'kuttabs' voluntarily under Departmental supervision by means of a system of inspection and reward. Government aid was made dependent upon daily instruction being given in the 3 Rs, apart from any religious teaching, and upon the school reaching a satisfactory level of efficiency. The extent to which the scheme has developed is shown in the following table

Year	Number of private kuttabs under inspection	Number of pupils under inspection			Number of kuttabs awarded a grant-in-aid	Total amount of grant-in-aid awarded £E
		Boys	Girls	Total		
1900-10	2,582	174,022	16 851	190,873	8 034	21,479
1910-11	2,844	184 408	27 809	202,263	3 789	21,886
1911-12	2,548	191,667	18,758	210 446	3,279	22,963

A staff of 8 Inspectors and 35 Sub-Inspectors is exclusively engaged under the Ministry of Education in the improvement and development of these kuttabs. To improve the teaching staff the Ministry has instituted bi-weekly holiday classes for teachers at 35 centres, and has recently created 6 Normal Schools for men teachers and one for women teachers.

In close relationship with the kuttabs, Government has recently created trade schools for carpentry, metal-work, etc., at Bulak and Assut, and similar schools have been established through private enterprise at Cairo (4) Alexandria, Damamhar, Takh, Fayum, Beni-Suef, Abu Tig, Luxor, Bahag, Nag Hammadi, and other provincial towns.

The following table gives statistics (corrected to December 31st, 1911,

concerning the schools under the immediate direction of the Egyptian Government in 1897 and 1911 respectively. The schools marked with an asterisk are under Departments other than the Ministry of Education.

	1897			1911		
	Schools	Pupils		Schools	Pupils	
		Male	Female		Male	Female
<b>Professional Colleges —</b>						
Medicine	1	40	11	1	134	—

*Reformatory Schools	—	—	—	2	523	70
<b>Secondary Schools</b>	3	612	—	5	2,180	—
Higher Primary Schools	88	6,850	270	84	7,244	505
Kuttabs (Elementary Vernacular Schools)	50	2,547	377	146	9,901	8,268

By an enactment extending the powers of Provincial Councils, which came into force on January 1, 1910, these bodies are empowered to levy temporary taxes for purposes of public utility, including education. Seventy per cent of the taxation devoted to education must be applied to the improvement of elementary and industrial (including agricultural) education. The remaining 30 per cent. may be used for the development of Higher Primary and other schools of a more advanced grade. All of the Councils have availed themselves of their powers under the Act.

The following Table, compiled from the Statistical Return for 1911 issued by the Statistical Department shows the total number of schools in Egypt, whether Government or private, exclusive of 'kuttabs' —

Nationality	Number of Schools	Number of Pupils		
		Males	Females	Total
<b>Egyptian Institutions</b>	557	82,554	13,593	95,944
English	99	1,619	1,034	2,652
American	128	10,815	4,424	14,740
Austrian	8	728	503	1,291
Dutch	2	106	94	199
French	142	12,768	8,816	21,619
German	5	519	518	1,036

### Justice.

The indigenous tribunals of the country are the *Mahkemahs*, presided over by the *Qadis*. At the present time, they retain jurisdiction in matters of personal law (marriage, succession, guardianship, &c.) only, together with certain functions connected with the registration of title to land. In matters of personal law non-Muslims are, however, in general subject to their own Patriarchs or other religious chiefs. In other matters, natives are jurisdiction before the so-called *Native Tribunals* established in 1884-89. These now consist of 47 Summary Tribunals, each presided over by a single judge with (generally speaking) civil jurisdiction in matters up to £200 in value, and criminal jurisdiction in offences punishable by fine or by imprisonment up to three years, that is, police offences and misdemeanours, seven Central Tribunals each of the Chambers of which consists of three judges; and a Court of Appeal at Cairo, about half of its members being European.

Under a law of 1904, there are also weekly sittings in every *markaz* and *kisak* for the disposal of petty offences, the judge having powers up to three months' imprisonment or fine of £E10, and the prosecution being conducted by the police. Some of these *markaz* tribunals (at present numbering 25) have a limited civil jurisdiction, without appeal, up to £E10 in matters of real property, and £E20 in other matters. Civil cases not within the competence of the *markaz* or Summary Tribunals are heard in first instance by the Central Tribunals, with an appeal to the Court of Appeal. The Central Tribunals also hear civil and criminal appeals from the Summary Tribunals. Since 1905-6 serious crimes (and, under a law of 1910 all press offences) are tried at the Central Tribunals by the judges of the Court of Appeal sitting as an Assize Court, assizes being held monthly. There is a recourse on points of law to five judges of the Court of Appeal sitting in Cairo as a Court of Cassation. The prosecution before Summary Tribunals and Assize Courts is entrusted to the *Parquet*, which is directed by a *Procureur Général*, the investigation of crime is ordinarily conducted by the *Parquet*, or by the police under the direction of the *Parquet*; cases going before an Assize Court are further submitted to a special committing judge. Offences against irrigation laws, &c., are tried by special administrative tribunals.

Owing to the Capitulations, which apply to Egypt as being part of the Ottoman Empire, foreigners are exempted from the jurisdiction of the local tribunals. Mixed tribunals were instituted in 1876, consisting partly of native and partly of foreign judges, with jurisdiction in civil matters between natives and foreigners and between foreigners of different nationalities, or even between foreigners of the same nationality if the dispute relates to landed property in Egypt. These tribunals have, also, a limited penal jurisdiction in cases of police offences, and in 1900 penal jurisdiction was conferred upon them in connection with offences against the bankruptcy laws. There are three Mixed Tribunals of First Instance, with a Court of Appeal sitting at Alexandria. Civil cases between foreigners of the same nationality are tried by their own Consular Courts, which also try criminal cases not within the jurisdiction of the Mixed Tribunals, in which the accused are foreigners. By Decree of January 30, 1910, the Mixed Tribunals are continued for a term of five years. The Prisons Department in 1911 dealt with 81,410 persons, of whom 8,282 were females.

### Finance.

#### Revenue and expenditure for five years —

Years	Revenue	Expenditure	Years	Revenue	Expenditure
	£E	£E		£E	£E
1908	14,521,775	14,406,144	1911	16,792,750	14,972,868

## 1 Exclusive of the Domain Loan

The foreign debt of Egypt began in 1862, when loans amounting to 3,292,500*l* were issued for the purpose of extinguishing the floating debt. Other issues followed in rapid succession. The dual control by England and France began in 1879. In January 1880 the two Controllers General reported that Egypt could not possibly meet her engagements in full, and in July the Liquidation Law, in accordance with the recommendation of an International Commission of the Great Powers, was promulgated. By this law the United debt was reduced to 4 per cent interest, further conversions were made, and the United debt thus increased to 60,958,240*l*, certain unconsolidated liabilities were added to the Preference debt, which thus rose to 22,745,800*l*, and the Daira Sanieh debt was increased to 5,512,000*l*, the interest being reduced to 4 per cent. In 1886 and subsequent years further loans and conversions were entered into.

On October 15 1906, the Daira Sanieh loan was paid off. The condition and the charge of the various debts in January 1912 was as follows —

	Debt	Charge
	£E	£E
Guaranteed Loan 3 per cent	7,818,500	307,125
Privileged Debt 3½ per cent	31,127,770	1,052,253
United Debt 4 per cent	54,971,960	2,188,000
Domain Loan, 4½ per cent.	203,420	8,420
Total	94,121,650	3,555,898

On January 1 1913 the debt stood at £E94,349 680

In 1911 the debt was reduced by £350,540

The charges on account of debts of all kinds (including tribute), as shown in the estimates for 1912 amount to £E4,598 452

In 1883 and 1890, reserve funds were established, the balances of which in virtue of the Anglo-French Convention of April 4, 1904, were placed at the disposal of the Egyptian Government in 1905 less certain sums remaining in the hands of the Caisse de la Dette Publique for the service of the debt. The amount received by the Egyptian Government was carried to a General Reserve Fund.

In the General Reserve Fund on January 1, 1911 there was a balance of £E5 749 119 and during the year 1911 there was paid in £E2 303 645 total, £E3 052 764. From the Fund in 1911 payments were made amounting to £E2 205 152. The balance at the end of 1911 was £E5 947,612

## Defence

### EGYPTIAN ARMY

On September 19 1882 the existing Egyptian army was disbanded. The organisation of a new army was entrusted to a British general officer, who was given the title of *Sirdar*. Service is compulsory but owing to the small contingent required only a fraction of the men who are liable actually serve. Service is for three years. In the Sudanese battalions service is voluntary and extended. The army consists of 5 squadrons of cavalry, a camel corps, 5 batteries, 18 battalions of infantry (of which 6 are Sudanese and 1 is a special Equatorial battalion), a railway battalion and various departments. Most of the higher posts are held by British officers. The strength of the army is about 17 600.

### ARMY OF OCCUPATION

The British garrison or army of occupation consists of a cavalry regiment, a horse artillery battery, a mountain battery, a company of engineers, and 4 battalions (one company in Cyprus) stationed in the Nile Delta, and of a battalion of infantry and detachment of garrison artillery stationed in the Anglo-Egyptian Sudan. The establishment including departmental services, is 6 067 of all ranks. The Egyptian Government contributes 150,000*l* towards the cost of these troops.

## Production and Industry

The cultivable area of Egypt proper was reckoned in 1911-12 at 7 693 393 feddans (1 feddan = 1 038 acre) and of this 2 397 879 were uncultivated for want of reclamation. The readjustment of the land tax is now complete, the old distinction between *kharagi* and *Urhusi* tax has disappeared and the taxa on land range from 2 piastres (1 piastre = 2*½**d*) to 184 piastres per feddan according to the rental value. The *corvée*, or forced labour, has been abolished but the inhabitants are still called out to guard or repair the Nile banks in flood time and are also liable in any sudden emergency, in 1907 16,898 men were called out. The agricultural population (fellahs) forms about 61 per cent. of the whole. A large proportion of them are small land holders with under 50 feddans, while others, almost or altogether landless, are labourers, the relation between the employers and

the employed being mostly hereditary. The following table shows, for 1911, the number of landholders and the distribution of the land between foreigners and natives —

Extent of holding in feddans	Foreigners		Natives		Total of area		Total of landowners	
	Area in feddans	Land owners	Area in feddans	Land owners	Feddans	Per centage	Land owners	Per centage
Up to 1	1 161	1 906	880 817	830 636	881 463	0.99	841 132	58.41
From 1.5	5 786	2 197	646 038	452 769	1 001 854	18.35	454 920	31.51
5-10	5 803	767	528 092	75,015	534 865	9.79	76 882	7.30

40	602 641	1 907	1 780 577	10 82	2 448 15	44.76	12 393	0.81
Total	706 01	7 97	4 752 011	1 433 433	5 458 608	100.00	1 441 940	100.00

The Egyptian agricultural year includes three seasons or crops. The leading winter crops sown in November and harvested in May and June, are cereal produce of all kinds, the principal summer crops, sown in March and harvested in October and November are cotton sugar and rice the autumn crops, sown in July and gathered in September and October are rice, maize, millet, and vegetables generally. In Lower Egypt and Fayûm where perennial irrigation is effected by means of a network of canals tapping the Nile and traversing the Delta in every direction the chief crops are cotton rice, Indian corn, wheat barley, clover, cucumber, in Upper Egypt south of Deyrout where the basin system of irrigation, i.e. submergence at high Nile is generally adhered to cereals and vegetables are produced north of Deyrout the same conditions prevail as in Lower Egypt, except that no rice is grown. Where there is perennial irrigation two or three crops are secured annually.

Extensive reservoir works consisting of a dam at Arwan a barrage and lock at Assiut, and a barrage at Zifta have been completed. The storage capacity of the reservoir is estimated at 1 065,000,000 cubic metres. It has been decided to raise the level of the Dam by 6 metres, and thus double its capacity. A new barrage constructed at Esna ensures adequate irrigation of a large area of rasin land even in a year of low Nile. North of Deyrout an area of approximately half a million acres has been converted from basin to perennial irrigation in the last ten years. The production of cotton in six years was —

Year	Cantars	Year	Cantars
1906-07	6,249,883	1909-10	6 000, 72
1907-08	7 234 666	1910-11	7 673 587
1908-09	6 761 133	1911 1	7,424,208

In 1912 the area and yield of wheat were 1,447,837 acres and 4 204,819 tons barley, 382,827 acres and 1,234 133 tons, maize and millet, 1 925,967 acres and 9 852 941 tons; and rice, 237 357 acres and 1 616 881 tons.

In 1912 the sugar exported amounted to 240,475 cantars, valued at £1182 396 and the cotton exported amounted to 6 638,210 cantars, valued at £522,888 211 (1 cantar = 59.05 lbs)

## 1936 TURKEY AND TRIBUTARY STATES —EGYPT

Of the total imports in 1911 the value of ££38 690,344 and of the exports the value of ££28,014 925 passed through the port of Alexandria. In 1912 of the imports ££22 1,702 of the exports ££33,790 256.

Goods imported into Egypt are examined by experts, who determine their value according to the market price in their original country, plus the cost of transport, freight insurance &c. In order however to facilitate customs operations the administration, in communication with the merchants interested establishes on the same basis as above periodical tariffs for common articles of importation. In the statistics of the Custom House, the values are estimated according to the estimated price which served as the basis for the payment of duty now fixed at 8 per cent *ad valorem* (except coal, liquid fuel, charcoal firewood, timber for building purposes, petroleum, oxen, cows, sheep and goats whether alive or cold stored the duty on which was reduced to 4 per cent *ad valorem* from November 25 1905) without taking into account the amount of that duty. As regards exports, there are tariffs for nearly all of them estimated in the same manner as the tariffs of imports. The quantities recorded in statistics are those declared by the merchants and controlled by the Customs.

The origin of imports and destination of exports are declared by importers and exporters and controlled as much as possible by the searchers and appraisers of the Custom House.

Principal imports into the United Kingdom from Egypt, and the principal exports from the United Kingdom to Egypt according to Board of Trade returns —

The number and net tonnage of vessels that have passed through the Suez Canal and the gross receipts of the company, have been as follows in eight years —

Year	No. of Vessels	Net Tonnage	Receipts	Year	No. of Vessels	Net Tonnage	Receipts
			£				£
1904	4 27	17 401 50	4 797 000	1908	3 15	15 833 200	4 459 000
1905	4 110	13 154 100	4 100 000	1909	4 20	13 307 000	4 939 000
1906	3 115	13 411 404	4 400 000	1910	4 13	11 051 408	5 343 000
1907	4 207	13 798 434	4 804 000	1911	4 010	18 944 948	6 522 000

The number of passengers (civil and military) who went through the canal was, in 1906, 453 881, in 1907, 243 926, in 1909, 218,967, in 1909, 213 122, in 1910, 234,920, in 1911, 275 259.

The Suez Canal is 87 miles long, 66 actual canal and 21 miles lakes, connecting the Mediterranean with the Red Sea, opened for navigation November 17, 1869. The concession to the Suez Canal Company expires on November 17, 1968.

\* Including both commercial steamers and warships.

## Internal Communications.

On January 1, 1911, there were (exclusive of sidings) 1,481 miles of rails (double and single) belonging to and worked by the State, and 768 miles of rails of agricultural light railways owned by private companies. 811 miles of State and 659 miles of companies' rails are in the Delta, and 644 miles of State and 104 miles of light railways are in Upper Egypt. This is exclusive of the Sudan military railway to Khartum, and of the Upper Egypt Auxiliary Railways and Western Oases Railway acquired by the State in July 1906 and June 1909 respectively. The length of the former is 375 miles and that of the latter 122 miles. Their gauge 4 ft. 8½ in. and 2 ft. 6½ in. respectively. The railways have a gauge of 4 ft. 8½ in. inside rails except the line from Luxor to Aswan, which is 3 ft. 6 in. gauge.

The following table shows for the last five years the length of line of the State Railways, the number of passengers and weight of goods carried, and the net receipts —

Year	Line	Number of Passengers	Goods carried	Net receipts
	Miles		Tons	£E
1907	1 443	25,087,027	4,178,561	1,611,848
1908	1 449	26 281,861	3,997,444	1,556,230
1909	1,449	26 808,000	3 697,227	1,328,230
1910	1 453	25,727,000	3,254 493	1,494,227
1911	1,481	27 941 000	4,213,501	1,660,220

The working expenses, £E2,030,849 in 1911 represent an average of 55.02 per cent. of the gross receipts, which were £E3 691,179.

The telegraphs and telephones belonging to the Egyptian Government were, at the end of 1911, of a total length of 6 229 kilom., the length of the wire being 20,535 kilom. The Eastern Telegraph Company, by occasional, have telegraph lines across Egypt from Alexandria *via* Cairo to Suez, and from Port Said to Suez, connecting their cables to England and India. Number of telegrams in 1911 was 2,766,185, as against 2,564,827 in 1910, not including service telegrams and those sent by the Eastern Telegraph.

There were in 1911 1 701 post offices and stations. In the internal service (1911) there passed through the post-offices 80,129,000 letters and post-cards, and 17,054,000 newspapers, &c., and samples; in the external service, 19,192,000 letters and post-cards, and 19,595,000 newspapers, &c., and samples. Receipts £E112,332, expenses £E279,998.

## Money and Credit.

The National Bank has a capital of 3,000,000L. with reserve funds amounting to 1,550,000L. The Agricultural Bank has a capital of 3,740,000L. It has Government guarantee of interest at 3 per cent., and it lends money to the Fellahs at 8 per cent. interest.

In 1901, a Post-Office Savings Bank was opened, and on December 31 of that year, it had 6,760 depositors with balances amounting to £E67,432. On December 31, 1912, the depositors numbered 205,003, and their balances amounted to £E576,493. Of the depositors in 1911, 83,896 were natives, and 27,757 were Europeans.

## Money, Weights, and Measures

## MONEY

By decree of November 14, 1885 (7 Safer 1303), the monetary unit of Egypt is the gold Egyptian pound of 100 piastres. It weighs 8.5 grammes 875 fine, and therefore contains 7.4875 grammes of fine gold. Its value in sterling is £1 0s. 6½d.

The 10-piastre silver piece weighs 14 grammes 838 fine, and therefore contains 11.67 grammes of fine silver. The piastre is worth 2.46d. in English money. It is subdivided into tenths (*ochrel guerche*).

Coins in circulation are the Egyptian pound (100 piastres) in gold; 20, 10, 5, 2 and 1 piastre pieces in silver; 1, ½, ¼, ⅓ piastre pieces in nickel, and ⅓ and ⅙ piastre pieces in bronze. Silver coin is legal tender only up to £E2. For some years gold coins have not been issued, and the gold circulating in Egypt and the Sudan is almost exclusively English sovereigns, which are legal tender at the rate of 97½ piastres.

Egyptian money is now minted at the Birmingham Mint. The nominal value of the coinage (including recoinage) from 1887 to 1911 was —

Years	Gold	Silver	Nickel	Bronze	Total
	SE.	SE.	SE.	SE.	SE.
1887-1900	50,024	3,537,907	411,256	16,324	4,015,511
1910	—	90,117	15,000	1,200	78,617
1911	—	329,909	26,648	1,400	357,957
1887-1911	50,024	3,927,933	448,019	19,924	4,445,899

By a decree of the Khedive, dated April 28 1891, the metrical system of weights and measures was ordered to be employed in all public and administrative transactions from January 1, 1892.

## MEASURE OF CAPACITY

The *Ardeb* is equal to 43.579 gallons, or 5.44739 bushels.

The approximate weight of the *ardeb* is as follows — Wheat, 315 rotls, beans, 320 rotls, barley, 250 rotls, maize, 315 rotls, cotton seed, 270

## WEIGHTS.

<i>Okeah</i>	=	1.3208 ounces
<i>Rohi</i>	=	29.049 lb.
<i>Oke</i>	=	2.7518 lbs.
<i>Kantar</i> { or 100 Rotls or 36 Okeas }	=	99.0492 lbs.

## LENGTH MEASURES

<i>Dikka Baladi</i> (town)	=	32.3360 inches
<i>Dikka Minara</i> for building, &c	=	29.4351
<i>Kasabak</i> = 3.88 yards	=	135.7653

## MEASURE OF SURFACE.

*Faddah*, the unit of measure for land, = 7,453.128 sq. paces = 1.93808 square  
1 sq. pld = 5.05 sq. ft. = 5.22 sq. metres.

### Diplomatic and Consular Representatives

Cairo — *His Majesty's Agent and Consul General in Egypt Minister Plenipotentiary* — Field Marshal Viscount Kitchener of Khartoum, K P, GCB O M, C C S I GCMG, GCIE

*Councillor* — M Cheetham, C M G

*Secretaries* — Lord Colum Crighton Stuart R H (reg (Actg) and W F Rattigan

*Consul at Cairo* — A D Alban

*Consul General at Alexandria* — D A Cameron, C M G

There are also Consular representatives at Mansura, Tanta, Zagazig, Birket-es Sab and Port Said

## ANGLO-EGYPTIAN SUDAN

### Government.

The rule of Egypt in the Sudan after having gradually extended during the course of 60 years was interrupted in 1892 by the revolt of the Mahdi, who, with his successor, the Khalifa held the country for about sixteen years under a desolating tyranny. In 1898 the Anglo-Egyptian army commenced operations for the recovery of the lost provinces and on September 2, 1898, the overthrow of the Khalifa was completed. In November, 1899 he was overtaken by the Egyptian forces near Gedil where he was slain in battle, and his remaining followers taken prisoners.

A convention between the British and Egyptian Governments signed at Cairo, January 19 1899 provides for the administration of the territory south of the 22nd parallel of latitude by a Governor-General, appointed by Egypt with the assent of Great Britain, and declares the general principles in accordance with which the administration shall be carried on. The British and Egyptian flags shall be used together. Laws shall be made by proclamation. No duties shall be levied on imports from Egypt, and duties on imports from other countries via the Red Sea shall not exceed those levied in Egypt. The import and export of slaves is prohibited and special attention shall be paid to the Brussels Act of 1890 respecting the import and export of arms, ammunition and spirits.

The Sudan has been divided into thirteen Provinces. The Governors of provinces are British Officers of the Egyptian Army employed under the Sudan Government or British civil officials of the Government. Administration is carried out through British Inspectors in charge of one or more districts into which the provinces are subdivided these units being supervised by District officials who are in most cases Egyptian officers but from the Egyptian Army.

In 1910 a Governor-General's Council was created to assist the Governor General in the discharge of his executive and legislative powers. All ordinances laws and regulations are now made by the Governor General in Council.

Darfar, to the west of Kordofan, is within the limits of the Anglo-Egyptian Sudan and pays tribute but the management of its internal affairs is left almost entirely to its hereditary Sultan.

The Enclave of Lado, which was contained in the occupation of H M King Leopold II, King of the Belgians, during his reign, by the Agreement signed at Brussels on May 12, 1908, reverted to the Anglo-Egyptian Sudan on his death, and has been included in the Mongalla province.

### Area and Population.

Extending southwards from the frontier of Egypt to Uganda and the Belgian Congo (approximately N lat 5°), a distance of about 1,850 miles, and stretching from the Red Sea to the confines of Wadai in Central Africa, the subject territory has an area of about 984,520 square miles. The population is now roughly computed at 3,000,000. Massawa, which was formerly Egyptian, now belongs to the Italian Colony of Eritrea, Harrar was, by agreement, made over to the local Emir and now belongs to Abyssinia while Zeila and Berbera now belong to British Somaliland. The Eritrea-Sudan frontier has been completely delimited and demarcated as also has the greater part of the frontier with Abyssinia (see under *Abyssinia*). The chief towns are Khartum population (1909) 18,230, the capital, Omdurman (the old Dervish capital) population (1912) 48,000, Khartoum North population 35,295, Halfa, Merowe, El Damer, Athara, Port Sudan, Suakin, Kassala, El Dueni, Kosti, El Obeid, Nahud, Wad Medani, and Singa.

### Instruction.

The schools under the Central authority are classified as follows.—There are first the elementary vernacular schools, Kuttab, as they are called, 47 in number (June 1912), situated in all parts of the country and with a total number of about 3,226 pupils. In these schools instruction is given to boys from 7 to 10 years of age in reading, writing, arithmetic and religion. Next there are the primary schools of which there are now six—at Khartum, Omdurman, Berber, Wad Medani, Halfa, and Suakin. The subjects taught in schools of this class include English, Arabic, Mathematics, and in some cases land measuring, and the total number of boys in attendance is 610. After completing their primary course, boys can proceed to the secondary school at the Gordon College or they may be employed as clerks or translators in Government offices. The secondary school at Gordon College numbers 53 pupils, 50 of whom take a course in engineering and surveying while the rest are trained to be teachers in primary schools. There is also in the Gordon College buildings a training college attended by 98 students, who undergo a five years' course of training, after which they are drafted out as teachers in vernacular schools or as kadiis in district courts. The industrial workshops of which there are at present three at Khartum, Kassala and Omdurman total 258 boy apprentices. At Khartum and Kassala, smith work, carpentry, fitting, &c., is taught and at Omdurman stone cutting and brick work. A primary school has been constructed adjacent to the Gordon College while a boarding house to accommodate 100 is shortly to be put in hand. A start has been made in the education of girls by the opening of a girls' school at Rufaa—which is at present attended by 60 students. Affiliated to the Gordon College are the Wellcome Tropical Research Laboratories, where investigations are carried on in connection with diseases and with the economic products of the country.

### Justice.

In Khartum and Port Sudan civil justice is administered (except in small cases) by civil judges who are English barristers or Scottish advocates. Elsewhere civil cases are heard by Governors and Inspectors of provinces, in some provinces a special inspector, called a judicial inspector, is appointed for this work. Civil judges sometimes go on circuit.

Appeals are heard by the Chief Judge, an English barrister, usually sitting alone, but sometimes with two of the civil judges.

The Mohammedan Law Courts administer the Moslem religious law in cases between Mohammedans relating to succession on death, marriage, divorce, and family relations generally, and also Mohammedan charitable endowments.

Criminal justice is administered either by single magistrates, or courts of three magistrates. Governors and inspectors of provinces and the district officials above mentioned are the magistrates. With few exceptions, decisions of magistrates and courts require confirmation either by the Governor of the province or by the Governor-General, both of whom have extensive powers of revision.

The Sudan penal code is an adaptation of the Indian penal code

### Finance

The general revenue of the Sudan was estimated in 1912 at ££1,375 600, and the ordinary expenditure at ££1,710 600. The deficit of ££335 000 is met by a grant from Egypt. In this expenditure, however, is included the sum of ££172,000, which the Sudan Government pays Egypt for the upkeep of the Egyptian Army in the Sudan, thereby reducing the actual contribution from Egypt to ££163 000.

This annual contribution paid by Egypt to balance the Budget has been reduced by ££90,000 in the last four years, and further large reductions are contemplated in the near future. It is estimated that the sums received by Egypt for custom dues, railway transport, posts and telegraphs, etc., through the occupation of the Sudan practically amount to as much as the contribution.

The actual figures for the last six years of revenue and ordinary expenditure, exclusive of the sum of ££172,000 paid for the Egyptian Army, are as follows (££1 = £1 0s 6d.) —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	££	££		££	££
1907	975,973	1,011,237	1910	1,171,007	1,214,870
1908	979,543	1,108,637	1911	1,211,213	1,350,264
1909	1,042,529	1,152,619	1912 <sup>1</sup>	1,375,600	1,558,600

<sup>1</sup> Estimates

The revenue is chiefly derived from railway and steamer receipts, custom dues, and taxes levied on land, animals, date trees, and gum.

### Production and Commerce.

The Sudan still suffers from the effects of the Dervish oppression, during which it was largely depopulated, wide tracts having gone out of cultivation and trade having been abandoned. The northern provinces show the first signs of returning prosperity, but those of the south possess great natural resources. Several concessions have been granted for the development of land for agricultural purposes in the northern provinces. The completion of basin irrigation works in Dongola has attracted thereto a considerable population who are being instructed by agriculturists from Egypt in the more efficient tillage of the land than brought under cultivation. Egyptian cotton has been successfully established on the Nile, as well as in the Tekar district of the Red Sea Provinces, and increasing quantities of cotton, which compare favourably with corresponding varieties grown in

Egypt, are being produced annually. Experimental cotton growing is also being conducted in the Gezira, the fertile tract of country between the Blue and White Niles, where with a proper system of irrigation, it is believed, an extensive area may be put under cultivation.

The opening of Egypt as a market for the surplus cattle of the Sudan, which has been rendered possible by strict veterinary organisation, has resulted in the growth of a very considerable trade in slaughter cattle and sheep, which it is estimated were worth about 250 000*l.* during 1911. Increased railway and river transport facilities are widening the area of supply and already the nomad Arabs from Western Kordofan and from Kassala are recognising the profits to be gained by disposing of their stock.

Along the Blue Nile and its affluents, the Rahad and Dinder, the soil is rich and a wide area which now bears such crops as dura, millet, sesame and pulses, might be converted into a cotton and wheat producing region. The vast forests which line the river banks, rich in fibres and tanning material, extend to the frontiers of Abyssinia. On the White Nile the soil is less fertile, but the forests contain valuable trees—the ebony tree, the gum acacia, the bamboo, and the rubber creeper. The finest gum forests are in Kordofan, and the best rubber in the Bahr el Ghazal.

In July, 1905 a Proclamation was issued rendering illegal the sale of land by natives without the consent of the governor of the Province in which the land is. This measure is intended for the protection of the natives. A cadastral survey of cultivated lands, accompanied by the settlement and registration of titles to land, has been nearly completed in the northern provinces. An extension of the system southwards is under consideration.

Gold is the only mineral at present being successfully exploited in the Sudan and mines are being worked at Um Nabard.

The imports include clothing, coal, machinery, and railway material, the exports gum, ivory ostrich feathers cereals cotton, dates, cattle, and sheep.

IMPORTS AND EXPORTS

Year	Imports.	Exports.	Year	Imports.	Exports.
	££	££		££	££
1908	1,952,970	565,225	1910	1,931,420	977,021
1909	1,820,115	63,465	1911	2,723,949	1,576,966

Trade by countries for two years —

Country	Imports.		Exports.	
	1910	1911	1910	1911
	££	££	££	££
Egypt	574,743	802,513	640,761	757,230
United Kingdom	600,370	793,416	100,273	225,220
Australia	125,950	113,804	3,821	2,925
India and Aden	108,715	155,089	20,831	6,000
France	11,635	17,611	56,922	136,965
Germany	17,563	24,205	43,509	92,516
United States	8,532	2,260	21,223	48,025
Other countries	172,878	268,072	80,061	106,308
Total	1,931,420	2,972,642	977,621	1,576,966

The returns show increases in the imports of cotton fabrics (££580,897 in 1911 as compared with ££490,945 in 1910), metal wares and machinery, refined sugar, flour, and coal.

Exports of gum and cotton were valued at ££435,622 and ££337,575 respectively, as compared with ££217,932 and ££224,763 in 1910.

### Internal Communications

The railway from Wadi Halfa to Khartum, which was constructed for military purposes during the re-conquest was declared open for general traffic on December 12, 1899. A connection with the Red Sea at Port Sudan was opened in October, 1905 and an extension of the line to Sennar and el Obeid was opened for traffic in February, 1912. The total length of line is, approximately, 1,500 miles.

All navigable arms of the Nile and its tributaries between Assuan (Egypt) and Rejaf are served by a fleet of Government passenger and cargo steamers which maintain a regular scheduled service over more than 2,500 miles of water.

Through telegraphic communication exists with Cairo, Rejaf and Massawa (Eritree) and at the end of 1911 there were 4,985 miles of internal telegraph lines open. There are 63 post and telegraph offices.

*Governor General* — Lieut General Sir Reginald Wingate, C C V O, K.C.B. K.C.M.G., D.S.O., R.A., Sirdar of the Egyptian Army.

## URUGUAY

(REPÚBLICA ORIENTAL DEL URUGUAY)

## Constitution and Government.

THE Republic of Uruguay, formerly a part of the Spanish Viceroyalty of Rio de la Plata, and subsequently a province of Brazil, declared its independence August 25, 1825, which was recognised by the Treaty of Montevideo, signed August 27, 1828. The Constitution of the Republic was sworn July 18, 1830. The legislative power is in a Parliament of two Houses, the Senate and the Chamber of Representatives, which meet in annual session extending from February 15 to July 15. In the interval of the session, a permanent committee of two senators and five members of the Lower House assume the legislative power as well as the general control of the administration. The representatives are chosen for three years, in the proportion of 1 to every 3 000 inhabitants of male adults who can read and write. The senators are chosen by an Electoral College whose members are directly elected by the people: there is one senator for each department, chosen for six years, one third retiring every two years. There are 76 representatives and 19 senators.

The executive is given by the Constitution to the President of the Republic, elected for the term of four years.

*President of the Republic*—Señor José Batlle, elected March 1, 1911.

The President is assisted in his executive functions by a council of ministers divided into seven departments, namely those of the Interior and Warship, Foreign Affairs, Finance, War and Marine, Justice and Public Instruction, Industry, Labour and Communications, and Public Works.

## Area and Population

The following table shows the area and the population of the departments according to the results of the census of December 31, 1911.—

Departments	Area, square miles	Population Dec. 1911	Pop. per square mile Dec. 1911
Artigas	4 809	91 880	7.1
Canelones	1 833	9 719	53.3
Cerro Largo	7 773	49 307	8.0
Colonia	2 192	63 734	29.0
Durazno	5 520	47 115	8.5
Florida	1 441	14 089	10.8
Florida	4 703	51 202	10.9
Maldonado	1 784	33 168	20.9
Minas	4 844	67 086	11.7
Montevideo	256	358,125	1 320.9
Paysandú	5 115	48,419	9.4
Río Negro	3 269	27 022	8.4
Rivera	3 796	39 413	10.3
Rocha	4 980	29 083	9.1
Salto	4 968	54 169	11.1
San José	2,687	61 785	19.2
Soriano	2,560	44,720	13.6
Tacuarambó	8 074	51,506	6.3
Treinta y Tres	8,686	32,807	8.2
Total	72,210	1,177 560	16.1

Estimated population, December 31, 1910, 1,112,000

The results of the census of October, 1908, showed a population of 1,042,186 (530,008 males and 512,178 females). Of this total, 180,722 were foreigners, 62,867 being Italian, 54,885 Spanish, 27,789 Brazilian, 18,600 Argentine, 8,341 French, 1,324 British, 1,406 Swiss, 1,112 German, and 4,581 of other nationalities.

The population of Montevideo City in November, 1912, was 352,487. Of the other cities, Paysandú had 20,968 inhabitants; Salto, 19,738, Mercedes 15,667.

Births, deaths, and marriages for five years. The births and deaths include still births --

Years	Living Births	Still Births	Marriages	Deaths	Surplus of Births over Deaths
1907	33,057	1,168	4,444	15,461	18,066
1908	35,201	1,408	4,384	14,421	21,099
1909	35,608	1,287	6,271	15,249	20,414
1910	35,227	1,307	6,816	16,376	19,413
1911	37,530	1,367	6,967	16,513	20,978

Of the living births in 1911, 9,823 or 26.3 per cent., were illegitimate. For five years the arrivals and departures by sea at Montevideo were --

	1907	1908	1909	1910	1911
Immigrants	111,589	112,083	116,053	122,514	141,224
Emigrants	96,067	90,670	102,707	106,160	123,984

Of the immigrants landing in Montevideo in 1911, 16,605 were Spanish, 15,319 Italian, 381 Brazilian, 1,519 French, 1,277 German, and 1,213 English.

### Religion and Instruction

The Roman Catholic is the State religion but there is complete toleration. The Archbishop of Montevideo has 2 suffragan bishops. The 1908 census showed 430,095 Catholics, 12,283 Protestants, and 45,470 unspecified.

In 1908, the population over six years of age numbered 1,042,668 (861,583 Uruguayans and 181,085 foreigners) and the illiterates over six years of age numbered 350,547 (266,045 Uruguayans and 84,502 foreigners).

Primary education is obligatory. In 1911 there were 934 public schools with 82,441 enrolled pupils.

There is at Montevideo a university, with faculties of law, social sciences, medicine, mathematics, commerce, agriculture, and veterinary sciences. There are also a preparatory school and other establishments for secondary and higher education with 2,591 pupils. In 1910 the university had 112 professors, 530 regular students, and 661 pupils receiving secondary instruction. There are normal schools for males and for females. There is a school of arts and trades supported by the State where 185 pupils receive instruction gratuitously. At the military college, with 8 professors, there are 46 pupils. There are also many religious seminaries throughout the Republic with a considerable number of pupils.

For the relief of poverty there are a charity hospital, an hospital for the insane, an isolation hospital, an asylum for beggars, an orphan asylum, and 3 infant schools.

### Justice

In 1907 the judicial system was reformed. A High Court of Justice was established consisting of 5 judges elected by the General Assembly of the Chambers, the President to be chosen annually by the members of the Court from amongst themselves. This court has original jurisdiction in constitutional, international, and admiralty cases, and will hear appeals in cases in which the decision has been modified or altered in other appeal courts of which there are 2 each with 3 judges. In Montevideo there are also 3 courts for ordinary civil cases, 2 for commercial cases, 1 for Government, 2 for criminal cases, 1 correctional court, and 2 for criminal investigation. Each departmental capital has a departmental court, and each of the 205 judicial sections into which the Republic is divided has a justice of peace court, further each section is divided into districts in which deputy judges (alcaldes) try cases involving small amounts.

In September 1907 the death penalty was abolished penal servitude for a period of 30 to 40 years being put in its place.

### Finance

The receipts and expenditure for recent years are stated as follows (4 7 dollars = £1)

	Receipts	Expenditure		Receipts	Expenditure
	£	£		£	£
1907-08	4,334,140	4,008,940	1910-11	6,478,110	6,477,441
1908-09	5,023,908	4,494,560	1911-12	7,374,950	7,474,930
1909-10	5,413,040	5,524,330	1912-13	47,000	474,980

‡ Estimates.

The estimates of revenue and expenditure for 1912-13 were:—

Revenue	Dollars	Expenditure	Dollars
Customs	16,856,000	Legislature	600,000
Property tax	4,380,000	Presidency	86,107
Trade licences	1,690,000	Ministry Foreign Affairs	647,886
Factory and tobacco taxes	1,737,000	" Government	3,831,784
Stamp duty paper and stamps	1,685,000	Finance	2,167,732
Rail profits	1,465,760	Industries	1,487,786
Post and telegraph	730,000	Public Works	1,845,840
Duties on imports and exports	1,000,000	War and Marine	4,710,401
Other receipts	6,244,600	Public Instruction	3,210,641
		Justice	876,282
		National obligations	17,110,911
Total	35,148,900	Total	35,182,812

The amount of the public debt of Uruguay on January 1 1912, is officially given as 181,857,541 pesos (28,954,706*l.*). The service of the public debt in 1911 was 6,964,608 pesos (1,688,731*l.*).

### Defence

The army of Uruguay consists of a small standing, or active, army, and the National Guard. Service in the active army is from 2 to 5 years, with re-engagement up to the age of 44. The recruitment of this army is, theoretically at least, on the voluntary principle, in practice it appears to be compulsory, and to be carried on after the method of the press gang. It consists of 5 battalions of rifles, 9 cavalry regiments, 2 field batteries and some fortress artillery, with a peace strength of about 4,000.

The National Guard is a militia, service in which is compulsory. It is divided into three classes, or 'bans.' The first 'ban,' or 'mobile national guard' contains all the young men fit for military duty between the ages of 17 and 30, and forms a more or less organised force of 15,000 to 20,000 men. It would take the field with the active army. The second ban, consisting of those between 30 and 45, is the 'departmental,' or provincial, national guard. Its units do not move out of their own departments, but the men can be drafted to make good the losses of the mobile units in time of war. The third ban, containing all the men between 45 and 60 is the 'territorial force,' and is only liable to garrison duty in its own districts. The total strength of the National Guard (all three bans) is nominally, about 100,000 men.

The total strength of the field army may amount to three divisions of about 12,000 men each. There is also a police force, with an establishment of 5,000.

The infantry of the active army is armed with the Mauser rifle, the 2 field batteries have the 7.5 cm Krupp. The National Guard is mainly armed with the Remington rifle and old de Bange guns.

The fleet consists of the cruiser *Montevideo*, 2,300 tons (formerly the Italian *Dogali*), armed with 6 inch guns, the yacht *18 de Julio*, and the 'scout-destroyer' *Uruguay*, 1,400 tons, speed 28 knots, launched at Montevideo in 1910.

### Production and Industry

In Uruguay the agricultural industries are extending. The principal crops and their yield for two years were as follows—

	Area		Yield	
	1911-1912	1910-1911	1911-1912	1910-1911
	Acres	Acres	Owts	Owts.
Wheat	808,110	644,022	4,766,460	8,250,876
Rye	150	145	1,162	439
Barley	6,907	2,367	35,576	10,716
Oats	86,640	59,507	529,873	171,396
Linseed	142,575	94,730	448,340	—

In 1900 the land devoted to pastoral purposes covered about 37,000,000 acres, while the cultivated area was about 1,863,800 acres. In 1908 there were within the Republic 8,192,602 head of cattle, 546,307 horses, 26,286,396 sheep, 80,000 mules, 40,000 goats, and 180,099 pigs. In 1907 breeding stock was introduced from Europe and Argentina to the extent of 540 cattle, 2,282 sheep, and 181 horses. The cattle industry is followed in all the departments, but most extensively in Salto, Paysandú and Rio Negro. From Fray Bentos in 1911 there were shipped about 15,000 tons of animal products valued at 28,899,678 dollars about 112,500 head of cattle having been slaughtered in the year. The principal sheep-breeding departments are Durazno, with 2,738,168 sheep on runs covering 2,671,000 acres, and Soriano, with 1,699,736 sheep on 1,876,700 acres.

Wine is produced chiefly in the departments of Montevideo, Canelones, Salto, and Colonia. In 1912 there were 2,246 properties (2,202 in 1911), of 15,113 acres (14,218 in 1911) with 23,700,000 vines (20,700,000 in 1911), producing 46,455,626 lbs. of grapes (61,281,889 in 1911) and 2,786,999 gallons of wine (\$ 883,306 in 1911). Tobacco and olives are also cultivated. The production of rectified alcohol in Uruguay for the last 10 years was as follows (in gallons) — 1902, 631,404, 1903, 709,880, 1904, 505,469, 1905, 573,693, 1906, 683,369, 1907, 698,506, 1908, 638,460, 1909, 583,376, 1910, 568,538, 1911, 592,209. A Bill creating a State monopoly in the manufacture and rectification of alcohol is under discussion.

In the northern departments several gold mines are worked, and silver, copper, lead, magnesium, and lignite coal are found. The supply of electricity for light, power, and traction is a State monopoly (Bill passed October 20, 1912).

### Commerce

The special trade (merchandise only) was as follows (4 7 dollars 1<sup>2</sup>) —

	1906	1909	1910	1911	1912
Imports	\$ 7,365,703	\$ 174,540	\$ 144,1	\$ 7,65,000	\$ 10,506,383
Exports	9,28 0,26	0 1 4 0 4	1 2,8 214	1 476,000	10 947 872

In 1911 the customs receipts amounted to \$ 411,508; in 1912 to \$ 3,919,970.

The principal imports for 1910, and principal exports for 1910 and 1911 were (in thousands of gold pesos) as follows —

Imports	1910	Exports	1910	1911
Cotton	4,599	Wool	15,086	19,491
Iron and Steel	2,976	Hides	11,147	9,976
Coal	2,201	Meat and Extracts	7,571	7,017
Wood	1,901	Live Stock	1,430	790
Woolens	1,688	Sand	1,747	1,812
Machinery	1,5	Cereal	107	473
Chemicals	1,962	Animal Fat	1,876	1,119

The imports for 1910 and exports for 1910 and 1911 were distributed as follows (in thousands of gold pesos) —

From or to	Imports 1910	Exports 1910	Exports 1911	From or to	Imports 1910	Exports 1910	Exports 1911
Great Britain	11,68	3,420	3,938	Belgium	2,810	7,762	7,214
Argentina	2,772	5,857	4,855	United States	4,348	2,677	1,536
France	2,842	4,849	2,729	Brazil	1,904	4,101	3,237
Germany	6,441	4,626	6,068	Italy	2,948	1,585	1,324

Total trade between Uruguay and the U. K. (in thousands of pounds) for 5 years —

	1907	1908	1909	1910	1911
Imports from Uruguay into U. K.	1,067	1,045	1,206	1,743	1,436
Exports to Uruguay from U. K.	2,421	2,614	2,841	2,940	2,838

### Shipping and Communications

In 1911 Uruguay had 30 steamers of a total net tonnage of 28,960 tons, and 62 sailing vessels of a total net tonnage of 27 178 tons

There entered at the port of Montevideo in 1911, 2 717 vessels of 8,028,786 tons, and cleared 2,699 of 7,946,929 tons Of the shipping entered 1,272 of 3 790 458 tons were British vessels The port of Montevideo is visited by the steamers of 20 different companies, of which 12 are British, 2 German, 3 French, 2 Italian, and 1 Spanish

The National roads of Uruguay have a total length of 2,240 miles, and there are about 3,100 miles of departmental roads The construction and improvement of roads and bridges continues The hydrographic conditions of the country also supply convenient means of communication The maritime and river coast from Chuy, the most easterly maritime point, to Santa Rosa, the most northerly point on the river frontier, extends to the length of 685 miles, while the many affluents of the Uruguay river (about 1,000 miles in total length) provide channels for inland navigation

At the end of 1911 the railway system of Uruguay open for traffic had a length of 1,534 miles of standard gauge and 36 miles of narrow gauge all in British hands, total 1,570 miles Important extensions are in progress especially towards the Brazilian boundary There are 170 miles of tram way in operation the tramway lines of Montevideo have been electrified

The telegraph lines in operation have a total length of 4,860 miles, in 1911 319 offices through which 754 424 telegrams passed Two telephone companies have 16,518 miles of wire A Government or municipal telephone scheme is under consideration

In 1911 there were 1 018 post offices The correspondence movement comprised 106,286 323 letters packets &c

### Money and Credit

The Bank of the Republic has a nominal capital, raised in July, 1911, to 20,000 000 dollars This bank has the exclusive right to issue notes The president and directors are appointed by the Government On Jan 1, 1912, notes to the value of 25 638,911 dollars were in circulation

The principal banks in Montevideo, in addition to the Bank of the Republic, are the four British banks, viz., the London and River Plate Bank, the London and Brazilian, the British Bank of South America, and the Anglo South American Bank there are also the German Transatlantic Bank, the Spanish Bank, and the French and the Italian Banks The Uruguayan Commercial and the Popular Banks enjoy excellent financial reputations, and there are also various land and mortgage banking institutions In October, 1911 the Government proposed to create a National Insurance Bank with a monopoly of insurance business of all kinds A Bill to this effect became law early in 1912 It declares a State monopoly of life, fire, labour, and accident risks, and creates a State Insurance Bank operating all descriptions of insurance The declaration of the date when the monopoly is to become effective is left to the discretion of the Government In the meanwhile no new companies may be established The Insurance Bank opened its doors on March 1, 1912

### Money, Weights, and Measures

There is no Uruguayan gold coin in circulation, but the monetary standard is gold, the theoretical gold coin being the *peso nacional*, weighing 1.697 grammes, .917 fine The law of June 23, 1862, authorised the coining of

the *doblon*, or 10-peso gold piece, but, as yet, only foreign gold is in circulation.

The silver *peso* or *dollar* weighs 25 grammes, 900 fine. Other silver pieces are half, fifth and tenth of a peso. Bronze coins are 4, 2, and 1 centesimo pieces. The metric system of weights and measures has been officially adopted. The chief denominations of the old system are as follows:—

The <i>Quintal</i>	=	101 40 lbs avoirdupois
„ <i>Arroba</i>	=	25 35 „ „
„ <i>Fanega</i>	=	30 gallons.
„ <i>Lineal league</i>	=	5 64 English yards.
„ <i>Cuadra</i> of land	=	73 hectares = 1 8 English acre
<i>Square league</i>	=	10½ English square miles.

## Diplomatic and Consular Representatives

### 1 OF URUGUAY IN GREAT BRITAIN

*Envoy and Minister*—Frderico R. Vidiella.

*First Secretary*—Alfonso Saenz de Zumaran.

*Second Secretary*—Adolfo Sienra.

*Attaché*—Carlos de Santiago.

*Naval Attaché*.—Lt. Eduardo M. Saenz.

*Consul-General*.—Don José Barboza Terras.

### 2 OF GREAT BRITAIN IN URUGUAY

*Envoy Extraordinary and Minister Plenipotentiary*

*Secretary*—M. Arnold Robertson.

*Vice-Consuls*—Major de S. Dobree, R.M.A., C.E.R. Howland.

There are also Vice-Consuls at Fray Bentos, Maldonado, Paysandu, and Salto.

## VENEZUELA.

(ESTADOS UNIDOS DE VENEZUELA.)

### Constitution and Government.

THE Republic of Venezuela was formed in 1850 by secession from the other members of the Republic of Colombia. The Constitution in force is that of August 6, 1909. Legislative authority is vested in a Congress of 2 chambers, the Senate and the Chamber of Deputies. The former consists of 40 members elected for 4 years, 2 for each State, Venezuelans by birth and over 30 years of age. The latter is constituted as follows: Each State chooses by direct election for 4 years one deputy, a Venezuelan by birth and over 21 years of age, for every 35,000 inhabitants, and one more for an excess of 15,000. A State with fewer than 35,000 of population will have one deputy. The Federal District and the Territories which have, or may reach, the population fixed by law will also elect deputies.

The executive power is exercised by the President of the Republic in conjunction with the Cabinet Ministers through whom he acts, and the Council of Government in certain cases determined by the Constitution. The President is elected by Congress for 4 years, must be a Venezuelan by birth and over 30 years of age; he may not be re-elected for the following presidential period. Failing the President temporarily or absolutely, his place is supplied by the presiding member of the Council of Government. This Council consists of 10 members, 1 for each 2 States, who are chosen by Congress for 4 years.

*President of the Republic*—General J. V. Gómez, installed June, 1910.

The Cabinet consists of 7 Ministers: the Ministers of the Interior, of Foreign Affairs, of Finance and Public Credit, of War and Marine, of Fomento, of Public Works, and of Public Instruction. The seat of the General Powers of the Nation is at the City of Caracas; but, when any unforeseen circumstance requires, the Executive Power may fix its residence at any other point of the Federal District.

The States are autonomous and politically equal. Each has a Legislative Assembly, whose members are chosen in accordance with their respective Constitutions. Each State has a President, a general Secretary, and a Council of Government. The States are divided into districts and municipalities. Each district has a municipal council, and each municipio a communal junta. The Territories are administered by the President of the Republic through Governors, who in turn appoint secretaries.

### Area and Population.

Venezuela has an area of about 893,976 square miles, with a population officially estimated at 2,743,841 on January 1, 1912. But the official figures have been very much questioned and it is said that 1½ millions is nearer actuality. It is now divided into a Federal District, 20 States and 2 Territories, as follows:—

States, &c.	States, &c.	States, &c.
Apure	Lara	Trujillo
Aragua	Monagas	Yaracuy
Ansoategui	Mérida	Zamora
Bolívar	Miranda	Yella
Carabobo	Nueva Esparta	Ter. Amazonas
Cóchedes	Portuguesa	Delta-Amazono
Falcón	Sucre	Federal District
Guárico	Táchira	

In 1911 the marriages within the Republic, according to the official statistics, numbered 8,017, births, 83,753, deaths, 55,428, entrances of passengers, 2,204, departures, 7,219.

In 1910 in Caracas, the death rate was 38.5 per 1,000, and the birth rate 34.4.

### Religion and Instruction

The Roman Catholic is the State religion but there is toleration of all others. The Archbishop of Caracas has 5 suffragan bishops.

Instruction is given both in public and private schools, the former belonging to the Nation, the States, or the Municipios, the latter to private persons. Elementary instruction is free, and from the age of 7 to the completion of the primary grade, compulsory. In 1911 the reorganization of primary education was undertaken. The new system will aim especially at the creation of large school buildings and schools in villages. The elementary schools number 1,387 with 43,579 pupils, secondary schools 102, 58 for boys, 38 for girls, and 6 mixed. In Caracas there is 1 normal school for females, and in Carabobo another for males. To each is annexed an elementary school with first and second grade pupils. There are 34 national colleges and 83 private colleges, 21 of which are subventioned. The former have each a 2 years' preparatory course and a 4 years course in philosophy or for the bachelor's degree. In some of these commercial instruction is also given. At Caracas is the central University, and in Merida is the University of Los Andes. In the former are faculties of Political, Medical, Mathematical, and Ecclesiastical Sciences, the chairs of the last named faculty being in the metropolitan seminary. The Los Andes University has faculties of Political and of Ecclesiastical Sciences. The University rectors and vice rectors must be Venezuelans by birth, and they and the professors must hold the degree of Doctor of a Venezuelan University. Through faculty councils university graduates have some influence on the organization and improvement of scientific teaching. Special institutions are the National Academy of Fine Arts, National Library, College of Engineers, School of Arts and Trades, Military Academy, Nautical School, and a School of Engineering carried on at the Central University, and an agricultural and veterinary school at Maracay (1912).

### Justice

Federal judicial authority resides in the Court (which is also Court of Cassation) and in various tribunals and courts established by special laws. The Federal Procurator-General is appointed by Congress for 2 years.

The States have each a Supreme Court with 3 members called respectively President, Relator, and Chancellor. Each State has also a superior court, courts of first instance, district courts, and municipal courts. The States judicial officers hold their posts for 3 years. In the Territories there are civil and criminal judges of first instance, and also judges in the municipios.

### Finance

The revenue and expenditures for five years were (in bolivars or francs) —

	1908-09	1909-10	1910-11	1911 1 <sup>st</sup>	1912-13
	Bolivars	Bolivars	Bolivars	Bolivars	Bolivars
Revenue	50,410,123	48,552,867	62,839,074	51,131,350	52,500,000
Expenditure	57,668,900	57,337,175	61,640,000	61,131,200	52,500,000

The foreign debt of Venezuela began with its assumption of its share of the old Colombian debt in 1834, amounting to 1,888,396<sup>l</sup>, and 906,430<sup>l</sup>, arrears of interest, total, 2,794,826<sup>l</sup>. An arrangement was made in 1881 when new consolidated bonds were issued to the amount of 2,750,000<sup>l</sup> for the conversion of the external debt. In August, 1904, the outstanding amount of this debt with arrears of interest, and of the 5 per cent loan of 1896 with arrears of interest, was 5,818,726<sup>l</sup>. In 1905 this debt was converted

into the 3 per cent diplomatic debt of 5,229,700*l*, of which at the end of 1909 the outstanding amount was 4,611,500*l*

On December 31, 1911, the debt of Venezuela (according to official statement) stood as follows:—

	Bollivars
External debt	128 711 687
Internal debt	62 58, 001
Total	180 208 538
	(7 496 972 <i>l</i> .)

### Defence

The active army consists of infantry, 20 battalions, each of 400 men, artillery 7 batteries, each of 200 men. The naval force contains one battalion distributed among the vessels of the navy which consists of 2 gun boats, a transport, a tug, a torpedo boat, and a coastguard vessel

### Production and Industry

The surface of Venezuela is naturally divided into 3 distinct zones—the agricultural, the pastoral, and the forest zone. In the first are grown sugar cane, coffee, cocoa, cereals &c. the second affords runs for cattle, and in the third tropical products, such as caoutchouc balatá (a gum resembling rubber) tonga beans, copaiba, vanilla, growing wild, are worked by the inhabitants. The area under coffee is estimated at from 180,000 to 200,000 acres. The coffee plantations number about 33,000, and those of cocoa 5,000. There are about 11,000 sugar plantations, which flourished formerly, but have suffered from various causes, the latest blow having been the establishment of a Government monopoly in rum. The annual production of sugar is about 3 000 tons.

One fifth of the population is engaged in agriculture. The live stock in Venezuela is estimated as follows:—2,004,257 oxen, 176,868 sheep, 1 667,272 goats, 191 079 horses, 89 186 mules, 312,810 asses, 1 618,214 pigs. A new census of stock has been ordered. In the agricultural and cattle industries about 60,000 labourers are employed.

Venezuela is rich in metals and other minerals. Gold is found chiefly in the Yuruarí Territory. The quantity sent from that district in the 16 years 1884-99 was 1,394,480 ounces. In 1906 there were only 4 mining concessions worked. In the years ending June 1906 and 1907, 564 kilos of gold valued at 60,746*l*, and 817 kilos valued at 80 346*l* respectively were exported. There are silver mines in the States of Bermudez, Lara, and Los Andes. Copper, silver, and iron are abundant, while sulphur, coal, asphalt, lead, kaolin, and tin are also found. The copper mines at Aros on the Bolívar railway have been reopened (by an English Syndicate). Coal is worked at Coro in Falcon State and at Naricual. Iron mines at Imataca, on the Lower Orinoco, are being worked extensively since 1911. Salt mines in various States have been leased by the Government to a company at a yearly rent of 3 500,000 bolívars. Petroleum is found in many places and exclusive concessions were given to an English Company in 1909 and to an American in 1911. Asphalt from Lake Bermudez is exported to the United States. Round the island of Margarita and neighbouring islets off the north coast of Venezuela pearl fishing is carried on.

Venezuela has few industries, all manufactured materials required being imported, even the sacking necessary for the export of Venezuelan produce. Salt and matches are Government monopolies, the latter is farmed by an English Company.

### Commerce.

The value of the imports into and exports from Venezuela in the last 5 years was:—

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports	2 154 530	2 093 905	2 004 020	3 568 968	3 774 666
Exports	3 251 310	3 028 650	3 280 106	3 719 911	4 654 996

The import duties in 1911 amounted to 21 751 301 bolivars (25 bolivars = 1l)

During the first six months of 1912, the imports amounted to 2,148 229/ and the exports to 2 840 427/

Principal domestic exports in 1910 and 1911 were —

	1910	1911		1910	1911
	Bolivars	Bolivars		Bolivars	Bolivars
Coffee	41 718,856	39 016 825	Index	7 081 811	8,605 031
Cocoa	17 521 25	18 469 956	Cattle	1 004 353	1 081 041
Balata & rubber	15,781,663	15 357 991	Gold	1 604 652	2,337,880

Other exports were pearls, dividivi, asphalt, box wood, and heron feathers

The distribution of the commerce in 1910 and 1911 was mainly as follows —

	1910		1911	
	Imports	Exports	Imports	Exports
	Bolivars	Bolivars	Bolivars	Bolivars
United Kingdom and Colonies	10 784, 11	10 079 040	7 858 018	10 714 031
United States	10 836 524	32 087 779	27 045 443	36 725 090
Germany	10 566 576	11 985 839	16 509 307	22 120 214
Holland and Colonies	4 789 407	3 423 158	6 927 691	6 610 867
Spain	2,785 733	3 747 814	3 455 393	6 778 886
France	5,175 380	99 149 456	9 624 684	31 928 851
Italy	1 255,867	149 286	3 094 171	738 868
Cuba	8,467	77 830	18 267	795 559

Total trade between Venezuela and the United Kingdom (in thousands of pounds) for 5 years —

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports from Venezuela to U Kingdom	247	304	373	568	712
Exports to Venezuela from U Kingdom	762	700	424	800	1,096

### Shipping and Communications

The number of vessels which entered ports of Venezuela in 1911 was 1,684 of an aggregate tonnage of 1,340 207 tons (British vessels 132 of 242,825 tons). Of the total entered, those at La Guaira numbered 302 of 530,930 tons. The ports of the Republic are visited regularly by the vessels of American, British, Dutch, French, German, Italian, and Spanish steamship companies. Foreign vessels are not permitted to engage in the

coasting trade, except by special concessions or by contract with the Government

Venezuela had in 1911, 8 steamers of 2,046 tons, and 15 sailing vessels of 2,432 tons

The roads of the country are primitive and (away from the rivers and railways) traffic is carried on by means of pack animals and small mule carts

In Venezuela there are 12 lines of railway (5 national and 7 foreign—the latter including 4 British and 1 German) with a total length of about 538 miles. In 1911 the railway receipts amounted to 10,790 199 bolívares (2,005 427 from passengers, and 8 784,772 from other traffic). In Caracas electric tramways are worked by an English Company

There are about 11,160 miles of navigable water in Venezuela. The Orinoco Steamboat Company has a virtual monopoly of the navigation of the river and its tributaries.

The telegraph system has (1911) a network of 4,802 miles, 179 telegraph offices. An English company supplies telephonic communication in most parts of the settled country. Length of line (December, 1911) 10,637 miles. There are 282 post offices (1911)

### Money, Weights, and Measures

The Bank of Venezuela (capital 12,000,000 bolívares), had on December 31, 1911, a guarantee fund of 718 187 bolívares and reserve fund of 1,200,000 bolívares. Its note circulation amounted to 5 027,200 bolívares. The bank of Caracas has a capital of 6,000 000 bolívares, with reserve and guarantee funds amounting (December 31 1911), to 1 065 009 bolívares, note circulation, 2 077,600 bolívares, the bank of Maracaibo has a capital of 1,250,000 bolívares note circulation, 1,754,250 bolívares, there are many small banking establishments

The new Venezuelan banking law (1911) provides for a National Bank of Venezuela, which shall have power to emit notes to bearer convertible on presentation. This bank must possess a minimum capital of 30 000,000 bolívares gold, wholly subscribed and deposited in the treasury. In its current accounts with private individuals it may charge interest up to the rate of 8 per cent per annum as a maximum, but in its credit operations with the Government the maximum rate of interest is to be 5 per cent. The emission of notes of this bank shall not be greater than the amount of the capital

The law also provides for the establishment of a Bank of Territorial Credit that shall perform operations of loan at interest with security of mortgage on real property and industrial enterprises. Neither this nor the National Bank have yet been founded (March, 1913)

In July, 1896, it was enacted that the issue of paper money by the State should cease, and that no more silver or nickel money should be coined without legislative enactment. The intention was to issue in future only gold coin and certificates representing gold in hand. The currency in 1896 was stated to consist of 12,000 000 bolívares in gold, and 8,000,000 bolívares in silver. In 1904, 100 000 20 bolívar gold pieces were coined in Paris for Venezuela. From 1843 to 1905, coins to the value of 56 761,717 bolívares have been coined. In 1911 Congress sanctioned the coinage of 7 million bolívares of silver, and 8 million bolívares of gold

The *Bolívar* is approximately equal to 1 fr. Fractional coins are the *real* = about 5d. and the *medio* = about 2½d. The Venezuelan silver *dólar* contains 5 bolívares, and at par is about equivalent to 48 25 pence, the Venezuelan *peso* is not in circulation, but is used in accounts as equal to 4 bolívares.

A decree of May 18, 1912, provides that the official system of weights and measures shall be the metric system.

## Diplomatic and Consular Representatives

### 1 OF VENEZUELA IN GREAT BRITAIN

*Consul General in London.*—Dr P Arosta Delgado

There are Consular representatives at Cardiff, Liverpool, Manchester, Glasgow, and Southampton

## THE HAGUE TRIBUNAL

### OFFICIALITY

#### THE PERMANENT COURT OF ARBITRATION

The Permanent Court of Arbitration was established under the Act of July 29 1899 signed (and subsequently ratified) on the part of 24 Powers Under Protocol of June 14, 1907, for the accession of non signatory Powers the number of Powers represented in the Court has been largely increased The purpose is to facilitate arbitration for international disputes which it has been impossible to settle by diplomacy The Court is competent for all arbitration cases, unless the parties agree to constitute a special tribunal and its jurisdiction may be extended to disputes to which one or both of the parties are non signatory Powers, if the parties so agree When the signatory Powers desire to have recourse to the Permanent Court for the settlement of a dispute, the arbitrators called upon to form the competent tribunal for the purpose must be chosen from the general list of members of the Court If the parties disagree on the composition of this tribunal, its members must be appointed in accordance with the course prescribed in the Act

The Court has an International Bureau under the direction and control of a Permanent Administrative Council composed of the diplomatic representatives of the Signatory Powers accredited to the Hague and of the Netherlands Minister for Foreign Affairs who acts as President

The Permanent Court consists of persons of known competency in questions of International Law, of whom four at the most are selected by each of the Signatory Powers each appointment is for six years and may be renewed The list of members of the Court (revised up to February, 1913) is as follows The date of each appointment is stated (within brackets) —

**AMERICA UNITED STATES OF** Hon John W. Griggs *ex Attorney-General* (27 Nov 1906)  
Hon George Gray *Judge of Circuit Court* (27 Nov 1904) H F Oscar S Straus,  
*formerly Minister of Commerce and Labor* and late Ambassador at Constantinople,  
(8 Jan 1908) Hon Elihu Root *formerly Secretary of State* (15 Dec 1910)

**ARGENTINE REPUBLIC** H E Estanislao S Zeballos *Professor of Private International Law at the University of Buenos Ayres formerly Minister of Foreign Affairs and Worship* (8 July 1901) Luis Maria Drago *Deputy* (8 July 1907) Carlos Rodriguez Larreta, *Professor of Constitutional Law in the University of Buenos Ayres Deputy* (8 July 1907) M Joaquin V Gonzalez *Doctor of Law Senator President of the National University of La Plata formerly Minister of the Interior of Foreign Affairs and Worship of Justice and Public Instruction formerly Deputy* &c (17 Oct 1910)

**AUSTRIA HUNGARY** Henri Lammasch, *Professor of International Law in the University of Vienna, Member of the Austrian Herrenhaus* (4 Dec 1904) H E Albert de Bornevics *President of the Hungarian Academy of Sciences and Letters* (26 Feb 1904) H E Baron Ernest de Piener *President of the Common Supreme Court of Accounts, Member of the Austrian Herrenhaus* (26 Feb 1904) Dr Franz Nagy *Privy Councillor Member of the Hungarian Lower House*

**BELGIUM** R. E. Baron Descamps, Minister of Sciences and Arts, Secretary of the Institute of International Law (6 Oct. 1906) Ernest Nijls, Councillor of the Brussels Appeal Court (14 Sept. 1911) Arendt, Director-General at the Ministry of Foreign Affairs (23 January, 190 ) M. J. van den Fleugel, formerly Minister of Justice

**BOLIVIA** Severo Fernandez Alonso, former President of the Republic (18 Sept. 1907), H. E. Claudio Pinilla, Minister of Foreign Affairs (18 Sept. 1907) H. E. M. Imael Montes, Doctor of Law, formerly President of the Republic, Minister in London and Paris (14 Feb. 1910) H. E. M. Ignacio Calderón, formerly Finance Minister Minister at Washington (14 Feb. 1910)

**BRAZIL** H. E. Lauro de Rodrigues Pereira, former President of the Council of Ministers during the Empire (13 Sept. 190 ) H. E. Rui Barbosa, Senator (13 Sept. 1907) Clovis Bevilacqua, Jurisconsult of the Ministry of Foreign Affairs (13 Sept. 1907).

**BULGARIA** St. van Danef, Advocate (23 July 1907) H. E. Dimitri Standoff, Minister Plenipotentiary at Paris (23 July 1907).

# STANFORD'S LIBRARY MAPS OF THE CONTINENTS.

Uniform in Size and Price

Four Sheets, Coloured, 85s; Mounted to fold in Morocco Case, 60s;  
Mounted on Rollers & Varnished, 45s; Mounted on Spring Roller, £5

Size of each Map 58 inches by 65 inches

**EUROPE** Stanford's Library Map of Europe, New and Revised Edition, showing the boundaries of the various states. Rail ways are distinctly delineated principal roads and submarine telegraph lines are also given. This is the largest and most detailed map of Europe published Scale — 50½ miles to an inch (1 : 3 220 177).

**ASIA** Stanford's Library Map of Asia, New and Revised Edition The physical features of the country are laid down from the latest surveys roads railways canals caravan routes, mountain passes, and submarine cables are given Scale — 110 miles to an inch (1 : 6,969 800).

**AFRICA** Stanford's Library Map of Africa, New and Revised Edition, embodying the results of the most recent explorations, and presenting on a large scale an accumulation of all the facts known with regard to this continent. The political boundaries have been carefully revised, the agreements arrived at between the several European Powers and the territory under British influence being properly coloured. Roads, railways, and submarine cables are inserted and the hill features are delineated in a subdued tone so as to preserve the clearness of the map. Scale — 94½ miles to an inch (1 : 5 977 389).

**NORTH AMERICA** Stanford's Library Map of North America, New and Revised Edition, forming a compendium of political, historical and geographical facts connected with that division of the American continent. The boundaries of the various states are clearly marked railways canals, and submarine telegraph cables are inserted the leading physical features are given in such a way as not to interfere with the topography Scale — 58½ miles to an inch (1 : 3 274 200).

**SOUTH AMERICA.** Stanford's Library Map of South America, New and Revised Edition, showing the most recent political boundaries of the various states and the general geography of the continent. Railways, canals, and submarine telegraph lines are clearly shown and the hill features shown in such a way as not to interfere with the topography of the map Scale — 82½ miles to an inch (1 : 3 274 730).

**AUSTRALASIA.** Stanford's Library Map of Australasia, Denoting by colour the various colonies. Tasmania and New Zealand are shown in their relative positions, New Caledonia, New Guinea, and the adjacent parts of the Asiatic Archipelago are given railways, main roads, and submarine cables are shown An inset chart of the world indicates the relative positions of Australia and the other British possessions. Scale — 64½ miles to an inch (1 : 4,089 094).

## The Man of Affairs

requires among his Reference Books a good, reliable Atlas—one that can be depended on at every turn. Such an Atlas is the **ROYAL ATLAS**. The Geographical Information contained in the latest Edition is Accurate and Reliable, and of the very latest so that the

Man of Affairs may consult it with perfect confidence and rely upon it absolutely.

### The Royal Atlas

contains many unique features that are not to be found in other atlases. Its **60 full-page Maps** are magnificently printed on thick plate paper in colours and in a special manner that increases the beauty and clearness of the maps. *A special index is given to each map, which by an unique arrangement enhances its usefulness and makes the location of any place easy and rapid.*

A general index of the principal places is also given at the end of the volume.

Superbly bound in half morocco

**Price - - 24 4s. net.**

## NATIONAL INSURANCE,

By A. S. COMYNS CARR, W H STUART GARNETT,  
Barristers-at-Law, and J H TAYLOR, M.A., M B., Member  
of the Council of the British Medical Association. With a  
Preface by the Rt Hon. D LLOYD GEORGE, M P

Third Edition, revised and enlarged, containing the  
Model Rules, Regulations and Forms

8vo. 7s. 6d. net.

*DAILY CHRONICLE*—"May certainly be regarded as the  
standard work on the new Act. Written with insight, knowledge,  
and a rare lucidity it is beyond question the most exhaustive  
exposition of the measure published."

*DAILY TELEGRAPH*—"An elaborate treatise upon the Act, as  
well as an elaborately annotated edition of the Act itself.  
A book into which the three authors have put an immense amount  
of conscientious and laborious work."

LONDON MACMILLAN AND CO., LTD

# The Spectator

## A WEEKLY REVIEW OF POLITICS, LITERATURE, THEOLOGY, AND ART. (LIBERAL-UNIONIST)

Established 1828

EVERY SATURDAY, Price 6d., by Post, 6½d

**T**HE *Spectator*, which circulates throughout the educated classes in the United Kingdom, the Empire and America, has the following among other features —

The news of the week is compressed into an animated narrative and thus readers of the paper are insured against missing the true bearing and the essential details of current events.

The leading articles deal in an independent and unconventional spirit with the chief matters of political, economic, and general interest.

Other articles treat of literary, theological, social, and artistic questions, and discuss interesting and curious aspects of natural history and country life.

Books of special interest and importance are dealt with in the long reviews, while the shorter notices give in a compressed form the judgment of equally competent critics on contemporary literature.

In the weekly review of novels, readers of fiction may find a useful guide for making out their lists for the circulating libraries.

The *Spectator* contains a List of all Books published during the week (not under one shilling in price) with the names of the publishers and the prices attached a feature which will greatly increase its value to booksellers, librarians, literary institutions and private persons.

**NARRATIVE OF THE VISIT TO INDIA  
OF THEIR MAJESTIES KING GEORGE V.  
AND QUEEN MARY AND OF THE  
CORONATION DURBAR.**

By the Hon John Fortescue    Illustrated  
8vo. 10s 6d net

**"THE TIMES" SAYS**

"Mr Fortescue is always interesting, and that capacity of his has happily survived this far from easy task. As every one will remember, he was chosen as a member of their Majesties' suite during the historic visit to India last winter in order that he should write the official chronicle of the tour, and here in a volume of moderate size is the result of his labours. Official chronicles are liable to suffer from two grievous faults. They are usually too meticulous and too impersonal, with the inevitable result that they are dull. Neither fault can be urged against Mr Fortescue's work. It has taken, in the first place, a thoroughly appropriate form, for it is not too ponderous to deter the general reader nor too sumptuous to strain the average purse.

Mr Fortescue has not been afraid of expressing his own views, and the result is a narrative with *verve* and *point*—a narrative, in fact, with all the qualities of Mr Fortescue's own mind. He will pause at any moment to throw you in a scrap of regimental history, which you swallow with delight. He will tell you, without shame, that he found his tent uncomfortable and other arrangements bad. He will keep the great Durbar itself waiting in order to swear at the colour of Indian official *batze*. His criticisms are numerous and sweeping, and in points of detail they are often sound. But, whether sound or not, they are Mr Fortescue's, and they give the book a character quite unlike the usual impartiality and reserve of an official chronicle."

LONDON    MACMILLAN AND CO, LTD

**"‘THE NATION’ is pre-eminently a progressive weekly, there is nothing of the stodgy in its pages."**

*The Newspaper Owner, March 2 1912*

---

# THE NATION

keeps its readers in touch with new or interesting movements in Politics and Social Affairs, furnishing them at the same time with serious, independent, and authoritative criticism in its articles on Religion, Art, the Drama, Finance and Literature. Bright in style, varied in subject, it commands a brilliant staff of writers. A special feature is made of domestic and external politics of Foreign Nations, while its Reviews, contributed by writers of unequalled authority in their special subjects, are always fresh and up-to-date

## An Important Recent Book

# SOUTH AMERICA :

Observations and Impressions

By the Rt. Hon. JAMES BRYCE, O M.

With Maps. 8vo. 2s. 6d net.

**Daily Mail.**—"Mr Bryce has written one of the most fascinating books of travel in our language, and he has at the same time contrived to give the world a valuable political study of the chief South American States."

**Daily News.**—"This book is a gift for which to thank the gods. It is impossible to give more than a faint hint of all the wealth of reflection, observation, and learning in these chapters. The whole book is memorable, worthy of the topic and the man."

**Daily Telegraph.**—"Although the author refers to the contents of this book as 'observations and impressions' made and recorded during a four months' journey in South America, his work is, as may be readily imagined, far from being the superficial study which such a description might imply. Accurate and essential information, cautious and well-considered speculation, judgment based not only on shrewd observation of the matter in hand, but on an easy familiarity with the comparisons afforded by the world at large and its history, these things go to the making of books which students prize. When they treat, as Mr Bryce's book treats, of races and civilisations imperfectly understood outside their own geographical borders, they may be said to possess an international value."

LONDON MACMILLAN & CO, LTD.

The . .

# Saturday Review ..

Price **SIXPENCE.**

THE SATURDAY REVIEW pays special attention to all matters affecting Foreign Affairs, the Church, and Social Politics. There are, also, special articles on Finance, and on the Literary, Artistic, Musical and Dramatic events of the week, by well known critics. Its politics are Tory, but the point of view is strictly independent.

### Or SPORT AND PROFIT IN BRITISH EAST AFRICA

By LORD CRANWORTH With Map and Illustrations  
8vo 12s net

**Daily Telegraph.**— It is a valuable and interesting work, at once descriptive and practical, that Lord Cranworth has written, valuable especially to those looking out for a field in which to utilise their energies and their capital to those who would understand local conditions of different parts of the Empire, and to those who would have first-hand information about a famous big game country, and deeply interesting to all readers who can enjoy well-informed and well-presented accounts of life in distant places. Lady Cranworth contributes a chapter of helpful 'Hints for a Woman in British East Africa' and the volume has many photographs which accentuate the strong appeal of the text."

**Times.**— 'Lord Cranworth gives a most excellent account of the progress of the colony down to the end of 1911, and it is safe to say that when the history of the last decade in East Africa comes to be written this book is one upon which the historian will considerably depend.'

**Globe.**— 'The book is one which will attract considerable attention. If it will not supersede Sir Charles Elliott's classic work on East Africa, it is worthy at least a place beside it on the shelf of the colonist, sportsman, and colonial student, to all of whom different chapters will make an appeal.'

**Morning Post.**— 'Singularity complete and well-informed account. Lord Cranworth sees things in the proper perspective, though his detailed account of the opportunities for shooting and fishing, to say nothing of cricket and other more artificial diversions, should satisfy the visiting sportsman, yet the chief value of his book consists in its wealth of accurate information regarding what are destined to be the staple industries of the country.'

By Henry Mayers Hyndman

## THE RECORD OF AN ADVENTUROUS LIFE.

With Portrait 8vo 15s net

**Athenæum.**—"Mr Hyndman has written a book which is not only of great interest to the general reader who seeks amusement, but also of permanent value to the student of English political history. It is amongst other things a remarkably interesting retrospect of English society and politics during the last forty years, and its pungency and out-spokenness give it a most refreshing flavour."

**Morning Post.**—"The book is interesting and delightful in its story of the full life of a vivacious and generous soul."

## FURTHER REMINISCENCES.

8vo. 15s net.

**Times.**—"Whatever Mr Hyndman writes is good reading, and this is even more the case with his *Further Reminiscences* than with his former autobiographical volume. The fact that the writer has lately celebrated his seventieth birthday seems only to make him livelier and younger than ever."

**Athenæum.**—"Mr Hyndman's second volume of reminiscences is of little less interest to the general reader than its predecessor, and is likely to be of more value to the student of our politics. The attempt to get an account of any but the most prominent movements of the 'seventies and 'eighties of last century is almost hopeless, and it is therefore specially useful to have a record of modern Socialists from one who has been connected with them from the first."

## PRESS OPINIONS

**THE TIMES** (of March 12, 1912) says—

"Retains those special features which give it a distinct place among directories concerned with the clergy of the Church of England. This handy book of nearly 2,000 pages contains much information not easily found elsewhere."

**THE SPECTATOR** (of March 30, 1912) says—

This annual volume deserves for its completeness and the care with which it is kept to date, the highest praise. It tells us all that we can reasonably expect to know about the organisation of the Church (dioceses, arrangement of benefices, patronage values, &c.), and the status of the clergy."

**THE WESTMINSTER**

**GAZETTE** (of March 11, 1912) says—

"The work, which has now appeared annually for nearly seventy years, has several special features. The work has been corrected as nearly up to date as possible, and remains one of the most useful, accurate, and handy books of reference on the subject with which it deals."

**THE CHURCH TIMES** (of March 15, 1912) says—

"We have from constant use, found this Directory practically without fault, which is high commendation considering the number of appointments contained in the book."

## THE BROAD STONE OF EMPIRE.

Problems of Crown Colony Administration, with Records of Personal Experience. With Maps and Portrait 2 Vols 8vo 30s net.

*TIMES* — "Sir Charles Bruce is a veteran in the work of colonial government and administration. His long varied, and distinguished career in the service of the Crown has entitled him to speak with high authority on all matters connected with the important and responsible business to which his life has been devoted.

The student who reads Sir Charles Bruce's book with discrimination will derive much advantage and instruction from it. He has invested the Crown Colonies and Places of the Empire with a dignity, an importance and an interest which are assuredly no more than their due, but which have for various reasons been more or less obscured of late in the minds of many Imperial thinkers."

SIR EVERARD IM THURN in the *QUARTERLY REVIEW* — "Sir Charles deals in masterly fashion with the problems of education, in its widest sense, with the transportation of labour from places where it is not needed to places which can only be developed by some such method, with mail services and other means of communication with defence duly organized from the centre of the Empire &c and he treats all these subjects from the position of one minutely considering the development of the Crown Colonies as a really important and integral part of the Empire. The questions raised or suggested by this valuable work are so many and various that a lengthy treatise might be devoted to their examination."

## THE TRUE TEMPER OF EMPIRE WITH COROLLARY ESSAYS.

8vo 5s net

*DAILY CHRONICLE* — "Sir Charles Bruce's book will be of great interest and use to students of Imperial problems."

*STANDARD OF EMPIRE* — "Students of Imperial affairs will have a warm welcome for any new book bearing the name of the author of that admirable work, 'The Broad Stone of Empire.' Sir Charles Bruce's latest work, 'The True Temper of Empire,' is thoroughly and in every sense deserving of such a welcome, and should receive careful consideration from all thoughtful British readers. In the essays of which this volume is composed the author discusses with statesmanlike breadth of vision and real penetration the working of this temper in the maintenance of a united Empire, and in his concluding chapter, of a united Kingdom. The book is in every page worth reading."

## A NOTABLE RECENT BOOK

### SEEMS SO !

A Working class view of Politics By STEPHEN REYNOLDS and BOB and LOM WOOLIES With Frontispiece Extra crown 8vo, 5s net.

**Times.**—"One dominant feature of the book is the impression of sincerity which it leaves, sincerity accompanied by its natural complement, a keen sense of humour. The strong common sense, the fearlessness, lucidity, and humour of this book will make many who disagree most strongly with its arguments recognise most clearly its usefulness in enabling them to look at the questions of the day from a new point of view."

**Daily Express.**—"A book of the first sociological importance and of the most splendid human interest. It is no tract. It is far more fascinating than nine hundred and ninety nine novels out of a thousand. It is the revelation of the mind of the people."

# KING'S NEW PUBLICATIONS

## IMPERIAL DEFENCE AND CLOSER UNION

By HOWARD DEQUILLE. With a Preface by Col the Rt Hon J E B SEELY D.S.O., M.P., Secretary of State for War and an Introduction by Rear Admiral Sir CHARLES OTTLEY, K.C.M.G. Demy 8vo. Cloth, 7s 6d net. (*Inland Postage 4d*)

This work is a record of the life-work of the late Sir JOHN COLCLOUGH, and of the movement towards Imperial organisation. The Author also deals with the constitutional aspects of Closer Union, which Sir John Colclough always believed to lie at the root of any satisfactory system of Imperial Defence.

## NATIONAL LIFE AND NATIONAL TRAINING

By GENERAL SIR IAN HAMILTON G.C.B. D.S.O. Inspector General of the Overseas Forces. Crown 8vo, 6d. net. (*Inland Postage 1d*)

## TARIFFS AT WORK

An Outline of Practical Tariff Administration, with special reference to the United States and Canada. By JOHN HEDLEY HIGGINS, B.Sc. (Econ.) Mitchell Student of the University of London. Cloth, 2s net. (*Inland Postage 5d*)

This treatise embodies some results of an inquiry undertaken by the Author as Mitchell Student of the University of London. A most interesting portion was the practical investigation of tariff administration in the United States and Canada, which the Author was able to make on his visit to those countries in the spring of 1910.

## LEASEHOLD ENFRANCHISEMENT

The Case for and against, and a Practical Scheme. Relief against Restrictive Covenants in Leases. Scheme for Continuity of Tenure. By E. A. COLLINS. Crown 8vo. Cloth, 2s. 6d net. (*Inland Postage 8d.*)

CONTENTS. Introduction—Support of Compulsory Enfranchisement. The Case against Compulsory Enfranchisement—Proposed System—Relief against Onerous Covenants restricting Alterations and Additions and the Loss of Property—Continuity of Tenure—Conclusions—Index.
